# Special Survey Operations

The Special Surveys Division of the Bureau of Statistics as its basic function conducts the sampling operations and compiles the quarterly estimates of the Canadian civilian labour force. A discussion of the methods used, the results obtained and the uses to which these are put appeared in the April, 1948, issue of the *Canadian Statistical Review*. The Division, however, also conducts periodic special surveys to obtain statistics on topics of current interest and it is these collateral operations of the Division which will be discussed in this article. Since these subsidiary surveys are usually made in conjunction with the labour force survey and from the same sample, some preliminary discussion of the major survey and the sample used are necessary.

The need for up-to-date information on the state of employment and unemployment in Canada had long been recognized by provincial and federal government departments, by labour unions and by various employer groups. One of the post-war projects for improved statistics was the institution of the labour force survey. It was obviously impossible to do a complete count of the population as is done in the decennial census. The time required to process such a large amount of information into intelligible data would make the statistics obsolete before they were available for use. In addition, the purpose for which the information was required did not demand the high degree of accuracy assured by an actual count. These conditions indicated the desirability of a sampling technique which would provide estimates within known limits of accuracy, at a minimum of expense, time and inconvenience to the public. It was to meet these conditions that the labour force sample was designed and the first survey conducted in the fall of 1945.

## Sample Design

Since the primary purpose of the sample was to provide data on the labour force, that sample design which would most efficiently supply this had to be chosen. It was determined that the method known as "area sampling", essentially the enumeration of all individuals residing in randomly selected areas, offered the greatest advantages.

The first problem was to decide what size of sample would be large enough to give the needed precision and at the same time small enough to permit ease of administration, prompt tabulation and publication of results, with reasonable cost. It was decided that a sample covering one per cent of the households would meet these conditions satisfactorily, and in addition be large enough to provide reliable information on topics other than the labour force for which it was primarily intended.

A degree of geographic concentration had to be determined that would keep both the cost of enumeration and the variance of results at a minimum. The final sample design incorporated varying degrees of concentration depending on the locality. The country was divided into two major categories; (1) cities with a population of 30,000 or over in the 1941 census and; (2) rural areas and urban places of less than 30,000 persons. Each city of 30,000 or over was declared a primary sampling unit. Then the selected area of each province outside these cities was divided into primary sampling units, which were later stratified on the basis of similarity of industrial, agricultural or population characteristics. Because of inaccessibility and high cost of enumeration, certain remote areas and Indian reservations were excluded from the sample. These areas contain about two per cent of the population and the labour force estimates are not considered to include them. With this exception all members of the population have an equal chance of inclusion.

The primary sampling units were constructed so as to be as heterogeneous as possible. After stratification, one primary sampling unit was chosen by random selection from each stratum to represent that particular group. The next stage in geographic concentration was to select certain segments for enumeration within each primary sampling unit that had fallen into the sample. It was decided to use 1941 census sub-districts for segments since they were the smallest areas for which 1941 population figures were available.

Since each primary sampling unit was originally constructed to contain as many different types of areas as possible, it is easily seen that a

purely random selection of segments to be enumerated within a primary sampling unit might result in the omission of some population characteristics and the over representation of others. To avoid this possibility, substratification was introduced, each substrata consisting of segments having similar urban, rural farm or rural non-farm characteristics.

Within each substratum segments were selected within which enumeration was to be concentrated and within the segments individual households were chosen to yield a one per cent sample. In rural areas where the distance between households was great segments were frequently divided into smaller areas called clusters before individual households were selected. At all stages selection of units for enumeration was made at random.

In the metropolitan areas of 30,000 or over city directories were used in the setting up of sample blocks from which those to be enumerated were chosen.

The household is the ultimate unit of enumeration. One-quarter of the households enumerated are dropped from the sample after each quarterly survey and replaced by others in the same district. Thus no household is enumerated more than four times. Respondent resistance is in this way kept to a minimum and at the same time the continuity of the estimates is maintained.

One of the benefits of area sampling is that it automatically reflects movements of population. For example, since one per cent of the urban and one per cent of the rural areas are drawn at random, a shift of population from country to city or vice versa will be recorded by the enumerators covering the sample.

### ***The Labour Force Surveys***

The labour force survey gathers quarterly information on the activity of the non-institutional civilian population 14 years of age or older during a specified week. This population is divided into two broad groups: those within labour force and those outside of it. The latter group is classified according to whether its members' major activity was keeping house, going to school or college, retired or voluntarily idle, too old, or permanently unable to work. A further sub-division indicates the region of residence, the sex and age group of the non-workers.

Those persons within the labour force are classified as employed (including those who had a job or business but for one reason or another were not at work during the survey period) and the unemployed. Estimates of the employed are given by region, sex, age, hours worked, industry, occupation, and occupational status. Special estimates are also made of the marital status of employed women and the number of women employed in domestic service.

Estimates of unemployment are given by region, sex, age and length of unemployment.

### ***Housing Surveys***

Each month the housing section of the Special Surveys Division of the Bureau carries out, with the co-operation of the Central Mortgage and Housing Corporation, a Dominion wide survey of residential construction. In this survey the Central Mortgage and Housing Corporation by actual count determines each month the number of dwelling units on which construction has been started and the number completed in all cities and towns having a population of 5,000 or more. The data thus gathered is turned over to the Bureau by the corporation for compilation. Simultaneously the Bureau of Statistics, using as a base a sample completely independent from that used for the labour force and other surveys, estimates the "starts" and "completions" in the rural and smaller urban areas.

