A NOTE TO USERS

Changes in this Issue:

Table 100, Index Numbers of Security Prices (1956=100) is expanded to provide a wider coverage of the various industries in the Standard Industrial Classification. While the table is based on the revised S.I.C., it does not follow it completely. Thus, for example, stocks included under "industrial mines" are for companies whose operations include smelting and refining and a comparable classification heading is not found in the S.I.C. On the other hand, indexes are not available for some of the S.I.C. classifications, for example, for electrical equipment

in the manufacturing division and wholesale trade in the trade division.

Some of the indexes are based only on a few stocks and readers should be aware of this when using such indexes.

Feature Article:

This issue carries an article describing the application of the Standard Industrial Classification to some of the series in the Review. It is hoped it will be helpful to users in indicating various differences between the revised and the original editions of the Classification.

Annual Subscription: \$5.00 — Single copy: 50c.

This review and other publications of the Dominion Bureau of Statistics, including a free annotated catalogue of current publications, may be ordered from the Information and Public Relations Division, Dominion Bureau of Statistics, Ottawa, Ontario, and remittances made payable to the Receiver General of Canada.

2204-501

THE REVISED STANDARD INDUSTRIAL CLASSIFICATION AND THE EFFECT OF ITS IMPLEMENTATION UPON TABLES IN THE CANADIAN STATISTICAL REVIEW

The first Standard Industrial Classification (S.I.C.) was developed at the Dominion Bureau of Statistics early in the post-war period. Many significant developments occurred in Canada's industrial structure in the following decade necessitating a revision of the classification and reconsideration of its application in the late fifties. The Bureau is currently in a state of change-over from the original¹ (1948) to the revised² 1960 classification. While to date only a few Bureau series have been converted to the revised basis others are being readied for conversion and all industrial series will be on the new basis within the next few years.

The Canadian Statistical Review now carries (August 1964 issue) five tables based directly on the revised S.I.C. (i.e. Tables 16, 32, 33, 99 and 100), four (i.e. Tables 34, 35, 36 and 37) are not based directly on the revised S.I.C. but will be affected by it and the majority of the industrial tables (i.e. Tables 11, 13, 17, 19, 21, 22, 25, 26, 27, 76 and 79) still are on the original S.I.C. With series appearing side by side on the revised and unrevised bases and with the revised series tending to be short, the maintenance of historical comparability and continuity for detailed series will be unusually difficult during the next few years.

While in the first instance, most of the monthly series affected are to be extended back to 1958, it is hoped to extend a number of series beyond this date to provide a longer period of historically comparable data. The extension and maintenance of historical comparability of the statistics is the responsibility of a special committee set up within the Bureau and is receiving continuous study.

The purposes of this note are to:

- (1) Outline the main divisions and major groups of the revised and unrevised classifications.
- (2) Outline the classification and other differences between the revised and unrevised systems.
- (3) Relate the two classifications to actual tables in the Review.

Outline of the Two Classifications

An outline of the two classifications is set out in the schema on the next two pages. Of the three levels of aggregation of industries in the S.I.C.,

¹ Standard Industrial Classification Manual, DBS, 1948, Queen's Printer, Ottawa.

² Standard Industrial Classification Manual, DBS, 1960, Catalogue No. 12-501, Queen's Printer, Ottawa.

namely, divisions, major groups and industry classes, only the first two, divisions and major groups are shown. In the revised S.I.C. there are 12 divisions and 56 major groups, while earlier there were 11 divisions and 44 major groups. The changes bringing these differences about are indicated in the schema and are as follows:

- (1) Division 1 - Agriculture, the structure of the major groups has been altered; it conforms now with the classification used by the Census of Agriculture.
- (2) Division 5 - Manufacturing, the total number of major groups is increased from 17 to 20. Five major groups are added, namely Knitting mills, Furniture and fixture industries, Primary metal industries, Metal fabricating industries, and Machinery industries. Two former major groups, Iron and steel products, and Non-ferrous metal products have been eliminated.
- (3) Former Division 7 - Transportation, Storage and Communication, and former Division 8 - Public Utility Operation have been combined into a new division - Transportation, Communication and other Utilities.
- (4) A new division (Public administration and Defence) is established from the major group Government Service formerly in Division 11 - Services.
- (5) One new division (Division 12 - Industry Unspecified or Undefined) is now included.

