The survey of production for 1940 is now available for distribution. The report presents a record of the gross and net value of commodity production in Canada for the year 1940 compared with the preceding year.

Six of the nine branches are concerned with primary production, while the remaining three are classified as secondary production. The industrial groups constituting primary production are as follows:—Agriculture, forestry, fishery, trapping, mining and electric power. The secondary production group embraces construction, manufactures, n.e.s., and custom and repair.

The report presents statistics of gross and net production for the nine branches for the years 1939 and 1940 with percentage analysis. A table is given detailing the main items in duplication between primary and secondary production. The main table presents the gross and net production for the two years in question by the main branches for each of the nine provinces.

The price of the report is 25 cents. Application for copies should be made to the Dominion Bureau of Statistics.

MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XVII

OTTAWA, AUGUST, 1942

No. 8

DOMINION STATISTICIAN: S. A. CUDMORE, M.A. (OXON.), F.S.S., F.R.S.C.
CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

ECONOMIC CONDITIONS IN JULY

A majority of the major factors indicating the trend of economic conditions recorded advances in July over the preceding month. The index of wholesale prices showed an increase from 95·8 to 96·1, reaching a higher position than at any other time during the present year. High-grade bond prices averaged slightly higher than in June. The bond market was remarkably steady during the first seven months of the year. The yield on high-grade bonds was lower than at any other time since the last world war with the exception of a few months in 1936 and 1939. A considerable increase was shown in the deposit liabilities of the chartered banks, the decline in Dominion balances being offset by increases in provincial, notice and demand accounts. The total of \$3,118 million at the end of May rose to \$3,121 million at the beginning of the month under review. An index on the base of 1926 rose during the month from 160·1 to 164·8.

Business operations were practically maintained at the high level of June. The continued expansion in the output of war products was more or less counterbalanced by the decline in the output of a diversified list of goods for civilian consumption.

Agriculture

Crop conditions in all parts of Canada continued to be satisfactory up to the end of August. Western crops, according to private estimates, will be near record size this year with wheat production running more than 500 million bushels. Harvesting operations in western Canada, however, were delayed due to the lateness of the crop. Coarse grain cutting in Manitoba was well under way but wheat harvesting in Saskatchewan was not general before September 1st. Good average yields of grain were reported for Ontario and volunteer help assisted greatly with the harvest.

The stock of wheat was reported at 406 million bushels against 463 million bushels during the week of August 15, 1941. The carry-over of Canadian wheat at the end of July was 424 million bushels. On the same date of last year the total was 480 million contrasting with 301 million on the same date of the preceding year. Wheat marketings in the three provinces during the crop year were 222·9 million bushels compared with 458·4 million received from farms in the preceding year. The wheat position in Canada points definitely to greater supplies in 1942-43 than in the crop year just closed despite a reduction of 56 million bushels in the carry-over stocks of old wheat on July 31, 1942.

Storage is a problem at this time and the Wheat Board survey made at the end of July revealed that total space available for the receipt of all grains at country elevators in the West amounted to only 170 million bushels, while other storage available totalled only 35 million bushels, making a combined figure of 205 million bushels to take care of all grain. The probability of larger deliveries of oats, barley and flaxseed complicates the storage situation and in view of the congested situation at Fort William and Port Arthur the movement of grain will be slower this fall and cars will be scarce for the movement of supplies from country elevators. A drawback of eight cents a bushel on wheat sold for feed will be reviewed later when new crop grades are established on the market. The drawback policy was announced on August 21 by the Wartime Prices and Trade Board and the Agricultural Supplies Board.

The British Food Ministry hopes Canada will be able to supply the United Kingdom with at least 700 million pounds of ham and bacon under a new Bacon Agreement now being negotiated. The figure was 100,000,000 pounds above the agreement which expires next October. Other orders are expected for shipment to Alaska and to Newfoundland. Marketings of hogs were 6,216,000 in 1941 compared with 3,246,000 in 1938.