The material obtained from the corporation's count and the Bureau's estimate forms the basis on which is founded the Bureau's monthly report on housing construction.

Several other aspects of the housing conditions of the population of Canada have been surveyed by the Special Surveys Division. Almost immediately after the war's end a survey was made of the doubling up of families in single dwelling units. Further, households were classified by the number of rooms and the number of persons occupying them, thus revealing the density of occupation as well as the incidence of overcrowding.

More recently a continuing survey of rents has been undertaken in order to provide up-to-date and accurate data for this component of the cost-of-living index. A survey was also made of landlords and mortgages to provide

the basis for estimates for what had hitherto been a gap in the national accounts of income and expenditure.

### Typical Special Surveys

At the request of the Department of Agriculture a survey was made in June, 1947, to determine the frequency of fires and non-fatal accidents on Canadian farms. The survey revealed, among other things, that farm accidents caused over a million man-days loss of time from productive work and that the incidence of accidents on farms was most heavy during the month of May.

Again at the request of the Department of Agriculture a survey was undertaken in certain parts of the country to determine the use and availability of apples and apple products such as canned apple sauce, canned apple juice, dried apples, etc. The purpose of such a survey was of course to determine if such products were being adequately merchandized in the surveyed area.

In August, 1947, a survey was undertaken to determine the types of heating equipment and fuel used in Canadian homes. Since approximately half of all households have more than one type of heating equipment the survey distinguished between the principal and the supplementary equipment and fuel. Based on the results of this survey a detailed analysis of the use of oil as a domestic fuel was prepared to meet the great interest in this source of heat.

Other special surveys have been conducted to determine the number of households equipped with radios, refrigerators, vacuum cleaners, washing machines, etc.; fish consumption; the number of poultry on farms; the labour force status of veterans; and other matters of similar import.

It should be here mentioned that not all the surveys conducted by the sampling unit have resulted in Bureau publications since in some cases the data gathered while of great technical value is not of general public interest.

### Inter-Bureau Checks

Another field in which the sampling unit has been called upon to provide assistance is in assessing and improving the quality of statistics originating in other divisions of the Bureau.

For example, the completeness of census enumeration has been checked by a special supplementary survey in the Prairie Provinces, carried out simultaneously with the Prairie census of 1946. Another survey, conducted as part of one of the regular quarterly operations, was used in connection with the monthly returns on employment, hours of work, and wages provided by employers. This survey obtained, in addition to the industry in which each person enumerated was working, the name of his employer. The results were then collated with the employer's regular returns, thus increasing the usefulness of the data from both sources by fitting them into one another.

