A NOTE TO USERS

MODIFICATIONS:

(1) The monthly and quarterly seasonally adjusted series on "Consumer Credit Outstanding" in Table 90 and Pages S-8 and S-9 have been revised for the entire period from 1952 to date.

The data now presented have been adjusted by the X-11 variant of the United States Bureau of the Census, Method II program.

Back records for the above series on the revised basis are available upon request.

(2) The data on "Exports of Skim Milk Powder" in Table 80 which had been erroneously reported in the previous two editions are amended in this issue. The complete back record is available in the D.B.S. publication "Trade of Canada, Exports" (Catalogue No. 65-004).

(3) The production and stock figures of evaporated milk in Table 81 have been changed. Data for the period not covered by the Review can be obtained from "Dairy Factory Production" (Catalogue No. 32-002) and "Stocks of Dairy and Poultry Products" (Catalogue No. 32-009), D.B.S.

NATIONAL ACCOUNTS, INCOME AND EXPENDITURE THIRD QUARTER 1966

Introductory Review

Gross National Product rose to a seasonally adjusted annual rate of \$57.7 billion in the third quarter of 1966, 3/4 of 1 per cent above the preceding period compared with a revised¹ change of 2 per cent from the first to second quarter. With prices increasing by 1 per cent in the third quarter, production in real terms was virtually unchanged.

With the data now available it is possible to suggest orders of magnitude for the year 1966 as a whole. If, for instance, there were no change other than the normal seasonal increase in the fourth quarter, the advance in Gross National Product from 1965 would be 10.1 per cent. Assuming, for example, a gain of 1 per cent in the fourth quarter, the advance would be 10.4 per cent.

Over-all demand was buoyant in the third quarter. The effect of sharp increases in personal and government spending, as well as in exports, was somewhat damped by a decline in investment in plant and equipment and new housing. With the value of production increasing only fractionally, partly owing to industrial disputes, the greater part of the \$2.0 billion rise in final demand was met from an increase in imports and from a sharp reduction in the accumulation of business inventories.

The value of personal expenditures on goods and services rose by over 3 per cent, the largest increase in the current expansion in both value and real terms. Approximately one-third of this increase resulted from a 30 per cent gain in spending on new cars, a gain which followed a sharp decline in new automobile purchases in the second quarter. Most of this increase in demand was met by a running down of the large stocks in the hands of motor vehicle dealers. Demand for other goods and services also rose significantly, contributing some \$700 million to the over-all increase of \$1,140 million in consumer spending. About 55 per cent of the \$700 million gain was attributable to expenditures on goods other than motor vehicles, while 45 per cent resulted from increased spending on services, where price increases were more pronounced than in goods.

Government expenditure on goods and services rose by 7 per cent between the second and third quarters with similar increases occurring at all levels of government. At the federal level there was a marked increase in official contributions between the second and third quarters, a large part of which represented wheat shipments to India. This rise in official contributions was reflected in similar increases in the three series, government expenditure, exports and imports.

¹ As a result of the incorporation of the November estimate of the 1966 crop, seasonally adjusted Gross National Product for the first quarter has been revised upwards by \$64 million. This revision has also been included in the changes made to the second quarter.

When this increase in foreign aid is removed from total exports and imports of goods and services, the increases were 2.5 per cent and 3 per cent respectively. The deficit in the external account² widened by about \$100 million at annual rates, with an increase in the deficit on non-merchandise trade partly offset by a rise in the merchandise surplus.

Business investment in plant and equipment declined by 2.5 percent between the second and third quarters with virtually all of the decrease accounted for by a 5 per cent decline in the value of new non-residential construction. Outlays on new housing also were down significantly by about 8 per cent, following small increases in the preceding two quarters.

In contrast to a \$1.3 billion accumulation in business inventories in the second quarter of 1966, the business sector's stocks increased by \$0.6 billion in the third quarter. Retail and wholesale trades were mainly responsible for this decline in the rate of inventory investment and, as previously mentioned, retail motor vehicle dealers showed a sharp liquidation in stocks.

