The Labour Force, Week ended December 9, 1972 - Advance Information.

Between November and December, there was a less-than-usual decrease in employment but a greater-than-usual increase in unemployment. The latter caused an increase in the seasonally-adjusted unemployment rate to 6.8 in December from 6.6 in November.

The labour force, increased by 42,000 to 8,929,000 in December, whereas it usually decreases at this time of year, and the number of employed persons decreased by 18,000 to 8,345,000.

There were 584,000 unemployed persons in December compared to 524,000 in November. The unadjusted unemployment rate, representing the actual number of unemployed as a percent of the labour force, was 6.5 in December up from 5.9 in November.

Estimates (not adjusted for seasonality)

	Dec. 1972	Nov. 1972	Dec. 1971
Labour Force (000's)	8,929	8,887	8,655
Employed (000's)	8,345	8,363	8,125
Unemployed (000's)	584	524	530
Unemployment Rate (Unemployment as a percentage of labour force)	6.5	5.9	6.1

Compared to a year ago, the labour force was up 274,000 (3.2%); employment was up 220,000 (2.7%); and unemployment was up 54,000.

For further information, order *The Labour Force, December 1972* (71-001, 30¢/\$3).

Canadian Exports by Region of Lading, January-September 1971-72 - Published only in Statistics Canada Daily and Weekly Bulletin.

In the first nine months of 1972 domestic exports from Canada increased 8.6% over the same period of 1971. A strong second quarter followed by a temporary slowing of growth in the third quarter was apparent nationally and in regional patterns, particularly in Ontario and the Prairies. Among the factors contributing to the sharp third-quarter reduction were a long closing for model changeover in the Ontario automotive industry and shipping strikes on the Pacific coast, affecting the movement of wheat, coal and other bulk commodities from Western Canada.

Exports laded in the Atlantic region to the end of September 1972 were up 15.8% (\$94 million) from a year earlier, largely on \$34-million increases in shipments of both paper and fuel oil to the United States, with new or extended refinery capacity. Exports of chemicals, fishery products and lumber also increased, while moderate declines were recorded in shipments of asbestos and metals.

Exports laded in Quebec declined by \$83 million or about 3%. Iron ore shipments dropped \$70 million, partially as a result of strikes in both shipping and mining. Automotive products - with the conversion of the Ste. Thérèse plant to assemble a new carline - were down some \$60 million, aluminum about \$45 million, and pulp \$15 million. On the other hand, exports improved for paper (up \$35 million), lumber (\$25 million), and more moderately for copper and aircraft and parts.

Ontario exports increased 10.7% or \$593 million. Automotive products accounted for most of the growth, increasing by about \$390 million. Shipments of aircraft and parts rose some \$80 million, and sales of office machines and computer parts increased about \$40 million. Exports of farm machinery and nickel each gained \$20 million. Declines of some \$20 million each were recorded for copper and for iron and steel fabricated shapes, following strike-hedge purchasing in 1971 in the United States.

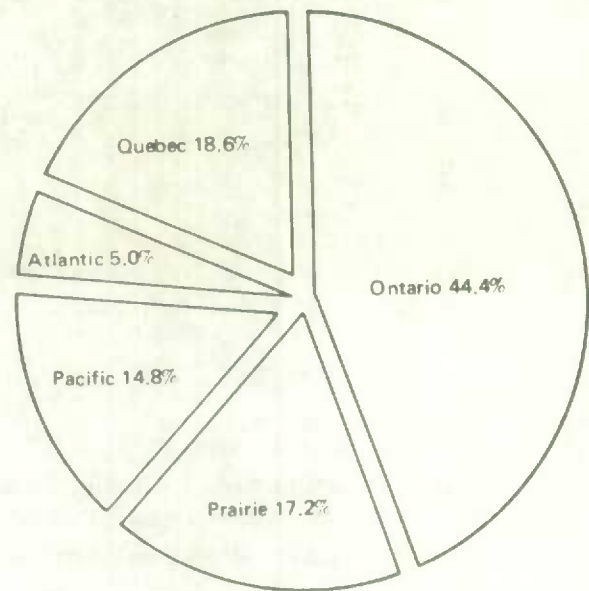

Prairie exports rose by \$188 million or 8.6%. Deliveries of crude petroleum and natural gas to the United States represented roughly \$170 million of the increase. Increases of some \$15 million each occurred for meat, wheat, lumber, and pulp and paper. However, shipments of oilseeds and nickel metal each dropped by some \$25 million.

