

Friday, July 19, 1991

## OVERVIEW

## Sharp Declines in Imports and Exports

Total merchandise imports plunged $6.2 \%$ in May to the lowest level recorded since July 1988, and following two monthly increases, exports were down $3.5 \%$.

- Manufacturing Shipments Maintain Rising Trend

In May, Canadian manufacturers' shipments rose $0.9 \%$ to $\$ 23.3$ billion, the third consecutive monthly increase following declines in the four previous months.

## Number of Foreign Visitors Continues to Fall

The seasonally adjusted number of foreign visits of one or more nights to Canada declined $0.8 \%$ in May, moderating from drops of $1.8 \%$ in April and $1.9 \%$ in March.

## Sharp Declines in Imports and Exports

Imports were down $6.2 \%$ in May to $\$ 10.4$ billion, the lowest monthly total since July 1988. The drop was largely due to across-the-board decreases within the machinery and equipment sector, which registered an overall loss of $12.7 \%$, and the industrial goods and materials sector, which posted a $7.6 \%$ decline. Both of these sectors had registered import gains in April. Following a 7.7\% increase in April, imports of automotive products increased $3.7 \%$, to partially offset the overall decline.

Total merchandise exports fell $3.5 \%$ in May to a level of $\$ 11.6$ billion, following two monthly increases. The largest contributor to the decrease was the machinery and equipment sector in which exports plunged $16.1 \%$ to $\$ 2.2$ billion, the lowest monthly level since October 1989. Exports in the energy products sector also registered a major
(continued on page 2)

## ... Sharp Declines in Imports and Exports

decrease. The $7.8 \%$ fall reflected lower exports of crude petroleum and other energy products as exports of natural gas went up. A $2.9 \%$ increase in the automotive products sector moderated the overall drop in exports. This third consecutive monthly increase brought the level to $\$ 2.7$ billion, the highest since October 1990.

The trade balance was up $\$ 266$ million to $\$ 1.2$ billion, the highest level since June 1990. A $\$ 1.5$ billion surplus with the United States contrasted with deficits with all other major trading partners.
For further information, order Preliminary Statement of Canadian International Trade (catalogue number 65-001P) or contact International Trade Division at (613) 951-9647. (See also "Current Trends" chart on page 6.)

## Manufacturing Shipments Maintain Rising Trend

In May, Canadian manufacturers' shipments rose $0.9 \%$ to $\$ 23.3$ billion, the third consecutive monthly increase following declines in the four previous months. Only nine of the 22 major groups posted advances, in contrast with April when the increase was broadly based. The motor vehicle and wood industries accounted for most of the overall gain in shipments, the former posting the third straight increase $(6.1 \%$ ) following four monthly declines. Shipments in the wood industry were up $7.7 \%$, the fourth straight monthly gain.

After having risen in April for the first time in eight months, unfilled orders declined $1.8 \%$ in May to $\$ 24.7$ billion. Most of the decrease was attributable to the transportation equipment industry which registered a $2.3 \%$ drop, also following its first rise in eight months. New orders fell $2.3 \%$, after registering a sharp $4.8 \%$ increase in April, their largest gain since March 1988.

Inventory levels decreased $0.9 \%$ in May to $\$ 36.3$ billion, the fifth consecutive monthly decline. The fall was mainly attributable to the refined petroleum and coal products industry, which registered a fifth consecutive decrease, and to the chemical products and primary metals industries, both of which recorded lower inventory levels for the second straight month. These decreases were partly offset by an increase in the transportation equipment industry.

The inventories to shipments ratio decreased from 1.59 in April to 1.56 in May, the third consecutive decline.
For further information, order Monthly Survey of Manufacturing (catalogue number 31-001) or contact Industry Division at (613) 951-9832. (See also "Current Trends" chart on page 6.)