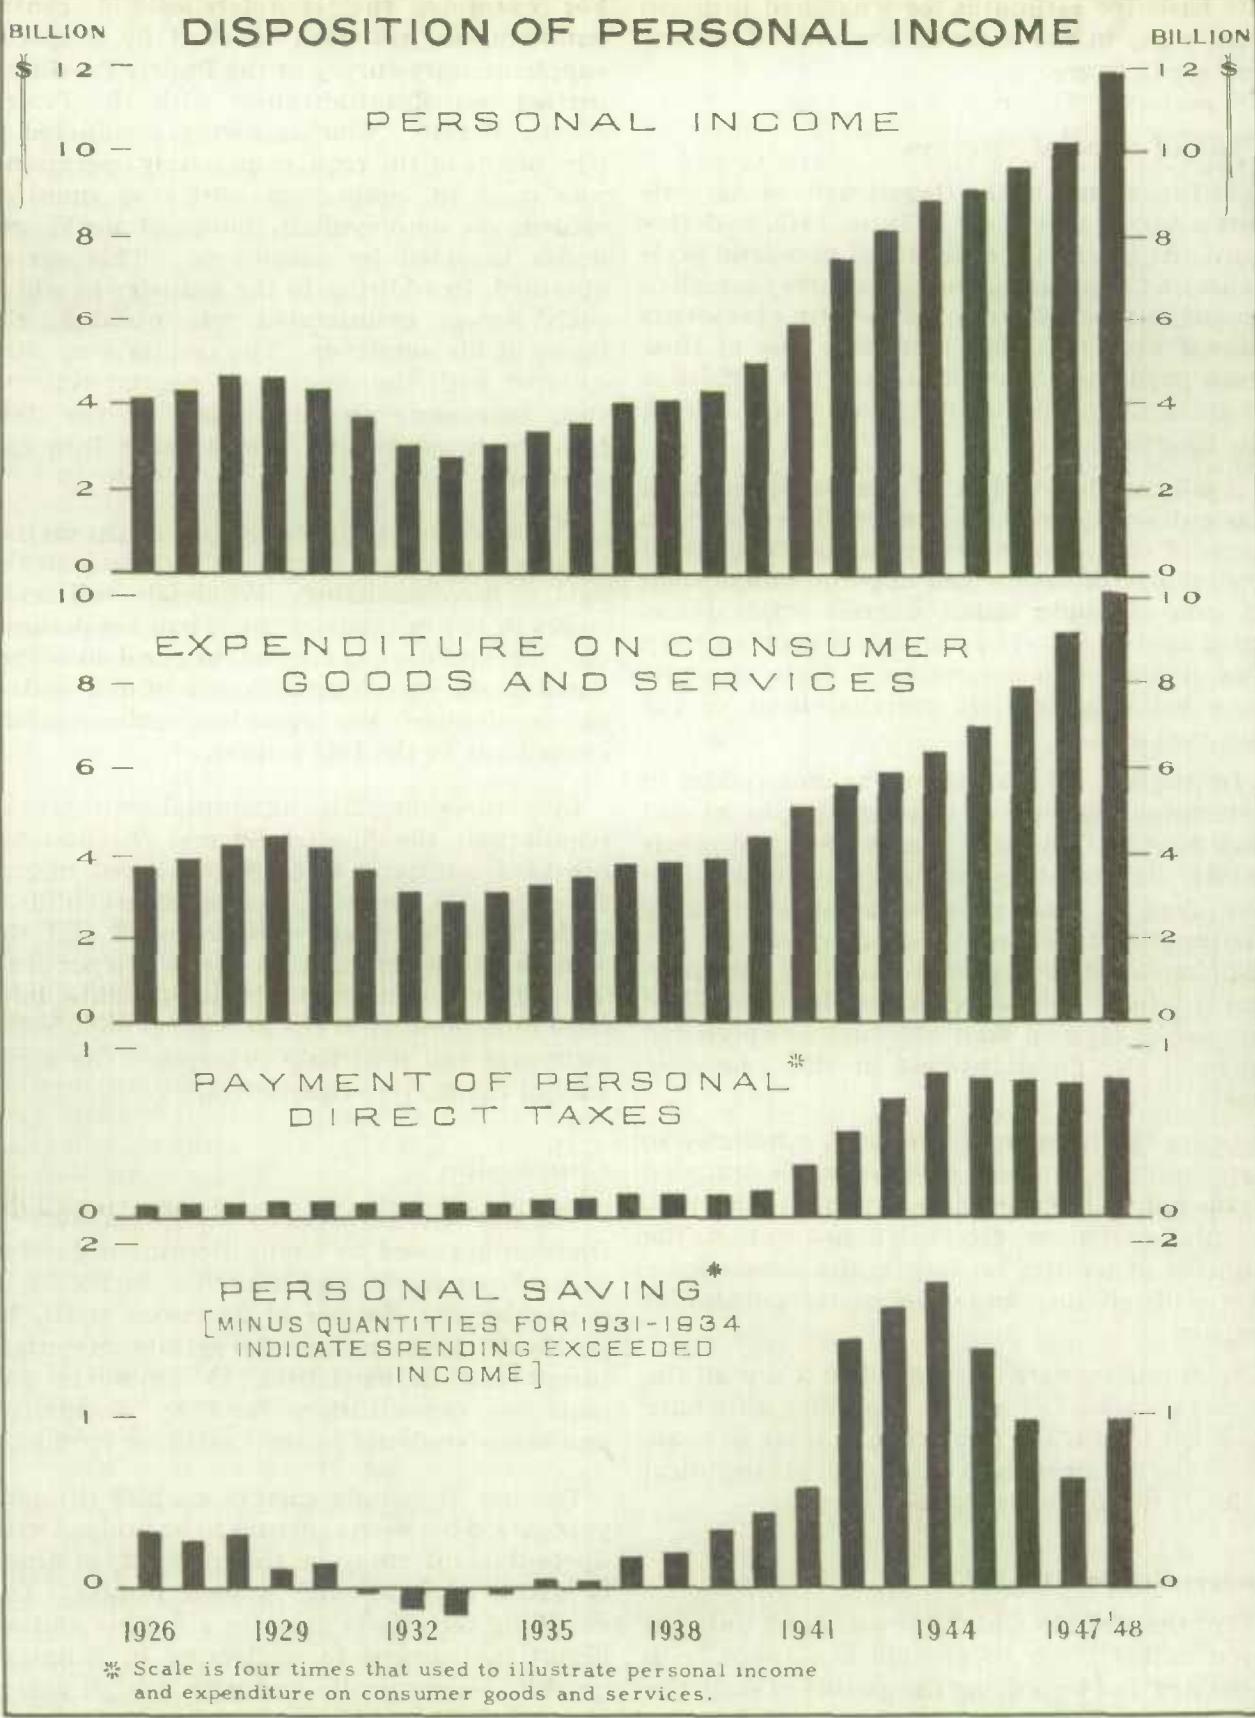

The Sampling Unit also helped in the setting up of a new system of current estimates in the field of merchandizing. Wholesale and retail stores in ten per cent of the urban census sub-districts and five per cent of the rural ones were listed in order to secure a sample of new outlets to supplement the complete enumerations carried out in the 1941 census.

In connection with the annual estimates of population, the Special Surveys Division has provided estimates of inter-provincial migration. For this purpose questions about children under fourteen years were included and the sample was increased from one to two per cent. The figures on migration thus obtained have been incorporated in the provincial population estimates and thus help to improve the accuracy of the surveys themselves.

### Conclusion

The statistics gathered by the Special Surveys Division are used by many Dominion government departments and branches, including in particular the Bureau of Statistics itself, by provincial governments, by private manufacturers and industrialists, by employer and employee organizations, and by economists and other students of the Canadian economy.

