Current Economic Conditions

Advances from last year in production, employment and domestic trade continued through March, to maintain a high level of activity in the first quarter of the current year. Lower values of domestic exports continued to be a major exception to the general gains, and some sectors of the economy, such as forestry operations, pulp and paper output and ocean

fishing, experienced lower activity in the first quarter of the current year than in the same quarter of 1952. This article reviews briefly these quarterly comparisons, and sketches some of the changes, in the same comparison, in primary and secondary production and in sectors of the retail trade.

TABLE 1. First Quarter Comparisons

Item	Unit	1953		1952		Percentage change	
		March (1)	Monthly average 1st Q. (2)	March (3)	Monthly average 1st Q. (4)	(1) <hr/> (3)	(2) <hr/> (4)

* First of month.

p - Preliminary

1. February

2. April 1.

** Two months only

Two sectors which have received much attention, namely residential construction (housing starts and completions), and motor vehicles sales, continued in March to record very high gains from the levels of March, 1952. Housing starts in March of this year were 5,568 units, compared with 3,555 units in the same month of last year; this increase brought starts for the quarter of the current year up to 11,930 units, an increase of 64 per cent from the same period of last year. Completions of 18,392 in the first three months of 1953 were higher by 41 per cent than those in the same quarter of 1952.

Sales of new motor vehicles in March of this year totalled 49,930 passenger cars and

commercial vehicles, valued at \$125 million. For the quarter, about 118,600 new vehicles were sold, with a value of \$297 million, higher by 52 per cent in number and 45 per cent in value than in the same quarter of last year. Passenger vehicles sold in those three months of 1953 were valued at \$232.6 million, an increase in value of 62 per cent from the same part of 1952. Financing of sales of new and used vehicles for the first three months of 1953 of \$154 million, was 54 per cent more than in the same months of last year.

The gradual reductions in price indexes continued in March. The consumer price index of 114.6 at April 1 was 0.2 points down from the March 2 level, and lower by nearly 2 per

cent than at the same time last year; this was the fifth consecutive monthly decline, and put the index at the lowest level since July, 1951. The food component accounted for most of the latest reduction, reflecting particularly lower quotations for fresh meats, potatoes and butter; the index for "other commodities and services" was also somewhat lower than at March 2 of this year. The clothing index was unchanged in this comparison, while the shelter and household operations indexes showed small gains. The shelter component at April 1 was about 2.8 per cent above its level at April 1, 1952.

A deficit in merchandise trade is evident in the first quarter of this year, with total exports (domestic and re-exports) of about \$914 million and commodity imports, in the preliminary estimate, of approximately \$998 million. Although total exports to the United States were higher by more than \$23 million in the first three months of 1953 than in the same months of 1952, commodity imports from that area increased by about \$71 million. Exports to the United Kingdom were lower by nearly \$33 million in the first quarter of 1953 than in the same quarter of 1952, and imports from the United Kingdom were higher by \$27 million, to reduce the export balance of Canadian trade there to less than \$30 million for the quarter, compared with nearly \$90 million in the same quarter of 1952. The non-ferrous metals and products group was the only commodity group showing significant advance in export value in the first quarter comparisons.

Production

The preliminary index of industrial production for March, 1953 of 247.0 was 11 per cent higher than in March, 1952, with the result that for the first quarter the index recorded a production gain of 10 per cent over the first quarter of last year.

The manufacturing component of the index also averaged, for the first quarter of the current year, 10 per cent higher than in the quarter of 1952, a rate of advance greater than in any 1952-51 quarterly comparison. The durable goods sector experienced an increase of more than 15 per cent in the same comparison, and, like the index of total production, it