The Pacific region growth rate, at 17.4% was twice that for the country as a whole. Lumber sales accounted for over \$140 million or nearly half of the \$304-million growth. Exports of copper ore were about \$50 million higher, followed by fisheries products and by crude petroleum and natural gas, each group rising by \$25 million.

For further information, contact Mr. Wm. MacLeod (613-992-8896) External Trade Division, Statistics Canada, Ottawa K1A 0Z9.

Exports by Region*

*Adjusted to assign all exports of commodity groups 61 (cereals) and 212 (oilseeds) to Prairie Region.

Sales and Purchases of Securities Between Canada and Other Countries, September 1972 (67-002, 20¢/\$2).

International transactions in all long-term portfolio securities resulted in a net inflow to Canada of \$313 million in the third quarter of 1972. This was down sharply from the previous quarter when the net inflow of \$611 million reflected the placement abroad of a record \$491 million of new issues of provincial governments and their enterprises. Geographically, there were net inflows of \$8 million from the United States, \$17 million from the United Kingdom, \$200 million from continental Europe and \$88 million from all other countries.

International transactions in the Canadian money market during the third quarter gave rise to a net outflow of \$133 million compared to a net outflow of \$248 million in the previous quarter. The large net

sales of Canadian money market paper abroad which occurred during the first quarter of the year did not continue into the second and third quarters. The reduction in net sales was coincident with a narrowing of covered interest rate differentials between Canada and the United States.

Trade in outstanding securities between Canada and other countries during September resulted in a net capital inflow of \$81 million as Canadian investors sold, on balance, \$55 million of Canadian securities and \$26 million of foreign securities. In the previous month the net inflow was \$26 million lower with total turnover \$161 million higher. Geographically, trading in all outstanding issues led to net inflows of \$9 million from the United States, \$8 million from the United Kingdom, \$50 million from continental Europe and \$14 million from all other countries.

1971 Census of Agriculture – Acreages of Forage Seed – Advance Information.

There were 736,292 acres of forage seed harvested in Canada in 1970. Slightly more than half the total was reported in Alberta, with important acreages in Saskatchewan, Manitoba, Ontario and British Columbia. Red clover, creeping red fescue and alsike were the crops with the highest reported acreages.

Further information will be published in the Volume Series of Census reports, but advance details, including acreages by census divisions and subdivisions (where confidentiality can be maintained) are available from Mr. H.K. Scott, Census of Agriculture Subdivision, Statistics Canada, Ottawa, K1A 0T7 (613-996-5478).

1971 Census of Agriculture – Mortgages or Agreements for Sales – Advance Information.

Of the 366,128 farmers enumerated in the 1971 Census, 346,928 owned or partly owned the land they farmed. Of these, 155,650, or 44.9% reported mortgages or agreements for sale on at least part of their agricultural land and buildings. Government agencies held 61.5% of the encumbrances reported; private individuals 25.3%; banks and insurance, loan, trust and mortgage companies 15.1%; and other sources 9.9%.

