Statistical Trends

As will be seen in the following charts, which compare each month with the same month in the preceding year, the recorded increases in production, sales and incomes were generally at a maximum in the early part of the year. Expansion was especially noticeable in consumer durable goods. Although there was a slowing down in the later months of the year, the averages for the year to date are considerably above those of the corresponding periods of 1950.

Production and Employment

In the period January to October 1951, the volume of manufacturing output rose 8 per cent over the same months of 1950. A considerable

expansion in the production of durable goods accounted for the greater part of this increase. Over the period, production in these industries advanced 13 per cent, while the corresponding gain in the output of non-durable commodities was only about 5 per cent. Since the production of such consumers' durables as automobiles, electric refrigerators and washing machines declined considerably in the latter part of the year from the levels of earlier months, it is likely that the average increase shown above for the first ten months is greater than that which will be recorded for the year as a whole. It may be noted that the output of motor vehicles during the twelve months of 1951 is expected to surpass the record established in 1950.

Sustained improvement in industrial activity is noted in such defence-supporting industries as iron and steel, shipbuilding, aircraft, non-ferrous metals, petroleum products and chemicals. During the first ten months, the index of iron and steel products averaged 13 per cent higher than during the same period of 1950. From January to October, steel mills turned out a record 2,864,000 tons of ingot steel, nearly 5 per cent more than during the corresponding months last year. As a result of the great domes-

tic demand for steel, particularly for heavy construction projects and growing defence requirements, exports of primary iron and steel shapes have dropped sharply, while imports during the first ten months jumped 56 per cent over the same period of 1950. Together with the gain in Canadian production, this has resulted in an increase, in the ten months' comparison, of 868,000 tons or 28 per cent in the tonnage available for domestic consumption.

The rapid expansion of the domestic market together with the utilization of recently completed refining facilities have contributed to a marked gain in the output of petroleum products. During the first nine months of 1951, net production of saleable petroleum products was over 17 per cent greater than in the corresponding period of 1950. Producers' shipments of crude oil increased by 73 per cent to 35,000,000 barrels in the first nine months of 1951.

The 1951 wheat crop was estimated in November at 562 million bushels, more than 100 million bushels greater than the 1950 outturn and second only to the record 567 million bushels harvested in 1928. As a result of extremely unfavourable weather conditions, a substantial proportion of grain crops is likely to remain in the fields until next spring. The realization of the current estimate will be possible only if the unthreshed part of the crop remains in reasonably good condition and can be harvested without a significant loss during the winter and spring months.

The trend of employment in 1951 has followed a pattern similar to that of industrial output. The

index of employment for nine leading industries averaged 8 per cent higher in the ten months' comparison, with the percentage increase in the latter months having shown a deceleration from the earlier part of the year. The month-to-month trend however has been generally upward, and considerable gains have been shown in such defence industries as shipbuilding and aircraft. On October 1, the total index was 5 per cent higher than on the same date of 1950. The number of persons without jobs and seeking work (as reported in the August Labour Force survey) was only 1.4 percent of the total civilian labour force compared with 1.9 per cent a year earlier. Average hourly earnings in manufacturing rose to a new high of nearly \$1.20 at the beginning of October, representing a gain of nearly 16 per cent over the corresponding date of 1950.

Income and Expenditure

Salaries, wages and supplementary labour income totalled \$6,236 million in the first eight months of 1951, 17 per cent above the same period of 1950. As will be seen from the accompanying chart, the monthly increments continued to show substantial gains, relative to retail sales.

An indication of the increase in personal expenditure can be obtained from the statistics of retail trade. These show that retail sales during the first 10 months of 1951 were 15 per cent

higher than in the same period of 1950. The nature and extent of pre-Budget buying, especially of consumer durable goods, has been discussed in previous issues.

Foreign Trade

The recent announcement of the end of Foreign Exchange Control came at a time when Canada's holdings of gold and U.S. dollars were at a high and relatively stable level.

Although there was a large deficit on merchandise trade, imports from the United States

having exceeded exports by 487 million dollars in the first ten months of 1951, this was offset by a large inward movement of capital, with the result that there was no appreciable decline in reserves of gold and U.S. dollars. The inward capital movement can be partly ascribed to investment outlays such as the development of oil in Alberta, iron ore in Quebec and electric power for aluminum making in British Columbia.

It may be noted that only a portion of the import surplus from the United States may be accounted for by the increase in purchases of investment goods. Inventory accumulation has been at a very high level throughout the year, and it may be inferred that a significant portion of imports has been neither consumed nor invested in durable capital goods but added to inventories of goods on hand.

Prices

Three major price series, the wholesale index, the cost-of-living index and the index of commodities and services used by farmers, all

showed substantial increases during the year, but with most of the rise taking place during the earlier months. Higher prices were registered in the early part of the year for numerous basic commodities including livestock, raw wool, raw rubber, butter, wood pulp, hides and skins. Price declines for certain commodities in the later months reversed the upward movement of the general wholesale index and in November it was 239.1, 2.1 per cent below the July figure. It was still considerably above the level of 1950.

The cost-of-living index continued to increase up to November 1st. For the 10 months as a whole, it was 10.6 per cent above the same period of 1950.

(1) For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively. (2) Monthly data are producers shipments. (3) Data exclude persons in certain remote parts of several provinces and Indians on reservations. Newfoundland included as of March, 1950. (4) Includes only those not at work and seeking work. (5) Newfoundland included as of April, 1949. (6) Conversions are included with annual data only.

4 Note.—Until the end of 1949, annual and monthly data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1950 and 1951 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Estimates are given by years as of June 1, and in Canada as a whole, as of the first day of the last month of each quarter. ⁽²⁾Exclusive of stillbirths. ⁽³⁾Not applicable to figures on population. ⁽⁴⁾Yukon, North-West Territories and Newfoundland not included in figures for births, marriages and deaths.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. (2) As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month. (3) Supplementary benefit payments are excluded. (4) Includes prepayment of \$4,000,000 by Post Office.

(1) As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys. (2) Excluding producers' interchange. (3) Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products. (4) Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope.

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

42 (1) The coverage was extended to 507 municipalities in 1948, and now stands at 546, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

(2) As of January, 1950, Newfoundland is included.

⁽¹⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.

43

⁽²⁾Since January, 1949, includes concrete chimney blocks. ⁽³⁾Prior to 1947 data on producers' sales were used to indicate production. Data for 1950 and 1951 are obtained by adjusting producers' sales for changes in inventories.⁽⁴⁾Includes Newfoundland as of May, 1949. ⁽⁵⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁶⁾Planks and boards. ⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

(1) Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date.
 (2) Based on price for hogs including Dominion premium. A rise in ratio favours production of beef.
 (3) Prior to 1941, prices were quoted on a live weight basis.
 (4) Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

Beginning with April, 1950, Newfoundland is included.

59

(1) In the upper section of this table, the annual statistics embrace all steam railways, while monthly data refer to railways with annual operating revenues of \$500,000 or over. (2) Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

Note: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividends, additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 28 companies operating in Canada representing 91 per cent of new ordinary insurance sales.

*Assignments made under the Bankruptcy and Winding Up Acts.

(1) Quarterly data for the last five columns are monthly averages.

(2) In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
