PRIVATE AND PUBLIC INVESTMENT - OUTLOOK 1960

The regular survey of anticipated capital expenditures, a joint project of the Dominion Bureau of Statistics and the Economics Branch of the Department of Trade and Commerce, was published recently in a report entitled, "Private and Public Investment - Outlook 1960". This report is based for the most part on a survey of intentions but current trends and informed opinion are used in some areas where direct surveys are difficult to make.

The results of a survey of intentions are always subject to qualifications in that plans reflect the business situation at the time of formulation and may be modified in response to new developments. During the past year markets have strengthened both at home and abroad, bringing operating levels in Canadian industry closer to capacity and creating a new interest in expansion. At the same time earnings have remained high and together with increases in depreciation allowances have added to the supply of internal funds available for new or improved facilities. Strong competing demands for funds during 1959 affected the ability to finance investment in some fields but presumably plans have taken into account the level of interest rates and other circumstances of financing. A significant change in conditions in the capital market during 1960 could lead to a revision of present plans. In the past, when economic conditions continued to be favourable investment programmes were revised upward during the course of the year and accomplishment exceeded early year intentions; this could occur in 1960. In addition, the present estimates do not provide for certain proposed expenditure for gas pipelines which await the outcome of applications now under consideration by the authorities.

CHART - I

The following table shows the trend of capital expenditure in recent years in current and constant dollars.

TABLE 1. Capital Expenditures in Current and Constant Dollars

Year	Capital Expenditures						Capital Expenditures as percentage of Gross National Product	
	Construction		Machinery and Equipment		Total			
	Current	Constant	Current	Constant	Current	Constant	Current	Constant
millions of dollars

¹ Newfoundland not included in these years.

Present plans call for total outlays of \$8.8 billion, the largest on record, comparing with a previous record of \$8.7 billion in 1957, and 4 per cent higher than the level reached last year. Outlays on construction are expected to be the highest ever achieved and moderately in excess of the level of the past few years. Expenditures for machinery and equipment are expected to make a significant gain over those made in 1958 and 1959 and approach the record achieved in 1957.

The moderate increase in total investment expected in 1960 involves some change in its composition. Business investment had fallen sharply in 1958 and continued to ease in 1959, with the result that the emphasis shifted to housing and social capital, which together accounted for 43 per cent of the total in 1959. With the resurgence in business investment and the expected slight decline in outlays for housing, expenditures for social capital, which are expected to rise by 1 per cent, are likely to represent 42 per cent of the programme in 1960, compared with 37 per cent in 1956.

TABLE 2. Capital Expenditures by Sectors as a Percent of Total

Government Departments	12.6	12.7	13.4	15.6	15.2

¹ Anticipated.

² Includes agriculture and fishing, forestry, and mining, quarrying and oil wells.

Within the 6 per cent planned increase in business investment, the greatest forward impetus comes from the resource-based industries. The forest and mineral products industries are planning about a 20 per cent increase in outlays. This provides for considerably higher rates of spending for new facilities in base metal mining, the primary iron and steel industries and in the forest-based industries. Notable increases are also anticipated for commercial building, including retail outlets and office buildings. Likewise, secondary manufacturing industries expect to enlarge significantly their investment this year. On the other hand, programmes in fuel and power and transportation and communication, as planned at present, are on about the same scale as in 1959.

Primary Industry

Capital expenditures in primary industry in 1960 are expected to be \$1.040 million, 10 per cent higher than in 1959, but well below the peak of \$1.106 million in 1956. Higher outlays are expected for all three component groups, agriculture and fishing, mining, quarrying and oil wells, and forestry.

Capital expenditures in the mining group are expected to rise to \$406 million in 1960, compared with about \$345 million in the two preceding years and a peak of over \$600 million in 1957. Plans for 1960 provide for new facilities in base metal mining and further large outlays for the development of the new iron ore properties in Quebec and Labrador.

Projected outlays in forestry are \$63 million, about 14 per cent higher than in 1959, but below the peak of \$76 million in 1956.

