

The seasonally adjusted index of carloadings on the base of 1926 recorded a gain in the fifth wook of the year, the advance having boen from 91.5 to 92.6 . The increase in the oastern division was-less than normal for the sasson, while an appreciable advenco was recordod in the West. The traffic movement was 53,461 cars compared with 52,085 in the proceding wook and 50,077 in the same weak of 1940 . The gain over one weck ago was 1. 2 per cont, whilo an advance of 5.2 per cont was show over the same woek of 1940 .

Wholesale prices wore maintained in tho last wook of Jamuary, the index remaining at 84.8. Kinor advances were shown in crop products and wood and paper while recossions were rocorded in arimal products and chomicals. Rogarding sensitito commoditios, manufacturing matorials showed an advenco, the index moving up from 66.0 to 66.4 while foodstuffs declined from 70.5 to 70. 2.

Minor decline was shown in high-grade bond prices, but the index of capitalizod bond yields was 5 per cent greator than in the samo weok one year ago. Common stock prices showed continuod reaction, the index docliniag about 1 per cont to 76.8 , a docline of 21.7 per cont from a year ago having been indicated. Rocessions from the freceding woek wore practically goneral in each of the groups of the official clossification. Speculative trading showod groator aativity than in the procoding wook, but a marked decline was recorded from tho sumo poriod of 1940. Bank cloarings showed gains over both periods normally quotod for comparison.

The weekly index based on the six above-mentioned factors was 108.3 in the last week of Junuary against 107.7 in the preceding rrook and 105.1 in the same wook of 1940. Advances of 0.6 por cont and 3.1 por cont were shom oror the procoding week and the same weok of last year, rospoctivoly.

A Weckly Index with Six Components on Basis 1926=100

1. Present value of a fixod net income in perpetuity from Dominion long-term bondse 2 . Bank clearings wore smoothod by taking a throo weoks moving average for tho purpose of oliminating irregular fluctuations. Totals for Ottawa were oliminated for all woeks show owing to incomparability introduced by the operations of tho Bank of Canada. 3. The weighting of the six major factors is dotormined from the standard deviation from the longterm trend of aach, based on data for the poriod from January 1919 to Angust, 1936. The woighting, tharofore, represonts not an attompt to give the relative importance of the factors but to place thom on an equal footing by equating the tendency toward fluctuction. The long-torm trand determinod from tho half-yoarly data in the inter-war period was eliminatod from tho composito and the rosulting index exprosscd as a percentage of the average during tro yoar 1926.

Busincss Operationa at Hiph Lovol in Docomber
Businoss opurations continued at a high levelin the last month ce 1940, the indox of the physical volure of businoss standing at 152.5 compared with 133.3 in the same month of the preceding year, Tha gain of more than 14 por cont roflgots the influence of war demands. Tho standing of the indox in November having beon 157.4, a recession of 3.1 per cont was indicated for the last month of the yoar. Eloctrio power and distribution of the main compononts rocorded advancos in Docomber over the precoding month.

The levol of manufacturine production was practically maintainod, the inder standing at 156.6 agrinst 157.2 in the precuding month. A decline was showm in the avorage of factors indicating the trond of mineral production and in the new business obtained by the construction industry. The indox of eloctric power advanced from 240.7 to 243.8. Important decline was shown in exports of merchandise, oxcluding gold, while imports-reoorded
 adjastod index of trade omp? ogment advencod from 146.5 at tho beginning of December to 152.1 at the end of the month.

The indox of producers' goods and munitions receded considerably in December from the high level of Novemer. An indox of tho output of consumers' goods, on the othor hand, rose from 135.6 to 140 . 1.

The indox of agricultural marketings rose from 82.0 in November to 113.8 in the month under roviow, advanco having been shown both in grain and livestock sales. The index of grain marketings was 117,5 in Docember against 78.7 in tho precoding month, important increases having boen shown after soasonal adjustmont in the markotings of wheat, oats and flax. The index of livestock marketings increased 1 point to 97.3 , further advance having beon shown in the disposal of hogse Cattle-marketings wero practically maintained whilo some decline was show in the sale of shoep.

