# Consumer Price Indexes for Regional Cities

Consumer price indexes rose in all regional cities in June with increases ranging from 0.9% in St. John's to 1.2% in Montreal and Edmonton.

Generally higher prices for ment, especially beef and pork, fresh produce and dairy products contributed to a rise in the food index in all centres. Other factors which contributed to advances in the all-items indexes were the higher cost for shelter, both owned and rented accommodation as well as increased prices for items associated with the operation of the household including appliances. There were also higher charges for dry cleaning and laundry services, intercity transportation fares for air, rail and bus, and recreation equipment.

Between June 1974 and June 1975, consumer price indexes rose in all regional cities: St. John's, 10.2%; Halifax, 8.7%; Saint John, 10.8%; Quebec, 9.4%; Montreal, 10.5%; Ottawa, 8.8%; Toronto, 10.2%; Thunder Bay, 10.8%; Winnipeg, 12.0%; Saskatoon, 10.1%; Regina, 9.5%; Edmonton, 10.0%; Calgary, 11.1%; and Vancouver, 10.6%.

# Real Domestic Product

(1961=100)

Canada's seasonally-adjusted index of real domestic product was unchanged in May at 201.8 from the upwardly-revised April level. The index of industrial production fell 0.5%, the 11th monthly decline in the last 13 months.

Output of goods-producing industries decreased 0.6% in the latest month with forestry and mining showing major drops. Forestry output declined because of a lower domestic demand from the pulp and paper industry and reduced export demand. In mining, decreases were in crude petroleum and natural gas — due to lower exports to the U.S. market — and most of the metal mines.

Total manufacturing production declined slightly with non-durable goods output unchanged and durable goods showing a decrease of 0.4%.

The construction output index rose 1.5% but was still below the January 1975 level.

Output of service-producing industries increased 0.5% in May with trade, transportation, storage and communication the main contributors to the advance.

In retail trade (up 1.0%), gains were widespread. Wholesale trade rose 1.9% with increased sales of automotive parts and accessories, household electrical appliances and grain.

**Unemployment Insurance Payments** 

Net benefit paid to claimants under the Unemployment Insurance Act reached \$271 million in May, an increase of 34% from \$202 million a year earlier.

Initial and renewal claims received in May numbered 197,000, up 15% from the May 1974 total of 172,000.

For the first five months of 1975, net payments under the act amounted to \$1.52 billion, an increase of 38% from the \$1.10 billion disbursed in January-May 1974.

Cumulatively, restaurant receipts for the first five months of 1975 totalled an estimated \$739.6 million, up 10.5% from January-May 1974.
