# Unemployment Insurance Statistics

The Dominion Bureau of Statistics, through the medium of several publications and a table in the *Canadian Statistical Review*, presents, both monthly and annually, statistical data on the activities of the Unemployment Insurance Commission. (See table 15 on page 40 of the current issue of this Review.) These data should be of interest to every Canadian since the economic health of the community requires a state of approximately full employment.

To labour organizations and their officials, to employers of insured persons, to manufacturers, to traders and distributors and to many other specialized groups the material contained in the Bureau's reports are of more than ordinary importance. Slightly more than 50 per cent of the total Canadian labour force and approximately 75 per cent of all paid workers are insured persons. It follows, therefore, that from details of unemployment within the insured group the total incidence of unemployment can be estimated currently since unemployment outside the "Insured population" must, by its very nature, vary directly as it does within that group. This material in conjunction with the data available from other sources can be used in the formation of policy by labour organizations, by employers who are interested in the availability of certain types of labour and by manufacturers and distributors who require some knowledge of probable future markets for many kinds of consumer goods.

Turning to the summary table presented on page 40 of this issue of the Review it will be observed that all data are given for the eight calendar years which have elapsed since the inception of the Unemployment Insurance Act and also for the last available 28 calendar months. This arrangement allows comparison not only from month to month and year to year but also from any of the last four available months to the same month in the two previous years. Thus a student of the material may determine, through analysis of the data, certain comparatively long term trends.

The first column of the table shows ordinary claimants signing the live unemployment register on the last business day of the month in question. Whenever a claim for benefit is filed with a local office an unemployment register is set up in the claimant's name and it is maintained as long as (a) he reports weekly

(b) his claim is not disallowed, (c) he is not disqualified, (d) his benefit year does not terminate, or (e) he is not re-employed. It can therefore be fairly said while the numbers shown in this column do not represent the number of persons receiving unemployment insurance benefit they do clearly indicate the number of persons who have worked in insurable employment and who have reported themselves as being unemployed and seeking employment. Here, therefore, is an excellent index of the fluctuations in general unemployment.

The second and third columns of the table should be read in conjunction since they show the number of persons who actually received benefit during the month and the number of persons who received their first benefit during the period. The difference between those receiving a first payment and the total of those receiving benefits during the month represent, of course, the carryover from the previous month or months of those persons who were unable to find employment. The next column gives the number of days for which benefit was paid. As will be seen below, for various reasons, this figure does not represent the total number of days of unemployment, but when its fluctuations from month to month are considered, it does indicate the growth or subsidence of unemployment.

## Financial Operations

The next four columns deal with the financial operations of the Unemployment Insurance Commission under the Act. The amount of money paid out in benefits during the month under review is given as are the accretions to the fund from employer and employee contributions, governmental contributions and interest of investments. Under the Act money once paid into the fund cannot be used for any other purpose than the payment of benefits, all administrative costs being met by the Dominion Government from the consolidated revenue fund.

Contributions to the fund are made by both employer and employee in varying ratios and amounts depending on the employee's earnings, while the Dominion Government pays directly into the fund an amount equal to 20 per cent of the total received from both em-

ployers and employees. A large portion of the balance in the fund is invested in Dominion Government bonds, the interest received from these investments being added in turn to the fund itself. Accretions from this source are currently running at the rate of about \$10.5 million.

The last two columns of the table give the number of unplaced applicants for employment together with the number of unfilled vacancies as reported by the local employment offices. The former cannot strictly be interpreted as a measure of unemployment since it is probable that many employed persons, desirous of improving or changing their positions, make application for employment. It is, however, an excellent guide to the use being made of the placement division of the National Employment Service and it should be noted that the number of unplaced applicants for employment consistently runs considerably higher than does the number of ordinary claimants for benefit on the live unemployment register. It should be observed further that not only is this number swollen by the probability of insured persons, other than claimants for benefit, registering but it is added to also by the registration of persons, either in or out of employment, who do not belong to the "insured population".

The unfilled vacancies are those reported by employers to the various local offices. While the vast majority of them will, of course, be positions falling within insurable industries and carry pay ranges which bring them within the scope of the Act, there is no limitation forbidding the listing of any vacancy and many employers not infrequently seek the assistance of the National Employment Service in filling vacancies outside the Act's authority.

