CANADA 1943

Canada 1943 covers the present situation in the Dominion from Atlantic to Pacific, the weight of emphasis being placed on those aspects that are currently of most importance. So far as space permits, all phases of the country's economic organization are dealt with and statistics are brought up to the latest possible date. The text is accompanied by a wealth of illustrative matter that adds to the interest of the subjects treated.

The Introduction reviews Canada's war program, covering the development of her Armed Forces, the financial steps that have been taken, and the governmental organizations that have been created with their principal activities. It also reviews Canada's economic condition at the close of 1942. This Introduction is followed by special articles dealing with "Canada's Industrial War Front, 1942" and "Power in Relation to Canadian War Production". The former article treats of the extensive industrial organization that has been developed under the control of the Department of Munitions and Supply for the rapid production of all forms of war munitions.

The price of the publication is 25 cents per copy which charge covers merely the cost of paper and actual press work. The special price concession granted, in the past, to teachers, bona fide students and ministers of religion has been discontinued in view of the necessity for diverting as large a proportion as possible of Dominion funds to the War, and to the fact that, as far as possible, the sales policy of Government publications should be self-sustaining as regards printing materials used.

Application for copies should be made to the KING'S PRINTER, OTTAWA, and not to the Dominion Statistician.

Postage stamps are not acceptable, and applications must be accompanied by a postal note or by a coin enclosed between two squares of thin cardboard gummed together at the edges.

MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XVIII

OTTAWA, APRIL, 1943

No. 4

DOMINION STATISTICIAN: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

ECONOMIC CONDITIONS IN MARCH

The six factors measuring the trend of economic conditions showed minor gains in March over the preceding month. Business operations rose slightly following the marked advance of the preceding month. The index of the physical volume of business consequently reached a new high point in history. A minor advance was shown in wholesale prices continuing the upward drift in progress for more than a year. A marked gain had been shown in wholesale prices from August, 1939, to the latter part of 1941. The standing in March was higher than at any time since 1929.

Bank deposits recorded a slight gain at the beginning of February over the previous month. During January, a considerable reduction was shown in the sum of the four classes of deposits. A minor rise at the beginning of March failed to counterbalance any important part of the reaction of the preceding month. The prices of Dominion bonds were firm pending the offering of the fourth Victory Loan. Following the marked decline in Dominion bond prices in the first month of hostilities, a rally was shown during the remainder of the year and the first half of 1940. Since that time Dominion bond prices have been remarkably steady. Common stock prices showed a rally commencing in September of 1942. Common stock prices were at a low and declining level from mid-year 1940 until last September and speculative trading was at an extremely low point. Increases both in prices and in trading have occurred since last September, but pre-war levels have not been reached.

The national income for the month of February was estimated at a new maximum of \$700 million and the increase in the national income during the first two months of the year suggests a considerably higher level for 1943. Last year's estimated national income of 7·5 billion dollars was nearly double the figure for 1919 and was \$4,776 million or 175·3 p.e. greater than the low point of the depression at \$2,724 million in 1933. The total for 1942 was estimated at \$7·5 billion against \$6,514 million in the preceding year.

The visible supply of wheat was 423 million bushels in the week of April 8th against 455·8 million on the same date of last year. Wheat deliveries in Western Canada were 176·1 million bushels in the crop year from August 1st to April 8th, while in the preceding year the deliveries were 175·2 million bushels. Durum wheat is excluded from the totals given. The stocks of five principal Canadian grain crops held in all North American positions, including stocks on Canadian farms, totalled 1,389·5 million bushels on March 31st compared with 735·3 million bushels a year earlier. Wheat accounted for 798 million bushels or 57 p.e. of the total, but the stocks of oats and barley, especially the supplies still in farmers' hands, were unusually large, reflecting the record crops produced in 1942. It should be noted, however, that seed for the 1943 crops is included in the farm stocks and acreage objectives for wheat, oats, barley, rye and flaxseed this year call for the plowing of approximately 44,000,000 acres to these crops.

