# Wood and Paper Products Statistics

This is the fifth in a series of articles dealing with the activities of the Industry and Merchandising Division of the Dominion Bureau of Statistics. Earlier articles on other sections of the Division appeared in last year's June, August, September, and December issues of this magazine.

Practically everything that is derived either directly or indirectly from the forest comes within the scope of the Forestry Section of the Division. Thus the statistics compiled by this section cover a very wide field indeed: from logging operations in the forests, through the several stages of manufacture of wood and paper products, to printing and the related graphic arts, and extending even to data on the publication of books and periodicals.

Operations in the woods, while they produce some commodities such as fuelwood, poles and Christmas trees which are used as such without further manufacturing processing, are chiefly concerned with the production of the basic raw material for other manufacturing industries. At this stage, that is after logging has been completed, forest output is divided into two great streams: one leading to the ultimate production of finished commodities made of wood and the other towards production of those made of paper.

The logs and bolts cut in the forest and destined to become wood products pass into the mills producing sawn lumber, shingles, ties, spoolwood, staves, heading, and other sawn products. These mills constitute the lumber industry. The rough lumber, lath, shingles, cooperage stock and other products of this group are used either for building or other purposes in the form in which they leave the sawmill or they are sold or transferred to the next group of industries where they are used as the raw material in the manufacture of planed lumber, sash, doors, furniture, boxes, barrels, woodenware, etc. These industries, which might be considered as representing the third step in the production of forest products, are classed as wood-using industries.

In other mills, such as those manufacturing excelsior and veneer, there is no second stage comparable with the work done by sawmills and the finished product which is manufactured direct from the logs or bolts is considered to be of the same status as the other products of the wood-using group. That is the raw material moves directly from the primary to the tertiary industrial process.

## Logging Output Statistics

Statistics on operations in the woods are concerned primarily in establishing the extent to which forests are depleted through utilization. For this purpose, details of consumption of forest materials by sawmills and pulpmills are obtained from the annual reports submitted by operators engaged in those industries. Details of consumption of mine timbers by mine operators, of hewn ties by railroad companies, of telegraph and telephone poles by the communications services, and of wood for distillation or carbonization by charcoal producers, are obtained from other divisions or sections of the Bureau of Statistics.

Data on fuelwood, fence posts and rails, and miscellaneous forest products are secured from the decennial Census of Agriculture and estimated in the light of this and other data for the intra-censal years.

The apparent production of each class of forest products is obtained by adding exports to domestic consumption and subtracting imports, both volume and value figures being obtained in this manner.

By the use of converting factors which represent, in cubic feet, the total quantity of merchantable wood which must be cut in the forest in order to produce one unit of each class of products (sawlogs, pulpwood, fuelwood, etc.) it is possible to calculate the total utilization of all forest products. Estimates of total depletion are obtained by the addition of fire losses and of losses due to insect pests and tree diseases, compiled or estimated by the Forestry

Branch, Department of Resources and Development, to the figures for total utilization.

It is obvious that annual returns could not be obtained from the tens of thousands of persons conducting operations in the forest, many of whom produce only fuelwood, fence rails and posts for their own use or supplement their income from other sources by selling pulpwood, poles, Christmas trees, and other products from small privately owned wood-lots. However, to obtain some indication of the employment afforded by such operations and of the value of the supplies used, questionnaires are sent each year to some 2,000 companies and individuals carrying on such logging operations. The size of the sample is measured by converting all products reported to feet of merchantable wood, using the factors previously mentioned. This sample usually represents from 35 to 40 percent of the total output. Total employment, earnings and cost of supplies are then calculated to 100 percent.

### *Pulp and Paper*

As in the case of wood products, production of paper products not infrequently represents three stages of industrial operations. The pulpwood obtained from the forests forms the raw material for the Pulp and Paper Industry which in turn provides the raw material for the paper-using industries. However, most paper produced in Canada passes only through two stages and is used in the form in which it comes from the paper mill.

