20. Volume of Trade in Certain Commodities .....	21	40. Chart of Weekly Bank Clearings.....	34
		Economic Conditions of Canada (French).....	35-36
		List of Current Publications of the Dominion Bureau of Statistics.....	39
<b>X. Conditions in Other Countries</b>			

Two bulletins that should prove particularly useful and interesting have been released by the Bureau. The first is "Business Conditions in the year 1939" compared with 1938, and other representative years, containing 16 pages of text, charts and tables. The second publication is the "Annual Report on Bank Debits" with "Notes on the Equation of Exchange in the Period 1919-1939." The banking and currency position is outlined, indicating the amount of cheques cashed to individual accounts at the 32 clearing house centres, the circulating media in the hands of the public, velocity of bank deposits and other important statistics.

# MONTHLY REVIEW OF BUSINESS STATISTICS

OTTAWA, APRIL, 1940

No. 4

DOMINION STATISTICIAN: R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.)  
BUSINESS STATISTICIAN: SYDNEY B. SMITH, M.A.

## BUSINESS CONDITIONS IN FEBRUARY

Wheat markets continued firm in March with war developments holding the centre of interest in their effect on the potential demand for wheat. Following two years of exceptionally high world average yields, a prospective reduction in world harvests for the present year is already expected. It is estimated that the world carry-over, however, will be of record proportions on July 31, next.

The railway traffic movement showed marked expansion in the early weeks of April due mainly to heavy shipments of grain in the Western Division. The index for the 15th week of the year ended April 13, was 82 compared with 68 in the same week of 1939. The total traffic to April 13, was 704,529 cars against 610,747 in the same period of last year. Gains were recorded in each of the eleven commodity groups except live stock. The increase in grain was more than 29,000 cars while miscellaneous commodities rose 16,816 cars. Gross operating revenues of the Canadian Pacific Railways amounted to \$11,478,000 during March against \$10,605,000 in the same period of last year. The revenues of the Canadian National Railway were \$15,117,000 against \$12,067,000.

Orders amounting to about \$70 million for munitions and war supplies have been placed in Canada by the British Supply Board since last September and further contracts amounting to \$17 million will be awarded shortly. The total of \$87 million was being used almost exclusively for the purchase of finished products including munitions and other manufactured materials required for war purposes. Total appropriations for purchase of war materials and other supplies in Canada for the United Kingdom in the first year of the war amounted to \$445,000,000.

The United Kingdom was Canada's best customer in March, domestic exports to that country amounting to \$40 million against 26·1 million in March of last year. The total last month was heavier than in any other month since November, 1937, when the total was \$49·1 million. The United States was in second place with a total of \$25·6 million against \$24·7 million in March last year.

The primary iron and steel industry was particularly active in March, the output of steel ingots and castings having been 157,326 tons against 140,343 in the preceding month. The seasonally adjusted indexes for both steel and pig-iron recorded slight gains over February. The output of steel ingots and castings in March, 1939 was 95,697 tons.