The Canadian production of creamery butter in July was 40·2 million pounds compared with 39·1 million in the same month last year. During the seven months ended July the production was 159·6 million pounds compared with 166·2 million in the same period of 1941. Cheese production advanced to 30·2 million pounds against 25·5 million in the same month last year, an increase of 18·7 p.c. The total during the seven months ended July recorded an advance of almost 50 p.c.

Primary Production

Production and shipments of newsprint continued to contract during July. Shipments to domestic consumers ran somewhat above one year ago, but declines were recorded in the movement to the United States and overseas consumers. July's operating ratio was 65·2 compared with 65·6 for June and with 80·4 a year ago. It was announced by the War Production Board in Washington that many publishing companies were carrying only minimum stocks of newsprint. Orders relaxing inventory restrictions expire on September 30. It was suggested that publishers should take advantage of the opportunity of stocking up with newsprint to avoid the difficulty in obtaining supplies later because of increasing burdens on railway transportation. The index of forestry production based on four factors was nearly maintained at 120·7 in July against 121·1 in the preceding month.

The catch of fish was estimated to value more than \$3 million in June with the landings in the Maritimes, Magdalen Islands and British Columbia totalling nearly 820,000 cwt. It was estimated that the value of the Quebec catch would be about \$200,000. The volume was somewhat less than in June last year, but better prices led to a gain in value by nearly \$802,000. Fishermen garnering the harvest of the sea are landing huge quantities of fish in spite of destructive storms and reduction in the supply of skilled men.

Mineral production recorded an advance in July over the preceding month. Gold receipts at the Mint were 431,435 fine ounces against 398,695. Mint receipts of silver were at a higher position. Coal production was 1,474,000 tons against 1,368,000. As the increase was contra-seasonal, the index moved up from 137 to 155. Permits will now be required for the export of silver in various forms, including ores and concentrates, metal and alloys, semi-fabricated and fabricated, scrap, salts and compounds. The action was taken because the increasing demand for silver here and in other countries has made it necessary to protect Canada's supplies of this material for her own use. It was announced on August 6th that negotiations in progress for some time between the Metals Controller and authorities in Washington looking toward production of strategic metals from sub-marginal Canadian deposits are making definite progress. The main objective is to produce more copper in Canada, but lead and zinc are also involved in the negotiations. The intention is to develop low-grade deposits which normally would not be profitable to operate under the existing wartime fixed prices.

The output of electric power showed minor reaction in July from the preceding month. The total was 2,966 million kilowatt hours against 3,043 million in the preceding month. The recession was partially of a seasonal character. The comparison with July last year was favourable, the output at that time having been 2,661 million kilowatt hours, an increase of about 18 p.c. During the first half of this year the output rose to 18·6 billion k.w.h., setting a new maximum, being 18·3 p.c. in excess of a year ago and 35·4 p.c. greater than the pre-war first half of 1939.

SERVICE

(\$ 19,574 - 6.4 %)

Transportation

Carloadings in July numbered 293,769 against 286,506 in the preceding month. The corresponding movement in the same month last year was 276,829 cars. The gross earnings of the two Canadian railways combined for the first seven months of this year surpasses all previous records for any similar period, the total rising to \$345.5 million. Last year the gross revenues were \$286.7 million, an increase of nearly \$59 million or 20.5 p.c. having been indicated. Compared with the pre-war first seven months of 1939, when the combined revenue was \$176.9 million, the increase was \$168.6 million or 95.3 p.c. Any surplus earnings of the Canadian National Railways in the present calendar year will be used to strengthen working capital. The Canadian National Railway is making substantial earnings now over all charges, that is, over the requirements of the funded debt, maintenance, depreciation and retirement of equipment trust certificates as they mature. If there were no standard accounting practice these funds could be used to build new equipment, but 40 p.c. of the railway income is paid to the Dominion Government in taxes and anything over the standard profits which is not likely to be earned would be paid to the Government in some form. Over the first seven months of the year the Canadian National Railway covered that period's proportion of the system's interest charges 1.51 times, a margin of coverage considerably better than last year's 1.26 times. A slight improvement was achieved in the operating ratio so far this year, the 1942 figure for the seven-month period being 77.4 against 77.8 a year ago.