Despite unusually heavy farmers' marketings of oats and barley in western Canada in the first eight months of the crop year, which began last August 1st, the supplies of oats remaining on farms at the end of March totalled 315 million bushels in the three Prairie Provinces and 362 million bushels for all Canada. Barley stocks on farms in western Canada amounted to 131 million bushels

TO INDIVIDUALS**

and for the whole of the Dominion 135,000,000 bushels. Stocks of oats and barley in commercial storage are also much greater than at the same date in 1942. Arrangements were made to permit western farmers to deliver the allotted quota of 14 bushels an acre by increasing delivery quotas as rapidly as transportation and storage permit. On March 13th, 49 p.c. of western delivery points were on a 14-bushel quota, 16 p.c. were on a 12-bushel quota, 33 p.c. were on a 10-bushel quota and two per cent on an 8-bushel quota. Total marketings from the 1942 western wheat crop during the crop year 1942-43 are restricted to 280 million bushels and this quantity of 1942 wheat would be taken as storage and transportation permitted. After August 1, 1943, and up to July 31, 1944, either 1942 or 1943 wheat may be delivered up to 14 bushels an authorized acre.

In the period January 1 to March 18, dairy cattle shipments across the border totalled 5,326 head against 3,473 in the same period last year. Beef cattle sales at public stockyards in Canada and shipments direct to packing plants totalled 18,860 head in the week ended March 18, against 17,382 in the same period of 1942. For eleven weeks of 1943 the total was 188,420 head against 345,077 for the same period last year.

The value of Quebec fisheries in 1942 reached their highest peak since 1919. Landings of all varieties of sea fish in 1942 reached 104,877,100 pounds. With the proceeds of seal and porpoise catch, the fishermen of the province received \$2,399,357 and the commercial value of the production at shipping points was \$3,841,218. An inventory of fishing centres taken last autumn shows that exclusive of Magdalen Islands, there are 7,256 fishermen in the fishing districts of whom 4,516 devoted their time to cod fishing, 554 fished for salmon, 236 for lobster and 1,437 for herring, while 413 tried their luck in mackerel, smelts, trout, etc.

Gold receipts at the Mint were 279,282 fine ounces against 383,100 in the preceding month. The total in March, 1942, was 377,109 fine ounces. Milling production was more active in the latest month for which statistics are available. The index for the output of wheat flour was 207.4 against 192.3. Advances were also recorded in the production of oatmeal and rolled oats. The meat packing industry was considerably more active, the index moving up about 12 points to 154.5. The slaughterings of cattle were nearly 133,000, against 95,000 in February. The hog section was 554,000 against 515,000, the index advancing from 174 to 190. The increase in dairy production was greater than normal for the season. The output of cheese advanced from 1.5 million pounds to 2.7 million, and the production of creamery butter was 15.6 million against 11.9 million in February. The increase in the output of boots and shoes showed an advance less than normal for the season in the latest month for which statistics are available. The index of the consumption of raw cotton rose from 154.7 to 175.3, the use of cotton having been 18.2 million pounds against 16.1 million.

The new business obtained by the construction industry was \$11.1 million against \$19 million in February. The residential contracts rose from \$1,987,000 to \$4,712,000, being slightly greater than in March, 1942. The reduction in volume is attributed to material and manpower shortages together with government controls. Construction contracts in the quarter were at \$43.0 million which compares with \$41.8 million a year ago.

The apparent total consumption of newsprint in the United States amounted to 319,127 tons in March, which was 18,749 tons lower than in March, 1942. The cumulative decrease in the first three months of this year was 3.9 p.c. The apparent total stocks of all the U.S. consumers declined 23,238 tons during March and amounted to 574,078 tons at the end of the month. Corresponding stocks at the end of March, 1942 and 1941, were 621,208 and 402,663 tons, respectively. Shipments from Canada during the first quarter of this year represented 72 p.c. of total U.S. supply remaining unchanged from the same period a year ago. Newspaper advertising lineage in 53 United States cities increased 5.9 p.c. over March, 1942, compared with a corresponding increase

of 8·7 p.c. in February. The cumulative increase for the first three months of this year over last was 6·7 p.c. Magazine advertising lineage in March increased 15·5 p.c. as against an increase of 15·1 p.c. in February.

