CANADA 1943

Canada 1943 covers the present situation in the Dominion from Atlantic to Pacific, the weight of emphasis being placed on those aspects that are currently of most importance. So far as space permits, all phases of the country's economic organization are dealt with and statistics are brought up to the latest possible date. The text is accompanied by a wealth of illustrative matter that adds to the interest of the subjects treated.

The Introduction reviews Canada's war program, covering the development of her Armed Forces, the financial steps that have been taken, and the governmental organizations that have been created with their principal activities. It also reviews Canada's economic condition at the close of 1942. This Introduction is followed by special articles dealing with "Canada's Industrial War Front, 1942" and "Power in Relation to Canadian War Production". The former article treats of the extensive industrial organization that has been developed under the control of the Department of Munitions and Supply for the rapid production of all forms of war munitions.

The price of the publication is 25 cents per copy which charge covers merely the cost of paper and actual press work. The special price concession granted, in the past, to teachers, bona fide students and ministers of religion has been discontinued in view of the necessity for diverting as large a proportion as possible of Dominion funds to the War, and to the fact that, as far as possible, the sales policy of Government publications should be self-sustaining as regards printing materials used.

Application for copies should be made to the KING'S PRINTER, OTTAWA, and not to the Dominion Statistician.

Postage stamps are not acceptable, and applications must be accompanied by a postal note or by a coin enclosed between two squares of thin cardboard gummed together at the edges.

MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XVIII

OTTAWA, MAY, 1943

No. 5

DOMINION STATISTICIAN: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

ECONOMIC CONDITIONS IN APRIL

The major factors indicating the trend of economic conditions recorded betterment in April over the preceding month. A considerable gain was shown in the deposit liabilities of the banks, while general increases of a moderate character were shown in the other five factors used in this connection. Common stock prices recorded a further increase resulting in a new high point since April, 1940. Speculative trading on the stock exchanges was greater than for a considerable period. Prices of industrial materials recorded further advance in April reaching a new high point since 1926. The trend of wholesale prices has been in an upward direction since February, 1933 and parity with the former base period of 1926 has been practically established. Dominion bond prices were steady in April, representing a yield of about 3 p.c. Bank deposits at the beginning of the month were \$3,816 million against \$3,533 million one month before. Increases were shown in each of the five main classes.

