LIST OF PUBLICATIONS PUBLISHED BY THE BUSINESS STATISTICS BRANCH

The Monthly Review of Business Statistics.—A statistical summary with charts, text, and tables covering 1,400 factors on current economic conditions in Canada.

Special Supplements.—Twelve Years of the Economic Statistics of Canada, 1919-30; Monthly Indexes of the Physical Volume of Business in Canada, 1919-32; Original Monthly Statistics of Chief Economic Importance, 1919-33; Recent Economic Tendencies in Canada, 1919-34. Economic Fluctuations in Canada during the Post-war period.

Economic Conditions in Canada during Elapsed Months of Current Year.

Bank Debits.—Monthly and Annual Reports of Bank Debits to Individual Accounts at the Clearing-House Centres of Canada, Bank Clearings and the Equation of Exchange. Analysis of Bank Debits.

Annual Survey of Production, including:—

- (1) Primary Production: Agriculture, Forestry, Fisheries, Trapping, Mining and Electric Power.
- (2) Secondary Production: Manufactures, n.e.s., Custom and Repair and Construction.
- (3) Explanation of Method.

The National Income of Canada 1919-1938, Part I.

Economic Status, consisting of an outline of Canada's National Income, The Productive Sources of National Income, Income Payments to Individuals, and Personnel.

Commercial Failures.—Monthly and Annual Reports.

MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XVIII

OTTAWA, SEPTEMBER, 1943

No. 9

DOMINION STATISTICIAN: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

ECONOMIC CONDITIONS IN AUGUST

The factors indicating the trend of economic conditions averaged slightly lower in August than in the preceding month. The deposit liabilities of the chartered banks and the speculative factors including common stock prices and volume of trading on the stock exchanges showed minor reaction. Further gains were shown in the levels of business operations and wholesale prices. The index of the physical volume of business rose to a new high point in history, extending the advance in evidence since the outbreak of hostilities. The index of wholesale prices rose to a position slightly above par with the base period of 1926. Dominion bond prices were steady, the index of yields having been without change in the month under review.

Agriculture.

During the period from August 1 to September 9, the deliveries of wheat from farms in Western Canada were 20·7 million bushels against 8·5 million in the same period last year. The visible supply of wheat on September 9 was 383·7 million bushels against 399·8 million on the same date of 1942. Harvesting operations were delayed by unsettled weather but field work in the Prairie Provinces was general in the early weeks of September. Most of the grain was cut in Manitoba but a large percentage of threshing remained to be done even in the southern areas where the harvest was comparatively early. Wheat prices advanced on the Winnipeg Grain Exchange to the highest point in open market trading since 1937. Prices reached the mark of \$1.18 for the October future, a gain of 28 cents a bushel compared with a year ago. The first indication of higher prices came early in the season followed by a sharp upturn in July when the October future advanced to \$1.11 $\frac{1}{2}$, a new high point for the season. The price came to \$1.06 $\frac{1}{4}$, per bushel before the beginning of the new crop year on August 1. The advance after that time was steady with an increase of more than 7 cents per bushel in the ten days ended September 21.

First cheques for 1943 wheat acreage reduction payments, amounting to approximately \$7 million were mailed during the week ended September 17. About 183,000 farmers in the Prairie Provinces have filed claims for wheat acreage reduction payments this season. In 1942 more than 180,000 farmers in the three provinces were paid bonuses of approximately \$20 million.

The average protein content of 631 samples of the 1943 wheat crop was 13·9 per cent, one per cent higher than the average for samples collected last year from the same shipping points. Canadian wheat production in 1943 was estimated at 296 million bushels, the smallest crop since 1937. The estimated total, contained in the first Government estimate of the 1943 crop, represents only 50 per cent of the 1942 harvest as indicated by the third estimate of last year. The 1943 yield per acre, at 16·9 bushels, is slightly above the long-time average but compared with 1942, when a bumper yield was harvested, it is about 10·5 bushels an acre less for all classes of wheat. The production of oats and barley was placed at about 500 million and 223 million bushels, respectively. Farm cash income was placed at \$538 million during the first six months of the present year, a gain of 25 p.c. over the same period of 1942. For the full year of 1942, the estimate was \$1,083,000,000, exceeding all preceding records.