Retail sales in Canada averaged 9 p.c. higher in February than in the same month of 1942, and were practically on a par with the January level. The general index of sales, unadjusted for seasonal movements and on the base of 1935-39 = 100, stood at 130·5 for February, 128·7 for January and 120·1 for February a year ago. Food store sales, including grocery outlets and stores selling both groceries and meats, averaged 6 p.c. higher. Sales of Canadian wholesale merchants during February averaged 7 p.c. greater than in the corresponding month last year, the unadjusted index of sales standing at 145·9 compared with 136·1.

Bank clearings in the principal Canadian cities for the month of March were \$2,198 million against \$2,069 million in the same month one year ago. Bank debits, on the other hand, were at a somewhat lower position. The total in March was \$4,012 million against \$4,177 million. An increase was recorded in the Prairie Provinces, while other economic areas showed recession. Deposit liabilities at the beginning of March were \$3,533 million against \$3,494 million one month before. The circulating media in the hands of the public rose from \$687 million to \$711 million.

Increases over 1941 in the amount of life insurance and most other types of insurance written in Canada were shown in 1942. During the year 666,927 new life insurance policies were written with a gross value of \$834,235,715, compared with 663,115 policies with a gross value of \$702,879,215 in 1941, a gain of 19 p.c. The total net premium income for 1942 was \$215,829,297 compared with \$203,459,238 in the previous year. There was a slight reduction in payments for annuities to \$14·9 million from \$16 million in 1941.

A gain of \$215·9 million was recorded in the value of listings on the Montreal Stock Exchange and Curb Market at the end of March, with the total reaching \$7,022 million. The total for February was \$6,805·7 million and that for March, 1942, was \$6,279 million. Excluding the bonds, the value was \$4,504 million or a betterment of nearly \$220 million.

Canada's fourth Victory Loan, in which the minimum objective is \$1·1 billion, will be offered in two maturities. The two issues will be offered at a price of 100 p.c. and will be dated May 1, 1943. The issues are as follows: a 3½-year issue, maturing in November 1, 1946, at 100, bearing interest at 1¼ p.c. per annum. A 14-year issue, maturing May 1, 1957, at 100, bearing interest at 3 p.c. per annum. The 3 p.c. bonds will be offered in denominations of \$50, \$100, \$500 and \$1,000 as in previous loans. The loan campaign, which opens April 26th and will last three weeks, represents the largest flotation in Canada's history. The minimum objective of the third Victory Loan was \$750 million and the amount realized was \$991,000,000 from more than 2 million subscribers.

The Bank of Canada announced on April 6th that an issue of Dominion of Canada deposit certificates in the amount of \$70 million on even date, due next October, was sold to the chartered banks at par. The certificates will bear interest at the rate of $\frac{3}{4}$ of 1 p.c. Only part of the issue represents new cash, as \$45 million certificates bearing the same rate of interest matured at that time. Tenders were accepted on April 1st for the full amount of \$55 million Dominion of Canada Treasury Bills due next July 2nd. The average discount price of the accepted bids was 99·87638 and the average yield .496 p.c.

The official cost of living index rose from 116·9 on February 1 to 117·2 at the beginning of March, a wartime increase of 16·3 p.c. The index at the beginning of the war was 100·8 and the rise since then has been 16·4 points or 16·3 p.c. The increase make no changes in the cost of living bonuses now being paid in a wide range of Canadian industries. The next date for revision of the bonus is May 15th on the basis of the index of April 1.

The statistics for 1941 and 1942 are mainly tentative subject to important change upon the receipt of further information. Data from the Census of 1941, both annual and decennial, will be of interest in this connection.

NOTES TO TABLE 33—

(a) The national income was computed by a detailed study of the operating accounts of thirty industrial and service groups. Payments to individuals for participating in the productive process were added to the positive and negative savings. Availability of data permitted the deduction of cost of raw materials, overhead and depreciation charges from gross operating revenues for a considerable number of the groups.

(b) The difference between (a) national income proper and (b) payments to individuals, consists in the positive net negative savings of enterprises. The savings of the Dominion and Provincial governments are computed by comparing the changes in net obligations with net alterations in the value of tangible assets. Imputed net rents of owner occupied homes are included in the real estate group.

