ECONOMIC CONDITIONS

"Economic Conditions" contains a review of developments in the elapsed portion of the current year as compared with the same period of 1942. The trend and fluctuations of more than fifty factors are traced from month to month. A table presents the cumulative results for the period from the beginning of each of the years 1943 and 1942, the percentage change being given. A bar chart illustrates the percentage alterations of the main factors indicating the trend of economic conditions.

The items are classified under the following headings:—general economic situation, farm products, mineral products, manufacturing, construction, electric power, internal trade, railways, employment, banking, Dominion finance and national income.

Occasional information is presented from time to time in regard to the results of research on national income. The supplementary articles along this line include a table with notes and several charts bearing upon one of the many phases of the topic.

The price of the publication is fifty cents per year. Applications should be made to the Dominion Statistician, Ottawa.

MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XVIII

OTTAWA, JUNE, 1943

No. 6

DOMINION STATISTICIAN: S. A. CUDMORE, M.A. (OXON.), F.S.S., F.R.S.C.
CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

ECONOMIC CONDITIONS IN MAY

The major factors indicating the trend of economic conditions recorded betterment in May over the high level of the preceding month. Five of the six fundamental factors recorded gains, while Dominion bond prices were maintained at the same level as in the preceding month. Further gains were shown in the deposit liabilities of the banks and in productive operations. Weekly prices of industrial materials averaged higher in May than in the preceding month. The speculative factors, including prices of common stocks and volume of trading recorded further advance in continuance of the trend in evidence since last August. The four classes of bank deposits aggregated \$3,984 million on April 30th against \$3,816 million one month before. The trend of bank deposits has been strongly upward since the outbreak of hostilities.

Adverse weather conditions interfered with seeding operations during April and May. It appears that the season was from a week to ten days late in the three Prairie Provinces. Heavy use of wheat as feed on farms is apparent, with the likelihood that 74 million bushels will be used for this purpose in the crop year ending July 31st, plus 11 million bushels of western wheat to be fed to livestock and poultry in the eastern provinces and in British Columbia. The increased use of wheat as feed raised Canada's estimate domestic requirements for the crop to 162 million bushels, a record for the Dominion. Plans for building up a reserve supply of feed grain in Eastern Canada to meet possible emergency needs of the winter were announced on June 9th. Grain which comes under the plan will be used only to meet emergency conditions. It is anticipated that feed requirements in Eastern Canada for western grain will undoubtedly be on a heavier scale during 1944.

As a temporary measure, Canadian ships have been restricted by the Canadian Shipping Board to carriage of wheat for British Government account until the immediate requirements have been filled.

A bonus of four cents a pound will be paid to Ontario wool producers by the Provincial Department of Agriculture on all wool meeting government specifications was announced on June 8th. Wool from Ontario producers only, graded at a government registered warehouse during the season in which the wool is shorn, is eligible for bonus. The Dominion Department of Agriculture will reimburse the Provincial Government for the bonus to the extent of 2 cents a pound.

Coal production showed contra-seasonal decline in May from the preceding month, the total having been 1,300,619 tons against 1,380,983 in April. Seven metals and minerals showed increased output during the first quarter of the year and four other commodities recorded declines. The output of cement was 1,009,234 barrels against 982,708 in the first quarter of 1942. The output of gold was 1,009,596 fine ounces against 1,220,497.

The production of plants engaged on war orders recorded further expansion in May over the preceding month. Some recession was shown in the output of wheat flour, the index in the latest month for which statistics are available receding from 198.6 to 189.5. The meat-packing industry recorded recession in activity in May, due allowance being made for seasonal tendencies. The general index for the output of the industry was 154.9 against 159.7 in April. Increases were shown in the slaughtering of cattle and hogs, but the gains were less than normal for the season. The increases in the output of dairy products were considerably below seasonal expectations. The output of factory cheese was 14.3 million pounds against 5.4 million in April. Creamery butter was produced to the extent of 32.0 million pounds against 22.9 million.

Canada's favourable trade balance in the first four months of 1943 recorded a betterment of more than \$126 million. The total imports in the four months were \$538·5 million, a decrease of roughly \$10 million from the same period of last year, while total exports were \$777·9 million or an increase of roughly \$117 million. The total trade for the four months amounted to \$1,322 million an increase of \$106 million, while the favourable balance of trade was shown at \$245·1 million.

