## OVERVIEW

## Falling auto exports weaken trade surplus

Lower exports, due mainly to weak sales in the automotive sector, and stable imports lowered the merchandise trade surplus in April compared with March.

Wage and salary growth lowest in over a year
Wages and salaries rose only $0.7 \%$ in the first quarter of 1995, the slowest quarterly growth in over a year.

## - Consumer prices rise

In May, the consumer price index rose $2.9 \%$ from a year earlier. Between April and May, the CPI increased $0.2 \%$.

## - Retail sales up in April

After falling for three consecutive months, retail sales rose slightly in April.

- Wholesale merchants' sales slump In April, wholesale merchants' sales fell sharply compared with March, following three months of marginal growth.

Foreign trips to Canada reach new high
In April, a record 1.4 million foreign visitors spent at least one night in Canada

## Falling auto exports weaken trade surplus

After declines averaging 2.3\% in February and March, exports fell $0.6 \%$ in April to $\$ 20.5$ billion. Imports, at $\$ 18.8$ billion, were virtually unchanged from March. The merchandise trade surplus stood at $\$ 1.78$ billion, down $\$ 0.09$ billion from March. The trade surplus with the United States continued to grow. There were trade deficits with all other trading partners except Japan.

Much of April's export decline resulted from lower automotive exports, as weak vehicle sales and high dealer inventories in the United States continued to curb output. Also falling in April were exports of industrial goods and materials, and machinery and equipment. Higher exports of pulp (10.6\%) and newsprint ( $9.9 \%$ ) gave forestry exports a healthy boost. Energy exports were also strong in April, mainly from additional crude petroleum shipments bound for U.S. refineries. Year-to-date exports stand $29.2 \%$ above last year's level.
(continued on page 2)

## ... Falling auto exports weaken trade surplus

Imports were once again weakened by the auto sector, with declines in trucks and parts. Imports of energy products plunged $33.6 \%$, drawn down mainly by crude petroleum. Although volatile on a monthly basis, crude imports have trended upward over the past year. Import demand was propped up by consumer goods, industrial goods, and agricultural products, which collectively make up $37.4 \%$ of all imports. Advances in all consumer goods except printed matter averaged $3.8 \%$. Increased demand for industrial goods, which was satisfied mainly by non-U.S. suppliers, averaged $1.0 \%$. Flatter growth here reflected reduced Canadian manufacturing activity.

## Note to readers

Merchandise trade is only one component of th current account of Canada's balance of paymenis The current account also includes trade in services In the first quarter of 1995 , the overal merchandise trade surplus of $\$ 5.8$ billio contrasted with a current account deficit of $\$ 4$. billion.

For further information, order Canadian intern tional merchandise trade (catalogue 65-001) contact Suzie Carpentier, International Trad Division at (613) 951-9647. (See also "Curre) trends" on page 9.)

## Wage and salary growth lowest in over a year

Wages and salaries grew only $0.7 \%$ in the first quarter of 1995, the slowest quarterly growth in over a year. Few businesses expanded their workforces, as exports of manufactured goods weakened and consumers reduced spending. As a result, growth in wages and salaries slowed in January and February, while a decline ( $-0.4 \%$ ) was posted in March, the first since August 1994.

In the manufacturing sector, wages and salaries grew only $0.6 \%$ in the first quarter of 1995, substantially lower than the $2.5 \%$ increase of the previous quarter. Employment growth was sluggish and the weekly hours of hourly employees were reduced slightly, mostly as the result of less overtime. Production was cut in more than half of all manufacturing industries in February and March - particularly in the motor vehicle assembly, electronic equipment, and office machinery industries.

## Wages and salaries, March 1995

## Note to readers

Labour income consists of wages and salaries $(87 \%)$ plus supplementary labour income ( $13 \%$ ). Wages and salaries include items such as bonuses, gratuities, taxable allowances and retroactive wage payments. Supplementary labour income includes employer contributions to employee welfare, pension, workers' compensation and unemployment insurance plans. Labour income accounts for $57 \%$ of gross domestic product.

The transportation, communication and utilitie industry paid less wages and salaries in the firs quarter of $1995(-0.7 \%)$, following three quarterl increases of at least $1.0 \%$ in 1994. This decline wa partly due to March's rail strike and the widesprea، manufacturing slowdown. Falling demand for woo
(continued on page 3

Wage and salary growth lowest in over a year roducts and poor housing starts in Canada and the nited States caused wages and salaries in the orestry industry to fall $0.1 \%$, in contrast to the ubstantial growth of the two previous quarters.

Construction companies paid $2.9 \%$ less in wages and salaries, as slow consumer demand for new housing led to fewer housing starts in 1995.