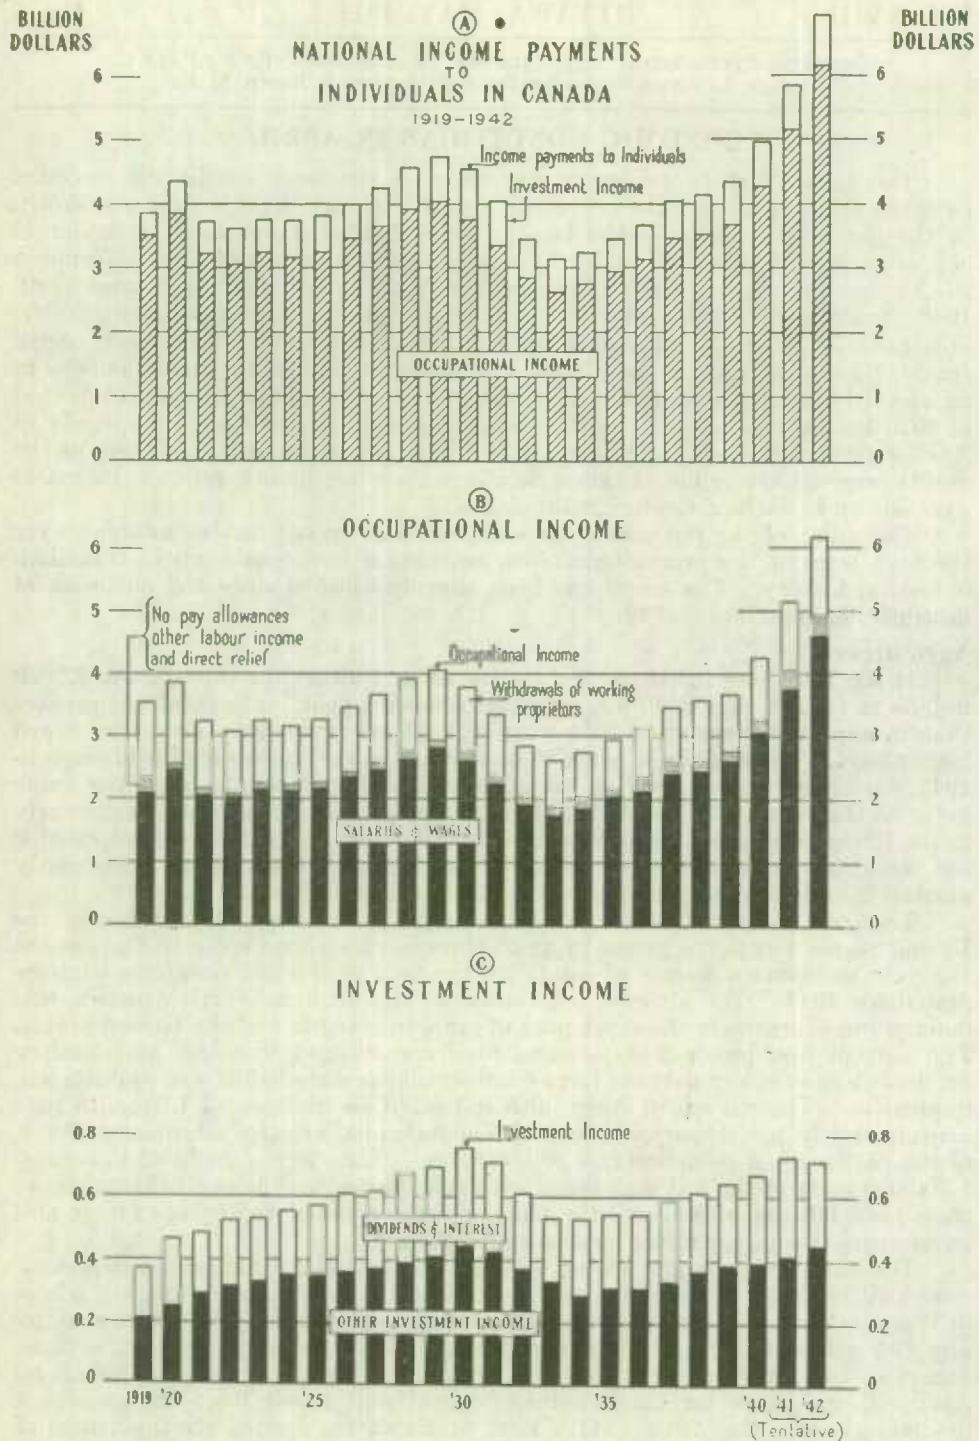

The index of the physical volume of business showed further advance over the high level of the preceding month, reaching a new maximum in Canadian industrial history. The trend has been sharply upward since the outbreak of hostilities in September, 1939.

Agriculture—

It was announced that the gross value of agricultural production was \$2,079 million in 1942, a gain of 45 p.c. over the preceding year. The total was greater than in any other year since 1919 when agriculture prices were on a very much higher level. The increase of more than \$460 million in the value of field crops in 1942 was chiefly responsible for the advance which occurred in the gross value between the years 1941 and 1942. Record yields of all grain crops, particularly in the Prairie Provinces, as well as a moderate increase in prices were responsible for the great expansion in the value of field crops. Gains were particularly marked in milk and poultry production and in farm animals.

The total supply of wheat and other grains is still large in Canada and the United States, but at the present rate of disappearance good crops will be needed this year to ensure a margin of safety for the food production programs contemplated for 1944. The growing population of livestock in North America was making huge inroads in the stock piles of grain in Canada and the United States. The current and prospective demand for livestock and livestock and poultry products was so heavy that the large continental harvest of 1942 now appears less impressive. The survey of April 30th indicated an increase of 13 p.c. in oats acreage and 16 p.c. in barley acreage. The indicated area for wheat was 79 p.c. of the 1942 level, a reduction of 4,500,000 acres. Oats were scheduled to occupy 1,700,000 acres of the soil thus made available, barley and flaxseed slightly more than 1,000,000 acres each and the balance was expected to go into forage and other crops, including mixed grains and soybeans.

