Plug tobacco releases rose to 13,783 pounds from 10,123. Cigarettes released for export during the month totalled 22,049,400 and for ships' stores, 16,313,000.

*19. <u>Tax Collections On Tobacco</u> domestic \$270,000, importations \$12,000; cigarettes -- domestic \$14,219,000, importations \$129,000; manufactured tobacco -- domestic \$1,096,000, importations \$96,000.

EDUCATION

20. <u>Truition & Living Accomodation Costs</u> At Canadian Universities and Colleges

DBS has released a publication entitled "Tuition and Living Accomodation Costs at Canadian Degree-

Granting Universities and Colleges." This report provides condensed information on typical tuition and other academic fees for several faculties of study, and on room and board charges at university-operated residences, for 49 institutions. It also contains a brief bibliography giving general sources of information on university admission requirements, courses offered, and financial assistance, together with addresses from which further information about each of the listed institutions may be obtained. Information on the Canada Student Loans Plan is included for the first time in this edition.

21. Unemployment Insurance

The count of claimants for regular unemployment insurance benefit totalled 281,100 on May 31.

1967 as against 217,600 for the same date one year ago, an increase of 29%. The April 28, 1967 count was 493,300, comprising 360,400 regular benefit and 131,900 seasonal benefit claimants. The seasonal benefit period terminated on May 20.

Initial and renewal claims filed during the month of May 1967 totalled 116,900 as compared with 91,000 during May 1966; for April the total was 148,200. The total for May 1967 represents an increase of 28% over that for the comparable period one year ago and a 21% decline from April, 1967.

The average weekly estimate of beneficiaries during May 1967 was 294,200 in comparison with 278,200 one year ago, and 460,500 for April 1967. Benefit payments totalled \$37.2 million in May 1967 versus \$47.2 million in April 1967 and \$30.0 million in May 1966.

LABOUR

22 & 23 <u>Two Special Labour Force Studies Released</u> An evaluation of the relative importance of age, marital status, and education as factors influencing the participation of women in Canada's work force is presented in the 5th in a series of Special Labour Force Studies released by DBS (Catalogue No. 71-509). The statistical information on which this study is based is derived from special tabulations prepared from the 1961 Census of Canada.

The special labour force series was initiated by DBS in 1966. These research studies were designed to reach a broad audience interested in the changing nature and composition of the Canadian labour market. Some aspects of the manpower developments, however, require a somewhat more technical analytical approach. For this reason a "B" series of special labour force studies is being published by DBS.

First in this "B" series entitled "The Demographic Background to Change in Number and Composition of Female Wage-Earners in Canada, 1961-1961" is released today by DBS (Catalogue No. 71-511).

*24. Provincial Government Employment

Employees of nine provincial governments and the governments of the Yukon and Northwest Territories numbered 309,396 at June 30, 1967, an incresse of 8.3% over the 285,583 employees reported for the same period in 1966, according to an advance release of data that will be contained in the April-June issue of the DBS report "Provincial Government Employment". Data for the Province of British Columbia is not available at this time.

The gross payrolls of provincial government employees (available for inclusion in this report) for the period April 1 - June 30, 1967 amounted to \$390.5 million, an increase of 9.0% from the \$358.3 million reported for the previous quarter January 1 - March 31, 1967. Payrolls reported for the same period in 1966 were \$319.8 million indicating an increase over the year of 22.1%.

These increases are the results of (1) increase in the numbers of permanent employees required by the provincial governments to supply additional services. (2) The normal seasonal increases in the "Transportation and Communications" "Recreational and Cultural Sercices" "Natural Resources" and "Health and Social Welfare" functions.

L A B O U R (concluded)

Total payrolls of provincial government employees included in this report for the first six months of 1967 January 1 - June 30 amounted to \$748.8 million. Employees in departmental services earned \$449.5 million of 60.1% of the total, while the staff of the institutions of higher education received \$82.3 million or 11.0%. The employees of the provincial government entreprises earned \$207.7 million or 27.7% and Workmen's Compensation Boards staff received \$9.2 million or 1.2%.

