This review and other publications of the Dominion Bureau of Statistics,
including the free annotated catalogue of current publications, may
be ordered from the Information Services Division, Dominion
Bureau of Statistics, Ottawa, Ontario, and remittances
made payable to the Receiver General of Canada.

NOTE: Symbols used throughout the Review: (...) means "not available"; (—) means "nil"
or "less than can be shown with number of digits used"; (P) signifies preliminary; (*) indicates
"revised since last monthly issue"; (†) opposite the top entry in a column indicates that revisions
have been made to 1958 and in some cases to earlier years since the last issue of the Biennial Supple-
ment. Many of the 1957 monthly series have also been revised since publication of the Biennial Supple-
ment. Users wishing the most up to date historical series should therefore refer to the sources
listed in the individual tables of the C.S.R.

THE DEVELOPMENT OF CONSUMER CREDIT STATISTICS IN CANADA

Available statistics on consumer credit emanate from various D.B.S. surveys and the records of certain other government departments. Balances outstanding (in most cases at the month-end and calendar-year-end) on account of transactions mainly of the nature of consumer credit are published monthly in the Bank of Canada *Statistical Summary*. In the case of the so-called sales finance companies repayments and new paper purchased are also shown. Publications of the Dominion Bureau of Statistics carry most of this information in greater detail.

A problem in the production of comprehensive consumer credit statistics is to define the phrase "consumer credit". The usual definition would probably include any indebtedness which has been contracted for the purpose of purchasing consumer goods or services for personal use.¹ In many cases, however, the purpose of the loan is not really known; it is merely inferred from the type of borrower; for example, policy loans and bank loans contracted by persons maybe classified with consumer credit because it is assumed that the proceeds are used to finance personal purchases, although in fact they may be used to finance business transactions. In other cases, the indebtedness is contracted in the course of actual purchases of goods which are apparently consumer goods but it is by no means certain that they are intended for personal rather than business use.

One of the most important surveys in this latter category is carried out by the D.B.S. in the field of retail trade. In 1941 a temporary wartime agency began collection, on a restricted basis, of credit extended by a small sample of retail stores. The D.B.S. took over this sample after the War and enlarged it until in 1949 it included some 2,500 stores in 16 different trades. Separate statistics were collected, annually and quarterly, on credit sales and accounts receivable, each subdivided into instalment and charge account. In 1955 a larger and much improved sample was designed subdividing the field into three main classes (with subdivisions in each): (a) department stores, (b) chain stores in credit trades² and (c) independent stores in credit trades. As a result of vexing difficulties in defining and reporting credit sales the quarterly survey was recently reduced in scope to cover accounts receivable only. A monthly series covering certain trades was added. The annual survey continues to secure credit sales as well as receivables.

Another major DBS survey in this field covers the activities of sales finance companies. This survey had its origins in 1935 in a monthly survey

which was confined to new motor vehicle sales and the financing of these vehicles by sales finance companies. After commencement of this survey there was evidence of increasing interest in the total activities of sales finance companies. Such a survey was started in 1941 but was discontinued the following year until 1948, when it was resumed on a regular basis, first as an annual survey only but later also on a quarterly and more recently on a monthly basis. This monthly survey covers 15 of the largest companies accounting for some 90 per cent of the total business. The monthly estimates are adjusted once a year to the annual totals which cover all Sales Finance Companies (except those which are subsidiary to a merchandising organization financing only the sales of that organization). Indebtedness incurred for the purchase of consumer goods is shown separately from that incurred for the purchase of commercial and industrial goods. In each of these major categories separate data are shown for motor vehicles³ and "other goods".⁴ In addition to balances outstanding, the amount of paper purchased is collected and repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased.⁵ (The figures on repayments therefore include cancellations and any other adjustments to the two reported series).

The other sources of information on consumer credit may be summarized briefly:

(a) Small loan companies and licensed money lenders

An annual report of the Department of Insurance on small loan companies and licensed money lenders shows considerable detail of each company's yearly business, including accounts outstanding at the end of the year. Monthly surveys are carried out by D.B.S. on balances outstanding at the end of each month.

(b) Chartered banks

The chartered banks provide quarterly data on secured and unsecured loans to persons, and home improvement loans to persons. (Loans to finance the purchase of Canada Savings Bonds are also supplied but these are excluded from the consumer data tables.)

(c) Credit unions

The annual data secured from credit unions show only total loans, with no other details.

¹ Mortgage debt on houses would, presumably, be included only if it was used to finance consumer purchases.

² For example, food, chains and variety stores which do not sell for credit were excluded. Sales in all non-credit trades were classified as cash sales and added to the cash sales of credit stores.