The Utilities

At its peak in 1957, the capital programme carried out by the utilities amounted to \$2.3 billion and represented more than one quarter of the nations outlays for new facilities; as major projects for waterways, electric power and pipelines moved toward completion, capital expenditures in this sector fell sharply in the two following years. In 1960, the utilities plan to spend \$1.8 billion, almost as much as in the preceding year. This virtually unchanged total mainly reflects an expansion in

CHART-2

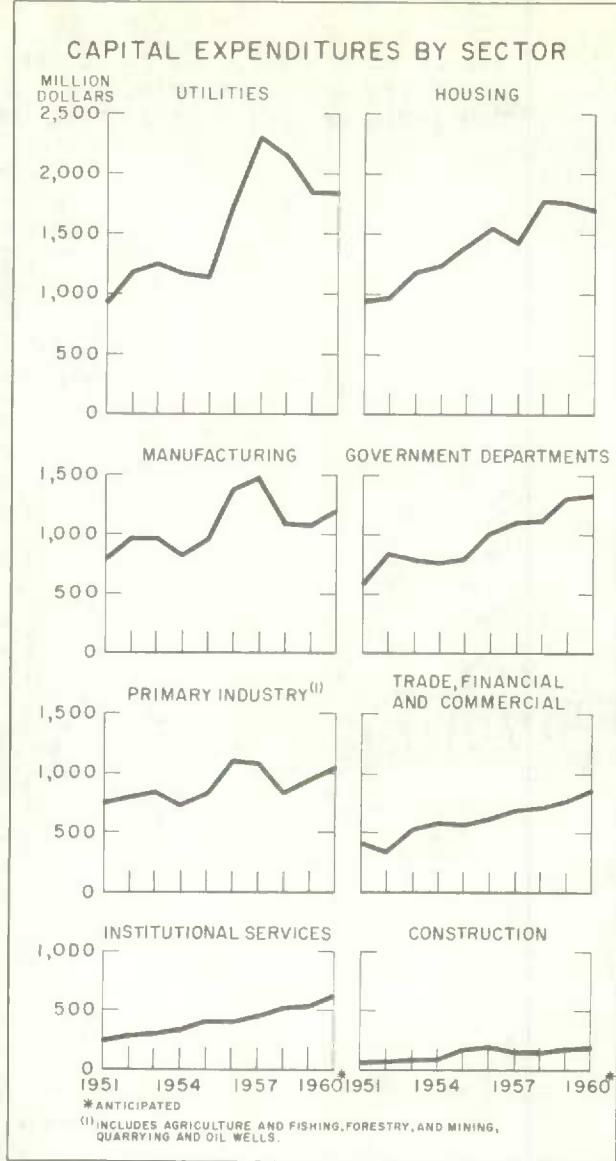

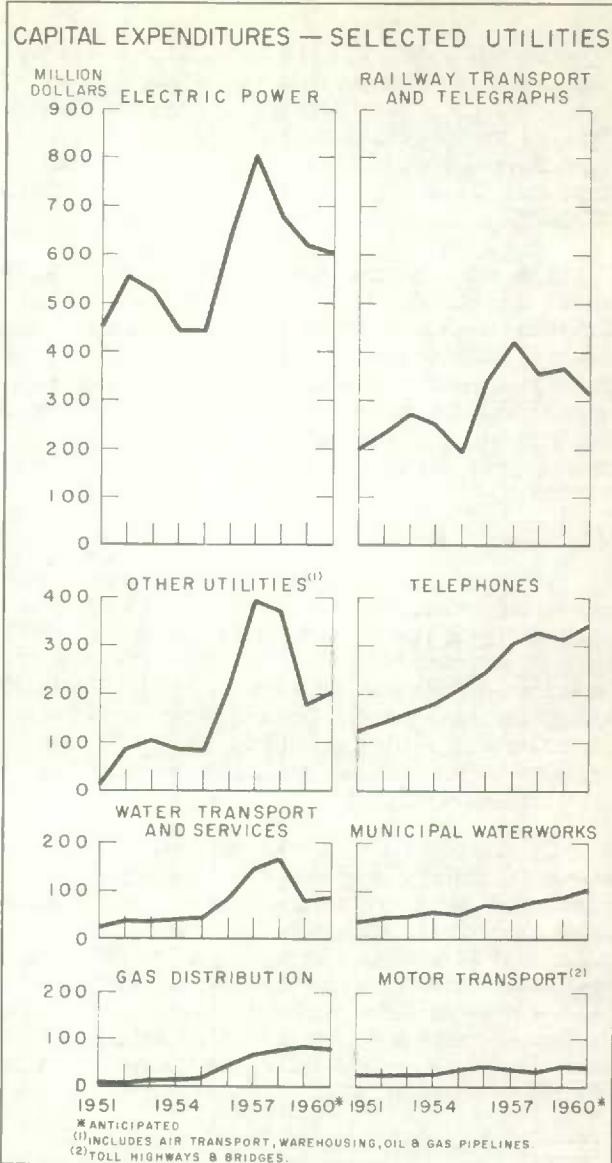

CHART-3

outlays for telephones, for "other" utilities (which includes pipelines) and for municipal waterworks, largely offset by a curtailment of outlays by railways, electric power and some other utilities.

Capital outlays for telephones have risen in every year but one of the post-war period and are expected to continue to rise in 1960; plans call for outlays of \$344 million, 9 per cent more than in the previous year. This expansion reflects technological changes in the industry as well as the growth of population in a situation of rising real income.

Outlays by "other" utilities are expected to rise to \$201 million in 1960, 13 per cent higher than in 1959 but well below the peak of \$372 million reached in 1958. The expenditure projected would be substantially higher if the National Energy Board approves the proposal for the export of natural gas

to the United States, particularly if a favourable decision is announced fairly early in the construction season. The export of natural gas through Southern Alberta would entail heavy outlays which are not provided for in the projection set out above.

The planned increase in outlays for municipal waterworks, bringing the forecast up to \$104 million compared with actual expenditures of \$89 million in 1959, is associated with an expansion in the activities of the recently appointed Water Resources Board.

Capital expenditure by the railways, which have shown wide year-to-year variations are expected to fall to \$314 million, 15 per cent lower than in 1959. Anticipated outlays for construction and for machinery and equipment are both down sharply. The estimate includes substantial sums for the railways to the newly developing Quebec-Labrador iron ore fields;

