Current Economic Conditions

Production, employment and earnings continue to exceed previous high levels. The mid-year survey of investment intentions indicates a further expansion in plans for new construction and for new machinery and equipment, reflecting in part the effects of the defence programme. There have been recent declines in sales of automobiles and other consumer durable goods, but despite these, the rate of total consumer spending continued to advance during the month of May. While government defence spending is rising steadily, it is still below the level provided for by the current fiscal year appropriation of \$1.7 billion.

The three major spending groups, business, consumers and government, thus continue to place a heavy burden on available domestic supply. Some of the excess demand has been met by a rapid expansion of merchandise imports from the United States. Nevertheless, retail prices have continued to rise in response to both domestic and external pressures. However, there are recent indications that pressures on wholesale prices have eased somewhat.

Production and Employment

The rising trend of output during recent months continued in April, as the over-all index of industrial production reached a new peak of 218.4 (1935-1939 = 100). The average for the first four months was 14 per cent greater than for the corresponding period last year. The main component of the industrial production index, manufacturing output, also rose by 14 per cent.

In the manufacturing field, the non-durable goods index advanced 2.5 points in April to a record high of 199.9. The first four months of the year were 8 per cent above the same period of 1950. Contributing to the gain in this sector were higher levels of production in foods and beverages, rubber, textiles and clothing, paper products and chemicals. Of particular significance in the past few months has been the in-

creased output in the pulp and paper industry. During the first four months, production of wood pulp was over 13 per cent greater than for the same period of 1950, while the output of newsprint rose 6.4 per cent. An important factor in the growth of pulp production, as distinct from newsprint, has been the marked rise in sales abroad, especially to the United States. Exports of this commodity jumped 30 per cent in the first four months compared with the corresponding period last year. Activity in the rubber and cotton industries has risen sharply. In the four months' comparison, the consumption of natural and synthetic rubber increased by more than 28 per cent, and that of raw cotton by almost 14 per cent.

The production index for durable goods, which had risen by 23 per cent in the four-month comparison with the previous year, fell slightly to 277.5 in April from the post-war peak of 280.3 established in March. A sharp falling-off in the output of motor vehicles was an important factor in arresting the advance in this sector. Reduced output of passenger cars was responsible for the decline of 6,700 units from the March peak. Even so, the total of 41,000 vehicles shipped from factories was the third highest on record. The index for iron and steel products continued to advance in April, and for the first four months of 1951 was nearly 18 per cent higher than for the corresponding period last year. From January to April this year, steel mills turned out a record 1,200 thousand tons of steel. This was nearly 100 thousand tons more than was produced in the same period of 1950. As a result of the great domestic demand for steel, exports of primary iron and steel shapes have dropped sharply since January, while imports during the first four months have increased by 69 per cent over the same period last year. Together with the gain in Canadian production, this has resulted in an increase, in the four months' comparison, of 320,000 tons or 24 per cent in the tonnage available for domestic consumption.

A feature of recent months has been the advance in the output of electric power. Reflecting increased demand and the completion of new generating units, the power index for the first four months averaged nearly 18 per cent above the same period of 1950.

Accompanying the steady rise in industrial production, the index of manufacturing employment continued its upward trend in April when it reached 188.7, nearly 10 per cent higher than in April 1950. The four-month average was more than 8 per cent above last year's, chiefly due to an increase in employment in the durable goods industries which rose by more than 13 per cent. The level of employment in the non-durable goods industries rose by only 4 per cent.

According to the most recent Canadian Labour Force Survey, persons with jobs increased from 4,796,000 in March 1950 to 5,000,000 in March 1951, i.e. by 204,000. This increase was accompanied by a reduction of 140,000 in those without jobs and seeking work. Reflecting the fact that "persons with jobs" increased at a higher rate than the rise in the labour force as a whole, "persons with jobs" as a percentage of the labour force rose from 93.9 per cent for the week ending March 3 last year to 96.7 per cent in March this year. It is also significant that the seasonal decline in "persons with jobs" was negligible (from 97.8 per cent for the week ending November 4 to 96.7 per cent in March).

Personal Income and Expenditure

High employment, coupled with increases in average earnings, has resulted in significant gains in personal income. Labour income, the main component of personal income, rose to \$2,240 million in the first quarter of 1951, a gain of 16 per cent over the same period a year ago. In manufacturing, labour income rose by 19 per cent, followed by construction with a gain of 16 per cent. The combined group of public utilities, transportation, storage, communication and trade showed a gain of 13 per cent, while finance and services (including government) rose by 9 per cent. Latest available pay-roll indexes indicate that further large

gains in labour income were established in April and May.