³ All passenger cars are classified as consumer.

⁴ Other goods are further broken down into a variety of classes for those respondents who can provide the detail.

⁵ In addition, data on average repayment terms on retail paper purchased are collected.

(d) Life insurance companies

Complete data are available annually on policy loans from the Department of Insurance. Monthly data for 12 large companies are used in conjunction with the annual data to provide monthly estimates of policy loans outstanding.

(e) Quebec savings banks

Monthly data on the loans outstanding of Quebec savings banks are available as part of their published material.

(f) Miscellaneous

Annual surveys were initiated in 1958 by the D.B.S. on credit extended to individuals by utility and transportation companies. At present it appears that these companies cannot supply information on a more frequent basis. Quarterly surveys of oil company credit to individuals have been carried out for some years.

Credit statistics not available may also be briefly listed:

(a) Service credit

Very little is known about credit extended by professional people such as doctors and dentists, by hotels, and credit card companies. The last two fields, however, are under study at the present time.

(b) Individual loans

Very little is known about loans by individuals to individuals and no special surveys are being planned.

A number of outstanding problems in the preparation of a comprehensive set of consumer credit statistics may be outlined briefly:

(a) As already indicated, a portion of the credit classified as consumer credit is probably used for business rather than for personal purposes. A practical but incomplete way of reducing this problem is by publishing separate data for the different trades so that those in which business credit is likely to be unimportant can be studied separately. Examples of retail trade in which business credit is important are implement, fuel, and hardware. In addition, charge accounts of motor vehicle dealers are classified as business for purposes of analysis by the Bank of Canada.

(b) New developments in the field of credit are continuously taking place making it more difficult to maintain meaningful historical series. For example, in the past few years additional chartered banks

have entered the sales finance field so that the data obtained from sales finance companies provide a decreasing proportion of the available credit paper. Another development impairing comparability is the appearance of credit card companies in several areas of Canada. These companies discount the receivables of retailers; the retailers receive cash (discounted) and the credit card companies assume all risk of collections. Thus some concerns which formerly carried receivables on their own books do not have them now as the receivables are on the books of the credit card companies.⁶ As already intimated, it is planned to start a survey of these companies in the near future.

(c) The historical information is complicated further by changes in the terms on which credit is granted. Large stores, especially department stores, have started combining recently their different credit accounts into a single "all-purpose" credit plan. At the time of billing they do not know if the customer is planning to pay the amount outstanding in one lump sum or spread it over a number of months. Under the new arrangement customers are billed and a service charge made each month which is based on the unpaid portion of the account, replacing the instalment contract (widely used in the past) where the carrying charges are added after the time of repayment has been agreed upon (usually at the date of purchase). This development is becoming quite widespread and the breakdown between charge and instalment hitherto collected may be eliminated in the near future. Thus the annual data in the future will be classified into cash sales and credit sales and the monthly and annual data will show a single total only covering all receivables.