The stock of Canadian wheat on May 6th was 414.5 million bushels compared with 432.3 million in the same period of 1942. The marketings of wheat in Western Canada including Durum, from August 1st to May 6th, were practically 194 million bushels compared with nearly 183 million bushels in the same period of the preceding crop year. The American government suspended, on April 30, quotas on certain imports of wheat and wheat flour fixed under a proclamation on May 28th, 1941. That proclamation limited the quantities of wheat and wheat flour which could be entered or withdrawn from warehouses for

consumption. The announcement of April 30th suspended the limitations effective at that time in so far as they applied to wheat and wheat flour purchased by the War Food Administrator or any agency designated by him. This enables the War Food Administrator to bring in surplus wheat from Canada and Australia to help fill livestock feed needs of farmers in deficient feed producing areas of Atlantic and Pacific coast states. The War Foods Administrator purchased about 7 million bushels of Canadian wheat for shipment to the United States when the Great Lakes facilities became available.

Under a new order of the Bacon Board, which is now in effect, the number of hogs that may be slaughtered in certain parts of Canada by those holding temporary permits from the Prices Board will be further restricted. The objective of this action is to secure the necessary quantities of bacon and pork products for export to Britain under the United Kingdom bacon pact. Farmers slaughtering hogs for consumption on their own farms only do not require slaughter permits and are not subject to the provisions of this new Order. The index of livestock marketings receded from 110.7 in March to 86.6 in April. A minor increase was shown in the index of sheep sales after seasonal adjustment. Cattle sales were 86,668 against 63,828 in March, and hog sales receded from 80,570 to 70,665.

Mining—

The production of Canada's eleven principal mineral products showed a reduction in the first two months of this year compared with the same period of 1942. Cement production receded from 582,756 barrels in the first two months of 1942 to 571,901. Coal production was 3,101,068 tons against 3,591,425 in the same period last year. The output of petroleum receded from 1,722,000 barrels to 1,641,000.

Manufacturing—

Flour-milling production, after seasonal adjustment, showed recession in the latest month for which statistics are available. The output was 2,193,000 barrels. Canadian mills turned out more wheat flour in March than during any month in the last 16½ years. Operations were at 91.2 p.c. of capacity constituting a new record for that particular month. The present high level is probably due to a large volume of export business although publication of the export statistics has been suspended as a wartime measure. During the first eight months of the current crop year, flour production was 15,592,000 barrels, being an increase of 2,306,000 barrels or 17 p.c. compared with a like period one year ago.

Operations in the dairy industry showed acceleration in April over the preceding month. The increase in the output of factory cheese was from 2,694,000 pounds to 5,442,000. Even after seasonal adjustment the index moved up from 172 to 209. The increase in creamery butter output was from 15.6 million pounds to 22.9 million. After seasonal adjustment, the gain in the index was from 147.3 to 148.8.

On and after May 10th all Cheddar cheese manufactured in Ontario and Quebec must be white and unwaxed, not less than 14½ inches in diameter and 75 pounds in weight under an order of the Dairy Products Board announced on April 30th. The purpose is to ensure that cheese produced is in line with British requirements for white, unwaxed cheese. Requirements for the British market for the year commencing April 1st are placed at 150 million pounds.

Operations in the Canadian cotton textile mills declined in April from March and were at the lowest level since 1939. It is understood that labour shortage has been the principal factor in the slowing of the mills. The openings in April were 38,611 bales of 500 pounds gross weight against 44,200 bales in the preceding month and 44,391 in April of last year.

The factors indicating the trend of forestry production showed recession in April. Newsprint production receded from 246,855 tons to 229,573. Apparent total consumption in the United States during April amounted to 327,431 tons

**Table A.—NATIONAL INCOME PAYMENTS TO INDIVIDUALS
IN CANADA**

1942 ⁽²⁾							6,861,480	

(i) Column G differs from 33B, page 26 in April Review, due to different treatment of "other labour income".