The pulp and paper industry is one of the most important in Canada and one which, as has been noted elsewhere in this issue of the *Canadian Statistical Review*, contributes most heavily to our available exports. The Canadian Pulp and Paper Association has recently reported that Canada's output was valued at \$810 million for the year just closed and that of this \$610 million worth (slightly more than 75 percent) was sold abroad. This export consisted of newsprint to the value of \$425 million, wood pulp to the value of \$165 million and other paper products valued at \$20 million. Further, of the \$610 million worth of pulp and paper products exported no less than \$530 million worth went to the United States, thus making a very valuable contribution to Canada's supply of United States dollars.

During 1949 Canada produced 5,176,327 tons of newsprint. About six percent of this (335,385 tons) was disposed of through domestic consumption, 4,380,250 tons or 85 percent of the total production was shipped to the United States and the remaining nine percent to other foreign countries. In 1945 exports to countries other than the United States accounted for 19 percent of total output and, in 1938, 24 percent of total output was so disposed of.

By a mutually satisfactory arrangement current statistics on woodpulp and newsprint paper production are not collected by the Dominion Bureau of Statistics but are made available to it by the Canadian Pulp and Paper Association and the Newsprint Association of Canada.

### *Publications*

The annual report on the lumber industry, in addition to the usual principal statistics on employment within the industry, salaries and wages paid, expenditures for fuel and electricity, costs of materials and supplies used, and the gross and net values of products manufactured also gives details of production of sawn lumber, lath and shingles, by species of tree used, quantity and value of other sawn products and by-products, and certain particulars of operations by size groups for each of the provinces. With the inclusion of Newfoundland mills the lumber industry now comprises well over 11,000 mills, and in point of number of plants and employees it is the largest industry in Canada. Allowing for idle mills and for the very small mills (those sawing less than 15,000 feet annually) for which data are not compiled, this annual report now covers operations of about 7,000 active establishments in the older provinces alone.

Since the publication of the complete report is often delayed because of the vast amount of work involved in checking and collating the large number of reports received from operators it is preceded by a series of provincial bulletins giving the principal statistics and also details of lumber sawn during the year by species and the volume and value of other sawmill products.

Separate reports are published for the most important wood-using industries including Furniture Manufacturing, Upholstering and Cabinet-making, Sash, Door and Planing Mills, Veneers and Plywoods, and Hardwood Floor-

ing. Bureau of Statistics Memoranda are also prepared covering each of the minor wood-using industries including Boxes and Baskets, Coffins and Caskets, Cooperage, Lasts, Trees and Wooden Shoefindings, Boatbuilding, Carriages and Sleighs, Woodenware, Excelsior, Beekeepers' and Poultrymen's Supplies, and Miscellaneous Wood-Using Industries. These memoranda, however, contain only the principal statistics and lists of firms reporting in each industry. A later annual report entitled "Wood-Using Industries" summarizes the principal statistics for all the above listed industries and includes tables of material used, employment, wages and salaries paid and products manufactured by all establishments in the group by both volume and value.

The annual report on the pulp and paper industry covers all its activities including details of pulpwood consumption by species and by processes of manufacture, of pulp manufactured for sale in Canada, for export or for own use by integrated mills, and the various types of paper and paperboard manufactured. Several tables of particular interest to those engaged in this industry are included in this report which also contains an up-to-date list of pulp and paper mills indicating the principal products of each establishment.

In the case of the paper-using industries, a separate annual report covers the paper box and bag industry and the roofing paper industry. A memorandum, only, is prepared for the miscellaneous paper products industries. For the printing and publishing, printing and bookbinding, lithographing, engraving, stereotyping and electrotyping, and trade composition industries, a combined annual report entitled "Printing Trades" gives the principal statistics for each industry and also contains tables of materials used and products manufactured for the entire group.