## Sales of New Kotor Vehicles in December

Sales of new motor vehioles, excluding deliveries to the government for war purposes, were oonsiderably higher in December, the total being 10,920 valued at $\times 13,192,197$ oompared with 9,147 at $\mathbf{~ W 1 1 , 0 9 1 , 9 7 5 ~ i n ~ N o v e m b e r ~ a n d ~ 9 , 8 4 4 ~ a t ~} 10,943,750$ in December, 1939. Total sales of new vehicles curing the year numbered 130,917 units with a retall value of \#149,165,627, 14 por oent in number and 18 por oent in valuo above the 114,747 now vehioles scld for $125,967,521$ in 1939.

## Cundice 1347

The publication is announoed by the Dominion Bureau of Statisties of the 1941 edition of the Official Handbook of "Canada".
"Canada 1941" oovers the present situation in the Dominion fram itlantio to Faoifio, the weight of emphasis being placed on those aspeots whioh are currently of most importance. So far as spaco permits, all phascs of the country's eoonomio organization are doalt with and statistios are brought up to the latest possible moment. The text is acompaniod by a wealth of illustrative mattor which adds to the interest of the subjoots treated. There are also three doublo-page insorts (one of whioh is in oolour) and one triple-page insert.

The Introcuotion is a short roview of current developments at the ciose of 1940 , with special raferonce to Cinen's Mar Frorramo as described by the Prime Mirister and other

Ninistcis of tho Crown in rocont addrossos. Special Articlos follor: this Introduction and doal with the British Commonoalth Lir Training Flan and tho Royal Car dian Mounted Polico and its placo in the dovolopmont of tho Canadian Wost. Tho first Articlo doscribos the incoption of tho Plan, its administration, tho types of aircraft usod and the training of the young flior. Tho socond lirticle covors the story of the Police from tho ourly days of western soticienent to tho prosent and tho oolourod insert dopicts the caromonious recoption of Thoir linjesties by tho Flains Indians at Calgary.

The oconomic survey is covered in sixtoon chaptors doaing with populntion, production, internal and oxternal trade, transportation, education, otc.

The price of tho publication is 25 ochts per cory, which chargo covers morely tho cost of paper and nctual pross work. Application for rogular priced copios should be made to the King's Printor, Ottawa.

A spocial prico concossion has boen authorized in the case of toachers, bona fido students, and misters of roligion, sinco past oxrerionce has shown that considorablo use has been made of this publication for educational purposes, and it is the policy of the Minister to enccurage such usc. To such individuals, thorefore, the price is set at 10 cents for one cory. Application for copios undor this Spocial Distribution should be addressed to the Dominion Statisticinn, Ottawa.

Postage stams are not accoptablo, and applioations must be accompanied by a postal noto or by the appropriate coin onclosed botween two squares of thin cardboard gummod together at the edzes.

Production of Potroleum and Natural Gas
The Conndian production of crude petroleun and natural gasoline during October totalied 817, 596 barrels compared with 841,752 in the preceding month and 816,257 in October, 1939. During the ton months ending October, 1940, the outyut aggrogatod 7,086, 161 borrols compared with 6,603,374 in the corresponding period of 1939 .

Natural ens roduction in Octobor amounted to 2,513,995,000 cubic foot convared with $1,782,51 \%, 000$ in Septomber and 2,904,070,000 in October, 1939. During tho first ten months of 1940, the Conedian produotion aggrogated $27,646, \therefore 58,000$ cubio foot as compared with 27,731,938, 000 in the like neriod of 1939 .

World Shimonts of Wheat
World shipmonts of wheat-during the wook onding February I amountod to $4,745,000$ bushols as compared with $1,105,000$ in the provious wook and 8,868,000 in the corrosponding week in 19:0. Cumulntive worId shipments from August 1 to February 1 anountod to 124,899,000 bushels as compared with $256,584,000$ in tho corrosponding period of the previous crop year.

