Statistical Trends

Instead of the usual analysis of Current Economic Conditions, a number of charts are presented in this issue, as in that of October, together with brief descriptions of the movement of some of the more significant figures in the tables of the Review.

Industrial Production

Following its decline during July and August from preceding months — partly attributable to seasonal plant shutdowns, the index of industrial production moved up from 205.3 in August to 207.7 in September, at which level it was 1.6 per cent above the standing of 204.5 for September last year. This increase is smaller than those in June, July and August over the corresponding months of 1950, and these in turn were considerably less than the gains recorded in the first five months this year. The latter averaged 14 per cent, while the average for the four months June to September was about 5 per cent.

Manufacturing production in September showed a greater advance from August levels than total production, the index for manufactures rising to 214.7 from 210.4 in August. The latest figure, however, shows little change from that of 214.4 for September last year, a rise in the index for durables to 255.0 from 250.5 offsetting a decline in the index for non-durables to 191.1 from 193.3 (Table 6 and charts).

Labour

Employment.— Employment showed a further small advance at the first of September, the composite index for the nine leading industries rising from 184.3 at the first of August to 185.0, which is 6.3 per cent above the standing of 174.1 for September last year. The indexes for construction, transportation and communication, finance, and services were higher than in August, those for forestry, mining, and public utilities slightly lower, and for trade unchanged. All were considerably higher than for September 1950.

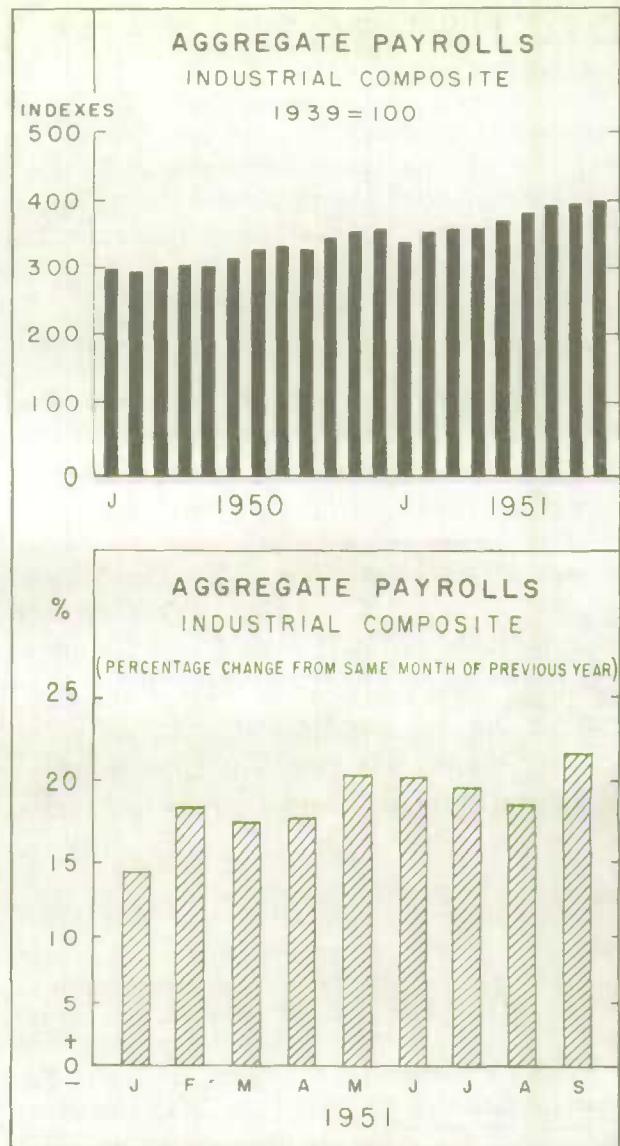

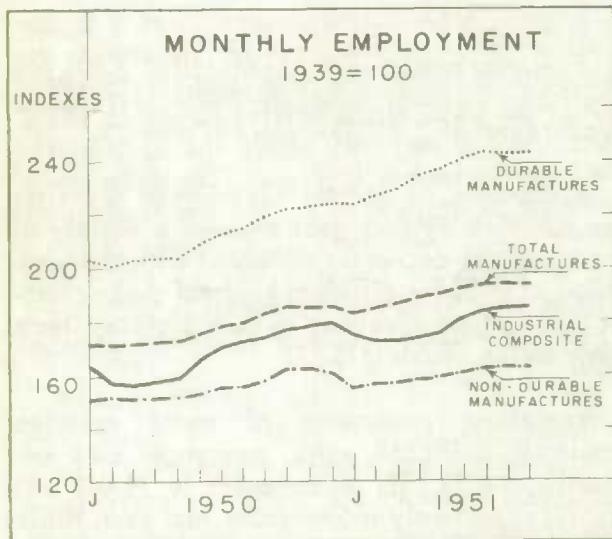

Manufacturing employment was down fractionally at the beginning of September from a month earlier, with the index for non-durable manufactures showing a slight decrease, while

