MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XII

OTTAWA, JANUARY, 1938

No. 1

DOMINION STATISTICIAN: R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.)
BUSINESS STATISTICIAN: SYDNEY B. SMITH, M.A.

CURRENT ECONOMIC CONDITIONS IN CANADA

The principal factors indicating the trend of economic conditions averaged about the same in December as in the preceding month. A constructive factor was the rise in high-grade bond prices, the average in December being higher than at any time since last January. After showing a marked recession during the first quarter, high-grade bond prices recovered considerably during the remainder of the year. While the average for 1937 was not so high as the extreme position of 1936, an excellent showing was made compared to prior years of the post-war period.

Wholesale prices continued to show a lead over the corresponding month of 1936, and the index for 1937 consequently averaged considerably higher than in that year. A minor recession was shown in December, however, from the preceding month, the index dropping off from 83·1 to 82·7. After recording a marked decline during the preceding three months, common stock prices recovered slightly in December. Further strength was shown during the early weeks of January and considerable resistance is now being exerted against further decline. The maximum for common stock prices was reached in March and a considerable decline has since been recorded. The index showed a drop of 20 p.c. in December from the same month of the preceding year.

The banking position remained strong in 1937. The sum of the demand and notice deposits, after seasonal adjustment, reached a maximum in April and some reaction was shown toward the end of the year. The monthly average for 1937 shows a marked gain over that of the preceding twelve months.

Business operations continued at a high level during the last quarter of the year in spite of deflation in speculative factors. The index of the physical volume of business rose to 127·9 in November, a new maximum since 1929, but a reaction was shown in the last month of the year. The feature among the factors indicating the trend of mineral production was the rise in gold shipments to a new high point in history. Total shipments to the Royal Mint and to external points was 395,270 ounces, against 342,783 in November. The index after seasonal adjustment rose from 235·6 to 259·7, and a marked gain was also shown over December, 1936. Copper exports recorded decline from the high level of the preceding month although outward shipments were greater than in any other December. Nickel exports and lead production showed reaction in the latest month for which statistics are available.

The industries producing foodstuffs were less active in December than in the preceding month, the index receding from 109·5 to 102·5. Sheep slaughtering rose to a higher level than in any other December in the post-war period, while cattle and hog slaughtering showed recession from the preceding month. The release of cigarettes was larger than in any other December in the last 18 years, while the release of cigars was greater than in any December since 1929. The recession in newsprint production was less than normal for the season, the index rising from 184 to 193. Woodpulp and planks and boards were exported in larger volume. After seasonal adjustment, recession was shown in the output of steel ingots and pig iron indicating operations in the primary iron and steel industry. The output of automobiles was 20,652 units against 16,574 in November. The new business obtained by the construction industry was greater than in any December since 1931. The decline in carloadings was less than normal for the season, the index rising from 79·5 to 84·4. Owing in part

1926=100

to the decline in the outward movement of wheat, the value of merchandise exports declined to a much lower level in December than in the preceding month. Part of the recession was seasonal but the index dropped off from 102.7 to 81.9.

Mining

As the demand for base metals was greatly influenced by speculative considerations, Canada's producers in this line operated under favorable circumstances in the first half of the year. The announcement of the British rearmament scheme led to extensive buying and market advance in prices. Latterly, it was found that speculative purchasing had been overdone and that the expansion in production was more than sufficient to provide for actual requirements.

Mineral production was estimated at \$452,000,000 in 1937, an increase of 25 p.c. over the \$362 million produced in the preceding year. The greatest gain was shown in the metals division. Metal production was greater than the total value of production from all mines in Canada for any year except 1936. Gold production passed the four million ounce mark for the first time. To be more specific, the output was 4,054,799 ounces valued at \$141,877,000. Increased production was recorded in all provinces except Alberta and in the Yukon. Copper production rose 28 p.c. to nearly 540 million pounds worth \$70 million, the average price having been 13.083 cents against 9.477 cents in the preceding year. Ontario was the largest producer, the source being the nickel-copper ores of the Sudbury district. Nickel production was nearly 219 million pounds at \$58.8 million against 169.7 million pounds at \$34.9 million, the volume showing a gain of about 29 p.c.

The value of lead production rose 43 p.c. although the tonnage was only 8 p.c. greater. The mines of British Columbia accounted for 98 p.c. of the total. Zinc output advanced from 333 million pounds to 364.6 million and the value from \$11 million to \$18 million. Silver production showed some recovery, the total having been 23.1 million fine ounces valued at \$10.4 million.

Manufacturing

Manufacturing operations gathered momentum during the year, the output having been practically equivalent to that of 1929. The gain over the preceding year was 10 p.c., indicating the extensive nature of the recovery. Employment in manufacturing plants recorded decided improvement during 1937, the returns from the principal firms registering an average gain of 10.1 p.c., over the preceding year.