(c) Business taxes were compiled from the report of the Dominion Provincial Relations Commission and public accounts. The sum was to include the total of such taxation disregarding the incidence.

(d) A study was made of the fixed capital and depreciation in each of the thirty groups. No account was taken of depreciation on government assets in this connection.

(e) The international balance on dividends and interest denotes an additional payment made by enterprises producing goods and services, excluded from (a) national income proper.

(f) The gross value of the production of goods and services is the summation of (a), (c), (d) and (e) with adjustment for government savings and direct relief. A number of changes were made to place the result on a common footing with the "Gross National Product or Expenditure" of the United States as published on page 12 of the Survey of Current Business of May last. For the present purpose government savings were eliminated and direct relief payments deducted from the Canadian totals. Two additional items were added and one subtracted in making up the gross national product of the United States reported in the May number. No attempt was made in Table 33 to follow the latter procedure.

(g) The index of the cost of living on the base of 1935-39 is published by the Internal Trade Branch of the Bureau.

(h) As a large part of the national income is expended by individuals for goods and services, the index of the cost of living is one of the best measures for eliminating the influence of price changes from the general income totals. Real income consequently is a more accurate gauge of the net production of goods and services in terms of volume than national income proper. The quotient is expressed in terms of dollars averaged for the five-year period from 1935-39, and any index on a different base would denote an altered level of real income. The use of indexes of consumer's goods at wholesale and of the "General Price Level" would produce a somewhat different pattern. Compare "National Income of Canada, 1919-1938, Part I" pages 18 and 24.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XVIII

OTTAWA, AVRIL 1943

N° 4

STATISTICIEN DU DOMINION: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

SITUATION ÉCONOMIQUE EN MARS

Les six facteurs traçant l'orientation de la situation économique laissent voir de faibles gains en mars comparativement au mois précédent. Les opérations commerciales s'accélèrent légèrement à la suite de l'avance marquée du mois précédent. L'indice du volume physique des affaires atteint donc une nouvelle cime dans l'histoire. Les prix de gros montent un peu, continuant ainsi la hausse qui se poursuit depuis plus d'un an. Les prix de gros ont accusé une hausse marquée du mois d'août 1939 à la dernière partie de 1941. Le niveau en mars est plus élevé qu'en tout autre temps depuis 1929.

Au début de février les dépôts bancaires augmentent légèrement par rapport au mois précédent. La somme des quatre catégories de dépôts diminue considérablement en janvier. La faible augmentation au commencement de mars ne réussit pas à contre-balance la diminution du mois précédent. Les obligations du Dominion sont fermes en attendant l'offre du quatrième emprunt de la victoire. Après un déclin marqué des obligations du Dominion au cours du premier mois des hostilités, survient une reprise durant le reste de l'année et la première moitié de 1940. Depuis ce temps les obligations du Dominion sont remarquablement stables. Les actions ordinaires accusent une reprise depuis septembre 1942; elles étaient basses et tendaient à décliner du milieu de l'année 1940 jusqu'à septembre dernier et les opérations spéculatives étaient à un niveau extrêmement bas. Les cours et les transactions ont augmenté depuis septembre dernier, mais ils n'ont pas atteint les niveaux d'avant la guerre.

Le revenu national du mois de février est estimé à un nouveau maximum de \$700,000,000 et l'augmentation des deux premiers mois de l'année permet d'espérer un niveau beaucoup plus élevé pour 1943. Le revenu national, estimé à \$7,500,000,000 l'an dernier, est à peu près le double de celui de 1919 et excède de \$4,776,000,000 ou de 175.3 p.c. celui de \$2,724,000 atteint pendant le pire de la crise en 1933. Le total de 1942 est estimé à \$7,500,000,000 contre \$6,514,000,000 l'année précédente.

