2101—501

Current Economic Conditions

While manufacturing production had not regained the levels of a year ago, the April figure was the fourth consecutive one to show an improvement over the preceding month. These gains were more than seasonal ones. Indications of high level output were prominent in many non-manufacturing sectors of the economy, particularly in the extractive, transportation and numerous service-rendering industries. The positive balance on foreign trade continued into April. Department store sales in May were 10 per cent above a year ago. Total retail sales in April were 7 per cent above a year ago, although the later Easter date this year must be taken into account in assessing the bearing of this statistic upon the general question of a recovery in consumer spending. Monthly labour income and farm cash income in the first quarter of 1952 were 14 per cent and 18 per cent respectively, above the first quarter of 1951. Wholesale and retail prices continued to decline in the most recent monthly data, but the weekly Canadian farm products price index has shown an upturn in recent weeks.

Production

The preliminary index of industrial production, which measures the volume of output of mines, factories and electric power plants, registered its fourth consecutive monthly increase in April as it rose two points to a level of 213.9 (1935-1939=100). For the first four months of this year, the index averaged 209.6. Although this is about 2 per cent below the level for the corresponding period last year, it represents a gain of 11 per cent over the first four months of 1950. The metals component of the mining index reached a post-war high in April as recent gains in the output of base metals were extended. Production of nickel, lead and zinc was substantially greater during the January-April period this year than in the same months of 1951.

In April, the general level of manufacturing activity, although somewhat below the corresponding level of 1951, continued its upward trend of recent months. The average for the first four months was 215, or 4 per cent below the same period last year, but over 9 per cent above

that of 1950. Mixed trends were in evidence in the non-durable manufactures sector. Production of processed foods and beverages was generally at near record levels and about 2 per cent greater than for the first four months last year. Cut-out of chemical and petroleum products was well ahead in the same comparison. Activity in the paper products industry showed little change. By contrast, production in such industries as tobacco products, rubber products, leather products, primary textiles and clothing was considerably below the high levels of a year ago. April data, however, indicate improvement in the trend of output for tobacco products, rubber products and clothing.

Owing mainly to the lower levels of manufacturing output in non ferrous metal products, electrical appliances and non-metallic mineral products, the durable goods index was also somewhat below last year's levels for the first four months. The drop in April from March, however, was the result of the large seasonal decline in sawmill operations. The sharp recovery in the production of motor vehicles in April, combined with steadily increasing activity in the aircraft and shipbuilding industries, resulted in a substantial rise in the transportation equipment index which now stands well above last year's levels. Production of iron and steel products during the first four months showed little change from the corresponding period of 1951.

Manufacturing production accounts for about 30 per cent of net national income at factor cost. Some impression of gains in output in the remaining 70 per cent of the Canadian economy can be got from various employment and volume series. Gains in mining and electric power output were noted above. Monthly employment in forestry during the first quarter of 1952 was up 11 per cent over the same quarter of 1951. The decline in the volume of housing construction was not quite offset by increases in public and private residential construction. Ton-miles of revenue freight, an indicator of volume of output arising in transportation, was up 16 per cent over the first quarter of 1951. Labour force data show increases in numbers of persons with jobs in wholesale and retail trade, finance, insurance

and real estate, as well as the broad service category, which includes community, recreation, business, personal services and government service.

Incomes

Monthly labour income continued to increase, by comparison with a year ago, in the first quarter of 1952. The increase amounted to 14 per cent over the first quarter of 1951. In four preceding quarters, the comparisons with the same quarter of a year ago, have been between 15 and 18 per cent; therefore, the most recent comparison indicates some retardation in the rate of increase of monthly labour income. Increases in average rates of remuneration as indicated by average weekly earnings have been much more important than increases in numbers, in contributing to the above increases. Average weekly earnings in the three pay periods ending nearest to February 1, March 1 and April 1, 1952, were nearly 12 per cent above the same period of 1951.

Farm cash income in the first quarter of 1952 amounted to \$585.5 million, 18 per cent larger than the amount of \$494.4 million for the first quarter of 1951. Marketings of western grains were unusually heavy during the first three months of this year. Further, the Canadian Wheat Board distributed to farmers nearly \$49 million in the form of wheat payments during this period, while only \$18 million was paid out, on account of wheat, oats and barley, in the first quarter of 1951. Income from the sale of livestock was down as a result of both smaller marketings and lower prices than a year ago, but incomes from dairy products increased as a result of both increased production and higher prices.