The use of sample surveys enables the ten-year period between censuses to be bridged with up-to-date information, the reliability of which is within definite and known limits. The sampling technique provides a flexible and efficient instrument for collecting information quickly, economically and with a high degree of reliability.

# Current Economic Conditions

A majority of the main factors which indicate economic activity continued to show increases when compared with the corresponding period of the previous year. Cheques cashed rose 12.3 per cent in August, 1949, as compared with August, 1948. The index of industrial production stood in August at 178.4, down, due in large part to the holiday season, from the spring highs, but higher than the August, 1948, figure of 175.6.

The index of industrial material prices, which in the week ended August 26 stood at 146.8, rose for the week ended September 23 to 148.8. Higher quotations were recorded for such items as lead, zinc, iron ore, raw rubber and gum rosin while lumber, hogs and cotton seed oil were somewhat easier. From a peak of 163.2 for the last week of August, 1948, this index moved irregularly until January, 1949, and thereafter worked gradually lower until a temporary bottom was reached in the third week of July at 145.7. Despite the subsequent rise of 3.1 points it is still 8.4 per cent below the figure reached in the corresponding week of 1948.

Common stock prices advanced and bond yields declined slightly during the month of September but dividend payments increased 6.5 per cent in August over the figure for the same month a year ago, according to a compilation made by the *Financial Post*.

Dollar sales of wholesalers in August, 1949, were 7 per cent above the dollar value in August, 1948. Cumulative sales for the first eight months of the current year were 5 per cent in excess of those for the corresponding period of 1948. The general unadjusted index of sales (base 1935-1939 = 100) stood at 316.0 for August, 1949 and 296.7 for August, 1948.

Railway revenue freight car loadings during the month of August totalled 351,000 as compared with 344,000 for August, 1948. The cumulative total for the first eight months of the year was 2,521,000 cars while the figure for the same period in 1948 was 2,608,000. Despite this drop in cars loaded the actual tonnage carried was higher, the figures being 71,731,000 tons in the first eight months of this year and 71,069,000 tons in the first eight months of 1948.

## National Accounts

The value of Gross National Product, according to an estimate recently published by the Bureau, was \$15,450 million in the year 1948. This is 13.7 per cent above the \$13,591 million for the year 1947 which in turn was 13.8 per cent higher than the 1946 figure of \$11,936 million. Price rises were more influential than volume in these increases.

Wages, salaries and supplementary labour income (this includes payments by employers into retirement funds, unemployment and other insurance schemes, etc.) was the largest single item in the national product amounting to \$7,113 million, 14.5 per cent above the 1947 total of \$6,212 million, and almost double the 1941 figure of \$3,586 million. The item does not include military pay and allowances which during the year under review amounted to \$82 million. Payments of wages, salaries and supplementary income by governments (federal, provincial and municipal) amounted to \$740 million exclusive of payrolls of governmental business enterprises such as the C.N.R., the hydro systems, etc.

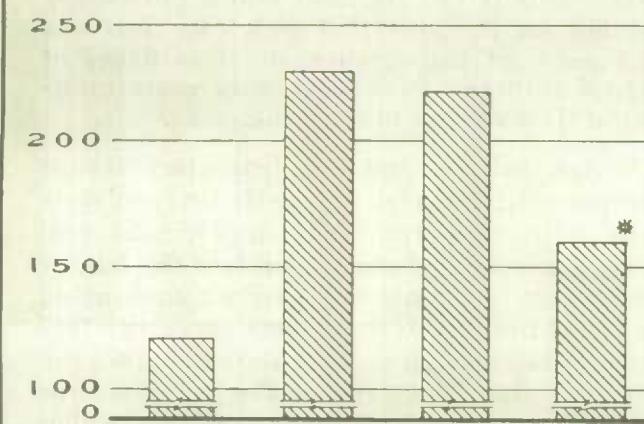

Personal income totalled \$11,883 million, 14.9 per cent above the 1947 figure of \$10,345 million which in turn was 7.0 per cent above the 1946 total of \$9,670 million. Individuals spent \$10,083 million on the purchase of goods and services, \$813 million in the payment of personal direct taxes, primarily income taxes which amounted to \$717 million, and made personal savings in the amount of \$987 million. This savings item was more than double the \$428 million reached in 1947, but far below the record saving of \$1,708 million reached in 1944. The purchase of food, including the cost of meals eaten in restaurants, absorbed \$2,796 million or slightly more than one-fourth of all personal expenditures on goods and services, with the next largest item being the purchase of clothing to the value of \$1,325 million.

Governmental income for 1948 was estimated at \$3,961 million while expenditures were \$3,143 million, leaving a record surplus of \$818 million. Interest payments on public debt amounted to \$554 million while the purchase of goods and services from business accounted for the expenditure of \$851 million, approxi-

mately one-third of the all time high reached in 1942 when under stress of war \$2,523 million was so spent. Transfer payments to individuals, that is payment of such items as old age pensions, unemployment insurance, family allowances, etc., amounted to \$843 million.

### Labour Income at New High

A recent estimate made by the Bureau of Statistics places total Canadian labour income for July, 1949 at \$651 million. This figure should be considered the all time high monthly income since, although the September 1948 estimate reached \$664 million, it included retroactive payments to railway workers in excess of \$30 million.