outlays for railway rolling stock are expected to be substantially lower than last year. This is the only major type of equipment in the whole investment programme for which lower outlays are anticipated. Outlays for electric power, though still large, are expected to be a little lower than in 1959. Plans for 1960 call for an expenditure of \$601 million, which compares with a peak of \$803 million in 1957.

The other groups in the utilities sector show mixed trends, with increased expenditures planned for urban transit systems and water transport and lower expenditures for gas distribution, motor transport, grain elevators and broadcasting. Outlays in water transport and services are less than half as large as in 1957 and 1958 when the St. Lawrence Seaway was absorbing massive amounts of investment.

Manufacturing Industries

The downward trend in capital outlays in manufacturing industries is expected to be reversed in 1960, bringing the total up to \$1,196 million, more than 11 per cent higher than in 1959. Planned outlays for 1960 compare with a peak of \$1,479 million in 1957. Much the largest part of the planned increase in outlays is in the non-durable goods industries; outlays in the durable group are expected to be only moderately higher.

Of the major industries, the greatest increase in capital outlays is expected in paper products and chemicals. Both are groups where capital outlays have shown wide year-to-year variations. Proposed outlays of \$170 million in the paper products industry, 40 percent higher than realized in 1959, compare with a peak of \$266 million in 1956. In chemicals outlays are expected to rise to \$121 million, 63 per cent more than in 1959 but below the peak of \$150 million so spent in 1957.

The programme in iron and steel of \$186 million in 1960 continues the moderate upturn evident in capital outlays in this industry last year. A small increase in outlays is expected in electrical apparatus and supplies and in non-ferrous metals; the programme in transportation equipment is virtually unchanged.

Capital outlays in non-metallic mineral products are expected to decline sharply and projected outlays of \$47 million are two-thirds those realized in 1959, and compare with a peak of \$120 million in 1956. The petroleum and coal products industry also plans to curtail its outlays, as it has done in the year just past. A significant decline in outlays is expected in the wood products industry, following a substantial increase last year.