#### **Publications — (A) Monthly**

The *Statistical Report on the Operation of the Unemployment Insurance Act* discusses monthly operations and is published approximately four weeks after the close of the month under review. It is based upon material supplied to the Bureau by the Unemployment Insurance Commission and consists of an explanatory text and six tables of statistical data. It is on this material that the summary table appearing in the Review and discussed above is based.

Table A shows the number of claims filed during the month under review, together with comparative data for the same month of

the previous year, under the headings "Initial Claims", "Renewal Claims" and "Revised Claims". An initial claim is one filed by a claimant who has no benefit year (see below) in existence. A renewal claim is one made subsequent to an initial claim but made during the existence of the benefit year and after a period of employment and after the claimant has again become unemployed. A revised claim is either an initial or a renewal claim which for some reason or another has been reconsidered.

Table B shows the number of live claims outstanding on the last working day of the month broken down under the headings, type of claim, sex of claimant and the province in which the claim was made together with comparative data for the same month of the previous year. Live claims may be either "ordinary claims" (see column one of the table in the Review) or "other claims". These latter are comparatively few in number and are made by persons who engage in casual labour and thus draw benefit for very short periods at frequent intervals or by persons who have been put on "short time" at their place of employment and who may if they comply with the terms of the Act be compensated for the time lost.

A breakdown by sex, province, and number of days on the register of all persons signing the live unemployment register is given in table C. The number of claims adjudicated during the month together with the decision reached is shown in table D while the following table gives the reasons for rejection (under eight headings) of those claims in which it has been ruled that the claimant is not entitled to benefit.

The last table in this monthly bulletin sets forth the number of persons commencing receipt of benefit during the month either as the result of an initial or a renewal claim, the total number of persons receiving benefit, the number of days' benefit paid, and the total amount paid out in benefits. The figures for each province are shown separately and the comparative data for the same month of the previous year is given.

#### **Publications—(B) Annual**

The first annual report is a *Preliminary Report on Benefit Years Established and Terminated under the Unemployment Insurance Act — Calendar Year* published approximately four months after the close of the year. A "benefit year" is a statement of the benefit

rights to which a claimant for unemployment insurance is entitled during the twelve calendar months immediately following the establishment of the benefit year provided that the claimant, upon becoming unemployed, makes application in the prescribed manner and it is proven that contributions have been made in respect to him while working in insurable employment for not less than 180 days during the immediately preceding two years. Further the claimant must be not less than 16 years of age and the majority of his contributions must have been made at a rate other than the lowest in the schedule.

The benefit year statement sets out the number of days benefit accruing to the claimant and the daily rate at which it will be payable. A benefit year is ended in either of two ways: (a) all rights under it may be exhausted prior to the end of the twelve month period or (b) it will terminate with the lapse of twelve calendar months after its establishment. When a benefit year terminates a new one may be immediately established provided that at least 60 of the required 180 days of contributions have been made since the commencement of the benefit year just ended. Thus it is not altogether uncommon to have a single claimant establish more than one benefit year within a calendar year. For statistical purposes it is preferable to discuss the annual insurance payment operations in terms of benefit years rather than in terms of persons paid benefits.

In the preliminary report tables 1 to 4 discuss the number of benefit years established, broken down provincially by the age groups and sex of claimants, the daily rate of benefit authorized, the occupations last followed by the claimants and the industries in which they were last employed.

Table 5 sets forth the number of benefit years terminated (that is, lapsed and exhausted) during the calendar year classified by the maximum duration of benefit authorized and the actual days benefit paid. It should be noted that in very many cases, although benefit has been authorized, none has been paid. This is because under the terms of the Act the first nine days following the establishment of the benefit year are "waiting days" and non-compensable. Since many claimants obtain employment during this period benefit years will be established but no benefit paid.

In table 6 will be found a breakdown by sex and province in which the claim was made, of

benefit years terminated, those exhausted, and the number of days benefit paid in the exhausted benefit years.

Tables 7 to 10 discuss exhausted benefit years under various headings including (a) the age groups and sex of the beneficiaries, (b) the daily rate of benefit authorized by sex and province, (c) the industries of last employment by sex and province, and (d) the occupations last followed, again by sex and province.

The last of the publications *Annual Report on Current Benefit Years under the Unemployment Insurance Act — Calendar Year* appears about six months after the close of the year and is largely an elaboration of the preliminary report. It does, however, carry some additional information in so far as the material in the preliminary is sub-divided into greater detail and, further, only in this publication is the subject of the "insured population" discussed.