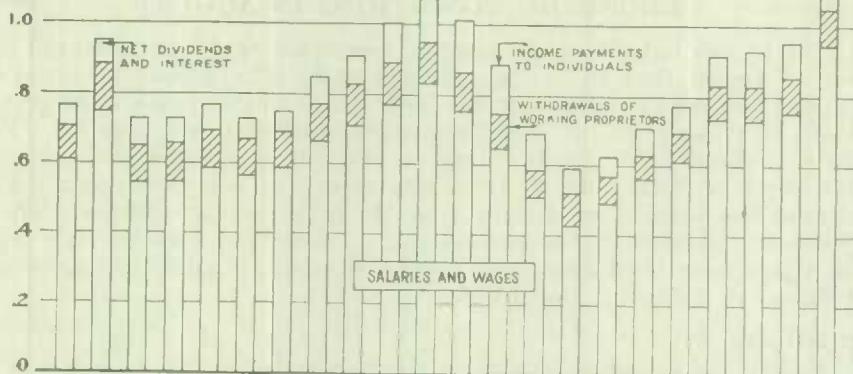

Forestry.

Canadian newsprint production was 259,612 tons in August and shipments amounted to 260,792 tons. While Canadian mills produced 186,986 tons less

in the first eight months of 1943, or a decrease of 8·7 p.c. below the first eight months of 1942, the United States output was off 14·4 p.c. Stocks of newsprint paper at the end of August totalled 56,156 tons at Canadian mills. Apparent consumption of newsprint by United States publishers showed in August a modest seasonal expansion over the July figure, but, for the first time since March, consumption ran slightly under a year ago, the figure being 292,132 tons, as compared with 300,389 tons in August of last year, a reduction of 2·7 per cent. A continued expansion in the Overseas export movement was an encouraging feature of the August newsprint statistics. The overseas shipment for the month showed an increase of 25·3 p.c. over the same period of last year.

Fisheries.

The total value of fish marketed in Canada last year was \$75 million compared with \$62 million in 1941. Sea fisheries contributed \$65 million or 88 p.c. of the total, and the inland fisheries \$9 million or 12 p.c. The salmon fisheries were by far the most important representing 31 p.c. of the total.

Mining.

Gold receipts at the Mint were 255,878 fine ozs. against 327,836 in the preceding month. Wartime restrictions have reduced the civilian use of four of the most important non-ferrous metals in Canada to well below 10 per cent of the total consumption. Under war conditions, Canadian production of non-ferrous metals has advanced greatly. Canada now ranks as the greatest base metal exporting country in the world and the output this year will be the greatest in the Dominion's history. The output of aluminum is six times that of 1939 and the Dominion is now supplying about 40 per cent of the war requirements of the United Nations. Some 96 per cent goes into direct war purposes and three per cent into indirect war requirements. Of the refined copper production, 88 per cent is allocated to direct war purposes and only 3 per cent for essential civilian use. Canada is now producing 95 per cent of the combined nickel output of the United Nations, 20 per cent of the zinc, 12½ per cent of the copper, 15 per cent of the lead, 75 per cent of the asbestos and 20 per cent of the mercury. The latest data to hand on coal production and supplies reveal no definite improvement in the general domestic picture, which is one of reduced supplies against increased requirements. Employment returns show a continued decline in the number of men engaged in coal mining, the figure being 24,389 in July as compared with 24,429 at the beginning of June. The total employed dropped 5 p.c. from a year ago, while tonnage produced fell 9 p.c.

Manufacturing.

It was announced on September 9 that 1,100,000 workers were turning out munitions at the rate of \$55 million per week. In the twelve months ended September 1, expenditures on war production and construction totalled \$3,094,000,000. This amount does not include foods, timber and other mineral production for war purposes since they are not included in the contracts placed by the Munitions Department. Referring to the more than \$800 million spent on new plants and equipment during the four war years, it was stated that the country has undergone an industrial transformation which, under normal circumstances, could not have taken place in less than 25 years.

The operations of the flour-milling industries were practically maintained in August as compared with the preceding month. The release of tobacco was at a considerably higher level. The cigarettes made available were 919 million against 821 million in the preceding month. The release of cigars receded from 15·1 million to 14·2 million. The slaughtering of hogs showed considerable reduction. The index of operations in the meat packing industry receded from 167 to 159·5. The dairy industry was slightly more active after seasonal

NOTES ON TABLE A—

Secondary production embraces construction, manufacturing n.e.s., and custom and repair. Construction covers operations of general contractors and sub-contractors as reported in recent years by the Bureau. The statistics of contracts awarded were useful in estimating the gross revenues in the period from 1919 to 1933. The work performed directly by Dominion, Provincial and Municipal authorities was excluded, thus avoiding duplication with the totals shown elsewhere for the government group.