Among the non-durable groups oriented toward the domestic market, foods and beverages and rubber products plan larger outlays in 1960. Capital investment in the rubber industry is expected to double—much the highest rate of increase in any manufacturing industries. Printing, publishing and allied industries is only one of the group planning significantly lower outlays.

* ANTICIPATED

Outlays for machinery and equipment by manufacturing industries are expected to rise by 17 per cent, thereby strengthening the demand for industrial machinery.

Trade, Financial and Commercial Services

The planned outlays for new facilities in trade, financial and commercial services for 1960 are \$855 million, 13 per cent higher than actual outlays in 1959. Apart from minor interruptions, the trend of capital expenditures in this sector has been rising in the post-war period and the projected rate of increase is the largest of any post-war year.

Trade, whose outlays are the largest of the three groups, is expected to spend \$364 million on new facilities, 9 per cent higher than in 1959 but still a little less than the previous peak in 1957. With the exception of the automotive trade, all the component groups plan to increase their capital outlays this year.

The expansion in outlays for new facilities in financial services has been almost continuous and very rapid; anticipated outlays of \$299 million for 1960, if realized, would represent a fourfold increase from expenditures a decade earlier and a 22 per cent increase from last year. The financial services group consists of three components, banks, insurance, trust and loan companies, and "other" financial

³ Includes, in addition to government departments, government-owned enterprises, federal government housing, provincial hospitals, schools, universities and municipal hospitals and schools.

organizations, which includes real estate companies engaged in developing, owning and leasing property. The last named, the most rapidly growing and much the largest of the three in terms of its capital outlays, plan outlays of \$227 million in 1960, compared with \$181 million in 1959.

Outlays of \$192 million are planned for commercial services in 1960, 6 per cent higher than in 1959 and moderately above the previous peak in 1957.

Institutional Services

The growth of population, particularly in the younger age groups, and the extension of social security schemes, have necessitated heavy expenditures on schools, universities and hospitals. The capital programme for institutional services calls

for expenditures of \$625 million in 1960, nearly a threefold increase from a decade earlier and 18 per cent higher than in 1959. The programme for hospitals in 1960 is \$201 million, 35 per cent more than in 1959; substantial increases are scheduled for schools and universities, bringing the combined total to \$356 million, 12 per cent higher than a year ago.

Housing

It is estimated that investment in new housing in 1960 will amount to \$1,696 million, compared with \$1,759 million in 1959 and an all-time high of \$1,782 million in 1958. This estimate assumes that the number of houses started will be 10 to 15 per cent less than the 141,000 started last year. However, with 82,000 houses under construction at the beginning of the year completions are likely to be close to last year's level of 146,000.

**PRELIMINARY RELEASE OF THE DISTRIBUTION OF NON-FARM FAMILY
INCOMES IN CANADA BY SIZE, 1958**

The average income of all families and unattached individuals in 1958 was \$4,544, more than 6 per cent higher than the average income of \$4,269 received in 1957. Half of the families and individuals received incomes of more than \$3,783 whereas in 1957 the median income was \$3,624. Although the greater part of the increase was due to higher earnings in 1958, a substantial part was attributable to increases in government transfer payments such as old age pensions and family allowances. In 1958, for example, old age pensioners (70 years of age or older) received \$660 for the full year compared to \$534 in 1957, an increase of 23.5 per cent from 1957. Consumer prices, however, rose by between 2 and 3 per cent during 1958 so that only part of the increased money income represented an increase in real income.

The average income of families only (excluding unattached individuals) rose from \$4,646 in 1957 to \$4,919, an increase of nearly 6 per cent; the median income was \$4,308. Approximately one-quarter had incomes below \$3,000 while one-quarter had incomes of \$6,000 or more.

