V01. IV - No. 23.
Ottawa, Saturday, Juno 6, 1936.
The Economic Indox rocorciod a Eain
of 1.8 p.c. ovor tho samo wook of
1935 but showed a docrense of 2.5 poo.
from tho procoding wook
Owing to the racession in five of the six major factors, the sconomic indox maintained by the Dominion Bureau of Statistios showed a docline in the ?nst woele of liay. The rom cession in the indox of carloadings was moro than 3 por cent. $A$ doclino of 13.6 por cent was shown in tho adjusted indox of bank cloarings and common stock pricos woro lower by about one por cont. Tho not rosult was that tho oconomic indox doclined from 105.8 to 103.1, reprosonting $2 \frac{3}{2}$ per cont.

Tho declino in the last woek of May resultod in a lovol lowor than at any timo sinco tho oarly weoks of January Tho load over the samo poriod of 1935 was considorably reduced by the docline of the wook undor roviow. The gain over tho Iast wook of May 1935 was nearly 2 por conto Two of tho factors including the invortod indox of bond yiolds and common stock prices still rocordod incroasos over tho same wook of last yoar. Tho inverted index of bond yiolds showed a gain of nearly 5 per cont, whilo comnon stock prices were up 19.5 per cont. The index of bank cloarings was 11 per cont lowor and carloadings showed a deficit of $3 \frac{1}{2}$ por cont. Tho indox in the las' wook of May was 103.1 against 101.3 in tho same veok of last year.

The decline in the railway freight movemont from the procodine wook amounted to about 900 oars, and tho index corsequontly recedod from 73.2 to 70.7 . Tho surplus over the first 21 wooks of last yoar amounted to 10,357 cars, oach of tho 11 comodity groups oxcopt pulpwood, other forest products and miscollaneous commoditios showints gains in this comparison.

The index of wholosale prioes was unchanged from the proceding wook at 72.3, a minor docline being show from the same weok of last year. The cash price of No. I Manitoba Northern wheat on the Ninnipeg exchange averagod 75 conts por bushol against 76 cents in tho procoding wook. A minor gain was shown in oats, whilo otho: coarso grains recordad rocessions. Iin showod a furthor doolino on tho Now York motal markets, while other non-forrous metals wore maintainod. High-grado bond prices advancod slightly in the last wook of May. The bia quotation for tho $4 \frac{1}{2}$ per cont 1946 Dominion Govermmont bond was $1123 / 0$ on May 29 against $1121 / 4$ on May 22 . The invertod indax of bond yiclds oonsequently showod a slight gain over tho procoding wook, the standing having boon 145.3 against 144.9. The indox in tho same wook of 1935 was 138.5.

The level of oomon stock prices was slightly lower in tho wook undor review than in the preceding wook, tho index receding from 119.2 to 117.9 . Six of tho oicht industrial groups reachod lower lovols, the oxcoptiuns being food products and miscollangous stocks. Tho indox of ninotoen powor and traction stocks rocadod from 66.5 to 65.4 . Bank cloarings and shares traded on the Domonion stock exchanges wore at lowor lovols in both comparisons.

1. The index of carloadings is projectod forward ono weok to corrospond with tho practioo in computing the oconomic indox. 2. Cost of a fixed not incomo in porpotuity from Dominion long-torm bonds derivod by taking the reciprocal of tho Buroau's iniox of bond yields. 3. Bank cloarings were smoothed by taking a throo wooks moving avarage for tho purpose of eliminating irrogular fluotuations. Totals for Ottawa woro eliminated for all weoks shown, owing to incomparability introduced by the operations of tho Bank of Canada.

Iroduction in Canada and the Unitod Statos
The oconomic bottormont of Canada was maintainod at a rolatively highor lovol in rocont months than that of tho Unitod States. Industrial production in tho lattor showod markod advance from Soptombor to Novomber aftor having boen woll maintainod during tho first eight months of 1935. Aftor recoding from Deoomber to March, a robound was rocordod in April.

Industrial production in Canada has shown an advancing trond sinco the oarly months of 1933. The Canadian indox of industrial production in lipril was 103 comrarod with 93 , the standing of the indor of tho Unitod States transforrod to the base of 1926.
tho ohart on pago three shows the relative position durine fpril in scvontoon production indexos of the two countries.

Increases shown during April in doposits contrasting
with declines in current loans and seourity holdings
The banking situation was characterized during April by a further gain in deposit liabilities. A sharp increase was reoorded in demand deposits, resulving in a now high point for several years. The gain in notice deposits was slightly less tha: normal for the season, the standing being nearly six per cent above the same date of list year.