A more detailed description of the changes at the division and major group levels is given in the Appendix.

A New Establishment Definition

Besides the classification differences outlined in general terms in the section above, and the more detailed changes described in the Appendix, there is also a change in the definition of the establishment, the basic data reporting unit. Essentially this conceptual change is not associated with the revision of the classification, but it was introduced at about the same time and has an important influence on data comparability. Under the new definition, the establishment is an accounting entity capable of reporting principal items of input and output (such as materials, supplies and power used, goods purchased for resale, numbers employed, wages and salaries paid, man-hours for selected categories of workers, as well as shipments, inventories, sales, or revenue) from its records with-

out resorting to arbitrary estimation. Formerly an attempt was made to define establishments so as to obtain separate reports on different activities or types of products when these were classifiable to different industries, irrespective of accounting records from which the data are normally obtained. In fact accounting records do not usually provide all elements of principal statistics such as materials, employment, sales, etc. for each activity undertaken by the establishment. Beginning with 1961 separate reports for each activity or types of products are generally required only where accounting records can provide the necessary input and output elements of principal statistics.

Experience has shown that the new definition results in more reliable statistics, particularly for value added by industries. Not only are some arbitrary estimates eliminated, but the new concept can be applied more consistently to different surveys and provides more comparable statistics across all industries.

For current inter-classification comparisons the establishment change will cause some incomparabilities in most industries, even those affected very little by the classification revision itself, such as Tobacco Products, Rubber, Leather, and Paper and Allied Industries in manufacturing. The change will also affect historical comparisons; a backward extension of series on the revised classification and new establishment concept being possible initially for a limited period only. To illustrate, in Table 32 on Shipments and Table 33 on Inventories, data from the beginning of 1958 to the end of 1960 differ to some extent from earlier figures due to the introduction of the new S.I.C.; starting in 1961 an additional difference arises from the introduction of the New Establishment Concept.

Comparability of Tables on the Revised S.I.C.

As indicated earlier there are now five tables on the revised basis in the Review, namely, Table 16, Work Stoppages, Table 32, Shipments, Table 33, Inventories, Table 99, Corporation Profits and Table 100 Security Prices. Ideally there should be direct and complete comparability at some level of aggregation between the data in these tables. If the classification scheme were the only reason for differences, this goal would be attained, but in practice two other principal factors must also be taken into account.

Firstly, the coverage of some surveys is such that industries must be combined and particular combinations appropriate in one case may not be the most suitable in another. The S.I.C. provides three levels of detail—the first being the 12 divisions, the second the 56 major groups, and the third the 304 industry classes. So far as possible, surveys combining groups of industries do so at

one of these levels, but in a few cases special combinations must be made. For example, in Table 99, Corporation Profits, certain major groups and divisions are combined because of limited coverage. Thus, Divisions 1 (Agriculture), 2 (Forestry), 3 (Fishing and Trapping), and 6 (Construction Industry) are combined into one series; certain major groups in Division 5 (Manufacturing Industries) are also combined e.g., a group called "Metal Industries" combines Major Group 12 (Primary Metal Industries), 13 (Metal Fabricating Industries), 14 (Machinery Industries), and 15 (Transportation Equipment Industries).

Another example is found in Table 100 on Index Numbers of Security Prices in which the major groups and classes in divisions of the revised S.I.C. are combined in a manner found in no other table. This is due to the uneven coverage of the standard categories and the nature of the units issuing securities. Some companies have a very diverse range of activities making them difficult units for classification by industry. Thus, a series of indexes for "Industrial Mines", (a heading not found in the S.I.C.) includes securities of companies engaged both in metal mining and smelting. Another index headed "Base Metals" (a heading not found in the S.I.C.) includes securities of companies engaged in base metal mining but not in smelting.

It is hoped that over the years means will be found to arrange the coverage of various surveys so as to eliminate, so far as possible, special groupings of this type. In view of the inherent differences resulting from the sources of data, however, complete comparability may not be achieved in every case.