### **Monthly Reports**

The need for current statistics which became evident during the war was no less important after the cessation of hostilities. In January, 1946, the Forestry Section of the Census of Industry undertook the collection of monthly returns on production, shipments and stocks on hand of sawmills east of the Rocky Moun-

tains and in January of the following year extended this survey to all sawmills in British Columbia. This information is published in two separate monthly reports: (1) "Production, Shipments and Stocks on Hand of Sawmills East of the Rockies" contains tables showing the total estimated production, by provinces; reported production by the larger mills canvassed, by provinces and by species; reported shipments to and from each province and to the United States, the United Kingdom and other foreign countries; and reported stocks of sold and unsold lumber, by species and grades for each province, with unsold stocks further classified by thicknesses; (2) "Production, Shipments and Stocks on Hand of Sawmills in British Columbia" (for coast and inland mills separately) giving reported and estimated figures of sawn lumber, tie production, shipments of each to other provinces and to other countries and other analogous information.

In June, 1947, the Forestry Section took over from Timber Control the collection and compilation of statistics on production, consumption and inventories of pulpwood. At the beginning of 1948 it also undertook to collect monthly statistics on peeler logs, veneers and plywoods, sawn ties, wood shingles and laths. It is expected that publication of monthly reports covering these latter items will begin during the current year.

### ***Application of Published Data***

Forestry statistics are of particular interest to the Dominion and Provincial forest services which make considerable use of them in planning conservation and reforestation schemes. The Food and Agriculture Organization of the United Nations utilize the material to be found in these reports as does the Economic Commission for Europe. Products derived from the forest, as has been noted, play such a large part in the domestic and foreign trade of Canada that extensive use is made of these data in all considerations of trade matters. Labour unions representing workers within the industry or those allied to it, private and governmental economists and similar groups depend upon such information as is supplied in their studies of present and future developments.

# Statistical Trends

The 1949 monthly average of the general index of production (1935-39 = 100) was 184.2, a 1.5 percent advance over the 1948 average of 181.5. The latter figure was in turn 3.4 percent above the 1947 mark of 175.5. During the past year this index fluctuated rather widely reaching 190.4, the highest ever achieved under peace time conditions in June and a low of 178.2 in the following month when factory closing for holiday purposes made itself felt. For the month of December, 1949, this index stood at 187.1.

Financial transactions as reflected in cheques cashed at the banks against individual accounts rose to the highest mark in our history when they totalled \$87,544 million for the year 1949 as compared with \$80,687 million for the year 1948. The increase was thus 8.5 percent while the 1948 figure was 8.3 percent above that of 1947. It should be noted, however, that the 1949 figures include clearances at St. John's, Newfoundland, for the nine months April to December in the amount of \$357 million. Disregarding this factor it will be seen that the true increase in 1949 over 1948 was 8.1 percent.

The estimate of the sum of wages, salaries and supplementary labour income for the month of November, 1949, and for the eleven-month period (the December and the twelve-month figures are not yet available) are \$661 million and \$6,989 million respectively. The comparative figures for the same periods of 1948 are \$632 million and \$5,602 million and for 1947 are \$561 million and \$4,766 million. It will thus be seen that labour income increased in the first eleven months of 1949 by 24.8 percent over that of the same period of 1948 which in turn was 17.6 percent above that for the eleven-month period of 1947. Since the cost-of-living index did not increase proportionately as rapidly as did labour income, it appears reasonable to conclude that the overall purchasing power of paid workers in 1949 compared favourably with that of 1948. The employment situation in both years remained about the same.

Railway revenue freight loadings were in 1949 somewhat below the comparative figures for 1948 and 1947. Cars loaded in the year just closed were estimated to total 3,907,000 as

compared with 4,060,000 in the previous year and 3,957,000 in 1947. The declines being thus 4.0 percent and 1.3 percent from the previous years. In actual tonnage the 1949 loadings were 106,310,000 tons compared with 112,837,000 tons and 109,069,000 tons, with declines of 5.8 percent and 2.5 percent from the earlier years.

## Foreign trade

The dollar value of Canada's commodity trade continued on a very high level during the year 1949 with exports being valued at \$3,022.5 million, including re-export of foreign goods valued at \$29.5 million, and imports at \$2,761.2 million, total transactions thus amounting to \$5,783.7 million. The comparative figures for the previous year were: exports \$3,110.0 million, imports \$2,636.9 million and total transactions \$5,746.9 million. The decline in the value of exports amounted to \$87.5 million or about three percent but, since there has been a slight but general increase in prices the decline in real volume of exports has been estimated at about five percent. Similarly although imports have increased in dollar value by \$124.3 million or five percent the estimated increase by volume was only two percent.