The average weekly wages and salaries of Canadian workers in nine major industries rose by 20 cents in April to a new high of \$48.39. This compared with \$44.77 in April 1950, and was a gain of more than 8 per cent. In manufacturing, average weekly earnings continued to climb, and at April 1 stood at \$49.98, representing an advance of 8.9 per cent over the same date last year. There was a fractional decline in the number of hours worked per week.

Consumer expenditure continues at a high level, with the total value of retail trade increasing from \$815 million in April to \$885 million in May. Most of the retail trade groups shared in the increase. However, notable earlier gains in automobiles and household appliances were set back to some extent in May, with sales of motor vehicle dealers declining from \$167 million in April to \$160 million. Small declines were also shown for furniture and radio and appliance stores. Department store sales showed very little increase during the month, although they had previously been running well ahead of a year ago. For the five months ending with May, total retail sales were 17 per cent above a year ago.

Capital Expansion

The most recent survey of investment intentions indicates that Canada's capital expenditures in 1951 will reach \$4,561 million, consisting of \$2,724 million for new construction and \$1,837 million for machinery and equipment. This represents an increase of 20 per cent over capital expenditures of \$3,791 million in 1950, but at least one-half of the increase may be attributed to higher prices, so that the gain in real terms is approximately 10 per cent. The value of new construction has risen by 16 per cent and machinery and equipment by 28 per cent. In addition, it is expected that repair and maintenance expenditures will amount to \$1,738 million this year, 10 per cent above the \$1,585 million for 1950.

A comparison of the revised 1951 estimates with actual expenditures in 1950 indicates a substantial planned expansion in industries occupying key positions in Canada's industrial structure and defence programme. Examples of the expansion include an increase in capital expenditures of 200 per cent in non-ferrous metals products, 175 per cent in petroleum and coal products, 155 per cent in iron and steel, 96 per cent in chemicals, 90 per cent in electrical apparatus, 63 per cent in forestry, 31 per cent in mining, and 17 per cent in central electric stations. No significant change between 1950 and 1951 is shown in the value of housing construction, which stands at \$827 million for 1951. This would imply a decline in the volume of new housing construction. The total of trade, finance, insurance and real estate, and commercial services showed little change. An increase in outlays of 29 per cent (from \$475 to \$612 million) by governments, is largely accounted for by the increase in defence construction.

Foreign Trade

A very rapid rise in imports from the United States took place during the first five months of the year, providing an important part of the present increased over-all requirements of the Canadian economy. The trade statistics show a total of \$1,233 million imported from the United States from January to May this year, over 50 per cent higher than the comparable period last year. Increased purchases from the United States were offset to some extent by increased sales to that country, but there remained a deficit of \$312 million on the five months' trading. This does not necessarily imply a drain on Canadian foreign exchange reserves of similar magnitude, since there are capital and other foreign exchange transactions which must be taken into account. Moreover, it must be pointed out that the seasonal pattern in this trade would tend to emphasize the deficit in the first few months of the year. Canadian trade with other countries was approximately in balance, there being a small surplus on United Kingdom trade. The result on the combined trade account was a deficit of approximately \$300 million.

Price data on trade are available only up to April. During the first four months of 1951, the

price index for exports averaged 13.5 per cent higher than for the same period of 1950. The physical volume of exports was about 14 per cent higher. Import prices averaged 14 per cent higher in this period, with the volume of imports showing a gain of 32 per cent over a year ago.

