NEW...NOW AVAILABLE

Domestic and Foreign Control of Manufacturing Establishments in Canada is the title of a new biennial series of reports that will provide a wealth of information on control of manufacturing at the national, provincial and Census Metropolitan Area levels.

Until now, statistics issued on a regular basis pertaining to domestic and foreign control of manufacturing have been based on company returns. By utilizing returns of individual establishments (plants), this new series is able to distribute the data geographically and industrially in a fineness of detail not possible with data for entire companies, which may be active in several industries and regions. Additionally, this system makes available new data on employment and value added at the previously-mentioned levels.

The first issue of this new publication covers 1969 and 1970 and contains extensive analytical comment on these new series. For further information, order *Domestic and Foreign Control of Manufacturing Establishments in Canada*, 1969 and 1970 (31-401, \$3.50) or contact H.D. Potter (613-992-9654), Manufacturing and Primary Industries Division, Statistics Canada, Ottawa K1A 0V6.

A publication on a related subject, Industrial Organization and Concentration in the Manufacturing, Mining and Logging Industries, begun as an occasional paper for 1968, will now also become a biennial series. This publication shows, among other things, the relative importance of the largest four, eight, etc., enterprises in selected industries. The latest issue of this report (31-402, \$2.10) covers 1970, with publication of 1972 data expected within the next few months.