The decline in exports and increase in imports has brought about a sharp drop in the favourable balance of trade which stood for the past year at \$261.3 million as compared with \$473.1 million in 1948. The drop in the favourable balance of trade, although slightly modified by an increase in the favourable balance with the United Kingdom was almost entirely caused by a sharp increase in the unfavourable balance with the United States resulting from increased purchases from that country without compensating sales to it.

Canada's trade relations with the United Kingdom resulted in sales to that country of goods valued at \$705.4 million and purchases from it to the value of \$307.4 million, with total transactions of \$1,012.4 million. The comparative figures for 1948 were exports \$686.9 million, imports \$299.5 million, total transactions \$986.4 million. Thus despite British efforts to narrow the gap between sales to and purchases from Canada, our imports, one year to the next, increased only \$7.9 million while

## THREE MAJOR FIELD CROPS

PRODUCTION HAS FLUCTUATED  
MILLION BUSHELS 1000 —  
SOMEWHAT ABOVE PRE-WAR AVERAGE

BUT VALUES HAVE INCREASED SHARPLY

\* Preliminary Estimates

our exports increased \$18.1 million. Canada's favourable trade balance with the United Kingdom (including the re-export of foreign goods) thus increased from \$389.2 million in 1948 to \$401.8 million last year. It would appear that the sale wheat at a new high price in continuing great quantity throughout last year was the major factor in bringing about this development.

During the year under review total transactions with the United Kingdom amounted to 17.5 percent of Canada's total trade, with imports from that country accounting for 11.1 percent of our total imports and exports to it amounting to 23.6 percent of all Canadian exports. The comparative figures for 1948 were: 17.3 percent of total transactions, 11.4 percent of Canadian imports and 22.3 percent of Canadian exports while for 1947 these figures were: 17.6 percent of total transactions, 7.4 percent of imports and 27.1 percent of exports. It will thus be seen that during the last three years the British share of Canadian trade has been relatively stable.

Trading with the United States accounted for 59.7 percent of all Canada's foreign trade transactions in 1949 with that country supplying 71.1 percent of the value of all goods imported into Canada and buying 50.2 percent of Canada's exports. The comparative percentages for earlier years were: 57.9 percent of total transactions, 68.5 percent of Canadian imports and 48.8 percent of Canadian exports in 1948 and 56.3 percent of total transactions, 76.7 percent of Canadian imports and 37.3 percent of Canadian exports in 1947. It will thus be seen that trade between Canada and the United States has increased slightly but steadily, year to year, for the last three years.

In dollar values total transactions with the United States in 1949 amounted to \$3,455.4 million, with exports to it being valued at \$1,503.5 million and imports from it at \$1,951.9 million. Canada, therefore had an unfavourable trade balance (again allowing for the re-export of foreign goods) of \$427.8 million, a figure not far off the balance Canada enjoyed in her trading with the United Kingdom. The comparative figures for the year 1948 were: transactions \$3,306.8 million, Canadian exports \$1,501.0 million, imports \$1,805.8 million. The very small increase in exports to the United States was due in large measure to an easing of American demand for Canadian goods following upon the business recession expe-

rienced in the former country during the earlier part of the year. Canadian imports, on the other hand, were stimulated by a greater supply of United States goods, particularly steel and steel products, available for export and greater Canadian demand consequent upon the high level of purchasing power maintained in this country throughout the year.

Exports to Latin America, Europe (excluding commonwealth communities) and other foreign countries were valued at \$458.9 million in 1949 as compared \$532.5 million a year earlier. A sharp decline in European purchases from \$316.8 million to \$228.0 million was a dominating factor in this development. It was probably brought about by the efforts of European countries to contract, as far as possible, buying in dollar areas. Imports from the same areas declined from \$323.4 million in 1948 to \$312.9 million in 1949.