Manufacturing production n.e.s. is exclusive of processing activities closely connected with several primary industries. Saw-milling, and pulp and paper operations are included with forestry, fish canning and curing as a part of the fisheries industry, while smelting, cement, clay products, lime and salt are treated along with mining. The eight industries, for the purpose of avoiding duplication, are excluded from manufactures n.e.s.

(b) *Salaries and Wages*.—The remuneration of employees was the main type of payment originating in secondary production. It accounted for 85.2 p.c. of occupational income and 77.7 p.c. of the total income payments during the first eleven years of the period. The percentage to the occupational income rose slightly to 88.1 p.c. in the last eleven years while the proportion to income payments remained unchanged at 77.7 p.c.

The trend of salaries and wages in the 22-year period is shown in Section 1 while the numbers of employees on a full-time basis are depicted in Section 3 of the chart on page 4.

Salaries and wages averaged about \$653,000,000 in the 22 years, compared with total occupational income of \$754,000,000 and income payments of \$840,000,000.

Statistics of salaries and wages in manufactures n.e.s. were obtained directly from annual census reports, payments by the eight duplicated industries being deducted. Remuneration of employees in the construction industry were obtained as the product of the numbers, by rates, computed for the purpose. The decennial census presented data for 1930-31 and results for 1920 were estimated from available information. Interpolation of numbers was effected by means of indexes of employment and of the volume of construction, and of rates by the index for the building trades as published in the Labour Gazette.

Salaries and wages for the custom and repair group were determined for 1930 from information given by the decennial census. The data collected in connection with the annual census from 1919 to 1921 was also of interest in establishing relationships between different accounts and supplying links which would otherwise have been missing.

(c) *Withdrawals of Working Proprietors*.—Withdrawals, signifying the remuneration of employers, independent operators and own accountants, for management and work performed, were relatively more steady in the secondary production group than salaries and wages. An upward trend was shown in withdrawals for manufactures n.e.s. during the period from 1919 to 1941, while the trend for construction was adverse. The estimated number of working proprietors engaged in the major group averaged 84,058 in the first half of the period and 76,585 in the last half.

The number of working proprietors in manufactures n.e.s. was taken directly from the decennial census of 1921 and 1931. The margin of the withdrawal rate over the salary-wage rate was determined through the use of census data and American experience. A smoothed version of wage rates was used to interpolate the remuneration rate for working proprietors in intercensal years. The numbers were interpolated according to the number of establishments and the withdrawals of working proprietors engaged in construction for the period from 1919 to 1933 were the products of computed numbers and rates. Numbers for 1921 and 1931 were reported by the decennial census and interpolation was affected by means of an average of the indexes of volume and employment. The annual rates were placed at \$1,835 in 1920 and \$994 in 1930 and the intervening years were estimated according to the index of the Department of Labour.

(d) and (e) Net dividends and interest paid to individuals and external holders of securities were computed by an examination of a sample of the annual income statements of the large concerns engaged in the group. The receipts of corporations in the form of dividends and bond interest were deducted. The dividend payments were considerably increased for the purpose of covering the private interest companies for which no statistics were available.

(f) and (g) The addition of occupational and investment income gives the total income payments to individuals originating in the major group. Deducting these totals from the income originating, the positive or negative savings were obtained. The results were verified in trend by the examination of company accounts.

adjustment. The raw cotton consumption by the textile industry showed some reduction. The total was practically 14 million lbs. against 14·3 million in the preceding month. A decline of some 13·4 p.c. was recorded in bale openings as compared with that of 1942, 33,869 bales being opened in Canadian mills, as compared with 39,105 bales in August of last year.

It is anticipated that Canada's steel output this year will be double the 1939 production. Under the spur of war requirements the Dominion now has become the fourth greatest steel producer in the world, exceeded only by the United States, Russia and Great Britain. By the end of the year Canadian mills will be producing steel ingots at a rate of more than 3 million tons a year compared with 1½ million in 1939. The production of alloy steel amounted to five times that of 1939.

Construction.

Contracts awarded amounted to \$23·9 million in August against \$16·2 million in the preceding month. Reduction in the number of construction licences will further increase construction that may become an important factor in post-war employment. While licences from the construction control have been required primarily to conserve materials that are in short supply, the restrictions are having the effect of postponing many building programs until after the war.

Railway.