Retail Sales

Retail sales in April 1952 were 7 per cent higher than in April 1951. Corresponding gains in January, February and March were 3 per cent, 6 per cent and 1 per cent respectively. The relatively large gain in April may be attributed partly to Easter shopping, as Easter occurred in April this year and last year in March. It will be observed that the March increase is,

accordingly, considerably lower than that recorded for January and February. Department stores sales in May were 10 per cent above May of a year ago.

During April sales of stores specializing in household appliances and furniture continued at levels substantially below last year. Sales of new passenger automobiles were also below corresponding sales of a year ago. However, the discrepancy in April is less marked than in earlier months. A decline in sales of lumber and building material dealers would appear to be related to the decline in activity in house-building.

For the first four months of the year retail sales averaged 4 per cent above the same period last year. Indications are that price changes more than accounted for the value increase in total sales. Although, as indicated below, retail prices were declining significantly during the first four months of 1952, on the average they were higher than a year ago.

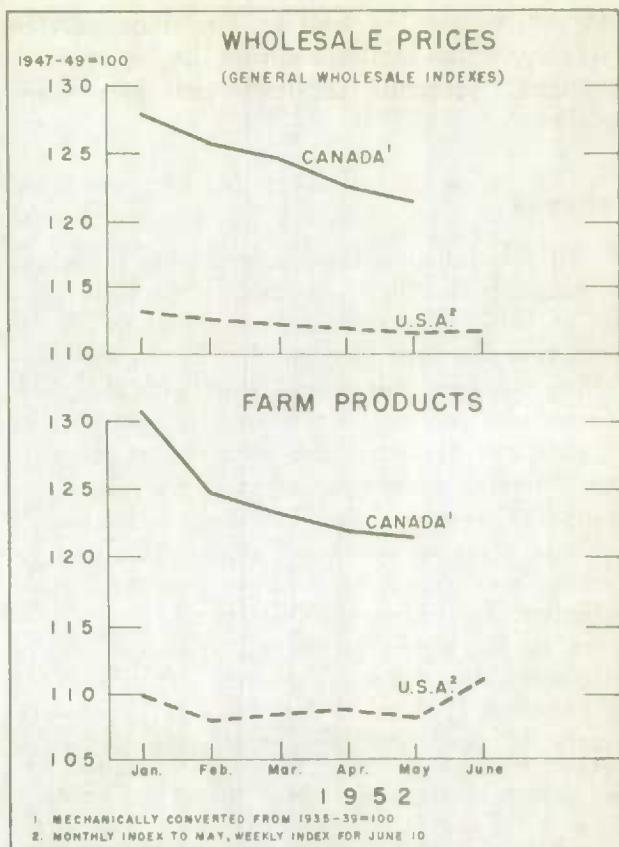

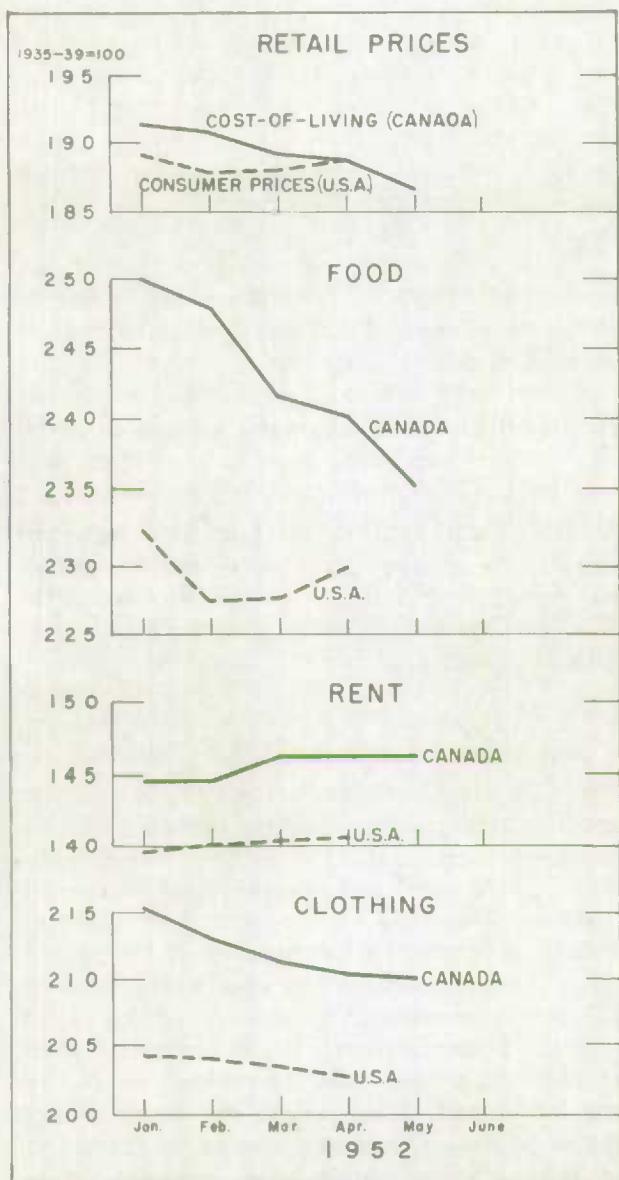

Retail charge and instalment accounts outstanding fell from \$505.5 million at the end of the fourth quarter of 1951 to \$445.2 million at March 31, 1952.

Price Trends—U.S.A. and Canada

Recent declines in the Canadian cost-of-living index have been mainly a result of lower food prices, just as higher food prices were a main cause of earlier increases in the index. Between January and May of this year, the cost-of-living index has dropped by about 5 points (from 191.5 to 186.7) and food prices, which have a large weight in the index, have dropped 15 points from 250.0 to 235.3. The clothing group has also been declining steadily in the Canadian index, while rents and certain services have been increasing. The United States' consumers' price index has shown no definite trend in either direction, in the past five months, although it increased fractionally in March and April. The latter increases were mainly due to food price increases, especially of fruit and vegetable prices in April. Rents have increased and clothing prices have decreased, as is the case in Canada. In summary, the major difference in behaviour in recent months, of Canadian and United States retail price indexes, is at-

tributable to food prices. It should also be noted that in a comparison using the official base periods, the Canadian index was higher than and is now equal to its United States counterpart (see chart).

In the general wholesale price indexes, there is no conclusive evidence of an upturn in the United States. The new weekly index, which is on a sampling basis designed to forecast the more comprehensive monthly index, showed a minor increase from 111.6 in May to 111.7 at June 10, (1947-49=100). The January 1952 level was 113.2. United States farm products prices have declined fractionally in recent months, as

