1. Domestic Exports Canada's domestic commodity exports were valued at $\$ 701,036,-$ 000 in September this year, a decrease of $3.2 \%$ from the September 1964 total of $\$ 724,022,000$. This placed the value in the January-September period at $\$ 6,058,278,000$, a slight ( $0.9 \%$ ) rise from the comparable year-earlier total of $\$ 6,003,946,000$. The decline in the month was due primarily to a drop in volume as that index $(1948=100)$ fell $4.5 \%$ to 206.4 from 216.1 a year earlier, while the price index rose $1.4 \%$ to 133.8 from 132.0 .

Among the principal destinations, exports were higher in value in September and January-September as compared to a year earlier for shipments to the United States, the Netherlands, Norway and the Republic of South Africa, while values were lower in both periods for the United Kingdom, Japan, Federal Republic of Germany, and Communist China. Values were down in the month and up in the cumulative period for shipments to Australia and Belgium and Luxembourg.

Exports of newsprint, wood pulp, and crude petroleum were greater than a year earlier both in September and January-September, while those of wheat, softwood lumber, and aircraft and parts were smaller in both periods. Shipments of iron ores and concentrates, aluminum and alloys, nickel and alloys, and copper and alloys were down in the month and up in the rine months.

MERCHANDISING
2. Department Store Sales

Department store sales in the week ending December 18 were valued $6.1 \%$ above those in the corresponding period last year. A decrease of $4.1 \%$ in the Atlantic Provinces was more than offset by increases in the other provinces as follows: Quebec, $7.0 \%$; Ontar10, $3.1 \%$; Manitoba, $5.0 \%$; Saskatchewan, $0.2 \%$; Alberta, $11.5 \%$; and British Columbia, $14.5 \%$.
3. Sales \& Purchases Of Securities

Canada's trade in outstanding securities in
October last resulted in a net capital outflow of $\$ 24.0$ million. This compares with August's inflow of $\$ 6.4$ million and the small outflow of $\$ 2.8$ million in September. Net purchases from United States residents at $\$ 14.8 \mathrm{million}$ accounted for the bulk of this outflow, while $\$ 5.5$ million and almost $\$ 3.7$ million went to the United King dom and other foreign countries, respectively. The volume of trade continued to expand from the low level reached in July, but at $\$ 243$ million was still down from June's \$251 million.

INDUSTRIAL PRODUCTION
4. Index Of Industrial Production

Canada's seasonally adjusted index of industrial production ( $1949=100$ ) was $0.4 \%$ higher in October last year as compared to September, rising to 235.4 from 234.5. The gain left the index more than $7 \%$ higher for the yearnto-date than for the same period in 1964 and about $5 \%$ higher than in January 1965. Returning to September-October movements, the $1.4 \%$ rise in manufacturing was largely offset by a $6.1 \%$ drop in mining; electric power and gas utilities rose by $3.0 \%$.

The seasonally adjusted index of real domestic product less agriculture (1949= 100) reached a level of 211.3 in the third quarter of 1965 , an increase of $1.8 \%$ from 1965 's second-quarter index of 207.6 . Most of the major industry divisions contributed to this gain.

A special study titled "Earnings and Education" was released this week. This is an advance release of two chapters of a census monograph entitled "Incomes of Canadians" that is now in preparation. These two chapters analyze the relationship between the level of earnings and the sex, age, occupation and education of the labour force. The report also discusses the estimation of private costs and private returns to education and presents some estimates of lifetime earnings by occupation as well as rates of return to investments in schooling. The analysis is based upon statistics on earnings collected in the 1961 Census of Canada.