Canadian gold production available for export, all of which is either sold for United States dollars or is otherwise used to increase our reserve of such dollars or our gold holdings amounted to \$138.9 million, considerably above the \$104.9 million average production for the past five years. The value of any of this gold which may have been actually exported is, of course, excluded from the figures on commodity trading quoted above.

### *Commodities Exchanged*

Exports of wood, wood products and paper were valued at \$875.3 million during the last year, similar exports during the year 1948 had a value of \$953.7 million, a slackening in sales of lumber and wood pulp being the major causes in this decline. Such products of the forest were, as they have been for the last several years, the greatest single item in Canada's exports. Next in order of importance came exports of agricultural and vegetable products to the value of \$773.0 millions compared with \$643.7 million in the previous year. Exports of non-ferrous metals and their products were valued at \$426.6 million as compared with \$395.9 million during the previous year.

Animals and animal products which are, in the main, closely allied to agricultural products, ranked next in importance with exports valued at \$338.4 million. The comparative figure for 1948 was \$434.9 million. The chief factor in this decline was the reduction

in the quantities of bacon and eggs shipped to the United Kingdom. Sales of beef cattle and other meats were also somewhat lower.

Iron and its products to the value of \$292.9 million were exported during the last year while imports of the same material were valued at \$891.6 million. Similar imports in the previous year were valued at \$782.3 million. As has been earlier noted increased availability of United States steel operated to bring about this rather sharp increase.

Non-metallic minerals and their products to the value of \$535.3 million were imported last year with a comparative figure of \$606.2 million being recorded for 1948. Lack of available United States coal and greater domestic oil production combined to bring about this reduction.

Non-ferrous metals and their products valued at \$174.7 million were imported. It has already been noted that exports in this group were valued at \$426.6 million. In this category exports are very largely the raw materials and imports a small fraction of them returning in manufactured form. Imports of similar materials in 1948 were valued at \$155.8 million.

### *Merchandising and Prices*

The cost-of-living index dropped one-half point from 161.5 on December 1, 1949 to 161.0 on January 3, 1950. The comparative figure for January 3, 1949 was 159.6. Thus the net movement of this index during the last twelve months has been an advance of only 1.4 points. This was in strong contrast to the movement of earlier years during which fairly rapid advances in the index were noted. The average for the year 1949 was 160.8 as contrasted with 155.0 for 1948, 135.5 for 1947, 123.6 for 1946, and 119.5 for 1945.

The slight advance January, 1949, to January, 1950, was brought about when a decline in the subindex devoted to food which is given the largest weight in preparing the general index (see table 17 of this issue of the *Canadian Statistical Review*) from 202.2 in the earlier year to 199.4 in the later did not offset increases

in the subindexes of the other components. These showed the following increases; rent from 121.7 to 125.0, fuel and light from 130.0 to 135.6, clothing from 181.9 to 183.3, and miscellaneous from 126.6 to 131.6. The subindex on home furnishings and services remained unchanged from January to January at 167.0.

The subindex on food reached its all time high on August 1, 1949, at 209.2 and since that date has dropped each month at a rate of approximately two points a month. This decline in food prices has more than offset rises in the other subindexes, with the result that the general index, which also reached its high in August last, has shown small declines each month since that date.

Retail trade purchases during the month of December, 1949, were valued at \$791.4 million, a new high monthly figure and three percent above the previous mark of \$770.5 million established in December, 1948. Sales in apparel stores, customarily popular gift centres, were off in December last from those of a year earlier, men's wear stores reported a decline of four percent, women's wear stores one of five percent, and family clothing stores one of seven percent. Electrical appliance and radio stores showed a gain of no less than 23 percent above those of the corresponding month of the previous year while furniture and jewelry stores reported advances of seven percent and six percent respectively. In most other lines December sales were close to the average gain of three percent for all retail trading.