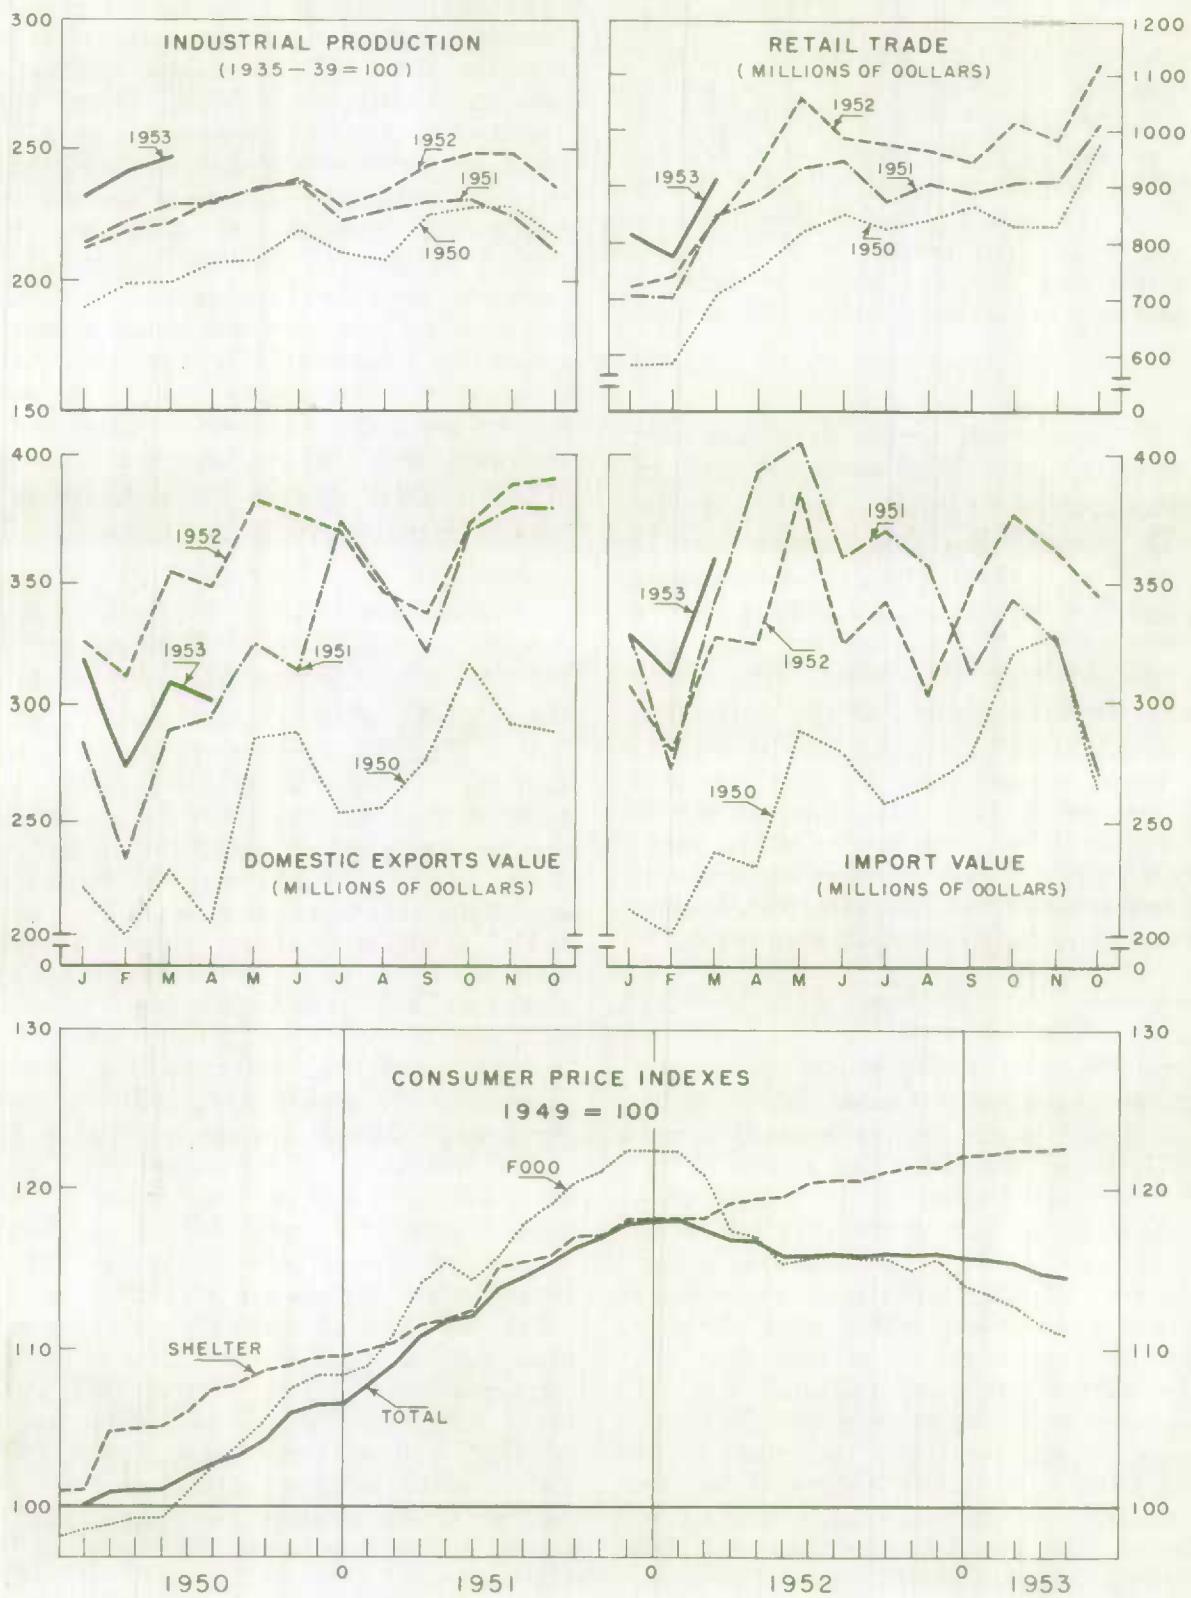

averaged higher in the first three months of the current year than for the year 1952 as a whole. The non-durable goods sector, which in early 1952 had shown a slightly larger decline from the same quarter of 1951 than had occurred for durables, advanced nearly 6 per cent in the first quarter of the current year from the same part of 1952. Significant increases in manufacturing production in the first-quarter comparisons were made by transportation equipment, electrical apparatus and supply and petroleum products.

Among the primary industries a high level of activity has also been generally realized, with certain noticeable exceptions. Employment in forestry operations in the first quarter of the current year was below that of the first quarter of 1952. At the secondary level, activity in the pulp and paper industries was about 7 per cent less than in the first quarter of 1952, but production of sawn lumber, in January and February, was higher both in British Columbia and east of the Rockies. (Exports of wood, wood products and paper were lower in the first quarter of the current year by nearly \$48 million and accounted for more than half of the total decline in domestic exports in the first quarter compared with the same quarter of last year; lower exports of wood pulp and pulp wood accounted for most of this decline.)

The index of mining production averaged for the first quarter of the current year 10 per cent higher than in the same quarter of 1952, particularly because of the larger output of petroleum nickel, copper and gold. At the secondary level, important gains were made in the production of pig iron and steel ingots in the first quarter of the current year compared with the same period of 1952. Non-ferrous smelting and refining operations were also higher. The group of non-metallic minerals, however, was lower in the current year, partly because of lower output of asbestos.

Production of fuel and power was substantially larger in the first quarter of 1953, with production of coal being an exception to the general expansion. The electricity and manufactured gas component of the index of industrial production, in the first quarter of 1953 averaged about 8.5 per cent higher than in the level in the same quarter of 1952. Production of electric-

SELECTED INDICATORS

al energy by central electric stations in March reached an all-time peak, up to that time, of nearly 5.8 billion kilowatt hours; this brought the total for the first three months of this year to 16.7 billion kilowatt hours, higher by nearly 8 per cent than in the first quarter of last year. Considerable increases occurred in the output of crude and refined petroleum, and of natural gas. Production of crude petroleum, for the first two months of the current year, totalled 10 million barrels compared with 7.4 million barrels in that part of 1952; in the same comparison, natural gas production of 21 billion cubic feet this year was higher by nearly 9 per cent than in the same months of last year.