Among the provinces, Newfoundland, Prince Edward Island and New Brunswick posted wage and salary increases twice the national average. This reversed the weakness recorded in these provinces in the previous quarter. In Ontario, wages and salaries grew only $0.04 \%$ in the first quarter, the lowest growth in the country and Ontario's lowest growth over the last five quarters.
For further information, contact Jean Lambert, Labour Division at (613) 951-4090.

## Consumer prices rise

In May, consumers faced higher annual price increases for goods and services than in recent months. The consumer price index (CPI) rose $2.9 \%$. This followed increases of $1.8 \%$ in February, 2.2\% in March and $2.5 \%$ in April. Price increases for gasoline, new cars, vehicle insurance, mortgage interest, coffee, selected fresh vegetables, and restaurant meals had the greatest impact on consumers. Lower prices for piped gas, electricity, and some personal care goods offered some relief.

Between April and May, the CPI increased 0.2\%. A large part of this rise resulted from a 4.9\% average increase in the price of gasoline. Steady price increases between February and May pushed gasoline prices $11.7 \%$ higher than a year earlier.

Affecting the CPI increase to a lesser degree were higher hotel-motel accommodation rates ( $5.8 \%$ ), increased fees for the use of recreational facilities, a $4.7 \%$ rise in homeowners' maintenance
and repair charges, and higher prices for paper products ( $3.7 \%$ ) and cigarettes ( $1.5 \%$ ). Food prices fell $0.6 \%$ following April's $1.1 \%$ rise. The drop came from lower prices for fresh vegetables and fresh meat products. The fresh vegetable price decrease was due mainly to new sources of supply which relieved the shortages resulting from crop damage in California. Prices also fell for clothing and footwear.

By region, Ontario and Manitoba showed the largest annual increase ( $3.2 \%$ ), while Newfoundland's CPI rose by only $1.8 \%$. Monthly increases fluctuated between $0.1 \%$ in British Columbia and $0.6 \%$ in Nova Scotia and New Brunswick.

For further information, order The consumer price index (catalogue 62-001) or contact Sandra Shadlock, Prices Division at (613) 951-9606. (See also "Current trends" on page 9.)

| Northwest Territories | 2.7 | 4.4 | 6.0 | 1.9 | 7.4 |

[^0]
## Retail sales up in April

Following three months of falling retail sales, consumers increased their spending on goods slightly in April.

Retail sales rose $0.2 \%$ to $\$ 17.5$ billion in April after receding $1.0 \%$ in March. Little change in employment, a slow housing market and low consumer confidence in recent months may have led consumers to continue their cautious spending. Sales so far in 1995 contrast with the general growth observed from early 1992 to November 1994.

Sales increased in four of the seven sectors, accounting for $48.5 \%$ of total sales. The food, drug and furniture sectors recorded the largest increases in dollar terms, while spending fell in the automotive, clothing, and general merchandise sectors.

Ontario retailers reported the largest drop in sales ( $-1.3 \%$ or $\$ 86$ million), their third consecutive monthly decline. Slow employment growth, high household debt and a squeeze on incomes caused this recent weakness. British Columbia reported the largest increase in dollar terms ( $2.2 \%$ ). Sales in all of Canada were only $13.5 \%$ above the 1992 average.

Early indications of May sales are more encouraging. Estimates indicate a rise in department store sales and in the number of new motor vehicles

Data prior to 1991 have been adjusted to remove the Federal sales tax to be comparable to January 1991 and subsequent data.
sold. These two categories account for about one third of total retail sales. Employment in trade industries, however, declined $0.3 \%$ from April 1995 Retail sales in the United States increased $0.2 \%$ in May after dropping $0.4 \%$ in April.
For further information, order Retail trade (catalogue 63-005) or contact John Suab, Industry Division at (613) 951-3549.

## Wholesale merchants' sales slump

Following three months of marginal growth, wholesale merchants' sales fell sharply in April compared with March, to a seasonally adjusted $\$ 20.3$ billion ( $-2.4 \%$ ). Sales remained $8.6 \%$ higher than in April 1994. Inventories were up marginally, bringing the inventory-to-sales ratio to levels not seen since the first half of 1993.

Wholesale merchant sales fell in seven of the eleven trade groups, accounting for about $75 \%$ of all sales. April's largest decline came from lumber and building materials wholesalers ( $-\$ 137$ million or $-7.4 \%$ ), which fell for the third consecutive month. A sluggish Canadian housing market and a construction slowdown in the United States contributed to the decrease. Wholesalers of automotive products also saw their sales drop due to poor automotive sales in Canada and the United States.