Call loans in Canada recorded a gain in April, increases being shown over the preceding month and over the same date of last year. Call loans placed at WW York were at a relatively low point, reoessions being shown in both tho usual comparisons.

The trend of current loans oontinued definitely downerd. The decline during the month after seasonal adjustment was nearly 3 per oent, while the liquidation since the end of April 1935 was no 108 s than 12 por cent. Despito the fain in deposits and the further doclino in curront loans, a slight recession was shown in security holdings Marked increases had beon recorded in portfolios from tho summor of 1934 , but ospooially in the first quarter of tho present yoar. The advance was haltod at least toinporarily in April, but the amount at the end of the month was at the extremoly high level of $3,3,314,000,000$.

- Canada's Trado in April

Canada's imports in April amountod to $\$ 42,223,185$ comparod with $\$ 36,636,702$, an inoroase of 15 per cont. Exports, which amounted to $57,423,830$ as agrinst $347,313,862$, woro a gain of 21 per cont and have alroady beon published. Ro-exports totallod $\$ 540,346$ comparod with 8720,975 , a decrease of 25 per cent. The total trado of Canada in lipril therefore was 100,187,361 compared with $\$ 84,671,537$ in 1935 and $13,561,317$ in 1934, a gain of 18 por cont over last yoar and 36 por cenc over 1934 .

Bocnaic Botermont in First Four Months of
1936 over tho same period of 1935
 on this utiant or tho business recovery. The level of productive operations was much higher than in the corresponding months of 1935, tho indox of the physical volumo of business basod on forty-five factors averaging 105.0 in the elapsed portion of 1936 comparod with 97.8 in the same poriod of last yoar. The gain of eight per cent in a representative indor of this kind is evidence of a considerable resumption of business and productive onterpriso over the partially recovered position of the first four months of 1935 。

During the prosent yoar, stability characterized tho conmodity prico level, narrow fluctiations boing shown about the 72 por cont line, with 1926 boing regardod as tho base equalling 100. The average for the wholesale price index was 72.5 comparod with 71.9 in tho fliss' four months of 1935.

The fluctuations in cormon stock prices wore more spoctacular. The price index of stocks traded on the Canadian oxchanges averaged 86.8 during the first four months of 1935. Tho avorags during the presont your was 116.8 , tho indioatod gain boing no loss than 34,6 per cont. High-grade bond prices reached in the first four months of 1936 a now high poini for many yoars. in index of invortod bond yiolds basod on Dominion issuos was 141.6 against 139.0 in the first four months of 1935 , a gain of noarly 2 por cont. is low lovel of long-torm intorost rates is an incentive coward tho production of invostmont goods. The cost of capital is an important considoration in undertakings involving the construction of plant and equipment.

It is an intoresting dovolopment that many of the industites which sharod in tho Fasperity phaso of the last cycle aro now participating in the markod expansion of the last four years. Mining is one of the industrios which must bo includod in this catogoryo The index of minoral production based on nine factors rose from 146 to 169 , a gain of no loss than 15.8 per cont. Increases in the oxports of coppor and nickol woro 11.3 per cent and 40 por cont, respectivoly. Gold shipmonts at $1,171,000$ ounces in tho first four months of 1936 showod a gain of 18.6 per cent. The gain in coal production was about 8 per cent, the total in the last four months having boon 4,793,000 tonso

The expansion in manufacturing operations since the first of last your was substantial, the index based on 29 factors averaging 99.3 against 90.6 . Observing the oonsiderable rooovery that had taken place by the first of last year, the furthor advanco of 9.6 por cont must bo regardod as gratifying. Raw cotton imports showed an incroase of 20.2 por cont, indicating groator preparation for operations in the toxtilo industry. Nowsprint production was 17.5 por cont groator, whilo the exports of planks and boards rocordod a gain of 27.4 per cent. Tho primary iron and stool industry was moro activa, stool ingot production expanding to tho amount of 66 por cent. The output of autonobilos showed a declinf of 7 por cont, tho comparison being complioatod by the early change over to now models in the last quarter of 1935. Crude potroleum imports ware ll, 5 por cont greator, whilo crude rubbor imports showed a docline of 18 per oent.