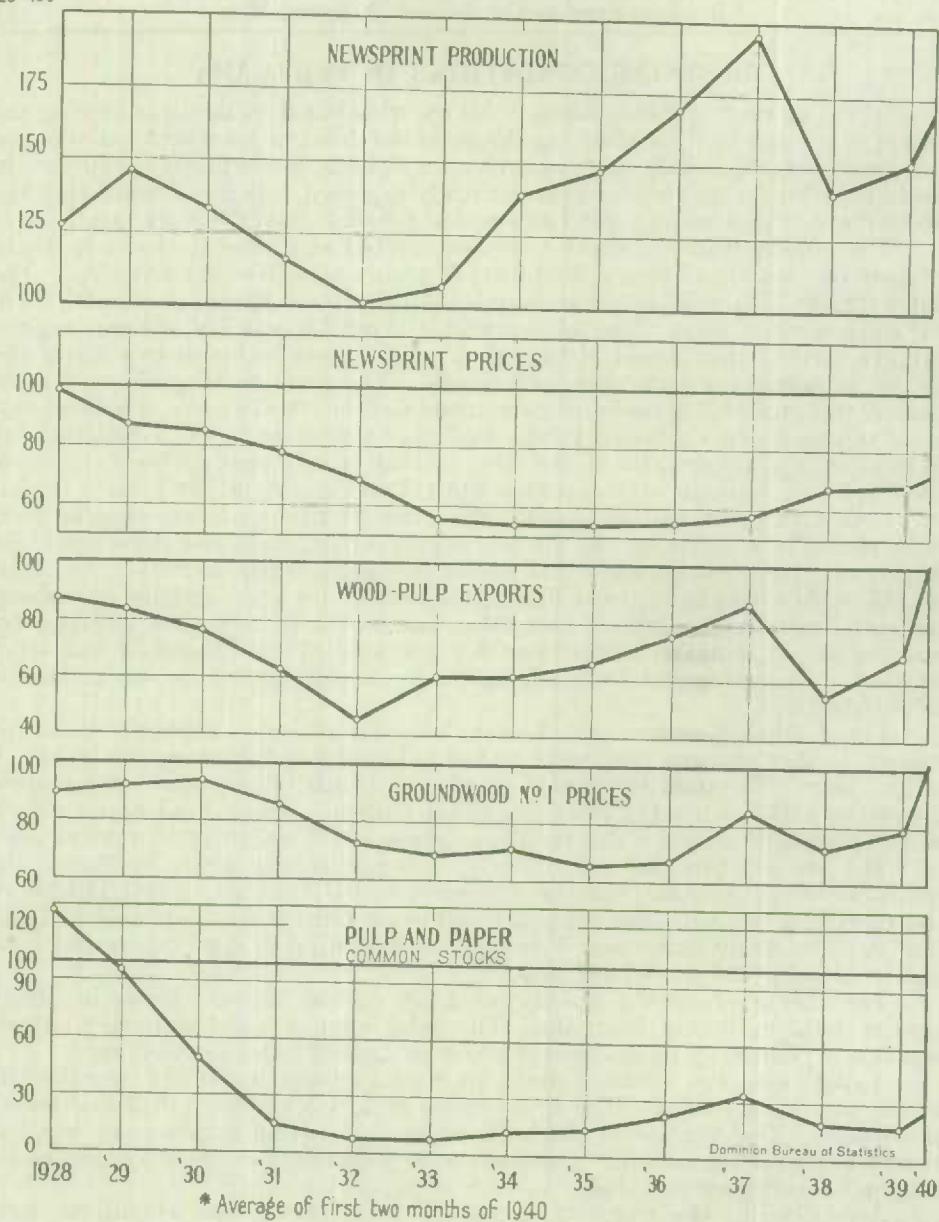

The output of electric power was 2,426 million kilowatt hours in March against 2,367 million in February. The index after seasonal and other adjustments was practically maintained at 239·0 as against 239·8 in February.

A slight gain was shown in the index of employment on April 1 over the first of the preceding month. The index stood at 118·5 against 118·2 one month previously. The increase in the index of manufacturing employment was less than normal for the season. Increases were shown in the adjusted indexes for mining, construction and trade.

According to the trend of important factors, economic conditions were relatively steady during March. The average of wholesale prices was maintained without noticeable change and the tendency toward stability has continued in the early weeks of April. Despite war conditions, high-grade bond prices were also well maintained during March. The marked decline in September was partially counteracted during the following month. The standing in subsequent weeks has been without wide fluctuation. Common stock prices have remained on an even keel since the first of the year, the general index in recent weeks having

## THE PAPER INDUSTRY 1928-1940

1926 = 100

\* Average of first two months of 1940

**A** shown a gain over the corresponding period of 1939. Business operations recorded recession in March extending the decline of the preceding month. A considerable lead, however, was still shown over the same month of 1939 and preceding years.

A majority of the factors indicating the trend of mineral production registered decline in March from the preceding month, after seasonal adjustment. Exports of copper were 41.7 million pounds against 39.8 million in February, but the gain was considerably less than normal for the season. The outward shipments of nickel rose from 16.2 million pounds to 20.5 million but the index, after the usual adjustment, declined from 278 to 252. Zinc exports, on the other hand, showed a gain in the index from 137.5 to 189.8, the total amount having been 39.4 million pounds against 19.7 million in February. The receipts of gold at the Mint were practically maintained, even after seasonal adjustment. The total amount was 355,571 ounces against 351,171 in February. The increase in silver shipments at 1.9 million ounces against 1.5 million was less than normal for the season. Exports of asbestos were 13,052 tons compared with 15,368.

A slight gain was shown in the operations of the flour-milling industry, after seasonal adjustment. The manufacture of sugar was 34.9 million pounds against 33.2 million in the second four-week period of the year. The index consequently receded only from 64.5 to 61.9. Livestock slaughterings indicating operations in the meat-packing industry were at a lower level in March than in the preceding month, due adjustment having been made for seasonal tendencies. The slaughterings of cattle rose from 94,129 head to 112,405, but the index after the usual adjustment receded from 139 to 127. A slight increase was shown in the index of hog slaughterings. The index of the output of factory cheese rose from 174 to 185, while the indicator for creamery butter receded from 155.6 to 140. A gain was shown in canned salmon exports, a relatively low level having been indicated in both months. Outward shipments were 24,863 cwt. against 11,320 in February.

The consumption of raw cotton was at a lower level than in the preceding month, the total having been 16.1 million pounds compared with 17.9 million. The indicators showing the trend of forestry production receded further in March, the index standing at 119 against 125.4. The output of newsprint was 251,279 tons against 231,823, the index being nearly maintained at 168. Recessions were shown in the exports of wood pulp, planks and boards and shingles, due allowance being made for seasonal tendencies. The export of planks and boards, however, was 145 million feet against 118 million in the preceding month, but the gain was slightly less than normal for the season.

The index of pig iron production rose moderately from 143.7 to 145.2, the output having been 91,772 long tons against 87,032. The new business obtained by the construction industry was slightly less in March than in the preceding month, the total having been \$11,726,100 against \$11,768,900. Carloadings showed a contraseasonal decline in March, the index dropping nearly ten points to 73. Exports, excluding gold, rose from \$72.3 million to \$83.5 million. This increase, however, was less than normal for the season and the index consequently showed a considerable recession from 106.3, the standing in February.

