INCOMES, LIQUID ASSETS AND INDEBTEDNESS OF NON-FARM FAMILIES IN CANADA, 1955

The Dominion Bureau of Statistics recently published, in Reference Paper Number 80, estimates of income size distribution in Canada in 1955, together with an analysis of the distribution of liquid asset holdings and indebtedness in the early part of 1956, for non-farm families and unattached individuals¹. This reference paper follows two previous reference papers, Number 52, "Distribution of Non-Farm Incomes in Canada, by Size, 1951", and Number 66, "Distribution of Non-Farm Incomes in Canada, by Size, 1954" and maintains continuity and comparability of statistics and concepts with them. However, largely because a smaller sample and different methods of enumeration, the latest paper does not present regional statistics similar to those in the two earlier papers. The estimates of the distribution of liquid asset holdings and indebtedness are the first of their kind to be collected and published in Canada. The purpose of this article is to describe briefly the findings which are set out in detail in the text and tables of the reference papers.

The incomes measured were the total cash receipts from: wages and salaries (before deduction of taxes, pensions etc.), net income of unincorporated business, investment income, transfer payments (such as family allowances) and miscellaneous income. Incomes were for the calendar year 1955. Liquid assets and indebtedness were measured as of the survey date (March, 1956) except that payments for insurance premiums applied to the preceding twelve months.

In general the income concept used is similar to the cash income components of the series on personal income accruing to non-farm households in the National Accounts. Thus the estimates are an aspect of National Income research.

The assets investigated were: bank and other deposits, government and other bonds, investment in mortgages, loans to other persons, stock holdings and life insurance and annuity premiums paid in the preceding twelve months. The following forms of indebtedness were investigated: indebtedness to stores, sales finance companies, small loan companies, credit unions, banks and life insurance companies, and mortgage and miscellaneous debt. It should be emphasized that the data on assets and indebtedness are incomplete. Among the assets not valued were: currency held, the value of invest-

1. The family is defined as a group of people sharing a common dwelling unit and related by blood, marriage or adoption. Unattached individuals are people living by themselves or rooming in a household where they are not related to household members.

ments in business property and real estate, equity in the home, the actual market value of stocks owned, and equity built up in insurance policies and pension plans. For most families investments in home ownership and consumer durables and contractual savings may be more significant than savings in the form of bank deposits and bonds. Since assets and debts connected with a family-owned business were excluded, only part of the assets and debts of some families were taken into account. Furthermore, the survey elicited no information as to how the family's assets and indebtedness may have changed through time.

Since the estimates were made from data collected from 4,700 families and unattached individuals, they are subject to the qualifications that attach to findings obtained by sample survey methods. Apart from sampling errors, there are errors arising from non-response and errors arising in reporting. Families who were contacted and willing to provide the information may differ from those who did not respond. As for reporting, some types of income are more likely to be correctly reported than others — those that are relatively constant in size and timing, such as salaries and wages or pensions, as compared with those that are not, for example, bank interest. Experience in other countries indicates that data on assets and indebtedness are less adequately reported than are data on income, partly because the information may be less readily available or the question imperfectly understood.

Income Distribution

The average income of all non-farm families and unattached individuals in 1955 was \$3,842, about 5 per cent higher than in 1954 and 21 per cent higher than in 1951. Since the consumer price index rose only a little more than 2 per cent between 1951 and 1955, most of the advance in income represents a gain in real terms.

The upward shift of income has removed many families and individuals from the lowest bracket. Whereas in 1951 34 per cent of all families and individuals had incomes of less than \$2,000, by 1955 the percentage in this income group had fallen to 26 and the percentage in the income group \$5,000 and over had risen from 14 to 22 per cent.

If families and individuals are classified by major source of income, it is apparent that the rise in average income was of the same order of magnitude for those who were self-employed as for those

chiefly dependent on wages and salaries. However, the gain in average income was significantly larger for those whose major source of income was investment income, pensions and transfer payments. It

amounted to one third compared with about one fifth for the two other groups. This relatively large gain is mainly the result of the introduction of the universal old-age pension scheme in 1952.

1. Investment income, transfer payments and pensions.

In general, when incomes are classified by age, sex, family characteristics and other factors, the patterns of distribution prevailing in 1955 were similar to those in the earlier years and the following discussion is therefore limited to the findings under the last survey.

Age is an important determinant of income. When families and individuals are classified according to the age of the head of the family, the highest average income, \$4,606, is found in the age groups 40-49 when presumably people are at the peak of their earning capacity. The lowest average income is received by those over 65, a group which would include many retired persons and widows dependent on pensions and investment income. The average income of those under 30, among whom most of the new entrants to the labour market are to be found, was \$2,963, which is also low relative to the average for all age groups combined.

The average income of men was appreciably higher than that of women. Families with a male head had an average income of \$4,292, compared with \$2,689 where the head of the family was a female. To a substantial extent this disparity reflects the fact that a high proportion of what are defined for purposes of the survey as families headed by a female are not in fact families but

unattached individuals, that is either young working women, retired women or widows.

Income tends to rise with the size of the family. In 1955 the average for families consisting of two persons was \$3,570 while the average for families consisting of 5 or more persons was \$4,987. The reason for this relationship between size of income and size of family is that the larger the family the greater the likelihood of there being more than one income recipient. Families whose incomes were \$10,000 or over consisted on the average of about 5 persons and there were on the average two income recipient per family. The influence of the number of income recipients was even more pronounced where the major sources of income is wages and salaries. The average family in the \$10,000 and over group with wages and salaries as their major source of income had nearly three income recipients.