A gain of 9 por cont was shown in olectric power production to a now high point. Contracts awarded showod a gain of 3 per cent, whilo building pomits woro down 41 per cont. Construction oporations romained at a relatively low lovol. Carloadings showod a slight gain, whilo extornal trado expanded sharply. Tho gain in exports was 15 por cont, while imports moved up 11 per cent. The excess of exports over imporis showed a. gain of 24 por cont.

Tho gain in omploymont in manufacturing plants was 8.4 per cent, wile mining omployment was 8.8 por cont greater.

Wheat marketings in the Irairie Irovinoes for the week ending May 22 amounted to $1,230,150$ bushels, compared with 708,974 in the previous week and $1,078,531$ in the same weok last yoar. Total marketings from August 1 to May 22 amounted to 201, 164,971 bushels as compared with $204,867,097$ in the same period of the preceding year.

Canadian wheat in store on May 29 amounted to $161,952,660$ bushels, as compared with the revised figure of 166,692,282 for May 22, and 201,545,396 bushels on May 31, 1935. Stooks of Canadian wheat in the United States amounted to $13,286,506$ bushols as against $13,138,330$, and $9,370,703$ bushols, on May 29, May 22, and May 29, 1935, rospoctivoly. Whest in transit on tho Lakos amounted to $3,654,847$ bushols compazed with $4,707,801$ and
 S. Fice miersis is in store in Canada.

The overseas export clearances of whoat during the week ending Nay 29 amounted to $5,313,730$ bushels as compared with 2,988,949 in the same week last year. mports of Canadian wheat into the United States for consumption and milling in bond for ro-oxport in the same two weeks were 401,000 bushels and 219,000. Total overseas ciearances from August I to Nay 29 amounted to 132,095,604 bushels as compared with 104,182,731 bushels in the same period of $1934-35$. United States imports of Canadian whoat in the same two periods were $29,776,709$ bushels and $22,869,138$ bushels, respectively.

Balance of Prada
Thio balanoo or trods in April was fayonablo to oanadu to the oxient oi $\$ 15,740,971$ ocmpased with $12,598,135$ a yoar ago and $3,932,321$ two years ago. The increase over_last year was 43 per cent.

Silverware in 1935
Iroduction of silver-plated and sterling silverware was valued at $\$ 3,470,000$ in 1935, according to preliminary figures, compared with $\$ 2,878,000$ in 1934 and $\mathbf{Q} 2,424,000$ in 1933. Twelve factories produced goods of this kind during 1935; nine were in Ontario, two in Quebec, and one in British Columbia. The largest item was flatware, electroplated on nickel-silver, at $31,069,000$, followed by hollow ware-oloctro-plated on brass and copper at 3793,000 .

Automobile Iroduction in 1935
Iroduction of automobiles during 1935 amounted to 172,877 units with an aggregate wholesale value of $\$ 99,013,047$, as compared with 116,852 units worth $\widehat{\$} 70,030,474$ in 1934. About 60 per oent of the 1935 output of 103,529 units were made for sale in Canada and the remainder for export. There were 135,562 passengor cars valued at $\$ 79,209,276$ and 37,315 commercial vohiclos at $\$ 19,803,771$ producod in 1935. Slightly morc than half of the cars and trucks made during the latest year carried 8 cylinder ongines and about 48 per cent were equipped with 6 cylinder engines. The average number of employeos ongaged in the automobile industry in 1935 was higher than in any other yoar except 1928 and 1929. The number was 13,095 compared with 9,674 in 1934 and 8,134 in 1933.

## Copper Production in March

Copper production during March was recordod at $36,478,815$ pounds as compared with 32,911,842 in February and 37,828,906 in March, 1935. Quotations for olectrolytio copper on the London market in March averased 8.94027 cents per pound in Canadian funds; valuod at this price the Canadian output during the month was worth $33,261,305$. The output during the first three months of 1936 totalled $103,680,291$ and in the same poriod of 1935 the production was $104,776,368$ pounds.

## World Iroduction of Copper

World production of refinod coppor in March rose to 138,934 tons from tho February total of 131,556 tons. Stocks of copper in the United States at the ond of March totallod 238,601 tons, an incroase of 8,309 tons during the month. The official warehouses of the London Metal Exchango containod 74,120 tons of rofined copper and 8,206 tons of rough copper at the end of March, as compared with 79,118 tons of refined and 8,782 of rough at the end of February.

## Sugar Trado in April

Imports of raw sutar in ipril amounted to $46,668,200$ pounds compared vith $50,036,600$ a year ago. Supplies camo from the following countries: Barbados $12,073,900$, British Guiana 10,278,800, Fiji 8,321,500, Jamaica 4,978,200, Cuba 1,978,100, Australia 1,680,700.

