Current Economic Conditions

Gross National Product in First Quarter Level with a Year ago

The value of aggregate output of goods and services in the first quarter of 1954 was approximately level with that of the first quarter of last year. After allowance for seasonal factors a small reduction in output from the fourth quarter of 1953 to the first quarter of 1954 is indicated, following the downward movement from the third quarter. It should be noted, however, that the seasonally adjusted data in the first quarter includes a lower value of crop production, computed for the coming year on the

basis of ten year average yields, and distributed evenly across the four quarters. The amount of this downward step from the fourth to first quarters is presently estimated at \$200 million (at annual rates), but this will be revised in September when the actual yield is first determined. At present, the best indicator of aggregate activity, after allowance for seasonal factors, is provided by the Gross National Product excluding accrued net income of farm operators, which reads as follows:

	I '53	II '53	III '53	IV '53	I '54
\$ Billion	22.5	22.7	22.9	22.7	22.5
Increment computed from unrounded data		+0.2	+0.3	-0.3	-0.1

It will be apparent from the above data that the general level of economic activity reached a peak in the third quarter of 1953, and has shown small declines since that time. At present the level of activity appears to have fallen to a point approximately equal to the first quarter of a year ago. Comparisons of Gross National Product with the same quarters of a year earlier show that diminishing increments have been occurring beginning with the third quarter of 1953; these are illustrated in the accompanying chart.

It may be noted, however, that while the level of aggregate output was not greatly different from the first quarter of last year, shifts have occurred in the composition of total output,

with declines in many of the goods producing industries being offset by an expansion of output in most service groups. This trend is also indicated by related production and employment data.

Final Purchases of Goods and Services

Final purchases of goods and services through personal expenditures, government expenditures and gross domestic investment (excluding changes in inventories) are shown in the accompanying chart. They have remained at about the same level as in the first quarter of last year, with only moderate shifts between the main spending groups. Personal expenditures on consumer goods and services, the largest group, experienced a rise of \$112 million, or 3 per cent from the first quarter of 1953; services accounted for the greatest share of this increase, with expenditures on non-durable goods also higher; expenditures on durable goods were lower than in the first quarter of last year, chiefly as a result of lower expenditures for automobiles. Government expenditure on goods and services was lower this year by 5 per cent, in the first quarter comparisons, reflecting lower outlays for defence in the first quarter of this year. Aggregate investment in durable assets was very slightly lower than in the first quarter of 1953, as lower outlays for machinery and equipment were not entirely offset by increased expenditures for construction. Seasonally adjusted comparisons are shown in the following chart.

Gross Domestic Investment¹

1. Excluding Inventory Change.

Construction activity in the first quarter of this year appeared to be lower than in the final quarter of 1953 after allowance for seasonal factors.¹ In this connection it may be noted that fourth quarter construction activity was unusually high due to an open fall, while activity in the first quarter was adversely affected by the severe winter.

Exports of goods and services were lower by 6 per cent than in the first quarter a year ago, reflecting mainly the lower value of exports of wheat, automobiles and base metals.

On balance, the above changes in purchases by the major demand categories were largely offsetting, and only a small reduction in final purchases appeared to have taken place either in the first quarter comparisons, or when the first quarter of this year is compared, seasonally adjusted, with the final quarter of 1953.

1. The forecast of investment intentions for 1954 indicates an increase of 4 per cent for new residential construction and 7 per cent for new non-residential construction. The decline in construction activity in the first quarter appears to be due to special climatic factors and is not necessarily indicative of the trend for the year as a whole. It should be noted that the seasonal adjustment is based on average seasonal patterns of past periods. A further qualification with regard to the fourth-first drop in seasonally adjusted construction activity is that the seasonal pattern itself may be becoming more variable. However, it is difficult to adjust this pattern until the year is over.

The Change in Business Inventories

Business inventories in the first quarter of 1954 showed a smaller accumulation than in the corresponding quarter of 1953. To the extent that a build-up did occur in the first quarter of this year, it was more than accounted for by the higher stocks of new automobiles, with other categories of business inventories showing some liquidation in the first quarter. In the seasonally adjusted data, it is significant that, in the fourth quarter of 1953 and the first quarter of 1954, when gross national product was lower than at the peak third quarter, the growth of business inventories was considerably smaller than in the earlier part of 1953, and that this decline in investment in inventories has been larger than the overall reduction in gross national product (excluding accrued net income of farm operators) as shown in the table on page (i).