The exports of manufactured and semi-manufactured goods at \$680.8 million in the fiscal year 1937 showed a gain of 16.3 p.c. over the preceding year. The proportion of total domestic export was about 64 p.c. against 69 p.c. in the fiscal year ended March 31, 1936. The largest single commodity in this category was newsprint, the exports of which during the year were valued at \$110 million. The best customer for our manufactured goods was the United States which received partly and fully manufactured commodities to the amount of \$318 million. The British market absorbed Canadian manufactured goods to the amount of \$215 million. Canada sends manufactured goods to most of the countries and colonies, appreciable amounts being shipped to at least 90 in the last year.

Iron and Steel

The primary iron and steel industry reflecting the revival in the domestic demand for industrial equipment and durable goods, showed further gains over the levels of the first eleven months of 1936. The output of steel ingots recorded a gain of 28.9 p.c. over the preceding year while the increase in pig iron production was 33.9 p.c. The output of steel ingots in the first eleven months was 1,303,000 long tons and the volume of pig iron amounted to 817,000 tons. The index of employment based on monthly returns from the principal firms in the

Index of Economic Conditions based on Six Major Factors
Indices économiques basés sur six facteurs majeurs

1926=100

iron and steel group averaged 18 p.c. higher than in 1936. The average standing of the index was 105.4 against 89.2 in the preceding year.

The recovery of the steel industry from the low levels of the early part of 1933 was one of the striking features of the last five years. Despite a much greater production in 1937, prices in the iron and steel group showed appreciation, the index standing at 104.2 in November against 88.3 in the same month of last year. World production of pig iron and steel recorded increases of 28 p.c. and 25 p.c., respectively, in 1936, over the preceding year and the gains were extended in the year under review. Fourteen leading producing countries showed gains of 21 p.c. and 20.3 p.c., respectively for pig iron and steel in the first half of 1937, over the same period of 1936. A considerable part of the colossal expenditure on armaments contemplated by the major nations of the world will naturally flow into this industry. The increased domestic demand in these countries, many of which are normally exporters, precludes any immediate possibility of their entering the Canadian market in serious competition with domestic producers. The brisk demand for Canadian iron and steel which developed in Great Britain was of particular value to the steel industry of the Maritime Provinces.

Construction

Construction contracts awarded in the twelve months of 1937 amounted in estimated value to \$224,047,000, exceeding the total of \$162,588,000 for 1936 by 38 p.c. Of this amount \$111 million represented strictly building operations, while the engineering group totalled \$79 million. Residential and industrial construction showed increases of 31 p.c. and 126 p.c., respectively. A gain of 46 p.c. was shown in business buildings. The continued successful development of mineral resources resulted in a very rapid expansion in building in communities adjacent to mining operations, accounting for considerable new building in those areas apart from actual mine expenditures.

The value of building permits in 58 cities was \$52 million in the first eleven months of 1937, against \$38 million in the preceding year, a gain of 37 p.c. The index of wholesale prices of building materials on the base of 1936 equalling 100, advanced from 85.0 in 1936 to 94.8 in the year under review.

Unemployment

The number of fully employable persons on the relief rolls in November last, declined more than 87,000 or nearly 40 p.c. from the standing of the same month of 1936. The approximate number of fully employable persons receiving aid last November was 134,000 against 221,165 in November of the preceding year. The November 1937 total of 134,000 was made up of all classes of fully employable persons—family heads, individuals and employable dependents—but excludes farmers (resident farm operators) who were receiving agricultural material aid. The total indicates an increase of 12½ p.c. by comparison with October, the previous month. About 74 p.c. of the 134,000 were reported from the 54 cities of over 10,000 population distributing aid. The total number of persons receiving non-agricultural aid in November last was about 507,000, or an increase of 10 p.c. over the preceding month, but a decrease of 32½ p.c. from November 1936.

External Trade

The substantial gain in external trade was one of the chief constructive developments of the year. Total exports of merchandise were \$1,036 million in the first eleven months against \$928 million in the preceding year, an increase of \$108 million or 12 p.c. A gain of 29.8 p.c. was shown in imports, the total in eleven months ended November having been \$756 million. Owing to the high level of exports, the balance of trade was very largely in Canada's favor.

Several causes contributed to the surprising expansion in the export trade of the Dominion during the year. One factor was the economic recovery which

was practically general for the first half of the year in all the principal countries for which information is available. The circumstances surrounding the wheat trade were favorable in the early part of the year. The advance in wholesale prices also added appreciably to the value of the external trade.

The Tourist Trade

Tourist travel, which must be classed as a luxury, inevitably declines in time of depression. The value of Canada's tourist business reached its high point in 1929 when the estimated expenditures of foreign tourists within the country amounted to approximately \$309 million. During 1936 and 1937 recovery was rapid and it is expected that soon the value of Canada's tourist travel will surpass predepression levels.

Measured by the number of motor cars entering Canada during the recent season, it is estimated that a gain of from 15 p.c. to 20 p.c. will be shown in the expenditures of the preceding year reported as \$255 million. This statement involves the assumption that the expenditure per car was in the same proportion as in 1936.