have processed food prices at wholesale. There was a small increase in these two indexes in the week ended June 10. Canadian general wholesale and farm products' price indexes both declined steadily from January through May. The general wholesale index declined from 236.8 in January to 224.8 in May (1935-39=100). The weekly index of Canadian farm products has shown small increases in recent weeks (up to June 13), largely due to increases in potato prices, but also partly due to minor increases in livestock prices.

Foreign Trade

Canada's exports and imports continued at a very high level in April. The value of domestic exports was more than 17 per cent greater than in April, 1951 and their volume was also higher by almost 17 per cent. New post-war records were thus established for the month in both value and volume. The value of imports was 18 per cent less than in April 1951, and their volume was lower by 7 per cent. However they were much greater in both value and volume than in any other post-war April. The result of higher

exports and lower imports was to produce an export balance of \$27 million in the month's trade, as opposed to an import balance of \$93 million in April 1951.

The trade situation in earlier months of 1952 was similar to that of April. For the first four months of 1952, the increase in exports over the same period in 1951 has been 21 per cent in value and 16 per cent in volume. For the same four months, import values were 7 per cent less than in 1951, their volume about 2 per cent lower.

Both export and import prices have been declining steadily in 1952, and in April export prices fell a further 1.5 per cent while import prices declined 1.7 per cent. Export prices are still higher than in the early months of 1951, however, although import prices have been below the 1951 level since February. In 1951 the more rapid increase of import prices than of export prices contributed significantly to the import balances on trade in the first half-year; in 1952 the greater decline in import prices has contributed to the export balances recorded in the first four months.

The direction of trade in April was similar to that in the earlier months of 1952, although the United Kingdom increased its share in Canada's exports and imports and there was some further decrease in the share of the United States in exports. Changes in the first four months of 1952 compared with the same period in 1951 were pronounced. In the first four months the United States took only 54 per cent of Canada's domestic exports, as opposed to 65 per cent in

the same period of 1951, and provided 76 per cent of imports, as opposed to only 72 per cent in 1951. The share of the United Kingdom in exports has risen to 17 per cent from 14 per cent last year, but its share in our imports has declined to 8 per cent from 11 per cent.