Employment

The index of employment was 175.7 on July 1st against 157.4 on the same date one year ago. The gain was nearly 12 p.c. The standing in June of the present year was 171.7, a gain of 4 points having been indicated. Normally, employment is slightly higher on July 1st than at the beginning of the preceding month but the gain in July was considerably in excess of the seasonal movement. It was announced on August 25th that more than 250,000 persons were needed in war industries and the armed forces before the end of the present year. With less than 60,000 unemployed, Canadians face drastic curtailment of many of our less essential industries and occupations. Man-power advisory committees by industries are being set up composed of employees and management representatives to advise and make recommendations to the Selective Service directly on man-power problems affecting particular industries. The job of National Selective Service is to have every man and woman at the work which will most usefully contribute to the war effort. The registration of unemployed women in the 20 to 24 age group was scheduled for September 14. It was forecast that the registration would permit the planning for the bringing of women into war industries at an increasingly rapid rate.

Finance

The total revenue of the Dominion Government from April 1st to the end of July was \$742 million compared with \$484 million in the same period last year. The ordinary expenditure of the Dominion Government rose from \$126.7 million to \$178.3 million during the same interval. War expenditure, however, showed an increase from about \$309 million to \$672 million. The expenditure under the United Kingdom War Financing Act during the first four months of the present fiscal year was nearly \$549 million. War expenditure on the two accounts has consequently been \$1,220.5 million during the elapsed portion of the present fiscal year against \$308.9 million in the same period of last year. It was announced on August 11 that an issue of Dominion of Canada deposit certificates to the amount of \$55 million due next February 9 was sold to the chartered banks at par. The certificates bear interest at $\frac{3}{4}$ of 1 p.c. per year. It was also announced on August 25 that an issue of deposit certificates amounting to \$50 million due February 23, next, was sold to the Banks at the same price.

¹ Holdings of chartered banks and of Central Gold Reserves are deducted from the sum of the first and second columns to give total notes in hands of public.

² Bank of Canada notes first appear in the last ten months of the year 1935.

³ Average of monthly data. The letters in the heading represent symbols used in the formula.

TABLE C—DEPOSITS IN CANADA, AVERAGE OF MONTHLY DATA

Year	Notice Deposits	Demand Deposits	Dominion Government Deposits	Provincial Government Deposits	Sum of Deposits

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XVII

OTTAWA, AOÛT 1942

N° 8

STATISTICIEN DU DOMINION: S. A. CUDMORE, M.A. (OXON), F.S.S., F.R.S.C.
CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

SITUATION ÉCONOMIQUE EN JUILLET

La majorité des facteurs traçant l'orientation de la situation économique laissent voir en juillet des avances en regard du mois précédent. L'indice des prix de gros passe de 95·8 à 96·1 et atteint un niveau plus élevé qu'en tout autre temps durant l'année courante. Le cours des obligations de tout repos est en moyenne un peu plus haut qu'en juin. Le marché des obligations est remarquablement stable les sept premiers mois de l'année. Le rendement des obligations de tout repos est plus faible qu'à toute autre époque depuis la dernière guerre mondiale, à l'exception de quelques mois en 1936 et 1939. Les dépôts des banques à charte augmentent considérablement; la diminution des soldes du Dominion est contre-balancée par l'augmentation des comptes provinciaux, à terme et à demande. Le total de \$3,118,000,000 à la fin de mai passe à \$3,121,000,000 au commencement du mois sous revue. L'indice, sur la base de 1926, avance de 160·1 à 164·8 pendant le mois.

Les opérations commerciales se maintiennent à peu près au niveau élevé de juin. L'expansion continue de la production de guerre est plus ou moins neutralisée par la diminution de la production de divers articles pour consommation civile.