International Balance of Payments

A heavy balance of visible and invisible exports over imports has been a characteristic of Canadian trade relations in recent years, although the decline in outward shipments of grain reduced the active balance during 1937. As these surplus exports, chiefly in commodity trade and expenditures of visiting tourists, have grown rapidly in the last two years, the outflow of capital has naturally kept pace. This has been mainly for the redemption of bond issues and for repurchases of Canadian securities. As a consequence, the outlook is for an important reduction in future interest payments.

Sales and purchases of stocks, bonds and similar securities between Canada and other countries have become an important factor. During the first eleven months of 1937 they were heavier in volume and more definite in direction than in the preceding year. Canadian purchases of securities from other countries totalled \$477 million, exceeding sales by about \$5·3 million, total transactions being \$948·6 million. In other words, Canada on balance exported over \$5 million worth of capital through the security markets alone. There was a considerable divergence in the nature of these exchanges as between Canada and the United States on the one hand and between Canada and the United Kingdom on the other. Altogether we purchased \$38 million more of securities from the United States than the United States bought from us, while in the case of the United Kingdom we sold \$22 million more than we bought. In the case of other countries, sales were \$11 millions greater than purchases.

Canal Traffic

Total freight passing through the Canadian and United States locks of the Sault Ste. Marie Canals during the past season amounted to 87·6 million tons, which was exceeded only in four other years. The traffic is dominated by down-bound iron ore and up-bound soft coal, which amounted to 65·6 million tons and 12·9 million, respectively. The iron ore tonnage was a new high record, the previous high being 64·9 million in 1929. Wheat shipments were the smallest since 1919 and were 28 p.c. below 1936, the total in 1937 having been 3·5 million tons.

A new high record was established by the Welland Canal, total freight rising to 11·8 million tons as against 10·4 million in 1936, the previous record. A number of commodities showed fairly large decreases, but these were more than offset by increases such as in soft coal to 3,877,823 tons from 3,146,652; corn to 851,354 tons from 157,855 and iron ore to 909,180 tons from 674,345. The large decreases included wheat, wood pulp, coke, flour, gasoline, pulpwood and sugar.

A high record was set up also by the St. Lawrence Canals with 9,073,302 tons of freight which was 661,760 tons or eight p.c. above the record made in 1928.

Finance

Governmental revenues held up well during the first nine months of the present fiscal year confirming higher levels in imports and retail sales over last year. For the period (ending December 31) total receipts increased \$63·4 million over the same months of the fiscal period 1936-7. Encouraging advances were shown in customs, up \$11·9 million, excise duty gaining \$5·8 million, sales tax, etc., up \$27·7 millions, income tax increasing nearly \$16 million and post office over \$1 million. Grand total receipts at \$402,283,466 compared with \$339,330,185, registered a gain of 18·6 p.e. Total expenditure in the three quarters was up only \$1·4 million, economies having been effected in interest on debt, public works, trade and commerce and relief payments. Special expenditure on relief was down over \$10·5 millions. On the other hand, old age pensions, national defence and the C.N.R. required larger advances.

With due allowance for seasonal tendencies, if the present trend of receipts and expenditure is maintained, an appreciable approach toward a balanced budget will be accomplished. The deficit for the current year is expected to be well below the official estimate.

Bond Financing Lower in 1937.

Canadian Government and municipal bond financing completed during 1937 was slightly lower, apart from treasury bill issues, than in the preceding year, and also lower than in 1935 and 1934. During the last three years the trend has been toward lower volume of Dominion of Canada direct and guaranteed bonds, with a larger volume of provincial and municipal financing. This tendency as regards Dominion issues may be attributed to the smaller aggregate of maturing bonds requiring refunding, together with the expansion in revenues which is improving the position of current federal finances.

Provincial and municipal issues have increased for both new money and refunding purposes. In the municipal section, improving tax revenues and the general financial position of Canadian municipalities have broadened the demand for municipal obligations.

In 1937, as in recent years, the entire amount of bond financing was accomplished within the Dominion, apart from a relatively small amount sold in New York.

The Bank of Canada

The year has witnessed the consolidation of the central banking system and a demonstration was given of the functioning of the latter during a period of relatively active business conditions. The main effects of the developing prosperity on the banks was an increasing demand for cash for circulation and a revival in the demand for bank loans. The way in which the banking system has adapted itself to the situation was largely dependent on the operations of the Bank of Canada.

In the twelve months ended December 31, government deposits about halved but changes in this account are due to temporary discrepancies between government receipts and disbursements and are apparently not allowed to have any disturbing influence on bankers' deposits. In the other accounts, increases were shown in the note issue, in security holdings and in the reserve of foreign exchange.