The twelve month total volume of retail trading for 1949 was \$7,695 million, six percent above the \$7,277 million recorded in 1948. While all five of the Canadian economic areas showed increases in the last year over the previous one the greatest increases were noted in the prairie provinces where increased cash income from the sale of farm products and the expansion of the Alberta oil industry proved beneficial. Saskatchewan and Alberta both recorded 12 percent increases in the dollar volume of retail sales, Manitoba one of 11 percent while the remaining provinces showed increases of from two to five percent.

<sup>(1)</sup>Not applicable to Column 5 "Average hourly earnings".<sup>(2)</sup>Annual data as of June 1 are adjusted to include certain remote parts of several provinces which are not covered in the quarterly surveys. Quarterly data as of February 21, June 5, September 4, November 20, 1948, and March 5, June 4, August 20 and October 29, 1949.<sup>(3)</sup>Includes only those not at work and seeking work.<sup>(4)</sup>Includes retroactive payments to railway employees. Prior to 1945, figures shown are those relating to hourly earnings in one week in the month of highest employment (overtime included) reported by manufacturers to the annual Census of Industry. For period beginning in 1945, see table 12.<sup>(5)</sup>Conversions are included with annual data only.<sup>(7)</sup>Includes Newfoundland as of April, 1949.

\*Under revision.

<sup>(1)</sup> Personal income is given on an annual basis for months as well as for years.<sup>(2)</sup> Includes army civilian supply exports from February 1947.<sup>(3)</sup> Annual totals are averages of end of month figures.<sup>(4)</sup> Standard and Poor's Corporation. The series currently used represents 416 stocks.<sup>(5)</sup> Series revised to incorporate changes in classification and adjustment to benchmark levels. Revised data prior to August 1948 will be shown later.

<sup>(1)</sup> As of June 1. <sup>(2)</sup> Exclusive of stillbirths. <sup>(3)</sup> Not applicable to figures on population. <sup>(4)</sup> Yukon, North-West Territories and Newfoundland not included in figures for births, marriages and deaths.<sup>(5)</sup> Newfoundland data are included as of June 1, 1949.

Note.—Until the end of 1947, annual and monthly data for births, deaths and marriages are based on total final figures which are tabulated by month of occurrence on the basis of residence. The annual figures for 1948 are preliminary but tabulated in the same way. Monthly figures for 1947, 1948 and 1949 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that Province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics.

(2) As of July 1949, due to changes in method of recording payments, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the third Friday of the month, has been substituted for the number of persons receiving benefit in the month.

(3) Prior to 1944 data included deferred as well as current vacancies.

Note: As of April 1949, Newfoundland is included.

(1) Total pulp production was revised where necessary to cover "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

(2) Totals include unspecified pulp.

<sup>(1)</sup>Monthly totals of 1948 are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months.

<sup>(2)</sup>Excluding producers' interchange.

<sup>(3)</sup>Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.

<sup>(4)</sup>Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope. A substantial part of the imports appears after refinishing in total shipments. Production of primary iron and steel shapes from Canadian steel is equivalent to about 72 percent of the total production of ingots.

The twenty-three municipalities for which data are shown historically were selected as being leaders in the amount of permits issued during the years listed above. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December 1946.

<sup>(1)</sup>The coverage was extended to 507 municipalities in 1948, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

<sup>(1)</sup>Figures cover the production of firms which normally account for 85 per cent of the total for Canada.<sup>(2)</sup>Since January, 1949, includes concrete chimney blocks. <sup>(3)</sup>Prior to 1947 data on producers' sales were used to indicate production. Annual and monthly production for 1947, 1948 and 1949 are obtained by adjusting producers' sales for changes in inventories. <sup>(4)</sup>Includes Newfoundland as of May 1949.

<sup>(1)</sup> Includes Newfoundland as of May 1949.<sup>(2)</sup> Hollow blocks including fireproofing and load-bearing tile.<sup>(3)</sup> Planks and boards.<sup>(4)</sup> Prior to 1946 figures represent gross value of production. Figures for 1946 to 1948 are factory sales of firms which normally account for 96% of total Canadian production.

