Current Economic Conditions

The available supply of goods and services continued to expand in April as many customary seasonal increases took place in industrial production, employment and imports. At the same time, there was evidence of a very large movement of goods to consumers; retail sales—especially of durables such as automobiles, radios, television sets and appliances—continued to increase, as did starts and completions of housing units. Advances from comparable 1952 positions were much in evidence. By contrast, exports of Canadian produce were down slightly from March, and more appreciably

from April of last year. The gradual easing off of retail and wholesale prices continued. The further declines in the consumer price index, coupled with higher average earnings, indicated a "real" gain to consumers compared with the early months of 1952. The April and May labour force surveys showed increases in employment and a lower number of persons without jobs and seeking work. The general seasonal increases in employment more than offset the reductions in logging operations, which had been somewhat larger than the average spring fall-offs of recent years.

2. March, 1952 and March comparison.

n. a. - April not yet available

p - Preliminary

e - Estimate only

Industrial Production

The April preliminary index of industrial production of 256.1 was 11 per cent above April of last year. This very favourable comparison resulted partly from the somewhat low activity in early 1952, but indicated, too, that the early months of the current year experienced a level of industrial production that compared favourably even with the later part of last year. The index for manufactures production in April, of 272.6, exceeded that of March to become the highest on record. Within durable manufactures some very large advances were made in the four-month comparison to bring that sector 15 per cent above last year. Transportation

equipment, including motor vehicle production, contributed to this increase, being approximately 32 per cent higher this year. Activity in the electrical apparatus and supplies industry was also at a very high level. Non-ferrous metal products, non-metallic mineral products, such as cement, as well as wood products also made particularly large gains. Output of non-durable manufactures in the first four months of this year exceeded that of the same part of 1952 by about 7 per cent, as textiles and clothing, leather, rubber, and petroleum products experienced large gains in the current year.

Employment and Earnings

The March estimate of Canadian labour income of \$928 million was up seasonally from the \$926 million in February, and was over 7 per cent above March 1952. Labour income for the first quarter amounted to \$2,785 million, an increase of \$219 million, or 8.5 per cent over the comparable 1952 figure. Manufacturing labour income showed the most substantial gain, totalling \$958 million in the first quarter of the current year, nearly 13 per cent higher than the comparable 1952 period. The primary industry group experienced the only decline in this comparison, being lower by \$34 million or nearly 15 per cent than in the first quarter of 1952. This was mainly a reflection of the decreased forestry operations, with somewhat lower labour income also in agriculture and fishing.

Industrial employment in the nine leading non-agricultural groups showed a slight dip through March, with the composite industrial index (1939 = 100) at 181.8 at April 1, compared with 182.0 at March 1. However, a slight seasonal reduction in the index at April 1 is not unusual; the index was 2 per cent above the level of April 1, 1952, to achieve the highest level on record for that time of year. The composite index for payrolls, at 443.8 on April 1 also was down slightly from the March 1 index of 445.0, but was nearly 8 per cent above that of April 1, 1952, to become the highest for that date on record. The slight gain in the employment index for manufacturing from March 1 to April 1 raised that index to 200.8 which was its level of last October, approximating the wartime peak in the latter part of 1943.

Retail Sales and Residential Building

April retail sales of \$1,016 million were up 11 per cent from March and more than 8 per cent higher than in April of last year. These gains resulted from general increases in sales, with durable goods showing large relative advances. Sales by motor vehicle dealers of nearly \$257 million, continuing the expansion noted in the first quarter comparisons, were higher by 22 per cent than in April, 1952; furniture store sales showed a similar gain. Sales by radio and appliance dealers were approximately 19 per cent above the level of a year ago. Grocery and combination store sales were up 5 per cent in the April comparison, a somewhat larger relative

advance than that of the first quarter of 1953 over first-quarter, 1952. Clothing store sales in April were below those of April 1952, with men's and family clothing experiencing largest relative declines. Department store sales, in the same comparison, were higher by about 4 per cent, with the durable goods departments generally showing the largest relative gains; some departments, particularly clothing and food, experienced lower sales this year in the April comparisons. Department store stocks on March 31 were nearly 17 per cent higher than on the same date of 1952, with some departments, such as appliances, furniture and clothing, experiencing higher rates of increase.