When families are classified by tenure, those owning their own homes are found to have higher incomes than those who rent and those who rent in turn have higher incomes than those who live in lodgings. Of the families owning their own homes 27 per cent had incomes below \$3,000, 38 per cent had incomes of \$3,000 to \$4,999 and the remaining 35 per cent had incomes of \$5,000 or over. By contrast, 36 per cent of tenant families and 50 per cent of lodging families had incomes below \$3,000.

Assets and Indebtedness

It should perhaps be repeated here that the data on both assets and indebtedness, and on assets in particular, are incomplete and therefore do not provide a basis for assessing a family's financial position.

Assets and indebtedness appear to be more closely related to age than to level of income. This pattern is to be expected since the older heads of

families have had more time to accumulate savings and the younger heads of families often have heavy expenditures for consumer durables and housing in the first decade or so following the setting up of the household and therefore have more need to incur debt. About three quarters of all families where the head is 65 or more have some assets, the average holding for this age group being \$3,656 and the same proportion had no debt, the average debt being only \$134.

| Age of Head of Family | Average Income ¹ | Average Assets | | Average Consumer Debt | |
|-----------------------|-----------------------------|----------------|--------------|-----------------------|--------------|
| | | Over-all | Holders Only | Over-all | Debtors Only |
| | \$ | \$ | \$ | \$ | \$ |
| 29 and under | 2,963 | 404 | 574 | 369 | 530 |
| 30 - 39 | 4,097 | 648 | 912 | 407 | 651 |
| 40 - 49 | 4,606 | 1,207 | 1,704 | 513 | 802 |
| 50 - 64 | 4,374 | 2,369 | 2,999 | 262 | 583 |
| 65 and over | 2,528 | 3,656 | 4,770 | 134 | 547 |

1. The income figures are for families and unattached individuals and therefore not strictly comparable with figures for assets and debts which are for families only. Incomes of families only would be higher for all age groups.

When families are classified by size, families consisting of two persons are found to have higher holdings of liquid assets or smaller consumer debts than do larger families. Approximately 74 per cent of two person families reported liquid assets and only 33 per cent owed consumer debt while 67 per cent of families consisting of 4 or more persons owed consumer debt and about the same proportion reported assets. The small family would include a relatively large proportion of older family units. The larger families have on the average higher incomes and are presumably better able to assume larger amounts of indebtedness.

Families who owned their own homes had on the average larger holdings of liquid assets than those who rented or lived in lodgings. A relatively large proportion of home-owners had no consumer indebtedness. However, the average debt of those who reported debt was considerably larger for home-owners than for tenants.

Patterns of Assets and Indebtedness

While equity in insurance was not given a specific valuation, insurance premiums were the most frequently reported item on the assets ques-

tionnaire. About two-thirds of all families and individuals and about three-quarters of all families reported such payments. Only 13 per cent of all families and individuals paid \$250 or more, 27 per cent paid between \$100 and \$250 and 25 per cent paid less than \$100. As would be expected, the average premium paid rose with income, being \$85 for incomes under \$2,000 and \$613 for those whose incomes were over \$10,000.

The proportion of all families and individuals having deposits with banks or other financial institution was almost as high as the proportion paying insurance premiums. The percentage reporting deposits ranged from 51 per cent of those with incomes below \$1,000 to 89 per cent of those with incomes over \$10,000.

Approximately 27 per cent of all families and individuals reported holdings of bonds, the most commonly held type being Canada Savings Bonds. The ownership of bonds was most common at the upper income levels and about 48 per cent of those with incomes of \$10,000 or over had holdings, with average holdings of about \$5,700. Of those with incomes under \$1,000 only about 18 per cent owned bonds and the average holding was about \$350.