Most of Canada's principal export commodities recorded higher values in April than a year ago. The principal exception is the animal products category; exports of cattle were nil and exports of beef were small in April as a result of the United States' embargo on these items. Wheat and other grains continued to move overseas in large volume, and exports of newsprint and wood pulp were greater than a year ago. Lumber exports were less than in April 1951, however. Exports of automobiles and parts showed a smaller increase over the 1951 level than in earlier months of this year, and exports of farm machinery were at the 1951 value. The principal base metals all showed higher export values in the month, and exports of aircraft and parts were also higher.

Average prices of imported fibres and textiles were 27 per cent below the high level of April 1951, and the volume of imports in this group has also declined. Imports of vegetable oils and rubber and of fuels were also much lower than a year ago. Imports of aircraft and parts were higher, reflecting increased defence spending, and imports of farm and non-farm machinery also rose. But imports of automobiles and parts were well below their April 1951 value, and imports of many other iron and steel items also declined.

4 Note.—Until the end of 1949, annual and monthly data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1951 and 1952 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾ Estimates are given by years as of June 1. ⁽²⁾ Exclusive of stillbirths. ⁽³⁾ Not applicable to figures on population. ⁽⁴⁾ Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

Note: Newfoundland is included as of 1949.

(1) Accrued net income from farm production. (2) Includes outlay on new durable assets such as building and highway construction by governments, other than government business enterprises. Also includes the change in inventories of government commodity agencies and of the Defence Production Revolving Fund. Excludes shipments, under NATO, of previously produced military equipment but includes replacements of new equipment. (3) Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals and business investors. (4) Excludes shipments of military equipment to NATO countries under the Defence Appropriation Act.

TABLE 7

CLASSIFICATION	Survey Averages	1951		1951		1952
		March 3 ⁽¹⁾	June 2 ⁽¹⁾	Aug. 18 ⁽¹⁾	Nov. 3	March 1
		Thousands of persons 14 years of age and over				
Non-institutional Civilian Population.....	9,734	9,688	9,714	9,744	9,790	9,887
Civilian Labour Force.....	5,231	5,114	5,255	5,343	5,210	5,179
Agricultural.....	947	839	998	1,069	880	832
Non-agricultural.....	4,284	4,275	4,257	4,274	4,330	4,347
With jobs.....	5,123	4,944	5,172	5,266	5,110	4,967
At work—35 hours or more..	4,467	4,200	4,632	4,579	4,458	4,305
At work—15 to 34 hours....	381	428	335	309	451	389
At work—1 to 14 hours....	96	109	114	79	82	93
Not at work but with jobs....	179	207	91	299	119	180
Paid workers.....	3,745	3,628	3,752	3,798	3,800	3,725
Agricultural.....	100	68	112	130	90	87
Non-agricultural.....	3,645	3,560	3,640	3,668	3,710	3,638
Without jobs and seeking work..	108	170	83	77	100	212
Persons not in the Labour Force..	4,504	4,574	4,459	4,401	4,580	4,708

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Newfoundland included in estimates from March, 1950.

⁽¹⁾Revised. See "Labor Force Bulletin, quarterly survey, week ended March 1, 1952." Revised survey averages for 1948, 1949 and 1950 will be published at a later date.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. (2) As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month. (3) Supplementary benefit payments are excluded. (4) Includes prepayment of \$4,000,000 by Post Office.

Thousand dollars														

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of February, 1952, stands at 818, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

⁽¹⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.⁽²⁾Since January, 1949, includes concrete chimney blocks. ⁽³⁾Prior to 1947 data on producers' sales were used to indicate production. Data for 1951 and 1952 are obtained by adjusting producers' sales for changes in inventories.⁽⁴⁾Includes Newfoundland as of May, 1949. ⁽⁵⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁶⁾Planks and boards and flooring. ⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

(1) Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date.

(2) Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (3) Prior to 1941, prices were quoted on a live weight basis. (4) Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

Beginning with April, 1950, Newfoundland is included.

59

(1) In the upper section of this table, the annual statistics prior to 1951 embrace all steam railways, while monthly averages for 1951 and monthly data refer to railways with annual operating revenues of \$500,000 or over. (2) Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

Note—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. 65

*Annual and monthly data for 1951 have been revised for change in the reporting practice of three companies.

*Assignments made under the Bankruptcy and Winding Up Acts.

⁽¹⁾Quarterly data for the last five columns are monthly averages.

⁽²⁾In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