The second main reason for lack of direct comparability between these tables arises from the impossibility of collecting data from the establishment on all surveys. As explained in the preceding section, the establishment is the smallest unit capable of reporting consistently the main elements of input and output for industrial surveys. However, many establishments cannot provide information on their financial operations, including assets, liabilities and profits, because financial decisions tend to be for a firm or company as a whole. Although most firms have only one establishment many have two or more and financial statements, such as the balance sheet, are prepared only for the company which is a legal entity. Although multi-establishment firms are relatively few in number, they tend to be the large companies and, therefore, to have a significant influence on the statistics of individual industries. Thus, the use of different statistical units limits direct comparisons of, for example, Tables 99 and 100 (which contain information obtained from companies), with Tables 32 and 33 (containing information obtained from establishments). These differences cannot be eliminated by any device of classification. It is planned, however,

to make some tabulations showing the influence of the statistical unit upon principal statistics for individual industries.

In one particular case the statistical unit is mixed and very little, if anything, can be done about it. This occurs in Table 16, Time lost in Work Stoppages, which is based upon information obtained from units involved in labour disputes. The units in this case are those for which collective bargaining takes place and for which collective agreements are negotiated. In some cases the units are based upon crafts, while in others they cover particular industries or companies. Thus, the table is based upon information from a mixture of statistical units.

Tables on the Unrevised S.I.C.

Although main interest now centres on the conversion of series to the revised S.I.C., the majority of the tables in the Review showing breakdowns by industry, namely Tables 11, 13, 17, 19, 21, 22, 25, 26, 27, 76 and 79, are still on the unrevised basis. Problems of comparability due to differences in coverage and statistical units apply to the unrevised tables as well. Thus, Table 13, on Wages and Salaries, Table 17, Industrial Employment and Table 21, Weekly Wages and Salaries,

cover nearly all the divisions of the classification, while Table 11, on Industrial Production in line with the definition of its content and the availability of data, covers only Mining, Manufacturing and Electric power and gas utilities (unrevised Divisions 4, 5 and 8); and contains much data on major groups and individual industries. Still different is Table 27, Industry Selling Price Indexes which provides price indexes for selected individual industries in manufacturing, but no major group or division totals are available.

The reporting units for Table 76, Retail Trade and Table 79, Wholesale Trade are store locations and not necessarily establishments. While the two are the same unit in many cases, store locations tend to be smaller and more homogeneous units for which retail sales only may be collected. In Table 11 data are on the establishment basis (old definition), while in the remaining tables, the data are based on establishments usually employing 15 persons or more.

Attention is being given to problems of comparability in these basic series and existing differences are being eliminated coincidentally with their change-over to the revised S.I.C. Thus it may be anticipated that existing differences will be minimized as more series are introduced on the revised basis.

APPENDIX

Some Classification Differences Between the Revised and Unrevised S.I.C.³

The following division by division and major group by major group examination describes the major changes resulting from the classification revision. Those in manufacturing are most numerous and important, and they affect other divisions such as mining, trade and services.

Division 1—Agriculture except for the change in the composition of the major groups, as already noted, this division is unchanged in total coverage from former Division 1—Agriculture.

Division 2—Forestry is unchanged from former Division II—Forestry.

Division 3—Fishing and Trapping is unchanged from former Division III—Fishing and Trapping.

Division 4—Mines (including milling), Quarries and Oil Wells

Major Group 1—Metal Mines is essentially unchanged from former Major Group 1—Metal Mining.

Major Group 2—Mineral Fuels covers former Major Group 2—Fuels and, in addition, contains Natural Gas Processing Plants formerly included in

manufacturing. In 1960 Natural Gas Processing Plants added 3.6 per cent to the number of employees and 3.8 per cent to the net "Value added" by processing of this major group. (A later amendment combined Natural Gas Processing Plants with Petroleum and Gas Wells).

Major Group 3—Non-metal Mines except Coal Mines covers former Major Group 3—Non-metal Mining and, in addition, includes Salt Processing Plants formerly included in manufacturing. The additional employment and value of production occasioned by this change is negligible.

Major Group 4—Quarries and Sand Pits is essentially unchanged from former Major Group 4—Quarrying, Clay and Sand Pits.

Major Group 5—Services Incidental to Mining includes former Major Group 5—Prospecting and, in addition, covers many special services for mining

³ For further description of the classification and other changes, see "The Standard Industrial Classification", May 1961 issue and "Forthcoming Changes in the Census of Industry" July 1961 issue, Canadian Statistical Review, and "Selected Articles on DBS Statistical Activities", Catalogue No. 13-518 Occasional.

not covered in the earlier classification. This is a small major group and the changes are such that they are not significant for purposes of historical comparison of data.