(2) Due to revision in process, the detail for 1941 and 1942 has been omitted.

(a) Salaries and wages were computed for each of the thirty industrial and service groups of the Canadian economy. The annual census in varied lines conducted by the Bureau was the main source of information. For government and financial groups, a compilation was made from public and company accounts. The decennial census was valuable in furnishing totals for the 1920-21 and 1930-31 periods for the remaining groups. Interpolation was effected by means of appropriate indexes or other relevant data. The indexes of employment and wage rates were of value in this connection. The numbers employed and average rates of remuneration were computed for each of the thirty groups, the product being regarded as the remuneration.

(b) Living allowances were computed for the so-called "no pays" in six of the industrial and service groups. The numbers were determined from decennial census reports for available years and interpolated by means of appropriate indexes for intercensal years. The board and lodging rates on farms as reported by crop correspondents were useful in determining the living allowances of unpaid agricultural labour. The so-called "no pays" form an important part of the personnel engaged in agriculture, forestry, fishing, education, professional and other service.

(c) Other labour income includes compensation for injuries in the steam and electric railway groups and various payments by government. The payments made by the Dominion Government embrace—(a) civil gratuities and compensation for injuries, (b) war gratuities, (c) dependents' allowances, (d) war veterans' allowances and (e) direct relief.

Allowances to mothers and deserted wives are paid by provincial governments, while compensation for injuries, hospitalization and pensions are provided through provincial Workmen's Compensation Boards. Mothers' Allowances were paid by municipalities in four provinces.

(d) Withdrawals of working proprietors were estimated for nineteen of the thirty groups of the national income classification. The numbers of employers and own accounts were obtained from the decennial census for the years 1921 and 1931. The national registration in 1940 was used as a guide for establishing the numbers in some industries pending the receipt of full information from the decennial census of 1941. The numbers for intercensal years were interpolated by the fluctuations in the number of establishments or smoothed number of employees.

Statistics of the rates obtained by managers in the same industrial and service groups were taken into consideration in arriving at the remuneration of working proprietors in census years. Other criteria were made available by the median age, conventional and American experience methods. Having established by means of this information a rate for each of the nineteen groups for the years 1920 and 1930, interpolation was effected for intercensal years by a smoothed version of employee rates. The product of the numbers by the rates was regarded as the withdrawals of working proprietors.

(e) The amount of net dividends and interest was obtained by a survey of company and public accounts. The total payment of dividends to individuals in Canada was determined for a considerable portion of the period through information furnished by the Income Tax Division of the Department of National Revenue. Dividends paid by public interest companies were raised to include the distribution by other companies. The receipts of dividends and interest by Canadian companies and other organizations were deducted from the payments leaving a record of the net distribution. Finally, the adverse balance of international payments on dividends and interest was deducted from the above-mentioned total to obtain the payments to individuals residing in Canada.

(f) Other investment income was computed for eleven of the thirty groups. Pensions were paid by steam and electric railways, telephone, banking, insurance, education and government. Interest on savings deposits distributed by banking, loan and mortgage and trust companies. Interest from insurance and annuity contracts was an important item in the operating accounts of the insurance group. Mortgage interest was computed in connection with the study of agriculture and real estate. Net rentals on residential property paid and imputed, and rental payments to individuals on commercial property were also reported under the heading of real estate.

which was 6,444 tons or 2 p.c. greater than in the same month last year. Shipments from Canada during the first four months of this year represented 71 p.c. of the total United States supply remaining unchanged from the same period a year ago. Newspaper advertising lineage in 52 United States cities increased 17·0 p.c. over April 1942, compared with a corresponding gain of 5·9 p.c. in March. The cumulative increase for the first four months over last year was 9·5 p.c.