An index of 95 common stocks on the base of 1935-39 was 83·9 in the last week of May compared with 82·6, the average for April. The standing in May, 1942, was 62·0. The advance in 68 industrials from May, 1942, to the last week of this year was from 57·9 to 77·8, a gain of more than 34 p.c. The rise in the index number of 19 utilities was from 66·4 to 106·6. Marked advances reflect the change from August, last to the present time, when an upward trend without important interruption has been in evidence. The mining stock index rose from 51·7 in May last year to 65·6 in the last week of May, marked gains having been shown in golds and base metals. An unofficial index of dividends was 122·7 in May against 120·9 in the same month last year. The standing in April last was 122·0. The index does not include the declarations of gold mining companies. It is designed, on the other hand, to measure the general trend of dividend payments by industrial, commercial, utility and banking companies, the average of 1926 equalling 100.

The sales of new ordinary life insurance in Canada and Newfoundland during the month of April totalled \$51,104,000. These sales, which are based upon the experience of 18 companies representing 86 p.e. of the business in force, are for new settled-for ordinary insurance, exclusive of increases, revivals, dividend additions, reinsurance acquired, pension bonds without insurance, annuities, group and wholesale business.

War risk insurance shows that a total of 27,232 risks have been assumed for an amount of \$1,960,928,414 in the nine provinces of Canada. The coverage in Quebec, Ontario and British Columbia account for a total of approximately \$1,624 million or nearly \$3 p.e. of the gross risk in the Dominion as a whole. The premiums paid amount to \$4,585,437.

The receipts of the Dominion Government in April and May were \$382·8 million compared with \$504·8 million. Due to timing considerable reduction was shown in income and excess profit taxes. Gains were shown in customs, excise and receipts at the post office department. Ordinary expenditures increased from \$66·3 million to \$84·1 million in the first two months of the present fiscal year. Special expenditures declined from \$563·3 million to \$409·9 million. The decline was mainly due to payments last year under the United Kingdom War Financing Act. No expenditures have yet been recorded under the Mutual Aid Plan of the present year. Since the beginning of the war, total United Kingdom expenditure in Canada on purchase and construction of plants was \$274 million. These plants were purchased by the Canadian Government and subject to final audit the purchase price is \$206,400,000 on which \$200 million has been paid. Still outstanding as British investments in Canada in connection with plants are \$56·6 million in recoverable loans, \$6,873,000, advances by the United Kingdom payments office and miscellaneous expenditures less \$2,457,000 transferred to the Canadian Government and \$6,360,000, balance owing to Canada on the purchase of British interests.

The Manitoba Government announced on May 31st the sale of a new issue of \$1,185,000 worth of $2\frac{3}{4}$ p.e. refunding debentures payable in U.S. funds, placed privately in the American market. The issue was made to meet provincial debentures in the same principal amount which fall due later in the year in the United States, a part of which were issued in 1928 at $4\frac{1}{2}$ p.e. and the remainder in 1941 at 3 p.e.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XVIII

OTTAWA, JUIN 1943

N° 6

STATISTICIEN DU DOMINION: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

SITUATION ÉCONOMIQUE EN MAI

Les principaux facteurs traçant l'orientation de la situation économique accusent une amélioration en mai comparativement au niveau élevé du mois précédent. Cinq des six facteurs fondamentaux laissent voir des gains, tandis que les obligations du Dominion se maintiennent au même niveau que le mois précédent. Les dépôts bancaires et la production augmentent encore. Les prix hebdomadaires des matières premières industrielles atteignent en mai une moyenne plus forte que celle du mois précédent. Les facteurs spéculatifs, comprenant le cours des actions ordinaires et le volume des transactions, accusent une nouvelle avance qui est la continuation de celle que l'on observe depuis août dernier. Les quatre catégories de dépôts bancaires se chiffrent à \$3,984,000,000 le 30 avril contre \$3,816,000,000 le mois précédent. Les dépôts bancaires ont une tendance à augmenter fortement depuis le déclenchement des hostilités.