### Crop Products

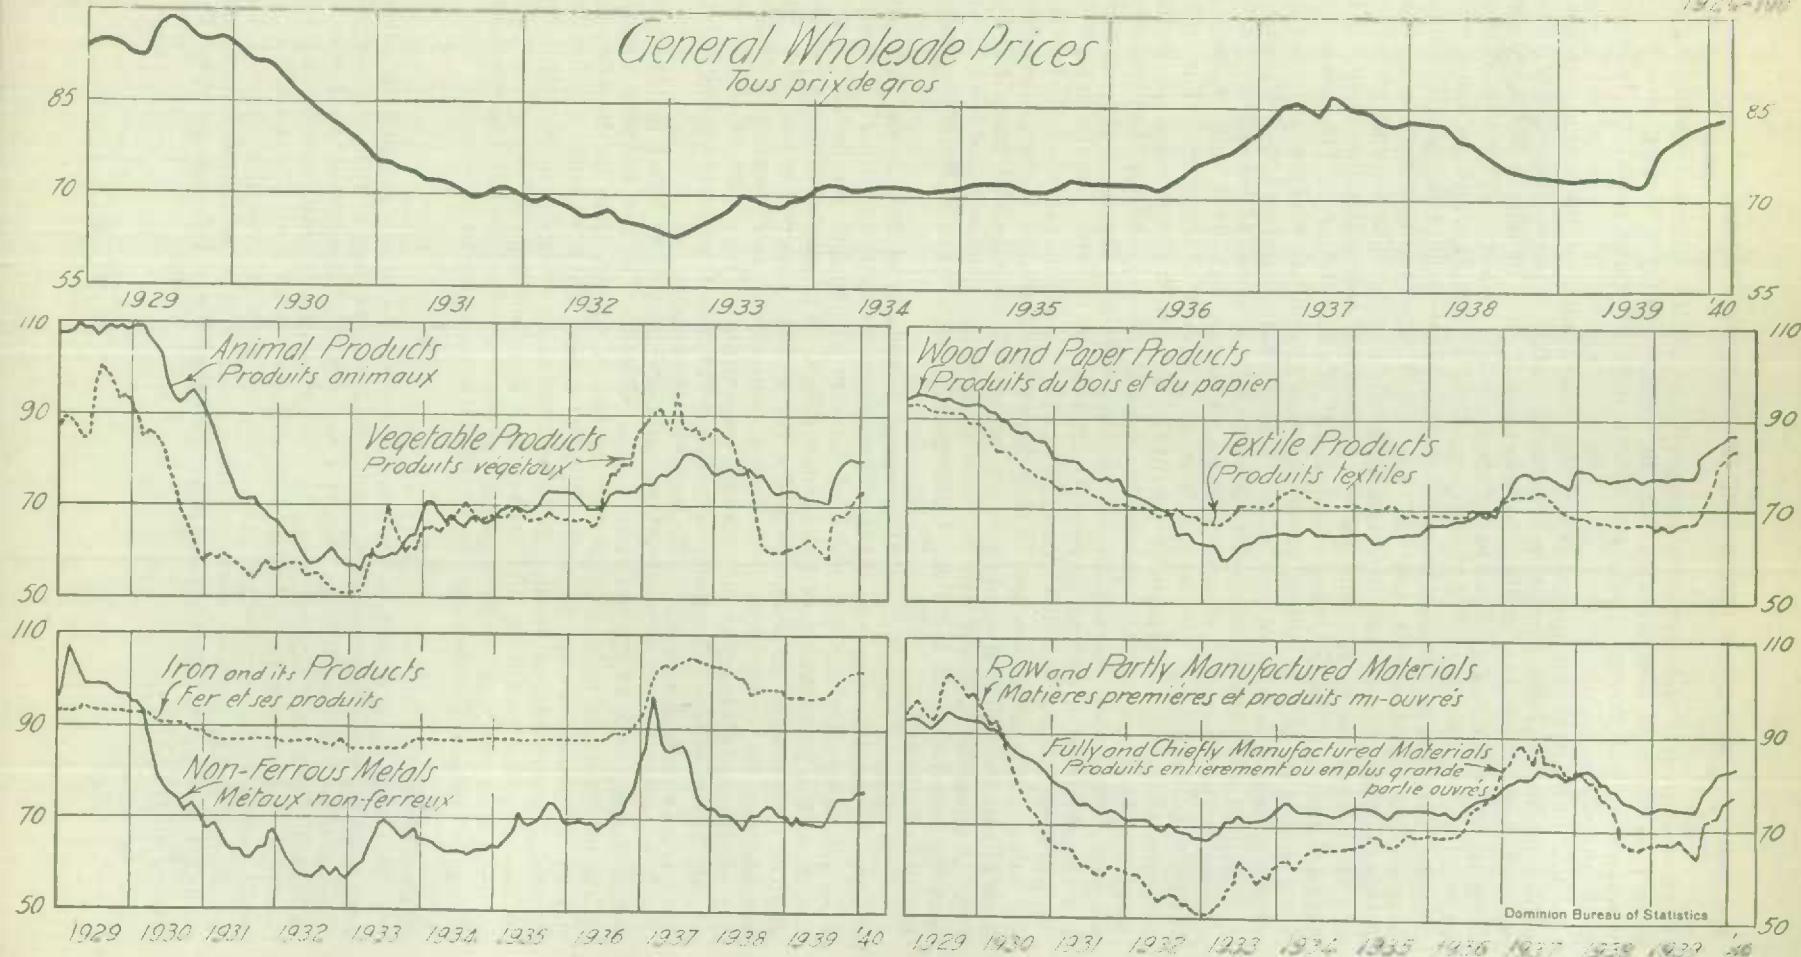

The amount of wheat in store on April 5, was about 311 million bushels compared with nearly 139 million bushels on the same date of 1939. The export clearances for the period from August 1 to April 5, of the present year, was 104 million bushels and imports into the United States for the same period were 6.8 million amounting in all to 110.8 million compared with 98 million in the same period of the preceding year. Wheat marketings in the three Prairie Provinces for the thirty-six weeks from August 1, 1939, to April 5, 1940, amounted to 382.4 million bushels compared with 268.3 million in the same portion of the preceding crop year.

1926=100

1926=100

# General Wholesale Prices

Tous prix de gros

It was reported on April 15, that seeding of wheat in Manitoba was already in process and general cultivation commenced. The earliest reports recorded in the spring of 1939 were on April 14th, one day earlier. The sale of 12 million bushels of Canadian wheat was made to the United Kingdom in one day. This marked the sixth time since January 1 that overseas business had reached the five-million-bushel mark. It was estimated by Broomhall, at the middle of April, that the aggregate 1939 wheat crop of the four Danubian countries—Roumania, Belgium, Yugoslavia and Hungary was 453 million bushels, which compared with the seven-year (1931-37) average of 322 million bushels. A continued backwardness of European crops was recently commented upon by Broomhall who stated that heavy damage was expected from floods and the late spring in some areas.

Wide increase in receipts of raw sugar to practically double both the preceding period and one year ago comparisons was shown in the operations of Canada's ten sugar refineries in the four-week period ended March 23rd. The output of refined sugar during the first three four-week periods of the year was 122·8 million pounds, an increase of 58 million over the same period of 1939.