Consumers' use of credit in the first quarter was greater than in the first quarter of 1952, a time during which restraints on credit were still operative. Instalment sales totalled nearly \$289 million in the current first quarter, higher by 38 per cent than the \$209 million of the same quarter of 1952. Charge sales of \$540 million were up 6 per cent in the same comparison. Cash sales experienced a lower rate of increase to become, therefore, a smaller proportion of total sales; they were less than 67 per cent of total sales in the first quarter of 1953, the lowest proportion on record. Accounts receivable of nearly \$640 million at March 31, 1953 were 42 per cent above their level at the end of the first quarter of 1952.

A high level of private demand was evident also in house-building activity. Housing starts in April of 9,900, brought the four-month total for 1953 to more than 21,800, a larger number of starts by nearly 52 per cent than in the same months of 1952. Completions of 6,325 in April and of more than 24,700 for the first four months of the current year were higher than in the corresponding periods of 1952 by approximately 19 per cent and 34 per cent respectively.

Prices

Price movements continued the general gradual declines characteristic of recent months. Retail prices, as measured by the consumer price index, continued slightly downward through April, the index of 114.4 at May 1 being 0.2 points lower than at April 1. The reduction in the food component, with lower prices for butter, potatoes, tomatoes, onions, beef and

COMMODITY TRADE

veal, more than offset the slight increases in most other components. The wholesale price index of 219.6 for April moved down somewhat more sharply from the March level of 221.9 to reach its lowest level since August 1950. The May index of 220.1 was up slightly from April, but 2 per cent below the level in May of last year. The index for Canadian farm products prices at terminal markets, at 214.5 in April, was about 15 per cent below that of April 1952. Non-ferrous metal products declined from 174.7 in March to 170.7 in April, mainly as a result of lower prices for base metals such as tin, lead, zinc and copper; residential building material prices advanced slightly (from 283.4 in March to 283.6 in April).

External Trade

The re-emergence of a large import balance of commodity trade, through the first quarter, showed no abatement in April. It represented a shift away from the 1952 situation, and in comparison with the export surplus of the fourth quarter of 1952, was unique in recent years by occurring at a time when there were no apparent contributing price movements: i.e. the volume changes appeared to be the major factor. In the current first quarter the increase in the volume of imports from the first quarter of 1952, was estimated as high as 17 per cent.

The accompanying chart illustrates the course of the trade balance of recent years. Between October 1950 and mid-1951, a series of import balances occurred at a time when import prices were rising faster than export prices; a change then became evident as import prices moved down again more rapidly, and for a year from September 1951 an unbroken monthly series of export balances occurred; in 1952, the large export surplus took place with the terms of trade on average about 13 per cent more favourable to Canadian goods than they had been in 1951.

Domestic exports in April of this year were \$301 million, and for the January-April period, approximately \$1,200 million compared with \$348 million and \$1,337 million respectively in

1952. This decline occurred in exports to all principal geographic areas with the exception of exports to the United States; these were higher in the four months of the current year by \$30 million, and accounted for nearly 63 per cent of total exports, for the four months, compared with 54 per cent for the same part of 1952. Exports to the United Kingdom in the same comparison were lower this year by more than \$60 million. The principal declines in Canadian exports, January-April, took place in the wood group (down \$65 million), agricultural and vegetable products, down \$32 million, and in iron and its products (\$42 million). Principal items of decline in these groups were: wood pulp, wheat, farm machinery, and automobiles (especially to Latin America). The price index for exports was about 4 per cent lower in January-April, 1953 than in the same months of 1952; the volume decline in exports was about 9 per cent. The preliminary value of domestic exports for May of more than \$380 million was very nearly equal to the \$382.5 million of the same month of 1952, and approximately 26 per cent higher than that for April of this year.