Les approvisionnements visibles de blé se placent à 423,000,000 de boisseaux la semaine du 8 avril, à rapprocher de 455,800,000 la même date de l'an dernier. Les livraisons de blé dans l'Ouest canadien s'élèvent à 176,100,000 boisseaux durant la campagne du 1er août au 8 avril, tandis que l'année précédente les livraisons s'établissaient à 175,200,000 boisseaux. Le blé durum n'est pas compris dans les totaux donnés. Les stocks des cinq principales céréales canadiennes détenus dans toute l'Amérique du Nord, y compris les stocks sur les fermes canadiennes, se placent à 1,389,500,000 boisseaux le 31 mars contre 735,300,000 l'année précédente. Il y a 798,000,000 de boisseaux de blé, soit 57 p.c. du total; mais les stocks d'avoine et d'orge, spécialement les approvisionnements encore entre les mains des fermiers, sont extraordinairement considérables, reflétant les récoltes sans précédent en 1942. Il faut observer, toutefois, que les graines de semence pour les cultures de 1943 sont comprises dans les approvisionnements sur les fermes et que les objectifs des emblavures de blé, d'avoine, d'orge, de seigle et de graine de lin cette année requièrent l'ensemencement d'environ 44,000,000 d'acres.

Bien que les fermiers aient livré des quantités exceptionnellement considérables d'avoine et d'orge dans l'Ouest canadien durant les huit premiers mois de la campagne qui a commencé le 1er août dernier, les approvisionnements d'avoine sur les fermes à la fin de mars s'établissent à 315,000,000 de boisseaux dans les trois Provinces des Prairies et à 362,000,000 de boisseaux dans tout le Canada. Les stocks d'orge s'élèvent à 131,000,000 de boisseaux dans l'Ouest canadien et à 135,000,000 de boisseaux dans tout le Canada. Les stocks d'avoine et d'orge dans les entrepôts commerciaux sont également beaucoup plus considérables qu'à la même date de 1942. Des arrangements ont été pris pour permettre aux fermiers de l'Ouest de livrer le contingentement alloué de 14 boisseaux par acre en augmentant les contingentements de livraison aussi rapidement que le permettent le transport et l'entreposage. Le 13 mars le contingentement était fixé à 14

boisseaux en 49 p.c. des centres de livraison dans l'Ouest, à 12 boisseaux en 16 p.c., à 10 boisseaux en 33 p.c. et à 8 boisseaux en 2 p.c. Les livraisons globales à même la récolte de blé de 1942 dans l'Ouest sont restreintes à 280,000,000 de boisseaux durant la campagne de 1942-43 et il sera disposé de cette quantité de blé de 1942 lorsque le permettront l'entreposage et le transport. Après le 1er août 1943 et jusqu'au 31 juillet 1944, le blé de 1942 ou de 1943 pourra être livré jusqu'à concurrence de 14 boisseaux par acre autorisée.

Du 1er janvier au 18 mars les expéditions de vaches laitières outre-frontière s'établissent à 5,326 têtes comparativement à 3,473 la même période de l'an dernier. Les ventes de bœufs de boucherie aux enclos publics au Canada et les expéditions directement aux salaisons s'élèvent à 18,860 têtes la semaine terminée le 18 mars, en regard de 17,382 la même période de 1942. Au cours des onze semaines de 1943 le total est de 188,420 têtes contre 345,077 la même période de l'an dernier.

La valeur des pêcheries du Québec en 1942 atteint son plus haut point depuis 1919. Le débarquement de toutes les variétés de poisson de mer en 1942 s'établit à 104,877,100 livres. La prise du phoque et du marsouin rapporte \$2,399,357 aux pêcheurs de la province et la valeur commerciale de la production aux points d'expédition est de \$3,841,218. D'après un relevé des centres de pêche fait l'automne dernier et n'englobant pas les îles de la Madeleine, il y a 7,256 pêcheurs dans les districts de pêche dont 4,516 se livrent à la pêche de la morue, 554 à la pêche du saumon, 236 à la pêche du homard et 1,437 à la pêche du hareng, tandis que 413 tentent leur fortune dans la pêche du maquereau, de l'éperlan, de la truite, etc.

