**NATIONAL ACCOUNTS INCOME AND EXPENDITURE**  
**THIRD QUARTER 1961**

**Introductory Review**

Canada's Gross National Product, seasonally adjusted, rose by 2.7 per cent in the third quarter of 1961, continuing the upward trend which was resumed in the second quarter of the year after a brief interruption. The gain was the largest quarter-to-quarter advance for some time, and was almost wholly accounted for by an increase in the physical volume of output; the price index of total Gross National Product remained relatively unchanged in the quarter<sup>1</sup>. This most recent gain in output has raised the physical volume of production to a level about 3 per cent above the first quarter of 1960, which marked the peak of the last business cycle expansion.

The production advance in the third quarter was supported by a substantial increase in labour income, the largest since 1959, and a further marked advance in corporation profits, bringing them above the peak level of the fourth quarter of 1959. National income rose by 4 per cent. On the demand side, the expansion in total final purchases was one of the largest on record (see table on page ii). All components of the Gross National Expenditure were rising in the quarter, with the exception of business inventories, where the rate of accumulation was moderately lower, and agricultural inventories which were

<sup>1</sup> Import prices rose sharply in the third quarter, reflecting the drop in the exchange rate on the Canadian dollar; however, since imports are excluded from the Gross National Product, this development was not reflected in the price component of total Gross National Product.

affected by a poor crop out-turn in Western Canada<sup>2</sup>. In particular, the reversal of a two-quarter down-trend in business outlays for new plant and equipment added a sizeable element of renewed strength to total final demand in the quarter. Outlays for new housing were also higher, following the small second quarter decline. Transactions on current international account exerted a neutral effect, however, as the rise in exports of goods and services was matched by a corresponding rise in imports, and the deficit remained unchanged. Government and consumer outlays continued to provide an expansionary influence on the total flow of expenditures in the economy.

With nine months data now available, it is possible to suggest an order of magnitude for the year 1961 as a whole. In the first nine months of the year, Gross National Product has averaged about 2 per cent above the same period of 1960. The rise in final product prices between the two periods has amounted to about 1 per cent, so that in physical volume terms production was up over a year ago by about 1 per cent. The post-war average increase in the physical volume of output has amounted to approximately 4 per cent per year.

These nine months' comparisons, in terms of the value, volume and price change over the year, are shown in the lower part of the following table (Column (1)); figures are also given for the main components of demand.

<sup>2</sup> The value of crop production in 1961 is estimated at just below \$600 million, compared with about \$1,000 million for the year 1960.

G.N.P. MADE A STRONG ADVANCE  
IN THE THIRD QUARTER,  
RISING BY 2.7 PER CENT

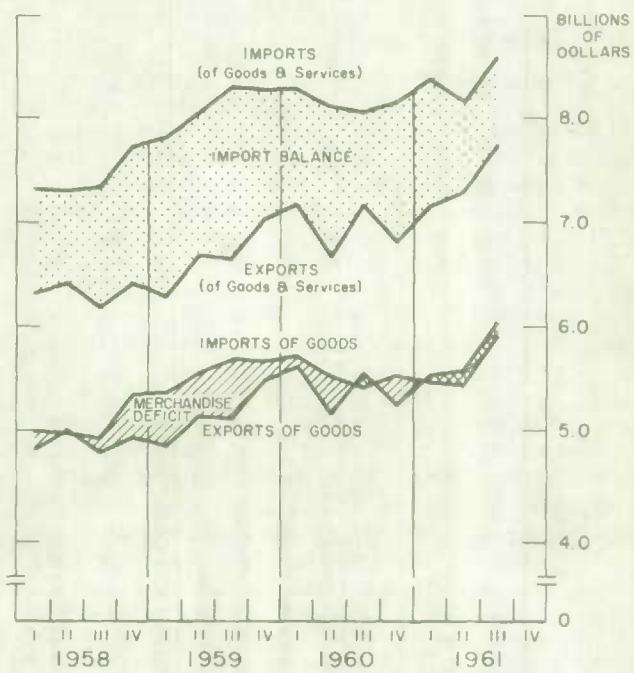

THE VALUE INCREASE IN THE FIRST NINE MONTHS  
AMOUNTED TO 2 PER CENT OVER THE SAME  
PERIOD OF 1960, WITH THE VOLUME OF  
PRODUCTION UP BY ABOUT 1 PER CENT

BUSINESS OUTLAYS FOR PLANT AND EQUIPMENT  
TURNED UPWARD IN THE THIRD QUARTER,  
FOLLOWING A 2-QUARTER DECLINE. OUTLAYS  
FOR NEW HOUSING WERE ALSO HIGHER. ADDITIONS  
TO INVENTORY STOCKS CONTINUED TO BE  
MADE, BUT AT A MODEST RATE

THE TOTAL DEFICIT ON CURRENT ACCOUNT SHOWED  
LITTLE CHANGE IN THE THIRD QUARTER.  
THE SURPLUS ON MERCHANDISE ACCOUNT  
CONTINUED AT THE SECOND QUARTER LEVEL

(IN ALL CHARTS DATA ARE SEASONALLY ADJUSTED AT ANNUAL RATES)

While these annual comparisons provide a useful setting for viewing the year 1961 in perspective, they conceal to a considerable extent the evidence of developing strength which became markedly apparent toward the end of the year. The accompanying table also shows percentage changes in terms of the quarter-to-quarter movements of the seasonally adjusted figures through the first three quarters of this year. It is evident from Columns (2), (3), and (4) that, as the year progressed, greater strength was becoming apparent in the components of total final demand, and in the third quarter the advance in Gross National Product, both in value and in volume terms, was the largest quarter-to-quarter

gain for several years. The third quarter figure of Gross National Product was running at a seasonally adjusted annual rate about \$1.0 billion higher than the nine-month average.

The flow of income to the personal, business and government sectors was also rising throughout the year, although the year-to-year changes, averaged out over the nine months, were in most cases of rather modest proportions. Corporation profits, for example, show little change on the year-to-year basis, but as the accompanying table indicates, the increases in this component of income in the second and third quarter of 1961 were unusually sharp.

<sup>1</sup> Based on data seasonally adjusted at annual rates.

## DEVELOPMENTS IN THE THIRD QUARTER

### Production by Industry

Indicators of the volume of output show an increase of about 2½ per cent from the second to the third quarter of 1961, after allowing for seasonal factors. The quickening tempo of economic activity was apparent in almost all industry groups but was particularly evident in the goods-producing industries where the impact of the down-turn had been chiefly felt. Output in this group was up about 3½ per cent, as opposed to an increase of less than 1½ per cent in the service-producing industries. Non-farm output of goods and services is estimated to have risen in excess of 2 per cent.