### **Animal Products**

Production of creamery butter in March amounted to 10·5 million pounds against 9·2 million in February and 10·9 million in March, 1939. The output during the first three months of 1940 totalled 30 million pounds against 29·2 million in the same period of the preceding year. Factory cheese output advanced in March to 2,566,540 pounds from 1,611,627 in February and 1,689,641 in March, 1939. Total output during the first three months of the year was 5,868,312 pounds against 4,323,167 pounds in the corresponding period last year, a gain of 36·2 p.c.

Preliminary estimates of stocks of creamery butter were 9·4 million pounds on April 1, against 16·3 million one month before. The reduction in cheese was from 8·5 million to 7·0 million. The index of cold storage holdings was 191·3 on March 1, against 166·6 on the same date of 1939. The index is based on nine principal commodities with the monthly average for 1926 as the base.

The closing of the Danish export market as far as Great Britain is concerned, centres attention upon the part which Canada will play in making up the deficiency.

### **Newspaper**

Production and shipment of Canadian newsprint continued in March to substantial gains over a year ago, the output being up 13·9 p.c. and shipments 14·7 p.c. For the month, the industry operated at 68·6 p.c. of capacity, as compared with 65·8 p.c., in the preceding month and 58·6 p.c., in March of last year. The month's output exceeded shipments 16,000 tons and for the first quarter was higher by 16·6 p.c. at 734,134 tons, exceeding shipments which were up 18·1 p.c. by some 43,235 tons.

Announcement was made that the current domestic newsprint price of \$50 per ton which is now fixed through June, will be extended for the third quarter of the year at the same level. The prices in force until October 1, 1940, will have remained unchanged since January 1, 1938, a period of thirty-three months during which no advance has occurred. The prices were firm for the second quarter despite decreasing shipments from Scandinavian countries caused by the latest war conditions. About 9 p.c. of the newsprint consumed in the United States during 1938 came from overseas. Imports from overseas, especially the Baltic countries have declined sharply since last October, and in the first two months of 1940 slumped to 19,835 tons, compared with 43,029 in 1939.

### **Iron and Steel**

Canadian steel production for the first quarter of the year was the highest for the period in the history of the industry, the output of more than 443,000 tons

(exclusive of direct steel castings) exceeding a year ago by fully 76 per cent. The preceding maximum of recent years was 352,164 tons produced in the first quarter of 1937, but this year that has been exceeded by nearly 26 p.c. The previous high record was 395,542 tons produced in the first quarter of 1918 and this year's figure exceeds that by over 12 p.c. A good showing was made in the final month of the quarter, a preliminary figure of 150,537 tons (exclusive of direct steel castings) exceeding February's total by 12.7 p.c. and a year ago by nearly 65 p.c.

The production of motor vehicles in March amounted to 16,612 units against 18,193 in February and 17,549 in March one year ago. The month's total included 12,025 passenger cars and 4,587 commercial vehicles. For the three months ended March 31, output was 52,018 units, a gain of 11.5 p.c. over the 46,643 reported for the first quarter of 1939. Reflecting the marked increase in the automotive trade, financing of new and used motor vehicles in Canada during February gained 38 p.c. in number and 43 p.c. in amount of financing over February, 1939. There were 9,517 vehicles financed for \$4.2 million compared with 6,897 units financed for \$2.9 million in the same month of 1939.

## Construction

Contracts awarded during March amounted to \$11.7 million. This figure has not greatly differed from the February total of \$11.8 million, being 30.2 p.c. ahead of March, 1939, when placements were about \$9 million. Total contracts awarded for the first quarter amounted to \$32.3 million compared with \$27.6 million for the same period of 1939, an increase of 17.2 p.c. In addition to building and engineering work, contracts were let by the Dominion Government for three anti-submarine boats costing \$1.9 million, and the conversion of a liner to a warship to cost \$535,000. The National Housing Act loans approved in March totalled 322 with a value of \$953,419, an increase of 104 loans but a decrease of \$588,245 in value from March, 1939. The decrease in value was attributed in part to the lower cost character of dwellings financed. The total loans approved from November, 1935, the time the Act became effective, up to last March were 15,054 valued at \$52.6 million. The aggregate of all Home Improvement loans under the legislation to March 31, was \$40.7 million.

## Railways

The railway freight movement showed recession in March from the comparatively high level of the preceding month, carloadings having numbered 195,106 against 199,145 in February. In the first week of April there was a substantial recovery in the Canadian freight movement to the highest level since that for the week ended February 10. The preceding week was exceeded by over 6,000 cars or more than 14 p.c., which was greater than seasonal gain. Nearly half of the extension over the preceding week was accounted for by grain loadings which were up over 67 p.c.

The Canadian railway gross earnings reached the highest level for that period since 1930. Gross earnings for the two principal railways at \$89 million in the first quarter showed an expansion of approximately \$18.5 million or fully 26.1 p.c. over a year ago. The gross earnings of the first quarter make interesting comparison with the \$54.2 million reported for that period in 1932, the minimum of the depression years. The increase over that year was more than 64 p.c. A decline of 25.8 p.c., however, was shown from the maximum of nearly \$120 million reported for the same period of 1929. The Canadian National Railway announced on April 15 that orders had been placed for new equipment involving 180 cars to take care of increased traffic due to war conditions.

The Institute of London Underwriters recently announced alterations in the schedule of War Risk rates, including North, Central and South America to and from the East and Far East via the Cape. The new rate under an allied flag was fixed at 22s 6d. per £100, as compared with the previous rate of 25s per £100.

Under a neutral flag the rate remains unchanged at 15s per £100. A notice was issued by the British Government War Risk Office on April 9, that the rates for Norway and Denmark had been discontinued temporarily.

### Export Trade\*

The value of Canada's domestic exports in March increased to \$82.7 million from \$69.3 million in March, 1939, being an increase of 19.5 p.c. while the exports of foreign produce declined to \$745,737 from \$813,333. Domestic exports during the first quarter of 1940 were about \$243.9 million compared with \$196.9 million in the same period of 1939, being an increase of nearly 24 p.c. while foreign exports totalled \$2.7 million against \$2.2 million.

