A NOTE TO USERS

Months for Cyclical Dominance (MCD)

The user will find this expression in abbreviated form in several tables throughout this publication.

The measure indicates the number of months required on the average for emergence of the cyclical trend from the seasonally adjusted series. An MCD of five implies that a five-month moving average is required in order to offset irregular movements and allow examination of the underlying cyclical trend.

The MCD is used in Tables 11, 12, 17, 18, 34, 35, 36, 37, 58, 76 and 83 to indicate the relative variability

of the series. Its value can range only from one to six months, since values greater than this are not calculated. In the "S" section, for series with an MCD of four or more, five-term moving averages are used to aid in charting. These averages are correct for series with an MCD of five, but for MCD's of four or six they are used as approximations to avoid the problem of centering even term averages. The MCD is not charted for series with values of three or less, since it does not increase the clarity of the charted series.

NATIONAL ACCOUNTS—INCOME AND EXPENDITURE
SECOND QUARTER 1964

Introductory Review

Gross National Product in the second quarter of 1964 is estimated at \$46.0 billion, slightly more than 1 per cent higher than in the preceding period. However, virtually all this increase represents higher prices, leaving the volume of the nation's output much the same. The value of Gross National Product excluding net farm income rose by about one half of 1 per cent.

The current expansion in economic activity is now about 3½ years old, having got under way in the early part of 1961. Towards the end of last year the pace of the advance began to accelerate, and the rate of increase in seasonally adjusted non-farm GNP in the first quarter of 1964, of 4 per cent, was the sharpest of the entire period. The rapidity of the advance was accounted for in part by special factors such as the stimulus of the winter house-building incentive scheme and the extraordinarily high levels of wheat exports and farm cash income which prevailed through the

period. In addition, the exceptionally strong rise in investment spending in the first quarter likely reflected some forward spending associated with the increase in the sales tax on building materials and production machinery which went into effect on April 1.¹

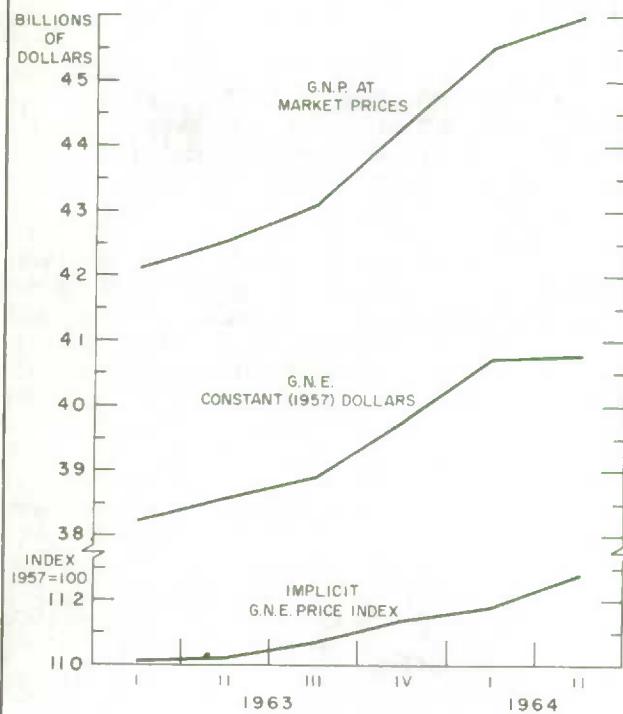

The Gross National Product is a seasonally adjusted figure, with seasonal factors based on the average experience of past years. The somewhat special situation outlined above raises difficult problems in the interpretation of seasonally adjusted data. With this in mind it may be useful in assessing the recent economic situation to compare the quarterly changes over the past year. A table showing these figures for Gross National Expenditure and its components is set out below:

¹ On July 8th, 1963, it was announced that the tax on certain building materials and production machinery would be imposed in three stages: 4 per cent in June 1963, rising to 8 per cent in April 1964 and to the full 11 per cent in January 1965.