La mauvaise température a mis obstacle aux semaines en avril et en mai. Il semble que la saison soit en retard d'une semaine à dix jours dans les trois Provinces des Prairies. Il est manifeste qu'il se fait une forte consommation de blé comme provende sur les fermes; il est probable que 74,000,000 de boisseaux seront utilisés à cette fin au cours de la campagne se terminant le 31 juillet, outre 11,000,000 de boisseaux de blé de l'Ouest qui seront donnés aux bestiaux et volailles dans les provinces de l'Est et de la Colombie Britannique. La consommation accrue du blé comme provende porte à 162,000,000 de boisseaux les besoins domestiques estimatifs du Canada au cours de la campagne; c'est un record pour le Dominion. Le 9 juin on a annoncé des projets en vue d'établir des réserves de grain à provende dans l'Est canadien afin de parer à la possibilité de besoins fortuits au cours de l'hiver. Le grain visé par les projets ne sera utilisé qu'en cas d'urgence. On prévoit que les besoins de grain de l'Ouest comme provende dans l'Est canadien seront sans doute plus considérables en 1944.

Comme mesure temporaire, la Commission canadienne de la marine marchande a imposé une restriction aux navires canadiens pour qu'ils transportent du blé pour le compte du Gouvernement britannique jusqu'à ce que les besoins immédiats aient été satisfaits.

Le Ministère de l'Agriculture de l'Ontario a annoncé le 8 juin qu'il payera aux producteurs de laine de la province une gratification de quatre cents la livre pour toute laine dont la qualité répond aux exigences établies par le Gouvernement. La gratification ne peut être accordée que pour la laine des producteurs ontariens, classée dans un entrepôt enregistré du Gouvernement. Le Ministère fédéral de l'Agriculture remboursera la gratification du gouvernement provincial jusqu'à concurrence de deux cents la livre.

Un appel a été lancé aux Canadiens en vue de diminuer leur consommation d'œufs; cette mesure a pour objet de remplir le programme d'expéditions d'œufs desséchés à la Grande-Bretagne.

La semaine du 7 mai, l'indice des prix de gros des produits de la ferme canadienne s'élève à 94·5 et excède sa clime antérieure de 92·5 atteinte en juillet 1937. L'indice se place à 94·4 à la fin du mois et accuse un gain de 1·9 en regard du niveau de la fin d'avril. L'indice du coût de la vie sur la ferme, sur la base 100 en 1935-1939, avance de 119·9 en août dernier à 121·3 en avril cette année. L'avance de 1·4 point ou de 1·2 p.c. dans l'indice du coût de la vie sur la ferme peut se comparer à une avance de 13·5 p.c. dans l'indice des prix de gros des produits de la ferme canadienne du mois d'août 1942 au mois d'avril 1943. L'indice régional du coût de la vie sur la ferme fait un gain de 1·7 p.c. dans l'Est et de 2·3 p.c. dans l'Ouest.

La production de charbon accuse un déclin hors de saison en mai comparativement au mois précédent; elle s'établit à 1,300,619 tonnes contre 1,380,983 en avril. La production de sept métaux et minéraux augmente durant le premier trimestre de l'année, tandis que celle de quatre autres diminue. La production de ciment s'élève à 1,009,234 barils en regard de 982,708 le premier trimestre de 1942. La production d'or est de 1,009,596 onces fines contre 1,220,497.

La production des établissements remplissant des commandes de guerre prend encore de l'expansion en mai comparativement au mois précédent. La production de farine de blé diminue un peu et l'indice du dernier mois où les statistiques sont connues recule de 198·6 à 189·5. La saison est moins active en mai, compte tenu des tendances saisonnières. L'indice général de la production de cette industrie se place à 154·9 comparativement à 159·7 en avril. Les abatages de bêtes à cornes et de porcs augmentent, mais les augmentations sont moins que normales pour la saison. Les augmentations de la fabrication de produits laitiers sont loin de répondre aux prévisions saisonnières. La production de fromage de fabrique s'élève à 14,300,000 livres contre 5,400,000 en avril. La production de beurre de crème s'établit à 32,000,000 de livres en regard de 22,900,000.

La production de chaussures s'élève à 2,482,769 paires le dernier mois dont les statistiques sont connues, à rapprocher de 2,691,485 le mois précédent. La consommation de coton par l'industrie textile s'élève à 15,752,000 livres comparativement à 15,900,000 le mois précédent. L'indice de la production de métaux non ferreux passe de 271·2 à 273·1.