CHART - 3

PERCENTAGE OF FAMILIES AND UNATTACHED INDIVIDUALS
REPORTING SELECTED ASSETS, BY INCOME GROUPS, MARCH 1956

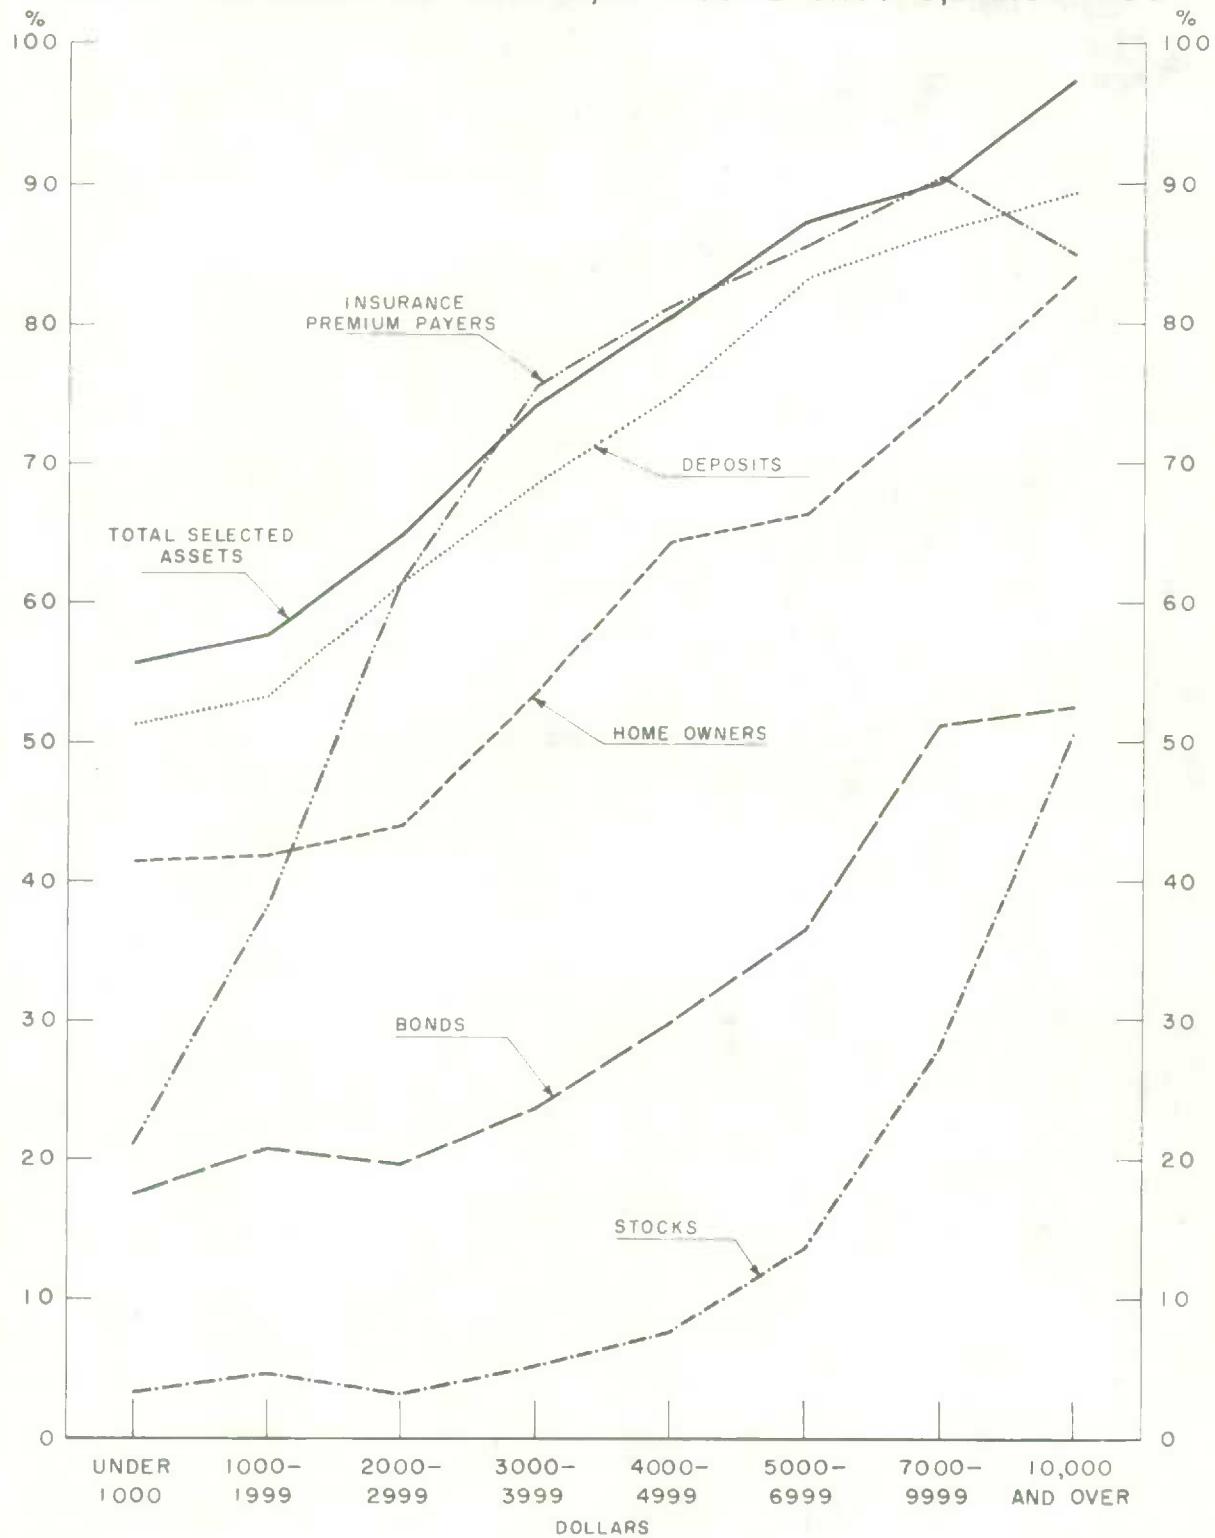

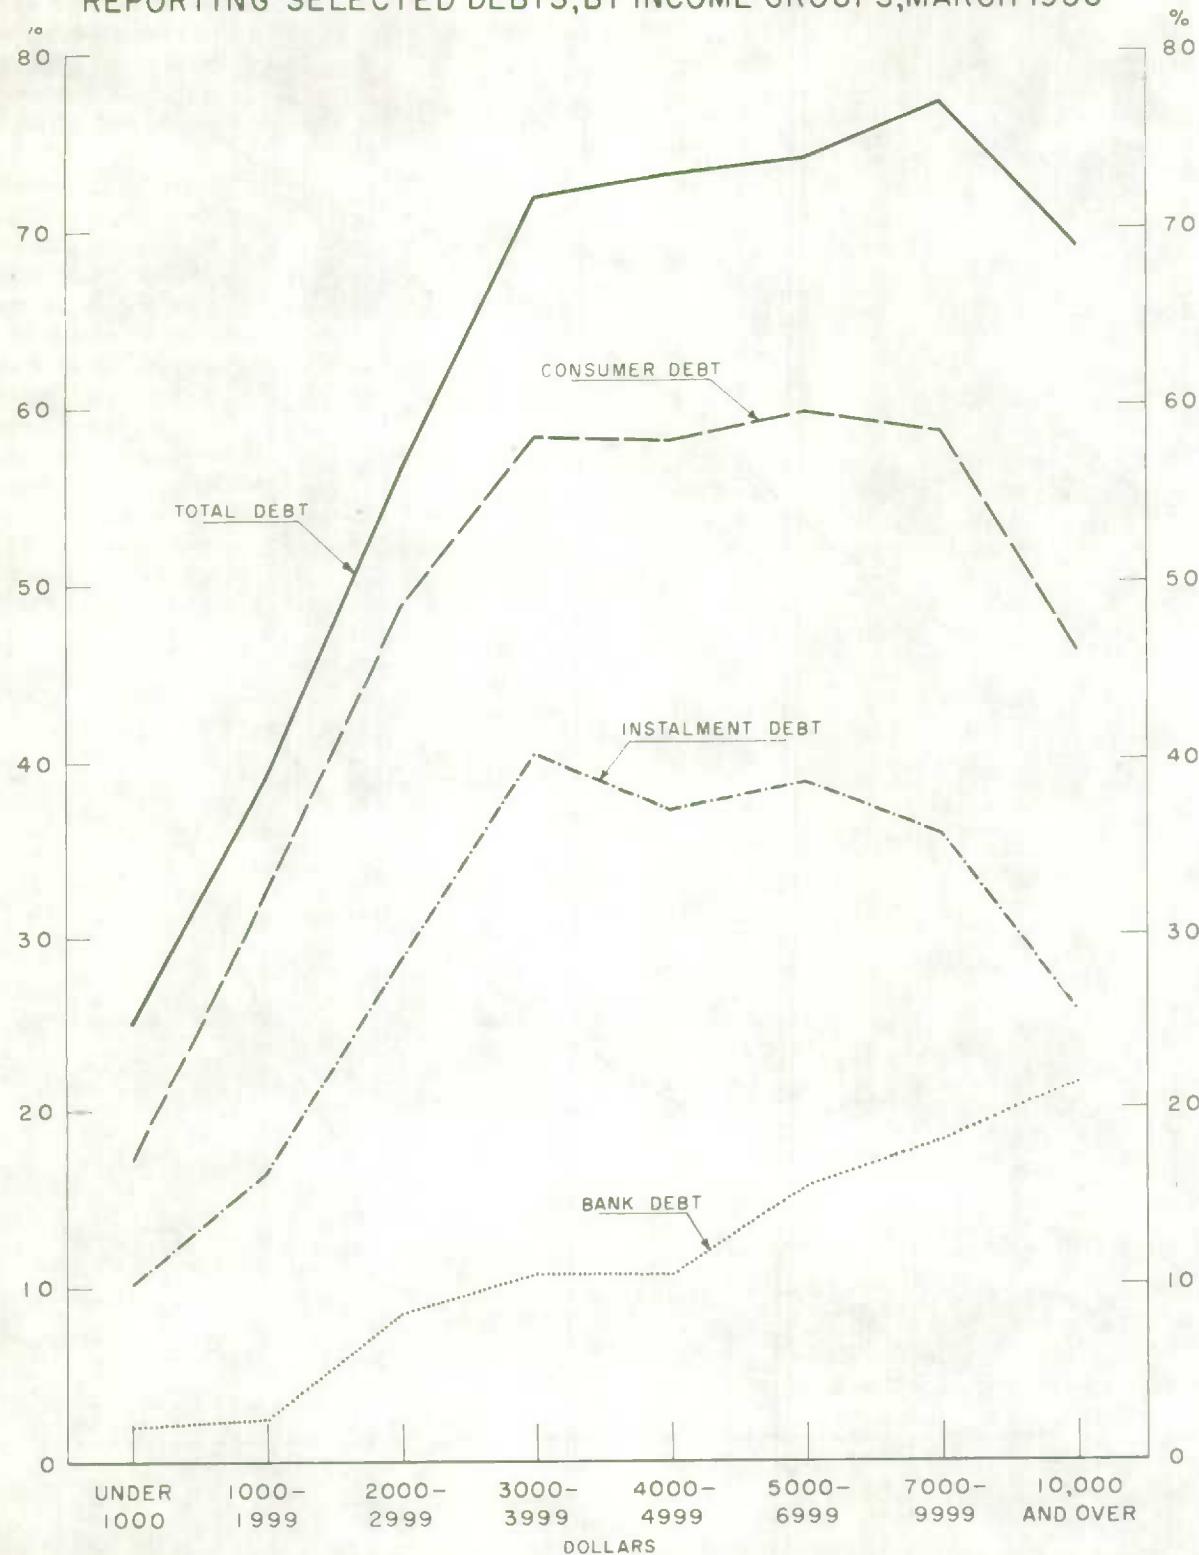

CHART - 4

PERCENTAGE OF FAMILIES AND UNATTACHED INDIVIDUALS
REPORTING SELECTED DEBTS, BY INCOME GROUPS, MARCH 1956

Whereas 9 per cent of families and individuals had stocks only 5 per cent had investments in mortgages. For incomes below \$3,000 mortgages were more popular than stocks, but above \$5,000, stocks were the preferred form of investment. About half of those whose incomes were above \$10,000 had stocks and nearly 20 per cent had stocks valued in excess of \$10,000. Stockholders on the average had substantially larger liquid assets than non-stock holders.