The railway revenue freight loaded on cars amounted to 8,721,000 tons in August as compared with 8,701,000 tons in the preceding month. Carloadings in August were 302,000 as compared with 293,000 in July. Substantial increases in both gross and net revenues were reported by the Canadian National Railways for the month of August, augmenting the margin of improvement for the elapsed portion of the year. The gross for the month increased by \$5,268,000 to \$39,687,000 as compared with the peak of \$39,832,000 in July. For the first eight months of 1943, operating revenues of the Canadian National Railways totalled \$290,003,000, which is \$53,036,000 more than reported for the similar period last year. An increase of \$1,331,000 or 29·9 p.c. is reported by the Canadian Pacific Railway Company in gross earnings for the week ended September 7 as compared with the corresponding period of last year. Total in the latest week was \$5,786,000 as against \$4,455,000 a year ago.

Trade.

Retail sales in July averaged eight per cent higher than in the corresponding month last year but were seven per cent lower than in June. During the seven months ended July, sales averaged five per cent heavier than in the corresponding period of 1942. The dollar value of wholesale trade in July averaged 13 per cent higher than in the corresponding period of last year.

Finance.

It was announced that the sale of the Fifth Victory Loan amounting to \$1,200,000,000 would commence on October 18. Principal expansion in Federal expenditures continues to be on war account. At the end of August last year the one billion dollar gift to the Britain fund had been drawn upon by the amount of \$572·5 million, but the one billion dollar United Nations Mutual Aid Fund was charged with only \$192·2 million during the corresponding period of this year.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. XVIII

OTTAWA, SEPTEMBRE, 1943

N° 9

STATISTICIEN DU DOMINION: S. A. CUDMORE, M. A. (OXON.), F.S.S., F.R.S.C.
CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

SITUATION ÉCONOMIQUE EN AOÛT

Les facteurs traçant l'orientation de la situation économique atteignent en août une moyenne un peu plus faible que le mois précédent. Les dépôts aux banques à charte diminuent légèrement et les facteurs spéculatifs, qui comprennent le cours des actions ordinaires et le volume des transactions boursières, laissent voir un faible recul. Les opérations commerciales s'accélèrent et les prix de gros montent encore. L'indice du volume physique des affaires atteint une nouvelle cime dans l'histoire et accentue l'avance qu'il affiche depuis le déclenchement des hostilités. L'indice des prix de gros touche un niveau qui excède légèrement la période de base de 1926. Les obligations du Dominion sont stables et l'indice du rendement n'offre pas de changement en août.

Agriculture

Du 1er août au 9 septembre les fermiers de l'Ouest canadien livrent 20,700,000 boisseaux de blé, à rapprocher de 8,500,000 la même période de l'an dernier. Les approvisionnements visibles de blé se placent à 383,700,000 boisseaux le 9 septembre, comparativement à 399,800,000 la même date de 1942. Le temps variable a retardé la moisson, mais dans les Provinces des Prairies les travaux des champs étaient généraux les premières semaines de septembre. La majeure partie du grain était fauchée au Manitoba, mais il restait une bonne partie du battage à faire même dans les régions du sud où la moisson a été relativement hâtive. À la Bourse des grains de Winnipeg les cours du blé ont atteint leur plus haut point sur le marché libre depuis 1937. Le prix s'est élevé à \$1.18 pour livraison en octobre, soit une hausse de 28 cents le boisseau comparativement à l'an dernier. Le premier indice de la hausse des prix s'est manifesté au début de la saison; une brusque augmentation est survenue en juillet alors que le prix pour livraison en octobre est monté à \$1.11 $\frac{1}{2}$, nouvelle cime pour la saison. Le prix a reculé à \$1.06 $\frac{1}{4}$ le boisseau avant la fin de la nouvelle campagne le 1er août. Après cette date l'avance a été continue et la hausse a dépassé 7 cents le boisseau dans les dix jours terminés le 21 septembre.

Les premiers chèques en paiement des primes sur la diminution des emblavures de blé en 1943, se chiffrant à environ \$7,000,000, ont été envoyés la semaine terminée le 17 septembre. Environ 183,000 fermiers ont réclamé des primes pour la diminution de leurs emblavures de blé au cours de la saison. En 1942, plus de 180,000 fermiers des trois provinces ont touché des primes d'environ \$20,000,000.