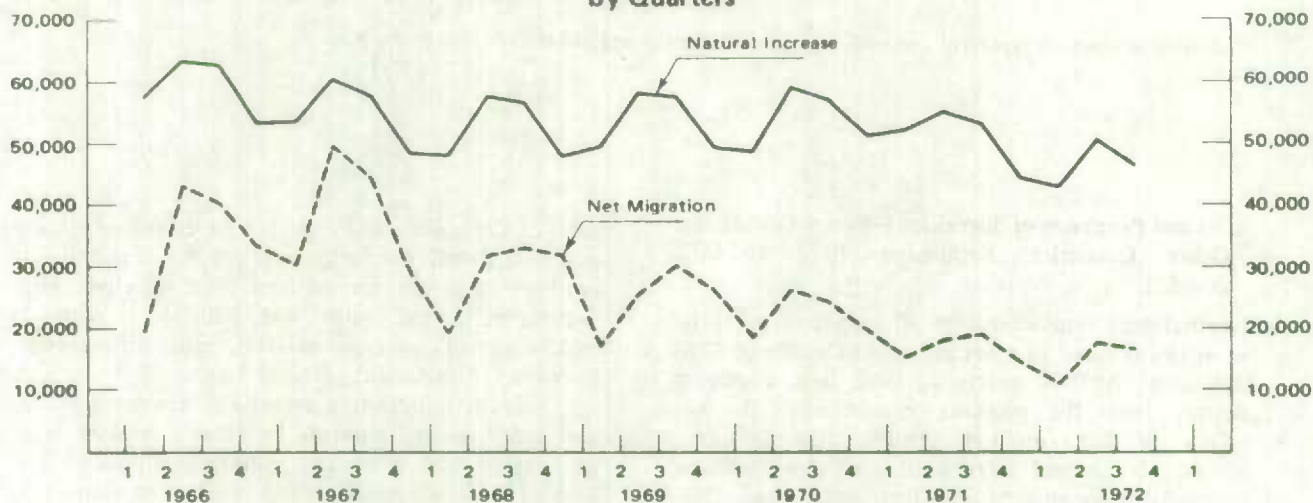

Further information will be published in the Volume Series of census reports, but advance details, including data for census divisions and subdivisions (where confidentiality can be maintained) are available from Mr. H.K. Scott, Census of Agriculture Subdivision, Statistics Canada, Ottawa, K1A 0T7 (613-992-5478).

Quarterly Estimates of Population for Canada and Provinces, October 1972 (91-001, 25¢).

Canada's population reached an estimated 21,912,000 on October 1, 1972. This was 247,000

more than a year earlier. British Columbia had the fastest growth over the year – 2.9% to 2,269,000 – and Saskatchewan was the only province to show a decrease – 1.3% to 912,000.

POPULATION GROWTH 1966–1972 by Quarters

Summary Housing Characteristics. 1971 Census (93-744, 50¢).

More Canadian households lived in apartments or flats and rented dwellings at the time of the 1971 Census than ever before. Rented dwellings of all types increased by nearly 850,000 to represent 40% of total housing, up from 34% in 1961.

The number of occupied apartments increased by

548,000 between 1961 and 1971, rising to 28% of Canadian dwellings, from 25%.

Occupied apartments increased 137% in British Columbia, 134% in Newfoundland, and 86% in Ontario.

The number of attached dwellings (including town houses and garden homes) also increased particularly in Quebec (up 124%), British Columbia (60%), Ontario (46%), and Alberta (45%).

(continued)

Mobile homes multiplied from two to six times their 1961 levels in every province but Ontario and Saskatchewan. They increased 79% in Saskatchewan and 77% in Ontario. The national total jumped to 64,000 in 1971 from fewer than 20,000 ten years earlier.

While the total number of dwellings grew by a third in the ten-year period, dwellings equipped with and flush toilets 47%. As a result, by 1971, 96% of Canadian households had running water, 93% the use of a bath or shower and 94% had flush toilets. Comparable figures for these facilities in 1961 were 89% for running water, 80% for bath or shower and 85% for flush toilets. running water increased by 43%, bath or showers 53%

Canada's Mineral Production (Preliminary Estimate), 1972 Advance Information.

The value of Canada's mineral production increased 7.0% to a record high of \$6.4 billion in 1972. The largest gain was in the fuels sector, which grew 15.6% to \$2.3 billion. At \$3 billion, the metals sector continued to have the largest value, up 1.8% from the previous year. The non-metals group gained 6.3% to \$532 million, and structural materials 4.8% to \$534 million.