Division 5—Manufacturing Industries

Major Group 1—Food and Beverage Industries corresponds with former Major Group 1—Foods and Beverages, except that it includes two additional industries, namely, Poultry Processors (included in Manufacturing for the first time), and Vegetable Oil Mills (formerly in the Chemical Industries group). In 1960 these two industries added 2.7 per cent to the number of employees, 1.7 per cent to the value added by manufacture and 3.6 per cent to the gross value of shipments of this major group.

Major Group 2—Tobacco Products Industries is essentially unchanged from former Major Group 2—Tobacco and Tobacco Products.

Major Group 3—Rubber Industries is essentially unchanged from former Major Group 3—Rubber Products.

Major Group 4—Leather Industries is essentially unchanged from former Major Group 4—Leather Products. (In the case of those surveys covering Shoe Repair Shops, it should be noted that such shops are now included in Division 10, Community, Business and Personal Service Industries, Major Group 6—Personal Services.)

Major Group 5—Textile Industries is essentially unchanged from former Major Group 5—Textile Products.

Major Group 6—Knitting Mills. This is one of the new major groups provided in the revised edition. It was included with Major Group 6—Clothing (Textile and Fur) in the earlier edition. (It should be noted that in the annual publication "Manufacturing Industries of Canada", Knitting Mills have been shown as a separate major group since 1953).

Major Group 7—Clothing Industries covers the former Major Group 6—Clothing (Textile and Fur) except Knitting Mills, and Fur Dressing and Dyeing. In 1960 Knitting Mills represented 19.2 per cent of employment, 19.9 per cent of the value added by manufacture and 20.3 per cent of gross value of shipments, while Fur Dressing and Dyeing accounted for .9 per cent of employment, 1.2 per cent of the value added by manufactures, and .7 per cent of gross value of shipments for the industries included in former Major Group 6.

Major Group 8—Wood Industries covers former Major Group 7—Wood Products, except for the Furniture Industry and Venetian Blind Manufacturers. In 1960 the Furniture Industry accounted for 28.2 per cent of employment, 28.0 per cent of the value added by manufacture and 24.6 per cent of gross value of shipments, while Manufacturers of Venetian Blinds accounted for .3 per cent of employment, .3

per cent of the value added by manufacture, and .3 per cent of gross value of shipments of the industries included in the former Major Group 7.

Major Group 9—Furniture and Fixture Industries. This new major group in the revised edition includes the Furniture Industry from former Major Group 7—Wood Products, plus Manufacturers of Electric Lamps and Shades formerly included in Major Group 17—Miscellaneous Manufacturing Industries.

Major Group 10—Paper and Allied Industries is essentially unchanged from former Major Group 8—Paper Products.

Major Group 11—Printing, Publishing and Allied Industries. This group corresponds with the former Major Group 9—Printing, Publishing and Allied Industries, except that "Publishers Only" of books, have been added. Publishers of books that do no printing were not included among manufacturing industries until 1960 and their inclusion added 0.7 per cent to the number of employees, 1.7 per cent to the value added by manufacturers and 1.9 per cent to the gross value of shipments for this major group in that year.

Major Group 12—Primary Metal Industries. This group combines the primary ferrous and non-ferrous metal industries from former Major Group 10—Iron and Steel Products, and Major Group 12—Non-ferrous Metal Products. In addition, coking plants associated with steelmills are now included in this major group instead of in former Major Group 15—Products of Petroleum and Coal. The coking plants transferred added a few employees but did not affect the value of shipments in this major group for 1960, because coke is an intermediate product.

Major Group 13—Metal Fabricating Industries. This is a new major group in the revised edition and includes the metal fabricating industries from former Major Groups 10—Iron and Steel Products, and 12—Non-ferrous Metal Products. Jewellery and Silverware Manufacturers, included in former Major Group 12, are now part of revised Major Group 20—Miscellaneous Manufacturing Industries; and Watch and Jewellery Repair shops are now in Division 8—Trade. (In the case of those surveys covering Blacksmithing and Welding Shops, it should be noted that they are now included in Division 10—Community, Business and Personal Service Industries, Major Group 7—Miscellaneous Services.)