This term is susceptible to several definitions. It could, for certain purposes, quite rightly include all those persons to whom insurance books and contribution cards are issued in any one year. Again, it could include, for other purposes, only those persons who have complied with the minimum requirements necessary to establish benefit rights. A third definition would include only those persons employed in an insurable employment at a given date plus those claiming benefit as having been so employed at an earlier date and for whom books had been issued.

For purposes of this report the last definition appears most practicable and the date used is April 1, at which time new books are issued for all persons in insurable employment or who are on the live register. Tables "A", "B" and "C" of the report therefore discuss not benefit years but the insured population as it is defined above. The first of these tables discusses the number of persons for whom books were issued on April 1, of the year under review under the headings of occupation, sex and province of employment. The second shows a breakdown by industry, by sex and by five-year age groups but not by province, while the last table of the group gives a breakdown by industry, by sex and by province.

The remaining tables of this last publication are intended to amplify the material to be found in the preliminary report and to make any revisions that are found necessary to the data contained in the preliminary.

# Current Economic Conditions

There are many signs that an upward trend, possibly seasonal in character, is making itself felt in current Canadian economic developments, although the fluctuation of all generally accepted indicators are not uniformly favourable. The index of industrial production, which in January and February dropped from the plateau established in the autumn months to 178.6 and 179.4 respectively, rebounded to 184.3, within 8/10 of a point of the September to December average of 185.1. The rise in the subindex of manufacturing from 190.5 in February to 195.8 in March was largely responsible for the improvement. Retail stores sales during the month of March were valued at \$578 million, six per cent above the total for the same month last year and well ahead of both the January and February, 1949, totals of \$493 million and \$470 million respectively.

Loadings of cars of revenue freight, however, were lower in the last available week (that ended May 14) than in the previous week and considerably below those of the corresponding week of the previous year. The totals were 74,104 cars for the week ending May 14, 74,354 for the week ending May 7, and 77,458 for the week ending May 15, 1948. The cumulative total for the current calendar year is 1,377,365 while the totals for the same period of 1948 and 1947 were 1,404,208 and 1,351,143. Thus it will be seen that 1949 is running 1.9 per cent above 1947 and 1.9 per cent below 1948. As a basis of comparison it might be mentioned that the United States current cumulative total is running approximately 8 per cent below that previous year's figure.

The cost-of-living index increased slightly from March 1 to April 1, standing at 159.3 as compared with 159.2, when a reduction in the food index number from 199.1 to 198.5 was not sufficient to offset slight gains in all other components. The weekly wholesale price index of industrial materials continued to decline and for the week ended April 22 stood at 152.9, approximately 7 per cent below the wartime

peak of 163.2 reached in the week of August 27, 1948. There have been small but steady declines in this weekly index ever since the beginning of the present year. An easier tone was also evidenced in the prices for Canadian industrial and utility stocks during the month of April although the price index of shares in 25 representative gold mining companies increased 4.0 points from March 31 to April 28, standing on the latter date at 71.6.

17,826 new dwelling units were completed during the first quarter of the current year, according to an estimate prepared by the Bureau of Statistics in co-operation with the Central Mortgage and Housing Corporation. This total is 54 per cent above the 11,569 dwelling units completed in the first quarter of 1948. Construction was started on a further 8,396 units during the first three months of this year compared with 6,678 starts for the same period of the previous year, an increase of about 25 per cent.

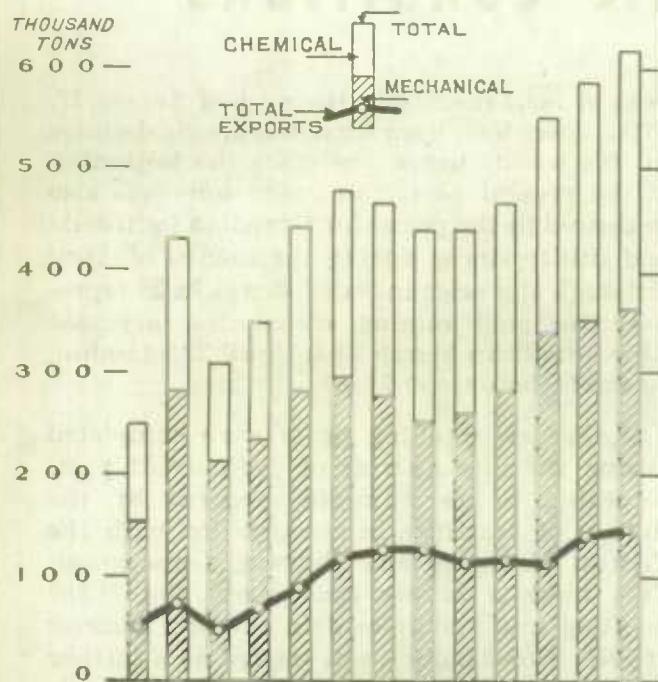

While undoubtedly the very heavy carryover of 56,456 uncompleted units from the previous year was a contributing factor to the large number of completions, nevertheless, these with the increased number of "starts" must indicate considerably increased activity in this vital field.