Thirty per cent of all families and individuals reported that they owed instalment debt to stores and sales finance companies and 25 per cent reported charge accounts. Charge account debt was much smaller than instalment debt, the average for those reporting debt being \$126 compared with \$461 for instalment debt. The largest percentage of families and individuals having instalment debt was found in the income group \$3,000 to \$4,000. The frequency of bank debt increased with income. For those whose incomes were under \$1,000, the proportion indebted to banks was negligible. But at the other end of the income scale, over \$10,000, about 22 per cent were so indebted and where bank debt was owed the average debt was about \$8,300. Only

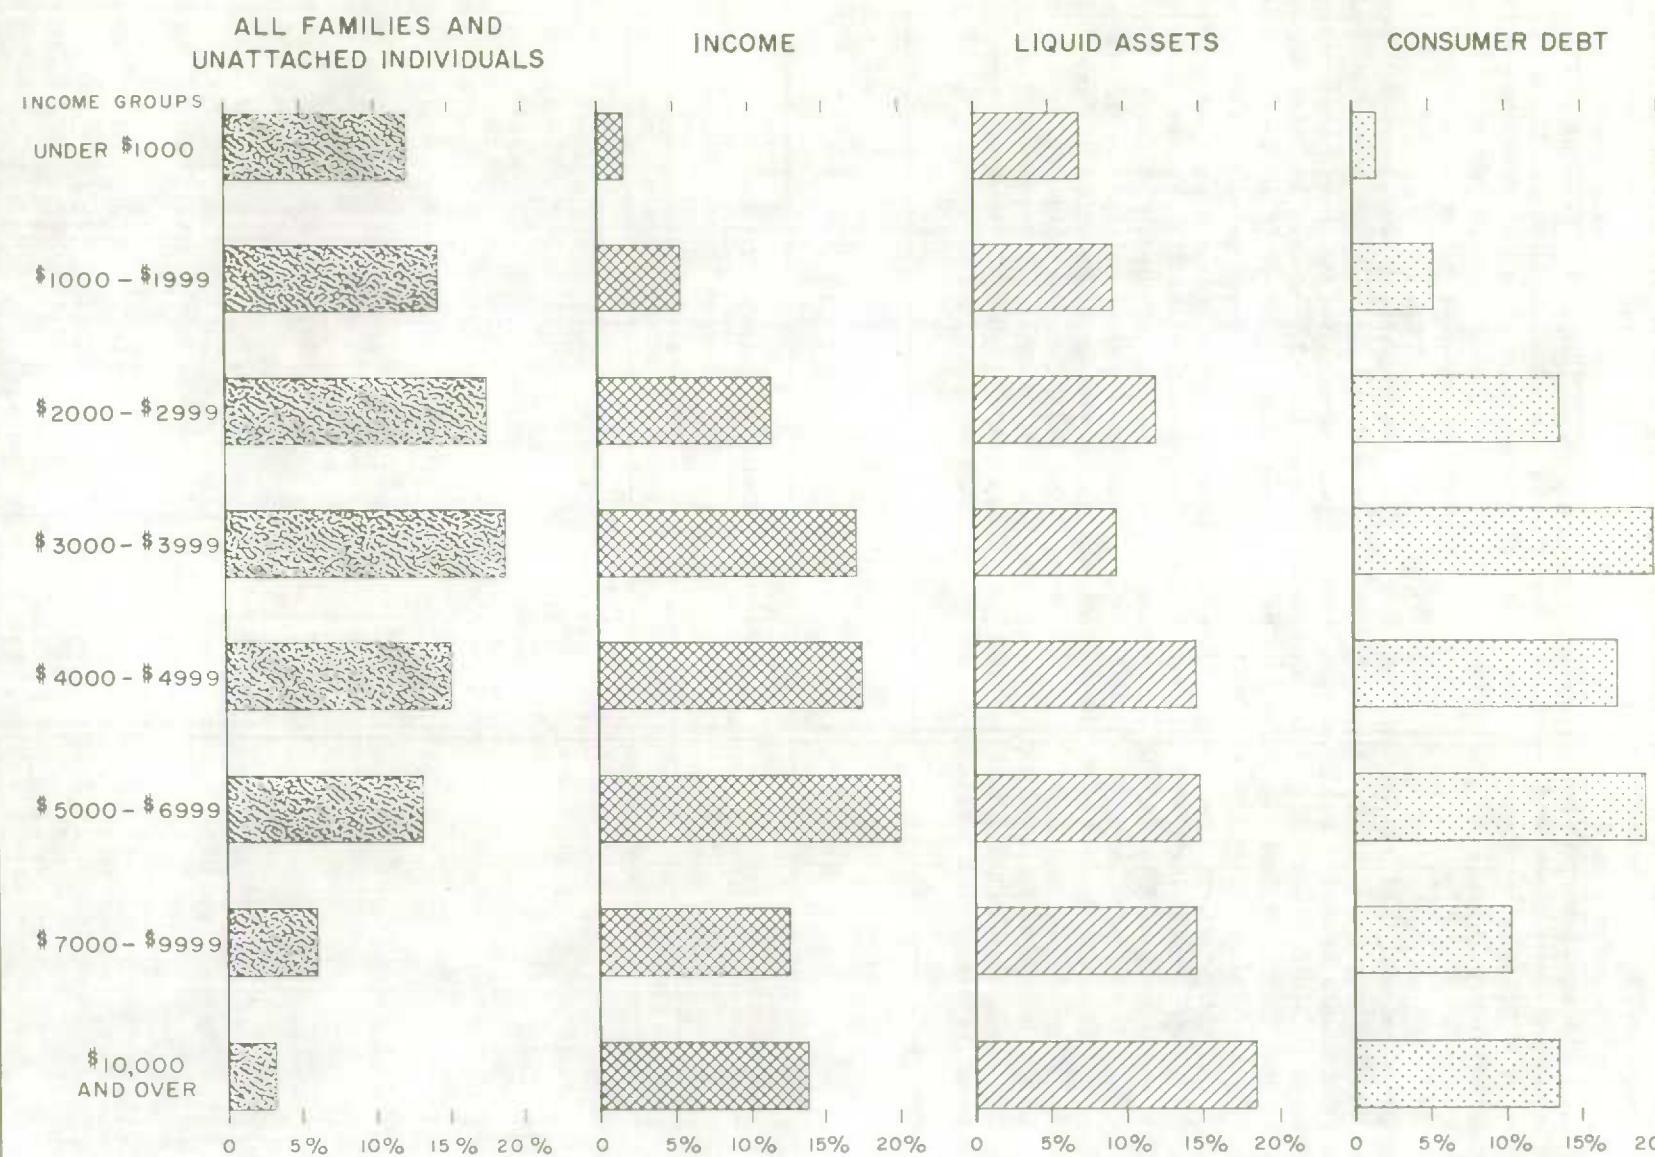

about 10 per cent of all families and individuals had bank debt.

As is to be expected, both the frequency and the size of mortgage debt diminished with age. Fifty-three per cent of all home-owners had no mortgage but only 27 per cent of those under 40 were in this situation, which compares with 86 per cent for those over 65. Those of the younger home-owners who were indebted had an average debt of \$5,634 while the older home-owners had an average debt of \$3,182.

The frequency of home ownership increased as income rose. About 55 per cent of all families and individuals owned their own homes, the proportion rising from 41 per cent for those whose incomes were under \$1,000 to 86 per cent for those at the top of the income scale. However, those in the lowest income brackets were more often free of mortgages than those in the medium and upper income group, presumably because they included more older people who had had time to pay off indebtedness. Only 45 per cent of those with incomes over \$10,000 had no mortgage indebtedness, but 86 per cent of those with incomes of less than \$1,000 were in this situation. Mortgage indebtedness was most common in the income group \$4,000 to \$5,000.

INDUSTRIAL PRODUCTION

The index of industrial production continued to advance in February. Although manufacturing output increased, the largest contribution came from mining with gains in both metals and fuels. Power output was off.

EMPLOYMENT AND UNEMPLOYMENT

The seasonally adjusted non-agricultural employment index continued to decline in February. Manufacturing employment continued down, mining remained stable while construction turned up. Average hours worked per week in manufacturing showed little change.

⁽¹⁾Averages of unadjusted data.