Major Group 14—Machinery Industries. This is a new major group containing industries formerly included in Major Group 10—Iron and Steel Products.

Major Group 15—Transportation Equipment Industries. This major group corresponds with the former Major Group 11—Transportation Equipment, except that Manufacturers of Bicycles and Parts are now excluded and are found in Major Group 20—Miscellaneous Manufacturing Industries. In 1960 establishments formerly in the Bicycle and Parts industry represented 0.6 per cent of the number of

employees, and 0.3 per cent of the total value of shipments of this major group. (In the case of surveys covering Motor Vehicle Repair Shops it should be noted that these shops are now included in Division 8—Trade.)

Major Group 16—Electrical Products Industries. This major group is essentially unchanged from former Major Group 13—Electrical Apparatus and Supplies. (In the case of surveys covering Radio, Television and Electrical Appliance Repair Shops, it should be noted that these shops are now included in Division 8—Trade.)

Major Group 17—Non-metallic Mineral Products Industries. This major group corresponds with former Major Group 14—Non-metallic Mineral Products, except that establishments primarily engaged in Salt Refining and Processing have been transferred to the Mining Industries. In 1960 establishments primarily engaged in Salt Refining and Processing represented 2.2 per cent of the number of employees, and 3.1 per cent of the gross value of shipments of the industries included in former Major Group 14.

Major Group 18—Petroleum and Coal Products Industries. This major group corresponds with former Major Group 15—Products of Petroleum and Coal, except that it does not include Coke Ovens associated with steel mills or chemical plants and it excludes Natural Gas Processing Plants which are now included in the Mining Industries. In 1960 Coke Ovens and Natural Gas Processing Plants would have represented approximately 15 per cent of the number of employees, and 9 per cent of the gross value of shipments if they had been included in this major group.

Major Group 19—Chemical and Chemical Products Industries. This major group corresponds with former Major Group 16—Chemical Products, except that Vegetable Oil Mills are no longer included. In 1960 Vegetable Oil Mills represented 1.0 per cent of the number of employees, 1.2 per cent of the value added by manufacture and 4.3 per cent of the gross value of shipments of industries included in former Major Group 16.

Major Group 20—Miscellaneous Manufacturing Industries. This major group corresponds with former Major Group 17—Miscellaneous Manufacturing Industries, except that it now includes Dental Laboratories; Manufacturers of Bicycles and Parts; Fur Dressing and Dyeing; Jewellery and Silverware Manufacturers; and Venetian Blind Manufacturers; while it no longer includes Manufacturers of Electric Lamps and Shades. The effect on 1960 data of these changes represented increases of 12.8 per cent in the number of employees, 12.3 per cent in value added by manufacture, and 12.2 per cent of the gross value of shipments of industries included in former Major Group 17.

Division 6—Construction Industry is essentially unchanged from former Division VI—Construction.

Division 7—Transportation, Communication and Other Utilities combines the former Division VII—Transportation, Storage and Communication, and former Division VIII—Public Utility Operation. The Post Office department of the federal government formerly in Major Group 2—Government Service, of Division XI—Service, is now included in Major Group 3—Communication, of revised Division 7.

Division 8—Trade

Major Group 1—Wholesale Trade is essentially equivalent to Major Group 1—Wholesale Trade of the former Division IX—Trade.

Major Group 2—Retail Trade includes former Major Group 2—Retail Trade of Division IX—and, in addition, Motor Vehicle Repair Shops; Radio, Television and Electrical Appliance Repair Shops; and Watch and Jewellery Repair Shops, all of which were formerly included in Manufacturing. (It should be noted that the Annual Census of Manufactures and the monthly survey of Inventories, Shipments and Orders have never included these repair shops in manufacturing.)

Division 9—Finance, Insurance and Real Estate is essentially unchanged from former Division X—Finance, Insurance and Real Estate.

Division 10—Community, Business and Personal Service Industries.

Major Group 1—Education and Related Services,

Major Group 2—Health and Welfare Services, and

Major Group 3—Religious Organizations, when combined, are essentially equivalent to former Major Group 1 (Community or Public Service) of Division XI—Service, the difference being that the former class 909 "Community or Public Service, n.e.c." is included in revised Division 10, Major Group 7—Miscellaneous Services.