Turning to the components of income, net national income, increasing at approximately the same rate as Gross National Product, reflected certain interesting and partially offsetting movements among the components. Labour income, profits and other investment income all were adversely affected by third quarter strikes, notably that of the railways. Labour income increased by about 2 per cent, maintaining the same rate of change as in the second quarter, while profits, which had shown little change since the third quarter of 1965, declined by nearly 8 per cent, with the declines widespread among the various industries and particularly in the transportation industry. Other investment income declined by 2 per cent, and net income of both unincorporated business and accrued farm income advanced by nearly 6 per cent.

Price Movements

As previously mentioned, the price component of Gross National Product advanced by 1 per cent in the third quarter, a slightly reduced rate from the rates of the preceding two quarters.

All major components shared in the price rise. The price component of personal expenditure, however, showed only a moderate increase, in contrast to the preceding two quarters. This was partly because of a decline in the rate of increase in food prices, and partly because of smaller increases in non-food goods prices, the latter having been affected in the second quarter by an increase in the Ontario sales tax.

² National Accounts basis.

THE VALUE OF G.N.P. INCREASED BY 0.7
PER CENT IN THE THIRD QUARTER.
IN REAL TERMS PRODUCTION
SHOWED VIRTUALLY NO CHANGE

SHARP INCREASES IN CONSUMER AND GOVERNMENT SPENDING WERE LARGELY OFFSET BY A PRONOUNCED DECREASE IN THE AMOUNT OF ACCUMULATION IN BUSINESS INVENTORIES COUPLED WITH A DECLINE IN BUSINESS FIXED CAPITAL SPENDING

BUSINESS SPENDING ON MACHINERY SHOWED NO CHANGE, WHILE SPENDING ON PLANT DECLINED BY 5 PER CENT AND NEW HOUSING BY 8 PER CENT

PERSONAL EXPENDITURE ON GOODS AND SERVICES ROSE STRONGLY WITH A SHARP INCREASE IN DURABLE GOODS REINFORCED BY INCREASES IN SPENDING ON NON-DURABLE GOODS AND SERVICES

ALL DATA SEASONALLY ADJUSTED, AT ANNUAL RATES

* NATIONAL ACCOUNTS BASIS

Prices of women's and children's clothing and footwear all increased by about 1 per cent, while prices of new automobiles declined by about one-half of 1 per cent, seasonality discounted.

Prices associated with services, many of which are generally thought of as labour intensive, increased by about 1 per cent, with changes in the components, i.e., user operated transportation, personal care and recreation increasing more than the average. The rent component increased by 0.8 per cent. From the fourth quarter of 1965, rents have

increased by 1.6 per cent in contrast to the increase of 0.6 per cent between the fourth quarter of 1964 and the third quarter of 1965.

The price component of business gross fixed capital formation advanced by 0.7 per cent, with machinery prices increasing by 1 per cent and construction prices by 0.7 per cent.

Export prices rose by about 1.5 per cent, reflecting price increases for commodities such as wheat, copper and newsprint.

(Base-weighted price index of Gross National Expenditure)	(1.2)	(1.5)	(1.0)

¹ The implicit price indexes in some quarters may not provide reasonable measures of price change as a result of marked quarter to quarter changes in expenditure patterns. Such was the case in the third quarter of 1966. The quarter to quarter changes noted in the table for the third quarter of 1966 are based on price indexes in which the effect of changes in expenditure has been discounted. For example, in the third quarter the sharp increase in consumer spending on new cars affected the price movements as shown by the implicit price indexes.

The Components of Demand

Consumer Expenditure

After a slight advance in the second quarter, personal expenditure surged upwards with an increase of 3.3 per cent—a record for the current expansion—to reach a level of \$35.3 billion seasonally adjusted at annual rates. In real terms, the gain was somewhat less, although it was also a record.

Personal income advanced by 3 per cent, but with personal direct taxes increasing by over 10 per cent, mainly as a result of increased tax rates, per-

sonal disposable income rose by only 2 per cent. With personal spending increasing at a greater rate than disposable income, saving in the personal sector declined by about \$350 million.

In the preceding quarter, a decline of 10.5 per cent in durables offset an increase of 2.5 per cent in non-durables, leaving total goods fractionally below the first quarter level. In contrast to the second quarter, this time a record 12.5 per cent advance reinforced a 2 per cent increase in non-durables to raise spending on goods by 4 per cent. Expenditures on services increased by 2.5 per cent.