Manufacturing production, seasonally adjusted, advanced by 3½ per cent in the third quarter. This development brought the index of manufacturing output to a point more than 1 per cent above its previous peak in the first quarter of 1960, and 5 per cent above the level of the first quarter of 1961. While the major share of the advance in the third quarter came in the durable segment of manufacturing production (up 4.6 per cent), this index was still about 5 per cent below its record peak reached in the last quarter of 1956.

Most of the durable goods industries contributed to the large increase in the output of the durable goods group. The biggest gain occurred in the transportation equipment industry where production rose by 12 per cent, reflecting increased output in the automotive industry, and also in shipbuilding, which had been affected by strikes in the second quarter; activity in the aircraft industry was somewhat lower. Almost all component groups in the iron and steel industry, and especially the iron castings and primary iron and steel group, contributed to the 6 per cent rise in output in this industry during the quarter. Production in the wood products group and electrical apparatus and supplies group, was up by 3 and 5 per cent respectively in the quarter. On the other hand, production of non-ferrous metal products declined by 4 per cent and output of non-metallic mineral products was slightly lower.

The non-durable manufacturing industries also showed widespread strength in the quarter, rising by 2.3 per cent on a seasonally adjusted basis. The increase brought the index to a level some 3½ per cent above the previous peak reached in the first quarter of 1960. The gains in production ranged from

1 per cent in chemicals and leather products to 8 per cent in clothing. Reduced oil refining activity caused the petroleum products industry group to decline by 3 per cent. Production of tobacco products was also down by 2 per cent.

In spite of substantial changes within the components of the mining industry, there was no change in the total level of output of this industry in the third quarter. Iron ore and uranium production were down sharply, but these declines were offset by gains in nickel, lead and zinc. Output of crude petroleum was up slightly from the high level of the second quarter.

The downward trend of output in the construction industry was reversed in the third quarter when construction put in place is estimated to have risen 4½ per cent. Both housing construction and non-residential construction activity showed substantial gains.

Within the service industries, gains in output in the third quarter were all comparatively small, ranging between 1 or 2 per cent for most service industry groups.

#### Employment

Non-farm employment as estimated by the Labour Force Survey rose by about one-half of 1 per cent from the second to the third quarter, on a seasonally adjusted basis. In conjunction with a gain in real output in the non-farm sector estimated at more than 2 per cent, some increase in output per worker is suggested. The total labour force declined more than seasonally in the third quarter, and there was a decline in the unemployment rate—from 7.5 per cent of the labour force in the second quarter, to 6.9 per cent in the third, on a seasonally adjusted basis. This is the second successive decline in quarterly rates of unemployment from the level prevailing at the beginning of the year.

#### Value, Volume and Price Comparisons

As has been noted, the price component of total Gross National Product showed very little change

between the second and third quarters of 1961. However, as the accompanying table indicates, the price of imported goods and services was significantly higher in the third quarter, by about 3 per cent, reflecting the effects of the decline in the exchange rate on the Canadian dollar. This development on the import side has to some extent been reflected in the price component of total final demand, some categories of which have a substantial import content. For example, the import content of machinery and equipment is estimated at close to 50 per cent of the total value put in place, and this particular component of the Gross National Expenditure reflects the effect of increased import prices associated with the exchange rate decline. The price of consumer goods and services increased only fractionally in the quarter, and the rise in import prices does not as yet appear to have had any significant effect on the price of consumer goods sold at retail. The introduction of a 3 per cent retail sales tax by the Province of Ontario in September is reflected in the slight increase in prices at the consumer level.

The price component of exports of goods and services has shown a significant rise between the second and third quarters. Canadian wholesale price indexes for some major primary commodities that enter into international trade (and whose prices are set in world markets) rose sharply in the third quarter; prices of woodpulp, by 3½ per cent, newsprint by 4 per cent, and grains by 10 per cent. These price increases are related, in part to the new exchange rate situation, and in part to changes in the world supply situation. It is possible that the effects of the decline in the exchange rate have not yet been fully reflected in export prices.

On balance, the rise in import prices has had little effect on the price component of total Gross National Product, since imported goods and services are excluded, by definition, from Canada's Gross National Product. The accompanying table shows the effect of price developments in these various categories in the third quarter of 1961.

Percent Changes, Value, Volume and Price<sup>1</sup>

<sup>1</sup> Seasonally adjusted at annual rates.

<sup>2</sup> The price comparisons shown above are based on the implicit price deflators which can be derived by dividing the value series by the volume series.

## **Business Gross Fixed Capital Formation**

Considerable strength developed in the capital sector in the third quarter, as investment outlays rose by 6 per cent above the second quarter level, on a seasonally adjusted basis. The rate of increase was about the same for all three components. The reversal of the downward movement in total capital outlays took place against a background of sharply rising profits and a higher level of industrial production. The expansion in demand for fixed capital goods brought about a 3 per cent rise in employment in the construction industry and an increase of over 5 per cent in domestic shipments of both capital goods and construction materials. Although commodity detail is not yet available for the full quarter, it is probable that part of the increase in demand for capital goods in the quarter was met out of the rise in imports.

Business outlays for plant and equipment in the third quarter were running at a seasonally adjusted annual rate of \$5.0 billion, with an increase over the second quarter of 7 per cent in the case of expenditures for machinery and equipment and 5 per cent for non-residential construction. There is some evidence of a shift of emphasis within the non-residential component toward engineering construction and away from building construction.

The relative slowness in non-residential construction in the spring months, in part, was the result of unfavourable weather conditions in Eastern Canada at the start of the construction season accentuated by a major work stoppage in June. In the third quarter construction conditions were much more favourable and the recovery in activity reflected a catching up on work delayed earlier in the year, as well as the reaction to more favourable economic conditions. In addition, a concentration of the pipeline construction work in this quarter contributed to the relative strength shown in engineering construction and added to the general recovery.

Outlays for new housing in the third quarter are estimated at a seasonally adjusted annual rate of \$1.6 billion, 6 per cent higher than the second quarter level. Much of this advance in expenditures came from completions, which were up more than 17 per cent, reflecting the high level of starts prevailing in the opening months of the year. However, starts in the third quarter were also up a little, by over 2 per cent, and thus made some contribution to the advance in outlays.

## **Investment in Inventories**

The sharp expansion in activity in the third quarter was based entirely on the rise in final demand (see table, page ii), and did not involve any acceleration in the rate of inventory stock building. In fact, investment in business inventories amounted to only \$72 million in the third quarter (at seasonally adjusted annual rates), compared with a modest but somewhat larger buildup of \$140 million in the preceding period, as is shown in the accompanying table. All the increase in stocks took place

in retail trade; manufacturing industries continued to draw down their stocks for the third quarter in succession, while wholesale trade and other industries shifted from accumulation to liquidation.