The Value of Imports was Lower in the First Quarter

Imports of goods and services were lower in the first quarter of this year by about \$84 million, or 6 per cent, than in the corresponding part of last year; the declines were concentrated mainly in the fibres and textiles and the iron and steel groups. As a result of this greater reduction in the value of imported goods and services than in the value of exports of goods and services, the import balance of trade for these items was slightly smaller than in the first quarter of 1953, as the above chart shows.

Incomes Remain High

Wages and salaries, seasonally adjusted, showed a small drop (1 per cent) from the fourth to the first quarter, after levelling off in the last half of 1953. This was the first drop after a long period of successive gains. The decline occurred chiefly in the forestry, construction and manufacturing industries, reflecting, at least in part, the lower levels of employment in these industries. Wages and salaries in most other industrial groups showed little change in these successive quarters, but labour income in the service groups continued to expand. Compared with the first quarter of last year, total wages and salaries were higher in the current year by about 2 per cent.

The major item in investment income, corporation profits before taxes, showed a drop of 13 per cent from the first quarter of a year ago, although, after allowing for seasonal differences, very little change was apparent from the fourth quarter of 1953 to the first quarter of the current year. Other items of investment income, including government investment income, and dividends, interest and rents accruing to individuals showed a gain, seasonally adjusted, from the fourth quarter.

Net income of unincorporated business declined, seasonally adjusted, from the fourth quarter of 1953 to the first quarter of 1954. In the case of farm income, the drop reflects the method of estimating crop production referred to above. For other unincorporated business, the drop in net income occurred principally for unincorporated retailers, with minor declines also in fishing, wholesale trade, transportation and some miscellaneous services.

Personal Income and Expenditure

Personal income, seasonally adjusted, declined between the fourth quarter of last year and the first quarter of 1954, by about 2 per cent, reflecting the declines in wages and salaries, net income of non-farm unincorporated business and net income received by farm operators. With personal taxes and personal expenditures showing little change seasonally adjusted between the fourth and first quarters, a drop in personal saving was evident, reflecting the lower personal income. As changes in inventory of both farm and non-farm unincorporated

business also affect this saving estimate, any decline in the rate of their inventory accumulation would be reflected in the lower saving estimate.

Compared with the first quarter of 1953, personal disposable income (personal income less personal direct taxes) was higher by \$22 million in the first quarter of 1954, reflecting both the higher income and the lower personal direct taxes. Personal saving was higher in the first quarter of this year than in the corresponding quarter of 1953, as personal expenditure on goods and services did not increase by so much as personal disposable income.

(1) For newsprint, gold and power, Newfoundland data are included as of April, 1949, May, 1949 and January, 1950 respectively. (2) Monthly data are producers' shipments. (3) Data exclude persons in certain remote parts of several provinces and Indians on reservations. Newfoundland included as of March, 1950. (4) For this purpose, paid workers are taken to include all those in the civilian labour force who are without jobs and seeking work. (5) Includes only those not at work and seeking work. (6) Newfoundland included as of April, 1949. (7) Conversions are included with annual data only. (8) Prior to 1946 annual data as of June 1. From 1946 annual figures are survey averages. (9) Relates to hourly earnings in one week in the month of highest employment (overtime included).

4 Note.—Until the end of 1952, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1952 have been revised accordingly. Monthly figures for 1953 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

(1) Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. (2) Exclusive of stillbirths. (3) Not applicable to figures on population. (4) Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

Note: Newfoundland is included as of 1949.

(1) Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and no seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

(2) This item differs from column 4, top of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Newfoundland included in estimates from October, 1949.

Annual data for 1939 are as of June 1.

Note: Newfoundland is represented as of 1949.

13

Reported by firms customarily employing 15 persons or more. Statistics throughout Tables 9 to 11 are compiled from data which relate to the last pay period of the preceding month.

*Average weekly wages and salaries.

(1)Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products. (2)Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products, and miscellaneous manufacturing industries.

22 Note: Newfoundland data are included as of April, 1949. In the first five columns "unemployment assistance" for that province is disregarded.

(1) Monthly data as of end of month while annual section is based on averages of month-end statistics. (2) Estimates based upon the number of payments in the week containing the last day of the month.

(3) Supplementary benefit payments are excluded.

34 Note.—The indexes are based on December 1952 = 100. For further details and complete 1952 data, see the August 1952 report.