that for durables was unchanged. Compared with a year earlier, there was an increase of more than 6 per cent in manufacturing, employment in the production of durable goods being higher by 10.5 per cent and that in non-durable goods by 2.5 per cent (Table 9 and charts).

Payrolls and Weekly Earnings.— Aggregate industrial payrolls showed a larger increase at the first of September than total employment, the index rising to 399.1 from 394.0 (revised) a month earlier. This index has risen steadily from 338.2 at the first of January, and the latest standing is nearly 22 per cent above the figure of 328.0 twelve months earlier. Payroll indexes declined in the month for mining, public utilities, and trade, and advanced for all other industries. Average weekly wages and salaries rose from \$50.16 (revised) to \$50.61, which compares with \$44.17 in the week ending September 1 last year. Weekly earnings fell slightly during August in mining, trade and public utility operation, and rose in the other six industry groups (Table 9 and charts).

Labour Income.— The estimated total of salaries, wages and supplementary income continued to move upward in July, amounting to \$832 million as compared to \$825 million in June and \$704 million in July 1950 (Table 8).

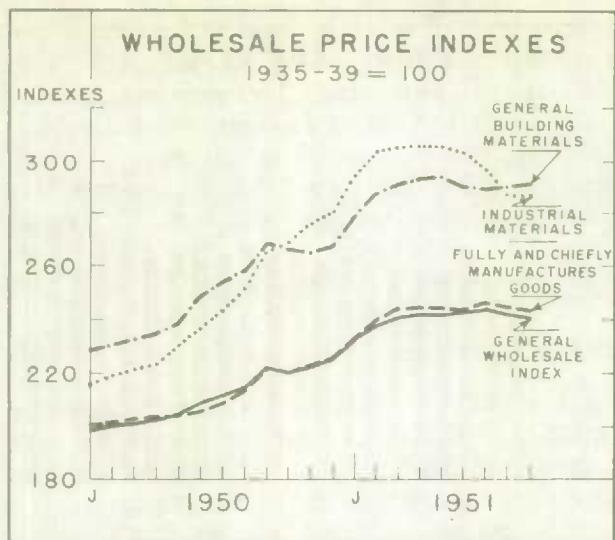

Labour Disputes.— Time lost in labour disputes totalled 105,200 man-working days in September as compared to 219,500 in the previous month and 37,500 in September last year. Over half of the total time lost in September was in the tobacco industry (Table 16).

Prices

Retail.— The cost-of-living index continued to move upward during September, rising to 190.4 at October 1 from 189.8 at September 1, with all groups except food and rent (not surveyed) showing increases. The food index, for the second successive month, declined slightly to 249.7 from 251.1. The index of retail prices of commodities advanced from 221.6 in September to 222.4 in October (Table 17).

Wholesale.— Repeating its August decline but with a smaller change, the general index of wholesale prices eased off in September to 240.1 from 241.5, leaving it about 8 per cent above the index of 222.6 for September last year. Indexes for vegetable products, iron and

its products, non-ferrous metals and non-metallic minerals increased from August to September, and those of the four other commodity groups declined. The drop in the fibres and textiles index brought it below last year's September level (Table 18). As in August, wholesale prices of both raw and partly, and fully and chiefly manufactured goods, industrial materials, and farm products declined, and those of general and residential building materials rose (Table 19 and chart).

Fuel and Power

Electric Power.— Total consumption of electric power amounted in September to 4,276 million kilowatt hours, down from 4,436 million in August but up from 3,979 million in September last year (Table 20).

