Current Economic Conditions

Current economic conditions are illustrated by the behaviour of series in the accompanying chart. The recent period has been one of internal adjustment, with prices and production showing a tendency to level off. The adjustments that have been taking place are concerned partly with the change-over to defence production and partly with the reaction to the heavy consumer purchasing of durables in the earlier part of the year. Prices which a year ago were rising sharply, partly due to forces of a speculative nature, have recently shown less tendency to increase. Inventories have also shown a levelling off after large increases in the first three quarters of 1951. Employment and incomes have been rising continuously. Salaries, wages and supplementary labour income for the first ten months of 1951 were seventeen per cent above the same period of 1950. Retail sales have not maintained the rate of increase recorded earlier in the year; nevertheless, for the eleven months of 1951, they were eleven per cent above the same period of 1950, in value terms.

Industrial Production and Employment

The chart on page ii shows that while industrial production in 1951 was eight per cent above 1950, there was considerable diversity among the component indexes. (Figures in the chart and text are based on the first eleven months of 1950 and 1951). The industries producing goods which are predominantly for consumption, and which are affected by the changes in effective demand of consumers, were invariably below the general average. These industries include foods and beverages, textiles and clothing, tobacco products and electrical apparatus such as radios and refrigerators. For the latter two groups, actual declines are shown. On the other hand, defence supporting industries and industries producing a considerable portion of their product for export, showed large increases in output. These include transportation equipment, mining, primary iron and steel and pulp and paper. It may be noted that the transportation equipment group includes items such as aircraft, ships and locomotives, and items

PRODUCTION INDICATORS

purchased by consumers such as motor vehicles. The latter showed an increase of nine per cent for the year despite the recent monthly decrease in output.

Among the primary industries, a large increase in production is expected for agriculture, but the statistic is not yet available. Mining production of all types was up by two per cent and employment in forestry operations showed an increase of approximately thirty per cent, in the most recently available comparisons of 1951 with 1950.

The index of industrial employment in November (186.2, 1939 = 100) was 4.5 per cent above November of 1950 (178.1). Average weekly wages and salaries increased by 12.3 per cent, from \$46.29 in November, 1950 to \$51.97 in November 1951. Monthly labour income for the first ten months of 1951 was seventeen per cent above that for the same period of 1950.

Retail Trade, Stocks and Consumer Credit

The value of retail sales in November was approximately nine per cent above November of a year ago. In the month of December, a weighted average of department store weekly sales was up only one per cent above the high figure of December 1950. The eleven month comparison shows total sales to be up by eleven per cent in value, which when compared with commodity price increases of approximately thirteen per cent, would indicate that a small decline in volume took place. Stock figures are available for department and chain stores only. As of November 1, they were up by seventeen per cent and nineteen per cent respectively, over November a year ago. The department store stock-sales ratios rose from 2.5 at November 1, 1950 to 3.0 at November 1, 1951. Chain store stock-sales ratios were relatively unchanged, between the same dates. Instalment accounts outstanding were reduced by approximately \$40 million, or 27 per cent, between the ends of the first and third quarters of 1951.

Foreign Trade

For the eleven months of 1951 ending in November, the value of exports was 25 per cent above that recorded in the corresponding period

of 1950, while their volume was ten per cent higher. Imports showed even greater gains. In the first eleven months their value was over thirty per cent above the corresponding figure for 1950, and their volume was over fourteen per cent higher than 1950.

Trends in trade varied considerably within the year. The import increase was especially pronounced in the first and second quarters but tapered off in the third quarter. In the fourth quarter, imports were little greater than in the fourth quarter of 1950. On the other hand, exports showed much less increase in the first two quarters of the year than in the latter quarters. The negative balance on the year's trade was thus due to trade in the first-half-year, whereas in the last half-year taken separately a positive balance was achieved.

The abolition of the emergency exchange conservation controls at the beginning of the year facilitated an increase in imports of many consumers' type manufactures early in the year. However, as the market for consumers' durables slackened, imports of many of them, notably automobiles, fell off sharply. Export volume was restricted in the first half-year particularly by

limited supplies of various commodities, a notable example being high grade wheat. In the last half-year these factors were less important.

Overseas markets played a more important part in Canada's trade in 1951 than in 1950, but trade with the United States remained dominant. That country took about 60 percent of Canada's exports (65 per cent in 1950) and provided about 68 per cent of imports (67 per cent in 1950). The United Kingdom took about 16 per cent of our exports and provided almost 11 per cent of imports, and other European countries took a further 8 percent of exports and provided over 4 per cent of imports.

Farm Cash Income

Cash income of Canadian farmers from the sale of farm products in 1951 amounted to an all-time high total of \$2,819,400,000, according to an advance preliminary estimate. Comparisons with preceding years are shown in the chart on page iii. The increase in 1951 was largely attributable to substantial grain participation and adjustment payments by the Canadian Wheat Board, higher average livestock prices and unusually heavy marketings of western grain during the spring months.

(1) For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively. (2) Monthly data are producers shipments. (3) Data exclude persons in certain remote parts of several provinces and Indians on reservations. Newfoundland included as of March, 1950. (4) Includes only those not at work and seeking work. (5) Newfoundland included as of April, 1949. (6) Conversions are included with annual data only.

4 Note.—Until the end of 1949, annual and monthly data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1950 and 1951 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Estimates are given by years as of June 1, and in Canada as a whole, as of the first day of the last month of each quarter. ⁽²⁾Exclusive of stillbirths. ⁽³⁾Not applicable to figures on population. ⁽⁴⁾Yukon, North-West Territories and Newfoundland not included in figures for births, marriages and deaths.

Reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month. 11

*Average weekly wages and salaries.

⁽¹⁾Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products. ⁽²⁾Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products, and miscellaneous manufacturing industries.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. (2) As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month. (3) Supplementary benefit payments are excluded. (4) Includes prepayment of \$4,000,000 by Post Office.

* Revision incorporates the final payments for wheat, oats and barley for crop year 1950-51.

⁽¹⁾ Excluding Newfoundland. From August, 1950, to July, 1951, prairie farm prices for wheat, oats and barley are final prices. Since August, 1951, prairie grain prices are initial prices only.

(1) As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys. (2) Excluding producers' interchange. (3) Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products. (4) Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope.

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

42 ⁽¹⁾The coverage was extended to 507 municipalities in 1948, and now stands at 546, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

⁽¹⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.⁽²⁾Since January, 1949, includes concrete chimney blocks. ⁽³⁾Prior to 1947 data on producers' sales were used to indicate production. Data for 1950 and 1951 are obtained by adjusting producers' sales for changes in inventories.⁽⁴⁾Includes Newfoundland as of May, 1949. ⁽⁵⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁶⁾Planks and boards. ⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

⁽¹⁾Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date.⁽²⁾Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. ⁽³⁾Prior to 1941, prices were quoted on a live weight basis. ⁽⁴⁾Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

Beginning with April, 1950, Newfoundland is included.

59

(1) In the upper section of this table, the annual statistics embrace all steam railways, while monthly data refer to railways with annual operating revenues of \$500,000 or over. (2) Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

*Assignments made under the Bankruptcy and Winding Up Acts.

⁽¹⁾Quarterly data for the last five columns are monthly averages.⁽²⁾In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