Prices

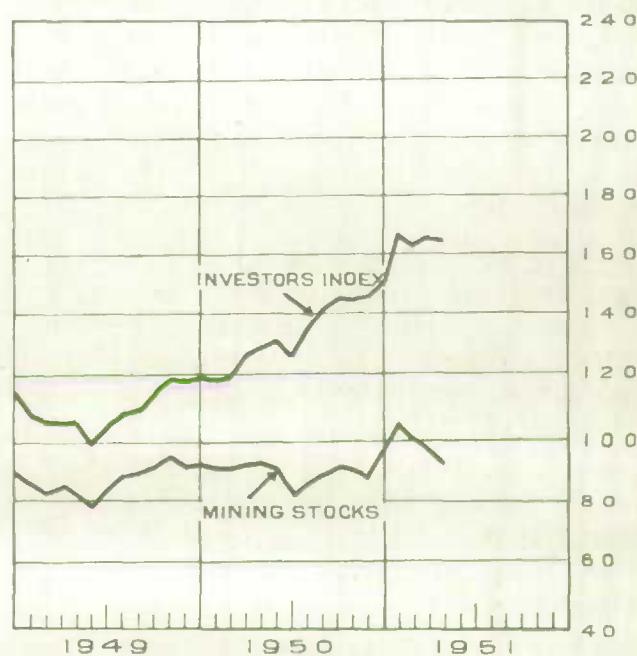

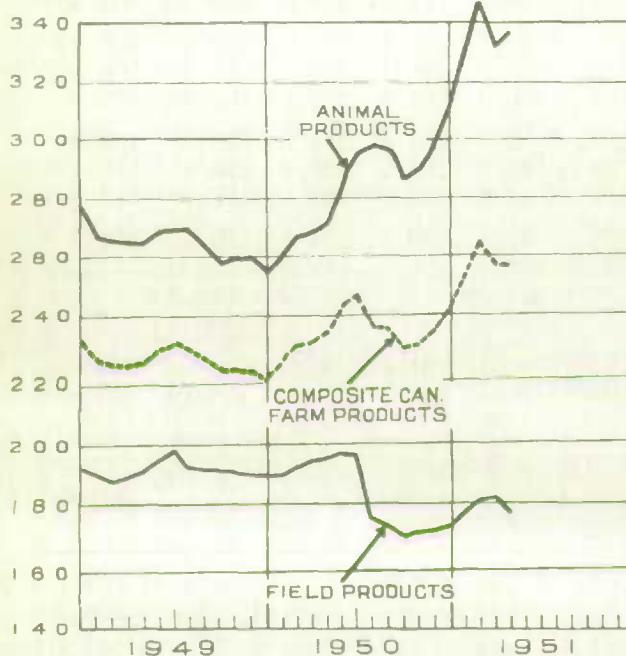

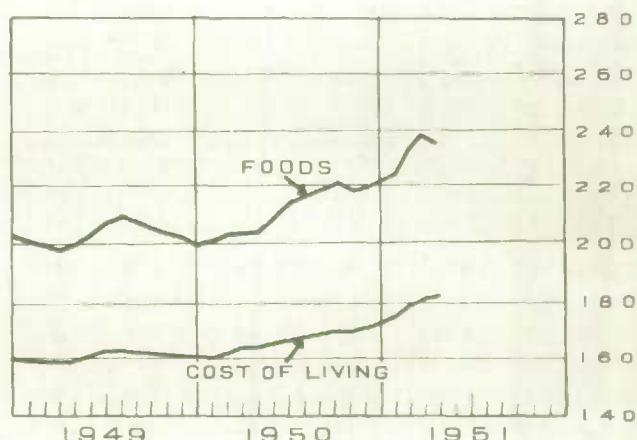

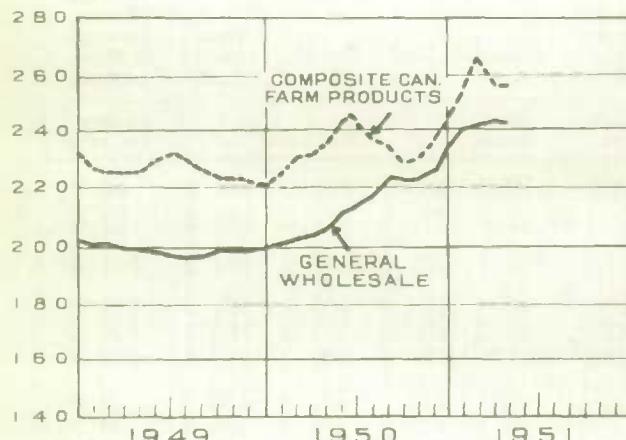

The cost-of-living index advanced another 2.1 points in May, bringing the total at June 1 to 184.1. Approximately two-thirds of this increase was accounted for by higher food prices. The food index moved up from 235.4 to 239.8, as a result of advances in eggs, butter, pork and fresh vegetables, coupled with smaller increases for numerous other items. In the home furnishings and services group, increases were fairly general, although higher prices for hardware and electrical equipment accounted for most of the change in this index from 194.9 to 197.1. In advancing from 201.5 to 202.5, the clothing series recorded the smallest gain since the beginning of the year. The index of miscellaneous items rose 0.3 points to 141.0, following slight increases in health care, gasoline and street-car fares. An important factor in the continued rise was the rent increase, this index advancing from 137.6 to 139.8.

The general wholesale price index in total has shown no significant upward or downward movement in the three months up to the end of May. There occurred a very slight decline in the sensitive weekly index of industrial materials during June, while Canadian farm products rose slightly during the month. At the present time, therefore, there appears to be a tendency for prices in primary and secondary markets to level off. World markets have shown declines in spot prices of selected staple commodities but these have not been sufficient to cause a significant downturn in the Canadian wholesale index. Declines may be noted in sub-groups such as fresh citrus fruits, vegetable oils, oils and fats, cocoa products, hides and skins, raw rubber, tin and wool. These, however, are offset by increases in the price of important Canadian export products such as wood pulp and non-ferrous metal, and in the domestic price content of iron and steel products, building materials, and animal products.