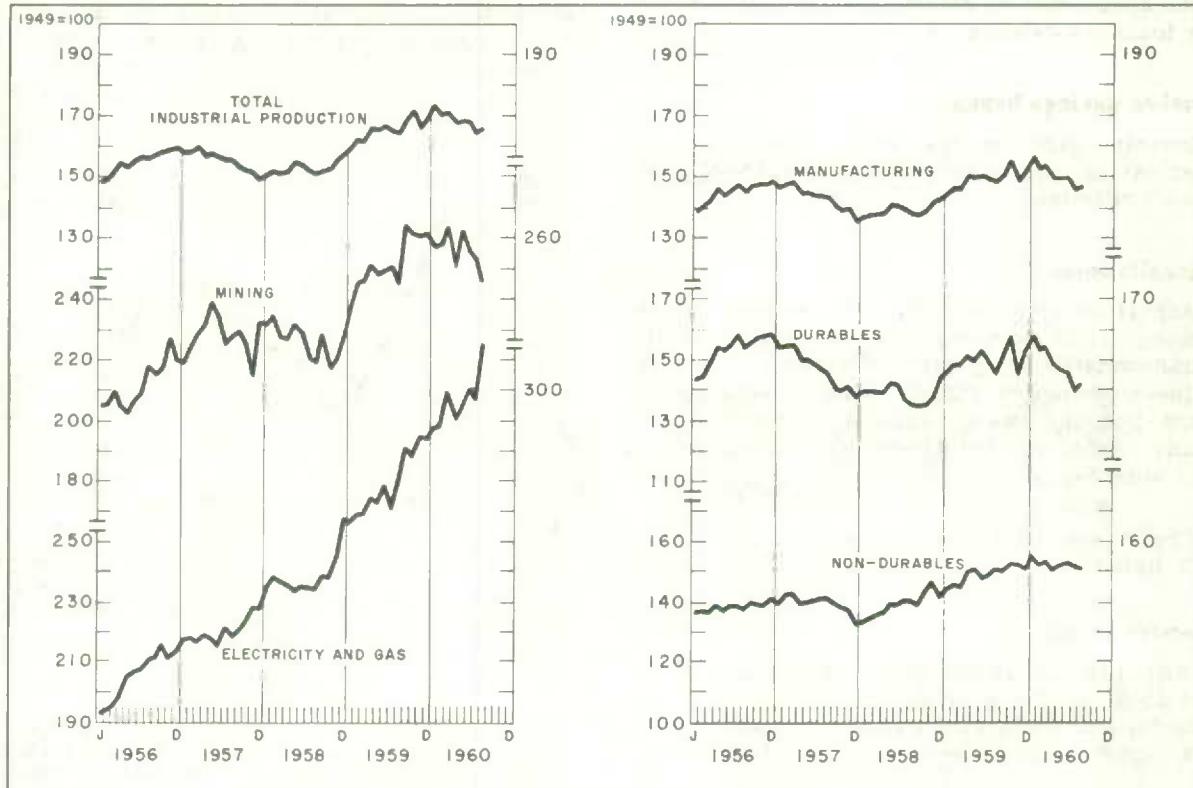

(d) As mentioned earlier, the breakdown of sales between cash and credit has been eliminated from the quarterly and monthly data mainly because firms had continuous difficulty in treating down payments and trade-in allowances and it was felt that the resources involved in straightening out these problems in the current surveys were better employed elsewhere.

(e) Except for instalment finance companies, only amounts outstanding at the end of the period are collected at the present time with no information available currently on new loans and repayments. For analytical purposes it is of course very useful to have separate information on new loans and repayments as well. The possibility of obtaining such information on a current basis will probably be studied shortly by the interdepartmental committee referred to at the beginning of this memorandum.

⁶ The figures of receivables shown in the reports of retail dealers exclude the amount of paper sold to sales finance companies.

PRODUCTION*

The index of industrial production rose slightly in August, as gains in manufacturing and in electricity and gas offset a decline in mining. Despite the August advance, the index was at a level about 4 per cent below the beginning of the year.

⁽¹⁾Averages of unadjusted data.