The Foreign Exchange Control Board discontinued, on April 1, the provision of United States exchange for Canadian notes and coin returning from foreign sources. The order does not apply to cheques or other negotiable instruments but to currency only.

Sales by Canada of securities to all countries amounted to \$13.6 million against \$15 million in January and nearly \$28 million in February, 1939. Purchases from all countries totalled nearly \$10 million against \$10.4 million in January and \$18.4 million in the same month of 1939. The inflow of capital of \$3.6 million was chiefly from the United States, as transactions with other countries practically balanced.

Tourists from other countries spent a total of \$275 million in Canada during 1939, of which visitors from the United States accounted \$262 million. Of this sum, it was estimated, that no less than \$165 million was spent by motorists. More than 90 p.c. of the tourists visiting Canada in 1939 came from sixteen states, and nearly half of these came from the two States, New York and Michigan.

### Finance

Dividend declarations by Canadian companies for payment in April were estimated by an unofficial source at \$229 million, an increase of \$2 million from the corresponding month of last year. March was, consequently the third month of 1940 to show higher dividend payments than in the corresponding months of the preceding year. For the first four months, payments amounted to \$81.3 million compared with \$72.9 million for the same period of 1939, a gain of \$8.4 million. The market value of all stocks listed on the Toronto stock exchange was \$4,698 million at the end of March, against \$4,712 million at the end of the preceding month. The comparable value for the same date of 1939 was \$4,556 million. The values of stocks sold on the Toronto Stock Exchange was \$10.7 million in March, against \$12.8 million in February. The total for March, 1939 was about \$30 million.

Residents of the United Kingdom are permitted, under a new arrangement, to make limited sales of securities in Canada through normal financial channels. In London, the Treasury announced that permits will be granted to sell a limited amount of Canadian dollar securities in the Canadian market. This is a part of the program to provide the United Kingdom with dollars for the purchase of war supplies in Canada, becoming effective April 1.

Customs duties, excise taxes, excise duties and sundry collections during the year ended March 31, amounted to \$322.4 million, marking an increase of \$36.7 million over the preceding year. Income tax collections during the fiscal year amounted to \$134.4 million, a decline of \$7.6 million from 1938-9. The average discount price of \$30 million Dominion of Canada Treasury Bills due March 16, was 99.81398 with average yields of 0.739 p.c. The sale was announced on April 12. The preceding sale of bills, two weeks previously, brought a price of 99.81136 to yield 0.742 p.c. Thus the lower trend which has prevailed recently in the yield rate was continued.

DOMINION BUREAU OF STATISTICS,  
April 30, 1940.

<sup>1</sup> The index of the physical volume of business is based on 46 factors excluding marketings and cold storage holdings. Owing to a change in the period covered by the monthly export and import statistics March 1940 figures show a considerable artificial reduction.

# REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XV

OTTAWA, AVRIL 1940

N° 4

STATISTICIEN DU DOMINION: R. H. COATS, LL.D., F.R.S.C., F.S.S. (Hon.)  
STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

## STATISTIQUE COURANTE DE LA SITUATION ÉCONOMIQUE AU CANADA

Les marchés du blé se maintiennent fermes en mars et les développements de la guerre concentrent l'intérêt par leur effet sur la demande potentielle de blé. A la suite de rendements moyens mondiaux exceptionnellement élevés pendant deux ans, on s'attend déjà à une réduction des récoltes mondiales pendant l'année courante. On estime que le report mondial, toutefois, revêtira des proportions sans précédent le 31 juillet prochain.

Le trafic-marchandises des chemins de fer montre une expansion marquée les premières semaines d'avril, attribuable surtout aux fortes expéditions de grain dans la division de l'Ouest. L'indice de la 15e semaine de l'année terminée le 13 avril se place à 82 contre 68 de la même semaine de 1939. Le trafic total jusqu'au 13 avril s'établit à 704,529 wagons, à rapprocher de 610,747 la même période de l'an dernier. Il y a augmentation en chacun des onze groupes de denrées, excepté le bétail. Les chargements de grain augmentent de plus de 29,000 wagons et ceux de denrées diverses, de 16,816 wagons. Les recettes brutes d'exploitation du Pacifique Canadien s'élèvent à \$11,478,000 en mars, comparativement à \$10,605,000 la même période de l'an dernier. Les recettes du Canadian National se chiffrent à \$15,117,000 contre \$12,067,000.

Depuis septembre dernier la Commission britannique des Approvisionnements a placé au Canada des commandes de munitions et d'approvisionnements de guerre s'élevant à environ \$70,000,000 et adjugera bientôt d'autres contrats s'établissant à \$17,000,000. Ces \$87,000,000 ont été presque exclusivement employés à l'achat de produits finis comprenant des munitions et autres produits ouvrés nécessaires pour fins de guerre. La première année de la guerre le Royaume-Uni a affecté un total de \$445,000,000 pour l'achat de matériel de guerre et autres approvisionnements au Canada.

Le Royaume-Uni a été le meilleur client du Canada en mars, les exportations domestiques à ce pays s'établissant à \$40,000,000 contre \$26,100,000 en mars l'an dernier. Le total du mois dernier a été plus considérable que celui de tout autre mois depuis novembre 1937, alors qu'il s'élevait à \$49,100,000. Les Etats-Unis occupent le deuxième rang avec un total de \$25,600,000 contre \$24,700,000 en mars l'an dernier.

La sidérurgie est particulièrement active en mars, la production de lingots et coulages d'acier est de 157,326 tonnes comparativement à 140,343 le mois précédent. Les indices de l'acier et de la fonte en gueuse, ajustés pour la saison, montent légèrement en regard de février. La production de lingots et coulages d'acier se plaçait à 95,697 tonnes en mars 1939.