## Production and Acreage of Principal Field Crops

<sup>(1)</sup>Includes imports to the end of 1948-49 while in 1949-50 wheat imports are taken in as monthly data become available; inward shipments of oats and barley will be added at the end of the crop year.

<sup>(2)</sup>Figures of customs exports from 1945-46 to 1948-49 are adjusted to reflect actual physical movements from Canada. Previous to 1945-46 adjusted figures are not available. <sup>(3)</sup>Prior to 1936-37 Canadian customs figures are used. From 1936-37 to date, exports consist of overseas clearances plus U.S. imports for consumption. <sup>(4)</sup>Includes customs exports of Canadian oatmeal and rolled oats.

<sup>(1)</sup> Available for January, April and August only. 1948 and 1949 indexes are subject to revision.<sup>(2)</sup> Includes advance equalization payment on barley until March 1947, and subsidy on hogs from 1944 to date.<sup>(3)</sup> Based on price for hogs including Dominion premium. A rise in ratio favours production of beef.<sup>(4)</sup> Prior to 1941 prices were quoted on a live weight basis.<sup>(5)</sup> Prior to August 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

<sup>(1)</sup>Annual results are from the Canadian Balance of International Payments and monthly totals as given in Trade of Canada. In the balance of payment figures trade statistics have been adjusted to bring them closer to the international exchange of goods with each country, by using payments data or other substitutes in the case of certain special groups of transactions where physical movements of goods do not reflect international financial transaction, —e.g.—special shipments of munitions during the war, and the warehousing of Canadian wheat outside of Canada. Mutual aid exports are represented by financial transactions which in some years are subject to revision. Non-commercial items have been deducted throughout.

<sup>(2)</sup>Official holdings of Gold and U.S. dollars are given as of end of year and month in Statistical Summary of the Bank of Canada and Annual Report of Foreign Exchange Control Board.

<sup>(3)</sup>Does not include proceeds of 100 million dollar loan floated by the Government of Canada in the United States in August 1949.

\*See footnote of page 96.

<sup>(1)</sup>The annual statistics embrace all steam railways, while monthly data refer to railways with annual operating revenues of \$500,000 or over. <sup>(2)</sup>Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities. <sup>(3)</sup>For the Canadian National and the Canadian Pacific, retroactive wage increases, totalling \$29,085,087, paid in September 1948, were not included in that month's operating expenses. Payrolls as now reported monthly are according to the new wage scale.

## Operating Statistics of Canadian Railways

<sup>(1)</sup> As reported by Financial Post.<sup>(2)</sup> As of December 31.<sup>(3)</sup> Annual data obtained by averaging monthly ratios.

# ANNUAL AND SPECIAL PUBLICATIONS OF THE DOMINION BUREAU OF STATISTICS DURING JANUARY, 1950

## *Education.—*

ENSEIGNEMENT ÉLÉMENTAIRE ET ENSEIGNEMENT SECONDAIRE, 1944-1946. (Formant la Partie I de l'Aperçu biennal sur l'Enseignement, 1944-1946) K. P., 1949, 142 p., 50 cents.

## *Population.—*

Census of the Prairie Provinces, 1946. ALBERTA: OCCUPIED FARMS BY AREA OF IMPROVED LAND. 7-357-8. January 24, 1950. (Eng. and French) 27 p., 10 cents. SASKATCHEWAN, OCCUPIED FARMS BY AREA OF IMPROVED LAND. 7-357-7. January 13, 1950. (Eng. and French) 22 p., 10 cents.

## *Social Analysis.—*

ESTIMATED POPULATION BY MARITAL STATUS AND SEX, CANADA AND PROVINCES, 1931-1948. 7-9090. (Eng. and French) 4 p., 10 cents. THE CONTROL AND SALE OF ALCOHOLIC BEVERAGES, 1948-1949, 7-910-0. 4-1-50. 48 p., 50 cents.

## *Agriculture.—*

VEGETABLE REPORT. January 4, 1950. F. R. No. 8, 1949. (Eng. and French ed.) 4 p., \$1.00 for series of 8 reports. FLOUR MILLS, 1949: Location and Capacity of Mills. 14 p., \$1.00.