It is estimated from the types of dwelling constructed that 28 per cent of those completed during the quarter were for rental purposes and the remainder for owner-occupancy. 2,217 of the rental units completed during this period are under the management of the Central Mortgage and Housing Corporation.

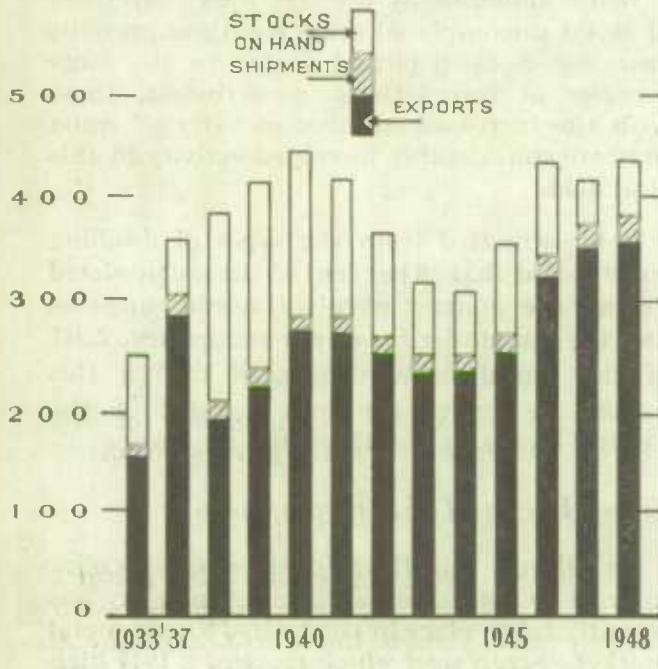

## Some Recent U.S. Developments

An almost startling change of peculiar interest to the Canadian mining industry has recently taken place in the United States metal market. Scrap steel which reached a 1949 high of \$43.00 per ton sold at the middle of May for \$22.75, a decline of 47.1 per cent. Copper, lead

## MONTHLY PRODUCTION OF WOOD PULP GAINS STEADILY

## WITH NEWSPRINT EXPORTS HOLDING AT HIGH LEVEL

and zinc, all of which are exported from Canada to the United States have reacted similarly. Copper dropped from a 1949 high of 23.5 cents a pound to 18 cents, a decline of 23.4 per cent. Despite this price decline deliveries of refined copper to U.S. consumers during the month of April amounted to 76,000 tons, 33 per cent below March deliveries and 34 per cent below the deliveries of April, 1948.

Zinc dropped from 17.5 cents per pound to 12 cents, a decline of 31.4 per cent and lead from 21.5 cents per pound to 14 cents, a decline of 34.9 per cent. Deliveries of these two metals were also considerably below those of earlier month and of the same month last year. Tin, probably because of the unsettled political and economic conditions of the far east tin belt, has maintained a steady price level throughout 1949 at \$1.03 per pound.

Wholesale prices, as measured by the Bureau of Labor Statistics weekly index, declined in the week ended May 3 for the ninth consecutive week. The index then standing at 155.2 (1926 = 100), 4 per cent below a year ago. The value of department store sales in the week ended April 30 were 4 per cent below those of the corresponding week of the previous year while sale for the four month period, January to April, were 3 per cent below those for the same period of 1948.

Employed persons in the United States numbered, according to a Census Bureau estimate, 57.8 million in April, 1949, compared with 57.6 million in March, 1949, and 58.3 million in April, 1948. The Federal Security Agency, in a forecast based on employer opinion, estimates that a seasonal peak of employment will occur in July at which time approximately 60 million persons will be in gainful employment, a figure 2.6 per cent below the all time record of 61.6 million employed established last summer.

The U. S. Department of Commerce reports a significant increase in the rate of Americans' personal savings. During the year 1948 these were estimated at 7.6 per cent of the Personal Disposable Income while for the last quarter of that year they were 9.2 per cent and for the first quarter of the current year they reached 10.7 per cent.

