AGRICULTURE & FOOD

11. Wheat Review Canada's 1966 wheat crop, estimated at an all-time high of 844,400,000 bushels reflects the combined effect of a record acreage seeded to wheat as well as the harvesting of record average yields per acre. The previous record production was 1963's harvest of 723,400,000 bushels.

At the halfway mark of the current Canadian crop year shipments of wheat (including flour in terms of wheat) from the four traditional major exporters amounted to 850,000,000 bushels, 8% below the previous record total of 927,600,000 exported during the same six months in 1965-1966 but still the third highest on record. This year's August-January exports of wheat and flour were sharply above the ten-year (1955-56 -- 1964-1965) average shipments for the same period of the crop year, of some 551,300,000 bushels.

Exports from the four major countries in the August 1966-January 1967 period were as follows: United States, 420,200,000 bushels (380,600,000 in corresponding 1965-1966 period); Canada, 291,800,000 bushels (304,300,000); Argentina, 31,100,000 bushels (139,200,000); Australia, 106,900,000 bushels (103,500,000).

Supplies of wheat held for export and for carryover at the end of their respective crop years at February 1, 1967 were as follows: United States, 688,400,000 bushels (952,700,000 in 1966); Canada, 817,700,000 (700,800,000); Argentina, 110,900,000 (177,400,000); and Australia, 311,400,000 (163,400,000).