The Bank of Canada has allowed the chartered banks to draw more notes without reducing bankers' deposits appreciably by itself acquiring securities. The central bank has, that is to say, created the new cash which has been required by the banks for circulation and till money. Of the assets it has acquired, \$12 million, mostly bought in June, are described as "Other Securities". The reserves of sterling and United States dollars were increased by \$1·8 million, the total amount on December 31 having been \$14·9 million.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XII

OTTAWA, JANVIER 1938

N° 1

STATISTICIEN DU DOMINION: R. H. COATS, LL.D., F.S.S. (HON.) F.R.S.C.,
STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

STATISTIQUES COURANTES DES AFFAIRES AU CANADA

Les principaux facteurs indiquant la marche des conditions économiques sont à peu près au même niveau en décembre qu'au cours du mois précédent. La hausse des obligations de tout repos constitue un facteur constructif, la moyenne de décembre l'emportant sur tout autre mois depuis janvier dernier. Après une régression marquée au cours du premier trimestre, les obligations de tout repos se ressaissent considérablement le reste de l'année. Bien que la moyenne de 1937 ne soit pas aussi élevée que la position extrême de 1936, elle fait excellente figure comparativement à toute année antérieure de la période d'après-guerre.

Les prix de gros continuent leur avance sur le mois correspondant de 1936, et en conséquence l'indice l'emporte de beaucoup sur cette année. Toutefois, il y a faible régression en décembre sur le mois précédent, et l'indice tombe de 83·1 à 82·7. Après un déclin marqué au cours des trois mois précédents, les actions ordinaires se ressaissent légèrement en décembre. Elles montrent une nouvelle fermeté les premières semaines de janvier, et offrent une résistance considérable à un plus fort déclin. Les actions ordinaires ont touché leur maximum en mars, mais elles ont subi depuis un déclin considérable. L'indice montre un recul de 20 p.c. en décembre sur le mois correspondant de 1936.

La position des banques demeure forte en 1937. La somme des dépôts à demande et à terme, après ajustement saisonnier, touche un maximum en avril, mais montre une certaine régression vers la fin de l'année. La moyenne mensuelle de 1937 montre un gain marqué sur celle de l'année précédente.

Les opérations commerciales continuent à haut niveau au cours du dernier trimestre de l'année en dépit de la déflation des facteurs spéculatifs. L'indice du volume physique des affaires monte à 127·9 en novembre, nouveau maximum depuis 1929, mais il réagit le dernier mois de l'année. Les expéditions d'or, qui touchent une nouvelle cime dans l'histoire, constituent le trait saillant parmi les facteurs indiquant la tendance de la production minérale. Les expéditions totales à la Monnaie Royale et aux points extérieurs s'établissent à 395,270 onces, contre 342,783 en novembre. L'indice, après ajustement saisonnier, monte de 235·6 à 259·7, et il montre également un gain marqué sur décembre 1936. Les exportations de cuivre déclinent de leur haut niveau du mois précédent, bien qu'elles l'emportent sur tout autre décembre. Les exportations de nickel et la production de cuivre flétrissent le dernier mois sur lequel des statistiques existent.

Les industries alimentaires sont moins actives en décembre que le mois précédent, et l'indice fléchit de 109·5 à 102·5. Les abatages de moutons montent à un plus haut niveau qu'en tout autre décembre de la période d'après-guerre, tandis que les abatages de bêtes à cornes et de porcs diminuent sur le mois précédent. Les dédouanements de cigarettes l'emportent sur tout autre décembre depuis dix-huit ans, tandis que ceux de cigares sont plus considérables qu'en tout autre décembre depuis 1929. La régression dans la production de papier à journal est moins que normale pour la saison, et l'indice monte de 184 à 193. Les exportations de pulpe de bois et de madriers et planches sont plus considérables. La production d'acier en loupe et de fonte en gueuse, indiquant les opérations dans l'industrie primaire du fer et de l'acier, montre un déclin après ajustement. La production d'automobiles s'établit à 20,652 unités, contre 16,574 en novembre. Les nouvelles entreprises de construction l'emportent sur tout autre décembre depuis 1931. Le déclin des chargements de wagons est moins que normal pour la saison, et l'indice monte de 79·5 à 84·4. Par suite en partie du déclin des exportations de blé, la valeur des exportations générales baisse à un bien plus bas niveau que le mois précédent. Une partie de la régression est saisonnière, mais l'indice tombe de 102·7 à 81·9.

Mines

Comme la demande de bas métaux a été grandement influencée par des considérations spéculatives, les opérations des producteurs canadiens se sont poursuivies dans des circonstances favorables au cours du premier semestre de l'année. L'annonce du plan de réarmement britannique a suscité de forts achats et une avance marquée des prix. Plus tard il devint visible que les achats spéculatifs avaient été exagérés et que l'expansion de la production était plus que suffisante pour pourvoir aux besoins actuels.

La production minérale est estimée à \$452,000,000 en 1937, augmentation de 25 p.c. sur les \$362,000,000 de l'année précédente. La division des métaux montre le plus fort gain. La production de métaux est plus considérable que la valeur totale de production de toutes les mines au Canada pour toute année, sauf 1936. La production d'or dépasse quatre millions d'onces pour la première fois. Pour être plus spécifique, la production s'établit à 4,054,799 onces évaluées à \$141,877,000. Toutes les provinces, sauf l'Alberta et le Yukon, montrent une plus forte production. La production de cuivre monte de 28 p.c. pour s'établir à près de 540,000,000 de livres, d'une valeur de \$70,000,000, le prix moyen étant de 13.083 cents, contre 9.477 l'année précédente. L'Ontario est le plus fort producteur; les minerais de nickel-cuivre du district de Sudbury en sont la source. La production de nickel est de près de 219,000,000 de livres (\$58,800,000), contre 169,700,000 (\$43,900,000), soit un gain d'environ 29 p.c. en volume.