In the durables category, the dominant item was new cars, spending on which increased by some 29 per cent above the low second quarter level. This sharp advance was accompanied by declines in 1966 model car prices. Purchases and trade-ins of used cars also rose strongly. Both furniture and home furnishings sales showed increases of between 4.5 and 5 per cent, after declines of more than 6 per cent last quarter, while purchases of appliances and radios rose almost 8 per cent; the introduction of colour television may have been a factor here.

Within non-durables, soaps and cleaning supplies and household supplies increased by 8 and 9 per cent respectively. Expenditures on fuel and natural gas registered declines of 6 and 8 per cent. Other non-durable components showed moderate increases. Food purchases rose by 2 per cent, of which one-third was price increase. Sales of total clothing including footwear increased by 3 per cent, electricity by 2 per cent, and drugs and cosmetics by 1 per cent. Expenditure on tobacco and alcoholic beverages rose by 2 and 1 per cent respectively. Fractional declines were shown by gasoline, auto parts and accessories, and stationery and books.

Increases among service components were also moderate. The extra revenue of Canadian air carriers as a result of the strike against five major American domestic airlines in July and August contributed to a rise in purchased transportation of more than 6 per cent above the second quarter level. An increase of about 3 per cent was shown by the personal care series, while household operations rose some 2.5 per cent. Shelter, which accounts for about 40 per cent of all spending on services, rose by about 2 per cent, as did personal services, medical care and financial and miscellaneous services.

Business Gross Fixed Capital Formation

Business spending on fixed capital, including housing, was about 3.5 per cent lower than in the second quarter at an adjusted annual rate of \$11,668 million. The drop of \$416 million was from a decline

in construction, with outlays on residential construction down \$184 million, and outlays on non-residential construction down \$228 million. Spending on machinery and equipment was maintained at almost the second quarter rate.

The value of housing put in place dropped 8 per cent to an annual rate of \$2,108 million. Housing starts dropped from 134,500 to 128,800 at adjusted annual rates, while completions fell from 175,400 to 168,400.

Units under construction in urban areas at the beginning of the third quarter totalled 83,100, at an adjusted annual rate, compared with 106,600 at the start of the second quarter.

The annual rate of non-residential construction activity slowed from \$4,812 to \$4,584 million after allowance for seasonal factors. Although a breakdown of this figure is not available, indications are that the decline was noticeable in both building and engineering-type construction work.

The estimate of outlays on machinery and equipment showed virtually no change from the second quarter. A rise in demand for imported non-farm machinery and equipment together with larger outlays for commercial vehicles was offset by a drop in domestic demand for farm machinery and non-farm domestic machinery.

Non-farm Business Inventories

The rate of investment in business inventories slackened appreciably in the third quarter of 1966 in contrast to the significant accumulation in the second quarter of 1966. Seasonally adjusted estimates show a stock increase of \$560 million at annual rates, compared with \$1,292 million in the previous quarter. The substantial drop in the rate of increase in the third quarter was spread among all the major industry groups except for non-durables within manufacturing. It was most notable in wholesale and retail trades. There was a significant liquidation in the stocks of motor vehicles at the retail level, reflecting strong sales.

Change in Non-farm Business Inventories
(Seasonally adjusted, at annual rates)

	1966		
	1 Q	2 Q	3 Q
millions of dollars			
Manufacturing			
Durables	432	460	388
Non-durables	436	336	180
Wholesale trade	- 4	124	208
Retail trade	- 88	372	36
Other industries	240	392	116
Grand totals	76	68	20
Grand totals	660	1,292	560

Among all major industry groups, the strongest accumulation was in manufacturing, contributing about 70 per cent to the total build-up of business holdings in the present quarter. The following table shows the value of physical change in non-farm business inventories by industry for the first three quarters of 1966.

Manufacturers' total stocks increased in the present quarter but at a lower rate when compared with the previous quarter. All the components of durables and non-durables showed stock accumulation, with the exception of the stocks of transportation, in durable goods, and the stocks of tobacco, in non-durable goods.

Increases in manufacturing stocks took place at all stages of production, the highest being in the stocks of goods-in-process. The stock-to-shipments ratio for manufacturing as a whole was higher when compared with the ratio of the previous quarter, because of the effect of stock accumulation coupled with a decline in shipments of close to 2 per cent.