## Flour Production in December

The production of flour in December amounted to $1,076,132$ barrols compared with 1,599,966 in Decomber, 1939, and compared with the ten-year average production of 1,087,500. The percentage of out put to capscity for the latest month dropped to 47.6 from 70.8. in 1939. Production of flour during the calendar yoar 1940 aggregated $16,255_{x}, 921$ barrels compared with $16,887,070$ in 1939.

Flour exports-in Decomber amounted to $3 \times 5,611$ barrols compared with 902,814 in the same month of 1939. Exports for the calondar year 1940 totalled 6,970,902 berrels comm parod with 5, 3:2,172 in 1939, whilo in the first five months of the crop year 1940-41, $2,905,032$ barrels were exported as against $2,715,497$ in the same pariod of the previous crop year.

Coron 1 production for Wocember 1910 wns 38 follows, with figuros for tho samo month last year in brackots and the quantitios in pounds: ontmes $1,1,336,850(4,838,664)$; rolled oats 6,461,082(17,595,082); corn flour and meal, 2,125,326(1,240,680); pot and poarl barley 162,002 (317,079); and buckwhoat flour 179,014(384,258).

Thoat Stocks in Store
Candiun whoat in storo on January 31 amountod to $493,552,592$ bushols acmparod with $495,841,577$ on Jenuary 24 and $335,636,331$ on Fcbruary 2, 1940. Tho amount in storo in olovators in Canada on tho latost dato was $445,152,800$ bushols oomparod with $446,571,224 \mathrm{c}$ wack L go and $301,433,897$ in 1940. The stocks of Canadian whont in tho United Statos on Januiry 31 totallod $48,399,791$ bushels compared with 49,270,353 on January 24 and $34,202,434$ in 1940.

Overscas Export Clocrances of What
During the wook onding January 31, the oxport oloaranoes oversoas of Canadian wheat amountod to $3,425,629$ bushols omparod with $3,744,769$ in the sorresponding weok in 1940. During the 26 wecks onding Janucry 31 the cooumulatod shipmonts were $50,669,884$ bushels a.s ocmpared with $71,746,224$ in the corresponding puriod of the provious orop yoar.

## Primery flovement of wheat

Thoat rocoipts in the Prairio Trovinces during the wook ending January 31 amounted to $3,273,606$ bushels comperod with $5,440,489$ in the previous week and 900,085 in the correspondine wook lost yec. $\%$. Receipts for the latest weok follow, with $19 s_{0} 0$ figuros in braokets: iic.nitobc, 309,613 (41,854) bushols; Saska.tohewan, 1,565,310 (381,577); inberta, 1,398,183 (476,654).

Marketings in the three Prairie Provinoos for the 26 weoks ending January 31 aggregated $305,478,359$ bushols as camparod with $367,723,766$ in the corrusponding poriod of the provious orop year. Totals follow by provinces, with 1940 figures in brookets: Manitoba, 40,942,551 (49,555,137) bushels; Sasketchewan, 162,571,024 (205,566,047): is 1berta, 101,964,784 (112,490,243).

## output of Refinod Sugar in 1940

During tho oalondar year 1940 Cannda's ton sugar refinories manufaoturod $1,137,792,237$ pounds of refined sugar, an inorease of $12,300,370$ pounds over the output reoorded in 1939. The stooks of rofinod sugar at the end of 1940, with smanll amounts purchased, amounted to $278,542,439$ pounds compared with $248,461,420$ at the end of 1939. Stooks of raw sugar on the last day of 1940 totalled $140,970,614$ pounds as against $74,526,150$ on Deoember 31, 1939.