La valeur de la production de plomb monte de 43 p.c., bien que le tonnage n'avance que de 8 p.c. Les mines de la Colombie Britannique fournissent 98 p.c. du total. La production de zinc avance de 333,000,000 de livres à 364,600,000, et la valeur de \$11,000,000 à \$18,000,000. La production d'argent montre quelque reprise, et le total s'établit à 23,100,000 onces fines évaluées à \$10,400,000.

Manufactures

Les opérations manufacturières ont pris de l'impulsion au cours de l'année et la production égale presque celle de 1929. Le gain sur l'année précédente est de 10 p.c., ce qui indique la nature étendue de la reprise. L'emploi dans les établissements manufacturiers enregistre une amélioration ferme en 1937, les données des principales firmes enregistrant un gain moyen de 10.1 p.c. sur l'année précédente.

Les exportations d'articles ouvrés et semi-ouvrés, qui s'élèvent à \$680,800,000 l'année fiscale 1937, montrent un gain de 16.3 p.c. sur l'année précédente. Leur proportion des exportations totales canadiennes est d'environ 64 p.c., contre 69 p.c. l'année fiscale terminée le 31 mars 1936. Le papier à journal, dont les exportations de l'année sont évaluées à \$110,000,000, est la commodité individuelle la plus considérable dans ce groupe. Les Etats-Unis qui ont reçu des denrées partiellement et entièrement ouvrées pour une valeur de \$318,000,000 sont le meilleur client pour nos articles ouvrés. Le marché britannique吸orbe des articles ouvrés par une valeur de \$215,000,000. Le Canada envoie des articles ouvrés à la plupart des pays et colonies; des quantités appréciables ont pris la route d'au moins 90 pays l'an dernier.

Sidérurgie

L'industrie primaire de la sidérurgie, baromètre de la demande domestique pour l'outillage industriel et les articles durables, montre de nouveaux gains sur les onze premiers mois de 1936. La production de lingots d'acier enregistre un gain de 28.9 p.c. sur l'année précédente, tandis que la production de fonte en gueuse augmente de 33.9 p.c. La production de lingots d'acier les onze premiers mois s'établit à 1,303,000 tonnes longues, et celle de fonte en gueuse, à 817,000 tonnes. L'indice de l'emploi, basé sur les rapports mensuels des principales firmes du groupe de la sidérurgie, l'emporte de 18 p.c. sur 1936. L'indice s'établit à 105.4, contre 89.2 l'année précédente.

Le relèvement de l'industrie de l'acier comparativement aux bas niveaux de la première partie de 1933 constitue l'un des traits saillants des cinq dernières années. Malgré une production beaucoup plus considérable en 1937, les prix du groupe fer et acier avancent sensiblement et l'indice s'établit à 104.2 en novembre, contre 88.3 le même mois de l'an dernier. La production mondiale de fonte en gueuse et d'acier enregistre une augmentation de 28 p.c. et de 25 p.c. respectivement en 1936 sur l'année précédente; cette augmentation se continue l'année sous revue. La production de fonte en gueuse et d'acier de quatorze principaux pays montre la première moitié de 1937 un gain de 21 p.c. et de 20.3 p.c. respectivement sur la période correspondante de 1936. Une partie considérable des dépenses colossales projetées en armements par les principales nations se déversera naturellement dans cette industrie. La plus forte demande domestique de ces pays, dont plusieurs sont normalement exportateurs, écarte toute possibilité immédiate d'une concurrence sérieuse avec les producteurs canadiens. La forte demande de fer et d'acier canadiens qui s'est produite en Grande-Bretagne a été d'une valeur particulière aux aciéries des Provinces Maritimes.

Construction

Les contrats de construction adjugés au cours des douze mois de 1937 sont évalués à \$224,057,000, soit une avance de 38 p.c. sur le total de 1936 (\$162,588,000). De cette somme, \$111,-

000,000 représentent des travaux de construction proprement dite, tandis que le groupe du génie s'élève à \$79,000,000. La construction résidentielle et industrielle montre une avance de 31 p.c. et de 126 p.c. respectivement. Les édifices commerciaux montrent un gain de 46 p.c. L'exploitation sans cesse heureuse des ressources minérales a été un très rapide stimulant pour la construction dans les centres voisins des entreprises minières, ce qui explique la somme considérable de nouvelle construction dans ces régions en plus des frais réels d'exploitation minière.

La valeur des permis de bâtir dans 58 cités s'élève à \$52,000,000 les onze premiers mois de 1937, contre \$38,000,000 l'année précédente, avance de 37 p.c. L'indice des prix de gros des matériaux de construction, sur la base de 1926 à 100, avance de 85·0 en 1936 à 94·8 l'année sous revue.