Within retail trade, there was a build-up of stocks of all non-durable goods. A small increase in the stocks of all other durable goods was more than offset by a large liquidation in the stocks of

motor vehicle dealers leaving, on balance, a small accumulation at the total retail level. The stock-to-sales ratio for the industry as a whole was lower than the ratio of the previous quarter but was above the average ratio of the current economic expansion.

Modest increases were recorded in the stocks of wholesale traders. All the increase in the stocks of wholesalers was accounted for by durable goods. There were offsetting movements within non-durable goods. The stock-to-sales ratio for the industry as a whole was lower than the ratio of the previous quarter.

Exports and Imports of Goods and Services

The deficit in the external account,³ at an adjusted rate of \$1,092 million, was \$88 million higher than in the previous quarter. This increase resulted from a \$304 million rise in the non-merchandise trade deficit, that was partly offset by an improvement of \$216 million in the merchandise trade surplus. As previously mentioned, foreign aid had a marked effect, raising both the merchandise surplus, and the non-merchandise deficit, although, of course, the overall balance remained largely unaffected by this transaction.

Exports and Imports of Goods and Services¹
(Seasonally adjusted, at annual rates, in millions of dollars)

	Goods			Services			Current balance
	Exports	Imports	Net	Exports	Imports	Net	
1965 - 1Q	8,268	8,120	148	2,356	3,468	- 1,112	- 964
2Q	8,552	8,312	240	2,420	3,680	- 1,260	- 1,020
3Q	8,812	8,652	160	2,504	3,740	- 1,236	- 1,076
4Q	9,316	9,460	- 144	2,396	3,756	- 1,360	- 1,504

2Q 1966 to 3Q 1966 per cent change	5.4	3.3		1.7	8.9		

¹ Seasonally adjusted figures for 1965 and first quarter 1966 do not incorporate revisions to the original data made by the Balance of Payments Section as shown in DBS Catalogue No. 67-001 for the third quarter 1966. National Accounts figures do not include allowances for immigrants' or emigrants' funds and inheritances.

After allowance for seasonal factors, exports were higher for wheat, fish, newsprint, woodpulp, crude petroleum, copper, asbestos and zinc, while sales were lower for lumber, nickel, natural gas, iron ore and fertilizers. Data on commodity imports on a detailed basis are not available.

Country-of-origin trade figures show a drop from the second quarter in both exports to and imports from the United States. The increase in exports was primarily in markets other than the United States and the United Kingdom.

Larger deficits in the travel account, interest and dividend account, and particularly in the mis-

cellaneous service account (reflecting a sharp increase in official contributions) were the main elements in the change in non-merchandise trade.

Government Sector

Seasonally adjusted at annual rates, total expenditures of all governments combined (excluding inter-government transfers) increased by 5.5 per cent during the quarter. Total government revenues increased at a slower rate, just over 3 per cent, with the result that the surplus, on a National Accounts

³ National Accounts basis.

basis, declined from a rate of \$576 million in the second quarter to a rate of \$192 million in the third quarter.

Higher outlays which raised government expenditure to an annual rate of \$18,748 million were mainly due to a 7 per cent increase in expenditure on goods and services. This increase was mainly associated with higher international assistance payments at the federal level and an expansion in capital spending at the provincial-municipal level. The remainder of the increase in government spending resulted from higher subsidy payments at the provincial level and higher transfers to persons at the federal level. The introduction of new home owner property tax rebate programmes in Alberta and Saskatchewan, and increased payments in Manitoba accounted for most of the increase in subsidies. Increased outlays on unemployment insurance benefits and grants to universities were responsible for the increase in federal transfer payments.

Total combined revenue reached an annual rate of \$18,940 million in the third quarter, a rise of almost \$600 million from the preceding quarter. About three-quarters of the increase was attributable to higher personal tax receipts, particularly at the federal level. This sharp rise in federal personal income taxes from an unusually low rate in the second quarter was in part due to higher rates of tax effective June 1 1966, which were not reflected in tax receipts until the following month.

Revenue from indirect taxes rose by 2.5 per cent with most of the gain at the provincial level, and resulted both from an increased volume of transactions and from tax rate changes in a miscellaneous group of taxes in Newfoundland, Quebec and Ontario. Contributions to the Canada and Quebec Pension Plans continued at a high level and were responsible for the increase in employer and employee contributions.

Offsetting these increases somewhat were declines in corporation tax liabilities.