Construction—

The new business obtained by the construction industry showed a gain less than normal for the season in April. The total was \$16·0 million against \$11·1 million in the preceding month, the index receding from 91 to 82. The amount represented a decline of \$6·5 million from the total for the same month last year, reflecting the wartime shortages of building materials and labour and government restrictions on construction. A heavy backlog of construction is accumulating due to these factors. The acute shortage of housing will be ameliorated in some degree by residential construction totalling \$8,812,800 in April, a drop of less than 4 p.c. from the same month of last year when placements were \$9·1 million. The heavy demand for housing plus the willingness of the construction controller to grant licences for low-cost housing units has served to keep the dollar volume up in this field despite material shortages.

Strikes and Lockouts—

Increased lost time through strikes and lockouts but a decline in the number of strikes was recorded in March. The statistics showed 28 strikes involving 17,008 workers with a loss of 30,683 man-working days as compared with 32 strikes in February involving 5,243 workers with a loss of 24,306 man-working days. In March, 1942, there were 18 strikes which involved 3,770 workers with a time loss of 3,191 man-working days. A sample poll of 33 Canadian plants indicates that absenteeism in January and February was between 7·6 and 8 per cent.

During the month of February United States investors continued to acquire Canadian bonds on a substantial scale and this was the principal factor in the month's net capital import of over \$15 million. Canada's trade in securities with the United States has been a most important influence in the country's exchange position. During the two months, January and February, of this year the net capital import from United States was \$26·6 million, compared in 1942 with \$109·1 million, a figure not far short of double the aggregate for 1940 and 1941. For the thirty-eight months to February, 1943, there was a net capital import from the United States of over \$202 million.

Total Dominion government expenditures during April amounted to \$169·5 million compared with \$240·3 million in the corresponding month of 1942. The decrease was more than accounted for by the \$80 million in the gift to Britain with no corresponding item this year. Total revenues for the month were \$177·8 million compared with \$170·8 million one year ago. The war expenditure in April amounted to nearly \$137 million compared with \$135 million in the same month last year. Interest on the public debt recorded an increase from \$12·4 million to \$14·3 million.

Tenders were accepted on April 29th for the full amount of \$55 million Dominion of Canada Treasury Bills due next July 30th. Average discount price of the accepted bids was 99·87573 and the average yield .499 p.c.

A 24·3 p.c. increase in Canada's national income occurred during the first quarter of this year compared with the same period of 1942. The increase was from \$1,700 million to \$2,112 million. The stimulus of war production is being regarded as the main influence. During the fiscal year ended March 31, the national income according to the tentative computation was \$7,878 million compared with \$6,793 million in the preceding fiscal year.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XVIII

OTTAWA, MAI 1943

N° 5

STATISTICIEN DU DOMINION: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

SITUATION ÉCONOMIQUE EN AVRIL

Les principaux facteurs indiquant la tendance de la situation économique s'améliorent en avril en regard du mois précédent. Il y a gain considérable du passif-dépôts des banques tandis qu'il y a augmentation générale de nature modérée des cinq autres facteurs de l'indice. Le cours des actions ordinaires augmente encore pour atteindre un nouveau point élevé depuis avril 1940. Les transactions boursières sont plus considérables que depuis longtemps. Le prix des matières industrielles augmente encore en avril pour toucher un nouveau point élevé depuis 1926. La tendance des prix de gros est à la hausse depuis février 1933 et la parité avec l'ancienne période de base de 1926 a été presque établie. Le cours des obligations du Dominion est ferme en avril, représentant un rendement de 3 p.c. environ. Les dépôts bancaires au commencement du mois sont de \$3,816,000,000 contre \$3,533,000,000 un mois auparavant.

Il y a augmentation de chacune des cinq principales classes.

L'indice du volume physique des affaires dépasse encore le haut niveau du mois précédent, touchant un nouveau maximum de l'histoire industrielle canadienne. La tendance a été vivement à la hausse depuis le déclenchement des hostilités en septembre 1939.