⁴ Note.—Until the end of 1949, annual and monthly data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1950 and 1951 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Estimates are given by years as of June 1, and in Canada as a whole, as of the first day of the last month of each quarter. ⁽²⁾Exclusive of stillbirths. ⁽³⁾Not applicable to figures on population. ⁽⁴⁾Yukon, North-West Territories and Newfoundland not included in figures for births, marriages and deaths.

The Canadian Labour Force

TABLE 7

CLASSIFICATION	1947	1948	1949	1950 ⁽¹⁾	1950				1951
	Survey Averages				March 4	June 3 ⁽²⁾	Aug. 19	Nov. 4	March 3
	Thousands of persons 14 years of age and over								
Non-institutional Civilian Population.....	8,960	9,132	9,324	9,709	9,679	9,690	9,717	9,751	9,800
Civilian Labour Force.....	4,908	4,982	5,090	5,216	5,108	5,233	5,324	5,201	5,172
Agricultural.....	1,119	1,100	1,094	1,038	951	1,077	1,153	974	854
Non-agricultural.....	3,789	3,882	3,996	4,178	4,157	4,156	4,171	4,227	4,318
With jobs.....	4,810	4,879	4,957	5,046	4,796	5,083	5,221	5,084	5,000
At work—35 hours or more.....	4,222	4,301	4,377	4,422	4,041	4,569	4,563	4,513	4,245
At work—15 to 34 hours.....	318	337	348	373	483	333	299	378	433
At work—1 to 14 hours.....	114	109	97	100	120	93	92	94	111
Not at work but with jobs.....	156	132	135	151	152	88	267	99	211
Paid workers.....	3,262	3,372	3,469	3,571	3,397	3,564	3,639	3,683	3,665
Agricultural.....	119	134	144	112	89	122	133	102	69
Non-agricultural.....	3,143	3,238	3,325	3,459	3,308	3,442	3,506	3,581	3,596
Without jobs and seeking work.....	98	103	133	170	312	150	103	117	172
Persons not in the Labour Force.....	4,052	4,150	4,234	4,493	4,571	4,457	4,393	4,550	4,628

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error.

⁽¹⁾Newfoundland included in estimates from March, 1950. ⁽²⁾Due to flood conditions, estimates for Manitoba for June, 1950 were based on previous experience rather than direct survey.

Reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

11

*Average weekly wages and salaries.

⁽¹⁾Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies and non-metallic mineral products. ⁽²⁾Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products, and miscellaneous manufacturing industries.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. (2) As of July, 1949, due to changes in method of recording payments, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the third Friday of the month, has been substituted for the number of persons receiving benefit in the month. (3) Supplementary benefit payments are excluded.

The twenty-three municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and to 523 in January, 1950, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

⁽¹⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.⁽²⁾Since January, 1949, includes concrete chimney blocks. ⁽³⁾Prior to 1947 data on producers' sales were used to indicate production. Data for 1950 are obtained by adjusting producers' sales for changes in inventories. ⁽⁴⁾Includes Newfoundland as of May, 1949. ⁽⁵⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁶⁾Planks and boards. ⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

(1) Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date.

(2) Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (3) Prior to 1941, prices were quoted on a live weight basis. (4) Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

(1) Official holdings of Gold and U.S. dollars are given as of end of year and month in Statistical Summary of the Bank of Canada and Annual Report of Foreign Exchange Control Board. (2) Annual results are from the Canadian Balance of International Payments and monthly totals as given in Trade of Canada. (3) As of January, 1950, Newfoundland is included. (4) Does not include proceeds of 100 million dollar loan floated by the Government of Canada in the United States in August, 1949.

*For explanatory notes see April issue, pages 96 and 97.

Beginning with April, 1950, and the corresponding months of 1949 Newfoundland is included.

59

⁽¹⁾In the upper section of this table, the annual statistics prior to 1950 embrace all steam railways, while monthly averages for 1950 and monthly data refer to railways with annual operating revenues of \$500,000 or over. ⁽²⁾Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

Note: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

*Assignments made under the Bankruptcy and Winding Up Acts.

(1) Quarterly data for the last five columns are monthly averages.

(2) In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. The number of proposals for this period were: J. 13, A. 16, S. 7, O. 8, N. 20, D. 15, J. 12, F. 21 and M. 18. Liabilities of insolvent persons making proposals are not available.