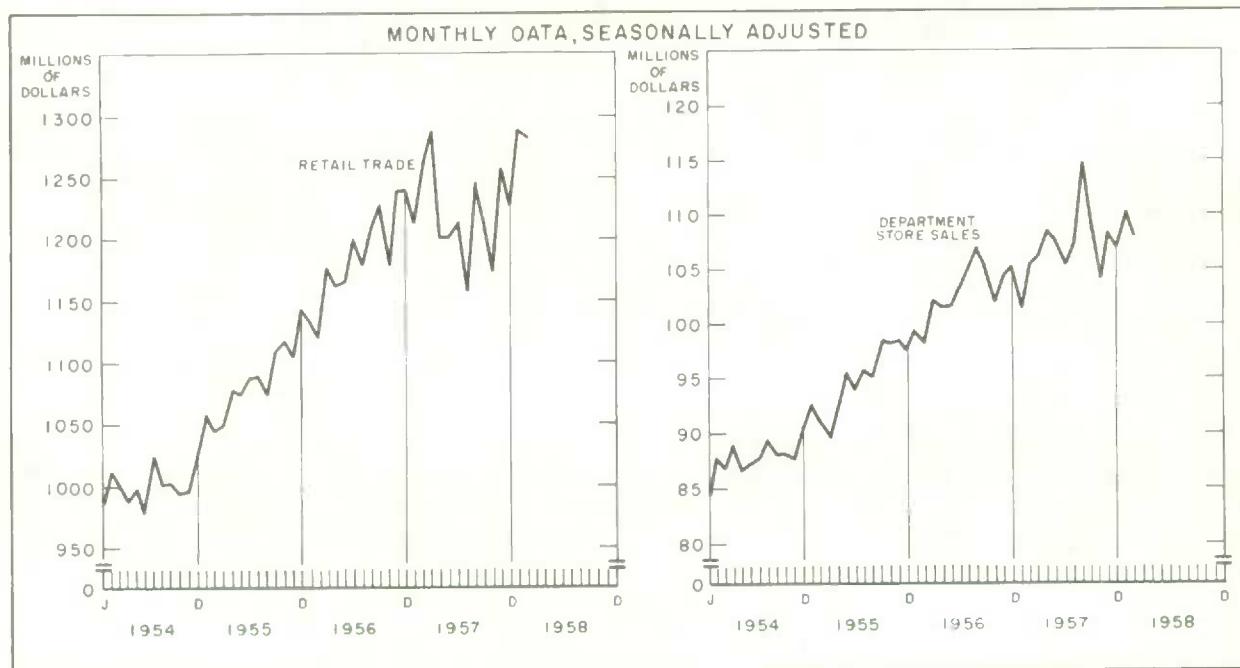

⁽²⁾Employment indexes and average hours worked are compiled from data which relate to the last pay period of the preceding month.

⁽³⁾Middle month in each quarter.

⁽⁴⁾Percentage seasonally adjusted.

RETAIL TRADE

Seasonally adjusted retail trade declined marginally in February. Changes were minor except for the drop in motor vehicle dealer sales and the upturn in garage and filling station and fuel dealer sales. Department store sales were down.

EXPORTS AND IMPORTS AND CORPORATION PROFITS

Seasonally adjusted exports of goods turned up sharply in March due mainly to increases in agricultural and non-ferrous metal exports. Imports also increased. Corporation profits declined further in the fourth quarter.

(1)Annual estimates are as of June 1. (2)Seasonally adjusted at annual rates. (3)Manufacturing inventory owned by manufacturers, whether held at plant or not, at end of period. (4)Rough cords of 128 cu. ft. (5)In urban areas of 5,000 population and over. As of January, 1957, figures are not strictly comparable to those of 1956 due to the inclusion of additional municipalities in the "urban 5,000 and over" category. (6)Average of weekly rates. (7)Middle of month. (8)Revised according to new bench marks. (9)Prior to January, 1957, this total includes the net amount generated by the more important central electric stations, i.e. companies, municipalities and individuals selling or distributing electric energy. From January, 1957 it includes all generating agencies producing over ten million kilowatt hours per year. The total generated on the old basis for January 1957 was 7,457 million kilowatt hours. (10)End of period. Including personal savings deposits.

(1) "De facto" population. Annual data are for June. (2) At current market prices. Annual data are totals of the four quarters. (3) Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (4) New series. All manufactured products other than food, fuel and tobacco.

4 Note.—Until the end of 1956, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1956 have been revised accordingly. Figures for 1957 and 1958 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

(1) Not applicable to figures on population and immigration. (2) Yukon and North-West Territories not included in figures for births, marriages and deaths. (3) Estimates are given by years as of June 1 and by quarters for Canada. (4) Exclusive of stillbirths. (5) Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

⁸ (a) Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given to the seasonally adjusted figures for this item.

(b) This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

*Average weekly wages and salaries.

(1)Includes wood products, iron and steel products, transportation equipment, non-ferrous metal products, electrical apparatus and supplies, and non-metallic mineral products. (2)Includes foods and beverages, tobacco and tobacco products, rubber products, leather products, textile products except clothing, clothing, paper products, printing, publishing and allied industries, products of petroleum and coal, chemical products, and miscellaneous manufacturing industries.

(1) Seasonal (formerly supplementary) benefit data included.

(2) On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included.

(3) Estimates are based on average weekly number of payments.

(4) The number of calendar weeks during which a benefit payment was made.

(5) Revised to relate to the Thursday nearest to the last day of the month.

⁽¹⁾Excludes gold.⁽²⁾Arithmetically converted from 1935-39=100.⁽³⁾Indexes August, 1955—July, 1956 are final with the inclusion of final participation by.

ments for Western wheat announced in May, 1957. Indexes revised for crop year August, 1956 to July, 1957 to incorporate 10 cents per bushel interim wheat payments.

[4]Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1956 are final prices. From August 1, 1956 to July 31, 1957 western wheat prices were made up of initial and interim payments; since August 1, 1957 they have been initial prices only. Oats and barley prices for western Canada have been initial prices only for the period August 1, 1956 to date.

Note: The coverage of this series has been expanded as of January, 1957 to include, in addition to Central Electric Stations industrial power installations that generate electricity for their own use. Except for utilities, comparable data for previous months are not available.

(1)Prior to January, 1957, these totals include the net amount generated by the more important central electric stations, i.e. companies, municipalities, and individuals selling or distributing electric energy. From January, 1957 they include all generating agencies producing over ten million kilowatt hours per year. The total generated on the old basis for January 1957 was 7,457 million kilowatt hours.

(2)Less imports. (3)Total net generation less net exports. Total power available for disposal for January, 1957 on the old basis was 7,170 million kilowatt hours.

(4)Mainly the amount used in electric boilers. Source: Monthly Report, Electric Power Statistics, D.B.S.

(1)Includes gas used for house heating.

(2)Barrels of 35 Imperial gallons.

(3)Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufactured to natural gas.