FOLLOWING THE SHARP INCREASE IN THE PREVIOUS QUARTER G.N.P. SHOWED A SMALL RISE REFLECTING MAINLY PRICE INCREASES

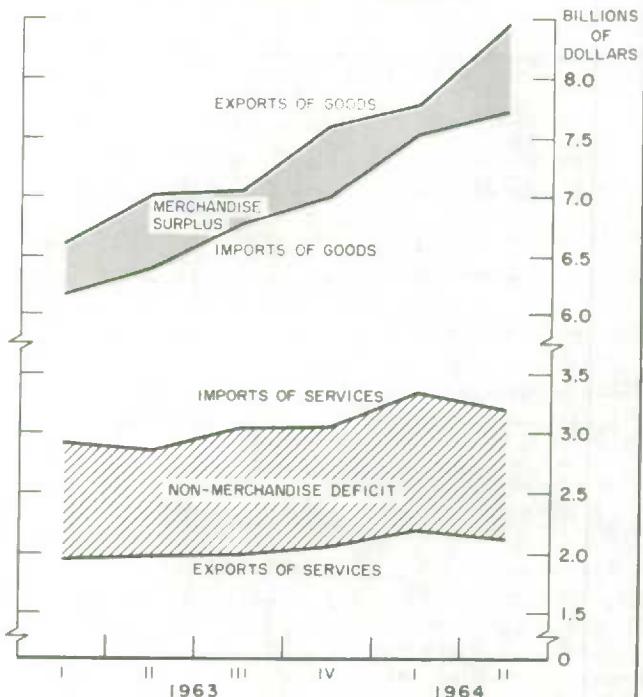

THE IMPROVEMENT IN THE NET IMPORT BALANCE WAS OFFSET BY LOWER INVESTMENT OUTLAYS

HOUSING EXPENDITURE DROPPED BACK FROM THE UNPRECEDENTED LEVEL ATTAINED IN THE FIRST QUARTER

RISING MERCHANTILE EXPORTS MAINLY ACCOUNTED FOR THE IMPROVEMENT IN THE NET IMPORT BALANCE

ALL DATA IN THE ABOVE CHARTS ARE SEASONALLY ADJUSTED AT ANNUAL RATES.

Turning from the aggregates to the components, the main source of strength in the economy in the second quarter was in the external sector. A substantial increase in exports of goods and services in association with little change in imports made for a reduction in the deficit on international current account. A building up of stocks contributed support to economic activity in the face of easing final demand. In the consumer sector, the characteristically volatile demand for durables fell away from the high first quarter level, leaving total consumer outlays only fractionally higher. Government expenditure on goods and services rose a little. Revenues rose more than total government expenditures (including transfers) thereby making for a further reduction in the combined government deficit, one of the notable developments of the quarter. In the investment sector the impact of a steep decline in outlays for housing was reinforced by some falling-off in purchases of machinery and equipment; investment in non-residential construction was moderately higher.

The outcome of the opposing forces brought to bear on the economy in the second quarter was that final domestic demand was off slightly, in sharp contrast to the exceptionally large advance of the

preceding period. At the same time, the expansion of exports made for a small increment to total final purchases.

The salient developments on the income side of the accounts in the second quarter were a distinct falling-off in the rate of increase in labour income and a levelling off in corporate profits after two sharp quarterly increases.

The upward-drift of prices was reinforced in the second quarter. Most of the increase of about 1 per cent in overall prices took place in gross fixed capital formation (up by about 1.5 per cent), largely due to the implementation of the second stage of the sales tax on building materials and production machinery. New residential construction prices rose by almost 2 per cent with a little more than 2 per cent being the increase recorded for the price of machinery and equipment. The price component of personal expenditure rose by half of 1 per cent as a result of increases in prices for food and services. Prices of exported goods and services showed a fractional increase. The following table shows the price changes for the last 12 months:

Implicit Price Indexes

THE COMPONENTS OF DEMAND

Consumer Expenditure

Following sharp increases in the three preceding quarters, personal expenditure on consumer goods and services registered only a fractional rise in the second quarter. On average, the prices of consumer goods and services showed an equivalent rise, leaving the level of real consumption unchanged from the first quarter.

The drop in purchases of durable goods was widespread, offsetting a 1 per cent rise in non-durable goods. All categories of durables contributed to the 4 per cent decline, the largest being net purchases of new and used cars which were down 6 per cent from the first quarter level. While car purchasing has shown a steady growth in Canada for several years, a particularly sharp rise occurred in the fourth quarter of 1963, followed by a further rise in the first quarter of this year.

Purchases of household durables also fell off in the second quarter, possibly reflecting the sharp drop in housing completions.

Movements in the components of non-durables showed contrasts with the first quarter. Where the first quarter was marked by rising purchases of food, and a sharp increment in purchases of alcoholic beverages matched by an equivalent decline in consumption of tobacco products, the second quarter showed a 6 per cent decline in alcoholic beverages, a 7 per cent increase in tobacco products, and no change in the level of food purchases. In the case of alcoholic beverages and tobacco products, the second quarter experience may have been a reaction from the first quarter when anticipation of price increases stimulated purchases of spirits while at the same time medical reports were published on the effects of smoking. With the level of food purchases unchanged in the second quarter and with some price increases in this area, a decline in real consumption is indicated. Among other non-durables, expenditure on gas, oil and auto parts rose by 1½ per cent after a first quarter decline, while purchases of clothing declined fractionally.

Expenditures on services increased by 1 per cent, a bit less than the normal rate of growth for this component, mainly reflecting less than the usual increase in shelter expenses.

Business Gross Fixed Capital Formation

Outlays on fixed capital dropped significantly in the second quarter. At a seasonally adjusted annual rate of \$8,324 million, capital spending fell about 7 per cent below the first quarter. While non-residential construction increased by over 3 per cent, machinery and equipment spending declined over 3 per cent and housing dropped back from the exceptionally high level of the first quarter. Expen-

diture during the first half of the year, at a seasonally adjusted annual rate, still ran 15 per cent over the year 1963; the mid year review of 1964 capital expenditure intentions indicated a 19 per cent increase for the year as a whole.

