A NOTE TO USERS

ADDITIONS AND MODIFICATIONS IN THE S-PAGES:

(1) Two additional series: "Average hourly earnings in durable and non-durable manufacturing" have been introduced on the new page S-4 in this issue of the Review.

(2) Page S-8 now labelled "Selected monthly series" will include most of the series on former page S-6 supplemented by "Cheques cashed in clearing centres". The series "Rail revenue freight" loaded is also carried on this page. The original data for cheques cashed are given in Table 94.

MODIFICATIONS IN THE TABULAR SECTION:

(1) Former Table 90: "Commercial failures" has been re-designed to provide data for the combined regions of the Prairie Provinces and British Columbia and for the construction industry.

(2) The series on pulpwood production (in thousand cunits), Table 46, is replaced by the series on pulpwood production for domestic use (exclusive of exports). It is thought that the new series is more representative of actual production.

REVISIONS TO DATA:

(1) The unadjusted and seasonally adjusted data on corporation profits before taxes by industries in Table 99 are revised back to 1961.

(2) The seasonally adjusted data on rail revenue freight loaded in the new page S-8 are revised the entire period from 1946.

(3) The seasonally adjusted data on industrial employment on page S-3 and Tables 19 and 20 are revised back to 1960.

(4) The seasonally adjusted quarterly estimates on housing completions in all centres (page S-9) are revised the entire period to 1956.

(5) The seasonally adjusted data on weekly hours and weekly earnings in manufacturing have been revised to 1962.

ANNUAL SUPPLEMENT TO THE REVIEW:

The fourth issue of the Annual Supplement to the Review (1964 edition) will appear in print shortly and will carry the latest revised figures and the complete historical record of all series appearing in the S-pages.

Pending the appearance of the Annual Supplement, users may obtain upon request the revisions to the above series.

Annual Subscription: \$5.00 — Single copy: 50c.

This review and other publications of the Dominion Bureau of Statistics, including a free annotated catalogue of current publications, may be ordered from the Information and Public Relations Division, Dominion Bureau of Statistics, Ottawa, Ontario, and remittances made payable to the Receiver General of Canada.

2204-501

NATIONAL ACCOUNTS - INCOME AND EXPENDITURE FIRST QUARTER 1965

Introductory Review

Gross National Product in the first quarter of 1965 rose to a seasonally adjusted annual rate of \$49.7 billion, 3½ per cent above the level of the preceding period. Prices were 0.7 per cent higher but the major part of this increase represents a gain in real terms. Gross National Product excluding accrued net farm income rose in line with Gross National Product as a whole.¹

The current expansion, which has now been in progress for sixteen quarters, continued. The forward impetus in the first quarter came from a fairly broadly based increment to final domestic demand strongly reinforced by a substantial building up of stocks. As in the fourth quarter the deficit on current international account rose sharply. In the first quarter, this development is attributable to the rise in imports.

Of the components, accumulation of business inventories made the largest contribution to the rise in economic activity, accounting for \$0.9 billion of the \$1.7 billion increase in Gross National Product. The magnitude of this build-up is in part attributable to the sequence of events in the automotive industry. Strikes, first in the United States and then in Canada, had interrupted production in the fourth quarter of 1964 and into the first quarter of 1965 with the result that stocks of new cars became depleted and were built up when the industry reached record levels of production late in the course of the first quarter of 1965. A considerable build-up also occurred in the non-durable manufacturing industries.

A further expansion in investment in plant and equipment is evidence of the underlying strength of demand and the confidence engendered by it. The increase in outlays for capital goods by the business sector accounted for about one third of the advance in Gross National Product.

Consumer spending continued to rise but not nearly so much as income available for spending. The strength in the market for cars no doubt reflects in part the backlog of demand that had been built up in the preceding period. Further support to the economy came from higher government expenditure for goods and services and somewhat larger outlays for housing.

The Demand Components

Consumer expenditure on goods and services in the first quarter of 1965, advanced 1.5 per cent, virtually the same rate as in the previous quarter, reaching a level of \$30.6 billion seasonally adjusted

¹ The estimated value of the crop is based on acreage intentions and ten-year average yields. On these assumptions the 1965 crop would be much the same as in 1964. Seasonally adjusted quarterly data are obtained by dividing the annual crop estimated by four.

As in past periods of strong demand and heavy capital investment, imports rose sharply and in spite of some increase in exports the surplus on merchandise account disappeared. The deficit on service account narrowed appreciably but the overall deficit was the largest in some years.

There were some interesting developments on the income side in the first quarter. Labour income recorded one of the largest quarterly gains in many years. Corporate profits were a little above their unusually high fourth quarter level. Personal income rose much more sharply than National Income. This disparity is mainly a consequence of the extraordinarily large payments made to farmers by the Canadian Wheat Board. This bulge in income was undoubtedly an important element in the pronounced rise in the rate of personal saving.

Prices

With prices increasing by over half of one per cent, most of the 3½ per cent increase in GNP from the fourth quarter 1964 represented a gain in real terms. The increase of 0.7 per cent in the price component of Gross National Product in the first quarter of 1965 compares with an increase of 0.4 per cent in the preceding quarter.