L'annonce des livraisons à date donne une idée de l'ampleur de la production de guerre: 500 navires; 8,000 avions; 475,000 véhicules automobiles et 24,000 véhicules de combat; 55,000 barils ou montures de canons lourds et 630,000 armes portatives; 800,000 tonnes de produits chimiques et d'explosifs; \$160,000,000 d'instruments et de matériel de communications.

Les nouvelles entreprises dans l'industrie de la construction se chiffrent à \$23,486,900 comparativement à \$16,047,300 le mois précédent. L'indice, ajusté pour la saison et conformément aux fluctuations des prix, avance de 81·9 à 94·1. La construction d'habitations atteint le haut niveau de \$10,385,400 en dépit de la rareté de la main-d'œuvre et des matériaux et du coût élevé de la construction. Des contrats de construction d'habitations ont été accordés dans tout le pays, mais le volume de la construction de travaux de génie constitue également un important facteur dans le chiffre global du mois. Les adjudications se chiffrent à \$4,400,100, augmentation de \$2,480,300 comparativement à l'an dernier.

Les prêts approuvés en vertu de la loi nationale du logement et de la loi fédérale du logement, jusqu'au 31 décembre 1942, ont servi à financer la construction de 23,606 unités de logement. Le coût estimatif de la construction des maisons bâties en vertu de ces deux lois est de \$92,049,322 à venir jusqu'au 30 septembre 1942. Les frais d'administration de ces deux lois se placent à \$555,415 le 31 décembre 1942.

Le trafic-marchandises considérable des chemins de fer a eu pour résultat de restreindre l'avance de la première partie de 1942 comparativement au record de l'année courante. Le total des vingt-quatre premières semaines de 1943 est de 1,496,160 wagons, à rapprocher de 1,505,742 la même période de l'an dernier. Le volume du transport du grain et des dérivés du grain est considérable durant l'année courante; il y a également des augmentations pour le charbon, le bétail, le bois à pulpe et le coke. Les chargements de denrées diverses, consistant surtout en produits ouvrés, se chiffrent à 400,822 wagons contre 395,702 la même période de l'an dernier. Les chargements de bois d'œuvre, de pulpe et de papier déclinent considérablement.

Les recettes du chemin de fer Pacifique Canadien s'élèvent à \$111,533,000 au cours des cinq premiers mois de cette année, soit une augmentation de \$11,745,000 ou de 11·8 p.c. en regard des recettes de \$99,788,000 la même période de l'an dernier. Les recettes d'exploitation du Canadien National s'établissent à \$37,073,000 en mai contre \$29,668,000 le même mois de l'an dernier. Au cours des cinq premiers mois de cette année les recettes brutes des deux principaux chemins de fer s'élèvent à \$282,800,000, augmentation de \$45,300,000 ou de 19 p.c. par rapport à l'an dernier. Le total pour la même période de l'an dernier était de \$237,400,000 et constituait alors un maximum pour toute période semblable.

Le nombre de passagers transportés par les Lignes Aériennes Trans-Canada établit un nouveau record en avril. Le total du mois est de 11,537, augmentation de 2,722 ou de 30·9 p.c. en regard du même mois de l'an dernier. Durant les quatre premiers mois de cette année la compagnie transporte 39,889 passagers, augmentation de 43·6 p.c. par rapport aux 27,784 personnes transportées pendant la même période de 1942.

En avril les ventes de détail excèdent de 11 p.c. celles de mars et d'environ 8 p.c. celles d'avril l'an dernier. Les ventes des magasins généraux ruraux atteignent en avril une moyenne de 15 p.c. plus forte qu'en avril l'an dernier; l'indice se place à 140·8 contre 123 en avril 1942. Depuis le commencement de l'année les ventes sont en moyenne de 12·8 p.c. plus considérables que celles de la période correspondante de l'an dernier. Les ventes des épiceries en gros en avril laissent

voir une augmentation de 6 p.c. comparativement au même mois de 1942, mais une diminution de 7 p.c. en regard de mars; les indices généraux des quatre premiers mois de 1943 sont de 4 p.c. plus élevés que l'an dernier.

La balance commerciale favorable du Canada durant les quatre premiers mois de 1943 s'améliore de plus de \$126,000,000. Les importations des quatre mois se chiffrent à \$538,500,000, diminution d'à peu près \$10,000,000 en regard de la même période de l'an dernier, tandis que les exportations s'élèvent à \$777,900,000, augmentation d'environ \$117,000,000. Le commerce global des quatre mois s'établit à \$1,322,000,000, soit une augmentation de \$106,000,000, tandis que la balance favorable du commerce se place à \$245,100,000.