The value of new residential construction was at an annual rate of \$2,340 and \$1,752 million, after discounting seasonal factors, in the first two quarters. This 25 per cent drop matched declines of 26 and 31 per cent in seasonally adjusted figures of housing starts and completions. Starts at annual rates dropped from the unusually high level of 181,000 to 134,200; completions moved from 215,800 to 148,000.

The annual rate of new non-residential construction rose from \$3,024 to \$3,128 million, while expenditures on machinery and equipment fell from \$3,564 to \$3,444 million. In the first half of 1964 non-residential contract awards were running well over 1963 levels. Likewise, shipments of rolled steel products to building construction (including utility construction and steel fabricators) exceeded those of the same period a year earlier. However, business outlays on new machinery and equipment are estimated to have been lower, but detailed import statistics for the quarter are not yet available to substantiate part of this estimate.

Investment in Non-farm Business Inventories

Investment in non-farm business inventories contributed to the level of economic activity in the second quarter. Business added to its stocks at an increasing rate, thus continuing the tendency towards inventory build-up which had been resumed in the third quarter of 1963. Seasonally adjusted estimates show an accumulation of inventories of \$620 million at annual rates compared with \$468 million in the previous quarter. The manufacturing, wholesale, and notably the retail industry increased their stocks, while other industries showed a decline in the rate of accumulation mainly due to the depletion of mining inventories.

Among the manufacturing industries the greater part of the quarter's accumulation took place in durables where there was a shift from liquidation to accumulation, reflecting mainly increases in the stocks of primary metals, metal fabricating and machinery industries. In contrast to the first quarter, some drawing down of stocks occurred in the transportation equipment industry, while a reduction in inventory levels continued, though at a reduced rate, in the wood products and furniture industries. Total non-durables doubled the rate of accumulation of the previous quarter; in this group the movement was also mixed, with the food and chemical industries accounting for most of the accumulation, and petroleum and coal industries for most of the depletion.

The accumulation in manufacturing took place against a background of virtually unchanged production and lower shipments, the first decline to have taken place since the end of 1960. Although the stock-to-shipments ratio was lower than the average of the past three years, some increase was registered in the second quarter. At every stage of processing there were additions to stocks, the highest being in stocks of finished goods. Unfilled orders increased, but new orders dropped for the first time since the middle of 1960.

In wholesale trades, the major part of the restocking took place in durable lines, where there was a shift from liquidation to accumulation, mainly as a result of additions to the stocks of wholesalers of industrial and transportation equipment. In non-durables the accumulation was general and, in the total, remained at the same modest rate as in the previous quarter. The stock-to-sales ratio in wholesale trade advanced, but was not higher than its average over the past three years.

In retail trades, additions to stocks continued, though at a sharply reduced rate. The stock-to-sales ratio of total retail trade declined slightly. Among durables, most of the accumulation was accounted for by the increase, although at a greatly reduced

rate, in the stocks of motor vehicle dealers whose sales dropped more than the supply of new cars. Among non-durables, the biggest restocking took place in the food trades.

Exports and Imports of Goods and Services

The deficit in the external account dropped from an annual rate, after seasonal adjustment, of \$892 million in the first quarter to \$348 million in the second quarter when exports of goods and services rose nearly 6 per cent to an annual rate of \$10,564 million and imports of goods and services were practically unchanged—moving from \$10,872 to \$10,912 million. With transactions on external account reflecting some of the unusual events outlined earlier, the wide swings in the deficit do not necessarily show underlying changes in the external account and an averaging of the net balances in the first half of the year may place the figures in better perspective.

Exports of merchandise rose sharply and the surplus on goods, seasonally adjusted, increased from \$256 to \$732 million. With a deficit on non-merchandise trade \$68 million lower, the current account deficit fell by \$544 million.

Exports and Imports of Goods and Services

(Seasonally adjusted at annual rates)

| | Goods | | | Services | | | Current balance |
|-------------|---------------------|---------|-----|----------|---------|---------|-----------------|
| | Exports | Imports | Net | Exports | Imports | Net | |
| | millions of dollars | | | | | | |
| 1963 | | | | | | | |
| 1st Q | 6,604 | 6,152 | 452 | 1,948 | 2,912 | - 964 | - 512 |
| 2nd Q | 7,008 | 6,400 | 608 | 1,972 | 2,856 | - 884 | - 276 |
| 3rd Q | 7,048 | 6,768 | 280 | 1,984 | 3,036 | - 1,052 | - 772 |
| 4th Q | 7,596 | 7,000 | 596 | 2,056 | 3,044 | - 988 | - 392 |
| 1964 | | | | | | | |
| 1st Q | 7,788 | 7,532 | 256 | 2,192 | 3,340 | - 1,148 | - 892 |
| 2nd Q | 8,452 | 7,720 | 732 | 2,112 | 3,192 | - 1,080 | - 348 |

Marked improvement in earnings from merchandise trade resulted from an increase of 8.5 per cent in exports compared with a rise of 2.5 per cent in imports. Adjusted export figures indicate that gains from the first quarter were made mostly outside the United States and United Kingdom markets, and principally from sales of wheat to the USSR and other countries in eastern Europe. Sales abroad increased for wheat, lumber, newsprint paper, wood pulp, nickel and ores, crude petroleum and agricul-

tural machinery. Commodity detail is not available to identify changes in merchandise imports.