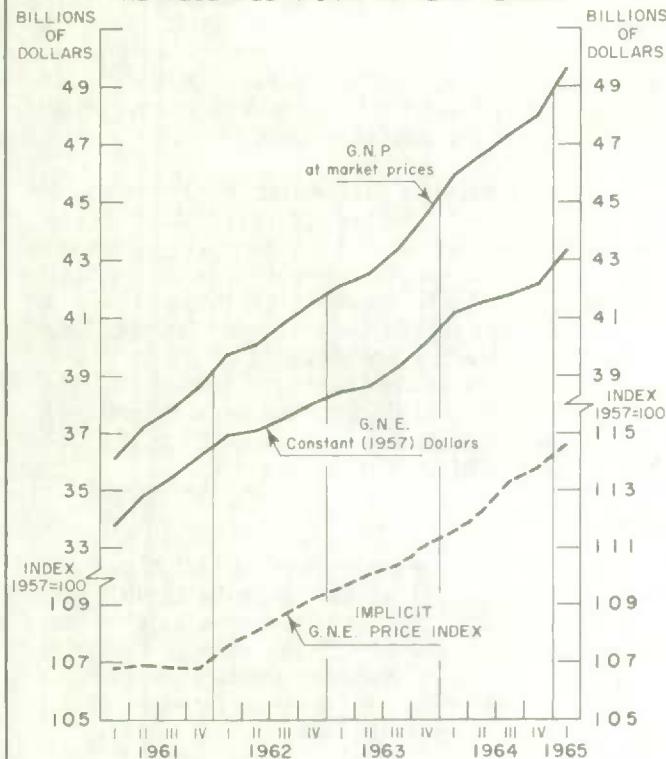

The price component of personal expenditure advanced by 0.4 per cent, with most of the increase attributable to services; prices were higher in all of the service components with the important exception of rents. Food prices, adjusted for seasonality, increased by 0.5 per cent. Women's and children's clothing declined by half of one per cent; at the total level non-durable goods prices advanced only fractionally. Prices of durable goods went up by 0.3 per cent.

The price index of gross fixed capital formation advanced by close to 2 per cent largely as a result of the last stage of the progressive implementation of the federal sales tax on production machinery and building materials. The largest increase took place in machinery and equipment (2.5 per cent) followed by a 1.8 per cent increase in new non-residential construction prices and a 1.4 per cent in new residential construction prices. Export prices decreased by 0.4 per cent largely a result of the drop in grain prices while preliminary indications revealed little import price change.

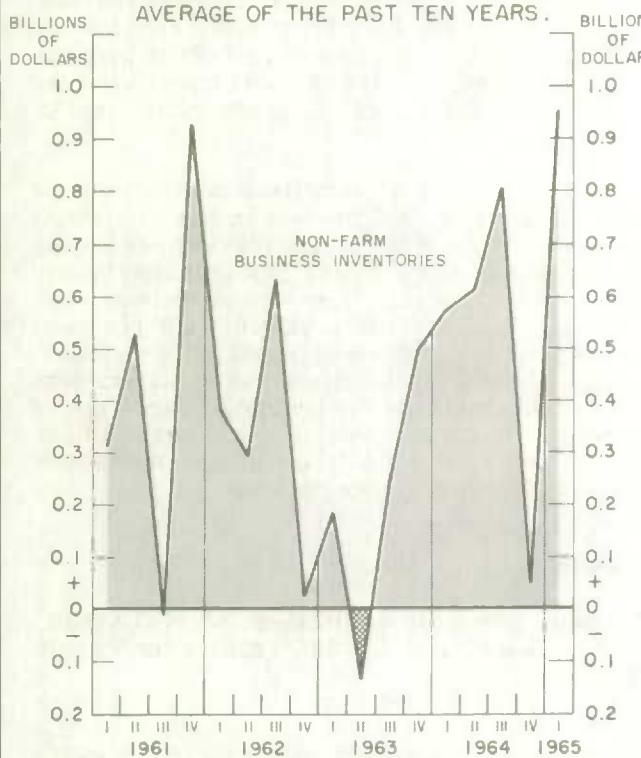

at annual rates. Of the increase of \$440 million, services accounted for \$252 million or roughly 57 per cent.

Within goods, all the gain took place among durables, paced by a 12 per cent rise in net purchases of new and used cars. Sales of new cars recovered from the sharp decline of the preceding quarter, associated with strikes in the industry.

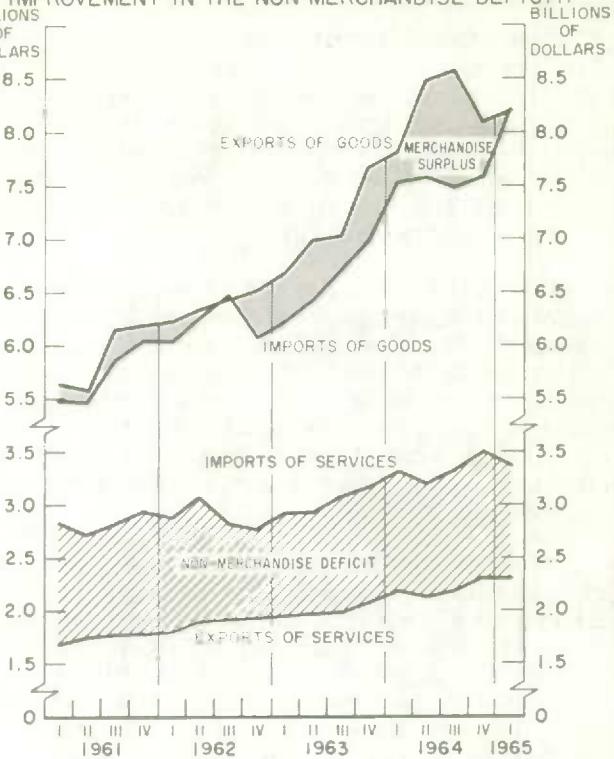

GROSS NATIONAL PRODUCT ROSE BY 3½ PER CENT. MOST OF THIS INCREASE REPRESENTED A GAIN IN REAL TERMS.