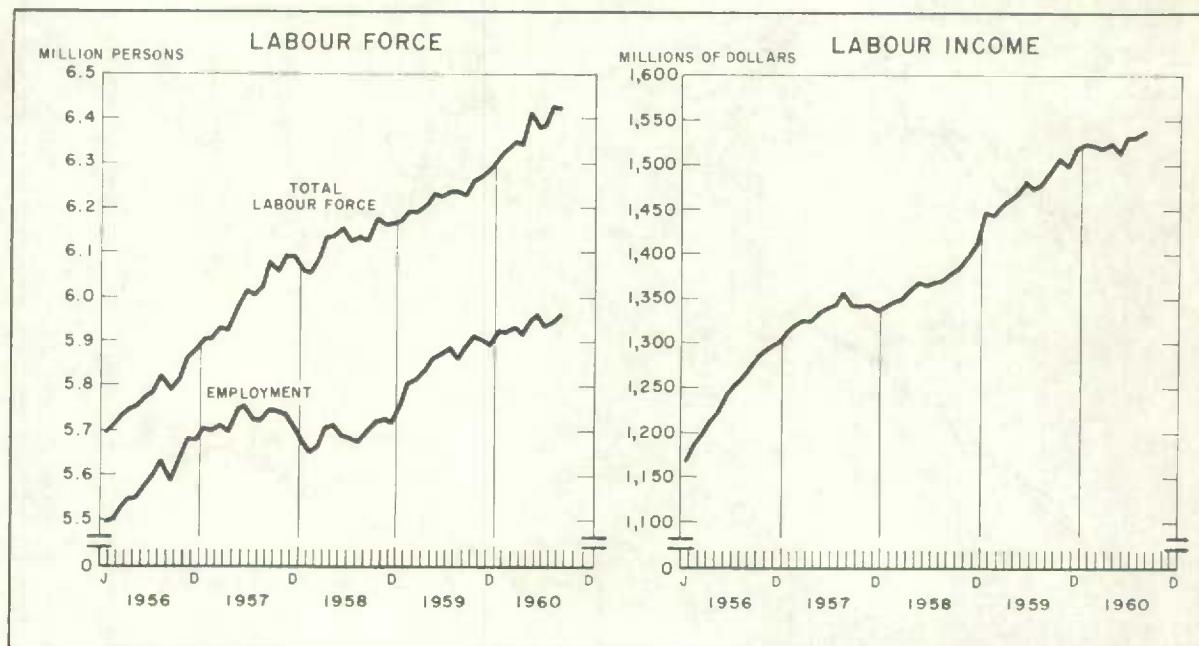

⁽²⁾Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

*The purpose of the moving average in the following charts is to indicate the underlying trend-cycle component as opposed to irregular factors. The moving averages are applied to the seasonally adjusted data and their lengths depend on a calculated measure called the M.C.D. or months for cyclical dominance.

LABOUR FORCE AND LABOUR INCOME

Total employment rose slightly in September. Unemployment declined, and with the labour force remaining relatively unchanged, unemployment as a percentage of the labour force also declined.

Total labour income rose slightly in August, although labour income in manufacturing was unchanged.

Civilian Labour Force⁽¹⁾

Labour Income

*More detailed information on retail trade, Seasonally Adjusted, can be found in Table 40.

†Averages of unadjusted data.

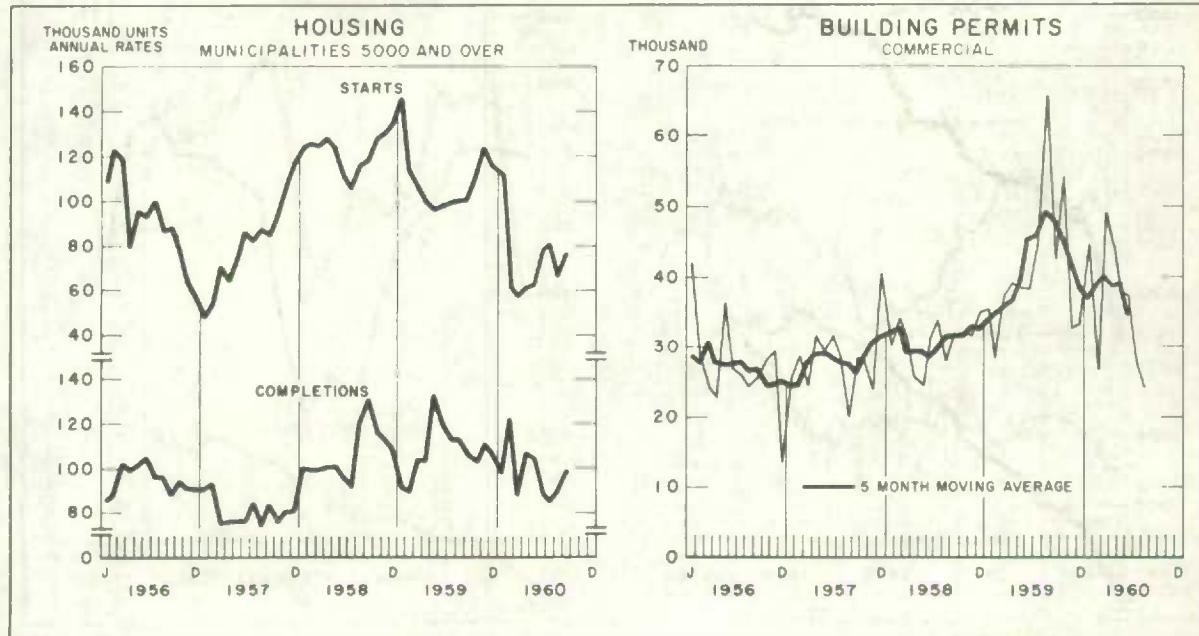

(2)Source: Sales of New Motor Vehicles and Motor Vehicle Financing.

(3)Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

CONSTRUCTION AND BUILDING PERMITS

Both housing starts and completions were higher in September. Third quarter total starts were well above the second quarter average, but total completions showed little change.

Commercial building permits declined for the sixth consecutive month.

New Residential Construction in Canada⁽¹⁾

(1) Annual estimates are as of June 1. (2) Seasonally adjusted at annual rates. (3) Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period. (4) Rough cords of 128 cu. ft. (5) In urban areas of 5,000 population and over. (6) Average of weekly rates. (7) Revised according to new bench marks. (8) This total includes all generating agencies producing over ten million kilowatt hours per year. (9) End of period. Including personal savings deposits.

⁽¹⁾"De facto" population. Annual data are for June.
⁽²⁾At current market prices. Annual data are totals of the four quarters.
⁽³⁾Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries.
⁽⁴⁾All manufactured products.
⁽⁵⁾Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates.
⁽⁶⁾Annual data are for June.