Agriculture

Il a été annoncé que la valeur brute de la production agricole est de \$2,079,000,000 en 1942, gain de 45 p.c. sur l'an dernier. Le total est supérieur à toute autre année depuis 1919 alors que les prix agricoles étaient beaucoup plus élevés. L'augmentation de plus de \$460,000,000 dans la valeur des grandes cultures en 1942 est principalement cause de l'augmentation de la valeur brute de 1941 à 1942. Des rendements sans précédent de toutes les céréales, particulièrement dans les Provinces des Prairies, ainsi qu'une augmentation modérée des prix sont causes d'une grande expansion de la valeur des grandes cultures. Il y a gain particulièrement marqué de la production de lait et de volaille et des animaux de ferme.

Les stocks globaux de blé et d'autres grains sont encore considérables au Canada et aux Etats-Unis, mais au taux actuel de disparition il faudra de bonnes récoltes cette année pour assurer une marge de sureté aux programmes de production alimentaire envisagés pour 1944. Le cheptel vif croissant en Amérique du Nord a grandement diminué les approvisionnements de grain au Canada et aux Etats-Unis. La demande courante et prévue pour le bétail et les produits animaux et de basse-cour a été si grande que la grande moisson continentale de 1942 paraît moins impressionnante maintenant. Le relevé du 30 avril indique une augmentation de 13 p.c. de la superficie en avoine et de 16 p.c. de celle en orge. La superficie indiquée en blé est à 79 p.c. du niveau de 1942, réduction de 4,500,000 acres. L'avoine doit occuper 1,700,000 acres de la terre ainsi libérée, l'orge et la graine de lin, un peu plus de 1,000,000 acres dans chaque cas et le reste doit être réservé au fourrage et autres cultures, y compris les grains mélangés et la fève de soja.

Les stocks de blé canadien le 6 mai sont de 414,500,000 boisseaux contre 432,300,000 en 1942. Les livraisons de blé, y compris le Durum, dans l'Ouest canadien, du 1er août au 6 mai, sont presque de 194,000,000 de boisseaux contre près de 183,000,000 la compagnie précédente. Le gouvernement américain a suspendu, le 30 avril, les quotas sur certaines importations de blé et de farine de blé déterminés par la proclamation du 28 mai 1941. Cette proclamation limitait les quantités de blé et de farine de blé qui pouvaient entrer en ou être retirées des entrepôts pour consommation. Le décret du 30 avril suspend les restrictions en vigueur à cette époque en tant qu'elles touchent le blé et la farine de blé achetés par l'Administrateur de l'Alimentation en Temps de Guerre ou par toute agence par lui désignée. Ceci permet à l'Administrateur de faire entrer l'excédent de blé du Canada ou de l'Australie pour aider à fournir de provende les

fermiers des régions qui ne produisent pas assez de provende dans les Etats de l'Atlantique et du Pacifique. L'Administrateur a acheté environ 7,000,000 de boisseaux de blé canadien pour expédition aux Etats-Unis lorsque le transport par les Grands Lacs est devenu possible.

D'après un nouveau décret de la Commission du Bacon, qui est maintenant en vigueur, le nombre de porcs qui peuvent être abattus en certaines parties du Canada par ceux qui détiennent des permis temporaires de la Commission des Prix sera encore restreint. L'objet de cette mesure est d'assurer les quantités nécessaires de bacon et de produits du porc pour exportation à l'Angleterre en vertu du pacte sur le bacon avec le Royaume-Uni. Les fermiers qui abattent des porcs pour consommation sur leurs fermes seulement n'ont pas besoin de permis d'abatage et ne sont pas sujets aux stipulations de cette nouvelle ordonnance. L'indice des ventes de bétail recule de 110.7 en mars à 86.6 en avril. Il y a une augmentation secondaire de l'indice des ventes de moutons après ajustement saisonnier. Les ventes de bêtes à cornes se chiffrent à 86,668 contre 63,828 en mars et les ventes de porcs diminuent de 80,670 à 70,665.

Mines

La production de onze principaux produits minéraux du Canada recule les deux premiers mois de l'année en regard de la période correspondante de 1942. La production de ciment baisse de 582,756 barils les deux premiers mois de 1942 à 571,901. La production de charbon est de 3,101,068 tonnes contre 3,591,425 la même période de l'an dernier. La production de pétrole diminue de 1,722,000 barils à 1,641,000.