The non-merchandise trade deficit moved from \$1,148 to \$1,080 million, attributable to increased production of gold, improvement in the travel account and in the miscellaneous service account (personal remittances, official contributions, business services, etc.).

Income Flows

Labour Income

Labour income continued to rise in the second quarter, to a seasonally adjusted annual rate of \$23.0 billion, slightly over 1 per cent above the level of the previous period and the lowest increase since the first quarter of 1961. The service-producing industries continued the increases of the previous two quarters while the goods-producing industries total showed a decline. Within the latter group, manufacturing rose very slightly, the smallest increase in this industry in the recent expansion. Reflecting the sharp drop in housing, labour income in construction declined 4 per cent. The much lower rate of increase in labour income in the second quarter is associated with one of the smallest quarterly increases in employment since 1961.

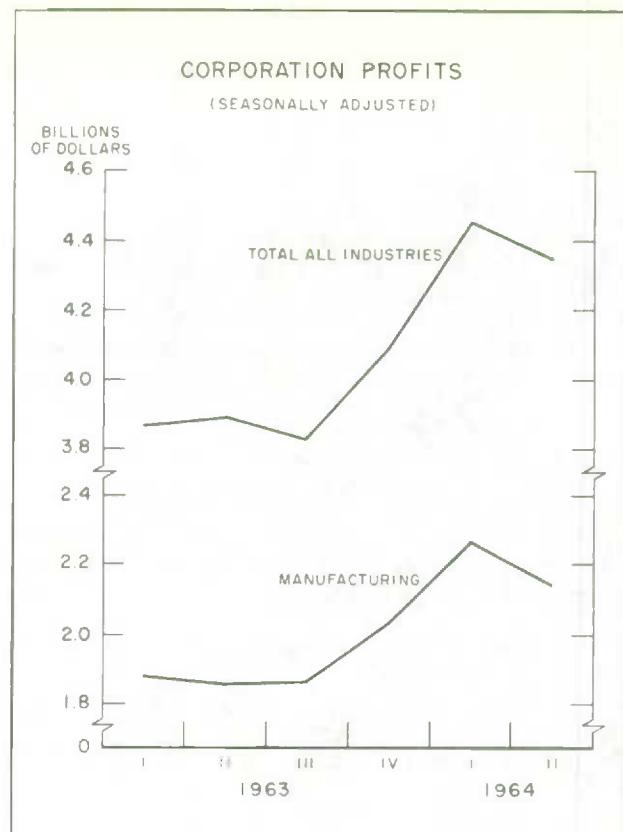

Corporation Profits and Other Investment Income

Corporation profits (before taxes and before dividends paid to non-residents) dropped by about 2 per cent in the second quarter of 1964, after rising strongly in the two preceding quarters. They were at a seasonally adjusted annual rate of \$4.3 billion, 46 per cent higher than the level at the beginning of the expansion. Lower profits were experienced by all major industries except Finance, Mining, and the Transportation, Storage and Communication groups.

Manufacturing as a whole showed a decline of 5½ per cent. Within this industry, however, there were offsetting movements; gains recorded in petroleum and coal, chemical, rubber, and other manufacturing were more than offset by declines in the rest of the group. Metal industries (including transportation equipment) showed the sharpest decline of about 12 per cent which was associated with reduced output and lower prices of motor vehicles.

Percentage Changes in Corporation Profits by Industry (Seasonally adjusted)

| | 1Q'64 to 2Q'64 |
|---|----------------------|
| Mines, quarries and oil wells..... | 5.2 |
| Manufacturing industries..... | - 5.5 |
| Transportation, storage and communication | 2.2 |
| Electric power, gas and water utilities | - |
| Wholesale trade | - 3.9 |
| Retail trade..... | - 9.5 |
| Finance, insurance and real estate..... | 7.6 |
| Service..... | - 11.5 |
| Other non-manufacturing | - 3.8 |
| Total, all industries | - 2.3 |

Dividends paid to non-residents declined significantly, by about 18 per cent, so that profits measured in the Gross National Product were slightly higher.

Unincorporated Business

Net income of non-farm unincorporated business declined more than 1 per cent, seasonally adjusted, in the second quarter 1964. The most marked decrease, of nearly 10 per cent, was recorded in the construction industry associated with the decline in housing outlays; retail trade also declined. Forestry, fishing, finance and service net income rose slightly.

Seasonally adjusted accrued net income of farm operators from farm production increased by 25 per cent in the second quarter of 1964. Higher profits of the Canadian Wheat Board, associated with the record level of grain exports, were the major factor in the increase. Livestock inventories, predominantly of cattle, showed more than a seasonal accumulation.

On the other hand, seasonally adjusted net income of farm operators, which is reflected in the personal income account, dropped 32 per cent in the second quarter of 1964, mainly as a result of a sharp reduction in payments to farmers by the Canadian Wheat Board in the quarter, following record payments in the first quarter.