Families and unattached individuals whose major source of income was wages and salaries received an average income of \$4,851, a rise of 5 per cent over the average of \$4,620 reported in 1957; families and unattached individuals whose major source of income was from self-employment averaged \$6,059, an increase of 6 per cent over the 1957 average of \$5,717. For both these groups of families, the percentage increase in average receipts of transfer payments was substantially greater than the percentage increase in average receipts of earned income so that increased earnings accounted for only part of the rise in family incomes. For families and individuals whose major source of income was from other money income (investments, transfer payments or pensions) the average income was \$2,335, an increase of approximately 20 per cent from the 1957 average of \$1,950. The median income, however, rose only moderately, from \$1,198 to \$1,223.

The percentage of families and unattached individuals with incomes below \$2,000 dropped from 24.7 to 22.4 per cent, while those with incomes of \$5,000 to \$9,999 rose from 25.6 to 28.5 per cent and those with \$10,000 and over from 3.7 to 4.5 per cent. In contrast in 1951, the first year for which estimates are available, 33.8 per cent had incomes below \$2,000, while only 12.4 per cent had incomes of \$5,000 to \$9,999 and only 1.8 per cent had incomes of \$10,000 or more.

The size distributions of incomes of families and unattached individuals for 1958 presented in this release are identical in scope and concept to estimates published earlier for selected years from 1951 to 1957. The 1957 estimates were released in D.B.S. publication 13-512 *Distribution of Non-Farm Incomes in Canada by Size, 1957*. Tables 1 and 2 of this publication correspond to the present estimates. Additional detail on the distribution of incomes in 1958 will be available late this year in D.B.S. publication 13-514, *Incomes, Liquid Assets and Indebtedness of Non-Farm Families in Canada, 1958*.

The family is defined as a group of individuals sharing a common dwelling unit and related by blood, marriage or adoption. Unattached individuals are persons living by themselves or rooming in a household where they are not related to other household members.

The income measured in these estimates consists of total money income receipts from the following sources: Wages and salaries (gross wages or salaries earned before deduction for income tax, unemployment insurance, etc.); net unincorporated business income (net income, gross income minus expenses, earned from self-employment either on own account or in an unincorporated business or in independent professional practice); investment income (bond interest, dividends, etc.); government transfer payments (such as old age pensions, unemployment insurance and family allowances); miscellaneous income (for example, retirement pensions and annuities).

Methods of estimation used to prepare the 1958 estimates differ from those used for 1957. The 1957 estimates were based upon survey data obtained from 7,750 families and adjusted by income tax statistics in the upper income brackets. Although, for 1958, income information was secured from 6,500 families as a by-product of a survey conducted in the spring of 1959 to collect information on liquid asset holdings and indebtedness, these data could not be used in conjunction with income tax statistics. The survey data were used to estimate the changes in average incomes between 1957 and 1958 and these estimated changes were used to project the income distributions from 1957 on the assumption that the shape of the distributions did not change between 1957 and 1958 (that is, that the Lorenz curve remained constant). The method used is the same as that used for estimating the distribution of incomes in 1955, described in Appendix I, D.B.S. publication 13-508, *Incomes, Liquid Assets and Indebtedness of Non-Farm Families in Canada, 1955*.

INDUSTRIAL PRODUCTION

The index of industrial production rose in December, reflecting the settlement of the steel strike in the United States and the expanded manufacture of durables, particularly automobiles.

⁽¹⁾Averages of unadjusted data.

⁽²⁾Employment indexes and average hours worked are compiled from data which relate to the last pay period of the month.

LABOUR FORCE AND LABOUR INCOME

The seasonally adjusted labour force was relatively unchanged in January but the number of persons with jobs increased slightly. Labour income in December increased due to a rise in industrial employment following the settlement of the U.S. steel strike.

⁽¹⁾Averages of unadjusted data.

⁽²⁾Source: Sales of New Motor Vehicles and Motor Vehicle Financing.

*The current revision employs an improved shopping day adjustment to the raw data prior to seasonal adjustments. In addition to correcting for variations in the number of shopping days in different months, each day of the week is weighted according to the percentage of weekly sales normally transacted on that day for that store type. Sales may differ between months not only because months vary in length, but also because the number of Fridays and Saturdays differ. Shopping tends to be concentrated on these days.