Estimates of labour income include all wages, salaries and supplementary remuneration for employees' services. Salaries and wages include bonuses and commissions and are reckoned before deductions for income tax or any other payments. Supplementary labour income consists of all other employer expenditures either in cash or in kind which can be regarded as compensation for the employees' services. This includes such items as employers' contributions to unemployment insurance, clothing or living accommodation or payments in lieu of them and similar benefits. The current July figure is \$8 million above that of June and \$44 million above that of July, 1948. It was not until 1942 that labour income reached a mark of \$300 million a month.

Construction showed a \$4 million increase over the previous month due in large part to continued high employment in the building and highway construction fields. Labour income in agriculture, transportation, communication and storage and services was also considerably higher. These advances were of a seasonal nature, particularly in agriculture where both the numbers of hired workers and the rates of pay increased. Partly counter-balancing these gains were losses, which occurred in manufacturing and forestry.

Another factor contributing to the higher level of labour income was the decrease in man-days lost through strikes and lockouts. According to preliminary figures of the Department of Labour only 57,744 man-days were lost due to these causes in July last as compared with 141,084 in June. The settlement of the major

strike in the asbestos mining industry was reflected in the increase in labour income in the mining industry as a whole.

The over-all index of employment in the nine leading non-agricultural industries showed a fractional increase from 130.8 on July 1 to 130.9 on August 1. At the same time the average weekly earnings for the same industries increased from \$42.92 on July 1 to \$42.99 on August 1.

### Housing Construction Advances

An estimated 6,588 dwelling units were completed in Canada during the month of July 1949. This brought the completions for the first seven months of this year to 46,326. The comparative figures for the previous year were 6,073 completions in July and 36,601 for the first seven months. These estimates are the results of a nation-wide survey conducted by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. An explanation of the methods used in making the survey is contained in the article appearing on page 1 of this issue of the *Canadian Statistical Review*.

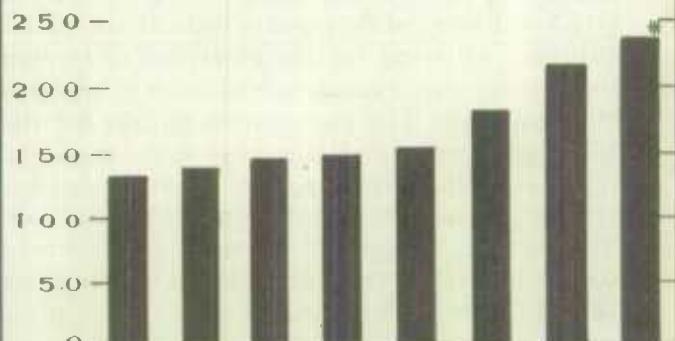

Construction was started on a further 9,086 dwelling units during the month of July as compared with 9,684 "starts" in the same month of 1948. The seven month totals were 49,285 "starts" during the current year and 49,452 during the same period of the previous year. At the end of the month there were still under construction a further 59,203 units, the comparable figure for a year earlier was 55,686.

It is estimated that approximately 30 per cent of all dwelling units completed during the current year were built for rental purposes with the remainder designed for owner occupancy. During the year 1948, 25 per cent of all dwelling units completed were intended for rental.

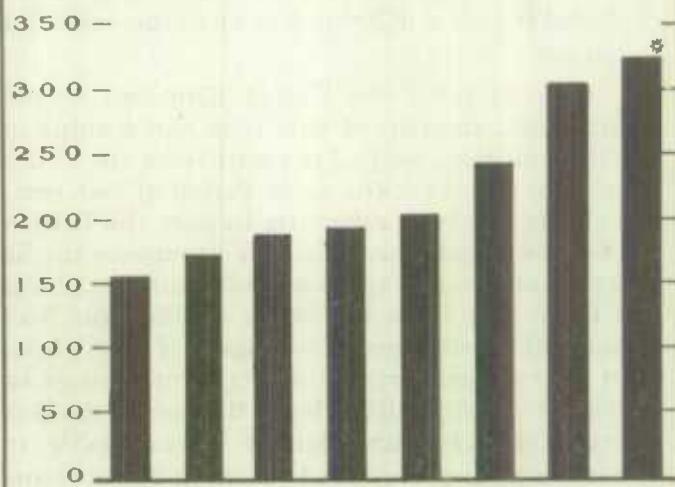

For the purpose of this survey the count of dwellings which are started, completed and under construction includes only new residential construction intended for year round occupancy. Seasonal dwellings such as summer cottages, ski shacks, etc., are not counted. Dwellings which are occupied, even if unfurnished, are regarded as completed. A dwelling unit is defined as the living quarters

## BUILDING MATERIALS COSTS

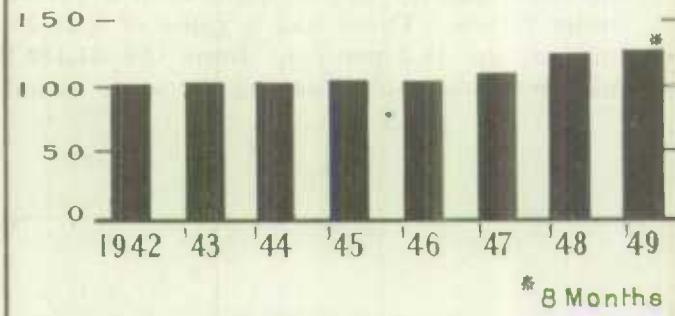

INDEX OF RESIDENTIAL BUILDING MATERIALS SHOWS A GRADUAL INCREASE  
1935-39 = 100

THIS IS DUE MAINLY TO THE HIGHER COST OF LUMBER

occupied by one household or family. The number of dwelling units in a structure will, therefore, be the number of households the structure is intended to accommodate.