Agriculture

La condition des cultures dans toutes les parties du Canada continue d'être satisfaisante jusqu'à la fin d'août. Les récoltes de l'Ouest, d'après des estimations privées, approcheront un volume sans précédent cette année et la production de blé s'établira à plus de 500,000,000 de boisseaux. Les lents progrès des cultures ont cependant retardé la moisson dans l'Ouest canadien. La coupe des grains secondaires au Manitoba est bien en marche, mais le moissonnage du blé en Saskatchewan ne sera pas général avant le 1er septembre. Le rendement moyen des céréales est bon en Ontario et la main-d'œuvre volontaire a grandement aidé à la moisson.

Les stocks de blé s'établissent à 406,000,000 de boisseaux contre 463,000,000 la semaine du 15 août 1941. Le report de blé canadien à la fin de juillet est de 424,000,000 de boisseaux. La même date de l'an dernier le total était de 480,000,000 de boisseaux et contraste avec celui de 301,000,000 la même date de l'année précédente. Les arrivages de blé dans les Provinces des Prairies s'élèvent à 222,900,000 boisseaux durant la campagne comparativement à 458,400,000 l'année précédente. La situation du blé au Canada révèle nettement que les approvisionnements en 1942-43 seront plus considérables qu'au cours de la campagne qui vient de se terminer, malgré une diminution de 56,000,000 de boisseaux dans le report le 31 juillet 1942.

L'entreposage constitue présentement un problème. Le relevé de la Commission du blé, effectué à la fin de juillet, indique que l'espace disponible pour les arrivages de grain de toutes sortes aux élévateurs ruraux dans l'Ouest ne se place qu'à 170,000,000 de boisseaux, tandis que les autres entrepôts disponibles ne peuvent recevoir que 35,000,000 de boisseaux; il y a donc en tout de l'espace pour 205,000,000 de boisseaux de grain de toutes sortes. La probabilité des livraisons plus considérables d'avoine, d'orge et de graine de lin complique la situation de l'entreposage; étant donné la congestion à Fort William et à Port Arthur, le mouvement du grain sera plus lent cet automne et les wagons seront rares pour le transport des stocks des élévateurs ruraux. La remise de huit cents le boisseau de blé vendu comme provende sera révisée plus tard lorsque les classements de la nouvelle récolte seront établis sur le marché. La renoue a été annoncée le 21 août par la Commission des Prix et du Commerce en temps de guerre et l'Office du ravitaillement en produits agricoles.

Le Ministère britannique de l'Alimentation espère que le Canada pourra fournir au Royaume-Uni au moins 700,000,000 de livres de jambon et de bacon, en vertu d'un nouvel accord qui se négocie présentement, soit 100,000,000 de livres de plus qu'en vertu de l'accord qui expire en octobre prochain. On s'attend à d'autres commandes pour l'Alaska et Terre-Neuve. Les livraisons de porcs s'élèvent à 6,216,000 en 1941 comparativement à 3,246,000 en 1938.

La production canadienne de beurre de crème s'établit à 40,200,000 livres en juillet contre 39,100,000 le même mois de l'an dernier. La production des sept mois terminés en juillet atteint un total de 159,600,000, à rapprocher de 166,200,000 la même période de 1941. La production de fromage augmente à 30,200,000 livres, en regard de 25,500,000 le même mois de l'an dernier, gain de 18·7 p.c. La production des sept mois terminés en juillet augmente de près de 50 p.c.