Note.—Until the end of 1959, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Not applicable to figures on population and immigration.

⁽²⁾Yukon and North-West Territories not included in figures for births, marriages and deaths.

⁽³⁾Estimates are now published quarterly following Census date, June 1, as well as for January 1 and July 1 of each year.

⁽⁴⁾Exclusive of stillbirths.

⁽⁵⁾Im-

migrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

NOTE: The quarterly data for the years 1956, 1957 and 1958 are now operative on the new revised basis described in the main reference document, "National Accounts, Income and Expenditure, 1926-1956", issued earlier this year. The method of mechanically linking the old quarterly series to the new annual levels which was used for 1956, 1957 and the first two quarters of 1958 is discontinued. No changes have been made to annual totals previously published. The revised quarterly series differs only slightly from the mechanically linked series.

8

⁽¹⁾The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given to the seasonally adjusted figures for this item.

⁽²⁾Includes adjusting entry.

⁽³⁾Includes residual error of estimate.

⁽⁴⁾This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

⁽⁵⁾Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production," 1935-57." 9

[†]The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

(1) Seasonal (formerly supplementary) benefit data included.

(2) On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included.

(3) The number of new cases of recorded unemployment among insured persons.

(4) Estimates are based on average weekly number of payments.

(5) The number of calendar weeks during which a benefit payment was made.

(6) Revised to relate to the Thursday nearest to the last day of the month.

(7) Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957-June 1958 which included fishing claimants.

(1) The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes.

(2) The

annual and monthly "all industries" totals for 1958 and 1959 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1).

40 (1) In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values.

(2) Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog.

(3) Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys.

(4) Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.
⁽²⁾Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.
⁽³⁾Customs exports.
⁽⁴⁾Mill shipments destined for export.

46 Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

⁽¹⁾Shipments for further processing within own firm and for sale in Canada.

⁽²⁾Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

⁽¹⁾End of period. ⁽²⁾Does not include apartment-type machines. ⁽³⁾Electric and other.

⁽⁴⁾Gas types are included. ⁽⁵⁾In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis.

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1958 and 1959 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data.

(1) Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area.

*See also Tables 18 and 19. ^rExcluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1959 are final prices. Since August 1, 1959, only initial prices are available for wheat, oats and barley. ⁽¹⁾Include subsidy on hogs. ⁽²⁾Based on price for hogs including Dominion premium. A rise in ratio favours production of beef.

⁽³⁾Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

⁽¹⁾Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded.

⁽²⁾Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted.

⁽³⁾Annual data are monthly averages of crop year.

⁽⁴⁾Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available.

⁽¹⁾Conditional sale agreements held in connection with the financing of retail purchases of consumer goods.

⁽²⁾Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments.

⁽³⁾Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only.

⁽⁴⁾In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards.

Balances were as follows:

June 1958-31	Sept. 1958-39	Dec. 1958-35	Mar. 1959-32	June, 1959-36	Sept. 1959-44	Dec. 1959-40
--------------	---------------	--------------	--------------	---------------	---------------	--------------

⁽⁵⁾Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds.

⁽⁶⁾Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

(1)As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960.

(2)Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products.

⁽¹⁾Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1958 and 1959 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ⁽²⁾As of January, 1958, statistics include the British Columbia Electric Railway. ⁽³⁾As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system.

⁽¹⁾Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.

⁽²⁾Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada.

⁽³⁾At September 30, 1957, the deposit

balances of religious, educational and welfare institutions used for business purposes, about \$140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date.

Excess of Revenues Over Expenditures (Budgetary Surplus (+) or Deficit (-))	+51.5	+5.9	-101.5	-103.7	+106.1	-65.3

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

⁽¹⁾The Canada totals by months for 1958 and 1959 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly averages nor the monthly figures for 1958 and 1959 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

†Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(2)Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3)Includes Printing and Publishing and Allied Industries.

CANADA 1960 . . .

- Special feature articles
 - Profusely illustrated
 - Over 300 pages
-
-

CANADA 1960 embraces surveys depicting the nation's natural resources, its industrial development, domestic and international trade, transportation, the labour force, social, educational and cultural life, plus . . .

. . . *a panoramic description of the development of the nation's economy during the first 60 years of the 20th Century . . .*

. . . *a historical-geographical study of Canada's growth from colony to nation . . .*

Copies of *Canada 1960* are available from both the Dominion Bureau of Statistics and the Queen's Printer, Ottawa. Orders should be accompanied by postal money order or cheque made payable to the Receiver General of Canada.

\$1 Per Copy