The Components of Income

Labour Income

Wages, salaries and supplementary labour income seasonally adjusted rose 2.1 per cent from the second to the third quarter.⁴ This change was similar to that recorded between the first and second quarters.

The goods-producing industries advanced 1.5 per cent, largely the result of a 2.5 per cent in-

* Estimates of labour income are usually the summation of monthly figures for the respective quarter. However, because of implementation of the new standard industrial classification, together with methodological changes affecting the monthly indicators, it was necessary to make the third quarter estimates on the basis of actual figures for the first two months and a projected figure for the third month.

crease in manufacturing wages and salaries. Construction wages and salaries declined by 1 per cent in the third quarter.

Seasonally adjusted wages and salaries for the service-producing industries were up 3 per cent. Government non-military wages and salaries showed a gain of 5.5 per cent in the third quarter with part of this increase attributable to retroactive wage payments made to both federal and provincial government employees. Trade advanced 2 per cent and the finance, insurance and real estate, and non-government service industries were up about 2.5 per cent. Transportation, communication and other utilities wages and salaries rose 2.5 per cent. This gain would have been approximately 3.5 per cent, had there not been a major industrial dispute in this industry.

Investment Income

Corporation profits (before taxes and before dividends paid to non-residents) declined almost 8 per cent in the third quarter to a level of \$4,916 million seasonally adjusted at annual rates. This movement followed a relatively stable level of profits in the preceding three quarters. It was the first large decline since the first quarter of 1961, and may have been affected to some degree by the work stoppages that took place during the quarter.

The decline was widespread among many industries. Within manufacturing the wood, paper, metal, electrical, and petroleum and coal industries showed large decreases. Some manufacturing industries increased their level of profits, notably food and beverages, printing and publishing and non-metallic minerals. However, profits of the manufacturing group in total declined by 13 per cent. Among the other industries, only retail trade showed increased profits, while profits in the utilities remained unchanged. Declines were registered in the mining, wholesale trade, transportation, finance and service industries.

Rent, interest and miscellaneous investment income declined on a seasonally adjusted basis by 2 per cent from the level of the second quarter. The decline was largely attributable to trading profits of federal government enterprises which were down by \$96 million at annual rates. This change was influenced by the nationwide rail strike that occurred during the quarter. Time lost in the entire transportation industry rose to 319,400 man-working days in August alone compared to 206,700 man-working days for the full year 1965.

Non-farm Unincorporated Business

Net income of non-farm unincorporated business increased by 6 per cent in the third quarter to \$3,032 million at seasonally adjusted annual rates. Retail trade was mainly responsible for the increase, rising sharply over the second quarter figure. This gain in trade was partly offset by a decline of over 10 per cent in the construction industry.

Accrued Net Income of Farm Operators

Accrued net income of farm operators at seasonally adjusted rates increased to \$2,412 million, a rise of 5.5 per cent over the second quarter.

The changes in the value of grain and livestock production showed offsetting movements. While the value of grain production rose, largely as a result of the higher profits of the Canadian Wheat Board, the value of livestock production fell on account of lower marketings. Cash income from all other farm products was up sharply, notably dairy products, rapeseed and vegetables.

Production by Industry

Seasonally adjusted Real Domestic Product less agriculture for the third quarter of 1966 showed no change from the previous quarter, as a result of the one per cent increase in the service-producing industry group being offset by a decline of equal magnitude in the output of the goods-producing industry group.

Among the goods-producing industries, declines ranging from about 3 to 7.5 per cent were recorded in mining, construction and forestry. Manufacturing

increased fractionally from its second quarter level, as a result of the recovery of its durable manufacturing component from a marginal decline in the second quarter. Movements within non-durables were mixed and largely offsetting. Electric power and gas utilities increased by about 2 per cent.

Among the service-producing industries, all but one of the major industry groups showed increases in the second quarter, ranging from about one per cent in community, recreation, business and personal services to 2.5 per cent in trade.

The only decline within the service-producing group was recorded in transportation. This was almost entirely the result of a drop in the output of the strike-affected railway transport industry.

Trade was the largest contributor to the third quarter gain, accounting for about three-quarters of the advance in service-industry output. Within trade, the 3 per cent increase at the retail level accounted for the larger part of the increase in the third quarter, while wholesale trade showed a more moderate increase of just over one per cent.