## *Forestry.—*

THE LUMBER INDUSTRY, 1947. 13-1510. 19-1-50. (Eng. and French) 21 p., 35 cents. OPERATIONS IN THE WOODS: Final Estimates of Forest Production, 1947. 13-1010. (Eng. and French) 18 p., 25 cents.

## *Mining.—*

SUMMARY REVIEW OF THE GOLD MINING INDUSTRY, 1948. A31-49. 48 p., 50 cents. PRELIMINARY ESTIMATE OF CANADA'S MINERAL PRODUCTION, 1949. A 1. 4 p., 15 cents. SILVER-LEAD-ZINC MINING INDUSTRY, 1948. A33-49. (Including Silver-Cobalt Mining Industry) 21 p., 30 cents.

## *Manufacturing.—*

WOOD-USING INDUSTRIES, 1947. 13-1250. (Eng. and French) 17 p., 35 cents a copy. THE BOILERS, TANKS AND PLATE WORKS INDUSTRY, 1948. A37-49. 6 p., 25 cents. THE CRUDE PETROLEUM INDUSTRY, 1948. A40-49. 10 p., 25 cents. THE FERTILIZER TRADE, July 1, 1948—June 30, 1949. A44-49. 26-1-50. 20 p., 30 cents. THE MEDICINAL AND PHARMACEUTICAL PREPARATIONS INDUSTRY, 1948. A39-49. 9 p., 25 cents. Miscellaneous METALS INDUSTRY, 1948. A35-49. 23 p., 30 cents. THE NATURAL GAS INDUSTRY, 1948. A38-49. 12 p., 25 cents. THE PAINTS AND VARNISHES INDUSTRY, 1948. A41-49. 8 p., 25 cents. THE SOAPS, WASHING COMPOUNDS AND CLEANING PREPARATIONS INDUSTRY, 1948. A43-49. 11 p., 25 cents. THE TOILET PREPARATIONS INDUSTRY, 1948. A36. 7 p., 25 cents. THE CONFECTIONERY, COCOA, CHOCOLATE AND CHEWING GUM INDUSTRIES, 1948. 14-1330. 22 p., 25 cents.

## *Health and Welfare.—*

JUVENILE DELINQUENTS (Repr. from the Annual Report of Criminal and Other Offences, 1948). D. B. S. 6-1020P. K. P., 1949. (Eng. and French) 24+44 p.

## *Transportation.—*

CENTRAL ELECTRIC STATIONS, 1947. 20-1900. (Eng. and French) 39 p., 25 cents. THE MOTOR VEHICLE 1948. 20-1700. 35 p., 25 cents.

## *Merchandising and Services.—*

CHAIN STORE SALES AND STOCKS, 1948 and 1949. 16-4090. 6 p., 25 cents. MOTION PICTURE THEATRES, EXHIBITORS AND DISTRIBUTORS, 1948. 16-1010. 26 p., 35 cents. RETAIL CHAINS, 1948. 16-1050-48-11. 15 p., 25 cents.

## *External Trade.—*

TRADE OF CANADA, 1948. Vol. I—Summary and Analytical Tables. D.B.S. 10-1010P. 305 p.; Vol. II—Exports. D.B.S. 10-1020P. 559 p. K.P., 1949. (Eng. and French) \$2.00. REVIEW OF FOREIGN TRADE; First Half Year, 1949. 19-1-50. 79 p., 50 cents.

## MEMORANDA OF THE DOMINION BUREAU OF STATISTICS.

## *Agriculture.—*

PRODUCTION AND STOCKS OF MARGARINE. Production, by Months, 1949. January 11, 1950. 1 p., 10 cents per copy.

## *Manufacturing.—*

PACK OF PEARS, 1949 (Preliminary) 2 p., 10 cents. THE BEEKEEPERS' AND POULTRYMEN'S SUPPLY INDUSTRY, 1948. 13-1320. (Eng. and French) 2 p., 10 cents. COFFINS AND CASKETS, 1948. 13-1370. (Eng. and French) 3 p., 10 cents.