La teneur moyenne en protéine de 631 échantillons de la récolte de blé de 1943 a été de 13.9 p.c., soit 1 p.c. de plus que la moyenne pour les échantillons recueillis l'an dernier des mêmes points d'expédition. La production canadienne de blé en 1943 est estimée à 296,000,000 de boisseaux; c'est la plus faible récolte depuis 1937. La première estimation officielle de la récolte de 1943 ne représente que 50 p.c. de la troisième estimation de la récolte de l'an dernier. Le rendement de 16.9 boisseaux à l'acre en 1943 excède légèrement la moyenne à long terme mais en regard de 1942, alors que le rendement a été unique en son genre, il est d'environ 10.5 boisseaux de moins à l'acre pour toutes les catégories de blé. La production d'avoine et d'orge est placée à environ 500,000,000 et 223,000,000 de boisseaux respectivement. Le revenu en espèces des fermiers est placé à \$538,000,000 au cours du premier semestre de l'année courante, augmentation de 25 p.c. par rapport à la même période de 1942; le revenu de toute l'année 1942 est estimé à \$1,083,000,000 et excède tous les précédents.

Industrie forestière

La production canadienne de papier à journal en août s'élève à 259,612 tonnes, tandis que les expéditions se placent à 260,792 tonnes. Alors que les moulins canadiens durant les huit premiers mois de 1942 produisent 186,986 tonnes (8.7 p.c.) de moins que la période correspon-

dante de 1942, la production des Etats-Unis diminue de 14·4 p.c. Les stocks de papier à journal à la fin d'août s'élèvent à 56,156 tonnes dans les moulins canadiens. La consommation apparente de papier à journal par les éditeurs des Etats-Unis accuse en août une faible augmentation saisonnière comparativement à juillet; mais pour la première fois depuis mars la consommation est un peu inférieure à celle de l'an dernier, soit 292,132 tonnes contre 300,389 tonnes en août l'an dernier, diminution de 2·7 p.c. L'augmentation continue des expéditions outre-mer est une caractéristique encourageante des statistiques du papier à journal en août. Les expéditions outre-mer pendant le mois accusent une augmentation de 25·3 p.c. par rapport à l'an dernier.

Pêcheries

Le poisson mis sur le marché au Canada l'an dernier a une valeur totale de \$75,000,000 contre \$62,000,000 en 1941. Les pêcheries maritimes contribuent \$65,000,000 ou 88 p.c. du total et les pêcheries intérieures, \$9,000,000 ou 12 p.c. La pêche au saumon est de beaucoup la plus importante et rapporte 31 p.c. du total.

Industrie minière

Les arrivages d'or à la Monnaie s'établissent à 255,878 onces fines en août contre 327,836 le mois précédent. Les restrictions de temps de guerre ont réduit la consommation civile de quatre des plus importants métaux non ferreux au Canada bien au-dessous de 10 p.c. de la consommation totale. A la faveur de la guerre la production canadienne des métaux non ferreux a grandement augmenté. Le Canada est maintenant le plus grand pays exportateur de métaux communs au monde et la production de cette année sera la plus considérable dans l'histoire du Dominion. La production d'aluminium est six fois celle de 1939, et le Dominion fournit maintenant environ 40 p.c. des besoins de guerre des Nations Unies. Environ 96 p.c. servent directement aux fins de guerre et 3 p.c. indirectement. De la production de cuivre affiné, 88 p.c. sont assignés directement aux fins de guerre et 3 p.c. seulement à la consommation civile essentielle. Le Canada produit maintenant 95 p.c. de tout le nickel des Nations Unies, 20 p.c. du zinc, 12½ p.c. du cuivre, 15 p.c. du plomb, 75 p.c. de l'amiant et 20 p.c. du mercure. Les dernières données sur la production et les approvisionnements de charbon ne révèlent aucune amélioration définie dans la situation générale au pays, qui se traduit par une diminution des approvisionnements au regard d'une augmentation des besoins. Les rapports sur l'emploi indiquent un déclin continu du nombre d'hommes travaillant dans les mines de charbon, soit 24,389 en juillet contre 24,429 au début de juin. Le nombre d'employés laisse voir une diminution de 5 p.c. par rapport à l'an dernier, tandis que la production décline de 9 p.c.