Among manufacturing industries the major part of the quarter's drawing down of stocks took place in the durable goods group. Liquidation was fairly general throughout this group except for iron and steel and non-metallic mineral products industries, both of which began to build up inventories in contrast to the situation in the two preceding quarters. Among the non-durables there was a fairly substantial build-up of stocks in the tobacco industry and a heavy drawing down in the petroleum industry.

At the end of the quarter, the ratio of stocks to sales in total manufacturing was virtually the same as existed one year earlier. However, the ratio for durables, where shipments increased sharply in the quarter, was substantially reduced, while the ratio for non-durables, where there was only a small increase in shipments, was somewhat higher. During the quarter, new orders in manufacturing industries rose by more than 5 per cent, with a slight increase in new orders for capital goods (excluding transportation equipment), and a 4 per cent increase in new orders for construction materials.

## **Change in Non-Farm Business Inventories**

(Seasonally adjusted at annual rates)

	1Q 1961	2Q 1961	3Q 1961
millions of dollars			
Manufacturing .....	- 24	- 60	- 84
Durables .....	-180	4	- 52
Non-durables .....	156	- 64	- 32
Retail trade .....	- 64	20	204
Motor vehicle dealers ...	-124	44	20
Other .....	60	- 24	184
Wholesale trade .....	68	16	- 4
Other industries .....	48	164	- 44
<b>Grand totals .....</b>	<b>28</b>	<b>140</b>	<b>72</b>

There was a substantial accumulation of stocks in the hands of retail traders in the third quarter in contrast to only a modest accumulation in the second. The movement of stocks in the individual trades was mixed. Much of the accumulation in the durable groups is accounted for by stocks in the hands of farm implement dealers. Stocks of food largely account for a substantial build-up in the non-durable group.

In wholesale trade, stocks were drawn down slightly in the third quarter, in contrast to a small accumulation in the second quarter. This liquidation was the outcome of almost offsetting accumulation in stocks of durable goods and liquidation in stocks of non-durables.

## Exports and Imports of Goods and Services

At a seasonally adjusted annual rate of \$7.8 billion, exports of goods and services in the third quarter were up more than 6 per cent from the second quarter level, following the much more moderate 2 per cent increase in the preceding period. At the same time, imports of goods and services rose to \$8.6 billion, an increase of 5½ per cent, in contrast with the decline of 2½ per cent in the preceding quarter. The deficit on current international account remained unchanged between the two quarters, at approximately \$0.8 billion, on the National Accounts

basis. The merchandise account recorded a small surplus for the third quarter in succession, after having been in deficit for many years; the last full year in which a merchandise surplus was recorded was in 1954. Payments and receipts on service account showed little change in the third quarter, in contrast to the two preceding quarters, when sharp but erratic changes on interest and dividend account caused the deficit on services to widen suddenly in the early part of the year, and to narrow again in the second quarter.

## Exports and Imports of Merchandise and Services

(Seasonally adjusted at annual rates)

	4Q 1960	1Q 1961	2Q 1961	3Q 1961	Per cent change 2Q to 3Q
millions of dollars					
Exports:					
Merchandise .....	5,264	5,548	5,588	6,052	8.3
Services (including interest and dividend receipts) .....	1,548	1,600	1,712	1,700	-0.7
<b>Totals</b> .....	<b>6,812</b>	<b>7,148</b>	<b>7,300</b>	<b>7,752</b>	<b>6.2</b>
Imports:					
Merchandise .....	5,540	5,468	5,448	5,908	8.4
Services (including interest and dividend payments) .....	2,608	2,916	2,708	2,688	-0.7
<b>Totals</b> .....	<b>8,148</b>	<b>8,384</b>	<b>8,156</b>	<b>8,596</b>	<b>5.4</b>

Merchandise exports rose by more than 8 per cent in the third quarter and were particularly strong in the months of July and September. It is not yet possible to identify all of the items responsible for this large increase, but shipments of wheat were a very important factor; exports of copper and nickel were also higher in the quarter. The pick-up of exports to the United States was particularly important in raising the level of total exports in the third quarter. At the same time, merchandise imports rose more than 8 per cent. Full commodity detail is not yet available for imports but the upsurge comes at a time when investment in plant and equipment appears to be recovering, and consumer spending showing greater strength, particularly for durables.

The changes in the service account were for the most part small and, as is mentioned above, virtually offsetting. However, receipts from interest and dividends dropped sharply from the irregularly high second quarter level, and there was a considerable expansion in receipts from freight and shipping.

## Personal Expenditure on Consumer Goods and Services

Consumer spending in the third quarter is estimated to have been \$24.6 billion (seasonally adjusted at annual rates), about 1½ per cent higher than in

the second quarter. This is about the same rate of increase as in the preceding period, and considerably below the 3 per cent rise in disposable income.

Much of the strength in consumer spending in the third quarter came from purchases of durable goods which were up 6½ per cent from the previous quarter. There were increased purchases of all the categories of durables but the major increase was in purchases of new and used cars which were up by 9 per cent. Purchases of British and European cars increased sharply, reversing the downward movement evident in the two preceding quarters; the level of expenditure here, however, was below that registered in any quarter of the previous year. Among other durables, sales of radios and appliances were up 8 per cent in the quarter and of home furnishings and furniture 5 and 3 per cent respectively.

Expenditure on non-durables increased by 1 per cent in the quarter, with moderate increases in most categories. Spending on services was higher by 1 per cent.

## The Government Sector

The deficit on consolidated government account (on the National Accounts basis) remained virtually unchanged between the second and third quarters of 1961, at a seasonally adjusted rate of \$1.2 billion.

However, there was a marked narrowing of the deficit at the Federal level, from \$0.8 billion to \$0.6 billion; the deficit at the provincial-municipal levels of government showed an increase of \$0.2 billion.

Total government revenues were rising in the third quarter in response to the general expansion in economic activity and the higher levels of incomes, shipments, sales, and imports. The increase amounted to \$0.4 billion (or over 3 per cent), three-fourths of which represented a gain at the Federal level; the balance represented additional revenues of the provincial-municipal governments.

On the expenditure side, Federal outlays increased by about \$140 million (2 per cent), a major part of which was accounted for by a sharp rise in subsidy payments attributable to interim subsidies paid to the railways pending the complete report of the Royal Commission on Railway Problems; a smaller rise in non-defence purchases for goods and services also contributed to the increase at the Federal level. Provincial and municipal outlays rose by about double the amount of the increase at the Federal level (\$240 million), more than half of which was accounted for by higher payments for goods and services, and the balance by an increase in transfer payments to persons.

#### Personal Income and Savings

The flow of income to the personal sector was strongly upward in the third quarter of 1961 on a seasonally adjusted basis. All major components of total personal income were rising in the quarter, with substantial gains occurring in labour income, transfer payments, net income of unincorporated businesses, and revenues from investment income. With personal direct taxes showing little change from the high second quarter level, the after-tax income of persons rose by 3.2 per cent between the second and the third quarters. This rate of increase was approximately twice as great as the advance in personal expenditure for consumer goods and services, with the result that the level of personal saving rose very sharply in the quarter. As a percentage of disposable income, personal saving was 6.3 per cent in the third quarter of 1961, compared with 4.8 per cent in the preceding quarter.

#### Labour Income

Labour income continued to rise in the third quarter, to a seasonally adjusted annual rate of \$19.5 billion, more than 2 per cent above the level of the second quarter. This is the strongest advance in labour income since the latter part of 1959. All major industries except mining and agriculture shared in the advance with the largest gains being

in personal and community services and financial services. Associated with these gains in labour income, employment in all industrial groups covered in the establishment survey of employment and earnings recorded advances in the quarter, after seasonal factors are taken into account, with gains of 0.5 per cent in transportation, 3 per cent in the construction industry and nearly 7 per cent in forestry. In manufacturing, the gain of 2 per cent in labour income closely matched the rise in employment.

#### Corporate Profits

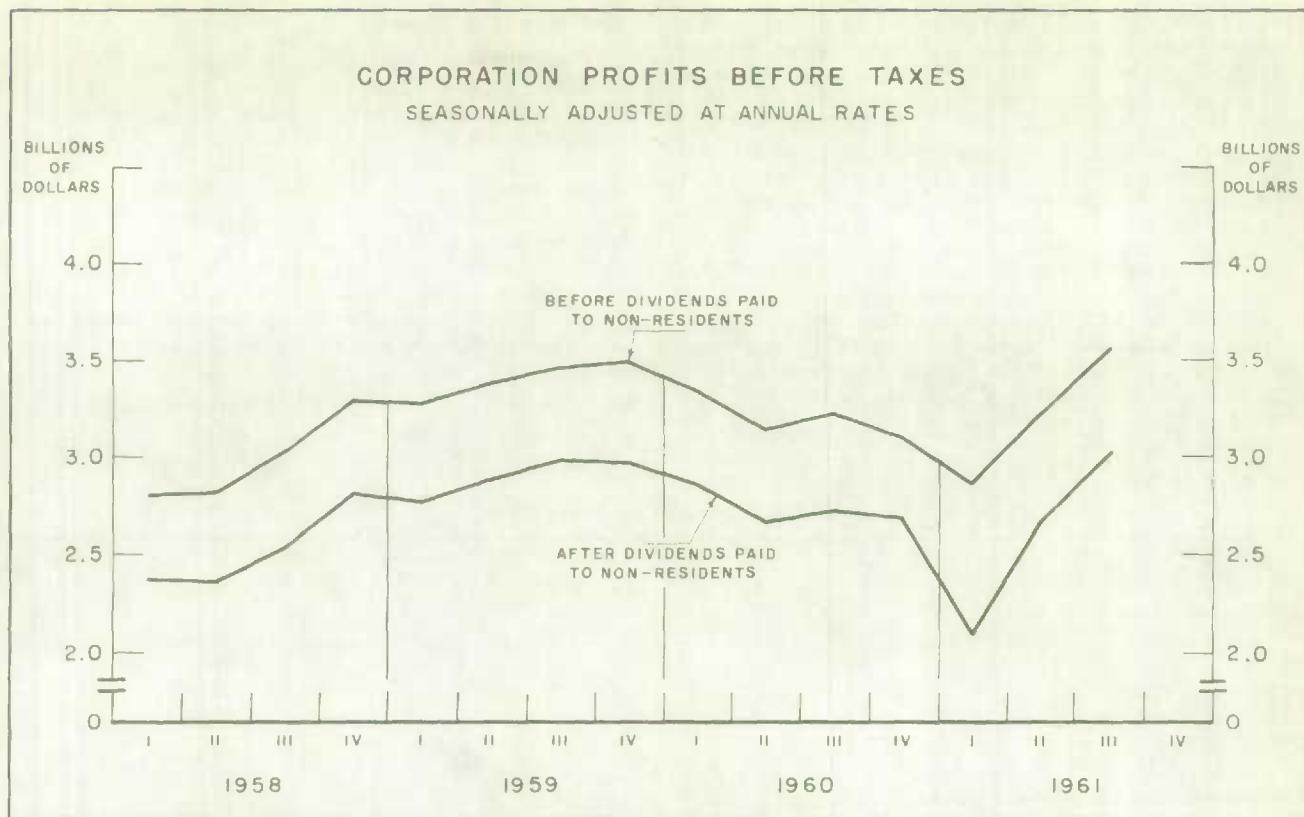

Corporate profits before taxes and before dividends paid abroad rose to \$3.6 billion in the third quarter, or by 10 per cent above the level of the second quarter on a seasonally adjusted basis. Among the factors tending to raise corporate profits in the quarter was the decline in the exchange rate on the Canadian dollar, which has pushed up profit margins in a number of commodity-producing industries whose prices are set in world markets. In addition, as noted earlier, total final demand was rising strongly in the quarter, and production in most industries showed a marked advance.

Higher profits was an experience common to all industries except the service group in the third quarter (see detail, table on page xiii). A 9 per cent rise in profits in mining, quarrying and oil wells (seasonally adjusted) is largely associated with a sharp increase in exports of nickel, coupled with a 10 per cent rise in the price as quoted in American dollars.

Manufacturing industries as a group recorded an increase in profits of 10 per cent, on a seasonally adjusted basis, in the third quarter. Almost all manufacturing industries shared in this advance, the notable gains being in foods and beverages, and paper products (both up 9 per cent), petroleum and coal products (up 29 per cent), iron and steel products (up 4 per cent), and electric apparatus and supplies (up 55 per cent). The level of profits in non-ferrous metal products was unchanged.

An 18 per cent increase in profits in transportation between the second and third quarters is largely attributable to the interim subsidies received by the railways pending the complete report of the Royal Commission on Railway Problems.

There were also higher profits in distribution, profits in retail trade being up 25 per cent and in wholesale trade up 8 per cent. In finance, insurance and real estate, profits were higher by nearly 12 per cent.

### THE FIRST NINE MONTHS OF 1961

#### Production by Industry

As noted earlier, in a comparison of the first nine months of 1961 with the same period one year ago, the total volume of production has risen by about 1 per cent. This estimate takes account of a sharp drop in agricultural output in 1961 attributable to the effects on the grain crop of a severe drought in the Prairie Provinces. Crop production in 1961 was lower than in 1960 by about 40 per cent. In value terms, this represents a \$400 million loss relative to the year 1960, or about 1 per cent on the total Gross National Product.

Output in the non-agricultural industries accounted for all of the rise in the physical volume of production between the two periods, most of this increase being attributable to the service-producing industries, which rose by 2.5 per cent; output in the goods-producing industries (apart from the farm sector) averaged over the nine months' span was fractionally higher than for the same period of 1960.

In this comparison, manufacturing production was only a shade higher (0.5 per cent) than a year earlier, with losses in durables almost offsetting gains in non-durables. Widespread increases occurred in the non-durable groups, making for a 2.8 per cent rise in the total; industrial gains ranged from 1 per cent in chemical products to 8 to 10 per cent in textiles, tobacco, miscellaneous manufactures and

leather products; output of clothing was little changed while rubber products output was off moderately.

Within durables, declines in production on the nine months' basis were general. All components of transportation equipment except aircraft recorded lower output, making for a 6 per cent decline for this group as a whole. Production in the electrical apparatus and supplies industry was also off considerably. Smaller declines occurred in non-ferrous metal products, wood products and iron and steel.

Activity in mining was higher by about 1 per cent, with substantial gains in output of fuels and non-metals largely offset by a drop in the output of metals. While most metals contributed to this trend, the drop in output of uranium and iron ore was particularly large. The gain in fuels is attributable to crude petroleum and natural gas.

Production in forestry was off about 6 per cent in the year-to-year comparison, most of this drop being attributable to reduced pulpwood output.

A 2½ per cent decline in construction put in place is accounted for by non-residential construction; the volume of housing was fractionally higher in the nine months' comparison.

Production in the transportation, storage and communication group was higher by about 3½ per cent, with each of the component groups making some contribution to the over-all increase. In transportation, activity was much higher in pipelines and in civil aviation; activity in railways and shipping was up only slightly. It is to be noted that freight car loadings show reductions over a wide range of commodities.

Among the other service-producing industries, activity was moderately higher in the nine months' comparison. The volume of total retail and wholesale trade is estimated to have been up by 1½ per cent. Dealers in most retail trades experienced some increase in the volume of business in the first nine months of 1961, as compared with the period one year earlier.

### Employment by Industry

Taking the first three quarters of the year together, total employment in 1961 was higher than in 1960 by 1.4 per cent. Female employment continued to make very strong gains, but employment of males remained relatively unchanged. As in the recent past, the rate of increase of 3 per cent in the service industries was much sharper than that in the goods-producing industries, — there was, in fact, a decline of about one-half of 1 per cent in employment in the goods-producing industries over the period. These nine-month comparisons of the employment figures are shown in the accompanying table.

### Employment by Industry

	First nine months averages (Estimated in thousands)		Per cent change
	1960	1961	
Total employed .....	5,933	6,014	1.4
Males .....	4,360	4,354	- 0.1
Females .....	1,573	1,660	5.5
Goods-producing industries .....	2,770	2,756	- 0.5
Agriculture .....	683	683	-
Other primary industries .....	203	174	-14.3
Manufacturing .....	1,470	1,501	2.1
Construction .....	414	398	- 3.9
Service-producing industries .....	3,164	3,258	3.0
Transportation and other utilities .....	518	511	- 1.4
Trade .....	970	976	0.6
Finance, insurance and real estate .....	227	239	5.3
Service .....	1,449	1,532	5.7

### Business Gross Fixed Capital Formation

In spite of the signs of recovery in the third quarter, capital outlays for the first nine months of the year were running 5 per cent below expectations as set out in the mid-year review of investment intentions, 3 per cent below the like period of the previous year, and 13 per cent below the level obtained in the peak year 1957.

Comparing the first three quarters of this year with the like period of 1960, expenditures for plant and equipment are down 5 per cent, with the construction component off 4 per cent and the machinery and equipment off 6 per cent. It might be noted that, compared with the full year 1957, the rate of expenditures on plant and equipment thus far in 1961 are lower by 18 per cent.

### Housing

Conditions of mortgage credit had eased in the course of 1960 and lending terms under the National Housing Act had been liberalized around the turn of

the year. In this situation there was an upsurge in housing starts in the latter part of 1960 and they were at a relatively high level in the opening months of 1961 — although below the peak reached in 1958. Thereafter starts fell sharply and in the third quarter were fairly stable a little above the second quarter rate. The result of the pattern of housing starts over time was a gain of nearly 28 per cent in a first nine months' comparison with the same period of 1960, a decline of nearly 11 per cent in completions, with total expenditures for housing running about 3 per cent higher than in the previous year.

### Exports and Imports of Goods and Services

The improvement on the external side is apparent in a longer term perspective when the nine months of 1961 are compared with the same period of the previous year. Between the two periods, exports of goods and services were up about 5½ per cent, and imports about 3 per cent.

### Domestic Exports

	Jan. - Aug. 1960	Jan. - Aug. 1961	Per cent change
thousands of dollars			
<b>Leading commodities</b>			
Newsprint paper .....	494,639	492,561	- 0.4
Wheat .....	241,602	404,134	67.3
Lumber and timber .....	237,059	235,181	- 0.8
Woodpulp .....	218,938	226,993	3.7
Nickel .....	176,453	209,253	18.6
Aluminum and products .....	177,976	152,358	-14.4
Copper and products .....	153,304	135,248	-11.8
Uranium ores and concentrates .....	181,512	134,706	-25.8
Petroleum, crude .....	65,025	85,518	31.5
Fish and fishery products .....	84,843	84,971	0.2
Asbestos and products .....	73,379	80,048	9.1
Iron ore .....	107,667	76,901	-28.6
Farm machinery and implements .....	69,608	63,367	- 9.0
<b>Leading countries</b>			
United States .....	1,987,285	1,931,236	- 2.8
United Kingdom .....	598,063	582,244	- 2.6
European Common Market .....	250,599	295,513	17.9
Japan .....	108,856	151,901	39.5
Other .....	501,288	667,693	33.2
<b>Total domestic exports</b> .....	<b>3,446,091</b>	<b>3,628,587</b>	<b>5.3</b>

Commodity and country detail, set out in the accompanying table, is available for only eight months of the year. Comparing 1961 with 1960 on this basis, exports in total were up more than 5 per cent (by \$182 million), with large and partly offsetting changes. Among the leading commodities, there was an increase of about \$160 million in sales of wheat and an increase of about \$33 million in sales of nickel, partially offset by decreases of about \$47 million in sales of uranium and concentrates, about \$25 million in sales of aluminum, and a considerable reduction in sales of copper and products, and of farm machinery.

The comparison of export sales by leading countries continues to exhibit major changes in the area distribution of trade. In the eight months' comparison sales to the United States and the United Kingdom were each down by close to 3 per cent, while sales to the countries of the European Common Market were up by 18 per cent, sales to Japan

up by 40 per cent, while sales to all other countries were up by 33 per cent. In the latter increase of nearly \$170 million, \$66 million is accounted for by sales of wheat to Communist China under a government-negotiated contract.

### Personal Expenditure on Consumer Goods and Services

In the first three quarters of this year, consumer spending was higher than in the same period of 1960 by 4 per cent. The largest element in this increase was in services, where expenditure was up 5 per cent, reflecting the continuing growth of outlays for shelter, medical care and household operation. It is interesting to note that between 1960 and 1961 (9 month comparison) the year-to-year percentage change in total consumer spending and in its main components was virtually the same as for the 1959-60 comparison.

### Consumer Expenditure

	Per cent change	
	Year 1959 to Year 1960	3 Quarters 1960 to 3 Quarters 1961
Food .....	3.0	1.9
Clothing .....	2.2	2.9
Other .....	6.5	7.3
Total non-durable goods .....	4.1	4.0
Appliances and radios .....	-4.1	2.9
Home furniture and furnishings .....	-2.9	2.0
Autos (New and Used) .....	3.5	-1.0
Other .....	0.7	-1.2
Total durable goods .....	0.3	0.3
Total all goods .....	3.4	3.3
Total services .....	5.3	5.0
Total personal expenditure (goods and services).....	4.1	4.0

However, within the total of the durable goods component, some shifts in composition have occurred. Whereas in the 1959-60 period, appliances and radios and home furnishings and furniture were lower, in the 1960-61 comparison some increases have occurred. In the earlier comparison, housing outlays were off by 15 per cent whereas in 1960-61 housing outlays were somewhat stronger. There was a distinct drop in the share of the market taken by British and European cars in 1961 compared with one year earlier: purchases of these cars fell by 15 per cent on the nine months basis.

Spending for non-durables was higher by 4 per cent in the nine months' comparison, with increases of 2 per cent for food and 3 per cent for clothing.

#### Government Sector

Over the course of the first nine months of 1961, the total deficit on consolidated government account has averaged out to a rate well above that for the same period of 1960 — \$1,184 million, compared with \$688 million in the earlier period. The deficit at the Federal level in the first nine months of this year was running at a rate of \$635 million (on the National Accounts' basis), compared with \$336 million in the preceding period.

#### Labour Income

In the comparison of the first nine months of 1961 with the same period of 1960, labour income rose by 3½ per cent. Forestry, mining and con-

struction, where employment had declined over the period, both recorded lower levels of labour income between the two periods. As has been characteristic of developments in this area over the recent past, the largest gains were recorded in government, and personal and community services, where they amounted to about 9 per cent in each case. Financial services, with a gain of about 7 per cent, was also relatively high. In manufacturing, which had felt much of the impact of the 1960 downturn and where employment had not turned up until about mid-1961, labour income was nevertheless higher by nearly 2 per cent in the nine months' comparison. In most other industries, the gains were in the neighbourhood of 3 to 4 per cent.

#### Profits

Comparing the first nine months of 1961 with the same period of 1960, corporate profits remained virtually unchanged, reflecting the sharply reduced levels which prevailed at the beginning of the year. By industry, profits were lower in the distributive trades, both wholesale and retail, and in the services group. Profits in manufacturing declined by 3.0 per cent, although the experience of individual manufacturing industries diverged widely; iron and steel, electrical apparatus and supplies were among the industries recording a reduction in profits, while higher profits were realized in textiles, paper products, non-ferrous metals and non-metallic mineral products.

**Changes in Corporation Profits – Selected Industries**  
 (Seasonally adjusted)

	2nd Quarter 1961 to 3rd Quarter 1961	9 Months 1960 to 9 Months 1961
per cent		
Mining, quarrying and oil wells .....	9.0	7.4
Manufacturing .....	10.3	- 2.7
Foods and beverages .....	8.5	2.8
Paper products .....	9.4	7.2
Iron and steel products .....	4.3	-17.2
Electrical apparatus and supplies .....	54.5	-28.3
Petroleum and coal products .....	29.2	-
Textile products .....	7.7	16.7
Non-ferrous metal products .....	-	22.7
Non-metallic mineral products .....	7.1	10.8
Chemical products .....	7.1	- 2.4

Retail trade .....	25.0	- 6.9
Finance, insurance and real estate .....	11.7	5.2
Service .....	-11.8	-11.8
Other non-manufacturing industries .....	4.5	- 2.2
Total all industries .....	10.4	- 0.8

**NOTE TO USERS OF THE CANADIAN STATISTICAL REVIEW**

**Changes in this Issue**

1. The seasonally adjusted data and charts on page S-6 on manufacturing inventories, shipments and orders are revised. Shipments have a working day adjustment applied and some shipment series also are adjusted for strikes. The series for shipments of capital goods (ex-heavy transportation equipment) and in the construction goods industries are replaced by shipments in the primary iron and steel industry.

2. Following Table 30, the tables are re-numbered and in some of them there are also changes in their titles.

3. Data on inventories, shipments and orders contained in the former Tables 37 and 38 are revised. Also the data in former Table 37 is broken out into five new tables, namely Tables 38, 39, 40, 41 and 42, a procedure which simplifies presentation. The former Table 38 now becomes Table 43; the seasonally adjusted data which it contains is adjusted for working days and strikes as indicated in (1) above.

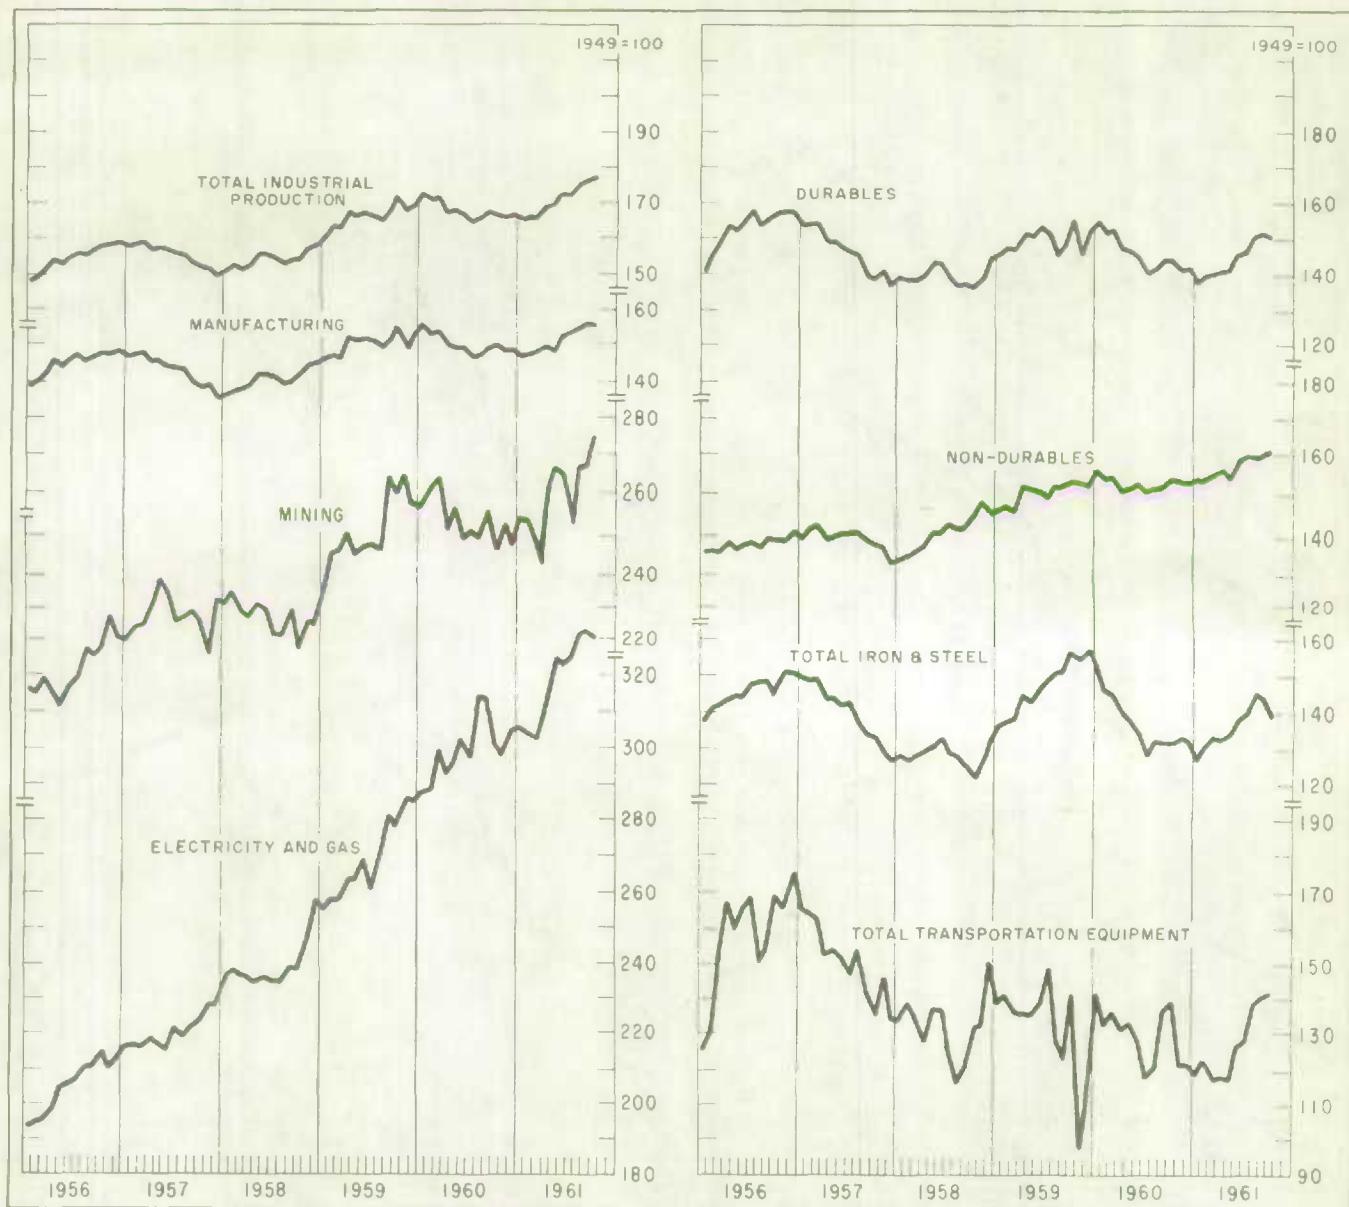

**Back Records**

The revised back records for the raw and seasonally adjusted series on page S-6 are available on request. Inventories and total shipments are available from January 1950 to date and the rest of the series from January 1952 to date.

Past "Notes to Users" gave the publications which carried back records of some of the series in the S Section. These publications are often not conveniently available to users, or if available the complete back record has to be compiled from more than one publication. The Dominion Bureau of Statistics (Current Business Indicators Section) has prepared a limited number of back records, seasonally adjusted, for all of the series in the S section, and they are available on request to users who otherwise have difficulty in obtaining them.

## INDUSTRIAL PRODUCTION (More detail in Table II)

The index of industrial production was relatively unchanged in October. There was a substantial gain in mining production which was largely offset by declines in manufacturing production and in electricity and gas.

	Total Industrial Production	Mining Production	Manufacturing Production				Electricity and Gas	Total Iron and Steel	Total Transportation Equipment			
			Total	Durables	Non-durables	1949=100						
1960	S	167.6	255.2	148.4	144.5	151.6	314.4	131.3	136.4

**RETAIL TRADE, MOTOR VEHICLE SALES** (More detail on Retail Trade in Table 74)

Total retail trade in October was close to the levels of June and July, after a sharp rise in August and a subsequent decline in September.

October sales of American type passenger cars were up by 15%.

	Retail Trade Total	Retail Trade (ex. motor vehicle dealers)	Motor Vehicle Dealers	Department Stores	New Motor Vehicle Sales		
					American type Passenger	American type Commercial	European Passenger and Commercial
Million dollars							
1960	A	1,362	1,150	212	122.0	79.0	22.4
	S	1,372	1,156	216	118.6	82.7	23.8

**CONSTRUCTION**

The total value of building permits declined slightly in October. There was a large gain in residential building permits but this was more than offset by a drop in non-residential permits.

Housing starts advanced markedly in November, but completions declined for the second consecutive month.

**EXPORTS AND IMPORTS** (More detail in Table S2)

Total exports advanced sharply in September, reflecting gains to all countries.

Total imports in October made substantial gains on the strength of increased imports from the United States and the United Kingdom.

<sup>2</sup>(<sup>1</sup>)Population estimates are made quarterly after Census date of June 1, and also for January 1 and July 1 of each year.  
 (<sup>2</sup>)Country of last permanent residence.  
 (<sup>3</sup>)Figures for births, marriages and deaths for 1961 are provisional and represent registrations filed in provincial vital statistics offices during the month under review, regardless of the month of occurrence. These figures are exclusive of the Yukon and the North-West Territories. Births and deaths are also exclusive of stillbirths.  
 (<sup>4</sup>)Births less deaths for all Canada gives the net natural increase.