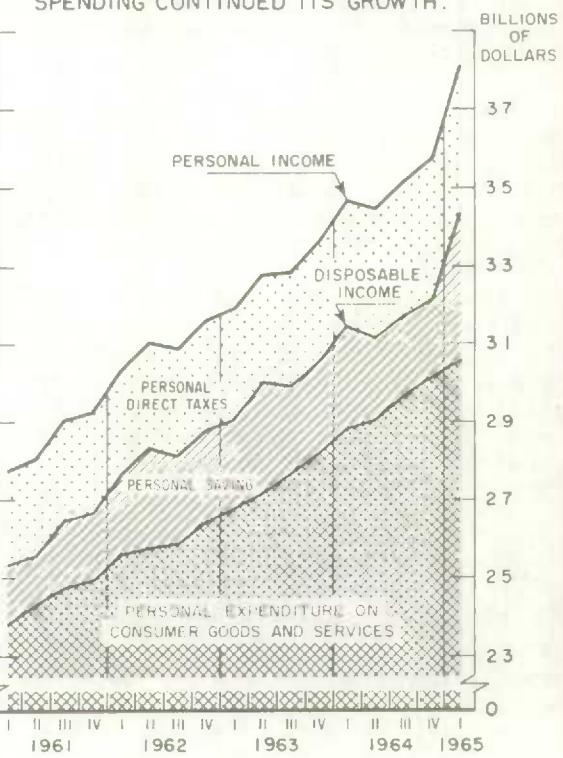

BUSINESS INVENTORIES MADE THE LARGEST CONTRIBUTION TO THE RISE IN ECONOMIC ACTIVITY. HOWEVER, THEIR RELATION TO G.N.P. WAS MUCH LOWER THAN THE QUARTERLY AVERAGE OF THE PAST TEN YEARS.

THE DEFICIT ON CURRENT ACCOUNT ROSE APPRECIABLY. A SHARP RISE IN MERCHANDISE IMPORTS MORE THAN OFFSET THE SLIGHT IMPROVEMENT IN THE NON-MERCHANDISE DEFICIT.

THE UNUSUALLY LARGE INCREASE IN PERSONAL INCOME RESULTED IN A SHARP RISE IN PERSONAL SAVING AS CONSUMER SPENDING CONTINUED ITS GROWTH.

ALL DATA IN THE ABOVE CHARTS ARE SEASONALLY ADJUSTED AT ANNUAL RATES.

and increased more than 20 per cent. As a consequence, "trade-ins" of used cars rose sharply and net purchases of used cars declined.

Outlays on appliances and radios rose 3½ per cent after two successive quarterly declines, while purchases of jewellery and watches dropped 2 per cent following gains in the second half of 1964.

Spending on non-durable goods was virtually unchanged from the very high fourth quarter level as gains and losses among the non-durable components were offsetting. For the first time in several years purchases of food failed to register an increase and actually declined by about 1 per cent. Purchases of fuel (including electricity and gas) also declined more than 3 per cent and expenditure on clothing and footwear showed no gain over the previous quarter. On the other hand, increases were recorded for tobacco, household supplies and auto parts and accessories where expenditures rose approximately 3, 4 and 5 per cent respectively; purchases of alcoholic beverages also increased.

Spending on services advanced somewhat more than 2 per cent and made a relatively large contribution to the growth in consumer expenditure. With the exception of user-operated transportation, all components shared in the growing demand for services; spending on personal services, personal care and medical care were up about 3, 2 and 2½ per cent respectively.

Business spending on replacement and expansion of capital stock increased in the first quarter to a rate nearly in line with the intentions of business for the year 1965 as a whole, as reported in March in "Private and Public Investment in Canada Outlook 1965". The level of \$10.0 billion at seasonally adjusted annual rates represented an increase of 7 per cent over the previous quarter.

The estimate of \$2.2 billion of new residential construction put in place is 3½ per cent higher than the previous quarter. After allowing for seasonal influences, Central Mortgage and Housing Corporation estimated that starts fell back from 182.5 to 158.0 thousand at annual rates, while completions advanced from 151.4 to 165.1 thousands. The early date for the beginning of the 1964-65 winter house-building incentive programme together with, perhaps some accelerated activity in multiple dwelling construction in anticipation of the imposition of the last stage of the sales tax on building materials were in all likelihood partially responsible for the high fourth quarter starts. A higher carryover of housing from 1964 and higher prices account for the increase in value.

The value of new non-residential construction totalled \$3.9 billion in the first quarter, up 9½ per cent from the fourth. Strong employment increases reported in both building and engineering construction, together with some increases in both labour and material input prices, raised the estimated value of work put in place.

Outlays on new machinery and equipment moved ahead by 6 per cent to a level of \$3.9 billion in the first quarter. Preliminary estimates suggest the increase in demand compared with the same quarter one year earlier was met in part by domestic suppliers, and by a marked increase in the value of imports. Lack of component detail for first quarter imports imparts a degree of uncertainty to this estimate.

Business inventory accumulation surged forward in the first quarter of 1965. Seasonally adjusted, the level of stocks rose by \$952 million at annual rates, representing a gain of \$904 million from the previous quarter's accumulation of only \$48 million. This was the heaviest build-up since the beginning of the current economic expansion and contributed substantially to the higher level of economic activity.

Investment in manufacturers' stocks contributed the largest share of the total accumulation of business holdings. The major part of the rest of business inventory accumulation was concentrated in the hands of retail traders. Investment at the wholesale level showed a moderate accumulation.

In manufacturing, durable goods-producing industries showed an accumulation due to an increase in the stocks of the primary metal, metal fabricating, machinery, electrical, non-metallic and transportation industries. At the non-durable level liquidation shifted to a build-up particularly of stocks of the food, tobacco, textile, petroleum and chemical industries. By stage of fabrication, accumulation took place at all levels of production. For manufacturing as a whole, the stock-to-sales ratio was higher than in the previous quarter.

The change in stocks at retail was dominated by the automotive trade. Stocks had been drawn down during the strike-affected fourth quarter and there was a substantial build-up when production was resumed in the first quarter of this year. Among other durables, changes resulted in a liquidation. A modest accumulation of stocks was general among the non-durable trades. For retail trade as a whole the stock-to-sales ratio was virtually unchanged from the previous quarter.

At the wholesale level, the mixed movement in both durables and non-durables showed, on balance, only a small build-up of inventories. For the wholesale industry, the stock-to-sales ratio declined when compared with the previous quarter.

The deficit in Canada's external account on a national accounts basis climbed from \$672 million in the fourth to \$1,060 million seasonally adjusted at annual rates in the first quarter, the largest deficit for some years. The change of \$388 million resulted from a turnaround from a surplus of \$520 million to a virtual balance in merchandise trade due to a more rapid growth in imports than exports. This was partly offset by a reduction of \$136 million in the deficit on non-merchandise trade.