(1) Total backlog of orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. The data are reported by 950 manufacturing plants which account for approximately 30% of total value of production in 1950. (2) Orders represent a two-month sales forecast, not total outstanding orders. (3) Excluding motor vehicles. *Not applicable to "Ratio" columns. **Ratio of current month's orders to current month's shipments.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.

39

* Monthly and annual data revised according to more recent bench-marks.

(1) Monthly totals are not equivalent to annual data which include Newfoundland (since 1949) and Yukon and North West Territories for which only annual statistics are collected.

(2) Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

⁽¹⁾As of January, 1950 includes some silvery pig iron formerly included with ferro-alloys.⁽²⁾Excluding producers' interchange.⁽³⁾Prior to 1946, exports include pigs, ingots, blooms, billets and rolling mill products.⁽⁴⁾Prior to 1946, imports include castings and forgings and rolling mill products.

Since 1946, they include, in addition to all other shapes, wire and wire rope.

rope. Beginning January 1954, imports exclude castings, forgings, fittings and couplings.

Generally, the twenty-four municipalities for which data are shown were selected as being leaders in the amount of permits issued during the period 1926-1946. Annual statistics for 58 municipalities are available historically in the Canada Year Book. Monthly reports on the subject were discontinued in December, 1946.

44 ⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1954, stands at 819, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

⁽¹⁾Planks and boards, flooring and square timber. ⁽²⁾Includes Newfoundland as of May, 1949. ⁽³⁾Hollow blocks including fire-proofing and load-bearing tile. ⁽⁴⁾For building insulation only. ⁽⁵⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada. ⁽⁶⁾Since January, 1949, includes concrete chimney blocks. ⁽⁷⁾Prior to 1946 figures represent gross value of production. Figures from 1946 to the present are factory sales of firms which normally account for 96% of total Canadian production.

(1) Includes advance equalization payment on barley until March, 1947, and subsidy on hogs from 1944 to date. 47

(2) Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. (3) Prior to 1941, prices were quoted on a live weight basis. (4) Prior to August, 1939, Barley No. 1 feed was designated as Barley No. 3 C.W.

(1) Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. (2) Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted. (3) Annual data are monthly averages of crop year.

(1) Monthly totals of 1953 are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months. (2) Does not include bait, offal, meal, livers, tongues or roe. (3) As of April, 1949, Newfoundland is included.

(4) Data for Newfoundland are included as of January, 1954. Corresponding months of 1953 are revised to include Newfoundland as data for the current period becomes available.

⁽¹⁾ Estimates of charge accounts and instalment receivables outstanding on the books of retail dealers do not include Newfoundland. In the case of other items, Newfoundland estimates have been included, as available, commencing June 30, 1949.

⁽²⁾ Charge accounts receivable outstanding on the books of retail dealers. Excludes Newfoundland.

⁽³⁾ Instalment receivables outstanding on the books of retail dealers. Excludes Newfoundland.

⁽⁴⁾ Instalment paper held by sales finance and acceptance companies in connection with the financing of retail purchases of consumer goods, largely new and used automobiles.

⁽⁵⁾ Includes estimated personal loans by chartered banks, small loan companies, licensed money lenders and credit unions.

⁶² Beginning with April, 1950, Newfoundland is included.⁽¹⁾ In the upper section of this table, the annual statistics prior to 1953 embrace all steam railways, while monthly averages for 1953 and monthly data refer to railways with annual operating revenues of \$500,000 or over. ⁽²⁾ Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

*Assignments made under the Bankruptcy and Winding Up Acts.

(1)Quarterly data for the last five columns are monthly averages.

(2)In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

you know
how your
business
fits
into
the
Canadian
scene . . .

but what about the rest
of
the
world?

sources of supply? . . . the overseas markets where there are chances for you to sell?

you'll find the answers to these and many other questions in *foreign trade*, weekly publication of the Department of Trade and Commerce. Canadian Trade Commissioners in some fifty offices around the world report to you through the pages of *foreign trade*.

in *foreign trade* you will find

news about export opportunities
reports on overseas markets
leads on new sources of supply
news about your foreign competition
the latest foreign trade and tariff regulations
up-to-date reports on business conditions around the world

Supervisor of Government Publications,
The Queen's Printer,
Ottawa, Canada.

Please send me *Foreign Trade* for one year. Enclosed is my cheque/money order for \$2.00* made payable to the Receiver General of Canada.