It is perhaps of interest that the latest estimate of the value of crop production for the year 1964 is \$1,128 million, down 18 per cent from the record crop of 1963, but still 15 per cent above the ten year average.

The Government Sector

Seasonally adjusted at annual rates, revenues of all governments combined (including intergovernmental transfers) increased by about 3 per cent to a level of \$15,700 million in the second quarter from the previous period. Total expenditures of all governments increased less than total revenues with the result that the deficit was almost halved, falling from a rate of \$240 million to a rate of \$124 million.

The main factor in the improvement of the combined deficit position was the change in the federal surplus on a national accounts basis which increased from a rate of \$136 million in the first quarter to a rate of \$320 million in the second, the largest surplus since the second quarter of 1957. Federal revenues were higher by 2½ per cent with the major gains being made in personal direct and in indirect taxes, the latter partly owing to the increase in the sales tax rate on production machinery and building materials from 4 per cent to 8 per cent effective April 1, 1964. On the other hand, total federal expenditures showed little change. Expenditures on goods and services declined by about 2½ per cent as defence spending fell sharply, princi-

pally as a result of smaller outlays on equipment, and non-defence spending remained relatively stable. Offsetting this decline in goods and services, federal transfers to other levels of government rose nearly 10 per cent because of higher grants to provinces under the Hospital Insurance and Diagnostic Services Act and payments for winter works projects.

Total expenditures of the provincial and municipal governments combined rose by about 4 per cent to a level of \$8,068 million in the second quarter with increased outlays on goods and services and on transfer payments to persons. Total revenues rose less sharply, the main increments occurring in personal direct taxes and transfers from the federal government. As a consequence, the deficit at the provincial-municipal level widened somewhat, to a rate of \$444 million from \$376 million,

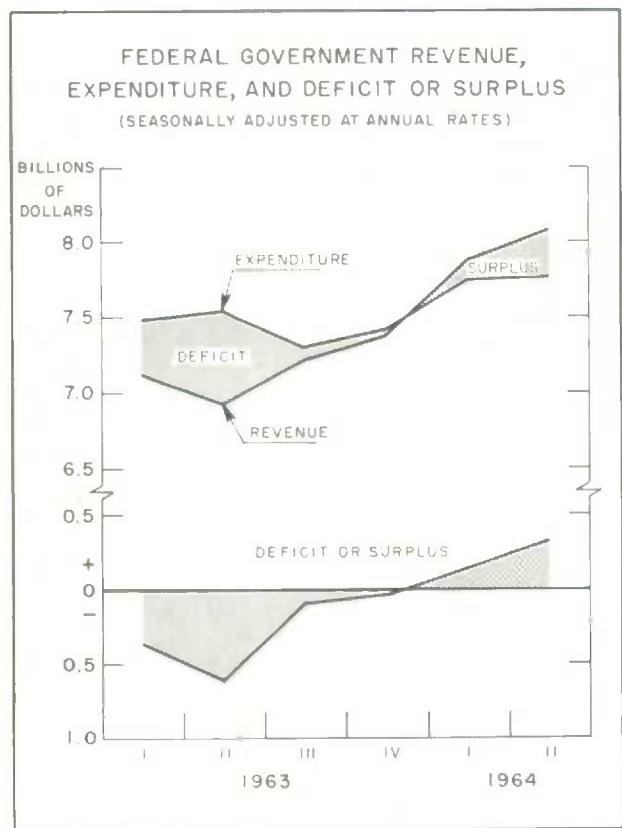

Production by Industry

Seasonally adjusted real domestic product less agriculture for the second quarter of 1964 was below the level attained in the first quarter of this year. While the present decline is the first to be shown by this aggregate since the beginning of the expansion in production early in 1961, to a large extent it represented a reversal of the sharp increases shown by construction and related industries in the fourth and the first quarters, particularly the latter. Compared with the second quarter of 1963, non-agricultural output was more than 6 per cent higher.

The 11 per cent drop in construction in the second quarter accounted for more than three quarters of the decline in total non-agricultural output. Stimulated in part by the government winter house-building incentive programme and by the imposition of the second stage of the tax on building materials on April 1, construction activity had increased by 6 per cent and then by a further 9 per cent in the two preceding quarters. The current decline left construction 3 per cent above the third quarter of 1963; it was concentrated in the area of residential construction which alone accounted for more than half of the decline in non-agricultural output.

The next largest contributor to the decline was trade, with wholesale trade down by 2½ per cent and retail trade by 1½ per cent. Both at the wholesale and retail levels the most significant declines occurred in those trades dealing with construction materials. In addition, there was a substantial decline in the sales of motor vehicle dealers of 5 per cent at the retail level.

Other declines occurred in mining, forestry, and fishing and trapping. Public administration and defence declined fractionally. Mining output decreased by one per cent with declines concentrated in metal mining, particularly iron ore (-7 per cent) and other metals including uranium.