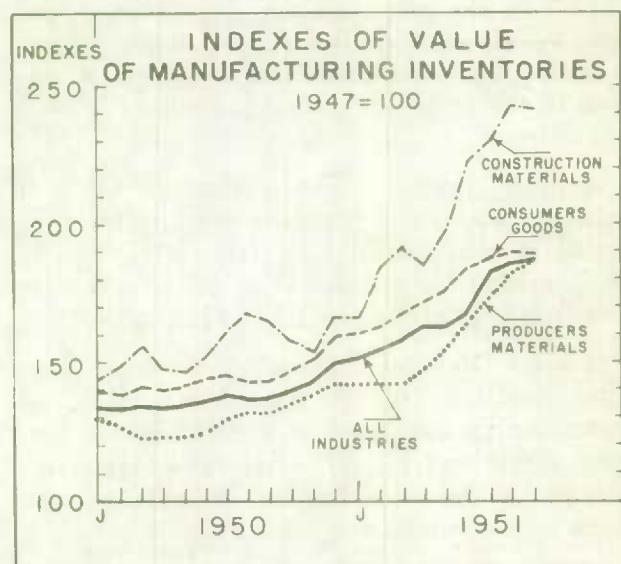

Petroleum.— Shipments of domestic crude petroleum set another record in August at 5,330,000 barrels, up from the previous peak of 4,936,000 in July. Imports were down from July but continued the gains over 1950, amounting to 7,836,000 barrels as compared to 6,504,000 barrels in August last year (Table 22). Total production of refined petroleum products also rose in August to a new peak figure for a month of 12,163,000 barrels from 11,277,000 in July (Table 23).

Manufacturing

Inventories.— The value of total inventories moved up again in September, the index rising to 187.7 from 185.9 in August. The month's in-

crease was due to advances in the capital goods index from 154.5 to 159.9, and the producers' materials index from 181.1 to 187.4. The construction materials index declined from 242.7 to 241.7. The overall index for consumers' goods eased slightly from 189.2 to 189.1, decreases being registered for durable and semi-durable goods and an increase for non-durable goods (Table 26 and chart).

Commodities.— Production of pig iron amounted to 212,500 tons in September compared with 199,400 tons a year earlier, and of steel ingots to 257,900 compared with 267,000 tons; while shipments of primary iron and steel shapes totalled 245,400 tons in August as against 222,000 tons for the same 1950 month (Table 33).

Footwear output in August totalled 2,895,000 pairs of all kinds, slightly under last year's August total of 2,912,000 pairs (Table 29).

Production of factory clothing in the first two quarters of this year showed a variety of increases and decreases compared with the same period of 1950 for different kinds of dress clothing, but uniform advances in work clothing items (New series, Table 31).

September production of motor vehicles amounted to 29,860 units, passenger cars accounting for 19,190, as compared to 38,040 and 27,270 respectively in September last year. While

down since May, output for the nine months this year was above that for the corresponding 1950 period at 329,763 compared to 294,203 units (Table 34).

Domestic Trade

Retail.—Total retail sales in September are estimated at \$850.5 million, which compares with \$864 million in August and \$829 million in September 1950. Estimated sales values in the month were higher than a year earlier in all economic regions except British Columbia. In the nine months ended September, retail sales aggregated \$7,305 million, an increase of 11.5 per cent over the estimated \$6,550 million for the first nine months of 1950. Increases in the dollar value of total sales have been recorded for each of the nine months this year and have