L'indice de 95 actions ordinaires (sur la base de 1935-1939) s'établit à 83·9 la dernière semaine de mai comparativement à la moyenne de 82·6 en avril. En mai 1942 l'indice se plaçait à 62·0. L'indice de 68 titres industriels avance de 57·9 en mai 1942 à 77·8 la dernière semaine de mai cette année, soit de 34 p.c. L'indice de 19 titres d'utilités passe de 66·4 à 106·6. Des avances marquées caractérisent les fluctuations du mois d'août dernier à l'époque actuelle et les titres se sont orientés à la hausse sans interruption importante. L'indice des valeurs minières passe de 51·7 en mai l'an dernier à 65·6 la dernière semaine de mai cette année; les titres d'or et de métaux communs laissent voir des gains marqués. L'indice officieux des paiements de dividendes s'établit à 122·7 en mai contre 120·9 le même mois de l'an dernier et 122·0 en avril dernier. Cet indice ne renferme pas les dividendes des compagnies minières d'or; il est destiné à mesurer l'orientation générale des paiements de dividendes par les industries, les compagnies commerciales, les utilités et les banques (la moyenne de 1926 égale 100).

Les ventes de nouvelles polices d'assurance-vie ordinaire au Canada et à Terre-Neuve se chiffrent à \$51,104,000 en avril. Ces ventes, basées sur l'expérience de 18 compagnies qui représentent 86 p.c. de toutes les assurances en vigueur, n'ont trait qu'aux nouvelles polices réglées d'assurance ordinaire et ne comprennent pas les augmentations, les remises en vigueur, les additions de dividendes, la réassurance acquise, les cautionnements de retraite sans assurance, les rentes viagères, l'assurance de groupe et l'assurance en bloc.

L'assurance contre les risques de guerre indique qu'un total de 27,232 risques ont été assumés pour un montant de \$1,960,928,414 dans les neuf provinces du Canada. L'ensemble des risques couverts dans le Québec, l'Ontario et la Colombie Britannique représente un total d'environ \$1,624,000,000 ou près de 83 p.c. du volume brut des risques dans l'ensemble du Dominion. Les primes payées se chiffrent à \$4,585,437.

Les recettes du Gouvernement fédéral en avril et en mai s'élèvent à \$382,800,000 contre \$504,800,000 l'an dernier. Vu le changement dans la période couverte par l'impôt sur le revenu et la taxe sur les surplus de bénéfices, la diminution est considérable. La douane, l'accise et les recettes du Ministère des Postes accusent des augmentations. Les dépenses ordinaires augmentent de \$66,300,000 à \$84,100,000 les deux premiers mois de l'année fiscale courante. Les dépenses spéciales déclinent de \$563,300,000 à \$409,900,000. Le déclin est principalement attribuable aux paiements l'an dernier en vertu de la loi du financement de la guerre du Royaume-Uni. Aucunes dépenses n'ont encore été faites en vertu du programme d'assistance mutuelle de l'année courante. Depuis le début des hostilités, les dépenses totales du Royaume-Uni au Canada pour l'achat et la construction de manufactures s'établissent à \$274,000,000. Ces manufactures ont été achetées par le Gouvernement canadien et, sujet à vérification définitive, le prix d'achat est de \$206,400,000 et \$200,000,000 ont déjà été versés. Il y a encore en cours, comme immobilisations britanniques au Canada dans les manufactures, \$56,600,000 de prêts recouvrables, des avances de \$6,873,000 par le bureau des paiements du Royaume-Uni et dépenses diverses, moins \$2,457,000 transférés au Gouvernement canadien et \$6,360,000 en balance due au Canada sur l'achat d'intérêts britanniques.

Le Gouvernement du Manitoba a annoncé le 31 mai la vente d'une nouvelle émission d'obligations de remboursement de \$1,185,000 à 2½ p.c., payables en fonds des Etats-Unis et placée privément sur le marché américain. L'émission a été lancée pour faire honneur à des obligations provinciales au même montant qui deviennent échues plus tard au cours de l'année aux Etats-Unis; une partie avait été émise en 1928 à 4½ p.c. et le reste en 1941 à 3 p.c.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS ISSUED DURING THE MONTH ENDING JUNE 16, 1943