Manufacturing showed a marginal increase, as a result of a 1 per cent increase in non-durables just outweighing a less than 1 per cent decline in durables. As in trade, the largest declines in durables occurred in industries which produce construction materials and related goods, such as the wood products and non-metallic mineral products groups which declined by 4 and 6 per cent respectively and together accounted for over one half of the drop in durables. The remainder was mostly accounted for by the 6 per cent falling-off in the motor vehicle component of the transportation equipment group. Iron and steel production in the second quarter continued to increase, showing a gain of 2 per cent, with increases in iron castings and primary iron and steel of 11 and 3 per cent respectively. Non-ferrous metal products and electrical apparatus and supplies also showed gains in the quarter.

Within non-durable manufacturing, strong gains of 4 to 9 per cent were shown by textile products, printing and publishing and tobacco products, the increase in the last group representing in part a recovery from a very low first quarter. Paper products increased by less than one per cent, with the effects of a 3 per cent gain in pulp and paper damped by the sharp decline of the roofing paper com-

ponent from the exceptionally high first quarter levels. Food and beverages fell by 1 per cent, with a drop in its grain milling component of 5 per cent, again from very high first quarter levels, reflecting in the main developments associated with the recent Russian trade agreement. Fractional declines occurred in petroleum products and chemicals, the latter as a result of a steep drop in paints and varnishes, while most other components of chemicals increased.

The transportation, storage and communication group showed a gain of one and a half percent in the second quarter, with all three components contributing to the increase. Storage was up by 9½ per cent as a result of increased receipts and shipments at grain elevators. The transportation group increased by one per cent in spite of the two per cent decline in its largest component—railways—which failed to sustain the rapid increases achieved during the previous two quarters. The expansion in transportation activity for the second quarter came largely from shipping, which showed an above average gain due to the large quantities of wheat carried at that time. Air transport and increased output of oil and gas pipelines also contributed to the advance in total transportation.

LABOUR FORCE (More detail in Table 14)

Employment and the index of unemployed declined somewhat in August; the unemployment rate was 4.8 per cent.

civilian labour force

| | | total | non-agricultural | employed | | index of unemployed | unemployed as a per cent of labour force | |
|------|---|-------|------------------|----------|------------------|------------------------|--|--|

INDUSTRIAL PRODUCTION (More detail in Table 11)

The index of industrial production was virtually unchanged in July; the decline of slightly more than 3 per cent in mining production just managed to offset the small increase in manufacturing together with a gain of almost 3 per cent in electric power and gas utilities.

| | total industrial production | manufacturing production | | | mining production | electricity and gas | total iron and steel |
|------------|-----------------------------------|--------------------------|----------|--------------|----------------------|------------------------|-------------------------|
| | | Total | durables | non-durables | | | |

RETAIL TRADE, MOTOR VEHICLE SALES (More detail in Tables 48 and 76)

