DISPLAYED PARTICULAR STRENGTH

Canada's domestic exports in the first six months of 1955 of \$2,031 million were 10 per cent higher than in the same part of 1954 and 2 per cent above the first half of 1953. The gain from 1954 represented almost entirely a higher volume of shipments, as prices on average in the first part of 1955 were almost unchanged. This recent strength in exports has been associated with rising output and income in the United States, and general high levels of activity in the United Kingdom and certain other countries which form a substantial part of the external market for Canadian products. The rise in exports to the United Kingdom in the first half of 1955 was particularly notable, with a gain of about 35 per cent over the same part of 1954.

The increases in exports have been general both geographically and in terms of the range of commodities experiencing gains. Advances have been most evident in three of the major commodity groups — the wood and paper group, non-ferrous metals and their products, and in chemicals and chemical products. Within these

OTHERS WHICH HAD FALLEN OFF IN THE FIRST PART OF 1954 WERE HIGHER AGAIN IN 1955

CONTINUED GAINS WERE SHOWN IN THE COMMODITIES NOTED BELOW.

groups, as the accompanying table and the following chart illustrate, major gains have taken place in exports of planks and boards, newsprint paper, wood pulp, nickel, aluminium, copper and their products. In addition to the above commodities, which have long been among Canada's principal exports, there have been pronounced advances in some commodities, the production of which has been expanded by substantial investment in recent years. These include petroleum, iron ore and certain chemical products.

It may be noted that in 1954 the net decline in exports can be traced almost entirely to two types of commodities — grains and motor vehicles. Fluctuations in grain exports in recent years, reflecting changing market and supply conditions, accounted for a substantial part of the increase in domestic exports in 1952 as well as the subsequent fall-off. Despite recent declines, both value and volume of grain exports were higher in 1954 than in any post-war year prior to 1951. In the first half of 1955 grain exports have been relatively stable compared with the same part of last year.

In the accompanying chart it is evident that while grains and motor vehicles have not contributed to the general increase in exports during 1955, they have not constituted a negative factor as they did in the previous year.

In 1955, on the other hand, the expansion of exports of wood, paper, non-ferrous metals and chemicals and their products appears to reflect a continuation of an upward trend since 1946. The rate of increase in exports of these commodities to the United States had slackened in early 1954 when economic activity in that country declined, but, there were offsetting increases (particularly for wood and its products and, to a lesser extent, for the non-ferrous metal group), as activity in the United Kingdom and other countries expanded. With the return of the upward movement in production in the United States, exports of these commodities have made pronounced gains.

The following table shows that the strength in these two principal markets, the United States and the United Kingdom, accounted for a major part of the increase in total domestic exports in the first half of 1955, with other Commonwealth countries contributing a smaller

part of the gain. On balance, exports to other countries were lower reflecting in a large part reduced shipments to Brazil and Japan. This net decline in exports to other countries, however, conceals some advance in shipments to Europe, particularly to Western Germany, Belgium and Luxembourg and to the Netherlands.

To sum up, the increase in domestic exports between the first half of 1954 and the first half

of 1955 has been associated with a continuation of advances in the commodity groups noted immediately above, rather than with any increase in those groups which had experienced major declines in 1954. The expansion of exports furthermore, has rested on a fairly wide geographical base, with the most significant areas being Canada's major markets of the United States and the United Kingdom.

4 Note.—Until the end of 1953, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1953 have been revised accordingly. Monthly figures for 1954 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

(1)Estimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952. (2)Exclusive of stillbirths. (3)Not applicable to figures on population. (4)Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

(5)Monthly average.

⁽¹⁾Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

⁽²⁾This item differs from column 4, top of page 7, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

(1) Includes gas used for house heating.

(2) Barrels of 35 Imperial gallons.

(3) Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufactured to natural gas.

*Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

⁽¹⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953. ⁽²⁾ Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog.

40 Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.

⁽¹⁾Monthly totals are not equivalent to annual data which

include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

⁽²⁾Total pulp production covers "screenings"

⁽³⁾Mill shipments destined for export.

*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽²⁾As of January, 1950, Newfoundland is included.

Beginning with April, 1950, Newfoundland is included.

(1) In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over. (2) Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

⁽¹⁾Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the judicial days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. ⁽²⁾From July, 1954, the figures are not adjusted for items in transit. ⁽³⁾Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent. ⁽⁴⁾Mainly deposits of foreign banks. ⁽⁵⁾Including issues payable in foreign currency. ⁽⁶⁾Excluding Canadian day-to-day loans. ⁽⁷⁾Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. *Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in May, 1955 was 11% above that of May, 1954. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

^(a) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries. ^(b) Includes Printing and Publishing and Allied Industries. ^(c) For 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible at present to allocate the differences to the individual groups.