Les arrivages d'or à la Monnaie s'élèvent à 279,282 onces fines contre 382,100 le mois précédent et 377,109 en mars 1942. La minoterie est plus active le dernier mois où les statistiques sont connues. L'indice de la production de farine de blé se place à 207·4 comparativement à 192·3. Il y a aussi une augmentation de la production de farine d'avoine et d'avoine roulée. La salaison est beaucoup plus active et l'indice gagne environ douze points à 154·5. Les abatages de bêtes à cornes approchent 133,000 têtes contre 95,000 en février. Les abatages de porcs se chiffrent à 554,000 comparativement à 515,000 et l'indice passe de 174 à 190. L'augmentation de la production laitière est plus que normale pour la saison. La production de fromage passe de 1,500,000 livres à 2,700,000 et la production de beurre de crème se place à 15,600,000 livres contre 11,900,000 en février. L'augmentation de la production de chaussures est moins que normale pour la saison le dernier mois où les statistiques sont connues. L'indice de la consommation de coton brut avance de 154·7 à 175·3 et il s'en consomme 18,200,000 livres comparativement à 16,100,000.

Les nouvelles entreprises dans l'industrie de la construction se chiffrent à \$11,100,000 en regard de \$19,000,000 en février. Les contrats de construction d'habitations augmentent de \$1,987,000 à \$4,712,000 et sont un peu plus considérables qu'en mars 1942. La diminution du volume est attribuable à la pénurie de matériaux et de main-d'œuvre ainsi qu'aux contrôles gouvernementaux. Les contrats de construction durant le trimestre s'élèvent à \$43,000,000 contre \$41,800,000 l'an dernier.

La consommation globale apparente de papier à journal aux Etats-Unis s'établit à 319,127 tonnes en mars, soit 18,749 tonnes de moins qu'en mars 1942. La consommation diminue de 3·9 p.c. en tout au cours du premier trimestre de cette année. Les stocks globaux apparents de tous les consommateurs des Etats-Unis déclinent de 23,238 tonnes en mars et se placent à 574,078 tonnes à la fin du mois. Les stocks correspondants à la fin de mars 1942 et 1941 étaient respectivement de 621,208 et de 402,663 tonnes. Les expéditions du Canada pendant le premier trimestre de cette année représentent 72 p.c. de tous les approvisionnements des Etats-Unis et n'offrent pas de changement en regard de la même période de l'an dernier. Le nombre de lignes de réclame des journaux dans 53 villes des Etats-Unis augmente de 5·9 p.c. comparativement à mars 1942, l'augmentation correspondante en février étant de 8·7 p.c. L'augmentation générale durant le premier trimestre de cette année en regard de l'an dernier est de 6·7 p.c. Le nombre de lignes de réclame dans les magazines augmente de 15·5 p.c. en mars contre une augmentation de 15·1 p.c. en février.

Les chargements au cours des quinze premières semaines de l'année terminées le 10 avril se chiffrent à 906,585 wagons, à rapprocher de 917,657 la même période de 1942. Il y a des déclins pour le coke, le bois d'œuvre, la pulpe et le papier, les autres produits forestiers, le minerai et les marchandises par lots de moins d'un wagon. Les augmentations sont appréciables pour les denrées diverses comprenant principalement des marchandises ouvrées, le grain et les produits du grain, le bétail, le charbon et le bois de pulpe. Dans la division de l'Ouest les chargements

augmentent de 302,576 wagons les quinze premières semaines de 1942 à 313,332 wagons la période correspondante de l'année courante. Dans la division de l'Est les chargements déclinent considérablement. Les chargements s'établissent à 286,300 en mars contre 271,300 la même période de l'an dernier. Les recettes d'exploitation du chemin de fer Pacifique Canadien se chiffrent à \$24,000,000 en mars, à rapprocher de \$20,855,000 le même mois de l'an dernier.

En février les ventes de détail au Canada sont en moyenne de 9 p.c. plus considérables que celles du même mois de 1942 et à peu près égales à celles de janvier. L'indice général des ventes, non ajusté pour variations saisonnières et sur la base 100 en 1935-1939, se place à 130·5 en février, 128·7 en janvier et 120·1 en février l'an dernier. Les ventes des magasins d'aliments, c'est-à-dire des épiceries et des épiceries-boucheries, atteignent une moyenne de 6 p.c. plus forte. Les ventes des marchands de gros au Canada en février sont en moyenne de 7 p.c. plus considérables que celles du mois correspondant de l'an dernier et l'indice ajusté des ventes se place à 145·9 contre 136·1.