Major Group 4—Motion Picture and Recreational Services is essentially unchanged from former Major Group 3—Recreation Service.

Major Group 5—Services to Business Management is related to former Major Group 4—Business Service. The main differences are that Labour Organizations and Trade Associations are now included in Major Group 7—Miscellaneous Services, while the former class "Other Business Service" has been split between revised classes 869 "Other Services to Business Management" and 899 "Other Miscellaneous Services".

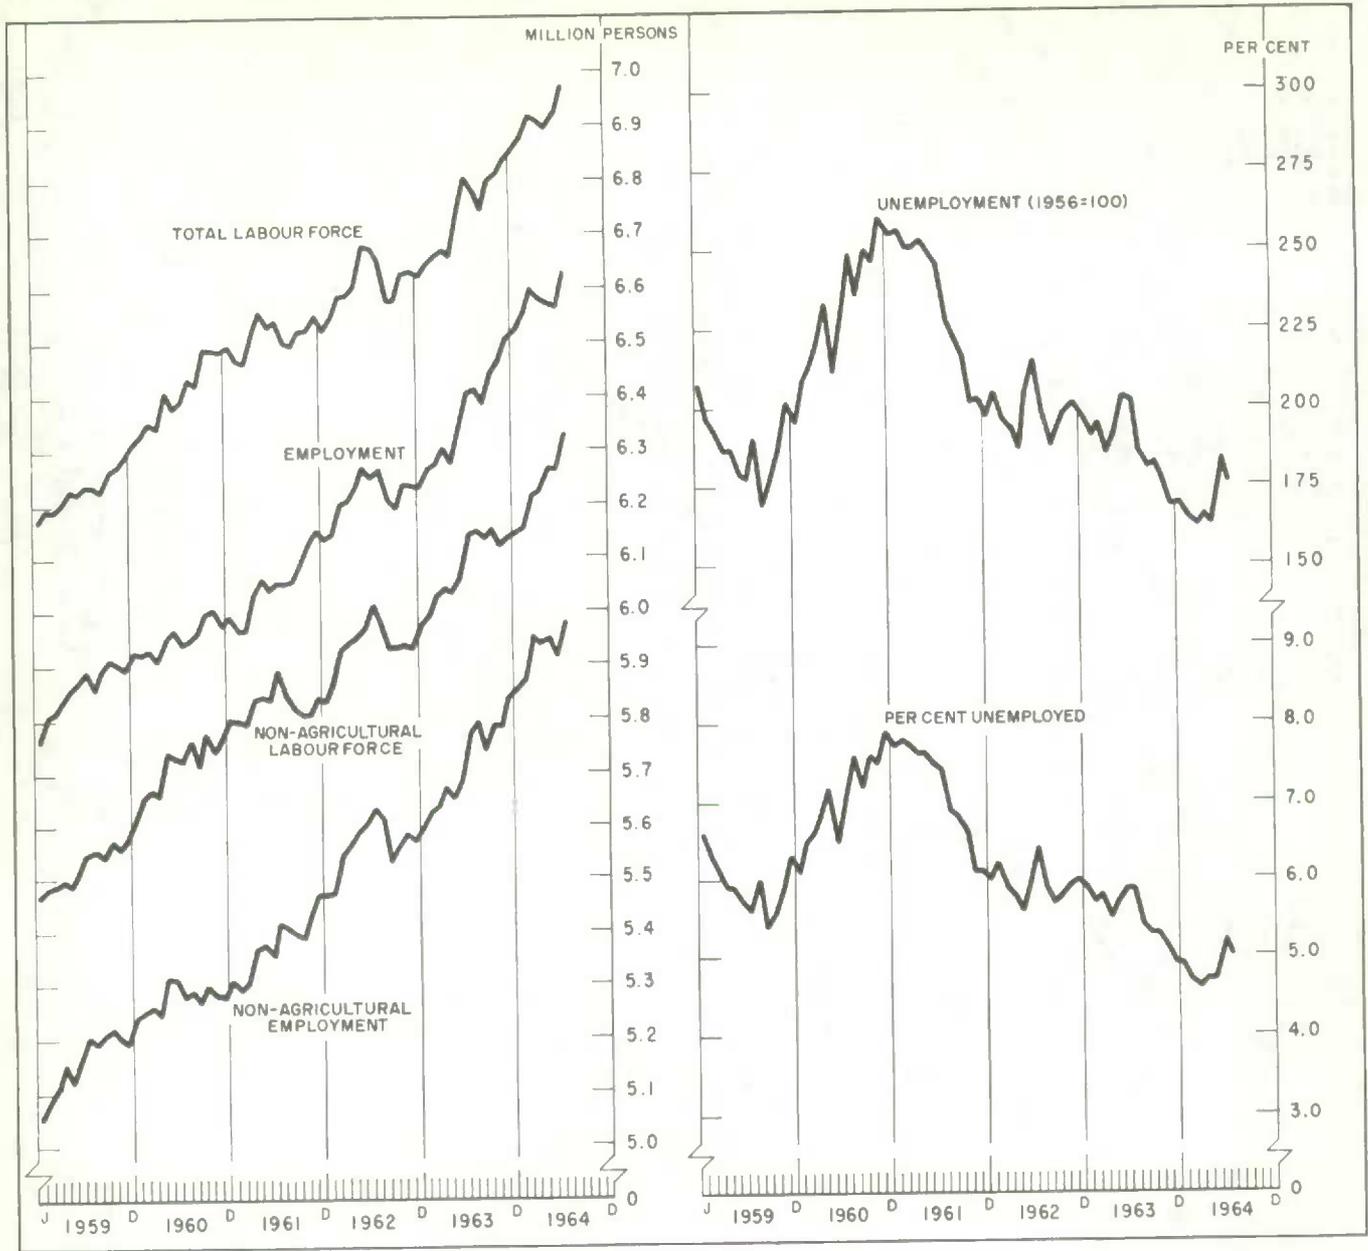

Major Group 6—Personal Services is related to former Major Group 5—Personal Services but it now includes Shoe Repair Shops formerly in Manufacturing, while it excludes Services to Buildings and Dwellings now included in Major Group 7—Miscellaneous Services.

Major Group 7—Miscellaneous Services is made up of classes taken from a variety of divisions and major groups in the former classification. For example, Labour Organizations and Trade Associations were formerly in "Business Services"; Photography was formerly in "Personal Services"; Blacksmithing and Welding Shops were formerly in Manufacturing; Miscellaneous Repair Shops were formerly scattered through many classes while Services to Buildings and Dwellings were formerly in "Personal Services".

Division 11—Public Administration and Defence. This division covers former Major Group 2 of Division XI—Service, known as "Government Service". The essential difference between the revised classification and the former one is in the exclusion of the Post Office Department from Federal Administration. This department is now included in revised Division 7—Transportation, Communication and Other Utilities; under Major Group 3—Communication.

LABOUR FORCE (More detail in Table 14)

Labour force and employment advanced in July; the unemployment rate was 5.0 per cent.

civilian labour force

	total		employed		index of unemployed 1956 = 100	unemployed as a per cent of labour force

