## SECURITIES

2. Sales \& Purchases of Securities Between Canada \& Other Countries

Transactions in outstanding securities during August showed a sales balance for the first time since October 1964. The net inflow of $\$ 6.4$ million came malnly from a sales balance of $\$ 5.8$ million with "other foreign countries" with net sales to United States residents contributing $\$ 1.0 \mathrm{million}$. The purchase balance with the United Kingdom continued, although at $\$ 0.4$ million was substantially down from the July figure.

A similar pattern was evident in dealings in outstanding Canadian securities which showed a net inflow of $\$ 6.0 \mathrm{mili} i o n$, the first sales balance in nine months. Net sales of $\$ 5.8$ million and $\$ 0.8$ million were recorded to "other foreign countries" and the United States, respectively, while net purchases of $\$ 0.6 \mathrm{milli}$ on were made from the United Kingdom. At $\$ 11.4$ million, net sales of Government of Canada bonds were significantly higher and appeared to reflect their increased attractiveness. The net repatriation of Canadian equities at $\$ 9.7$ million reached its lowest level since October 1964 while gross sales and purchases both declined to amounts last reached two years ago.

Trade in outstanding foreign securities showed a small inflow of $\$ 0.4$ million which was more or less evenly provided by United States and United Kingdom investors. The overwhelming proportion of all transactions continued to be with residents of the former country mainly in United States equities.

During the first eight months of 1965, trade in outstanding securities resulted in a net capital outflow of $\$ 174.5$ milifon with the United States, the United Kingdom and other foreign countries showing purchase balances of $\$ 132.1$ milifon, $\$ 38.9 \mathrm{milm}$ lion and $\$ 3.5$ million, respectively. Purchases of foreign domiciled Canadian equities accounted for a net outflow of $\$ 187.4 \mathrm{million}$ and sales of Canadian bonds and debentures for a net inflow of $\$ 39.8 \mathrm{million}$. Trade in foreign securities resulted in a net outflow of $\$ 26.9$ million, which consisted of net purchases of outstanding United States equities at $\$ 32.4$ million and net sales of all other outstanding foreign securities of just over $\$ 5.5$ miliion. The capital outflow arising from trade in all classes of outstanding securities during the first eight months of 1965 was over three times as large as that for the corresponding period in 1964.

## 12. Business Financial Statistics Commencing with the second-quarter 1965 public-

 ation of "Business Financial Statistics: Balance Sheets", a new table was introduced showing a selected number of balance sheet items covering the investment dealers' group. The table which provides estimates by quarters back to the third quarter of 1962 , indicates the fluctuations in and nature of investment dealers' inventories, and also indicates the source of funds used to finance these inventories. The second quarter of 1965 shows a slight reversal in trend in inventories of finance and commercial paper which previously was increasing at a rapid rate.Trust companies continued to show a high growth rate in the second quarter of 1965. Total assets rose by $23.4 \%$ over the same period a year earlier. Demand and term deposits, which rose by approximately $25 \%$ during the year, were the chief source of funds. These funds were used primarily to increase holdings of mortgages by some $\$ 400$ million and finance paper by approximately $\$ 40 \mathrm{milli}$.

Total assets of mortgage companies rose by $33.4 \%$ over the same quarter in the previous years. This growth was attributed malnly to increases in demand and term deposits which permitted mortgage holdings to rise by $27.5 \%$ or by some $\$ 360 \mathrm{millin}$.

The sales finance and consumer loan group, which in the second quarter of 1965 includes the liabilities in default of one company in receivership and the reorgan1zation of another company, showed an increase of $13.7 \%$ over the previous year as measured by total assets. Receivables, which increased by $15 \%$ during the year to $\$ 3.6$ billion, were financed mainly by increases in long term debt and capital stock issues. This indicates a change in trend from short-term borrowings to longer term issues.

Mutual funds, as measured by total assets at market value, increased by $28.3 \%$ over the previous year. Capital stock issued rose by $33 \%$ during the year, or by approximately $\$ 300$ million. For the closed-end funds, total portfollo at market rose by approximately $10 \%$ from the previous year.