¹ In the quarter, adjustments to Trade of Canada published statistics for balance of payments and national accounts purposes raised imports on account of progress payments made for military equipment being purchased abroad, and lowered exports to reflect more precisely the timing of wheat shipments and payments on foreign purchases of military aircraft.

In relation to the fourth quarter export gains were made in nickel, non-farm machinery, wheat, aluminum, asbestos and fertilizers, while reductions appeared in exports of natural gas, fish, copper, newsprint and woodpulp. Commodity detail is not available to identify components of the large increase in imports.

Smaller deficits in the interest and dividends, travel and miscellaneous accounts more than offset a larger deficit in the freight and shipping account.

Export gains for the last quarter over the previous quarter were made in United States and some overseas markets, offsetting losses in the United Kingdom. United States suppliers accounted for over two-thirds of the increase in imports.

The Government Sector

At seasonally adjusted annual rates the surplus on a National Accounts basis of all governments combined remained virtually unchanged in the first quarter. The continuing surplus in the government accounts reflects the buoyancy of revenue in a period of economic expansion. The reduced Federal government surplus was almost counter-balanced by a much lower provincial-municipal deficit. These developments between levels of government are in part a consequence of changes under the terms of the Federal Provincial Fiscal Arrangements Act by which the abatement in favour of the provinces of personal income tax was increased from 18 per cent to 21 per cent and of estate taxes from 50 per cent to 75 per cent.

Combined government revenues in the first quarter were higher by about 4 per cent. At both the Federal and the provincial-municipal levels most sources of government income yielded higher revenue. Combined revenue from personal direct taxes was up 5 per cent. Revenue from indirect taxes was up 4 per cent, which reflects in part the higher federal sales tax on building materials.

Total government expenditures combined increased by just over 4 per cent, offsetting the increase in revenues. Expenditure on goods and services by all governments rose by 3 per cent, the largest increase being at the Federal level mainly for purposes of defence. Government transfers to persons rose substantially in the first quarter, in part the result of larger provincial grants to hospitals. Subsidy payments declined sharply from the irregularly high level of the preceding quarter, when there were large interim payments to the railway companies.

Income Flows

Wages, salaries and supplementary labour income advanced 3.5 per cent in the first quarter, at seasonally adjusted annual rates; wages and salaries alone showed a slightly larger gain. The greater part of the rise in labour income reflects an expansion in employment but further increases in average earnings continued to contribute to the total; incomplete evidence suggests little change in hours worked.

The increase of about 4½ per cent in wages and salaries in the goods-producing industries was one of the largest quarterly gains in many years. In part this advance reflects the resumption of full production in the automotive industry following the settlement of the strikes in the industry. However, even without this special factor, the increase would have been over 4 per cent. Wages and salaries in construction rose 9½ per cent in the first quarter, continuing the rapid increase recorded in the preceding quarter. Wages and salaries in manufacturing were up 3½ per cent.

Wages and salaries in the service-producing industries advanced more than 2½ per cent in the period, with most of the industries recording much the same rate of gain. However, finance and service showed a better than average increase of 3 per cent and government a lower rate of 2 per cent.

Corporation profits (before taxes and before dividends paid to non-residents) increased in the first quarter by about 1 per cent. At seasonally adjusted annual rates, profits rose to \$4.9 billion, some \$60 million over the fourth quarter level.

There were offsetting movements among most major industry groups. Sizeable increases were recorded in printing, metal industries (including transportation equipment), and services, while profits of mining, quarrying and oil wells, wood, chemicals, and transportation, storage and communication declined significantly.

Rent, interest and miscellaneous investment income of \$3,380 million in the first quarter of 1965, seasonally adjusted at annual rates, was almost unchanged from the record high of \$3,388 million in the fourth quarter of 1964.

Net income of non-farm unincorporated business increased 1.5 per cent, seasonally adjusted at annual rates, in the first quarter of 1965; the changes in the individual industries were small and partially offsetting.

Accrued net income of farm operators declined 3 per cent, seasonally adjusted at annual rates, in the first quarter. The estimated value of the 1965 crop, which is based on acreage intentions, ten year average yields and average prices is much the same as the 1964 value. Net income received by farm operators increased substantially to a level of \$2.2 billion, close to the record set in the second quarter of 1951. This very sharp increase was due to record payments made by the Canadian Wheat Board.

Production by Industry

Seasonally adjusted real domestic product less agriculture for the first quarter of 1965 was 2 per cent higher than in the preceding quarter, and 27 per cent above its first quarter, 1961, cyclical trough.

Manufacturing, trade and construction were the largest contributors to the first quarter gain in non-agricultural output, with manufacturing accounting for about one third of the total advance.

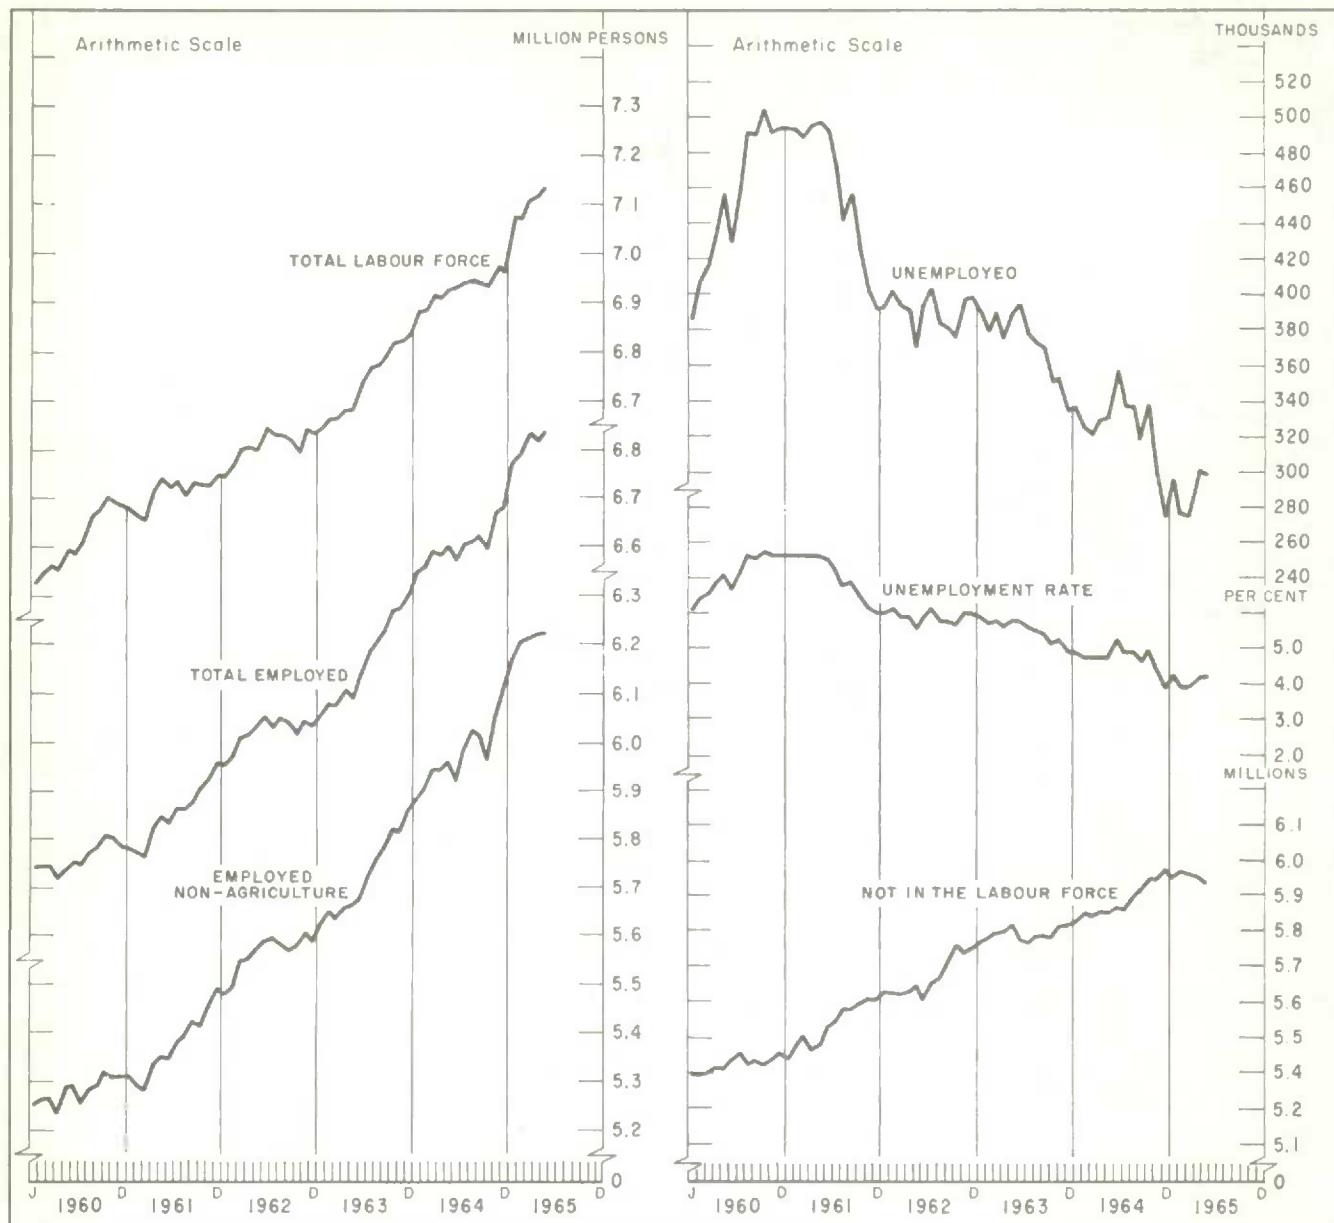

The 2 per cent gain in manufacturing output resulted from a 5 per cent increase in the durables component, as the non-durables group declined fractionally. A 23 per cent advance in transportation equipment was the largest contributor to the increase in durables, which can be traced to the attainment of a new high level in motor vehicle and parts production, following the strike-affected fourth quarter. The next largest contributions to the gain in durables came from electrical apparatus and supplies (4 per cent) and non-metallic mineral products (5 per cent); wood products showed a 1 per cent decline.

Within trade, which advanced by 3 per cent, the wholesale trade component showed the larger increase (7 per cent), while retail trade was up by about 1 per cent. As in manufacturing, motor vehicle sales were the largest contributors to the increase in trade, while declines occurred in the sales of building material dealers.

Among the remaining industry groups, increases of about 2 and 3 per cent occurred in electric power and gas utilities and mining, while forestry was up by about 8 per cent. Transportation was almost 1 per cent below fourth quarter levels, largely as a result of declines in railway and water transportation and a drop in oil and gas pipeline transport. The community, recreation, business and personal service group advanced by about one per cent.

LABOUR FORCE (More detail in Table 16)

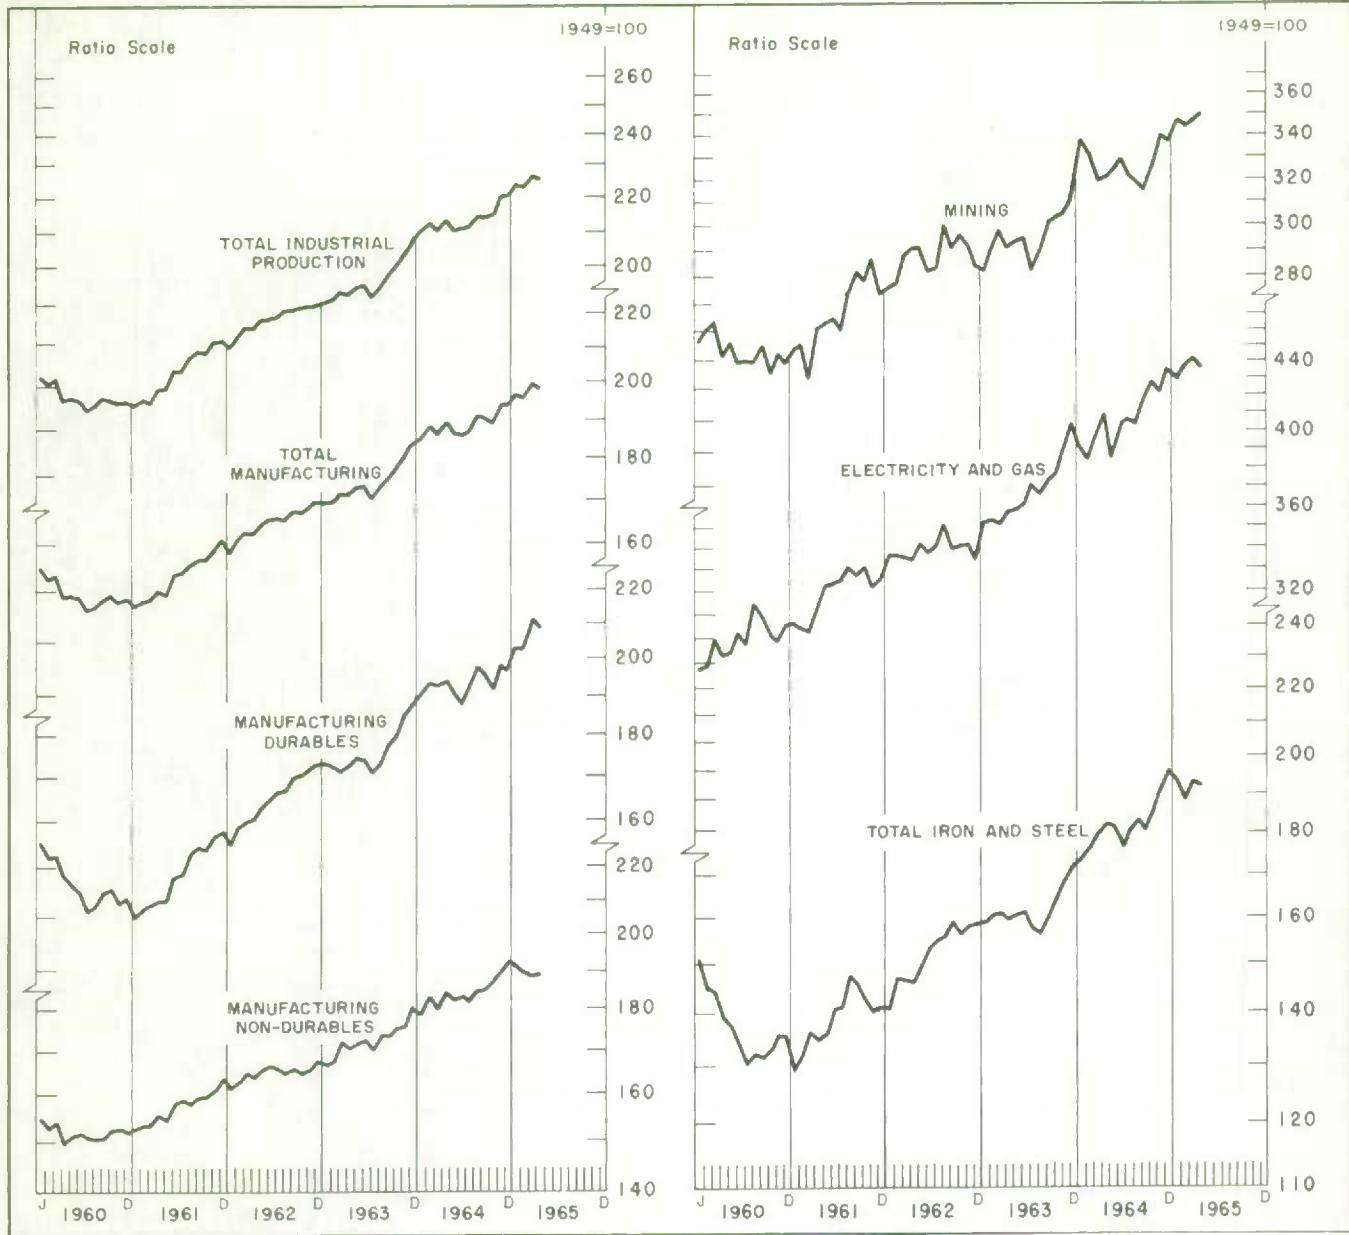

Employment and total labour force were somewhat higher in May while unemployment eased lower. The unemployment rate was 4.2 per cent.

| | total labour force | total employed | employed non-agriculture | unemployed | unemployment rate | not in the labour force | |

INDUSTRIAL PRODUCTION (More detail in Table 13)

The index of industrial production declined 0.5 per cent in April as the decreases in manufacturing and electric power and gas utilities were partially offset by a gain in mining.

| | total industrial production (1949=100) | manufacturing (1949=100) | | | (1949=100) | | |

EXPORTS AND IMPORTS (More detail in Table 83)

Total exports rose in April primarily as a result of increased exports to the United States.
 Total imports declined in April, due mostly to lower imports from the United States.

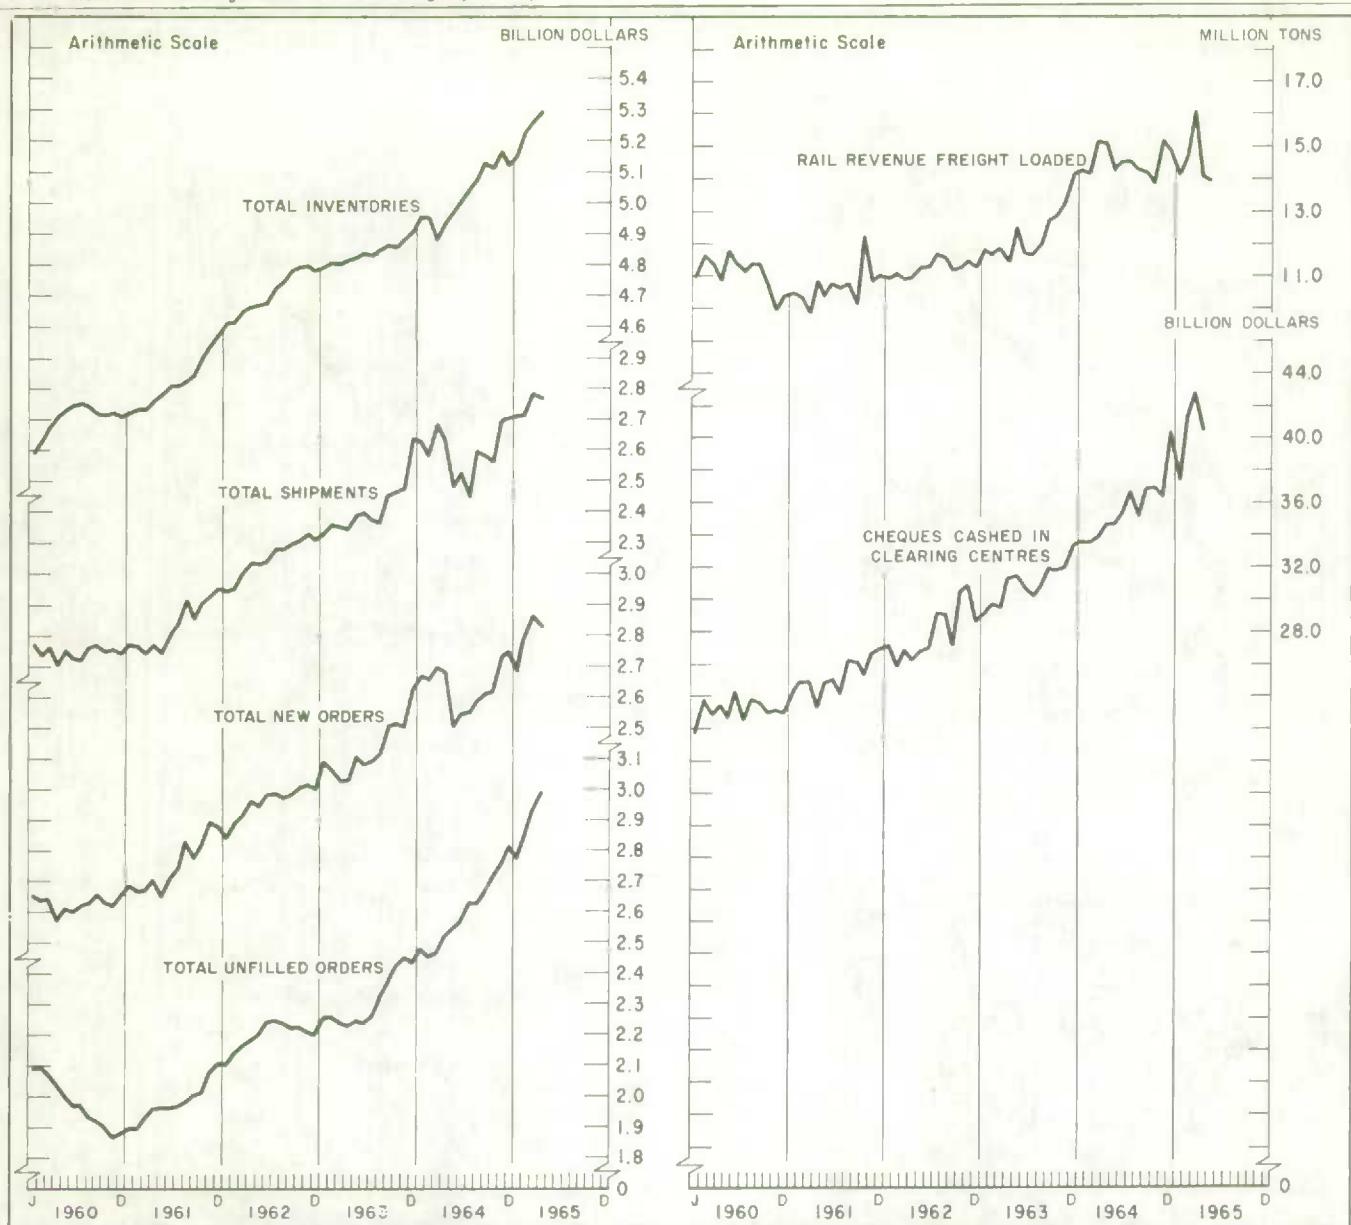

exports including re-exports (million dollars)

imports (million dollars)

SELECTED QUARTERLY SERIES (More detail in Tables 6, 10, 61, 62, 63, 67, 80 and 90)

GNP rose 3½ per cent in the first quarter; with prices increasing by over half of one per cent, most of the increase from the fourth quarter represented a gain in real terms.

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 99.

NOTE: "Commercial failures", revised from 1961.

PRICES (More detail in Tables 28, 30, 31, 84, 85 and 100)

The general wholesale index rose in May.

The consumer price index showed marginal increases in May in most of the main components.

| | general wholesale index | thirty industrial materials | consumer price index (1949=100) | | | | | | | | |

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. ¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series.

²Includes residual error of estimate. Source at bottom of Table II.

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error.

²The labour force as a percentage of the population 14 years of age and over.

³The unemployed as a percentage of the labour force.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. ³The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ⁴Includes miscellaneous manufacturing industries. ⁵Includes also publishing and allied industries. ⁶Includes also the storage and communication industries. Source: Labour Gazette, Department of Labour.

¹The data in Tables 19 to 26 are based on reports from employers usually employing 15 persons and over and covering the respondents last pay period(s) in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and domestic service. ³Includes storage and communication. ⁴Includes insurance and real estate. ⁵Excludes public administration and defence and such community services as health and education. Source: Employment and Payrolls, (72-002), D.B.S.

¹Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

Table 33: manufacturing inventories¹ by selected industries as in the revised standard industrial classification (million dollars)

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total manufacturing inventory owned by manufacturers including warehouse stocks. ³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ⁴End of period. Annual figures for inventories and unfilled orders are end of December values. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

¹Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

²100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports. ³Customs exports. ⁴Mill shipments destined for export.

¹Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. ⁴Excluding shipments for re-processing at maker's own plant. Source: Primary Iron and Steel (41-001), D.B.S.

¹End of period. ²Does not include apartment-type machines. ³Electric and other. ⁴Gas types are included. ⁵In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

¹These totals include all generating agencies producing over ten million kilowatt hours per year. ²These columns include all generating utilities and generating industries respectively, producing over ten million kilowatt hours per year. ³Less imports. ⁴Total net generation less net exports. ⁵Mainly the amount used in electric boilers.

¹Data refer to city proper for Part Arthur, Fort William, Regina and Saskatoon; in other cases to metropolitan areas. ²The data on building permits are collected for 1,400 municipalities and individual figures are available on request. Some of the annual totals for 1963 and 1964 differ slightly from the sum of the twelve monthly totals, due to the addition of statistics received too late to be included in the monthly data. Source: Building Permits (64-001), D.B.S.

¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. ²End of period. Source: New Residential Construction (64-002), D.B.S.

¹Footnote and Source are at Bottom of Table 63. ²Starting in January 1962, the data are not entirely comparable with earlier years because more centres are included and because of the expansion of the boundaries of metropolitan areas. This is based on information from the 1961 census.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected.

²Planks and boards, flooring and square timber.

³Hollow blocks including fireproofing and load-bearing tile.

⁴For building insulation only.

⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada.

⁶Factory sales of firms which normally account for 96% of total Canadian production.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 78 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), D.B.S.

*See also Table 30. ¹Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1964 are final prices. From August 1, 1964 to date, the western grain prices used in the index are initial prices only for wheat, oats and barley.²Barley No. 1 feed; hogs grade "B" alive.³Based on price for hogs including Dominion premium up to September 1960. A rise in ratio favours production of beef. Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B.⁴Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. ⁵Previous to January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights. ⁶Grade "B1" hogs. Sources: Coarse Grains Quarterly (22-001), Index Numbers of Farm Prices of Agricultural Products (62-004), D.B.S., Livestock and Meat Trade Report, Dept. of Agriculture.

¹Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.²Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted.³Annual data are monthly averages of crop year. ⁴Includes eggs for hatching. Sources: Coarse Grains Quarterly (22-001), Wheat Review (22-005), and Trade of Canada, Exports (65-004), D.B.S.

¹Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

²Includes stocks held by manufacturers, wholesalers and other warehouses. Many mills were operating at more than the standard 26 working days in the month.

¹Total retail trade obtained by summing "By Kinds of Business". The sum of the seasonally adjusted retail trade by regions will not necessarily add up to this total.

²Includes sales of new and used cars, trucks and buses, repair parts and services, tires and tubes, storage batteries, gasoline, some farm implements and a small amount of wholesale trade.

Source: Retail Trade (63-005), D.B.S.

Table 76: value of retail trade by types of business and provinces, based on the unrevised standard industrial classification—concluded

| monthly averages or months | lumber and building material | furniture, appliance and radio | restaurants | fuel dealers | drug stores | jewellery stores | miscellaneous | Atlantic provinces | Quebec | Ontario | Manitoba | Saskatchewan | Alberta | British Columbia |

*Credit extended mainly to individuals; includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms, mainly service credit extended by doctors, dentists, lawyers, pawnbrokers, travel companies, restaurants and personal credit for which no statistics are available. ¹Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods and repaid in instalments. ²Excludes a small amount of cash loans for which monthly data are not available. ³Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans. ⁴Conditional sales agreements held in connection with the financing of retail purchases of consumers' goods. ⁵Cash loans with no conditional sales contract but usually repaid in instalments. ⁶Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. ⁷Loans other than secured loans and mortgage loans. ⁸Figures for dates other than year-end are estimated on the basis of loans made by twelve companies. ⁹The use of all purpose credit plans makes it impossible to separate instalment and charge accounts receivable. ¹⁰Excludes charge accounts of motor vehicle dealers in Table 81 which are extended mainly to businesses rather than to consumers. ¹¹Sum of instalment credit of clothing hardware and jewellery stores, fuel dealers and "all other trades" in Table 81. ¹²Sum of charge accounts of clothing, hardware, independent grocery and combination stores, jewellery and general stores, fuel dealers, garages and filling stations and "all other trades" in Table 81. ¹³Amount owing to oil companies ex commercial accounts. ¹⁴Excludes mortgage loans. Data available yearly only. Sources: Credit Statistics (61-004), D.B.S.; Bank of Canada, Dept. of Insurance, Dept. of Finance and Dept. of Agriculture.

¹Monthly averages for years 1963 and 1964 differ from the averages of the monthly data due to revisions which cannot be allocated by months. ²Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over \$60,000 annually prior to January, 1964 and over \$100,000 annually since. ³United States and other foreign carriers. Excludes in transit passengers. ⁴Cargo includes air freight and express but excludes mail and excess baggage. ⁵Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18,000 lbs. ¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. Note: This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 34 companies operating in Canada representing 82 per cent of new ordinary insurance sales. ¹The Canada totals by months for 1963 and 1964 do not correspond to the sum of the provincial totals as revision applied to the national total are not yet available for the provinces. Neither the monthly figures for 1963 and 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. Sources: Monthly Survey of Life Insurance Sales in Canada, Life Insurance Agency Management Association, Hartford, Conn.

¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (excluding government-owned companies). ²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes agriculture, forestry, fishing and construction. Source: Corporation Profits (61-003), D.B.S.