Manufactures

La production de farine, après ajustement saisonnier, diminue le dernier mois de statistiques connues. La production est de 2,193,000 barils. Les moulins canadiens ont produit plus de farine de blé en mars qu'en tout autre mois des derniers 16½ ans. La minoterie a fonctionné à 91.2 p.c. de sa capacité, ce qui constitue un nouveau maximum pour ce mois particulier. Le haut niveau actuel est probablement dû au grand volume des exportations bien que la publication des statistiques de l'exportation soit suspendue comme mesure de temps de guerre. Les huit premiers mois de la présente campagne, la production de farine est de 15,592,000 barils, soit une augmentation de 2,306,000 barils ou de 17 p.c. sur la période correspondante de l'an dernier.

L'activité de l'industrie laitière s'accélère en avril. L'augmentation de la production de fromage de fabrique est de 2,694,000 livres à 5,442,000. Même après ajustement saisonnier, l'indice passe de 172 à 209. L'augmentation de la production de beurre de crème est de 15,600,000 livres à 22,900,000. Après ajustement saisonnier, le gain de l'indice est de 147.3 à 148.8.

Le et après le 10 mai tout le fromage cheddar fabriqué en Ontario et Québec doit être blanc et non ciré; il doit avoir pas moins de 14½ pouces de diamètre et peser 75 livres, d'après une ordonnance de la Commission des Produits Laitiers annoncée le 30 avril. L'objet de cette mesure est d'assurer que le fromage produit est conforme aux besoins britanniques de fromage blanc, non ciré. Les besoins du marché britannique pour l'année commençant le 1er avril sont fixés à 150,000,000 de livres.

L'activité des filatures de coton au Canada baisse en avril et est à son plus bas depuis 1939. Il semble que le manque de main-d'œuvre soit le principal facteur de cette situation. Les filatures ont employé en avril 38,611 balles de 500 livres (poids brut) contre 44,200 le mois précédent et 44,391 en avril 1942.

Les facteurs indiquant la tendance de la production forestière manifestent du recul en avril. La production de papier à journal tombe de 246,855 tonnes à 229,573. La consommation globale apparente aux Etats-Unis en avril est de 327,431 tonnes, soit 6,444 tonnes ou 2 p.c. de plus qu'en avril 1942. Les expéditions du Canada les quatre premiers mois de l'année représentent 71 p.c. de l'approvisionnement global des Etats-Unis, soit la même proportion que l'an dernier. Les lignes de publicité dans les journaux de 52 cités américaines augmentent de 17.0 p.c. sur avril 1942 et de 5.9 p.c. sur mars 1943. L'augmentation cumulative des quatre premiers mois est de 9.5 p.c. en regard de l'an dernier.

Construction

Les nouvelles entreprises de l'industrie de la construction montrent en avril un gain inférieur à la normale pour la saison. Le total est de \$16,000,000 contre 11,100,000 le mois précédent; l'indice recule de 91 à 82. Il y a déclin de \$6,500,000 sur avril 1942, ce qui reflète

la pénurie, due à la guerre, de matériaux de construction et de main-d'œuvre et les restrictions du gouvernement sur la construction. Ces facteurs causent une grande accumulation de contrats non remplis. Le manque aigu de logements sera atténué dans une certaine mesure par la construction de résidences au montant de \$8,812,800 en avril, soit une baisse de moins de 4 p.c. en regard de l'an dernier (\$9,100,000). Le grand besoin de logement et l'empressement du contrôleur de la construction à accorder des permis pour l'érection de logements à bas prix ont aidé à maintenir le volume-dollars dans ce domaine en dépit de la pénurie de matériaux.

Le trafic-marchandises des chemins de fer montre un gain secondaire, après ajustement saisonnier. Les chargements de wagons du mois sous revue sont de 280,052 contre 286,279 le mois précédent. L'indice, après ajustement saisonnier, avance de 143.7 à 144.0. Les chargements du mois correspondant de l'an dernier étaient de 272,934 wagons.