In the agricultural sector of the economy, production of cheese and butter, as well as of eggs, exceeded the levels of the first quarter of 1952. Although hog slaughterings were 10 per cent lower in the first quarter of the current year, cattle slaughterings of 330,000 showed an increase of 42 per cent, and sheep and lamb slaughterings also were higher. (The value of domestic exports of the agricultural and vegetable products group, and of animals and animal products, in the first quarter of 1953, was nearly \$239 million, compared with \$253 million in the same quarter of last year.) Telegraphic crop reports indicated improvements in moisture conditions, but with cold weather unfavourable to early seeding in many areas.

Total landings, landed values and exports in the sea fisheries of Canada (not including Newfoundland) in the current year were considerably lower than in the first quarter of last year. Total landed value for the sea fisheries was about \$5 million in the first quarter of 1953, compared with almost \$8 million in that quarter of 1952. Pacific fisheries experienced the greatest reductions, with a catch of nearly 20 million pounds valued at less than one million dollars this year, compared with 190 million pounds valued at more than \$3 million last year, mainly because of reductions in the herring fishery. (Domestic exports of fish and fish products of \$26 million in the first three months of 1953, were lower by 5 per cent than in the same part of 1952.)

Retail Trade

The 8 per cent increase in retail sales in the first quarter of the current year compared with the same part of 1952, reflected general increases in most sectors. Notable gains were recorded particularly in the value of sales of durables such as automobiles, furniture and appliances. All geographical regions experienced sales gains in the current year, with the Maritimes and Prairie Provinces showing above-average increases. This rate of advance in the first quarter contrasts with an increase of less than 3 per cent in the first quarter of 1952 compared with the same quarter of 1951, and is slightly larger than the annual average increase for 1952 over 1951. Significant changes occurred in the quarterly rates of advance of the various trades this year compared with the increases made last year over the first quarter of 1951, and it may be useful to review the general movement over this period.