### **Eight Months Foreign Trade**

During the month of August, 1949, Canadian imports from all countries were valued at \$212.1 million with exports valued at \$251.7 million. Allowing for the re-export of foreign goods there was a resultant balance of trade of \$41.9 million. The cumulative figures for the first eight months of this year were: imports, \$1,872.4 million and exports, \$1,917.6 million with a favourable balance of \$83.7 million. It is rather interesting to note that almost exactly half the favourable balance was built up during the month of August.

The comparative figures for the first eight months of the year 1948 were: imports, \$1,695.8 million and exports \$1,875.2 million with a favourable balance of \$197.2 million. Imports increased in the eight months of 1949 approximately 9.3 per cent above those of the similar period a year earlier and exports increased 2.3 per cent.

Imports from the United Kingdom in the first eight months of this year had a value of \$218.3 million, up 13.3 per cent from the \$193.2 million figure for the same period of last year. Exports however, reflecting in part the British effort to avoid where possible purchases in the dollar area were valued at \$469.0 million, down 1.1 per cent from the \$474.3 million worth of goods shipped January to August of 1948. It is, of course, too early to observe any change in trade trends resulting from the recent devaluation of the pound but it is reasonable to assume that the lowered values in dollar terms will result in an increased flow of British goods into this country during the remainder of the current year.

Purchases by Canada of United States goods increased sharply in the eight-month period under review. These had a value of \$1,312.6 million, up 11.2 per cent from the \$1,180.1 million figure reached during the same period

a year earlier. The removal, during late 1948 and early 1949, of many of the controls and restrictions on imports from the United States contributed to this rise in the value of imports. Canadian exports to the United States were, during the same period valued at \$910.6 million as compared with \$878.9 million a year earlier, an increase of 3.6 per cent.

An indication of the importance of the United States and the United Kingdom in Canada's foreign trade position is to be found in the fact that during the first eight months of this year 70.9 per cent of all our imports were brought from the United States with a further 11.8 per cent being purchased in the United Kingdom. During the same period the United States purchased from Canada 47.5 per cent of all our exports with an additional 24.5 per cent of them going to the United Kingdom.

Turning to consideration of the type of material traded in it is observed that exports during the eight months of wood, wood products and paper were valued at \$555.5 million. Of this amount the sale of newsprint realized \$277.5 million or almost half the total. Agricultural vegetable products followed with exports worth \$487.4 million with wheat as the largest single component, sales of this grain amounting to \$283.4 million. Exports of non-ferrous metals and their products at \$288.9 million, iron and its products at \$201.1 million and animals and animal products at \$189.9 million were the remaining large items in our export list.

Imports of iron and its products valued at \$634.4 million accounted for slightly more than one-third the value of all imports during the eight month period with non-metallic minerals and their products supplying a further \$343.3 million worth of imports. These were followed by imports of fibres, textiles, and products to the value of \$239.7 million and agricultural vegetable products at \$232.8 million. Fruits, sugar and its products, and beverages accounted for the bulk of this import of agricultural products.

<sup>(1)</sup>Not applicable to Column 5 "Average hourly earnings".<sup>(2)</sup>Annual data as of June 1 are adjusted to include certain remote parts of several provinces which are not covered in the quarterly surveys. Quarterly data as of August 16, November 8, 1947 and February 21, June 5, September 4, November 20, 1948, and March 5, and June 4, 1949.<sup>(3)</sup>Prior to 1945, figures shown are those relating to hourly earnings in one week in the month of highest employment (overtime included) reported by manufacturers to the annual Census of Industry. For period beginning in 1945, see table 12. <sup>(4)</sup>Includes retroactive payments to railway employees.<sup>(5)</sup>Conversions are included with annual data only.<sup>(6)</sup>Includes Newfoundland as of April, 1949.<sup>\*</sup>Under revision.

<sup>(1)</sup> As of June 1.    <sup>(2)</sup> Exclusive of stillbirths.    <sup>(3)</sup> Not applicable to figures on population.<sup>(4)</sup> Yukon and North-

West Territories not included in figures for births, marriages and deaths.

<sup>(5)</sup> Newfoundland data are included as of June 1, 1949.

Note.—Until the end of 1947, annual and monthly data for births, deaths and marriages are based on total final figures which are tabulated by month of occurrence on the basis of residence. The annual figures for 1948 are preliminary but tabulated in the same way. Monthly figures for 1947, 1948 and 1949 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that Province is disregarded.

<sup>(1)</sup> Monthly data as of end of month while annual section is based on averages of month-end statistics.

<sup>(2)</sup> As of July 1949, due to changes in method of recording payments, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the third Friday of the month, has been substituted for the number of persons receiving benefit in the month.

<sup>(3)</sup> Prior to 1944 data included deferred as well as current vacancies.