## Industrial Employment

The seasonal decline which has appeared in seven out of the last ten years brought industrial employment in Canada on March 1 to a slightly lower level than that held on February 1, according to reports received from 19,938 leading firms in the eight major industrial divisions. The index of employment (base 1926 = 100) stood at 189.2 on March 1 as compared with 190.5 on February 1 and 188.9 on March 1 of last year.

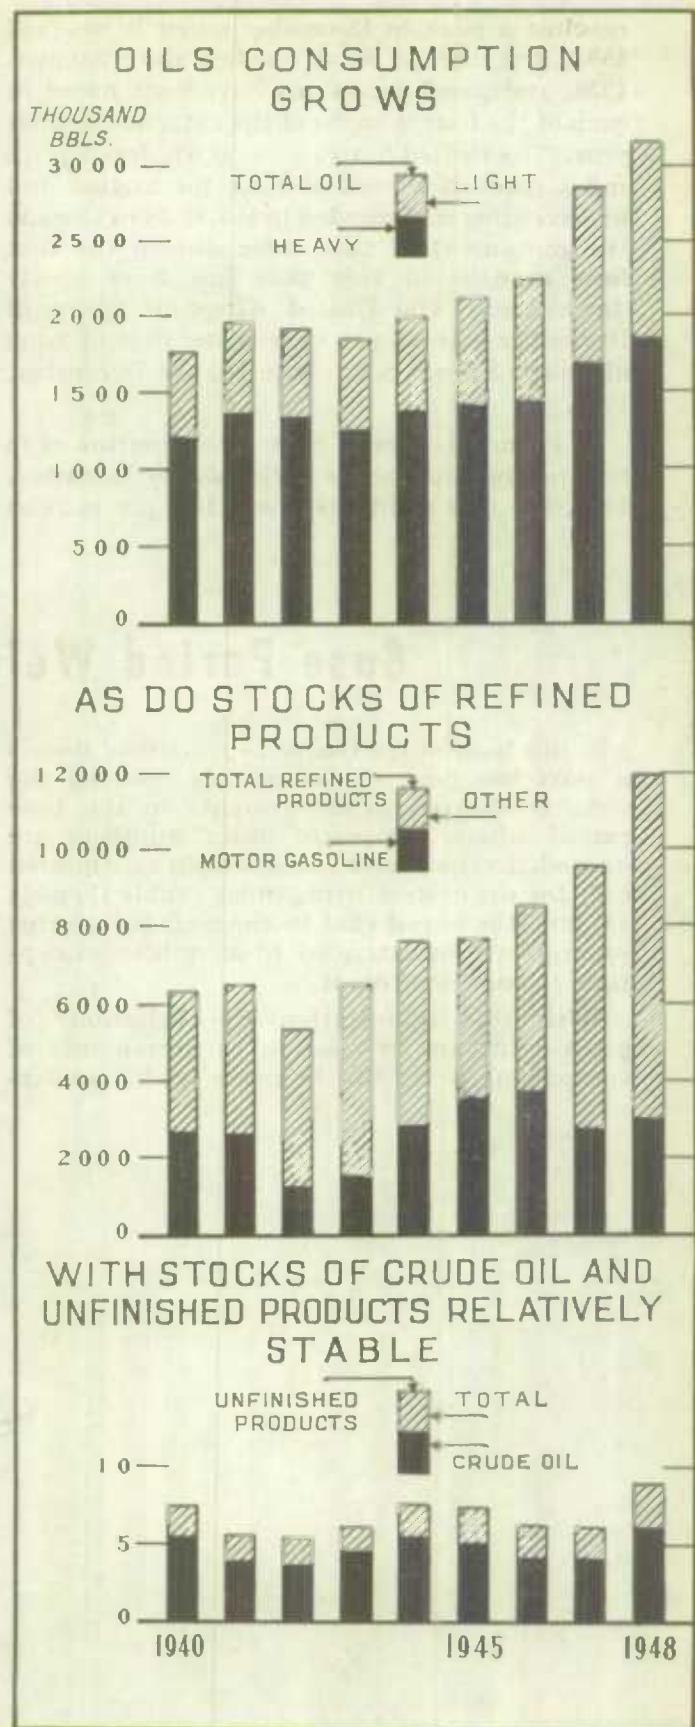

Declines of 6.2 per cent in logging and 2.9 per cent in construction were reported at the beginning of March compared with a month earlier, the losses being largely seasonal in character. Largely the result of the industrial dispute in asbestos mining, employment in the mining group as a whole fell by 1.8 per cent.