Production primaire

La production et les expéditions de papier à journal continuent de se contracter en juillet. Les expéditions aux consommateurs canadiens sont un peu plus considérables que celles de l'an dernier, mais les expéditions aux consommateurs américains et outre-mer accusent des déclins. Le rendement est de 65·2 en juillet, à rapprocher de 65·6 en juin et 80·4 l'an dernier. La Commission de la production de guerre, à Washington, a annoncé que plusieurs compagnies de publication ne disposaient que des stocks minimums de papier à journal. Les ordres mitigeant les restrictions des stocks expirent le 30 septembre. On a proposé aux éditeurs de profiter de l'occasion de s'approvisionner en papier à journal afin qu'ils n'aient pas de difficulté à en obtenir plus tard, vu que le transport ferroviaire est de plus en plus givré. L'indice de la production forestière, basé sur quatre facteurs, se maintient à peu près au même point, soit à 120·7 en juillet comparativement à 121·1 le mois précédent.

La production des pêcheries est estimée à plus de \$3,000,000 en juin; les prises approchent 820,000 cwt dans les Provinces Maritimes, les îles de la Madeleine et la Colombie Britannique. Il est estimé que la production du Québec vaudra environ \$200,000. Le volume de la prise est un peu plus faible qu'en juin l'an dernier, mais de meilleurs prix font augmenter la valeur de près de \$802,000. Les moissonneurs de la mer débarquent de grandes quantités de poisson malgré les tempêtes destructives et le nombre moins grand d'hommes expérimentés.

La production minérale en juillet est plus considérable que celle du mois précédent. Les arrivages d'or à la Monnaie s'élèvent à 431,435 onces fines contre 398,695. Les arrivages d'argent à la Monnaie atteignent un niveau plus élevé. La production de charbon s'établit à 1,474,000 tonnes comparativement à 1,368,000. Comme l'augmentation est hors de saison, l'indice avance de 137 à 155. Il faut maintenant des permis pour exporter l'argent sous diverses formes: minerais et concentrés, métal et alliages, rebuts, sels et composés. Cette mesure a été prise parce que la demande croissante d'argent en ce pays et ailleurs a rendu nécessaire de garder les approvisionnements du Canada pour son propre usage. On a annoncé des progrès marqués dans les négociations en cours depuis quelque temps entre le Contrôleur des Métaux et les autorités à Washington qui cherchent à produire des métaux stratégiques à même les dépôts canadiens peu rémunérateurs. Le principal objectif est de produire une plus grande quantité de cuivre au Canada, mais le plomb et le zinc font également l'objet des négociations. On a l'intention d'exploiter les dépôts de basse teneur qu'il ne serait pas normalement profitable de mettre en valeur, étant donné les prix maintenant fixés pour la durée de la guerre.

La production d'énergie électrique diminue un peu en juillet comparativement au mois précédent. Le total est de 2,966,000,000 de kilowatt-heures contre 3,043,000,000 le mois précédent. Cette diminution est partiellement saisonnière. La comparaison avec juillet l'an dernier est favorable; la production s'établissait alors à 2,661,000,000 de kilowatt-heures, soit une augmentation de 18 p.c. cette année. La production du premier semestre de cette année s'élève à 18,600,000,000 de kilowatt-heures et atteint un nouveau maximum; elle excède de 18·3 p.c. celle de la même période de l'an dernier et de 35·4 p.c. celle du premier semestre d'avant-guerre en 1939.

Transports

Les chargements se chiffrent à 293,769 wagons en juillet contre 286,506 le mois précédent et 276,829 le même mois de l'an dernier. Les recettes brutes des deux chemins de fer canadiens s'élèvent à \$345,500,000 les sept premiers mois de cette année et excèdent tous les records antérieurs pour la même période. L'an dernier les recettes brutes s'établissaient à \$286,700,000; l'augmentation cette année est donc de près de \$59,000,000 ou de 20·5 p.c. En regard des sept premiers mois d'avant-guerre en 1939, alors que les recettes globales s'élevaient à \$176,900,000, l'augmentation est de \$168,600,000 ou de 95·3 p.c. Toutes recettes excédentaires des Chemins de fer Nationaux du Canada au cours de l'année civile courante serviront à raffermir le capital de roulement. Les Chemins de fer Nationaux du Canada font maintenant de gros profits nets, c'est-à-dire déduction faite des besoins de la dette fondée, de l'entretien, de la dépréciation et