La production d'énergie électrique s'élève à 2,426,000,000 de kilowatt-heures en mars, à rapprocher de 2,367,000,000 en février. L'indice, après ajustements saisonnier et autres, demeure à peu près le même, soit 239.0 contre 239.8 en février.

L'indice de l'emploi enregistre un faible gain le 1er avril comparativement au premier jour du mois précédent. L'indice se place à 118.5 contre 118.2 le mois précédent. La hausse de l'indice de l'emploi dans les manufactures est moins que normale pour la saison. Les indices ajustés de l'industrie minière, de la construction et du commerce font voir des augmentations.

La situation économique est relativement stable en mars, d'après l'orientation des facteurs importants. La moyenne des prix de gros se maintient sans changement remarquable et la tendance à la stabilité se continue les premières semaines d'avril. En dépit de la guerre les obligations de tout repos se maintiennent également bien en mars. Le déclin marqué en septembre est partiellement neutralisé le mois suivant. Les fluctuations ne sont pas considérables les semaines subséquentes. Les actions ordinaires restent au même niveau depuis le premier jour de l'année, mais l'indice général ces dernières semaines montre un gain sur la période correspondante de 1939. Les opérations commerciales rétrogradent en février, continuant le déclin du mois précédent. Toutefois, l'avance est considérable par rapport au même mois de 1939 et des années précédentes.

La majorité des facteurs traçant l'orientation de la production minérale déclinent en mars comparativement au mois précédent, après ajustement saisonnier. Les exportations de cuivre se

placent à 41,700,000 livres contre 39,800,000 en février, mais le gain est bien moins que normal pour la saison. Les expéditions de nickel passent de 16,200,000 livres à 20,500,000, mais l'indice après ajustement saisonnier décline de 278 à 252. D'autre part, les exportations de zinc s'élèvent à 39,400,000 livres contre 19,700,000 en février et l'indice monte de 137·5 à 189·8. Les arrivages d'or à la Monnaie se maintiennent à peu près, même après ajustement saisonnier. Le total est de 355,571 onces comparativement à 351,171 en février. L'augmentation des expéditions d'argent, à 1,900,000 onces en regard de 1,500,000, est moins que normale pour la saison. Les exportations d'amiante s'établissent à 13,052 tonnes, à rapprocher de 15,368 tonnes.

La meunerie s'améliore légèrement, après ajustement saisonnier. La production de sucre se place à 34,900,000 livres contre 33,200,000 la deuxième période de quatre semaines de l'année. En conséquence, l'indice recule seulement de 64·5 à 61·9. En mars les abatages de bestiaux, indiquant les opérations de la saison, sont à plus bas niveau que le mois précédent, après avoir fait les ajustements appropriés pour les tendances saisonnières. Les bêtes à cornes abattues augmentent de 94,129 à 112,405, mais l'indice après l'ajustement habituel descend de 139 à 127. L'indice des abatages de porcs monte légèrement. L'indice de la production de fromage de fabrique passe de 174 à 185, tandis que celui de la production de beurre de crème monte de 155·6 à 140. Les exportations de saumon en boîte augmentent, mais leur niveau est relativement bas pendant les deux mois. Les expéditions s'établissent à 24,863 cwt contre 11,320 en février.

La consommation de coton brut est à plus bas niveau que le mois précédent, le total étant de 16,100,000 livres comparativement à 17,900,000. Les facteurs traçant l'orientation de la production forestière rétrogradent encore en mars et l'indice se place à 119 contre 125·4. La production de papier à journal s'élève à 251,279 tonnes, à rapprocher de 231,823, et l'indice se maintient à peu près, à 168. Il y a des régressions dans les exportations de pulpe de bois, de madriers et planches et de bardeaux, compte tenu des tendances saisonnières. Cependant, les exportations de madriers et planches s'établissent à 145,000,000 de pieds en regard de 118,000,000 le mois précédent, mais le gain est un peu moins que normal pour la saison.

L'indice de la production de fonte en gueuse monte modérément, de 143·7 à 145·2, et la production se place à 91,772 tonnes longues comparativement à 87,032. En mars les nouvelles affaires dans l'industrie du bâtiment sont un peu plus considérables que le mois précédent, le total étant de \$11,726,100 contre \$11,768,900. Les chargements de wagons accusent un déclin hors de saison en mars et l'indice perd près de dix points, à 73·4. Les exportations, à l'exclusion de l'or, passent de \$72,300,000 à \$83,500,000. Cependant, cette augmentation est moins que normale pour la saison et l'indice, en conséquence, montre un recul considérable en regard de son niveau de 106·3 en février.

### Produits agricoles

Le blé en magasin le 5 avril s'établit à environ 311,000,000 de boisseaux, à rapprocher de près de 139,000,000 de boisseaux la même date de 1939. Les expéditions pour la période du 1er août au 5 avril de l'année courante se placent à 104,000,000 de boisseaux et les importations aux Etats-Unis pendant la même période sont de 6,800,000, ce qui fait un total de 110,800,000 boisseaux contre 98,000,000 la même période de l'année précédente. Les arrivages de blé dans les trois Provinces des Prairies les trente-six semaines du 1er août 1939 au 5 avril 1940 se chiffrent à 382,400,000 boisseaux, en regard de 268,300,000 boisseaux la même période de la campagne précédente.

On a rapporté le 15 avril que l'ensemencement du blé était déjà en cours au Manitoba et que les cultures en général étaient commencées. Les premiers rapports du printemps de 1939 avaient paru le 14 avril, un jour plus tôt. Le Royaume-Uni a acheté 12,000,000 de boisseaux de blé canadien en un seul jour. C'est la sixième fois depuis le 1er janvier que les ventes outre-mer atteignent le chiffre de 5,000,000 de boisseaux. Broomhall a estimé à la mi-avril que la récolte globale de blé de 1939 des quatre pays danubiens—Roumanie, Bulgarie, Yougoslavie et Hongrie—était de 453,000,000 de boisseaux, comparativement à la moyenne septennale (1931-37) de 322,000,000 de boisseaux. La tardivité continue des cultures européennes a récemment fait l'objet d'un commentaire de Broomhall, déclarant que l'on s'attendait à de lourds dégâts en certaines régions par suite des inondations et du printemps tardif.