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 99. ³Original data as in column 8, Table 80.

PRICES (More detail in Tables 28, 30, 31, 84, 85 and 100)

The index of industrial common stocks continued to climb in July after a slowing down the previous month. The general wholesale index and the index of thirty industrial materials were down slightly in July. The consumer price index rose in July as a result of increases in the food group.

		wholesale		thirty industrial		export prices	import prices	industrial common stocks	consumer price index (1949=100)				
		general index		materials					total	food	non durables ex food	durables	services
		1935-39=100		1948=100

¹Prior to the census in 1961, population estimates were made quarterly on March 1, June 1, September 1 and December 1, and in addition on July 1 and January 1 of each year. After the 1961 census the quarterly estimates will be made on January 1, April 1, July 1 and October 1, as well as June 1. Source: Estimated population of Canada by provinces at June 1, 1962 (91-201), D.B.S.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. ²Includes residual error of estimate. Source at bottom of Table 10A.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. ³The Agricultural, Finance, Insurance and Real Estate and Public Administration and Defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ⁴Includes miscellaneous manufacturing industries. ⁵Includes also publishing and allied industries. ⁶Includes also the storage and communication industries. Source: Labour Gazette, Department of Labour.

¹The data in Tables 17 to 26 are based on reports from employers usually employing 15 persons and over and covering the respondents' last pay period(s) in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and domestic service. ³Includes storage and communication. ⁴Includes insurance and real estate. ⁵Excludes public administration and defence and such community services as health and education. Source: Employment and Payrolls, (72-002), D.B.S.