des retraits de certificats fiduciaires d'outillage à mesure qu'ils deviennent échus. S'il n'y avait pas de méthode de comptabilité règlementaire, ces fonds pourraient servir à l'acquisition de nouvel outillage; mais 40 p.c. du revenu du chemin de fer est payé au Gouvernement fédéral en taxes, et tout surplus de profits réguliers qui n'est pas susceptible d'être gagné sera versé au Gouvernement sous une forme quelconque. Pendant les sept premiers mois de l'année les Chemins de fer Nationaux du Canada ont couvert 1·51 fois la proportion des frais d'intérêt du réseau durant cette période, soit une marge de couverture qui est beaucoup supérieure à celle de 1·26 fois l'an dernier. Le taux d'opération laisse voir une légère amélioration à date cette année, le chiffre de la période de sept mois en 1942 étant de 77·4 contre 77·8 l'an dernier.

Emploiement

L'indice de l'emploiement se place à 175·7 le 1er juillet comparativement à 157·4 la même date de l'an dernier, gain de près de 12 p.c. En juin cette année l'indice s'établissait à 171·7, soit un gain de 4 points en juillet. Normalement, l'emploiement est un peu plus considérable le 1er juillet qu'au début du mois précédent, mais l'augmentation en juillet excède de beaucoup le mouvement saisonnier. On a annoncé le 25 août qu'il fallait plus de 250,000 personnes dans les industries de guerre et les forces armées avant la fin de l'année courante. Comme il y a moins de 60,000 chômeurs, les Canadiens se trouvent en présence d'une violente contraction de plusieurs de leurs industries et occupations moins essentielles. Il s'établit des comités consultatifs du capital humain par industrie, composés d'employés et de représentants de l'administration pour faire des recommandations directement à la Commission du Service Sélectif au sujet des problèmes du capital humain affectant les industries en particulier. La tâche du Service Sélectif National est de faire faire à tout homme et à toute femme le genre de travail qui contribuera le plus utilement à l'effort de guerre. L'enregistrement des femmes sans emploi de 20 à 24 ans est fixé au 14 septembre. Il est prévu que l'enregistrement permettra d'organiser la rentrée des femmes dans les industries de guerre à une allure de plus en plus rapide. Le nouvel arrangement comportera la réorganisation de la Commission d'Assurance-Chômage en une partie intégrale du Ministère du Travail agissant en étroite collaboration avec l'administration du Service Sélectif National.

Finances

Du 1er avril à la fin de juillet les recettes globales du Gouvernement fédéral se chiffrent à \$742,000,000 contre \$484,000,000 la même période de l'an dernier. Les dépenses ordinaires du Gouvernement fédéral augmentent de \$126,700,000 à \$178,300,000 pendant le même intervalle. Cependant, les dépenses de guerre augmentent d'environ \$309,000,000 à \$672,000,000. Les dépenses en vertu de la loi du financement de la guerre du Royaume-Uni approchent \$549,000,000 les quatre premiers mois de l'année fiscale courante. Les dépenses de guerre aux deux comptes s'élèvent donc à \$1,220,500,000 à date cette année, à rapprocher de \$308,900,000 la même période de l'an dernier. Il a été annoncé le 11 août qu'une émission de certificats de dépôts du Dominion du Canada au montant de \$55,000,000, devenant dus le 9 février, a été vendue au pair aux banques à charte. Les certificats portent intérêt à $\frac{3}{4}$ de 1 p.c. par année. Il a été également annoncé le 25 août qu'une émission de certificats de dépôts s'élèvant à \$50,000,000, devenant dus le 23 février prochain, avait été vendue aux banques au même prix.

BUREAU FÉDÉRAL DE LA STATISTIQUE,

31 août 1942.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS, MONTH ENDED AUGUST 16, 1942

Business.—Survey of Production in Canada, 1940, 25 cents.