## Shipments

Manufacturers' Shipments, May 1991
Unadjusted Data

| Province | Total |  |
| :--- | ---: | ---: |
|  | \$ millions | \% change <br> previous year |
|  |  |  |
| Canada | 25,106 | -6.6 |
| Newfoundland | 114 | -3.1 |
| Prince Edward lsland | 66 | 23.5 |
| Nova Scotia | 489 | 0.6 |
| New Brunswick | 517 | -2.4 |

| Saskatchewan | 346 | -3.4 |
| Alberta | 1,691 | 2.2 |
| British Columbia | 2,085 | -6.6 |

## Number of Foreign Visitors Continues to Fall

In May, the seasonally adjusted number of foreign visits of one or more nights to Canada declined $0.8 \%$, moderating from declines of $1.8 \%$ in April and $1.9 \%$ in March. These decreases have reversed the modest upward trend in foreign travel to Canada noted since the second half of 1990 . Following much larger declines in April and March, overnight trips by residents of the United States edged down $0.3 \%$ in May. The number of visitors from other countries also registered a third monthly decline. The $3.0 \%$ loss from last month was more than twice the decrease posted in April, but still smaller than the 4.7\% drop in March.

The number of overnight trips abroad by Canadian residents fell $1.2 \%$ in May, following three consecutive monthly increases. Trips to countries other than the United States were down 2.1\%, after having registered increases in April and March. Following three straight monthly increases, the number of Canadians travelling to the United States also fell ( $-1.1 \%$ ).

Same-day travel (unadjusted for seasonal variation) to the United States by Canadian residents was $19.6 \%$ higher than its year-earlier

## Foreign Visitors

level while the number of same-day trips to Canada by residents of the United States registered a year-over-year decrease of $2.8 \%$.

## NEW FROM STATISTICS CANADA

## Canadian Economic Observer, July 1991

Led by a surge in exports to the United States, GDP rebounded in April. Household demand grew modestly, while inventories fell sharply. Labour market conditions softened in June, however, a reminder of lingering weakness in several important sectors of the economy

This summary of current economic conditions is excerpted from the July issue of the Canadian Economic Observer, Statistics Canada's flagship publication for economic statistics, now available.

This issue also contains a monthly summary of the economy, major economic events in June, the first quarter National Accounts, and a feature article on differences in wages and workers hired by large and small firms. A statistical summary contains a wide range of tables and graphs on the principal economic indicators for Canada, the provinces and major industrial nations.
For further information, contact Financial Flows Division at (613) 951-3627.

## 1989 FSA and Rural Postal Code Socio-economic Data

This database provides demographic and income characteristics of taxfilers for areas defined by the postal code. Up to nine tables are available for nearly 7,000 urban FSA's (Forward Sortation Areas) and rural postal codes across Canada.

The tables will prove invaluable to the business sector, analysts, planners, marketers, the academic community; in short, anyone requiring reliable and up-to-date data for small geographical areas.

## Highlights

Of the 52 selected cities, the following FSA's had the highest median incomes in 1989:

| City | FSA Median | City Median |
| :--- | ---: | ---: |
| Winnipeg (R3H) | $\$ 36,700$ |  |
| Toronto (M4T) | $\$ 35,400$ | $\$ 17,300$ |
| Edmonton (T6R) | $\$ 33,700$ | $\$ 20,900$ |
|  |  | $\$ 18,900$ |

The lowest median total incomes for FSA's were recorded in:

| City | FSA Median | City Median |
| :--- | ---: | ---: |
| Vancouver (V6A) | $\$ 5,900$ | $\$ 19,800$ |
| Winnipeg (R3A) | $\$ 6,600$ | $\$ 17,300$ |
| Quebec City (G1K) | $\$ 10,000$ | $\$ 17,600$ |

For further information, contact the Small Area and Administrative Data Division at (613) 951-9720.

## CURRENT TRENDS

In May, the Consumer Price Index year-over-year increase was down 0.1 percentage points to $6.2 \%$.

Shipments rose $0.9 \%$ in May, the third consecutive increase, while unfilled orders registered a $1.8 \%$ decline.

## Composite Leading Indicator

$\%$ change.

The Composite Leading Indicator rose $0.1 \%$ in April. the first advance in 15 months.

In June, the seasonally adjusted unemplayment rate rose 0.2 percentage points to the March level of $10.5 \%$

Total merchandise exports fell $3.5 \%$ in May and imports dropped $6.2 \%$ to the lowest monthly total since July 1988.
