OVERVIEW

Lower Crude Oil Prices Push Bown
Raw Materials Price Index

The Raw Materials Price Index decreased 2.3% in November, due mainly to a steep drop in the mineral fuels index.

Industrial Product Price Index Maintains Upward Trend

The Industrial Product Price Index rose for the fifth straight month, by 0.2% in November, as seven major groups of products posted increases.

■ Growth of GDP Minimal in October

Economic growth continued in October: real gross domestic product at factor cost crept up 0.1% after a gain of 0.5% in September and a marginal increase in August.

Growth of Average Weekly Earnings
Decelerates

Average weekly earnings of Canadian workers rose 1.0% between October 1992 and October 1993, the lowest year-over-year change in 10 years. Seasonally adjusted earnings reached a level of \$560.17.

Charitable Donations Increase in 1992

In 1992, nearly 5.5 million Canadians gave \$3.2 billion to charities, an increase of \$92 million or 3% from 1991.

Lower Crude Oil Prices Push Down Raw Materials Price Index

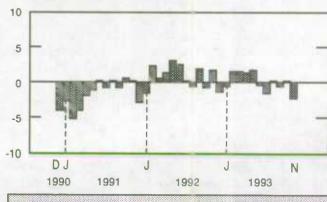

The Raw Materials Price Index (RMPI, 1986 = 100) stood at 110.0 in November, down 2.3% from its revised October level of 112.6. On a year-over-year basis, the RMPI was down 0.4%, marking the first year-over-year decline since April 1992. Excluding mineral fuels, however, the RMPI stood 9.2% above its level of a year ago.

In November, a 9.8% drop in crude oil prices pushed the mineral fuels index down 8.8%. Higher prices for natural gas (10.6%) only partially offset the decline. The mineral fuels index, which represents almost one-third of the RMPI, was 20.0% below its November 1992 level mainly because of a 21.9% dive in crude oil prices. The drop was moderated slightly by higher prices for natural gas (14.2%) and coal (4.1%).

(continued on page 2)

Raw Materials Price Index

% change, previous month

... Lower Crude Oil Prices Push Down Raw Materials Price Index

The animals and animal products index, which accounts for more than a quarter of the RMPI, declined 1.3% in November due to a 9.4% drop in prices for hogs. Hog prices, after increasing substantially for most of 1993, have declined in the last two months.

The vegetable products index increased 2.4% in November and stood 8.9% above its year-earlier level. Higher prices for grains and oilseeds were partly offset by a decline in raw sugar prices. Ferrous material prices rose 1.3%, due mainly to higher prices for iron and steel scrap which were up 32% since January.

After three straight months of declines, wood prices rebounded, rising by 1.1% in November. In comparison with November 1992, the wood index rose 27.8%, due mostly to higher prices for softwood logs (36.3%).

For further information contact Prices Division at (613) 951-9607.

Industrial Product Price Index Maintains Upward Trend

The Industrial Product Price Index (IPPI, 1986=100) advanced for the fifth straight month, by 0.2% in November. At 113.8, the index was 2.7% above its year-earlier level as all components showed higher prices except petroleum and coal products (-5.3%) and paper and paper products (-4.0%).

Seven major groups of products registered increases while eight declined and six remained unchanged. The increase in the IPPI was largely attributable to a 4.5% rise in the prices of lumber, sawmill and other wood products. This was the fourth consecutive monthly increase as softwood lumber prices continued their rise. Prices for this commodity group were 21.8% higher than in November 1992.

Prices for fruit, vegetable, feed and miscellaneous food products have risen steadily since August 1992. In November, the index rose 0.7% and reached a high of 117.8, largely because of higher prices for feed and canola oil. The index for rubber, leather and plastic fabricated products rose 0.4%, reflecting a 16.2% jump in the price of polystyrene.

These increases were partly offset by falling prices for petroleum and coal products (-1.0%), paper and paper products (-0.6%), and autos, trucks and other transportation equipment (-0.4%). For the latter component, this was the first decline since March 1993, due mainly to the downward change in the value of the U.S. dollar relative to the Canadian dollar.