FIRST NINE MONTHS 1966

Introductory Review

For the first nine months of 1966, Gross National Product advanced 11.3 per cent over the same period in the preceding year. Although this 11.3 rate of advance in the value of GNP was higher than the 9.7 per cent recorded in the full year 1965, in real terms the increases were 6.6 per cent for both periods because of some acceleration in the rate of price rise. Within the year 1966, quarter-to-quarter increases in Gross National Product have become successively smaller, ranging from the unusually strong first quarter advance of 4.5 per cent to the current advance of 0.7 per cent.

Turning again to the nine-month comparison, final demand increased at a slightly greater rate than did the value of production, and as a consequence there was an advance in imports of over 14 per cent. The strength in demand was broadly based, extending to all categories other than new housing which increased by only 4.5 per cent. In contrast to this, business expenditures on plant and equipment rose by 19 per cent, exports 17 per cent, government expenditures 15 per cent, and consumer spending 9 per cent.

Advances in the income components were more diverse with labour income increasing by 13 per cent, while profits showed virtually no change.

Accrued net farm income rose by 43 per cent, while net income of the unincorporated business sector increased by only 3 per cent.

Price Movements

The price component of Gross National Product advanced by 4.4 per cent in the first nine months of 1966 compared with the like period of 1965. The annual change from 1964 to 1965 was 2.9 per cent. In most cases price advances in the first nine months of 1966 were greater than those in 1965.

With the exception of durable goods, all major categories of personal expenditure showed an acceleration in the rate of price increase. Food prices rose by nearly 7 per cent so that the advance of 8 per cent in value of food expenditures was reduced to 1.5 per cent in real terms. Prices of goods other than food increased by only 1.5 per cent, with the durable goods component declining by half of 1 per cent. Service prices advanced by 3.5 per cent compared with 3 per cent in the previous year.

Prices associated with business fixed capital formation showed less of an increase in 1966 than in the preceding year, largely due to the machinery and equipment component which increased by 1.5 per cent in 1966 compared with the 2.5 per cent rise in 1965. Construction prices⁵ advanced by 5 per cent in the first nine months of 1966, compared with an annual increase of 5.5 per cent in the preceding year.

⁵ The price components of construction do not take account of changes in productivity or in profit margins. If profit margins increased in 1966, these indexes would understate price change.

The price components of exports and imports rose by 3.5 and 2 per cent respectively, in contrast with changes of 1 per cent in exports and half of 1 per cent in imports in the preceding year.

Personal Expenditure

Consumer expenditure for the first three quarters of 1966 was almost 9 per cent higher than for the corresponding period of 1965, and almost 1 per

cent above the rate of increase for 1965 as a whole. With prices rising by somewhat more in 1966 than in 1965, the advances in personal spending in real terms were 6 per cent in 1965 as a whole and 5.5 per cent in the first three quarters of 1966. For the first nine months of 1966 spending on non-durable goods and services increased by 10 and 9 per cent respectively while spending on durable goods rose by 5 per cent. In real terms, however, the increases in all major categories were around 5.5 per cent.

Per Cent Change — Value, Volume and Price

	1965 1964			9 months 1966 9 months 1965

Total final demand	9.2	6.4	2.6	12.3	8.1	4.0
Imports	12.6	12.1	0.4	14.3	12.2	1.8
Gross National Expenditure	9.7	6.6	2.9	11.3	6.6	4.4

The following table shows the pattern of increases in consumer expenditure in the first three quarters of this year compared with the same period

of 1965 in relation to the changes between full years 1964 and 1965.

	Per cent change in year 1964 to year 1965	Per cent change in 3 quarters 1965 to 3 quarters 1966
Total non-durable goods	7.3	9.9
Food	5.8	8.5
Tobacco	8.2	6.4
Clothing	5.9	6.3
Other	10.1	14.4
Total durable goods	11.4	5.0
Autos, new and used	14.2	1.2
Household durables	7.9	9.8
Other	9.8	9.3
Total all goods	8.1	8.8
Total services	8.1	9.0
Total consumer expenditure	8.1	8.9