Refined sugar imports amounted to $1,710,200$ pounds as against 103,000 last yoar. The countries of consignment were: Fiji 1,347,300, United States 360,100, Trinidad 2,800. Exports aggregatod 173,600 comparod with 209,100 , going mainly to tho Unitod States and Nowf oundland.

## Financing of Motor Vohicle Sales

There were 16,986 motor vohicles finanoed to the extent of $\widehat{\mathbf{Y}} 7,126,942$ in 1 pril, as against 12,749 for $\hat{\mho} 5,373,447$ a year ago, and 0,492 at $3,496,931$ in April, 193s. Vohiolos finanoed in the latest month show an incroaso of 33 per cent in number in comparison with April, 1935, and a gain of 160 por cent comparod with igril, 193s. Now vohiclos numberod 6,302 for hpril and 4,779 for hpril 1935. Used vehiclos totallod 10,684 oumparod with 7,970.

Cumulative figures for the first four months of this yoar show that $36,16 f_{x}$ vohiclos were financod for $314,996,348$, as comparod with 26,912 at $311,502,541$ during the samo poriod of 1935. Now vohiclos financod during the four months of 1936 totallod 12,393 and used vohiolos 23,771. Four-month totals for tho provinces follow: Maritimos 2,099 at $\$ 941,884$; Quebec 6, 328 at $\widehat{3}, 260,968$; Ontario 18, 293 at $36,382,793$; Irairio Trovinoos 5,199 at $\$ 2,378,279$; and British Columbia 3,740 at $\widehat{Y} 1,532,418$.

## Foldspar Iroduction

Maroh shipmonts of foldspar amounted to 378 tons compared with 937 in February and 778 indarch, 1935. During the first quarter of 1936 shipments totalled 2,716 tons compared With 2,074 last yorr.

Sales of Gasoline
The following were the sales of gasoline by provinces during the first three months of 1936, with the 1935 figuresin brackets: Now Brunswick 1,277,000 (972,000) gallons, Quebec $13,440,000(12,175,000)$, Manitoba 3,553,000 (3,492,000), Alberta 5,736,000 $(6,646,000)$, British Columbia $8,757,000(7,894,000)$. It is impossible to give the figures for all provinces as none for March has been received from Nova Sootia or Cntario and none from Saskatchowan for February or March.

## Milling of Grain in April

Grains ground in Canadian mills in hpril are shown as follows, in bushels, with the 1935 figures in brackets: Wheat 4,582,442 ( $4,313,600$ ), Oats 694,603 (621,952), Corm 248,909 ( 148,932 ), Barley 84,408 ( 57,588 ), Buckwheat $8,236(7,386)$, M1xed grain $1,625,671$ (1,40?,247). Flour production in April amounted to 1,009,464 barrels compared with 965,765 a year ago. Exports of flour in April amounted to 281,162 barrels compared with 276,907.

## Nickol Iroduction

The Canadian production of nickel in March amounted to $15,666,457$ pounds, maintaining the high monthly level set up during the past year. The February output amounted to $16,151,374$ pounds and in March 1935, the total of $10,618,462$. Iroduction durine the first thr:00 months of the current yoar was $45,870,533$ pounds as compared with $28,799,895$ in the same period of 1935.

## Crude Eetroleum Froduction

The production of crude petroloum in Canada during March amounted to 117, 824 barrels as compared with 107,928 in the preceding month and 120,537 in March, 1935. The March production from Alborta sources amounted to 101,857 barrels, made up of 98,975 from the Turner Velley Fiold, 2,020 from the Red Coulee Field, 732 from the Wainwright and 130 fiom the Skifi Fields. During the first quarter of 1936 the Canadian output totalled 346,983 barrols, an increaso of 2.7 per cent over the same period of 1935 .

Naturnl Gas Iroduction
Iroduction of naturil gas in Canada during Maroh amountod to 2, 838,626,000 cubic feot compared with 4,011,882,000 in February, and 2,665,693,000 in March, 1935. Total production for the first throe months of 1936 aggregated $10,349,600,000$ cu. 1 t., an increase of 1704 par cont ovar the first quartor of 1935.