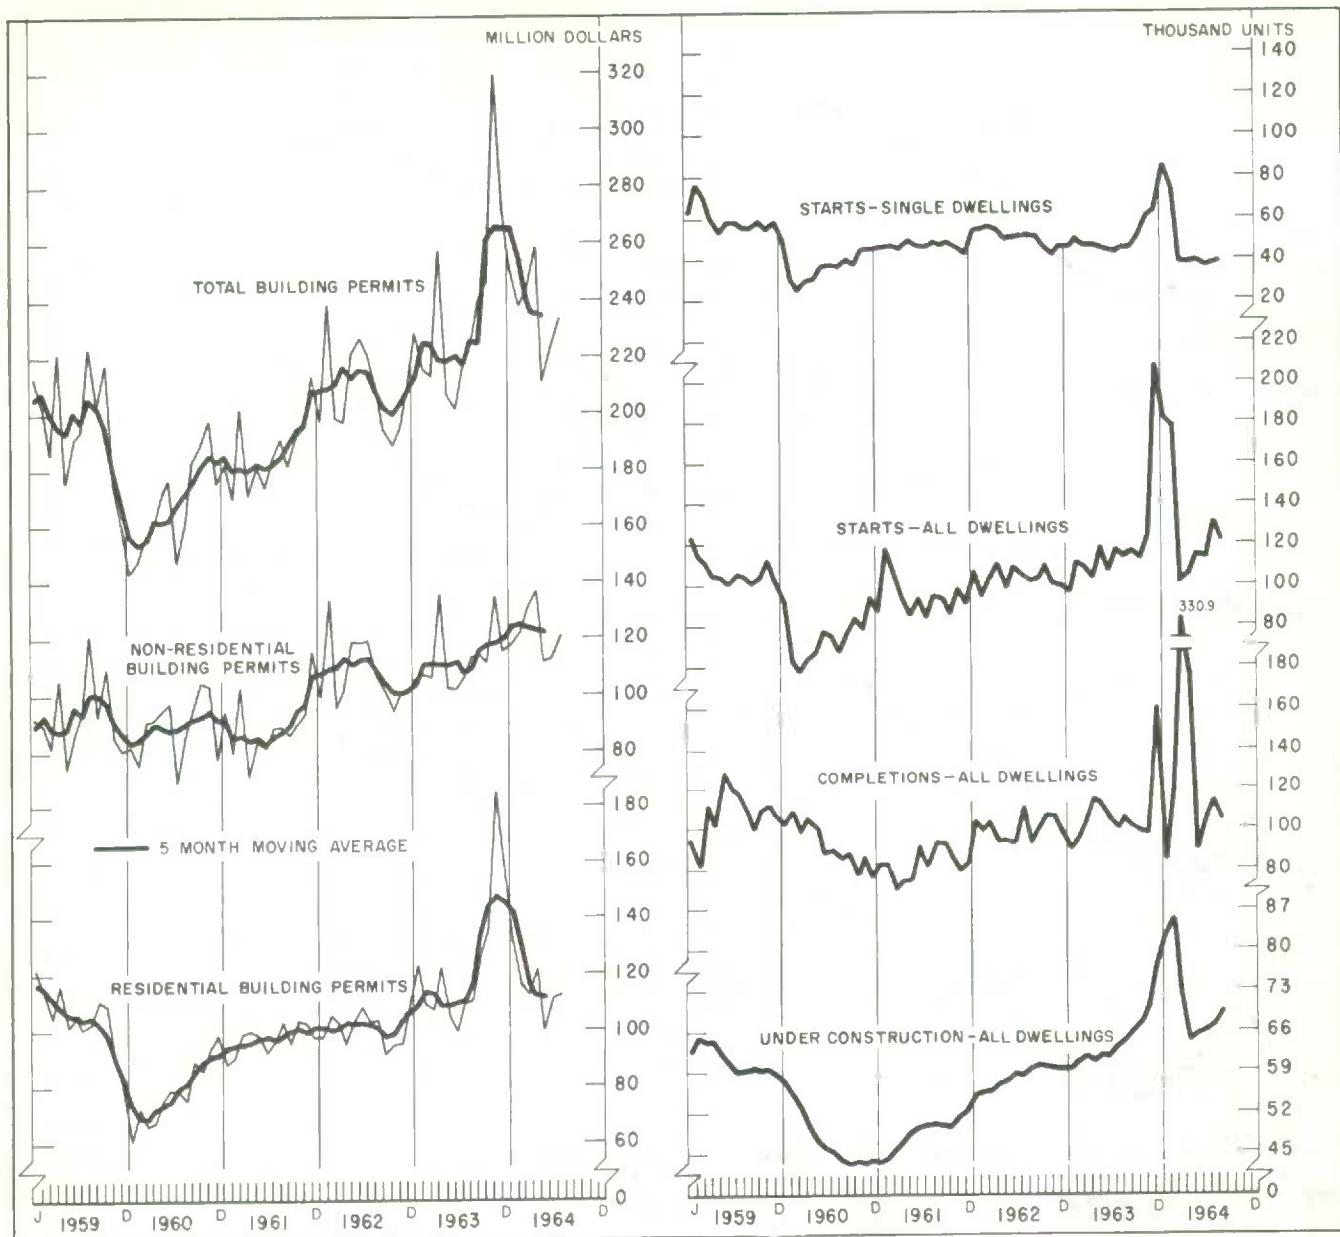

Retail trade rose 2 per cent in July, arising from increases in most store types.
 New motor vehicle sales were higher in July with gains occurring in all types of motor vehicles.

| | Retail Trade | | | | New Motor Vehicle Sales | | | |
|--------|---|-------|-----------------------|-------------------|-------------------------|-------------------------|-------------------------|------------------|

¹Includes hours paid in regular and overtime periods and hours of paid absence in the pay periods reported.

SELECTED QUARTERLY SERIES (More detail in Tables 6, 10, 61, 62, 63, 67, 80 and 90)

Gross National Product rose slightly more than one per cent in the second quarter with virtually all of the increase representing higher prices and leaving the volume of output much the same.

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 99. ³Original data as in column 8, Table 80.

PRICES (More detail in Tables 28, 30, 31, 84, 85 and 100)

The index of thirty industrial materials rose one per cent in August.

The index of industrial common stocks decreased fractionally in August after a sharp rise in July.

| | wholesale general index | thirty Industrial materials | export prices | | industrial common stocks | consumer price index (1949=100) | | | | | |

¹Prior to the census in 1961, population estimates were made quarterly on March 1, June 1, September 1 and December 1, and in addition on July 1 and January 1 of each year. After the 1961 census the quarterly estimates will be made on January 1, April 1, July 1 and October 1, as well as June 1. ¹Figures for births, marriages and deaths for 1963 and 1964 are provisional and represent registrations filed in provincial vital statistics offices during the month under review, regardless of the month of occurrence. These figures are exclusive of the Yukon and the Northwest Territories. Births and deaths are also exclusive of stillbirths. Source: Vital Statistics (84-001), D.B.S.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series.

²Includes residual error of estimate. Source at bottom of Table 10A.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. ³The Agricultural, Finance, Insurance and Real Estate and Public Administration and Defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ⁴Includes miscellaneous manufacturing industries. ⁵Includes also publishing and allied industries. ⁶Includes also the storage and communication industries. Source: Labour Gazette, Department of Labour.

¹The data in Tables 17 to 26 are based on reports from employers usually employing 15 persons and over and covering the respondents last pay period(s) in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and domestic service. ³Includes storage and communication. ⁴Includes insurance and real estate. ⁵Excludes public administration and defence and such community services as health and education. Source: Employment and Payrolls, (72-002), D.B.S.