Wholesale activity tumbled in all regions but the Northwest Territories. Ontario accounted for more than $40 \%$ of April's total decline.

## Note to readers

Wholesale trade data now describe two additional trade groups (11 instead of 9). The first comprises food wholesalers, who have been separated from wholesalers of beverages, drugs, and tobacco. The second includes the other machinery, equipment and supplies trade group, which has been brokea down into two components: computer and packaged software wholesalers and wholesalers of industrial and other machinery, equipment and supplies.

Inventories rose moderately ( $0.4 \%$ to $\$ 30.3$ billion) despite a significant $2.4 \%$ drop in sales, suggesting that wholesalers adjusted to the weaker demand in the economy. The inventory-to-sales ratio jumped to 1.50 in April from 1.45 in March.
For further information, order Wholesale trade (catalogue 63.008) or contact Catherine Mamay, Industry Division at (613) 951-9683.

## Foreign trips to Canada reach new high

In April, a record 1.4 million foreigners visited Canada for at least one night, $1.8 \%$ more than in March. The number of such visits, relatively constant between late 1986 and mid-1992, has been increasing since August 1992. Of this total, Americans accounted for 1.1 million trips (the highest level since February 1988), and overseas residents for a record 329,000 (up $3.0 \%$ from the previous month).

While overseas residents accounted for only $5 \%$ of foreign overnight visits in 1972, their share now stands at almost $23 \%$. Since overseas residents tend to make longer trips to Canada than Americans, the economic impact of this increase is significantly greater than a comparable rise in the number of U.S. visitors. In 1994, overseas visitors spent an average $\mathbf{C} \$ 976$ per overnight trip, compared with C $\$ 350$ for Americans.

Same-day car trips by Americans rose $3.8 \%$ to almost 2 million in April, its highest level since June 1981.

During April, Canadians' overnight visits to the United States - generally decreasing since late 1991 - rose slightly ( $0.7 \%$ ) to 1.2 million. Some 285,000 Canadians travelled to overseas countries for one or more nights. This $4.1 \%$ decrease follows March's high, although the trend remains upward.

## Note to readers

Month-to-month comparisons use seasonally adjusted data (data adjusted for variations that repeat annually and for variability caused by different volumes of travellers associated with different days of the week). Year-over-year comparisons use unadjusted data, which are the actual traffic counts.
... Foreign trips to Canada reach new high
Same-day car trips by Canadians to the United States, often used as an indicator of cross-border shopping, decreased $0.7 \%$ from March to 3.0 million

## NEW FROM STATISTICS CANADA

## Canadian economic observer June 1995

The June issue of Canadian economic observer, Statistics Canada's flagship publication for economic statistics, presents a monthly summary of the economy, current economic events, and two feature articles: one on provincial GDP by industry and the other on interprovincial trade.

A statistical summary contains a wide range of tables and graphs on the principal economic indicators for Canada, the provinces and the major industrial nations.
The June 1995 issue of Canadian economic observer (catalogue 11-010 $\$ 22 / \$ 220$ ) is now available. For further information, contact Cynthia Bloskie at (613) 951-3634, Current Analysis Group.

## Education quartely review

Summer 1995
The Summer 1995 issue of Education quarterly review features articles on the income of elementary and secondary school teachers, intergenerational changes in education, a follow-up to the School Leavers Survey, and an overview of the Survey of Labour Income and Dynamics.

More than just numbers, Education quarterly review is a valuable source for anyone who needs relevant, unbiased and accurate analyses of current educational issues and trends.
The Summer 1995 issue of Education quarterly review (catalogue $81-003, \$ 20 / \$ 66$ ) is now available. For further information, contact Jim Seidle, Education, Culture and Tourism Division at (613) 951-1500 (fax 613-951-9040,Internet:education@statcan.ca).

## CURRENT TRENDS

Gross domestic product

Real gross domestic product fell $0.7 \%$ in March. First quarter growth was only $0.2 \%$.

## Consumer price index

\% change, previous year

Consumers paid $2.9 \%$ more for goods and services in May 1995 than the year before. Food prices rose by 3.1\%.

## Manufacturing

Manufacturers' shipments fell $0.6 \%$ in March to $\$ 32.2$ billion. The level of unfilled orders grew by $0.4 \%$ to $\$ 34.3$ billion.

In May 1995, the composite index declined $0.2 \%$ from the month before.

In May, the unemployment rate rose 0.1 percentage points to $9.5 \%$.

The value of merchandise exports fell $0.6 \%$ in April, to $\$ 20.5$ billion. Imports dropped $0.1 \%$ to $\$ 18.8$ billion.

Note: All series are seasonally adjusted except the consumer price index.