(1) As of April 1949, imports of Newfoundland are consolidated.

(2) Annual computation to 1946 entails considerable adjustments in production and external trade as described on page 23 of the Coal Report for 1946.

Note: As of April 1949, Newfoundland is included.

(1)Total pulp production was revised where necessary to cover "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

(2)Totals include unspecified pulp.

<sup>(1)</sup> Monthly totals of 1948 are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months.

<sup>(2)</sup> Excluding producers' interchange.

<sup>(3)</sup> Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.

<sup>(4)</sup> Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope. A substantial part of the imports appears after refinishing in total shipments. Production of primary iron and steel shapes from Canadian steel is equivalent to about 72 percent of the total production of ingots.

The twenty-three municipalities for which data are shown historically were selected as being leaders in the amount of permits issued during the years listed above. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December 1946.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(1)</sup>Figures cover the production of firms which normally account for 85 per cent of the total for Canada.<sup>(2)</sup>Since January, 1949, includes concrete chimney blocks. <sup>(3)</sup>Prior to 1947 data on producers' sales were used to indicate production. Annual and monthly production for 1947, 1948 and 1949 are obtained by adjusting producers' sales for changes in inventories.

<sup>(1)</sup>Includes imports to the end of 1947-48 while in 1948-49 wheat imports are taken in as monthly data become available; inward shipments of oats and barley will be added at the end of the crop year.

<sup>(2)</sup>Figures of customs exports from 1945-46 to 1947-48 are adjusted to reflect actual physical movements from Canada. Previous to 1945-46 adjusted figures are not available. The statistics for 1948-49 are customs exports and will be adjusted when required information is available. <sup>(3)</sup>Prior to 1936-37 Canadian customs figures are used. From 1936-37 to date, exports consist of overseas clearances plus U.S. imports for consumption. <sup>(4)</sup>Includes customs exports of Canadian oatmeal and rolled oats.

<sup>(1)</sup> Available for January, April and August only. 1948 and 1949 indexes are subject to revision.<sup>(2)</sup> Includes advance equalization payment on barley until March 1947, and subsidy on hogs from 1944 to date.<sup>(3)</sup> Based on price for hogs including Dominion premium. A rise in ratio favours production of beef.<sup>(4)</sup> Prior to 1941 prices were quoted on a live weight basis.<sup>(5)</sup> Prior to August 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

\*Statistics cover transactions reported by investment firms, stock exchanges and other security dealers in Canada.

Not included are: new issues of Canadian securities floated abroad, redemptions of called or matured Canadian bonds owned abroad, and some transactions by other than the reporting agencies. Complete statistics regarding capital movements are included in the annual reports on the "Canadian Balance of International Payments".

(1) Annual results are from the Canadian Balance of International Payments and monthly totals as given in Trade of Canada. In the balance of payment figures trade statistics have been adjusted to bring them closer to the international exchange of goods with each country, by using payments data or other substitutes in the case of certain special groups of transactions where physical movements of goods do not reflect international financial transactions,—e.g.—special shipments of munitions during the war, and the warehousing of Canadian wheat outside of Canada. Mutual aid exports are represented by financial transactions which in some years are subject to revision. Non-commercial items have been deducted throughout.

(2) Official holdings of Gold and U.S. dollars are given as of end of year and month in Statistical Summary of the Bank of Canada and Annual Report of Foreign Exchange Control Board.

\*See footnote of page 96.

<sup>(1)</sup>The annual statistics embrace all steam railways, while monthly data refer to railways with annual operating revenues of \$500,000 or over. <sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities. <sup>(3)</sup>For the Canadian National and the Canadian Pacific, retroactive wage increases, totalling \$29,085,087, paid in September 1948, were not included in that month's operating expenses. Payrolls as now reported monthly are according to the new wage scale.

Note: Newfoundland data are included as of April, 1949.

(1) Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.

(2) Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada.

(3) Chartered banks' public notice deposits in Canada other than estimated aggregate quarterly minimum balances in personal savings accounts and non-personal notice deposits. (4) Chartered banks' Canadian dollar deposits of provincial governments, Canadian, United Kingdom, and foreign banks. (5) Cheques on banks as shown in chartered bank month-end returns to the Minister of Finance.

Beginning in July 1949, certain advances that were formerly classified under "Miscellaneous Loans and Advances" are now included in the new category "Working Capital Advances to Crown Corporations".

121

This account does not appear on the monthly statements. Revised figures on the new basis are not yet available for April, May and June 1949. The data for the corresponding month of the previous fiscal year are comparable to those for the current year.

<sup>(1)</sup>Does not include advances to Foreign Exchange Control Board which are equivalent in substance to cash balances either in Canada or abroad, nor temporary investment of surplus cash in the Government's own securities. <sup>(2)</sup>Includes assumption of Newfoundland guaranteed stock of \$71,709,459.

Note: Credit items are due to repayments and transfers between departments and classes of expenditure.

# ANNUAL AND SPECIAL PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS DURING SEPTEMBER, 1949

## *Population.—*

POPULATION OF CANADA BY PROVINCES, 1921-1949. Estimated as of June 1 for Intercensal Years. 12/9/49. (Eng. and French) 1 p.

## *Vital Statistics.—*

VITAL STATISTICS, 1947, Final Figures. (Exclusive of Yukon and the Northwest Territories). 21-1020. (Eng. and French) 98 p., 25 cents.