Chômage

Le nombre de personnes aptes à travailler sur les listes de secours en novembre dernier décline de plus de 87,000 ou de près de 40 p.c. sur le mois correspondant de 1936. Le nombre approximatif de personnes aptes à travailler bénéficiant de secours en novembre dernier s'établit à 134,000, contre 221,165 en novembre de l'année précédente. Le total de novembre 1937 (134,000) comprend toutes les classes de personnes aptes à travailler—chefs de famille, individus et dépendants aptes à travailler—mais exclut les cultivateurs (exploitants de ferme) qui recevaient de l'aide agricole. Le total indique une augmentation de 12½ p.c. comparativement à octobre, le mois précédent. Environ 74 p.c. des 134,000 proviennent des 54 cités de plus de 10,000 âmes distribuant des secours. Le nombre total de personnes recevant de l'aide non agricole en novembre dernier est d'environ 507,000, augmentation de 10 p.c. sur le mois précédent, mais diminution de 32½ p.c. sur novembre 1936.

Commerce extérieur

Le gain substantiel du commerce extérieur constitue l'un des principaux faits saillants de l'année. Les exportations totales de marchandises s'élèvent à \$1,036,000,000 les onze premiers mois, contre \$928,000,000 l'année précédente, augmentation de \$108,000,000 ou de 12 p.c. Les importations montrent un gain de 29·8 p.c., le total des onze mois finissant le 30 novembre étant de \$756,000,000. Par suite du niveau élevé des exportations, la balance du commerce est de beaucoup en faveur du Canada.

Plusieurs causes contribuent à l'expansion surprenante du commerce d'exportation du Canada au cours de l'année. La reprise économique, qui est presque générale le premier semestre de l'année dans tous les principaux pays sur lesquels des données existent, constitue l'un des facteurs. Les circonstances qui entourent le commerce du blé sont favorables la première partie de l'année. L'avance des prix de gros ajoute aussi sensiblement à la valeur du commerce extérieur.

Commerce de tourisme

Le tourisme, qui doit être classé comme un luxe, décline inévitablement en temps de crise. La valeur du commerce touristique du Canada touche sont haut en 1929, alors que les dépenses estimatives des touristes étrangers dans le pays s'élèvent à environ \$309,000,000. En 1936 et 1937, la reprise a été rapide et il est prévu que la valeur du commerce touristique du Canada dépassera bientôt les niveaux antérieurs à la crise.

D'après le nombre d'automobiles qui sont entrés au Canada au cours de la dernière saison, il est estimé qu'il y a avance de 15 à 20 p.c. sur les dépenses de l'année précédente (\$225,000,000), en présumant que les dépenses par voiture sont dans la même proportion qu'en 1936.

Balance des paiements internationaux

Un fort excédent des exportations visibles et invisibles sur les importations a été l'une des caractéristiques des échanges commerciaux du Canada en ces dernières années, bien que le déclin des expéditions de céréales réduise la balance active en 1937. Comme ces excédents d'exportation, surtout en commerce de denrées et en dépenses touristiques, ont grandi rapidement au cours des deux dernières années, la sortie de capitaux a naturellement marché de pair. Il s'agit surtout du remboursement d'obligations et du rachat de titres canadiens. En conséquence, les perspectives indiquent une diminution importante dans les futurs paiements d'intérêt.

Les ventes et les achats de titres, obligations et valeurs semblables entre le Canada et les autres pays deviennent un facteur important. Les onze premiers mois de 1937 les ventes et les achats sont plus considérables en volume et d'une orientation plus définie qu'au cours de l'année précédente. Les achats canadiens de valeurs mobilières d'autres pays s'élèvent à \$477,000,000 et dépassent les ventes d'environ \$5,300,000; les opérations totales s'établissent à \$948,600,000.

En d'autres termes, le Canada a exporté plus de \$5,000,000 de capitaux sur les marchés de valeurs mobilières seulement. La nature de ces échanges entre le Canada et les Etats-Unis d'une part et entre le Canada et le Royaume-Uni de l'autre montre une divergence considérable. En tout, le Canada a acheté pour \$38,000,000 de plus de valeurs mobilières des Etats-Unis que ceux-ci en ont acheté du Canada, tandis que dans le cas du Royaume-Uni nos achats dépassent nos ventes de \$22,000,000. Pour ce qui est des autres pays, les ventes l'emportent de \$11,000,000 sur les achats.

Trafic des canaux

Le fret total passant par les écluses canadiennes et américaines des canaux du Sault Ste-Marie au cours de la dernière saison s'établit à 87,000,000 de tonnes, ce qui n'est dépassé que par quatre autres années. Le minerai de fer à destination des Etats-Unis et le charbon mou à destination du Canada qui s'établissent à 65,600,000 et à 12,900,000 tonnes respectivement sont les principaux item de ce trafic. Le tonnage du minerai de fer touche un nouveau record, le haut précédent étant de 64,900,000 en 1929. Les expéditions de blé sont les plus faibles depuis 1919 et de 28 p.c. inférieures à celles de 1936; le total en 1937 s'établit à 3,500,000 tonnes.