Accompanying the minor recession in the total volume of employment there was, March to February, a decrease of 0.2 per cent in the index of total weekly payrolls. As compared with March of the previous year, however, this index rose 9.5 per cent. The average earnings per employee reached a new peak figure of \$43.17 as compared with \$42.92 at February 1 and \$39.50 for March, 1948.

Caused in the main by the seasonal recession in the volume of employment referred to above the *Monthly Estimate of Labour Income in Canada* issued by the Bureau for the month of February last shows a drop of \$3 million from \$608 million in January to \$605 million. The February figure was, however, \$56 million or 11 per cent greater than the similar figure for the same month of 1948. Increases in labour income, from January to February, occurred in manufacturing, transportation, communication and storage, finance and fishing. These increases, however, were overbalanced by decreases in all other industries.

## World Price Movements

World price movements during the second half of 1948 continued, in general, to advance but at greatly diminished rate and there are many indications that peak levels were reached or passed during this period. Buyers' markets developed in a number of primary commodities and in others an easing of demand was noticeable. The Canadian wholesale price index

reached a peak in December when it touched 159.6, the highest mark reached since August, 1920, and small recessions have been noted in each of the four months of the current calendar year. The United States general wholesale price index reached a peak of 169.5 for August and by December had receded to 162.3. As in Canada the movement of this index during the first four months of this year has been slowly downward. The United Kingdom figure in December was 0.8 per cent below that of June although 8.5 per cent above that of December, 1947.

In France wholesale price levels continued to advance but during the period June-December, 1948, the rate of increase was 16.6 per cent as

compared with 38.9 per cent for the first six months of the year and 34.6 per cent for the second half of the year 1947. The Italian wholesale price index which during the first half of the current year had declined 6.9 per cent reversed this trend in the latter half of the year and advanced 10.8 per cent.

The cost-of-living indexes, in general, reflected the movement of wholesale prices and declines ranging from 0.2 per cent to 1.3 per cent were recorded in the United States, United Kingdom, Norway, Czechoslovakia, and other countries. Slight increases in this index were noted in, among other countries, Canada, France, Spain, and the Netherlands.

## Base Period Weights To Be Shown

In this issue of the *Canadian Statistical Review* a start has been made towards showing the weights allotted to components in the base period where composite index numbers are quoted. In the present issue weights are quoted only for the cost-of-living index (Table 17, page 43) but it is hoped that in the near future this practice will be extended to all tables susceptible to such treatment.

With this information the behaviour of general indexes in relation to movements of component series can be more readily under-

stood. It will also be easier to understand why a composite index may differ materially from a simple average of its components.

Readers who check the calculations of the composite cost-of-living index may find that their answers occasionally differ by a decimal or two from the composite index published. This will be due to the fact that office calculations are based upon figures carried to several decimals beyond the component group indexes published.

<sup>6</sup> \* Averages of five weeks.

(1) Monthly averages or calendar months.

(2) Annual data as of middle of July. Monthly data for dates varying from 8th to 17th of month. February 1947 as of 22nd.

(3) Average quarterly statistics are given in the monthly section, except the recent data for exports which are monthly estimates.

(4) Interim index of retail prices, June 17, 1947 = 100.

(5) Series revised, June 30, 1947 = 100.

<sup>(1)</sup> As of June 1.<sup>(2)</sup> Exclusive of stillbirths.<sup>(3)</sup> Not applicable to figures on population.<sup>(4)</sup> Yukon and North-West Territories not included in figures for births, marriages and deaths.

Note.—Until the end of 1946, annual and monthly data for births, deaths and marriages are based on total final figures which are tabulated by month of occurrence on the basis of residence. The annual figures for 1947 are preliminary but tabulated in the same way. Monthly figures for 1947 and 1948 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

<sup>(1)</sup> As of June 1.<sup>(2)</sup> Exclusive of stillbirths.

9

<sup>(3)</sup> Not applicable to figures on population.

Note.—Until the end of 1946, annual and monthly data for births, deaths and marriages are based on total final figures which are tabulated by month of occurrence on the basis of residence. The annual figures for 1947 are preliminary but tabulated in the same way. Monthly figures for 1947 and 1948 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

<sup>(1)</sup> Monthly totals of 1948 are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months.

<sup>(2)</sup> Excluding producers' interchange.

<sup>(3)</sup> Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.