Les arrivages de sucre brut aux dix raffineries canadiennes les quatre semaines terminées le 23 mars sont à peu près deux fois plus considérables que ceux de la période précédente et de l'an dernier. La production de sucre raffiné les trois premières périodes de quatre semaines de l'année est de 122,800,000 livres, augmentation de 58,000,000 de livres sur la même période de 1939.

### Produits animaux

La production de beurre de crème en mars se place à 10,500,000 livres, à rapprocher de 9,200,000 en février et 10,900,000, en mars 1939. La production du premier trimestre de 1940 atteint un total de 30,000,000 de livres, comparativement à 29,200,000 livres la même période de l'année précédente. En mars la production de fromage de fabrique avance à 2,566,540 livres, en regard de 1,611,627 en février et 1,689,641 en mars 1939. La production du premier trimestre de l'année se chiffre à 5,868,312 livres contre 4,323,167 livres la période correspondante l'an dernier, gain de 36·2 p.c.

Les estimations préliminaires placent les stocks de beurre de crème à 9,400,000 livres le 1er avril, comparativement à 16,300,000 le mois précédent. Les stocks de fromage diminuent de 8,500,000 livres à 7,000,000 de livres. L'indice des stocks des entrepôts frigorifiques est de 191·3 le 1er mars, en regard de 166·6 la même date de 1939. L'indice englobe neuf denrées principales et a pour base la moyenne mensuelle de 1926.

La fermeture du marché danois d'exportation, où la Grande-Bretagne est intéressée, a concentré l'attention sur le rôle que le Canada aura à jouer pour combler cette lacune.

### Papier à journal

La production et les expéditions de papier à journal canadien continuent en mars à accuser des gains substantiels sur l'an dernier; la production augmente de 13·9 p.c. et les expéditions, de 14·7 p.c. Au cours du mois l'industrie fonctionne à 68·6 p.c. de sa capacité, comparativement à 65·8 p.c. le mois précédent et 58·6 p.c. en mars l'an dernier. La production du mois excède les expéditions de 16,000 tonnes et celle du premier trimestre est de 16·6 p.c. plus forte, à 734,134 tonnes, surpassant de 43,235 tonnes les expéditions qui augmentent de 18·1 p.c. Il a été annoncé que le prix courant du papier à journal (\$50 la tonne), qui est maintenant ainsi fixé jusqu'en juin, s'étendra au troisième trimestre de l'année. Les prix en vigueur jusqu'au 1er octobre 1940 auront restés inchangés depuis le 1er janvier 1938, période de trente-trois mois au cours de laquelle il n'y aura pas eu de hausse. Les prix restent fermes durant le deuxième trimestre malgré la diminution des expéditions en provenance des pays scandinaves causée par les dernières conditions de la guerre. Environ 9 p.c. du papier à journal consommé aux Etats-Unis en 1938 provenait d'outre-mer. Les importations provenant d'outre-mer, spécialement des pays baltes, ont fait un déclin précipité depuis octobre dernier et dégringolé à 19,835 tonnes les deux premiers mois de 1940, comparativement à 43,029 tonnes en 1939.

### Fer et acier

La production canadienne d'acier le premier trimestre de l'année est la plus considérable dans l'histoire de l'industrie; elle s'élève à plus de 443,000 tonnes, à l'exclusion des coulages d'acier de première fusion, et surpassé de 76 p.c. celle de l'an dernier. Le maximum précédent des années récentes était celui de 352,164 tonnes produites le premier trimestre de 1937, mais cette année il a été surpassé de près de 26 p.c. La cime antérieure était celle de 395,542 tonnes le premier trimestre de 1938 et le chiffre de cette année la dépasse de plus de 12 p.c. La production fait bonne figure le dernier mois du trimestre; le total préliminaire de 150,537 tonnes, à l'exclusion des coulages d'acier de première fusion, surpassé de 12·7 p.c. celui de février et de près de 65 p.c. celui de l'an dernier.

La production de véhicules à moteur en mars se place à 16,612 unités, à rapprocher de 18,193 en février et 17,549 en mars il y a un an. Le total du mois comprend 12,025 voitures de tourisme et 4,587 véhicules commerciaux. La production du trimestre terminé le 31 mars s'élève à 52,018 unités, gain de 11·5 p.c. sur les 46,643 véhicules fabriqués le premier trimestre de 1939. Reflétant une augmentation marquée dans le commerce de l'automobile, le financement de véhicules-moteur neufs et usagés au Canada en février augmente de 38 p.c. en volume et de 43 p.c. en valeur comparativement à février 1939. Il se finance 9,517 véhicules pour \$4,200,000, à rapprocher de 6,897 pour \$2,900,000 le même mois de 1939.

### Construction

Les contrats adjugés en mars s'élèvent à \$11,700,000. Ce total ne diffère pas beaucoup de celui de \$11,800,000 en février, mais il fait voir une augmentation de 30·2 p.c. sur les contrats de mars 1939 qui s'établissaient à environ \$9,000,000. Les contrats adjugés le premier trimestre atteignent un total de \$32,300,000, en regard de \$27,600,000 la même période de 1939, augmentation de 17·2 p.c. En outre des édifices et des travaux de génie, le Gouvernement fédéral a accordé des contrats pour trois vaisseaux anti-sous-marins coutant \$1,900,000 et la conversion d'un

paquebot en un vaisseau de guerre au prix de \$535,000. Les prêts approuvés en mars en vertu de la loi nationale du logement se chiffrent à 322 d'une valeur de \$953,419, augmentation de 104 prêts mais diminution de \$588,245 en valeur par rapport à mars 1939. La diminution en valeur est attribuée partiellement au coût plus faible des habitations financées. Les prêts approuvés de novembre 1935, temps où la loi est devenue en vigueur, à mars dernier forment un total de 15,054 valant \$52,600,000. Les prêts pour l'amélioration des habitations faits en vertu de la loi jusqu'au 31 mars atteignent un total de \$40,700,000.