¹This index is composed of shelter and household operation. ²This index is available for January, April and August only. ³Total of commodities and services does not add up to 100 per cent; portion of shelter which includes taxes and mortgage interest, and amounts to 8 per cent, is excluded. Sources: Prices and Price Indexes, (62-002); Price Index Numbers of Commodities and Services Used by Farmers, (62-004), D.B.S.

Table 32: manufacturing shipments¹ by selected industries as in the revised standard industrial classification (million dollars)

| monthly averages or months | total shipments | non-durable goods | durable goods | food and beverage | tobacco products | rubber | leather | textile | knitting mills | clothing | wood |

¹Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

Table 33: manufacturing inventories¹ by selected industries as in the revised standard industrial classification (million dollars)

| end of year or month | Inventories, total owned | non-durable goods | durable goods | food and beverage | tobacco products | rubber | leather | textile | knitting mills | clothing | wood |

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total manufacturing inventory owned by manufacturers including warehouse stocks. ³Total new orders received during the period of estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ⁴End of period. Annual figures for inventories and unfilled orders are end of December values. ⁵Sources: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

¹Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. ⁴Excluding shipments for re-processing at maker's own plant. ⁵Imports include, in addition to all other shapes, ingots, cast iron pipe, wire and wire ropes. Imports exclude castings (except cast iron pipe), forgings, fittings and couplings. Source: Primary Iron and Steel (41-001), D.B.S.

¹End of period. ²Does not include apartment-type machines. ³Electric and other. ⁴Gas types are included. ⁵In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. Sources: Domestic Electric Refrigerators (43-001), Domestic Washing Machines (43-002), Radio and Television Receiving Sets (43-004), Trade of Canada, Imports (65-007), Exports (65-004), D.B.S.

¹These totals include all generating agencies producing over ten million kilowatt hours per year. ²These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. ³Less imports. ⁴Total net generation less net exports. ⁵Mainly the amount used in electric boilers.

¹Data refers to city proper for Port Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan area.
²The data on building permits are collected for 1,300 municipalities and individual figures are available on request. Some of the annual totals for 1962 and 1963 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data.

¹The coverage was extended to 507 municipalities in 1948, and as of 1963, stands at 1,300, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. ²End of period. Source: New Residential Construction (64-002), D.B.S.

¹Footnote and Source are at Bottom of Table 63. ²Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. This is based on information from the 1961 census.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected. ²Planks and boards, flooring and square timber. ³Hollow blocks including fireproofing and load-bearing tile. ⁴For building insulation only. ⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada. ⁶Includes concrete chimney blocks, up to December 1959. ⁷Factory sales of firms which normally account for 96% of total Canadian production. Source: Concrete Products (44-002), Products made from Canadian clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001) and Trade of Canada, Imports (65-007), Exports (65-004), D.B.S.

September, 1964

*See also Table 31.

¹Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1963 are final prices. From August 1, 1963 to date, the western grain prices used in the index are initial prices only for wheat, oats and barley. ²Includes subsidy on hogs. ³Based on price for hogs including Dominion premium up to September 1960. A rise in ratio favours production of beef. ⁴Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights. ¹Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.
²Revised to include bagged seed wheat previously excluded.
³Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted.
⁴Annual data are monthly averages of crop year.

¹Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.
²Includes stocks held by manufacturers, wholesalers and other warehouses.
³Many mills were operating at more than the standard 26 working days in the month.

¹Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total. ²Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

¹Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. ²Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. ³Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. ⁴Excluded from the above tabulation are charge accounts of motor vehicle dealers whose credit is extended mainly to businesses rather than to consumers. Instalment credit includes conditional sales agreements only. ⁵Amount owing to oil companies, excluding commercial accounts. ⁶Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. ⁷Figures for dates other than year ends are estimated on the basis of the loans by twelve companies. ¹Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1962 and 1963 differ from the sum of the monthly data due to revisions which cannot be allocated by months.

²Includes January to July interim payments related to recommendations of the Royal Commission on Railway Transportation. Source: Railway Operating Statistics (52-003) monthly, (52-206) annual, D.B.S.

¹Note Circulation of Bank of Canada and chartered banks, excluding notes held by chartered banks.²Subsidiary coin issued by the Mint less coin held

by Bank of Canada and chartered banks in Canada.

³Less total float, i.e. cheques and other items in transit (net).⁴Balances of religious, educational and welfare institutions used for business purposes, about \$140 million, were reclassified from "personal savings deposits" to "other notice deposits". The figures prior to September 30, 1957 are thus not comparable with those since that date.

Note: This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 33 companies operating in Canada representing 84 per cent of new ordinary insurance sales. ¹The Canada totals by months for 1962 and 1963 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly figures for 1962 and 1963 nor the monthly averages for 1963 have been revised to agree with the Canada total. Source: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford, Conn.

¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (Excluding government-owned companies). ²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes Agriculture, Forestry, Fishing and Construction. Source: Corporation Profits (61-003), D.B.S.