Commerce

Les ventes au détail sont en moyenne de 5 p.c. plus considérables en mars que l'an dernier et de 16 p.c. plus élevées qu'en février. L'indice non ajusté des ventes est à 151.3 contre 130.9 en février et 144.7 en mars 1942. L'indice est basé sur 1935-39 à 100.

Finance

Les dépôts à terme dans les banques à charte canadiennes s'élèvent à \$1,889,500,000 le 31 mars contre \$1,795,000,000 le 27 février, soit une augmentation de \$94,100,000 et près de \$1,550,000,000 de plus qu'au 31 mars 1942. Les prêts à demande se chiffrent à \$23,700,000 contre \$29,100,000 et \$33,500,000 l'an dernier. L'augmentation des valeurs gouvernementales et autres durant le mois est de \$308,500,000.

Grèves et contre-grèves

Mars voit plus de temps perdu, par suite de grèves et contre-grèves, mais un nombre moins élevé de grèves. Les statistiques montrent 28 grèves affectant 17,008 travailleurs avec une perte de 30,683 jours-homme contre 32 grèves en février, affectant 5,243 travailleurs avec une perte de 24,306 jours-homme. En mars 1942, il y a eu 18 grèves affectant 3,770 travailleurs avec une perte de 3,191 jours-homme. Un relevé échantillon de 33 usines canadiennes indique que l'absentéisme en janvier et février est de 7.6 à 8 p.c.

Vente internationale de valeurs mobilières

En février les capitalistes américains ont continué de façon marquée à acquérir des obligations canadiennes et c'est le principal facteur de l'importation nette de plus \$15,000,000 de capitaux durant le mois. Le commerce canadien en valeurs mobilières avec les Etats-Unis a été d'une influence très importante dans la situation du pays quant au change. En janvier et février de cette année l'importation nette de capitaux américains est de \$26,600,000 contre \$109,100,000 en 1942, ce qui n'est pas loin du double de l'ensemble de 1940 et 1941. Durant les trente-huit mois terminés avec février 1943, les capitaux nets venus des Etats-Unis s'élèvent à \$202,000,000.

Les dépenses globales du Gouvernement fédéral en avril sont de \$169,500,000 contre \$240,300,000 en avril 1942. La diminution est plus qu'expliquée par le \$80,000,000 de cadeau à l'Angleterre l'an dernier sans item correspondant cette année. Les recettes globales du mois sont de \$177,800,000 contre \$170,800,000 l'an dernier. Les dépenses de guerre en avril s'élèvent à près de \$137,000,000 contre \$135,000,000 le mois correspondant de l'an dernier. L'intérêt sur la dette publique augmente de \$12,400,000 à \$14,300,000.

Des soumissions ont été acceptées le 29 avril pour le montant intégral de \$55,000,000 en billets du Trésor du Dominion du Canada qui seront dus le 30 juillet. Le prix moyen d'escompte des offres acceptées est 99.87573 et le rendement moyen est de .499 p.c. Il y a augmentation de 24.3 p.c. dans le revenu national du Canada le premier trimestre de l'année en regard du trimestre correspondant de 1942. L'augmentation est de \$1,700,000,000 à \$2,112,000,000. Le stimulant de la production de guerre est regardé comme l'influence principale. En l'année fiscale terminée le 31 mars, le revenu national d'après un calcul préliminaire est de \$7,878,000,000 contre \$6,793,000,000 l'année fiscale précédente.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS, ISSUED DURING THE MONTH ENDED MAY, 16, 1943

Population.—Population No. A-4, British Columbia, racial origin (Eng. and French), 6 p. 10 cents. Population No. A-5, Saskatchewan, religion (Eng. and French) 6 p. 10 cents. Quebec, religion (Eng. and French) 15 p. 10 cents. Population No. A-2, Quebec, conjugal condition (Eng. and French) 14 p. 10 cents. Preliminary report on births, deaths and marriages in the second quarter of 1942 (Eng. and French) 6 p. \$1 per year. Households, occupations and earnings. No. 5, Families by size and composition (based on a 10 p.c. sample) (Eng. and French). Population No. A-8, Saskatchewan; school attendance and years of schooling (Eng. and French) 6 p.