RETAIL TRADE (concluded)

Sales of passenger cars were down sharply in December. Sales of clothing and furniture and appliances showed little change.

⁽¹⁾Averages or totals of unadjusted data.⁽²⁾Seasonally adjusted at annual rates.

*Seasonal adjustment computed by Central Mortgage and Housing Corporation.

EXPORTS, IMPORTS AND CORPORATION PROFITS

Although exports declined in December, a general upward trend has prevailed throughout the year.

Imports, which had tended to level off in the latter part of 1959, rose in November.

(a) "De facto" population. Annual data are for June.

(b) At current market prices. Annual data are totals of the four quarters.

(c) Output of building

and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries.

(d) All manufactured products.

(e) Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates.

Note.—Until the end of 1958, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1959 and 1960 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Not applicable to figures on population and immigration. ⁽²⁾Yukon and North-West Territories not included in figures for births, marriages and deaths. ⁽³⁾Estimates are given by years as of June 1 and by quarters for Canada. ⁽⁴⁾Exclusive of stillbirths. ⁽⁵⁾Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

Note: The quarterly data for the years 1956, 1957 and 1958 are now operative on the new revised basis described in the main reference document, "National Accounts, Income and Expenditure, 1926-1956", issued earlier this year. The method of mechanically linking the old quarterly series to the new annual levels which was used for 1956, 1957 and the first two quarters of 1958 is discontinued. No changes have been made to annual totals previously published. The revised quarterly series differs only slightly from the mechanically linked series.

(1)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

(2)Includes adjusting entry.

(3)Includes residual error of estimate.

(4)This item differs from column 5, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

(5)Excluding dividends paid to non-residents.

Note: For detailed description of concepts, sources and methods see D.B.S. Reference Paper (61-502) "Revised Index of Industrial Production, 1935-57." 9

[1]The M.C.D. (months for cyclical dominance) measure indicates the number of months required, on average, for the emergence of the cyclical trend from the seasonally adjusted series. An M.C.D. of 4 implies that a four month moving average of the series (dated at the second month) is required in order to offset irregular movements and allow examination of the underlying cyclical trend. The series in this table are not adjusted for M.C.D.

Table 6.—INDUSTRIAL PRODUCTION—continued

(1) Seasonal (formerly supplementary) benefit data included.

(2) On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included.

(3) The number of new cases of recorded unemployment among insured persons.

(4) Estimates are based on average weekly number of payments.

(5) The number of calendar weeks during which a benefit payment was made.

(6) Revised to relate to the Thursday nearest to the last day of the month.

(7) Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957-June 1958 which included fishing claimants.

(1) As of July, 1957, the statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes.

(2) The annual and monthly "all industries" totals for 1957 have been revised and are no longer quite comparable with the data for individual industries, apart from the differences described in footnote (1).

(1)In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values.

(2)Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog.

(3)Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys.

Manufacturing inventory owned by manufacturers, held at plant or plant warehouse at end of period.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. ⁽²⁾Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. ⁽³⁾Customs exports. ⁽⁴⁾Mill shipments destined for export.

Source: Monthly Report on Primary Iron and Steel—D.B.S.

Note.—The data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included.

^(a)Shipments for further processing within own firm and for sale in Canada.^(b)Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

(1) Includes some silvery pig iron formerly included with ferro-alloys.

(2) Excluding shipments for processing.

(3) Imports include, in addition to all other

shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings.

(4) Monthly average.

(5) Because of the confidential provisions contained in

the Statistics Act, comprehensive details of production and shipments of rolled steel products were not available for publication by months during the period of the strike at one of the major reporting plants. The figure published here is the total production for the last five months of 1958.

(1)End of period.

(2)Does not include apartment-type machines.

(3)Electric and other.

(4)Gas types are included.

(5)In some cases

these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

^rConstruction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis.

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1957 and 1958 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area.

⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected. ⁽²⁾Planks and boards, flooring and square timber. ⁽³⁾Hollow blocks including fireproofing and load-bearing tile. ⁽⁴⁾For building insulation only. ⁽⁵⁾Figures cover the production of firms which normally account for 85 per cent of the total for Canada. ⁽⁶⁾Includes concrete chimney blocks.