## Produotion of Hogs

The number of hogs on forms in Canada at Deoomber 1, 1940, was the highest over recorded, the total being 6,117,200, an inoreaso of 28 per cent ovor the number reported on the seme date in 1939 and exooeds the total at June 1, 1940, by 235,000. The gratest inoreases in numbers have ooourred in ilberta, Ontario and Saskatohewan.
hnticipation of a eroater demend for baoon and pork produots as a result of tho war and relatively favourable prices for hogs are responsible for the grestly inoreased produotion. In addition, the focd situation has boen improved during the past two yoars by good yiolds of feed grain orops. Expansion in production has been groatost in wostern Canada where surplus feed grains were evailable. The declines in production in Quebeo and tho Maritimo Provinces in 1941 rosulted from highor feod prioos in rolation to the prioes of hogs.
is further inorecse in the produotion of hogs is anticipated in 1941 if fermers. intentions as reported at the first of Dooembor 1940 are carried out. It is expooted that the spring pig crop will be about two per oent greater than the spring pig orop of 1940. Incroasos in tho spring pig orop will oour in Ontario, the Proirio Provinoes and British Columbia. In Quebec and tho Moritime Provinoos, smaller spring pig orops are reported than in 1940.

Marketings and farm slaughter of hogs for the period Dooember 1940 to Miny 1941 will be 35 per oont greater then in the corresponding period of 1939-40, if farmers' intentions are oarried out. Inoreases in marketings in this period are antioipated in all provinoes with the Groatest grin in the Pruirio Provinoes.

Junucry Enploynort Situction
Emplomont at tho first of Jamery in the yocrs since 1920 has invariably shown curtailnont, rosulting from the completion or suspension of outdoor work in construotion and othor hifhly soasonel industrios, together with the losses occasionod by ostablishments closing over the holidcys and for inventories end ropairs. Information reoeived for Januery 1, 1941, from 12,467 omplovers revenis a total staff of $1,316,774$, a rocuotion of 47,827 from tho proooding month. This was a doolino of 3.5 por ount, which is tho smallest perountage contraction at the opening of any yoar in the period of of servation. For January 1, 1940, 11, 891 cmployers furnishod returns showing that they had an agerogate staff of $1,131,500 \mathrm{~min}$ and women.

Basuc on the 1926 average as 100, the crude index stood at 134.2 , as zompared with 139.1 ot the beginning of Docember. The letest figure is $15 \frac{7}{2}$ p.c. abovo the Jamary 1 , 1940, index of 116.2, the previous high ficure for that dato. Sinoe the shrinkuge at the beginning of Jsnuary, 1941, was considerably bolow normal, the sensonally-corrected indox showed an incrocise, rising from 135.8 at Decomber 1,1940 to 137.4 at the dete under roview. The latter figuro is tho highest secsonally-adjusted index on rooord.

While thore were deolines in omployment in many industrios and areas at Jamary 1 , 1941, those were not so widesproad \&s has boon customary in other winters. The distribution of the losses arion: the various industries also differed from that usually indicated. Thus, on the nvorage, the number laid off by frotories at tho beginnine of January in tho porice, 1921-19:0, has constituted just under 55 .0.0. of the total reduction roportod by the firms furnishine returns, and thet in construction, some 30 p.c., the remaining 15 p.c. being in transportation, mining, oto. it the dete under review, however, the number of persons relessed from work in manufacturine wes only about 24 p.c.e, while that in construction approximeted 58 p.o. of the total number laid off. The increase in the proportion shown by the latter industry was not so much due to an unusually lare folling-off in construction, as to the fact that the declines in oertain other industries, partioulerly manufcocturing, were below normal. On the other hand, logging reportod a reduction that exceedod the average.

The curtrilment of operations in manufacturing involved a smaller number of workers than in any othor Janucry on rocord; approximately 11,600 men and women were released from employmont in these industries, a deorease of 1.6 p.c. from the reoeding month. This ompared fovourably with the everage shrinkage of over 7 p.o. at January 1 in the years since 1920. The orude index declined from its all-time high of 144.7 at Dooembor 1 , 1940, to 142.5 at the date under roview. It we.s then higher than in any other month in the period of observation, excent in the final quarter of last year. The seasonallycorrectod incox at Juncery 1, 19\%1, stood at 152.0, rising from $1 \% 6.4$ in the preooding month. These two adjusted figures are the highest on record.