Industrie manufacturière

Il a été annoncé le 9 septembre que 1,100,000 ouvriers produisaient des munitions au taux de \$55,000,000 par semaine. Au cours des douze mois terminés le 1er septembre, les dépenses pour la production et la construction de guerre s'élèvent à \$3,094,000,000. Ce montant ne comprend pas les aliments, le bois et la production minérale pour fins de guerre, puisque ces produits ne sont pas inclus dans les contrats placés par le Ministère des Munitions. Au sujet des dépenses de plus de \$800,000,000 en nouvelles usines et machinerie au cours des quatre premières années de guerre, on a déclaré que le pays avait subi une transformation industrielle qui, en des conditions normales, n'aurait pu se produire en moins de 25 ans.

En août la production de la minoterie se maintient à peu près au même point que le mois précédent. Les dédouanements de tabac sont beaucoup plus considérables. Les dédouanements de cigarettes se chiffrent à 919,000,000 contre 821,000,000 le mois précédent. Les dédouanements de cigares diminuent de 15,100,000 à 14,200,000. Les abattages de porcs diminuent considérablement. L'indice des opérations de la salaison recule de 167 à 159·5. L'industrie laitière est un peu plus active après ajustement saisonnier. La consommation de coton brut par l'industrie textile diminue légèrement; le total est d'à peu près 14,000,000 de livres contre 14,300,000 le mois précédent. Le nombre de balles ouvertes accuse un déclin d'environ 13·4 p.c. comparativement à 1942, soit 33,869 balles contre 39,105 en août l'an dernier.

On s'attend que la production canadienne d'acier cette année soit le double de celle de 1939. Sous l'aiguillon de la guerre, le Dominion est maintenant le quatrième plus grand producteur

d'acier au monde et n'est dépassé que par les Etats-Unis, la Russie et la Grande-Bretagne. Vers la fin de l'année les aciéries canadiennes produiront des lingots d'acier au rythme de plus de 3,000,000 de tonnes par année comparativement à 1,500,000 en 1939. La production d'alliages d'acier est cinq fois celle de 1939.

Construction

Les contrats adjugés en août se chiffrent à \$23,900,000 contre \$16,200,000 le mois précédent. La diminution du nombre des permis de construction augmentera d'autant la construction qui peut devenir un facteur important dans l'emploi après la guerre. Alors que les permis émis par la régie de la construction ont été exigés principalement pour conserver les matériaux qui sont rares, les restrictions ont pour effet de remettre après la fin de la guerre plusieurs programmes de construction.

Chemins de fer

Les chargements de wagons de marchandises payantes s'établissent à 8,721,000 tonnes en août, à rapprocher de 8,701,000 tonnes le mois précédent. Les chargements s'élèvent à 302,000 wagons en août contre 293,000 en juillet. Les recettes brutes et les recettes nettes des Chemins de fer Nationaux du Canada laissent voir des augmentations sensibles en août et accentuent la marge d'amélioration pour la partie écoulée de l'année. Les recettes brutes pour le mois augmentent de \$5,268,000 et s'élèvent à \$39,687,000. Au cours des huit premiers mois de 1943, les recettes d'exploitation des Chemins de fer Nationaux du Canada atteignent un total de \$290,003,000, soit \$53,036,000 de plus que pour la période semblable l'an dernier. Les recettes brutes du chemin de fer Pacifique Canadien augmentent de \$1,331,000 ou de 29.9 p.c. la semaine terminée le 7 septembre comparativement à la période correspondante de l'an dernier; le total au cours de la semaine est de \$5,786,000 en regard de \$4,455,000 l'an dernier.

Commerce

Les ventes de détail en juillet excèdent de 8 p.c. celles du mois correspondant de l'an dernier, mais elles sont de 7 p.c. moins considérables que celles de juin. Les ventes des sept mois terminés en juillet atteignent une moyenne de 5 p.c. plus forte qu'au cours de la période correspondante de 1942. En juillet la valeur du commerce de gros est en moyenne de 13 p.c. plus considérable que celle de la période correspondante de l'an dernier.

Finance

Il a été annoncé que le cinquième emprunt de la Victoire, au montant de \$1,200,000,000, serait lancé le 18 octobre. La principale augmentation des dépenses fédérales continue d'être celles de guerre. A la fin d'août l'an dernier il avait été prélevé \$572,500,000 à même le don d'un milliard de dollars à la Grande-Bretagne, mais au cours de la période correspondante de cette année il a été déboursé \$192,200,000 seulement à même le fonds d'un milliard de dollars pour venir en aide aux Nations Unies.

BUREAU FÉDÉRAL DE LA STATISTIQUE,

30 septembre 1943.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS ISSUED DURING THE MONTH ENDING SEPTEMBER 16, 1943