¹Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. ¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total manufacturing inventory owned by manufacturers including warehouse stocks. ³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ⁴End of period. Annual figures for inventories and unfilled orders are end of December values. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

¹Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. ⁴Excluding shipments for re-processing at maker's own plant. ⁵Imports include, in addition to all other shapes, ingots, cast iron pipe, wire and wire ropes. Imports exclude castings (except cast iron pipe), forgings, fittings and couplings. Source: Primary Iron and Steel (41-001), D. B. S.

¹Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area. ²The data on building permits are collected for 1,300 municipalities and individual figures are available on request. Some of the annual totals for 1962 and 1963 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. Source: Building Permits (64-001), D.B.S.

¹The coverage was extended to 507 municipalities in 1948, and as of 1963, stands at 1,300, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. ²End of period. Source: New Residential Construction (64-002), D.B.S.

¹Footnote and Source are at Bottom of Table 63. ²Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. This is based on information from the 1961 census.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected. ²Planks and boards, flooring and square timber. ³Hollow blocks including fireproofing and load-bearing tile. ⁴For building insulation only. ⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada. ⁶Includes concrete chimney blocks, up to December 1959. ⁷Factory sales of firms which normally account for 96% of total Canadian production. Sources: Concrete Products (44-002), Products made from Canadian clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001) and Trade of Canada, Imports (65-007), Exports (65-004), D.B.S.

¹Does not include Supplementary Government Payments made under Prairie Farm Assistance Act, Prairie Farm Income Act and Wheat Acreage Reduction Act.

²Includes barley and barley participation payments, rye, flax, flax adjustment payments, corn, clover and grass seed, hay and clover.

³Includes in addition sugar

beets and fibre flax.

⁴Includes wool, honey, maple products and miscellaneous farm products.

*See also Table 31. ¹Excluding Newfoundland. Western grain prices used in the construction of the index prior to August 1, 1963 are final prices. From August 1, 1963 to date, the western grain prices used in the index are initial prices only for wheat, oats and barley. ²Includes subsidy on hogs. ³Based on price for hogs including Dominion premium up to September 1960. A rise in ratio favours production of beef. ⁴Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights. ¹Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents. Revised to include bagged seed wheat previously excluded. ²Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted. ³Annual data are monthly averages of crop year. ⁴Includes eggs for hatching. Source: Coarse Grains Quarterly (22-001), Wheat Review (22-005), and Trade of Canada, Exports (65-004), D.B.S.

Note: Since the June issue, total retail trade, grocery and combination, motor vehicle dealers, fuel dealers and totals for Manitoba, Saskatchewan and Alberta, seasonally adjusted and unadjusted, have been revised from January 1962 to the end of April 1964. All other series are unchanged. ¹Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. ²Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade. Source: Retail Trade (63-005), D.B.S.

¹Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. ²Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. ³Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. ⁴Excluded from the above tabulation are charge accounts of motor vehicle dealers whose credit is extended mainly to businesses rather than to consumers. Instalment credit includes conditional sales agreements only. ⁵Amount owing to oil companies, excluding commercial accounts. ⁶Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. ⁷Figures for dates other than year ends are estimated on the basis of the loans by twelve companies. Source: Department of Finance, Department of Agriculture, Bank of Canada, Credit Statistics (61-004), D.B.S.

¹Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1962 and 1963 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ²Includes January to July interim payments related to recommendations of the Royal Commission on Railway Transportation. Source: Railway Operating Statistics (52-003) monthly, (52-206) annual, D.B.S.

¹Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.

²Subsidiary coin issued by the Mint less coin held

by Bank of Canada and chartered banks in Canada.

³Less total float, i.e. cheques and other items in transit (net).

⁴At September 30, 1957, the deposit

balances of religious, educational and welfare institutions used for business purposes, about \$140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date.

Note: This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 33 companies operating in Canada representing 84 per cent of new ordinary insurance sales. ¹The Canada totals by months for 1962 and 1963 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly figures for 1962 and 1963 nor the monthly averages for 1963 have been revised to agree with the Canada total. ¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (Excluding government-owned companies). ²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes Agriculture, Forestry, Fishing and Construction. Source: Corporation Profits (61-003), D. B. 5.