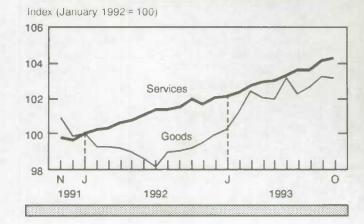

For further information, order Industry Price Indexes (catalogue number 62-011), or contact Prices Division at (613) 951-9607.

Growth of GDP Minimal in October

Following an increase of 0.1% in August and a gain of 0.5% in September, real gross domestic product at factor cost grew 0.1% in October. Services production rose 0.2%, equal to its average monthly growth so far in the year. Goods production, however, slipped 0.1% following significant increases in the previous two months.

The gain in services was led by increases in wholesale trade (0.6%), finance, insurance and real estate (0.5%), and transportation and storage services (0.5%). Sales by wholesalers increased for the sixth straight month. In the finance group, the advance was concentrated in mutual funds where assets and output continued to increase rapidly. However, real estate activities fell for a fourth consecutive month as the number of houses for sale declined and as housing resales fell in almost every province.

Gross Domestic Product Output by Sector

(continued on page 3)

... Growth of GDP Minimal in October

Retail sales edged up by 0.1%, but have remained near the same level for the last four months. A 0.2% decline in output of community, business and personal services, the third decline in the last four months, moderated the increases.

The cutbacks in goods production were concentrated in construction (-0.6%) and in mining (-1.2%). Construction activity decreased for the fifth consecutive month as residential construction fell 0.8% and non-residential construction dropped 0.9%. Mining output declined for the third time in four months as drilling activity slumped 10.5% in October alone.

Manufacturers increased production 0.1% as higher output of durable goods was mostly offset by lower output of non-durable goods. Forestry activity advanced 1.4% after increasing 2.1% in September. Demand abroad for Canadian lumber remained strong in October but was not sufficient to induce an increase in output.

For further information, order Gross Domestic Product by Industry (catalogue number 15-001) or contact Industry Measures and Analysis Division at (613) 951-9145. (See also "Current Trends" chart on page 6.)

Growth of Average Weekly Earnings Decelerates

In October, average weekly earnings of Canadian workers rose 1.0% from the previous year to a seasonally adjusted level of \$560.17. This was the lowest year-over-year increase since the survey began in 1983. The continuing trend of smaller increases in earnings was attributable to lower wage settlements, payroll cuts and a change in the employment mix towards lower-paying industries.

Newfoundland (3.4%), Prince Edward Island (1.8%), British Columbia (1.8%), Nova Scotia (1.4%) and Ontario (1.4%) recorded year-over-year growth rates exceeding the average for Canada. In contrast, Québec (-0.2%), the Yukon (-2.1%) and the Northwest Territories (-2.4%) registered negative year-over-year changes in average weekly earnings.

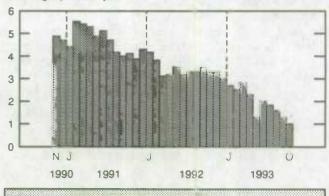

Year-over-year changes in earnings were lowest in accommodation, food and beverage services (-0.5%), business services (-0.4%), and transportation, communications and other utilities (-0.3%). These three industries accounted for 2,029,000 employees in October 1993.

Finance, insurance and real estate (4.7%) and manufacturing (2.5%) showed the largest year-over-year increases. Average weekly earnings stood at \$635.89 and \$676.67, respectively.

Employment remained slightly below 10.0 million in October. Employment gains in health and social services and in manufacturing were offset by declines in construction and retail trade. Payroll employment in construction dropped 1.5% from

Average Weekly Earnings

% change, previous year

Note to Users

The Survey of Employment, Payrolls and Hours covers all industries except agriculture, fishing and trapping, religious organizations, private households and defence services.

September, led by declines in trade contracting in Québec, Ontario and Alberta. Total construction employment was down 6.5% from October 1992.

For further information, order Employment, Earnings and Hours (catalogue number 72-002), or contact Labour Division at (613) 951-4090.

Charitable Donations Increase in 1992

Canadians continued to be generous in supporting charities in 1992 as approximately 5.5 million of them donated \$3.2 billion, an increase of \$92 million or 3% from 1991. However, tough economic times may have contributed to the reduction in the number of donors which fell by nearly 22,000 (0.4%).