Le canal de Welland établit un nouveau record; le fret total monte de 10,400,000 en 1936, record précédent, à 11,800,000. Un certain nombre de denrées montrent d'assez fortes diminutions, mais elles sont plus que compensées par les augmentations du charbon mou, de 3,146,652 à 3,877,823; du maïs, de 157,855 à 851,354, et du minerai de fer de 674,345 à 909,180. Les fortes diminutions comprennent le blé, la pulpe de bois, le coke, la farine, la gazoline, le bo's de pulpe et le sucre.

Les canaux du St-Laurent, avec 9,073,302 tonnes de fret, soit 661,760 tonnes ou 8 p.c. au-dessus de la même de 1928, établissent également un nouveau record.

Finances

Les revenus de l'Etat se sont bien maintenus au cours des neuf premiers mois de l'année fiscale courante, ce qui confirme les plus hauts niveaux d'importations et de ventes de détail sur l'an dernier. Les recettes totales au cours de cette période avancent de \$63,000,000 sur les mêmes mois de la période fiscale 1936-1937. Les douanes avancent de \$11,900,000; le droit d'accise, de \$5,800,000; la taxe de vente, etc., de \$27,700,000; l'impôt sur le revenu, de près de \$16,000,000, et les postes de plus de \$1,000,000. Les recettes globales s'élèvent à \$402,283,466, contre \$339,330,185, soit un gain de 18·6 p.c. Les dépenses totales des trois trimestres n'avancent que de \$1,400,000; les économies ont été réalisées dans l'intérêt sur la dette, les travaux publics, le commerce et les paiements de secours. Les dépenses spéciales en secours baissent de plus de \$10,500,000. Par contre, les pensions de vieillesse, la défense nationale et le Canadien National ont eu besoin de plus fortes avances.

Compte tenu des tendances saisonnières, si la tendance actuelle des recettes et des dépenses se maintient, il sera presque possible d'équilibrer le budget. Le déficit de l'année courante sera bien au-dessous de l'estimation officielle.

Financement d'obligations inférieur en 1937

Le financement d'obligations fédérales et municipales en 1937 est un peu plus faible, abstraction faite des émissions de bons du Trésor, qu'au cours de l'année précédente et également plus faible qu'en 1935 et 1934. Au cours des trois dernières années, il y a ralentissement dans l'émission d'obligations directes ou garanties par le Dominion du Canada, mais le financement provincial et municipal est plus considérable. Cette tendance en ce qui concerne les émissions du Dominion peut s'attribuer à la plus faible somme d'obligations à maturité et requérant remboursement, et à l'expansion des revenus qui améliore la position des finances fédérales courantes.

Les émissions provinciales et municipales ont augmenté tant pour fins de nouveaux fonds que de remboursement. Dans la section municipale, l'augmentation des recettes provenant des taxes et la posture générale financière des municipalités canadiennes ont accru la demande d'obligations municipales.

En 1937 ainsi qu'en ces dernières années, le financement d'obligations s'est fait entièrement dans le Dominion, à l'exception d'une proportion relativement faible vendue à New-York.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

ANNUALS AND SPECIAL REPORTS ISSUED DURING THE MONTH ENDING JANUARY 15, 1938

Administration.—Liste des publications du Bureau Fédéral de la Statistique comprenant rapports, bulletins, communiqués à la presse, etc., 11 p. Canada, 1938, the official handbook of present conditions and recent progress, 192 p. illus. map, 25 cents (10 cents to teachers, bona fide students and ministers of religion).

Population.—Births, marriages and deaths in the second quarter of 1937, 5 p.

Production.—**AGRICULTURAL PRODUCTS.**—Quantity and value of fruit nursery stock sales, 5 p. **ANIMAL PRODUCTS**—Fur production of Canada, season 1935–1936 (Eng. and French) 37 p. 25 cents. **MINERAL PRODUCTION**—Preliminary estimate of Canada's mineral production, 1937, 7 p. 10 cents. Report on miscellaneous metals in Canada, 1936, including aluminum, antimony, barium, beryllium, bismuth, cadmium, calcium, chromium, iron, lithium, magnesium, manganese, mercury, molybdenum, radium-uranium, selenium, sodium, tellurium, tin, titanium (ilmenite) tungsten, vanadium, zirconium, 35 p., 15 cents.