Gypsum Iroduction
Gypsum production in March amounted to 5,329 tons compared with 2,877 in Fobruary and 4,453 in March 1935. During the first quarter of 1936 gypsum production totalled 13,093 tons, or 16 por cont above that of a year ago. Exports of plastor of paris in March smounted to 32 tons at "909 and imports of ground gypsum 51 tons at 32,008 .
isbostas Iroduction
Asbostos production in Mafch amounted to 16,225 tons compared with 17,038 in Fobruary and 11,816 a year ago. During the first quarter of 1936 Canadian shipments totalled 50,279 tons, or 47 por cent above the tonnage of a yoar ago. Exports of asbestos wore 19,510 tons, while imports were valued at $\$ 79,813$.

## Duty Collectod in ipril

Tho Custons duty oollectod in April was $\$ 6,153,811$ oompared with $36,257,948$ a year ago and $\widehat{\$} 6,360,609$ two yoars ago.

The outlook for spring-som crops is rather unfavourable and uncertain throughout the mainland of the Dominion. The insular extremities, Prince Edvard Island and Vancouver Island, provide contrasting onditions and fine prospects. Latoness of seeding is a general complaint.

The Maritime and Eastern Provinces had severe frosts during liay that caused heavy, but still somewhat indeterminate, damage to fruit and truck crops. Continued wet weather in these provinces hindered seeding oporations and subsequent growth has buen rotarded by an extended period of cold weather.

In southem and central regions of the Prairie Provinces, unusually high temperaturos and lack of rain during the last ten days of May gave grain prospects a dorinite reverse and thoro has boon only a slight corroction as a rosult of lowor tomporatures and scattored showers during the past few days.

In northern regions of Manitoba and Alborta tho fino weather and high temporaturos were of benefit in hastening the completion of seeding and in stimulating formination and oarly growth.

Pastures and moadows had an early start and are in fine condition throughout the Dominion, excopting parts of south-western Ontario, westorn Saskatchewan and eastern Alberta.

Census of Construction
The total val ue of construction work performed in 1934 was $3186,199,000$, a greator gross value than that shown by any manufacturing industry. Of this $115,989,000$ was entirely new construction and the balanco was classifiod as alterations, ropaixg, otc.

There wero 9,527 reports received, 7,140 of which were submittod by construction and trade contractors and sub-contractors, who roported a total value of work performed amounting to $\$ 99,382,000$. The other reports were received from cities, towns, villages, municipalities, harbour comissions and provincial and Dominion governmont dopartments.

The capital invested in the indestry in 1934 was reported at $131,042,000$, of which $94,561,000$ or 72 per cent was supplied by construction and trade contractors and subcontractors.

The industry furnished employment to 173,153 persons, paying thom $101,608,000$ in salaries and wages. Of this number 15,294 were classified as salaried employeos, 14,101 males and 1,193 females, their remuneration being $16,928,000$.

The average number of wage earners was 157,859 and their wages arounted to $884,679,986$. This works out at an average wage per man per annum of slightly over $\$ 536$, which appears a pretty small wage. It must be borne in mind, however, that the construction industry had reached its lowest ebb in 1933-34, also that there was a great doal of broken or part-time work, particularly in the winter months. Furthermore, included in this omount are wages their equivalent received by farmers in return for labor on roads or highways. In such aases farmors only work a fow days each year, sufficient to pay off their taxes, and to arrive at any figures which would show an equitable averago omployment was most difficult in their particular case. In cities and large town we find reljef allowances in return for labor on construction projects and this also had to be taken into consideration. These two circumstances tond to reduce substantially the average ecrnings of each man.

There was a monthly average omployment by construction and trade contractors and subcontractors of 37,561 men, who were paid $\$ 27,975,257$ in wages, or an average of $\$ 745$ per man per amum, while an average omployment of 120,298 laborers by municipal, Dominion and provincial government departments and harbour commissions received \$56,704,729 in wages or allowances, an average of $\$ 471$ per man per annum.

The report covering the building and construction industry in Camda for the year 1934 is the first since 1920. Copies of the report are available on request.

Monotary and Non Monotary
Gold in Trado Statistics
The Bureau of Statistics has oxperioncod considorable difficulty in rocont years in connection with tho trontment of gold in trade statistics, ospecially in tho case of exports. In former timos thore was some movoment of gold as morchandiso; for examplo, Canada oxportod gold-boaring quartz, dust, nuggotes, to the United States for refining purposes. These oxports were rocorded as merchandise. When the Royol Mint bogan refining gold in Ottaw, this gold-boaring quartz, dust, nuggets, otc., bogan to be exported in tho form of gold bullion, and to bo rocorded undor the "Coin and Bullion" section. The question of rocorcing gold in import and exnort trado came up for discussion at the conferonce of Commonwalth Statisticians, which mot in Ot tawa last fall, when the following rosolution was passed:
(a) Imports and Exports of gold should bo publishod nccording to countrios, by quantitios in fine ouncos and valuos in the currency used in the national statistics.
(b) Total imports and total exports of gold should bo classifisd into (1) Gold metal ..
(a) In bars (in the form accepted in interbank transactions).
(b) Other unworkod gold. (11) Gold coin
(c) is far as practicable, the imports and exportis of gold for monetary purposes should be indicatod.
The Buroau has since boon in conforonco with the Bank of Canada, and the Dopartment of National Revonuo, and has devolopod a policy whoreby all gold bullion which goos out of tho country as "morchandiso" wili bo ontorod as such and will bo rocordol in total commodity oxports. This will make a considerablo difference in the ordinary trado figures of "favourablo" or "unfavourable" trade balances, as the bullion exports havo grown to nearly $100,000,000$ a yoar.

From finil 1, 1936, oxports of Canadian gold bullion, non-monotary, formorly included urder "Coin and bullion" will be rocorded as "Merchandise". This will nocessitate a revision of Canada's Morchandise", and "Coin and Bullion" exports, from about 1920 to dato.

## Charncter of the April Imports

Ono of the outstanding fontures of the April commodity imports was tho incroase in iron and non-forrous motal products generally. Machinery at $1,951,000$ was an incroaso of over $\hat{2} 200,000$, that incronse boing in requiroments got in the United Statos. Farm implemonts rose from $\$ 692,000$ a year ago to $\$ 1,100,000$. Most of the items in that catogory como from tho Unitod Statos. Thoro was a sharp riso in iron plates and shoots from 8820,000 to $1,574,000$, most of these coming from the United Kingdom. Tho supplies of tin, aluminium, brass and procious motals all incrousod. sutomcbilos from tho United Statos incroasod from $\$ 285,000$ to $\$ 778,000$, but automobilo parts droppod from $\hat{\$} 2,569,000$ to $\$ 2,223,000$. Electric apparatus rose from $\$ 597,000$ to $\$ 850,000$.

Amongst the toxtilos raw ootton, raw silk and flax and homp imports doclinod, but raw wool roso sharply from 261,000 to 336,000 , and woollon yarn wont up to $\widehat{2} 214,000$. Unmanufactured loathor wont down to 183,000 but dyeing and tanning matorials olimbed from $\$ 287,000$ to $\$ 460,000$. Furs rose from $\$ 406,000$ to 732,000 。

Rubber went up from $\$ 506,000$ to $\$ 589,000$ and vegetable oil fram 326,000 to 3873,000 . ilcoholic beverages, cocoa, coffoe, tea, sugar, fruits, nuts, gums and vogotables all incroasod. in interosting incronse was in soeds from $\hat{2} 35,000$ to $\$ 473,000$. Fost offico parcels from $\hat{\$} 161,000$ to $\$ 204,000$, parcols from the Unitod States inoroasing from 3132,000 to 181,000 .

## Commorcial Salt Iroduction

Commercial salt production in Maroh was 13,411 tons comparod with 11,662 in February and 13,794 in March 1935. Exports in Maroh amounted to 879 tons and imports 7,899 tons.

- In continuation of tho upward movement in wholosalo business ovor last yoar, tho value of wholosalo traclo increased 7.2 per cont in April 1936, over ipril 1935, acoording to reports submittod by approximatoly 200 wholesale houses operating in rino difforont lines of business. liarch salos showed an increase of 5 per cent over the samomonth last year. February salos woro up 3.7 per cont and those of January up 4.4 por oont as oompared with tho samo months of 1935.

While increases woro rocorded in all oconomic divisions of the oountry, British Columbia again reports the greatest improvement in April sales with an incroase of 15.6 per cent over last yoar. Ontario showed an increaso of 2.6 per oont, quaboc 7.I, irairie Irovinces 8 , and Maritimo = revinces 11.7 por oent.

## Chomicals and Alliod Iroducts

Ireliminary figuros indicate that tho production of chemioals and alliod products was valued at $116,351,015$ at factory prices in 1935. This total was higher than in any year since 1930. The production value of 1934 was $3103,052,039$ and $392,020,761$ in 1933. Thero wore 710 establishments operating in 1935, giving employment to 10,004 workers with salarios and wages of $23,541,803$. The improvomont in 1935 was quito general, with 11 of the industries included in this group showing substantial advances and three with small doclinos.