Commodity imports in April estimated at \$393 million were at the highest monthly value in nearly two years: they were nearly 31 per cent above the April, 1952 value of \$324 million. It was this significant increase in imports which most affected the overall surplus, changing it from an export balance for January-April, 1952 of \$114 million to an estimated import surplus of \$173 million in the same part of 1953. Although imports were up generally, the most significant gain came in those from the United States which were higher in the four months by \$125 million. Imports from the United Kingdom were higher, January-April, by more than \$36 million; this increase along with the decline in exports to that market, reduced the export balance with the United Kingdom to approximately \$37 million from the \$134 million of the same part of 1952. Principal commodity increases of Canadian imports occurred in iron and products (automobiles), fibres and textiles, and "miscellaneous" (including such items as some appliances and aircraft and parts).

(1) For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively. (2) Monthly data are producers shipments. (3) Data exclude persons in certain remote parts of several provinces and Indians on reservations. Newfoundland included as of March, 1950. (4) For this purpose, paid workers are taken to include all those in the civilian labour force who are without jobs and seeking work. (5) Includes only those not at work and seeking work. (6) Newfoundland included as of April, 1949. (7) Conversions are included with annual data only. (8) Annual data as of June 1. (9) Relates to hourly earnings in one week in the month of highest employment (overtime included).

4 Note.—Until the end of 1951, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Monthly figures for 1952 and 1953 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾ Estimates are given by years as of June 1. ⁽²⁾ Exclusive of stillbirths. ⁽³⁾ Not applicable to figures on population. ⁽⁴⁾ Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

Persons not in the Labour Force.....	4,218	4,436	4,504	4,627	4,724	4,774	4,786	4,794	4,761	

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Newfoundland included in estimates from October, 1949.

⁽¹⁾Due to flood conditions, estimates for Manitoba for June, 1950, were based on previous experience rather than direct survey.

20 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. As of April, 1952, government contribution is amended. (2) As of January 1950, the number of benefit payments (equivalent to the number of beneficiaries) in the week which includes the last day of the month has been substituted for the number of payments in the week which includes the third Friday of the month. (3) Supplementary benefit payments are excluded.

Note: Series revised (1) for the customary annual adjustment to correct the level of estimated total inventory values, by taking into account the latest available bench-mark data (Dec. 1951) and (2) to show both total inventories held and inventories owned by manufacturers. For further details see source, Dec. 1952.

(1) As at end of period.

(2) Total inventories held including manufacturers' own inventories and that portion not owned by reporting firms but financed by progress payments.

(3) Inventories include manufacturers' own investment only.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.

37

(1) Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

⁽¹⁾As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys. ⁽²⁾Excluding producers' interchange. ⁽³⁾Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products. ⁽⁴⁾Prior to 1946, imports include castings and forgings and rolling mill products. Since 1946, they include, in addition to all other shapes, wire and wire rope.

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1953, stands at 815, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

⁽¹⁾Planks and boards and flooring.⁽²⁾Includes Newfoundland as of May, 1949.⁽³⁾Hollow blocks including fireproofing and load-bearing tile.

43

⁽⁴⁾For building insulation only.⁽⁵⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada.⁽⁶⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.⁽⁷⁾Source: Monthly Reports; Concrete Building Blocks and Cement Pipe; Products made from Canadian clays; Asphalt Roofing; Rigid Insulating Board; Iron Castings and Cast Iron Pipes and Fittings; Steel Wire and Specified Wire Products; Gypsum Products; Mineral Wool; Sales of Paints, Varnishes and Lacquers and Trade of Canada, D.B.S.

Beginning with April, 1950, Newfoundland is included.

59

⁽¹⁾ In the upper section of this table, the annual statistics prior to 1952 embrace all steam railways, while monthly averages for 1952 and monthly data refer to railways with annual operating revenues of \$500,000 or over. ⁽²⁾ Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

*Assignments made under the Bankruptcy and Winding Up Acts.

(1) Quarterly data for the last five columns are monthly averages.

(2) In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