(4)Includes some free customers.

⁽¹⁾In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. ⁽³⁾Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog. ⁽²⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. ⁽⁴⁾Manufacturing inventory owned by manufacturers, whether held at plant or not, at end of period.

(1)Released of domestically manufactured tobacco for consumption in Canada.

(2)End of period.

(3)The production of beer is shown in thousand barrels of 25 gallons each.

(4)Includes bottling of imported liquors.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.
⁽²⁾Total pulp production covers "screenings" which are already included in exports. "Sewerings" are excluded throughout from mechanical and chemical pulp.
⁽³⁾Mill shipments destined for export.

Source: Monthly Report on Primary Iron and Steel, D.B.S.

Note.—Effective January, 1957, the data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included. On this account totals shown are not comparable with those of previous years.

⁽¹⁾ Shipments for further processing within own firm and for sale in Canada.

*Construction of dwelling units.
Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities were also chosen for complete enumeration; in June, 1955, the number of sample areas was increased to nearly 800.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1956, stands at 901, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. ⁽²⁾Planks and boards, flooring and square timber. ⁽³⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁴⁾For building insulation only. ⁽⁵⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada. ⁽⁶⁾Includes concrete chimney blocks.

⁽⁷⁾Factory sales of firms which normally account for 96% of total Canadian production.

⁽¹⁾ Does not include Supplementary Government Payments made under Prairie Farm Assistance Act, Prairie Farm Income Act and Wheat Acreage Reduction Act.
⁽²⁾ Includes barley and barley participation payments, rye, flax, flax adjustment payments, corn, clover and grass seed, hay and clover.

⁽³⁾ Includes in addition sugar beets and fibre flax.

⁽⁴⁾ Includes wool, honey, maple products and miscellaneous farm products.

⁽¹⁾Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.

⁽²⁾Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

⁽³⁾Annual data are monthly averages of crop year. ⁽⁴⁾Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available.

⁽¹⁾Conditional sale agreements held in connection with the financing of retail purchases of consumer goods.

⁽²⁾Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments.

⁽³⁾Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only.

⁽⁴⁾In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards from Dec. 1955 on. Balances were as follows:

Dec. 1955-20

Mar. 1956-19

June 1956-23

Sept. 1956-28

Dec. 1956-26

Mar. 1957-25

June 1957-27

⁽⁵⁾Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds.

⁽⁶⁾Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

⁽¹⁾ Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1955 and 1956 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ⁽²⁾ Prior to January 1957, includes the C.P., C.N., Quebec North Shore and Labrador and Pacific Great Eastern railways. Beginning in January, 1957, all railways follow the uniform classification of accounts, and the statistics previously shown in the "Other Railways" section in the upper half of the table are combined, as of that date, with those railways already following the new system.

⁽³⁾ Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities. Source: Railway Operating Statistics. D.B.S.

⁽¹⁾Foreign exchange and foreign securities. ⁽²⁾Industrial Development Bank capital stock, bonds and debentures. ⁽³⁾Bank premises and all other assets.
⁽⁴⁾Capital, rest fund and all other liabilities. ⁽⁵⁾On December 31, 1956, the basis for the valuation of securities held by The Bank of Canada was changed from "not exceeding market values" to amortized values, and for this reason figures for December 31 and later dates are not comparable with those for earlier dates.

*Foreign items are no longer shown separately under assets and liabilities, but are included in a single net balance under "assets". The totals for assets and liabilities are revised to reflect this change in presentation.

⁽¹⁾Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. ⁽²⁾The figures are not adjusted for items in transit. ⁽³⁾Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 8 per cent. ⁽⁴⁾Mainly deposits of foreign banks. ⁽⁵⁾Capital, reast fund and undivided profits as at the latest fiscal year-end. ⁽⁶⁾Including issues payable in foreign currency. ⁽⁷⁾Beginning January 31, 1957, month-end figures for chartered bank holdings of Government of Canada and provincial government securities are based on "amortized value" and are therefore not directly comparable with figures for preceding month-ends, which are based on "not exceeding market value". ⁽⁸⁾Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. ⁽⁹⁾Excluding Canadian day to day loans. ⁽¹⁰⁾Loans to grain dealers and exporters. ⁽¹¹⁾Loans to finance purchase of Canada Savings Bonds at time of issue. ⁽¹²⁾Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities.

(1) Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.
(2) Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada.
(3) Less total float, i.e. cheques and other items in transit (net).
(4) At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about \$140 million, were reclassified from "other" deposits to "personal savings deposits."

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

⁽¹⁾The Canada totals by month for 1957 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. The data for 1957 and 1958 are subject to revision. Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford, Conn.

⁽¹⁾Ordinary, Industrial and Group. ⁽²⁾Part of the apparent increase between 1957 and 1958 is due to a change in the "inflation" factors used to bring figures of reporting firms up to the estimated total level for all insurance companies. It is estimated that the 1957 figures for "ordinary" and "group" were understated by about 5%.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(2) Includes, in addition to the industries listed, Tobacco, Printing and Publishing and Allied Industries.

(3) Includes Quarterly Corporation Profits, D.B.S.

NOTE.—*Revised series with coverage limited to business failures under the Bankruptcy and Winding Up Acts, excluding individuals not operating businesses as such.

⁽¹⁾In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

SOURCE: Commercial Failures Under the Provisions of the Bankruptcy and Winding Up Acts, D.B.S.