Durable goods sales, in the current first quarter, with gains of 15 to 20 per cent from the same quarter of last year, were maintaining the rates of advance noticeable in the second half of 1952; this high rate of increase contrasts with the first quarter of last year in which sales of durables were lower than in the same part of the previous year. Department store sales, in the first quarter of the current year, were 9 per cent higher than in the same part of 1952; at the time, lower sales of household durables reflected on total department store sales, and they were slightly lower than in the first quarter of 1951. Clothing sales, in the first quarter of 1953, maintained the 6 per cent increase of the relatively high mid-1952 period. Food sales showed a slight increase in value in the first quarter of the current year from the same quarter of last year, and sales of country general stores a small decline in the same comparison. These comparisons contrast with those for the first quarter of 1952, when food sales and those of country general stores had been important sectors contributing to the small increase, from the same part of 1951, in total retail business. Through successive quarters of 1952, both of these sectors made smaller and smaller relative gains from the same quarter of the previous year; the comparisons for the current first quarter, therefore, continued that tendency.

⁽¹⁾For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively. ⁽²⁾Monthly data are producers shipments. ⁽³⁾Data exclude persons in certain remote parts of several provinces and Indians on reservations. Newfoundland included as of March, 1950. ⁽⁴⁾For this purpose, paid workers are taken to include all those in the civilian labour force who are without jobs and seeking work. ⁽⁵⁾Includes only those not at work and seeking work. ⁽⁶⁾Newfoundland included as of April, 1949. ⁽⁷⁾Conversions are included with annual data only. ⁽⁸⁾Annual data as of June 1. ⁽⁹⁾Relates to hourly earnings in one week in the month of highest employment (overtime included).

4 Note.—Until the end of 1951, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Monthly figures for 1951 and 1952 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾ Estimates are given by years as of June 1. ⁽²⁾ Exclusive of stillbirths. ⁽³⁾ Not applicable to figures on population. ⁽⁴⁾ Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

At work—1 to 14 hours.....	97	100	96	91	88	84	72	63	70	
Not at work but with jobs.....	134	151	179	206	129	127	169	176	161	
Paid workers.....	3,453	3,534	3,745	3,876	3,946	3,897	3,792	3,777	3,766	
Agricultural.....	142	111	100	111	108	95	86	77	74	
Non-agricultural.....	3,311	3,423	3,645	3,765	3,838	3,802	3,706	3,700	3,692	
Without jobs and seeking work.....	135	167	108	130	114	132	187	179	172	
Persons not in the Labour Force.....	4,218	4,436	4,504	4,627	4,697	4,724	4,774	4,786	4,794	

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Newfoundland included in estimates from October, 1949.

⁽¹⁾Due to flood conditions, estimates for Manitoba for June, 1950, were based on previous experience rather than direct survey. ⁽²⁾This is the first monthly labour force survey, a continuation of the quarterly series begun in November, 1945.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. As of April, 1952, government contribution is amended. (2) As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month. (3) Supplementary benefit payments are excluded.

Note: Series revised (1) for the customary annual adjustment to correct the level of estimated total inventory values, by taking into account the latest available bench-mark data (Dec. 1951) and (2) to show both total inventories held and inventories owned by manufacturers. For further details see source, Dec. 1952.

(1) As at end of period.

(2) Total inventories held including manufacturers' own inventories and that portion not owned by reporting firms but financed by progress payments.

(3) Inventories include manufacturers' own investment only.

(1) As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys. (2) Excluding producers' interchange. (3) Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products. (4) Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope.

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1953, stands at 815, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

⁽¹⁾Planks and boards and flooring.⁽²⁾Includes Newfoundland as of May, 1949.⁽³⁾Hollow blocks including fireproofing and load-bearing tile.⁽⁴⁾For building insulation only.⁽⁵⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.⁽⁶⁾Since January, 1949, includes concrete chimney blocks.⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

(1) Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date.

(2) Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (3) Prior to 1941, prices were quoted on a live weight basis. (4) Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

Beginning with April, 1950, Newfoundland is included.

59

(1) In the upper section of this table, the annual statistics prior to 1952 embrace all steam railways, while monthly averages for 1952 and monthly data refer to railways with annual operating revenues of \$500,000 or over. (2) Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

^(*)Assignments made under the Bankruptcy and Winding Up Acts.⁽¹⁾Quarterly data for the last five columns are monthly averages.⁽²⁾In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