<sup>(4)</sup> Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope. A substantial part of the imports appears after refinishing in total shipments. Production of primary iron and steel shapes from Canadian steel is equivalent to about 72 percent of the total production of ingots.

**Shipments of Primary Iron and Steel Shapes to Consuming Industries**

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(1)</sup>Hollow blocks including fireproofing and load-bearing tile.<sup>(2)</sup>Planks and boards.<sup>(3)</sup>Prior to 1946 figures represent gross value of production. Figures for 1946 to 1948 are factory sales of firms which normally account for 96% of total Canadian production.

<sup>(1)</sup> Includes imports to the end of 1947-48 while in 1948-49 wheat imports are taken in as monthly data become available; inward shipments of oats and barley will be added at the end of the crop year.<sup>(2)</sup> Figures of customs exports for 1945-46 and 1946-47 are adjusted to reflect actual physical movements from Canada. Previous to 1945-46 adjusted figures are not available. The statistics for 1947-48 are customs exports and will be adjusted when required information is available.<sup>(3)</sup> Prior to 1936-37 Canadian customs figures are used. From 1936-37 to date, exports consist of overseas clearances plus U.S. imports for consumption.<sup>(4)</sup> Includes customs exports of Canadian oatmeal and rolled oats.

<sup>(1)</sup> Available for January, April and August only.<sup>(2)</sup> Includes advance equalization payment on barley until March 1947, and subsidy on hogs from 1944 to date.<sup>(3)</sup> Based on price for hogs including Dominion premium. A rise in ratio favours production of beef.<sup>(4)</sup> Prior to 1941 prices were quoted on a live weight basis.<sup>(5)</sup> Prior to August 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.<sup>(6)</sup> Subject to revision.

<sup>(1)</sup> Australia, New Zealand, South Africa, India and Pakistan.<sup>(2)</sup> Includes Belgium, China, Czechoslovakia, France, Netherlands, Netherlands Indies and Norway.

Source: Monthly Report; Imports for Consumption, Trade of Canada, D.B.S.

\*Statistics cover transactions reported by investment firms, stock exchanges and other security dealers in Canada.

Not included are: new issues of Canadian securities floated abroad, redemptions of called or matured

Canadian bonds owned abroad, and some transactions by other than the reporting agencies.

Complete statistics regarding capital movements are included in the annual reports on the "Canadian Balance of International Payments".

## Factors in the Balance of Payments

(1) Annual results are from the Canadian Balance of International Payments and monthly totals as given in Trade of Canada. In the balance of payment figures trade statistics have been adjusted to bring them closer to the international exchange of goods with each country, by using payments data or other substitutes in the case of certain special groups of transactions where physical movements of goods do not reflect international financial transactions,—e.g.—special shipments of munitions during the war, and the warehousing of Canadian wheat outside of Canada. Mutual aid exports are represented by financial transactions which in some years are subject to revision. Non-commercial items have been deducted throughout.

(2) Official holdings of Gold and U.S. dollars are given as of end of month in Statistical Summary of the Bank of Canada.

\*See footnote of page 106.

110

<sup>(1)</sup>The annual statistics embrace all steam railways, while monthly data refer to railways with annual operating revenues of \$500,000 or over.<sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.<sup>(3)</sup>For the Canadian National and the Canadian Pacific, retroactive wage increases, totalling \$29,085,087, paid in September, were not included in that month's operating expenses. Payrolls as now reported monthly are according to the new wage scales.

# ANNUAL AND SPECIAL PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS DURING APRIL, 1949

## *Population.—*

CENSUS OF NEWFOUNDLAND, 1945; Gainfully Occupied Classified According to Occupation and Industry, By Industrial Status and Sex, for Newfoundland and Census Districts. Report No. ON-1, 17 p.

## *Agriculture.—*

STOCKS OF CANADIAN GRAIN, March 31, 1949. C. R. No. 3, April 21, 1949. (Eng. and French ed.) 4 p., \$2.00 for series of 26 Crop Reports. THE SUGAR SITUATION IN CANADA (period February 26 to March 26); Formerly "Sugar Report". Vol. 29 No. 3, April 19, 1949. 6 p., \$1.00 per year. ESTIMATES OF PRODUCTION AND CONSUMPTION OF MEATS, 1948. April 8, 1949. 4 p., 10 cents per copy. SUMMARY OF COLD STORAGE REPORTS, 1948; Holdings of Food Commodities in Cold Storage and Other Warehouses and in Dairy Factories. 29 p., 25 cents. INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS. Ottawa, April 12, 1949. 3 p., 10 cents per copy. NET INCOME OF FARM OPERATORS FROM FARMING OPERATIONS. April 22, 1949. 7 p., 15 cents.