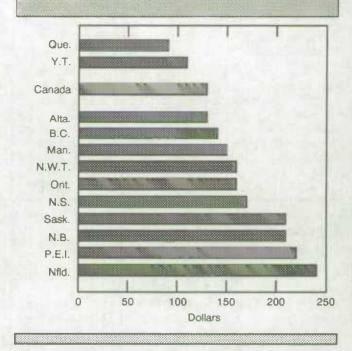

The 1992 Charitable Donors database provides information on contributions made by Canadians where an income tax receipt was provided. These data are available for Canada, the provinces, the territories, as well as for almost 24,000 postal areas.

The average charitable donation was \$586 in 1992 compared to \$567 in 1991. As in 1991, half of the contributors gave \$130 (the median amount) or more. A small number of Canadians contributed very large amounts in 1992, thus inflating the average. The median donation, however, was unaffected by these high contributions.

Once again, Newfoundlanders had the highest median contribution (\$240) for all of Canada while the lowest provincial median donation was in Quebec (\$90). Despite this, Hampstead, a region of greater Montreal, had the highest median donation of all cities (\$1,040).

Canadians aged 55 to 64 gave an average of \$1,500 to charities in 1992, the highest average donation. By comparison, those younger than 35, the category which gave the least, contributed an average of \$300. The age group with the second

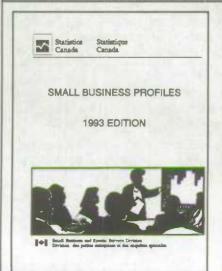

Median amount of charitable donations, 1992

highest average donation was the over-64 age bracket. Members of this group gave an average of \$840 in 1992.

For further information about the 1992 Charitable Donors Database, contact the Small Area and Administrative Data Division at (613) 951-9720.

NEW FROM STATISTICS CANADA

Small Business Profiles, 1993 Edition

Are you thinking of starting up a business? Do you wish to compare your situation with the average of similar small businesses?

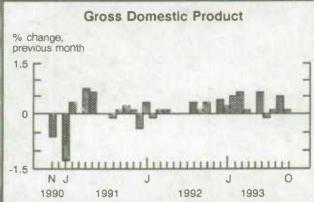

The Small Business Profiles are comprehensive reports which provide useful insights for potential and actual small and medium businesses. The profiles present detailed information on selected operating expenses as a percentage of revenues, balance sheet information, financial ratios and employment data. Profiles are available for over 4,000 combinations of industry and province (territory).

To order the Small Business Profiles, contact any Statistics Canada Regional Reference Centre. For more information, contact Katherine Blais (tel: 613-951-0822 or Fax: 613-951-1572), Small Business and Special Surveys Division.

CURRENT TRENDS

Economic growth continued in October: real gross domestic product at factor cost crept up 0.1% after a gain of 0.5% in September and a marginal increase in August.

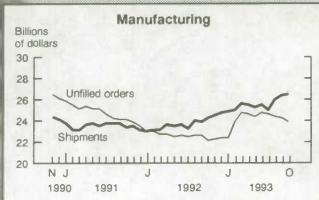

The growth of the composite index accelerated, rising from 0.4% in September to 0.5% in October, and then to 0.7% in November.

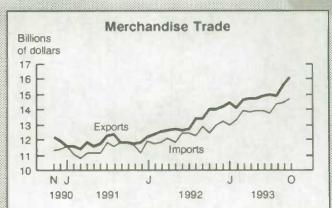

In November, the year-over-year increase in the allitems CPI remained unchanged for the third straight month at 1.9%. The food index rose by 1.7%, up from 1.5% in October.

The unemployment rate slipped from 11.1% in October to 11.0% in November.

Canadian manufacturers' shipments edged up by 0.2% in October to \$26.4 billion. The level of unfilled orders fell 1.4% to \$23.8 billion, the fourth straight monthly decline.

In October, seasonally adjusted merchandise exports climbed 3.2% to \$16.1 billion, while imports increased 1.8% to \$14.7 billion.