Business Gross Fixed Capital Formation

Business spending on fixed capital, including housing, was 16 per cent higher than the three quarters of 1965. The rise in business fixed capital spending on plant and equipment was 19 per cent. The latter figure of 19 per cent is higher than the 16 per cent increase in investment intentions for the full year as contained in the March report⁶, but lower than the 23 per cent increase in investment intentions recorded in the mid-year survey⁷. The main element of strength recorded in the National Accounts projectors was the demand for non-residential construction, which was 23 per cent higher than the comparable period of last year. Spending on machinery and equipment was up 15.5 per cent. New residential construction increased by only 4.5 per cent. Although industrial detail is not available, the mid-year survey suggested that the main strength was centred in such manufacturing industries as food and beverages, paper, primary metals and transportation equipment; and in such utilities as electric power, railway transport, telephones, air transport, and oil and gas pipelines.

⁶ DBS Catalogue No. 61-205.

⁷ DBS Catalogue No. 61-206.

Exports and Imports of Goods and Services

During the first three quarters of 1966, the deficit in the external account on a National Accounts basis narrowed somewhat from what it was in the same period in 1965.

This change resulted from an improvement of about \$240 million in merchandise trade surplus, partially offset by an increase of \$185 million in the deficit on non-merchandise trade.

Trade of Canada figures, DBS Catalogue Nos. 65-002 and 65-005 for eight months provide information on the various components of merchandise trade. Notable increases among the export categories were wheat, up nearly 50 per cent, pulp, paper, etc., up 11 per cent, metals and metal products, up 10 per cent, and motor vehicles up a striking 240 per cent or \$205 million. In merchandise imports, machinery and equipment other than motor vehicles rose 24 per cent, responding to strong demand by business for capital goods.

There was little change in the freight and shipping account balance between 1965 and 1966. However, other service account balances deteriorated, particularly interest and dividends, official contributions, and travel.

Merchandise Trade

¹ The figures here do not exactly correspond to the data included in Table 8 of this report because they include the revisions made to the data by the Balance of Payments Section and published in DBS Catalogue No. 67-001. They exclude, however, migrants' funds and inheritances.

Government Sector

Reflecting the continuing high levels of income and employment, total revenues of all governments combined, excluding inter-governmental transfers, increased by 14 per cent, or \$1,714 million, in the first nine months of 1966 compared with the same period of 1965. Over \$500 million of the increase in government revenues was due to employer and employee contributions to the Canada and Quebec Pension Plans which began operations in January 1966. Receipts from indirect taxes rose sharply and accounted for over one-third of the gain in absolute terms. Federal indirect tax revenues rose almost 12 per cent, attributable to higher returns from customs duties and excise taxes. The increase in provincial-municipal revenues reflected mainly gains in sales and gasoline taxes, associated in part with higher tax rates in Ontario and extended tax bases in Ontario and Saskatchewan, as well as increased real property tax revenues.

Much of the rest of the gain in total revenues occurred in personal direct taxes which rose by 11.5 per cent. This rate of increase was much higher at the provincial-municipal level, where personal income tax receipts rose by about 25 per cent, than at the federal level where the increase was 6 per cent. The differing rates of increase were, in part, caused by changes in the federal tax rates which occurred in July 1965 and June 1966 and a further abatement of three percentage points of basic income tax in favour of the provinces, on January 1, 1966.

Total expenditures of all governments rose by 12.5 per cent, with most of the increase accounted for by higher outlays on goods and services and transfer payments to persons. Increases in expenditures on goods and services occurred at all levels of government and were in general the result of higher outlays on capital goods and salaries and wages. At the federal level, there was also a marked increase in international assistance payments.

Transfer payments to persons increased by about \$300 million. Two-thirds of the increase was at the provincial-municipal level and was caused by larger grants to hospitals and educational institutions. The gain at the federal level reflected the lowering of the age limit for old age security payments.

With total revenues exceeding total expenditures in the first nine months of 1966, the surplus, on a National Accounts basis, increased by over \$200 million to a level of \$220 million. The improvement in the surplus position resulted from contributions to the Canada and Quebec Pension Plans. Exclusive of these pension plans, at the federal level, the surplus fell from \$229 million in the first three quarters of 1965 to \$19 million in the first three quarters of 1966 and at the provincial-municipal level the deficit widened from \$225 million to \$332 million.

Labour Income

Reflecting increases in remuneration of approximately 6 per cent and continuing increases in employment, wages and salaries in the first three quarters of 1966 were 13 per cent higher than in the corresponding period of 1965.