For further information order *Canada's Mineral Production, Preliminary Estimate, 1972* (26-202, 50¢) or contact Mr. A.J. Symons, Manufacturing and Primary Industries Division, Statistics Canada, Ottawa, K1A 0V6 (613-992-0491).

Farm Implement and Equipment Sales, 1971 - Advance Information.

Sales of new farm implements, equipment, attachments and repair parts increased by 17.1% to \$402,978,169 in 1971 from \$344,012,361 in 1970. The value of repair parts, included in these totals,

increased to \$76,812,675 from \$65,031,758, and the value of sales of tractors and engines increased to \$117,369,565 from \$102,597,240.

Detailed information will be released in the publication *Farm Implement and Equipment Sales, 1971* (63-203, 50¢).

For further information, order *New Residential Construction*, November 1972 (64-002, \$4 a year, \$6.40 outside Canada).

Department Store Sales by Regions, November 1972 (63-004, \$1 a year).

During November 1972, department store sales rose in Canada by 16.3% over the corresponding month last year, with regional changes as follows: Atlantic Provinces, 17.8%; Quebec, 21.6%; Ontario, 13.2%; Manitoba, 13.6%; Saskatchewan, 14.9%; Alberta, 20.7% and British Columbia, 16.2%.

Passenger Bus Statistics, November 1972 — Advance Information.

In November, 43 intercity and rural bus companies carried 3,033,149 passengers. This was 13.5% less than the 3,506,287 carried a year earlier. Their busses travelled 9,304,180 vehicle miles (down 1.5%) and consumed 1,232,404 gallons of diesel oil (down from 1,241,684) and 86,863 gallons of gasoline (down from 91,147). Total operating revenue increased 4.2%

to \$6,617,249.

For further information, order the November issue of *Passenger Bus Statistics* (53-002, 50¢/\$2).

Railway Operating Statistics, September 1972 — Advance Information.

Railway operating revenues of \$161.9 million were reported for the month of September by 24 common carrier railways operating in Canada. This was 1.7% higher than the \$159.2 million reported for September 1971. Operating expenses, however, rose 6.9% to \$154.7 million leaving net operating income 49.9% lower at \$7.3 million.

Revenue freight ton-miles rose 1.7% to 10,711 million, but revenue passenger-miles declined 5.6% to 172.3 million.

For further information order the September issue of *Railway Operating Statistics* (52-003, 10¢/\$1).

Railway Transport, Part V, (Freight Carried by Principal Commodity Classes), 1971 — Advance Information.

Total revenue freight loaded by all common carrier railways in Canada during 1971 rose 2.3% to 212.6 million tons compared with 207.9 million tons in 1970. Receipts from United States railways declined 8.4% to 23.8 million tons leaving total tonnage carried up 1.1% at 236.4 million tons.

Major increases occurred in the volume of food, feed, beverages and tobacco; inedible end products; special types of traffic and non-carload freight. There was a substantial decline in the tonnage of live animals handled.

For further information, order *Railway Transport, 1971, Part V (Freight Carried by Principal Commodity Classes)* (52-211, \$1.50).

Weekly Railway Carloadings, December 21, 1972 — Advance Information.

Railways in Canada loaded 4,429,229 tons of revenue carload freight during the 7-day period ending December 21. This was 19.6% more than in the comparable period of 1971. Year-to-date loadings increased 0.1%.

For further information order the December issue of *Railway Carloadings* (52-001, 20¢/\$2).

Canadian Pacific Limited, 1923-71 — Advance Information.

Rail revenues of Canadian Pacific Limited have more than tripled since 1923 reaching \$727.4 million in 1971. Net rail operating income after income taxes but before fixed charges showed a much smaller increase to \$49.1 million in 1971 from \$40.3 million in 1923. Including net income from non-rail operations, however, corporate net income before fixed charges nearly doubled over the period to \$95.2 million from \$49.0 million. Final net income after fixed charges recorded a similar gain to \$61.5 million in 1971 from \$34.4 million in 1923.

Revenue freight carried more than doubled over the period from 32.9 million tons to 78.8 million

tons, however revenue passengers carried dropped sharply from 16.2 million to 5.2 million.