## *Forestry.—*

THE LUMBER INDUSTRY IN MANITOBA, 1947. 13-1086. April, 1949. 1 p., 10 cents a copy; complete series of ten bulletins and "Preliminary Report", \$1.00.

## *Manufacturing.—*

THE BREAKFAST FOODS INDUSTRY, 1947. 14-1380. 7 p., 15 cents. THE MACARONI AND KINDRED PRODUCTS INDUSTRY, 1947. 14-1420. 7 p., 15 cents. THE WINE INDUSTRY, 1947. 14-1460. 9 p., 25 cents. HANDBAGS, LUGGAGE AND SUNDRY LEATHER GOODS, LEATHER BELTING, LEATHER BOOT & SHOE FINDINGS, 1947. 12-1350. 23 p., 25 cents. THE LEATHER FOOTWEAR INDUSTRY, 1947. 12-1330. (Eng. and French) 26 p., 25 cents. PRELIMINARY REPORT ON THE VENEERS & PLYWOODS INDUSTRY, 1947. 13-1370. (Eng. and French) 11 p., 25 cents. THE ROOFING PAPER INDUSTRY, 1947. (Eng. and French) 8 p., 25 cents. THE ASBESTOS PRODUCTS INDUSTRY, 1947. A66-29-3-49. 6 p., 25 cents. THE BRIDGE BUILDING AND STRUCTURAL STEEL WORK INDUSTRY—1947. A70-30-3-49. 5 p., 25 cents. THE COKE AND GAS INDUSTRY, 1947. A67-5-4-49. 16 p., 25 cents. ELECTRIC VACUUM CLEANERS, 1948. AC46-4-49. 2 p., 10 cents. THE MEDICAL & PHARMACEUTICAL PREPARATIONS INDUSTRY, 1947. A69-30-3-49. 10 p., 25 cents. THE MISCELLANEOUS IRON AND STEEL PRODUCTS INDUSTRY, 1947. A68-30-3-49. 8 p., 10 cents. MONTHLY REPORT ON REFINED PETROLEUM PRODUCTS, 1948. (Special supp. with rev. monthly figures on Refinery Shipments, Imports, Exports, Marketing Inventories and Domestic Consumption) S17-24-3-49. 49 p., 20 cents. THE SAND-LIME BRICK INDUSTRY, 1947. A63-25-3-49. 3 p., 10 cents. THE SHIPBUILDING INDUSTRY, 1947. A64-30-3-49. 7 p., 15 cents. THE TOILET PREPARATIONS INDUSTRY, 1947. A62-1-4-49. 12 p., 25 cents.

## *Transportation.—*

INDEX NUMBERS OF COST OF ELECTRICITY FOR DOMESTIC SERVICE AND TABLES OF MONTHLY BILLS FOR DOMESTIC SERVICE, COMMERCIAL LIGHT AND SMALL POWER, 1948. 20-1910. 23 p., 25 cents. SUMMARY OF MONTHLY TRANSIT REPORTS, 1948. 20-4750. (Eng. and French) 4 p., Price per year \$1.00. WAREHOUSING, 1947. 7 p., 25 cents.

## *Merchandising and Services.—*

POWER LAUNDRIES & CLEANING AND DYEING ESTABLISHMENTS, 1947. 16-1020. 29 p., 25 cents. RETAIL TRADE: 1941, 1947, 1948. Revised Series, Dollar Sales Estimates. 16-1040. Series, 1948, No. 23, 30 p., 50 cents. "Highlights of New Retail Series . . . Dollar Figures Replace Indexes . . . Sample Enlarged and Refined; Series is Entirely New . . . "

## *Employment.—*

CHART BOOK OF EMPLOYMENT AND PAYROLLS IN CANADIAN INDUSTRIES; Employment: 1939—September 1, 1948; Payrolls: 1941—September 1, 1948. 9-2010. 6 p., 40 charts, 50 cents. EARNINGS AND HOURS OF WORK IN MANUFACTURING, 1946 (An annual survey of earnings and hours of male and female wage earners and salaried employees in leading establishments in the last week in November, 1946). 9-1040. 56 p., 25 cents. "... final results of the first survey made by the D.B.S. in a new annual series."