## *Judicial Statistics.—*

STATISTICS OF CRIMINAL AND OTHER OFFENCES, 1941; 66th Annual Report. K. P., 1949. (Eng. and French) 154 p., 50 cents.

## *Agriculture.—*

SEPTEMBER ESTIMATE OF PRODUCTION OF PRINCIPAL FIELD CROPS, including LATE-SOWN CROPS, FODDER, ROOTS AND POTATOES. September 15, 1949 (3 p.m.) C. R. No. 21. (Eng. and French ed.) 7 p. TELEGRAPHIC CROP REPORT. September 20, 1949, (3 p.m.) C. R. No. 22. (Eng. and French ed.) 11 p., \$2.00 for series of 26 Crop Reports. ACREAGE AND PRODUCTION OF VEGETABLES, 1940-1948. Special Report 14 p., 25 cents. FRUIT REPORT. September 6, 1949. F. R. No. 5, 2 p., \$1.00 for series of 7 reports. HOPS. September 23, 1949. H. No. 2. 2 p., 10 cents a copy. FARM WAGES IN CANADA. September 23, 1949. 1 p., 10 cents. INDEX OF FARM PRODUCTION: Index number of the Physical Volume of Agricultural Production, 1935-48. August 1949. 3 p., 10 cents per copy. First issue—will be published annually. THE ANTICIPATED PELT PRODUCTION OF FUR FARMS, Season 1949-1950. September 1, 1949. 1 p., 10 cents a copy.

## *Manufacturing.—*

PACK OF PEAS, 1949 (Preliminary) 1 p., 10 cents. PACK OF RASPBERRIES 1949 (Preliminary) 1 p., 10 cents. PACK OF STRAWBERRIES, 1949 (Preliminary) 1 p., 10 cents. THE BREAD AND OTHER BAKERY PRODUCTS INDUSTRY, 1947. 14-1330. 24 p., 25 cents. THE CORDAGE, ROPE AND TWINE INDUSTRY, 1948. 14-1720. 11 p., 25 cents. THE HAT AND CAP INDUSTRY, 1947. 14-1680. 19 p., 25 cents. HOSIERY, KNITTED GOODS AND FABRIC GLOVE AND MITTEN INDUSTRIES, 1947. 14-1650. 32 p., 25 cents. THE PREPARED STOCK AND POULTRY FEEDS INDUSTRY, 1947. 18 p., 25 cents. THE SYNTHETIC TEXTILES AND SILK INDUSTRY, 1947. 14-1640. 13 p., 25 cents. Formerly entitled "Artificial and Real Silk Industry". THE WOMEN'S FACTORY CLOTHING INDUSTRY, 1947; Sect. I—Women's Factory Clothing; Sect. II—Women's Clothing Contractors. 14-1670 54 p., 25 cents. THE SASH, DOOR AND PLANING MILLS INDUSTRY, 1947. 13-1220. (Eng. and French) 14 p., 25 cents. THE AUTOMOBILE MANUFACTURING INDUSTRY, 1948. A10-49. 8 p., 25 cents. THE COAL TAR DISTILLATION INDUSTRY, 1948. A12. 3 p., 15 cents. THE ELECTRICAL APPARATUS AND SUPPLIES INDUSTRY, 1948. A17-49. 24 p., 30 cents. MANUFACTURES OF THE NON-FERROUS METALS; Preliminary Summary Statistics—1948. A18. 3 p., 15 cents. MANUFACTURES OF THE NON-METALLIC MINERALS; Preliminary Summary Statistics—1948. A16. 3 p., 15 cents. THE NON-FERROUS SMELTING AND REFINING INDUSTRY, 1948. A13-49. 14 p., 25 cents. THE TALC AND SOAPSTONE INDUSTRY, 1948. A9. 4 p., 15 cents.

## *Merchandising and Services.—*

MOTION PICTURE THEATRES, 1948. Revised Statistics 16-1010 Prel. 1 p., 10 cents. SALES OF NEW MOTOR VEHICLES AND FINANCING OF MOTOR VEHICLE SALES, July, 1949. 16-3010; 16-4070. 6 p., 25 cents. VARIETY STORE CHAINS, 1948. 16-1080. 8 p., 25 cents. WHOLESALE TRADE, 1948. (Revised Indexes) 16-4040-49. 15 p., 25 cents.

## *Transportation.—*

MOTOR CARRIERS, FREIGHT-PASSENGERS, 1947. 20-1750. 25 p., 25 cents. REGISTRATIONS OF MOTOR VEHICLES, 1948; Preliminary Report. 29/9/49. 1 p., 10 cents.

## *External Trade.—*

TRADE OF CANADA, 1948. Vol. I—Summary and analytical tables. D. B. S. 10-1010P. K. P., 1949. (Eng. and French) 305 p., \$2.00.

## *Prices.—*

EXPORT AND IMPORT PRICE INDEXES, 1926-1948. D. B. S. Ref. Papers, No. 5, July, 1949. 31 p., 50 cents.

## *Special Surveys.—*

HOUSEHOLD EQUIPMENT, November, 1948; Cooking facilities, Washing Machines, Refrigerators, Vacuum Cleaners and Radios in Canadian Homes. (Eng. and French) 15 p., 25 cents.