Population.—Preliminary report of births, deaths and marriages in the fourth quarter of 1941 (Eng. and French), 6 p., \$1 per year. Seventh Census of Canada, 1931, Volume XII. Monographs; The Canadian Family; Fertility of the population of Canada; Housing in Canada; Illiteracy and School Attendance; The Age Distribution of the Canadian People. Canadian Life Tables. 48+902 p., maps. Cloth, \$1. Paper, 75 cents.

Production.—Agricultural Products—Census of Agriculture, Bulletin No. 23, Canada; Area of field crops, 1941 (Eng. and French), 7 p. Fruit and Vegetable crop report, July 31, 1942, 6 p., \$1 per year. Telegraphic crop report, July 21, 1942, 8 p., \$2 per year; . . . July 28, 1942, 12 p.; . . . August 3, 1942, 8 p.; . . . August 10, 1942, 3 p., maps. Fisheries Products—Advance report on the Fisheries of Prince Edward Island, 1941, 8 p., 10 cents; . . . the Fisheries of New Brunswick, 1941, 10 p., 10 cents; . . . the Fisheries of Nova Scotia, 1941, 11 p.; . . . the Fisheries of Quebec, 1941, 9 p., 10 cents (Eng. and French).

Internal Trade.—Census of Merchandising and Service Establishments; Power laundries and cleaning and dyeing establishments in Canada, 1940, 49+2 p., 25 cents. Prices and Price Indexes supplement, 1941, 106 p., 25 cents.

Manufactures.—Weekly earnings and hours of work of male and female wage-earners employed in the manufacturing industries of Canada, 1939, 30 p., 25 cents. Geographical distribution of the manufacturing industries of Canada, 1939, 75 p., 25 cents. The textile industries of Canada, 1938 and 1939 (Eng. and French), 173 p., 50 cents.

Transportation, Communications and Public Utilities.—Preliminary report, provincial revenues from motor vehicle registrations, etc., and gasoline taxes, 1 p., 10 cents.

2. PUBLICATIONS REGULARLY ISSUED BY THE WEEK, MONTH OR QUARTER

Daily Bulletins.—The daily bulletin (Eng. and French)—\$1.50 per year.

Weekly Bulletins.—Canadian grain statistics. Carloadings of revenue freight. The weekly bulletin—\$1.00 per year.

Monthly Bulletins.—Advance preliminary statement, stocks of butter, cheese and eggs in the principal cities of Canada. Agricultural statistics (Eng. and French) Asbestos trade. Automobile financing. Building permits. Canada's imports by principal countries. Canadian milling statistics. Canal Statistics. Cold storage holdings of fish. Cold storage holdings of meat and lard. Commercial failures. Current trends in food distribution. Current review of agricultural conditions. Departmental store sales. The employment situation as reported by employers. Footwear trade. Monthly retail sales in country general stores. Monthly wholesale trade. New motor vehicle sales. Output of central electric stations in Canada. Outstanding facts and figures gathered from reports, statements, bulletins and radio broadcasts. Price movements (preliminary). Prices and price indexes. Railway operating statistics. Registration of births, deaths and marriages.—\$1.00 per year. Retail sales in Canada. Review of dairy production. Sales and purchases of securities between Canada and other countries. Steel ingots. Stocks of Canadian fruit and vegetables. Stocks of dairy and poultry products. Stocks of raw hides and skins. Summary of Canada's domestic exports. Summary of Canada's imports. Summary of the trade of Canada, current month and 12 months. Tobacco trade. Traffic of Canadian Railways. The wheat situation; review, statistical supplement—\$1.00 per year.

Monthly Review of Business Statistics (Eng. and French)—Price \$1.00 per year. Economic Conditions. Bank debits.

Quarterly Bulletins.—Canadian coarse grains. Civil Aviation. Quarterly bulletin of agricultural statistics. Price \$1.00 per year.

For the publications listed above application should be made to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

The complete service of all publications issued by the Bureau (with the exception of news bulletins) may be obtained for a special rate of \$30 per annum.