### Commerce intérieur

En mars les ventes des magasins à rayons accusent une augmentation de 10 p.c. sur celles de février et de 9 p.c. sur celles de mars 1939. L'indice non ajusté de mars sur la base de 1930 s'établit à 71·6, comparativement à 64·8 en février et 65·6 il y a un an.

### Chemins de fer

En mars le trafic-marchandises des chemins de fer fait voir une régression en regard du niveau relativement élevé du mois précédent, les chargements se chiffrent à 195,106 contre 199,145 en février. La première semaine d'avril le mouvement des marchandises au Canada a fait une reprise substantielle et touché le plus haut niveau depuis celui de la semaine terminée le 10 février. Les chargements surpassent ceux de la semaine précédente par plus de 6,000 wagons ou 14 p.c., ce qui excède le gain saisonnier. Près de la moitié de l'augmentation sur la semaine précédente est attribuable aux chargements de grain qui font un gain de 67 p.c.

Les recettes brutes des chenils de fer canadiens atteignent le plus haut niveau pour cette période depuis 1930. Les recettes brutes des deux principaux réseaux, \$89,000,000 au cours du premier trimestre, augmentent d'environ \$18,500,000 ou de 26·1 p.c. sur l'an dernier. Les recettes brutes du premier trimestre offrent une comparaison intéressante avec celles de \$54,200,000 pour cette période en 1932, minimum des années de dépression. L'augmentation par rapport à cette année-là dépasse 64 p.c. Toutefois, il y a un déclin de 25·8 p.c. en regard du maximum de près de \$120,000,000 pour la même période de 1929. Le Canadian National a annoncé le 15 avril qu'il avait commandé du nouveau matériel comprenant 180 wagons, pour faire face à l'augmentation du trafic attribuable à la guerre.

L'Institute of London Underwriters a récemment annoncé des modifications dans la liste des taux de risque de guerre, de l'Amérique du Nord, de l'Amérique Centrale et de l'Amérique du Sud à destination de l'Orient et de l'Extrême-Orient via le Cap ou vice versa. Le nouveau taux pour les vaisseaux battant pavillon allié est fixé à 22s 6d par £100, comparativement au taux antérieur de 25s par £100. Pour les vaisseaux battant pavillon neutre le taux reste inchangé à 15s par £100. L'Office des Risques de guerre du Gouvernement britannique a donné avis le 9 avril que les taux pour la Norvège et le Danemark avaient été temporairement discontinués.

### Commerce d'exportation

La valeur des exportations canadiennes en mars passe à \$82,700,000, comparativement à \$69,300,000 en mars 1939, augmentation de 19·5 p.c., tandis que les exportations de produits étrangers déclinent à \$745,737 en regard de \$813,333. Les exportations canadiennes le premier trimestre de 1940 sont d'environ \$243,900,000 contre \$196,900,000 le même période de 1939, augmentation de près de 24 p.c., tandis que les réexportations se chiffrent à \$2,700,000 comparativement à \$2,200,000. Une importante mesure à l'effet de protéger le change canadien et d'enrayer quelques-uns des effets d'une tendance commerciale a été annoncée le 16 avril: désormais les marchandises entrant en notre pays en provenance des Etats-Unis et qui y ont été importées d'un tiers pays seront payées en la monnaie du pays d'origine et non pas en dollars des Etats-Unis.

Les ventes de valeurs mobilières canadiennes à tous les pays se placent à \$13,600,000, à rapprocher de \$15,000,000 en janvier et près de \$28,000,000 en février 1939. Les achats de tous pays approchent \$10,000,000, comparativement à \$10,400,000 en janvier et \$18,400,000 le même mois de 1939. La rentrée de \$3,600,000 de capitaux provient surtout des Etats-Unis, car les transactions avec les autres pays s'équilibrent à peu près.

Les touristes des autres pays dépensent \$275,000,000 au Canada en 1939, dont \$262,000,000 pour les visiteurs des Etats-Unis. Il est estimé que les automobilistes ont dépensé \$165,000,000 de cette somme. Plus de 90 p.c. des touristes visitant le Canada en 1939 sont venus de seize Etats et près de la moitié de ceux-là sont venus des deux Etats de New-York et de Michigan.

# PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

## ANNUAL AND SPECIAL PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS ISSUED DURING THE MONTH ENDING APRIL 16, 1940

**Administration.**—Canada 1940, manuel officiel des conditions présentes et des progrès récents. 6+223 p.  
per. 25 cents.

**Population.**—Births, deaths and marriages in the third quarter of 1939, 5 p., 50 cents per year. Census of Saskatchewan, 1936, population and agriculture (Eng. and French) 59 p., p. 355-828, map.

**Production.—AGRICULTURAL PRODUCTS.**—The grain situation in Argentina, March 19, 1940, 6 p., \$1 per year. Summary of cold storage reports, 1939, holdings of food commodities in cold storage and other warehouses and in dairy factories in Canada, 25 p. Charts. Stocks of grain in Canada, March 31, 1940, 3 p., \$2 per year. Annual statistics of fruit nursery stock and floriculture, 1939, 32 p., 25 cents. **FOREST PRODUCTS.**—Estimate of forest production; operations in the woods in Canada, 1938 (Eng. and French), 10 p., 25 cents. **ANIMAL PRODUCTS.**—Advance report on the fur farms of Canada, 1938, 3 p., mimeo. **MINERAL PRODUCTS.**—Canada's leading mineral products, December, 1939, (and calendar year), 1 p., 10 cents.