Manufactures.—**VEGETABLE PRODUCTS.**—Preliminary report on the pack of certain canned fruits and vegetables, 1937, (Eng. and French) 1 p. **TEXTILES.**—Report on the men's factory clothing industry and clothing contractors in Canada, 1936, 24 p., 25 cents. **FOREST PRODUCTS INDUSTRIES.**—Coffins and caskets, 1936 (Eng. and French) 2 p., 10 cents. The cooperage industry, 1936 (Eng. and French), 2 p., 10 cents. **ANIMAL PRODUCTS.**—Leather gloves and mittens, Canada, 1936, 13 p., 20 cents. **CHEMICAL PRODUCTS.**—The toilet preparations industry in Canada, 1936, 12 p., 15 cents. The lime industry in Canada, 1936, 10 p. **Non-ferrous Metals**—Annual industry report; Manufactures of the non-ferrous metals, preliminary summary statistics, 1936, 3 p., 10 cents. **Electrical Equipment**—Quarterly report, production and sales of radio receiving sets, third quarter, 1937, 6 p., 15 cents. Quarterly report, factory sales of electric storage batteries, third quarter, 1937, 4 p., 10 cents.

Internal Trade.—Retail chains in Canada, 1936, 16 p., 10 cents. World price movements (a quarterly supplement to prices and price indexes) third quarter of 1937, 12 p. Miscellaneous statistics on retail trade, 1936; gross margins, customers' accounts outstanding, salaries and wages, stocks on hand, 11 p., 10 cents.

Transportation, communication and public utilities.—Summary of canal traffic for December and season of navigation, 1937, 6 p.

Finance.—Report on the Municipal bonded indebtedness in Canada, 1935, 7 p., 25 cents. Assessment valuations by provinces, 1935, 11 p., 25 cents. Municipal statistics, 1935. Statistics of cities and towns having a population of 10,000 and over, 37 p., 25 cents.

General.—Annual review of the employment in Canada, during 1937, 19 plus 9 p. charts.

2. PUBLICATIONS REGULARLY ISSUED BY THE WEEK, MONTH OR QUARTER

Daily Bulletins.—The daily bulletin (Eng. and French)—\$1.50 per year.

Weekly Bulletins.—Canadian grain statistics. Carloadings of revenue freight. Security prices and foreign exchange. The weekly bulletin—\$1.00 per year. Weekly index numbers of wholesale prices.

Monthly Bulletins.—Agricultural statistics (Eng. and French). The wheat situation; review; statistical supplement—\$1.00 per year. Canadian milling statistics. Cold storage holdings of apples and small fruit; of meat and fish. Production of—(a) Flour. (b) Sugar. (c) Boots and shoes (Eng. and French). (d) Automobiles. (e) Iron and steel. (f) Coal and coke. (g) Leading mineral products. (h) Asbestos. (i) Asphalt roofing. (j) Cement. (k) Clay products. (l) Copper. (m) Feldspar. (n) Gold. (o) Gypsum. (p) Lead. (q) Lime. (r) Natural gas. (s) Nickel. (t) Petroleum. (u) Salt. (v) Silver. (w) Zinc. (x) Concentrated milk products. (y) Butter and cheese, and stocks of dairy and poultry products. (z) Automatic stokers. Rigid insulating board industry (Eng. and French). Building permits. Summary of the trade of Canada, current month and 12 months. Summary of Canada's domestic exports. Summary of Canada's imports. Asbestos trade. Farm implements and machinery. Footwear trade. Exports: Animals, living; Fertilizers; Grain and flour; Hides and skins; Lumber; Meats, lard and sausage casings; Milk, milk products and eggs; Non-ferrous ores and smelter products; Paints and varnishes; Petroleum and its products; Pipes, tubes and fittings; Pulpwood, wood pulp and paper; Rubber and insulated wire and cable; Toilet preparations; Vegetable oils; Vehicles (of iron). Imports: Animals, living; Canada's imports from Empire and foreign countries; Coffee and tea; Fertilizers; Hides and skins; Lumber; Meats, lard and sausage casings; Milk and its products and eggs; Non-ferrous ores and smelter products; Paint and varnishes; Pulpwood, wood pulp and paper; Petroleum and its products; Pipes, tubes and fittings; Rubber; Stoves, sheet metal products, refrigerators; Toilet preparations; Vegetable oils; Vehicles (of iron). Canada's monthly trade trends. Canada's monthly trade trends with Empire countries. Canada's monthly trade trends with foreign countries. Monthly retail sales in country general stores. Railway operating statistics. Traffic of Canadian railways. Canal statistics. Output of central electric stations in Canada. Price and price indexes. Price movements (preliminary). Automobile financing. Bank debits. Retail sales in Canada. Commercial failures. The employment situation as reported by employers. Monthly wholesale trade. New motor vehicle sales. Outstanding facts and figures gathered from reports, statements, bulletins and radio broadcasts. Review of business statistics (Eng. and French)—Price \$1.00 per year. Sales and purchases of securities between Canada and other countries. Vital statistics, births, marriages and deaths, by provinces.

Quarterly Reports.—Trade of Canada (Eng. and French)—Price \$2.00 per year. Coal and coke. Factory sales of electric storage batteries. Galvanized sheets. Price movements in other countries. Production and sales of radio receiving sets. Stocks and consumption of unmanufactured tobacco. Vital statistics.

Irregular Issue.—The dairy situation in Canada (Eng. and French).

For the publications listed above application should be made to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

The complete service of all publications issued by the Bureau (with the exception of news-bulletins) may be obtained for a special rate of \$20 per annum.