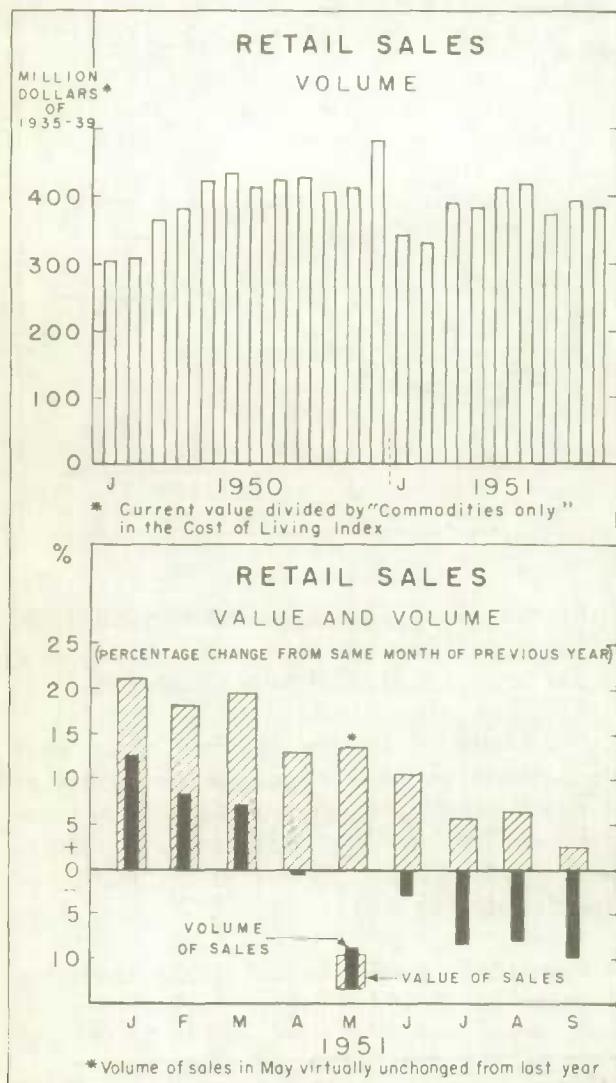

ranged from 10 to 21 per cent in the first half of the year and from 2.6 to 6.5 per cent in the July-September quarter, the smallest increase being in September. In contrast with these gains in value, the volume of retail sales has been lower in June, July, August and September than in corresponding months last year (Tables 45, 46 and 47, and charts).

External Trade

The value of domestic exports in September was \$320,100,000, 14.7 per cent above the value recorded in September 1950, and 13.1 per cent above September 1948, the previous postwar high for this month. Imports in the month reached \$311,500,000, 11.4 per cent above their 1950 mark, which was the previous peak September. Both exports and imports were somewhat lower than in the immediately preceding months. The month's trade yielded a small credit balance of \$12,000,000 (Tables 49 and 50).

Both export and import prices have been higher throughout 1951 than in 1950. Although import prices have dropped slightly since June, they were still 12 per cent higher in September than in the same month last year. Export prices were fractionally lower in September than in the preceding month, but were also nearly 12 per cent higher than in September 1950. In the same comparison, the volume of exports was nearly 3 per cent greater, while that of imports dropped slightly. For the nine months ending September, the volume of both exports and imports was above any previous postwar year.

The United States took only 58 per cent of September exports as opposed to 69 per cent a year ago. The share of the United Kingdom increased from 11 to over 16 per cent, and of European countries (except Ireland) from just over 6 to almost 11 per cent. There was less change in the direction of imports. The share of the United States in September imports was almost 68 per cent as opposed to just over 63 per cent a year earlier, and Europe supplied almost 5 per cent as against little more than 3 per cent in September 1950. These increases were balanced by a decline in the share of the United Kingdom to about 9 from nearly 13 per cent, and of Latin America to 7 from 9 per cent (Table 51).

*Revised back to 1948, and involves not only the adjustment of the series to new bench-mark data for that year but also the shift to the most recent Standard Industrial Classification system.

3

⁽¹⁾ Personal income is given on an annual basis for months as well as for years. ⁽²⁾ Includes army civilian supply exports from February, 1947. ⁽³⁾ Annual totals are averages of end-of-month figures. ⁽⁴⁾ Standard and Poor's Corporation.

4 Note.—Until the end of 1949, annual and monthly data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1950 and 1951 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Estimates are given by years as of June 1, and in Canada as a whole, as of the first day of the last month of each quarter. ⁽²⁾Exclusive of stillbirths. ⁽³⁾Not applicable to figures on population. ⁽⁴⁾Yukon, North-West Territories and Newfoundland not included in figures for births, marriages and deaths.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. (2) As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month. (3) Supplementary benefit payments are excluded. (4) Includes prepayment of \$4,000,000 by Post Office.

(1) As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys. (2) Excluding producers' interchange. (3) Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products. (4) Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope.

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

42 (1) The coverage was extended to 507 municipalities in 1948, and now stands at 546, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

(2) As of January, 1950, Newfoundland is included.

⁽¹⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.⁽²⁾Since January, 1949, includes concrete chimney blocks. ⁽³⁾Prior to 1947 data on producers' sales were used to indicate production. Data for 1950 and 1951 are obtained by adjusting producers' sales for changes in inventories.⁽⁴⁾Includes Newfoundland as of May, 1949. ⁽⁵⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁶⁾Planks and boards. ⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

(1) Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date.

45

(2) Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (3) Prior to 1941, prices were quoted on a live weight basis. (4) Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

Beginning with April, 1950, Newfoundland is included.

59

⁽¹⁾In the upper section of this table, the annual statistics embrace all steam railways, while monthly data refer to railways with annual operating revenues of \$500,000 or over. ⁽²⁾Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

*Assignments made under the Bankruptcy and Winding Up Acts.

⁽¹⁾Quarterly data for the last five columns are monthly averages.⁽²⁾In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