There were considerable gains ct the dete under reviow in iron and steel and toba.000 factories; electrioal epparatus, non-ferrous mets 1 and chomiocil works were also busier. The general trend in the remaining manuficturing industrios was downward. The most pronounced reductions wo re in the food, lumber, textile and pulp and paper divisions.

Canade's Extornal Trade in 1940
Canada's extornal trade in 1940, exoluding gold, ageregated $\$ 2,275,155,708$, the highest point reaohed since 1829 when the value was $2,477,335,139$. The 1939 valuation was $\$ 1,686,977,247$. The balrnoe of trece was favourable to canade to the extent of \& $111,279,476$ in 1940 compared with $\$ 184,866,179$ in 1939. Duties collooted during the year totc.lled $\$ 138,972,091$ compared with $103,282,895$ in 1939.

Domestic exports in 1940, excluding gold, totalling $\$ 1,178,954,420$, were the greatost rocorded sinoe 1928 when the value was $\$ 1,339,409,562$. The 1939 value was $\$ 924,926,104$. Imports also moved considorebly higher, amounting in value to $\$ 1,081,938,116$ comparod with $5751,055,534$. The previous poak was in 1929 when the value was 1, 298,992,692.

Index Numbers of Living Costs in Decembor
The Dominion Bureau of Statistios index number of living costs on the base 1935m $1939=100$, rose from 107.8 in Novembur to 108.0 in Decembcr. Prices for foods and home furnishings averaged higher. In December 1939 the index number was 103.8.
in indux for foods advanoud from 108.7 in Novamber to 109.1 in Dooombor. Leiry products, corcals, and vogotablos rocordod gains, whilo moats and fruits averagod lower. Hodorato cdvenoos for furniture, floor ooverings, toxtilo furnishings, hardvare, dishos and houschold olcening supplies, resultcd in a riso in the homefurnisinings group from 110.0 to 110.7 .

Living oost indexes during 1940 roso gredue.11y by four por oont from 103.8 in Jamuary to 108.0 in Decomber. Indexes for the verious groups rooorded the following inoreases between January and December, 1940: foods 4.4 per oent, reat 8.2 per oent, fuol 2.8 per oent, clothing 9.9 por cont, homofurnishings 6.1 por oont and misoelleneous itoms 1.0 per ount.

## Indoxes of Country Genoral Store Sales

Country general store salos averegod four per oont higher in Deoember 1940 than lust, acoording to returns roouived from approximatoly 700 of these general merohandse stores located in the smollar towns and rural areas. Gains over Deoembor 1939 wore reportod by all regions of the oountry axcent Saskatohowan. innnual salos for 1940 averaged six pur oent highor than in 1939.

## Indox Numbers of Retail Saies in Deoembor

Hoavy consumer demand for cloctriocl sopliances and equipment in anticipation of higher prices arising fram import restriotions and new taxation sohodules constitutes the outstanding feature of the retail trade of Cenada during Deoember, 1940. Composite figures for the twelve linos of business included in tho survoy averaged 11 per oent above the level of Deoumber 1939 and 28 por oont above Novembor, 1940. Tho general index of retail scles on the base 1930 equalls 100 , stances at 135.0 for the latest month, 105.8 for November and 122.1 for Deoember, 1939. Cumulative figures for 1940 averaged 12 per oont above 1939.

Wholesale Salos in December
Heavy buying in the wholosale automotive equipment and hardware trades together with less pronounoed but substantial inoreases in the othor lines of business included in the survey rosulted in an average gain of 19 per oont in dollar sales of wholesale merohants in Deoomber 1940 comnarod with 1939. This is the largest peroentuge inorease over 1939 recorded sinoe the first two months of the yoar and oompares with an inorease of 11 per oent in the annual totals for 19:0 comparod with 1939. The genercil index of salos on the base 1930100 stands at 116.4 for Docomber 1940, 122.9 for November and 98.2 for Leoember 1939.