TRANSPORTATION

*25. <u>Motor Vehicle Traffic Accidents</u> Motor vehicle traffic accidents on Canada's streets and highways claimed 447 lives in May, a rise of 6.2% from last year's May total of 421, with the regional death toll as follows: Newfoundland, 5(13 in May 1966); Prince Edward Island, 2(5); Nova Scotia, 10(16); New Brunswick, 22(20); Quebec, 189(158); Ontario, 114(125); Manitoba, 17(9); Saskatchewan, 13(16); Alberta, 32(16); British Columbia, 43(42); and the Yukon and Northwest Territories, mil(1).

When comparing the number of traffic deaths in this release with those in the annual Dominion Bureau of Statistics report, "Vital Statistics", please note the explanation in the Daily Bulletin of April 13, 1967.

A total of 22,137,482 tons of revenue freight was handled by the railways during May, up 0.3 per cent over the 1966 month and ton-miles increased to 8,675,028 from 8,633,334. Average miles of road operated (first main track) fell from 43,987 to 43,911. Passengers carried at 2,029,204 were up 16.5 per cent from April and 6.8 per cent above May 1966, possibly reflecting increased travel associated with Expo '67 which opened in Montreal on April 28th. Commuter and non-commuter movements registered increases of 3.0 per cent and 12.2 per cent, respectively. Employment in the industry at 133,300 was up 1.2 per cent from May 1966.

31. Poultry The total number of all poultry on farms in Canada, excluding Newfoundland, at June 1 this year is estimated at 89,592,300 birds, up 5% from last year's corresponding total of 84,940,100. The June 1, 1967 estimate includes 80,102,000 hens and chickens (75,223,600 on June 1, 1966); 8,757,500 turkeys (8,967,900); 336,300 geese (338,700); and 396,500 ducks (409,900).

32. <u>Maple Products</u> Production of maple products (expressed as syrup) amounted to 2,504,000 gallons in 1967, smaller by 22% than last year's corresponding total of 3,226,000 gallons. The five-year (1960-1964) average stands at 2,516,000 gallons. Output of maple syrup totalled 2,420,000 gallons (3,129,000 in 1966), maple sugar 433,000 pounds (496,000), and maple taffy 439,000 pounds (501,000).

33. <u>Milk Production</u> Production of milk in July is estimated at 1,979,000,000 pounds, 1.3% above the year-earlier total. This brings estimated output for the January-July period to 10,620,000,000 pounds, 1.5% below last year's same period figure. Revised data for June place the month's output at 2,080,631,000 pounds versus 2,165,707,000 a year ago.

35. Population by Specified

Final results of the 1966 Census of Canada reveal Age Groups, 1966 Census that there were 6,591,757 persons or 32.9% of the total population under 15 years of age on the

census date. Population in the age groups 15-64 totalled 11,883,575 or 59.4% and in the older ages 65 and over, 1,539,548 or 7.7%, according to an advance report issued today. In addition to providing Canada and provincial totals, the report shows the population of counties, census divisions and urban centres 10,000 and over by specified age groups.

The numerical and percentage increase of children under 15 years of age in the 1961-66 period was 399,835 or 6.5%, indicating a marked decrease compared to the 1956-61 period when it was 966,712 or 18.5%. In the 1961-66 period the 15-64 year age group increased by 11.5% and the 65 and over group by 10.7%.

As in the 1956 and 1961 Censuses the highest relative percentage of children at the younger age levels was reported in Newfoundland, where 40.3% of the population of the province was under 15 years at the 1966 Census. Canada's most westerly province, British Columbia showed 30.6% or the smallest percentage in this age group. Quebec had 60.3% or the highest percentage of population of all provinces in the 15-64 year age group with Ontario next highest at 60.2% while Newfoundland recorded 53.7% the lowest in this age group with Prince Edward Island at 54.6% the next lowest. Prince Edward Island recorded 10.8% the highest percentage of population in the 65 and over age group followed by British Columbia with the next highest at 9.5% while Newfoundland reported 5.9% the lowest in this age group with Quebec at 6.1% the next lowest.

The following summary provides a numerical and percentage distribution of the population by specified age groups for the past three censuses and a percentage increase for the 1956-1966 period:
