| Statistical Tables..... | Page 1 |
| List of Statistical Tables..... | Inside Back Cover |

A NOTE TO USERS

Changes in this issue:

(1) On page S-8, the seasonally adjusted prices of industrial common stocks (1935-39 = 100) have been deleted as the unadjusted data is now based on 1956 = 100 (See Table 99). Tests are proceeding on the seasonal adjustment of the revised data.

(2) Table 12, "Labour income by months" has been expanded by providing data for individual provinces in the Atlantic and Prairie Regions.

(3) Tables 86 to 101 have been rearranged and renumbered.

Back Records:

The following back records, raw and seasonally adjusted, are available on request from the Current Business Indicators Section, National Accounts and Balance of Payments Division, D.B.S. These are in addition to the back records found in the Annual Supplement.

(1) The series on inventories, shipments and new orders in Tables 33, 34, and 35 from 1952 to date.

(2) All the series on corporation profits before taxes (Table 98) are available quarterly from 1955 to date.

(3) The series on building permits by types (Table 57), namely residential, industrial, commercial, institutional and government permits are available from 1948 to date.

(4) The series on merchandise exports and imports in Table 83 for the European Common Market, European Free Trade Association and the O.E.C.D. countries from 1946 to date.

(5) Employment indexes from 1949 to date for the following series in Table 17: industrial composite, forestry, public utilities and finance.

(6) Labour income by provinces, as in Table 12, is available from 1947 to date.

(7) All retail trade series from 1947 to 1961 as in Table 75.

Other Material:

There is still available a very limited number of copies of reference paper No. 77 entitled "Seasonally Adjusted Economic Indicators, 1947-1955". It gives a survey of the theory problems and methods in the seasonal adjustment of time series. This paper is available on request while the supply lasts.

Annual Subscription: \$5.00 — Single copies: 50c. each

This review and other publications of the Dominion Bureau of Statistics, including a free annotated catalogue of current publications, may be ordered from the Information Services Division, Dominion Bureau of Statistics, Ottawa, Ontario, and remittances made payable to the Receiver General of Canada.

2204-501-102

**EMPLOYMENT AND EARNINGS PATTERNS OF CONTRIBUTORS
TO UNEMPLOYMENT INSURANCE**
1961

(With a comparative note on earnings distributions for beneficiaries)

Introduction

Records of individual contributions to the Unemployment Insurance Fund provide useful information regarding employment and earnings of persons in insured employment. Basic data permit classification of insured persons according to the number of their weekly contributions and the amount of these contributions. From claim documents it is possible to examine somewhat similar data for persons separating from employment and proving eligibility to benefit.

This article is concerned with data for the 12 months ending December 1961. The information on contributors has been obtained from a sampling of contribution documents in Regional Offices of the Unemployment Insurance Commission. The basic information supplied to the Bureau covers the number of calendar weeks during which contributions were made and the amount of contributions. It is thus possible to calculate the average amount of weekly contribution for each individual. Since contributions are based on earnings, the contributors may be distributed, on the basis of their average weekly contribution, into groups corresponding to earnings classes.

The data for 1961 are obtained from a sub-sample of some 10,000 contributors selected from the more than 200,000 records comprising a 5 per cent sample being processed. On the basis of earlier experience with sub-sampling, it is not expected that the 5 per cent sample will produce results related to earnings and employment which will vary significantly from those indicated by the sub-sample. The much larger sample of more than 200,000 cases is required in order to provide cross-classifications by sex and age.

Contributors to unemployment insurance constitute the bulk of the wage earning population. Hence, comparison of their patterns of employment at various earnings levels should be of general interest.

On separation from employment, insured persons usually file a claim for benefit. The weekly rate to which they are entitled is determined by their average earnings during the 30 qualifying weeks preceding the date of claim. Given these rates and the claimant's dependency status, weekly earnings can be estimated and earnings distributions for claimants compared with those for all contributors. However, the 30 qualifying weeks do not necessarily fall within a calendar year. Indeed for those proving entitlement early in 1961, the 30 week period will have occurred mainly during 1960.

Earnings

For 1961 average weekly earnings in insured employment were estimated at about \$65 as compared with median earnings of \$60. Average weekly wages and salaries, based on reports from employers usually employing 15 or more persons and published in "Employment and Payrolls"¹ were \$78. It is worth while considering some of the factors associated with this substantial spread.

In the first place, the existence of an earnings ceiling of \$5,460 for insurance coverage excludes many salaried persons in the higher earnings classes. Such persons would be included in payroll data. On the other hand, by virtue of the size of firm minimum, employees of small firms are excluded from payroll data. This also would tend to make the payroll survey figures higher than those from insurance data, since no such exclusion exists in insured employment.

Average weekly earnings for a third of the persons engaged in insured employment in 1961 were in the top earnings range of \$69 and over. The per cent distribution of contributors by average weekly earnings, 1961 and 1956, is as follows:

¹ "Employment and Payrolls", Catalogue No. 72-002, published in the Employment Section, Labour Division, DBS.

| | Average weekly earnings in insured employment | Per cent | |
|----------------------|--|----------|------|
| | | 1961 | 1956 |
| | \$ | | |
| All classes | 100 | 100 | |
| 9 but under 15 | 1 | 1 | |
| 15 " 21 | 2 | 3 | |
| 21 " 27 | 5 | 6 | |
| 27 " 33 | 7 | 8 | |
| 33 " 39 | 7 | 10 | |
| 39 " 45 | 7 | 11 | |
| 45 " 51 | 8 | 11 | |
| 51 " 57 | 8 | 16 | |
| 57 " 63 | 9 | | |
| 63 " 69 | 13 | | |
| 69 and over | 33 | | |

Changes in the distribution of weekly earnings under insured employment between 1956 and 1961 have been affected by two major factors. First, there has been an increase of about one-fifth in general wage levels during this period. Second, the earnings ceiling on insurable employment was moved up from \$4,800 to \$5,460, effective September, 1959. Concurrently, the former top class of \$57 and over was broken up into \$57-63, \$63-69 and \$69 and over.

It must be remembered that only the contributors' insured earnings are recorded. To the extent that these persons engage in non-insured employment, at a different earnings level, this pattern within earnings classes will be unrepresentative.

Employment

On the average, persons engaged in contributory employment for about 37 weeks in 1961. However, this pattern varies significantly, by earnings classes, as will be seen from the following table:

| Range of average weekly earnings in covered employment | Average weeks contributed | Median weeks |
|--|---------------------------|--------------|
| \$ | | |
| Totals | 37 | 47 |
| Under 15 | 11 | 4 |
| 15 but under 21 | 19 | 14 |
| 21 " 27 | 21 | 17 |
| 27 " 33 | 28 | 26 |
| 33 " 39 | 29 | 28 |
| 39 " 45 | 34 | 37 |
| 45 " 51 | 37 | 44 |
| 51 " 57 | 37 | 44 |
| 57 " 63 | 38 | 45 |
| 63 " 69 | 40 | 47 |
| 69 and over | 45 | 50 |

Contributors averaging incomes of less than \$27 a week worked less than half-a-year in insurable employment. On the other hand, persons earning \$69 and over worked an average 45 weeks in insured employment. To some extent these variations are attributable to differences in age. Young people, particularly those just entering the labour market, tend to engage in covered employment for relatively short periods. This may be associated with problems of getting adjusted to the proper job. In some cases they are students who still spend most of the year in school. Some persons participate in the labour force only at certain times of the year, or their participation is limited to a short work week. Many married women are in this category. A short work week would automatically result in a relatively lower earnings level. However, past experience indicates a close relationship between duration of employment and levels of earnings.

The lower and middle earnings classes have a relatively higher proportion of women than the higher ones. However, the women's average period of insured employment is only slightly below that for men, the differential being less than a month. The highest earnings class is made up almost entirely of males who have comparatively steady employment.

The substantial gap between the average weeks (or arithmetic mean) and the median weeks is an indication of the lack of concentration around the arithmetic mean. In the lower earnings classes, short periods of insured employment are the norm, but the relatively few persons with the longer record pull up the average. For example, half the insured workers with average earnings of less than \$15 work less than 4 weeks, and half work in excess of that, whereas the arithmetic mean is 11 weeks. This gap gradually narrows as earnings increase, until the position of the two measures is reversed. In the group as a whole, the median, at 47 weeks, is substantially above the arithmetic mean.

Beneficiaries²

It is useful to examine the distribution, by earnings classes, of persons fulfilling the contribution requirements for regular benefit during 1961.

² In this context, the term "beneficiaries" refers to persons establishing the right to regular benefit, though some may not have actually drawn any benefit. It excludes persons drawing benefit in 1961 if the benefit period was established during 1960.

Information on benefit periods established during 1961 is obtained on a 20 per cent sample basis and will be available shortly in the "Annual Report on Benefit Periods Established and Terminated", Catalogue No. 73-201 and published in the Unemployment Insurance Section, Labour Division, DBS.

Non-beneficiaries are a residual. The totals arising out of the sub-sample were inflated to 100 per cent and the numbers representing benefit periods established were subtracted. This method assumes that all persons classed as beneficiaries were contributors in 1961.

| Average weekly earnings during 30 weeks qualifying period | \$ | Per cent distribution | | | |
|--|----|-----------------------|---------------|-----------------------|---|
| | | All contributors | Beneficiaries | Non- beneficiaries | Beneficiaries as a per cent of contributors |
| | | (1) | (2) | (3) | (4) |
| All classes | | 100 | 100 | 100 | 23 |
| Under 15 | | 1 | 1 | 2 | 4 |
| 15 and under 21 | | 2 | 1 | 3 | 13 |
| 21 " 27 | | 5 | 3 | 5 | 17 |
| 27 " 33 | | 7 | 6 | 7 | 20 |
| 33 " 39 | | 7 | 7 | 7 | 23 |
| 39 " 45 | | 7 | 8 | 7 | 25 |
| 45 " 51 | | 8 | 9 | 8 | 25 |
| 51 " 57 | | 8 | 9 | 7 | 27 |
| 57 " 63 | | 9 | 12 | 9 | 29 |
| 63 " 69 | | 13 | 18 | 11 | 31 |
| 69 and over | | 33 | 26 | 34 | 19 |

¹ Less than half of one per cent.

Both beneficiaries and non-beneficiaries display a marked concentration in the three highest classes. However, the top class contains only a quarter of the beneficiaries, whereas a third of non-beneficiaries are in this class.

Column (4) may be interpreted as a claim rate, which rises with earnings, reaching its peak in the second highest class and then declining sharply. The lower claim rates for the lower earnings classes are due partly to inability to qualify. Those in the highest class experience greater stability of employ-

ment. This record should be related to the following table on weeks of benefit authorized.

Since data covering weeks contributed are not available for beneficiaries, separately, the number of weeks authorized was examined for earnings classes. The following table presents arithmetic mean and median weeks authorized for the various earnings classes:

| Average weeks authorized | Average weekly earnings during 30 weeks qualifying period | |
|----------------------------|--|--------|
| | Arithmetic mean | Median |
| \$ | | |
| All earnings classes | 28 | 24 |
| Under 15 | 28 | 24 |
| 15 but under 21 | 26 | 22 |
| 21 " 27 | 27 | 22 |
| 27 " 33 | 28 | 24 |
| 33 " 39 | 28 | 24 |
| 39 " 45 | 28 | 24 |
| 45 " 51 | 29 | 24 |
| 51 " 57 | 27 | 22 |
| 57 " 63 | 27 | 21 |
| 63 " 69 | 27 | 22 |
| 69 and over | 32 | 28 |

Although relatively small proportions of low earnings employees qualify for benefit, there is very little evidence of a correlation between benefit weeks authorized and earnings, the average authorization remaining fairly constant for the various earnings classes, except the highest. Probably the main explanation stems from the fact that the duration authorized is based upon a two-year record of weeks contributed, except where a previous claim

was established within that interval. In such a case, the period may be less than two years.³ In some cases, then, the weeks authorized reflect insured employment over a two-year interval and hence cannot be used as a measure of insured employment during the year.

³ See Section 45 (2) of the Unemployment Insurance Act.

INDUSTRIAL PRODUCTION (More detail in Table 11)

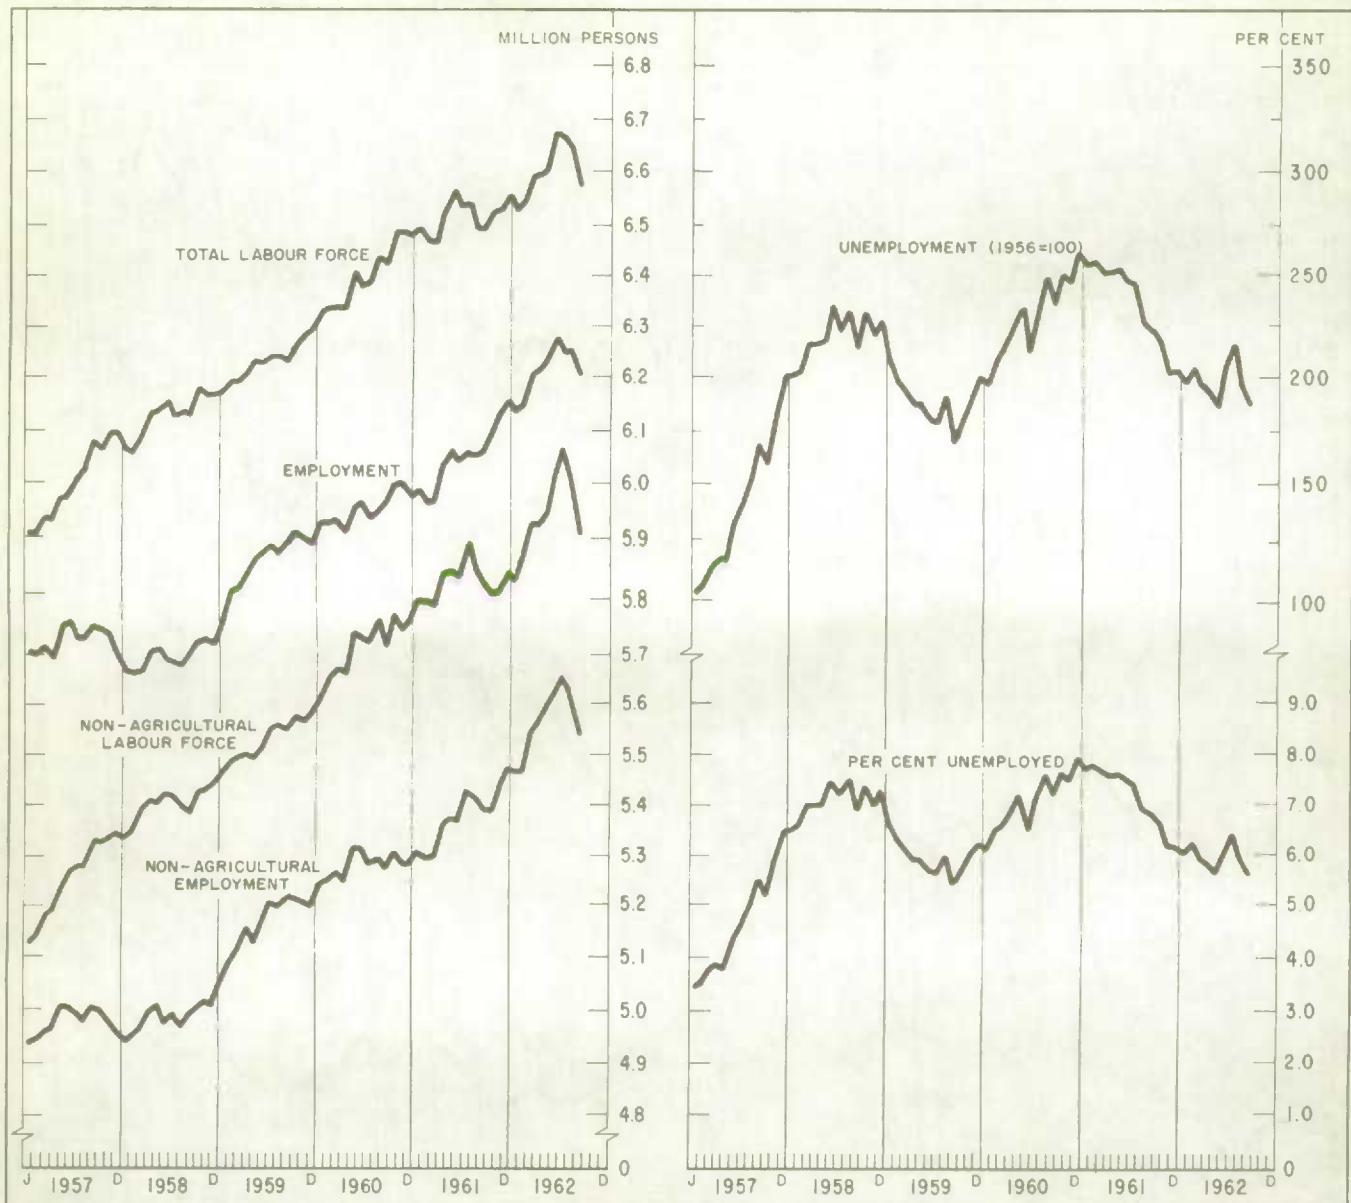

The index of industrial production advanced almost 1% in August to 188.2, the result of substantial gains in mining and electric power and gas utilities. Manufacturing output was lower by one-half of 1% during the month.

| | total industrial production | manufacturing production | | | mining production | electricity and gas | total iron and steel |

LABOUR FORCE (More detail in Table 14)

Employment and the index of unemployment declined between August and September largely as a result of students leaving the labour market and re-entering schools. During the summer months, a record number of students found temporary jobs and with their return to school this fall, total employment and unemployment decreased more than usual.

RETAIL TRADE, MOTOR VEHICLE SALES (More detail in Tables 47 and 75)

Total retail trade fell off by about 2.5% in August due primarily to decreases in motor vehicle dealers, furniture and appliance stores and fuel dealers.

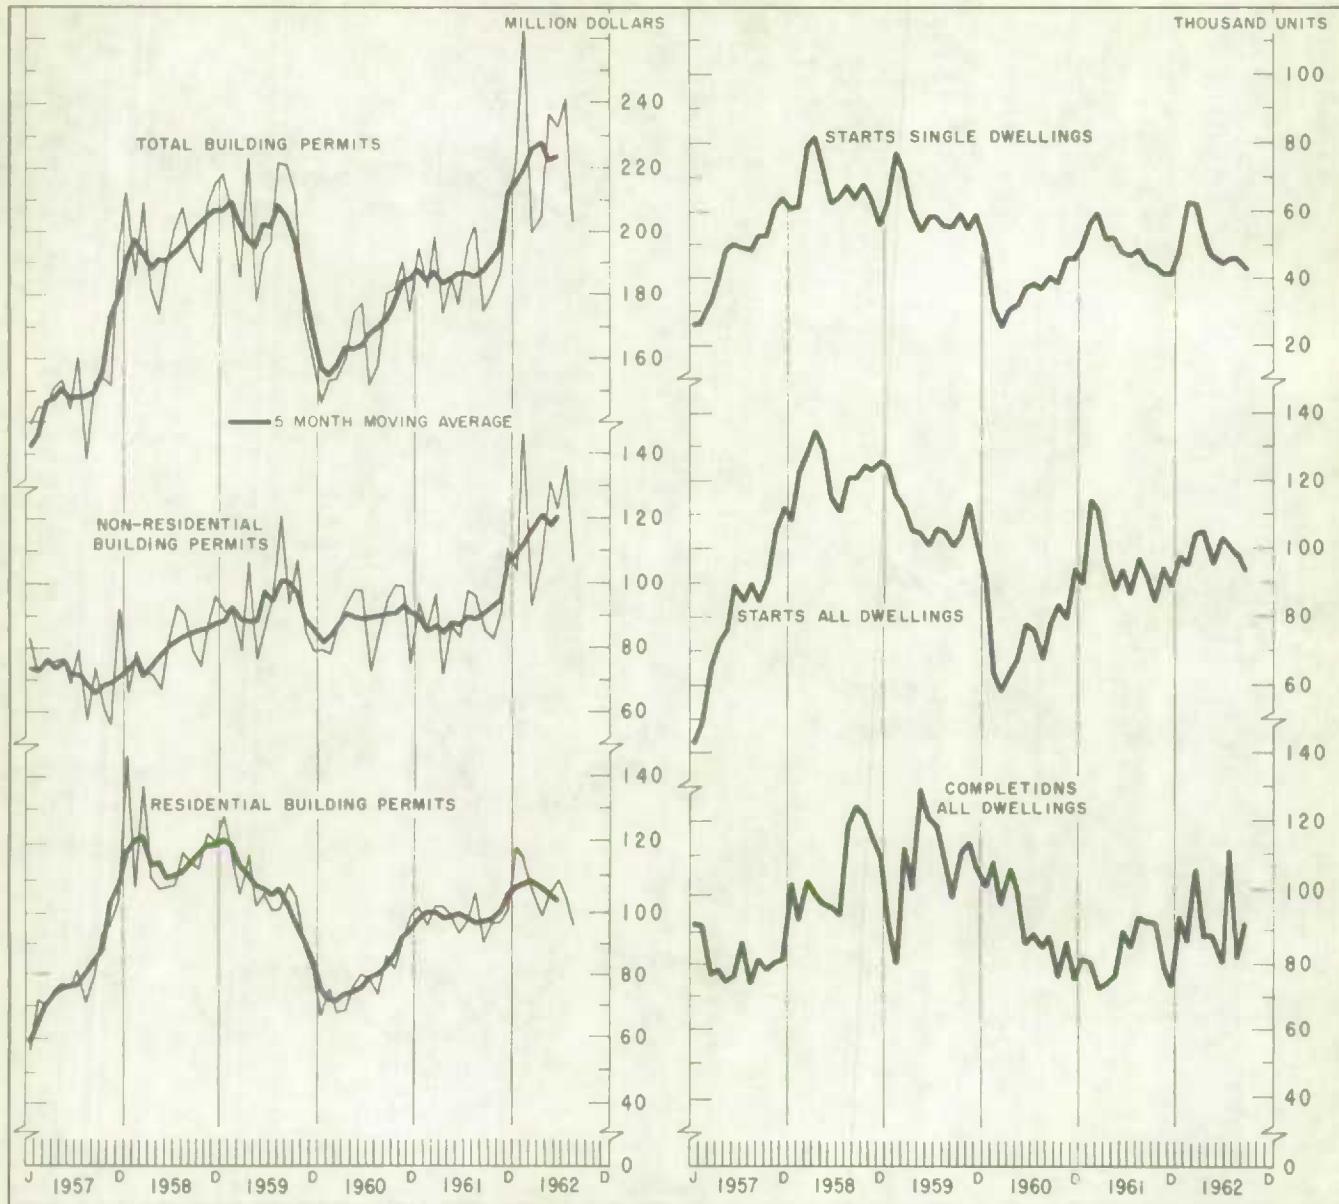

Sales of all types of new motor vehicles showed marked declines in August with European passenger cars decreasing noticeably for the third consecutive month.

| | retail trade (ex. motor vehicle dealers) | motor vehicle dealers | department stores | new motor vehicle sales | | | |

CONSTRUCTION (More detail in Tables 63, 64 and 59)

The value of building permits was reduced in August in both residential and non residential components.
 Completions of new dwellings rose in September after a sharp decrease in August. Total starts moved downwards for the second consecutive month.

EXPORTS AND IMPORTS (More detail in Table 83)

Total exports increased in August reflecting a major gain to the United Kingdom.
 Imports rose by 8% in July due to a sharp increase from the United States.

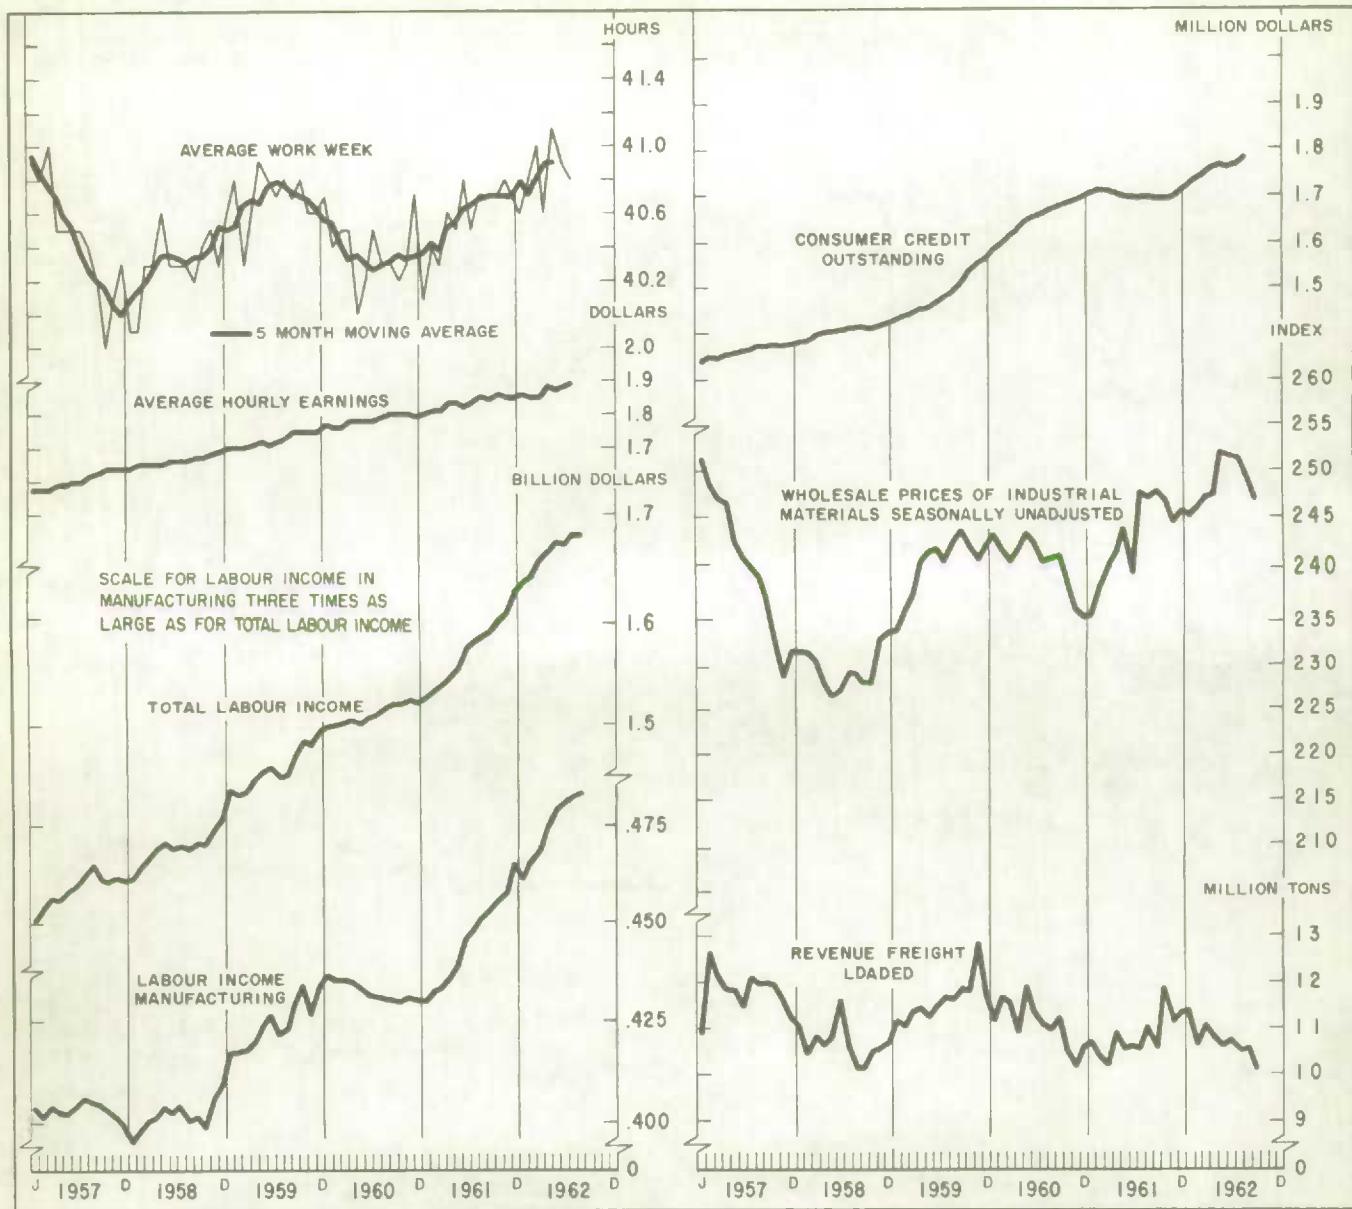

Exports (including re-exports)

¹Prior to the census in 1961, population estimates were made quarterly on March 1, June 1, September 1 and December 1, and in addition on July 1 and January 1 of each year. After the 1961 census the quarterly estimates will be made on January 1, April 1, July 1 and October 1, as well as June 1. Sources: Estimated population of Canada by provinces at June 1, 1962 (91-201) D.B.S.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series.

²Includes residual error of estimate. Source at bottom of Table 10.

¹The statistics for individual industries exclude strikes involving less than 100 workers. The total for all industries continues to include all strikes.

²The annual and monthly "all industries" totals for 1960 and 1961 have been revised and are no longer quite comparable with the data for individual industries, apart from the difference described in footnote 1. Source: Labour Gazette, Department of Labour.

¹Monthly shipments represent an estimated projection of the latest available Census of Industry values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted.

²Total manufacturing inventory owned by manufacturers including warehouse stocks.

³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month.

⁴End of period.

⁵Classified according to the Standard Industrial Classification.

¹Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Excluding shipments for re-processing at maker's own plants. ³Imports include, in addition to all other shapes, ingots, cast iron pipe, wire and wire ropes. Imports exclude castings (except cast iron pipe), forgings, fittings and couplings. Source: Primary Iron and Steel (41-001), D.B.S.

¹These totals include all generating agencies producing over ten million kilowatt hours per year.

²These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year.

³Less imports.

⁴Total net generation less net exports.

⁵Mainly the amount used in electric boilers.

¹Includes copper fine in ore, ingots, bars, billets, rods, strips, sheets and tubing.
²Includes ingots, bars and billets.
³Includes nickel in matte or speiss, oxide and fine.
⁴Includes lead in ore and in pigs.

¹Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. ²The data on building permits are collected for 1,100 municipalities and individual figures are available on request. Some of the annual totals for 1960 and 1961 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. Source: Building Permits (64-001), D.B.S.

¹The coverage was extended to 507 municipalities in 1948, and as of 1961, stands at 1,100, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

²End of period.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected.

²Planks and boards, flooring and square timber.

³Hollow blocks including fireproofing and load-bearing tile.

⁴For building insulation only.

⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada.

⁶Includes concrete chimney blocks, up to December 1959.

⁷Factory sales of firms which normally account for 96% of total Canadian production. Source: Concrete Products (44-002), Products made from Canadian clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001) and Trade of Canada, Imports (65-007), Exports (65-004), D.B.S.

*See also Tables 29 and 30. ¹Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1961 are final prices. From August 1, 1961 to date, the western grain prices used in the index are initial prices only for wheat, oats and barley. ²Includes subsidy on hogs. ³Based on price for hogs including Dominion premium up to September 1960. A rise in ratio favours production of beef. ⁴Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

¹Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.

Revised to include bagged seed wheat previously excluded. ²Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. ³Annual data are monthly averages of crop year. ⁴Includes eggs for hatching.

¹Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

²Includes stocks held by manufacturers, wholesalers and other warehouses. ³The increase in percentage of capacity from October to November, 1960 reflects the fact that some mills worked more than the 25 days included in this formula as well as a reduction in total daily capacity from 171,000 hundredweight in October to 151,000 hundredweight in November. ¹Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total.
²Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

Source: Retail Trade (63-005), D.B.S.

Table 75: value of retail trade by types of business and provinces

| monthly averages or months | lumber and building material | furniture, appliance and radio | restau- rants | fuel dealers | drug stores | jewellery stores | miscel- laneous | atlantic provinces | Quebec | Ontario | Manitoba | Saskat- chewan | Alberta | British Columbia |

¹Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available.

²Conditional sale agreements held in connection with the financing of retail purchases of consumer goods.

³Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments.

⁴Excluded from the above tabulation are charge accounts of motor vehicle dealers whose credit is extended mainly to businesses rather than to consumers. Instalment credit includes conditional sales agreements only.

⁵Amount owing to oil companies, excluding commercial accounts.

⁶Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds.

⁷Figures for dates other than year ends are estimated on the basis of the loans by twelve companies. Source: Department of Finance, Department of Agriculture, Bank of Canada.

¹As from January 1958 the indexes, the imports total and the "miscellaneous commodities" total exclude various non-commercial and special transactions previously included in our imports totals. For a more detailed explanation see Trade of Canada (Exports) 1960. ²Includes pigs, ingots, blooms and billets, castings and forgings, ferro-alloys and rolling mill products.

¹Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1960 and 1961 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ²Includes January to July interim payments related to recommendations of the Royal Commission on Railway Transportation.

¹Revised series with coverage limited to business failures under the Bankruptcy and Winding Up Acts, excluding individuals not operating businesses as such.

²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

Note: This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

¹The Canada totals by months for 1960 and 1961 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly figures for 1960 and 1961 nor the monthly averages for 1961 have been revised to agree with the Canada total.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives). ¹Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction. ²Includes, in addition to the industries listed, Tobacco and Leather.