## City Retail Food Frioe Indexes

In Septomber and Ootober 1939, retail food prices rose abruptly in all parts of Ccnada. From Novembor 1939 until Sentemoer 19f0, city retail food prioe indexes oither showed very littlo change or declined moderately. In the final quarter of 1910 retril food prioe avorages turned upward again rathor sharply.

The not result of changes botween august 1939 and Deoember 1940 may be observed in the following peroentege incroases recorded for eight oity indexes: Helifnx 15.2 p.0., Saint John 12.1 p.0., Montrael 10.5 p.0., Toronto 7.6 p.0., Winnipog 10.2 p.c., Sc.ske toon 12.1 p.o., Edmonton 9.8 p.0., and Vanoouver 9.1 p.o. Inoreases in the two Moritime oities have boon materially above average, and the Toronto inoroase somewhat less than avorage. Otherwise the advanoes were olosely grouped around 10 p.c.,

Throughout the period iugust 1939 to Docember 1940, none of the individual oity indexes differed from the Dominion avorage indox by as much as 7 p.c. If Halifax were exoluded the maximum difforenoe would never have rucohed 5 p.e., and presumably differenoes in completo oost of living indexes have been still loss.
would

The preooding ooments heve been based upon nowly construoted index number of retail prioes for foods in olght citios which are of outstanding importanoo as distributing oentros. These indexos mark the first stage in a programe of regional oost of living indexes.

Tho disappocrance of creamory and dairy buttor in Canada roachod a total of 382.1 million pounds in 1939, accounting for about 97.6 por cont of the total production. The por capita consumption was 32 pounds. Tho domostic disappoaranco of chooso was loss than 40 million pounds-in 1939, and difforing from buttor roprosontod only about 32.3 por cent of the total mako. The per capita consumption in 1939 was 3.53 pounds, a figuro which has variod very littlo from yoar to year.

Approximately 142 million pounds of concontratod milk products wero usod in Canada in 1939 compared with loss than 79 million in 1930. The former roprcsontod 84.5 per cent of tho total output and 12.56 pounds in consumption por capita. About 71.6 per cont was used in tho Dominion in 1930, with a por capita consumption of only 7.72 pounds. The por capita consumption of ico croam has incrensod considerably-in recent years. In 1939 it was ostimated at 0.75 gallons whorens in 1933 it was only 0.53 gallons.

The consumption of fresh milk, togethor with orcam exprossod as milk, raachod a total of 4.6 million pounds or 3.6 billion pints in 1939. This roprosentod a daily consumption for the whole of Canada of 0.87 pints por porson. It is important to obsorve that the milk producors supplying thoir own homos consumed 1.25 pints prr day whilo those roquirod to purchase their supply averaged only 0.74 pints per day. This explains in somo maasuro the variations in the total consumption in tho difforent soctions of the Dominion.

## Production of Londing Mineral Products

Production of Canada's leading mineral products during tho ten months ending October 1940 was as follows, with corrosponding figures for 1939 in brackets: asbestos, 283,927 $(291,510)$ tóns; coment $6,627,710(5,104,383)$ barrols; clay products $\$ 4,414,475(\$ 4,257,307)$ : coal $13,965,293(12,465,993)$ tons; feldspar $18,600(8,857)$ tons; Gold $4,402,782(4,234,846)$ fino ounces; gypsum 1,276,649(1,097,950) tons; lime $594,852(135,000)$ tons; natural gas, $27,646,458,000(27,731,938,000)$ cubic foet; potroloum 7,086,16I(6,603,374) barrels; commercial salt 194,987(209,835) tons; silver 19,293,224(19,320,562) fine ounces.

## Traffic on Railways in October