⁽⁷⁾Factory sales of firms which normally account for 90% of total Canadian production.

^{*}See also Tables 18 and 19. ⁽¹⁾Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1958 are final prices.Since August 1, 1958, only initial prices are available for wheat, oats and barley. ⁽²⁾Include subsidy on hogs. ⁽³⁾Based on price for hogs including Dominion premium. A rise in ratio favours production of beef. ⁽⁴⁾Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

⁽¹⁾Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.
Revised to include bagged seed wheat previously excluded. ⁽²⁾Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. ⁽³⁾Annual data are monthly averages of crop year. ⁽⁴⁾Includes eggs for hatching.

(1) Prior to 1958 data are not comparable to subsequent data which exclude trades extending credit largely to commercial users.

(2) Conditional sale agree-

ments.

(3) Other deferred payment plans.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available.

⁽¹⁾ Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. ⁽²⁾ Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. ⁽³⁾ Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only.

⁽⁴⁾ In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards.

Balances were as follows:

Dec. 1957-32	Mar. 1958-29	June 1958-31	Sept. 1958-39	Dec. 1958-35	Mar. 1959-32	June 1959-36
780	768	755	755	744	744	740

⁽⁵⁾ Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds.

⁽⁶⁾ Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

⁽¹⁾Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1957 and 1958 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ⁽²⁾As of January, 1958, statistics include the British Columbia Electric Railway. ⁽³⁾As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system.

⁽¹⁾Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. ⁽⁴⁾The September 30, 1957 and subsequent figures for 'personal savings deposits' exclude, and the figures for 'other notice deposits' include, the amount of \$140 million, being the deposit balances of religious, educational and welfare institutions and personal accounts used mainly for business purposes, which were reclassified at that time in the returns of the banks to the Department of Finance. The figures prior to September 30, 1957 are thus not comparable with those since that date. ⁽⁵⁾Mainly deposits of foreign banks. ⁽⁶⁾Capital, rest fund and undivided profits as at the latest fiscal year-end. ⁽⁷⁾Including issues payable in foreign currency. ⁽⁸⁾Excluding Canadian day to day loans. ⁽⁹⁾Loans to grain dealers and exporters. ⁽¹⁰⁾Loans to finance purchase of Canada Savings Bonds at time of issue. ⁽¹¹⁾Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities. ⁽¹²⁾Including loans to instalment finance companies.

^(a)Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.

^(b)Subsidiary coin issued by the Mint less coin held by Bank of Canada and chartered banks in Canada.

^(c)Less total float, i.e. cheques and other items in transit (net).

^(d)At September 30, 1957, the deposit balances of religious, educational and welfare institutions used for business purposes, about \$140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date.

Excess of Revenues Over Expenditures (Budgetary Surplus (+) or Deficit (-)).....	-22.9	-70.3	+61.8	+53.1	-87.3	-120.9			

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

⁽¹⁾The Canada totals by months for 1957 and 1958 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. The provincial monthly figures for 1957 have not been revised to agree with the Canada total. Neither the monthly averages nor the monthly figures for 1958 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(2) Includes, in addition to the industries listed, Tobacco, Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(3) Includes Printing and Publishing and Allied Industries.

You read the Canadian Statistical Review

You know the value of accurate facts and figures

For the exporter there is a special source—

FOREIGN TRADE—that provides him with the facts and figures that can mean more sales and larger profits.

FOREIGN TRADE gives an up-to-date picture of markets abroad because its reporters are Canadian Trade Commissioners living in the countries they write about. A sample copy will give you a small idea of the variety of products and the number of markets covered in FOREIGN TRADE. Write for one to the Editor, Department of Trade and Commerce, Ottawa.

A year's subscription to FOREIGN TRADE brings you 26 issues and costs only \$2.00. Use the coupon to order yours.

Supervisor of Government Publications,
The Queen's Printer,
Ottawa, Canada.

Please send me *Foreign Trade* for a year. Enclosed is my cheque /
money order for \$2.00 (\$5.00 outside Canada) made payable to
the Receiver General of Canada.