Les compensations bancaires dans les principales villes canadiennes en mars s'élèvent à \$2,198,000,000 comparativement à \$2,069,000,000 le même mois de l'an dernier. D'autre part, les débits bancaires diminuent un peu; le total en mars est de \$4,012,000,000 contre \$4,177,000,000. Il y a une augmentation dans les Provinces des Prairies, mais une diminution dans les autres régions économiques. Au début de mars les dépôts bancaires s'établissent à \$3,533,000,000 comparativement à \$3,494,000,000 le mois précédent. Le numéraire en circulation augmente de \$687,000,000 à \$711,000,000.

Le volume d'assurance-vie et de la plupart des autres genres d'assurances écrites au Canada augmente en 1942 comparativement à 1941. Pendant l'année 666,927 nouvelles polices d'assurance-vie d'une valeur brute de \$834,235,715 sont émises contre 663,115 polices d'une valeur brute de 702,879,215 en 1941, augmentation de 19 p.c. Le revenu net des primes en 1942 est de \$215,829,297 comparativement à \$203,459,238 l'année précédente. Les paiements pour rentes viagères diminuent légèrement à \$14,900,000 contre \$16,000,000 en 1941.

La valeur des titres inscrits à la Bourse et au Curb de Montréal accuse un gain de \$215,900,000 à la fin de mars et atteint le total de \$7,022,000,000. En février le total était de \$6,805,700,000 et en mars 1942, de \$6,279,000,000. A l'exclusion des obligations la valeur est de \$4,504,000,000, soit une augmentation de près de \$220,000,000.

Le quatrième emprunt de la victoire du Canada, dont l'objectif minimum est de \$1,100,-000,000, sera offert en deux échéances. Les deux émissions seront offertes au prix de 100 p.c. et seront datées du 1er mai 1943. Les émissions sont les suivantes: une à 3½ ans échéant le 1er novembre 1946 à 100 et portant intérêt à 1½ p.c. par année; l'autre à 14 ans, échéant le 1er mai 1957 à 100 et portant intérêt à 3 p.c. par année. Les obligations à 3 p.c. seront offertes en coupures de \$50, \$100, \$500 et \$1,000 comme lors des emprunts antérieurs. La campagne débute le 26 avril et durera trois semaines; cette émission est la plus considérable dans l'histoire du Canada. L'objectif minimum du troisième emprunt de la victoire était de \$750,000,000; le montant réalisé s'est élevé à \$991,000,000 et a été souscrit par 2,000,000 de personnes.

La Banque du Canada a annoncé le 6 avril qu'une émission de certificats de dépôt du Dominion du Canada au montant de \$70,000,000, à des dates échelonnées et dus en octobre prochain, avait été vendue au pair aux banques à charte. Les certificats porteront un intérêt de ¼ de 1 p.c. Une partie seulement de l'émission représente du nouveau numéraire, puisque \$45,000,000 de certificats portant le même intérêt sont devenus échus à cette date. Des soumissions ont été acceptées le 1er avril pour le plein montant de \$55,000,000 de billets du Trésor du Dominion du Canada devenant dus le 2 juillet prochain. Le prix moyen des offres acceptées a été de 99·87638 et le rendement moyen est de .496 p.c.

L'indice officiel du coût de la vie passe de 116·9 le 1er février à 117·2 au commencement de mars, soit une avance de 16·3 p.c. depuis le début des hostilités. L'indice se plaçait à 100·8 au commencement de la guerre; l'avance est donc de 16·4 points ou de 16·3 p.c. Cette avance n'affecte pas les bons de vie chère qui sont maintenant payés dans un grand nombre d'industries canadiennes. La prochaine date pour la révision du boni est le 15 mai, sur la base de l'indice du 1er avril.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS, ISSUED DURING THE MONTH ENDED APRIL 16, 1943