Table 6.—NATIONAL INCOME AND GROSS NATIONAL PRODUCT IN CURRENT DOLLARS

Years and Quarters	Salaries wages and supplementary labour income	Corporation profits before taxes and before dividends paid to non- residents <sup>(1)</sup>	Rent, interest and mis- cellaneous investment income	Accrued net income of farm operators from farm production <sup>(2)</sup>	Net income of non-farm unincor- porated business	Inven- tory valuations adjust- ment	Net national income at factor cost	Indirect taxes less sub- sidies	Capital consumption allowances and mis- cellaneous valuation adjustments	Gross national product at market prices <sup>(3)</sup>			
	Military pay and allow- ances	Deduct: dividends paid to non- residents

<sup>(1)</sup>In previous publications this item was shown after deduction of dividends paid to non-residents; it is now shown inclusive of such dividends. To derive series consistent with past published figures, columns 3 and 4 must be combined. <sup>(2)</sup>Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. <sup>(3)</sup>Includes residual error of estimate. <sup>(4)</sup>This item differs from column 6, page 5, by excluding the adjustment which has been made to take account of accrued net earnings arising out of Canadian Wheat Board operations.

<sup>(1)</sup>Includes workers on temporary lay-off.

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error.

<sup>(1)</sup>The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes. <sup>(2)</sup>The annual and monthly "all industries" totals for 1959 and 1960 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote (1).

(1) Seasonal (formerly supplementary) benefit data included.

(2) On last working day of month; claimants formerly classified as "short time" and temporary lay-off are included.

(3) The number of new cases of recorded unemployment among insured persons.

(4) Estimates are based on average weekly number of payments.

(5) The number of calendar weeks during which a benefit payment was made.

(6) Revised to relate to the Thursday nearest to the last day of the month.

(7) Commencing with November 1958, figures exclude fishing benefit claimants during the seasonal benefit period. Adjustments have been made in figures for November 1957-June 1958 which included fishing claimants.

<sup>(1)</sup>The data in Tables 17 to 27 are based on reports from employers usually employing 15 persons and over and covering the respondents last pay period(s) in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below.  
<sup>(2)</sup>Includes trapping and domestic service.  
<sup>(3)</sup>Includes storage and communication.  
<sup>(4)</sup>Includes insurance and real estate.  
<sup>(5)</sup>Includes defence and such community services as health and education.

Source: Employment and Payrolls, D.B.S.

<sup>(1)</sup>Excludes agriculture, fishing,  
<sup>(2)</sup>Excludes public administration

30 \*All data published tables 38, 39, 40, 41, 42 and 43 are revised according to new annual benchmark values.

(1) Monthly shipments represent an estimated projection of the latest available Census of Industry values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted.

(2) Total manufacturing inventory owned by manufacturers including warehouse stocks.

(3) Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month.

(4) End of period.

(5) Classified according to the Standard Industrial Classification.

(a) Releases of domestically manufactured tobacco for consumption in Canada.  
of 25 gallons each.

(b) End of period.

(c) The production of beer is shown in thousand barrels

(d) Includes bottling of imported liquors.

(1) Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

(2) Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

(3) Rough cords of 128 cu. ft.

(4) Customs exports.

(5) Mill shipments destined for export.

<sup>(1)</sup>Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included.<sup>(2)</sup>Excluding shipments for re-processing at maker's own plants.<sup>(3)</sup>Imports include, in addition to all other shapes, ingots, cast iron pipe, wire and wire ropes. Imports exclude castings (except cast iron pipe), forgings, fittings and couplings.

(1)End of period.

(2)Does not include apartment-type machines.

(3)Electric and other.

(4)Gas types are included.

(5)These shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

\*Construction of dwelling units.

Note.—These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely. The remainder of the country is covered on a sample basis.

Note.—The data on building permits are collected for 1,014 municipalities and individual figures are available on request. Some of the annual totals for 1959 and 1960 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. <sup>(1)</sup>Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area.

(1) Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.											
(2) Planks and boards, flooring and square timber.											
(3) Hollow blocks including fireproofing and load-bearing tile.											
(4) For building insulation only.											
(5) Figures cover the production of firms which normally account for 90 per cent of the total for Canada, up to December 1959.											
(6) Factory sales of firms which normally account for 98% of total Canadian production.

<sup>a</sup>See also Tables 18 and 19.

(1)Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1960 are final prices.

From August 1, 1960 to July 31, 1961, the western grain prices used in the index are initial prices plus interim payments for wheat, and initial prices for oats and barley. Since August 1, 1961, only initial prices are available for these three grains.

(2)Include subsidy on hogs. (3)Based on price for hogs including Dominion premium up to September 1960. A rise in ratio favours production of beef.

(4)Previous to January, 1958 quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

(1)Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. (2)Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. (3)Annual data are monthly averages of crop year. (4)Includes eggs for hatching.

(1) Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

(2) Includes stocks held by manufacturers, wholesalers and other warehouses.  
 (3) The increase in percentage of capacity from October to November, 1960 reflects the fact that some mills worked more than the 25 days included in this formula as well as a reduction in total daily capacity from 171,000 hundredweight in October to 151,000 hundredweight in November.

(1) Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total.

(2) Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available.												
(1) Conditional sale agreements held in connection with the financing of retail purchases of consumer goods.												
(2) Excluded from the above tabulation are charge accounts of motor vehicle dealers whose credit is extended mainly to businesses rather than to consumers.												
(3) Instalment credit includes conditional sales agreements only.												
(4) Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds.												
(5) Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

<sup>(1)</sup>As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960.

<sup>(2)</sup>Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products.

Source: Trade of Canada, D.B.S.

<sup>(1)</sup>Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1959 and 1960 differ from the sum of the monthly data due to revisions which cannot be allocated by months. <sup>(2)</sup>As of January, 1958, statistics include the British Columbia Electric Railway. <sup>(3)</sup>As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. <sup>(4)</sup>Includes January to July interim payments related to recommendations of the Royal Commission on Railway Transportation.

70 Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

(1) The Canada totals by months for 1959 and 1960 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly figures for 1959 and 1960 nor the monthly averages for 1960 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1)Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(2)Includes, in addition to the industries listed, Tobacco and Leather.

NOTE.—\*Revised series with coverage limited to business failures under the Bankruptcy and Winding Up Acts, excluding individuals not operating businesses as such.

(1) In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

Source: Commercial Failures Under the Provisions of the Bankruptcy and Winding Up Acts, D.B.S.

74 (1) "De facto" population. Annual data are for June. (2) Output of building and civil engineering work excluding the output of building operatives employed by private firms outside the building and civil engineering industries. (3) All manufactured products. (4) Exchange Equalisation Account holdings of gold and convertible currencies. Gold is valued at 250 s. per ounce fine, and currencies at parity, except the Canadian dollar which is valued at the appropriate rates.

(5) Annual data are for June.