The goods-producing industries advanced sharply, by about 14.5 per cent. The gains were concentrated in the manufacturing industries, which increased by over 12 per cent, and the construction industry, where the increase was about 28 per cent.

The service-producing industries increased by 11 per cent, somewhat less than the goods-producing industries. The industry increases ranged from 11 to 14 per cent with the exception of the finance and insurance group and the transportation, storage and communication group, the latter having been affected by a major strike in 1966.

Investment Income

The level of corporation profits for the first three quarters of 1966 was virtually unchanged from the same period of the previous year. Significant movements took place within these periods as the level of profits was increasing in the second and third quarters of 1965, while it was declining in the second and third quarters of 1966.

As usual, the movements of profits by industry over the nine-month period were mixed. Declines in excess of 10 per cent were registered by the textile, paper and transportation equipment industries. Most of the other industries showed moderate gains.

During the same period, corporate capital consumption allowances increased by almost 10 per cent, with the result that the level of earnings before provision for capital consumption showed an increase of 4 per cent.

Rent, interest and miscellaneous investment income for the first three quarters of 1966 increased by 9 per cent over the corresponding period of 1965. Trading profits of government enterprises were affected by strikes, particularly in transportation, and moved up by 5 per cent over the nine months.

Accrued Net Income of Farm Operators

Accrued net income of farm operators in the first three quarters of 1966 increased 43 per cent over the corresponding period of 1965.

The increase can be attributed to all components of farm production. The value of grain production increased largely as a result of the record

high level of the 1966 crop, while increased prices for cattle and hogs contributed to the rise in livestock income.

Non-farm Unincorporated Business

During the first three quarters of 1966, net income of non-farm unincorporated business rose by 2.5 per cent over the same period of last year.

The service industries were mainly responsible for the increase which was partly offset by a 2 per cent decline in retail trade.

Production by Industry

Real Domestic Product less agriculture for the first nine months of 1966 was 6.5 per cent higher than in the corresponding period of 1965. About 40 per cent of this gain came from the 8 per cent advance in manufacturing, with both the non-durable and the durable manufacturing components contributing about equally to the increase. Trade and the transportation, storage and communication group contributed another 21 per cent to the increase in non-agricultural real output. The largest increase was recorded by electric power and gas utilities which advanced by over 13 per cent. Among other industry groups to show strong gains in 1966 were construction and transportation, up by 7.5 and 8 per cent, respectively. Increases ranging from 4.5 to 6.5 per cent occurred in forestry, trade, finance, insurance and real estate, the community, recreation, business and personal service group and in mining. Public administration and defence advanced by 2 per cent.

LABOUR FORCE (More detail in Table 19)

Employment and total labour force were fractionally lower in November while the unemployment rate increased to 3.7 per cent.

INDUSTRIAL PRODUCTION (More detail in Table 16)

The index of industrial production rose by 1.0 per cent in October, principally as a result of increases in mining and manufacturing offset in part by a 1.4% decline in electric power and gas utilities.

	total industrial production (1949=100)	manufacturing (1949=100)			(1949=100)

INCOME, EARNINGS AND HOURS (More detail in Tables 18, 34 and 35)

Total labour income continued to rise in August.

Average hourly earnings in manufacturing were \$2.27 in August, an increase of 2 cents from the preceding month.

The average workweek was 40.9 hours in August with the increase being reflected entirely in the non-durable goods component.

CONSTRUCTION (More detail in Tables 67, 72 and 73)

Total value of building permits fell off in October as a result of a sharp drop in the residential sector.
 Housing starts decreased sharply in November and completions picked up perceptibly following the low levels of the previous two months.

	value of building permits			new dwelling construction, centres 5,000 and over		
	total	non-residential		starts, total	completions, total	under construction thousand units, end of month

EXPORTS AND IMPORTS (More detail in Tables 91 and 92)

Total exports increased in October, mainly attributable to higher exports to the United States.
 Total imports were higher in October due principally to increases to United States and "all other countries".

¹Total of all series available monthly as in column 10, Table 90.

SELECTED QUARTERLY SERIES (More detail in Tables 7, 11, 69, 70, 71, 75, 90 and 104)

The value of Gross National Product, at \$57.7 billion, increased by 0.7 per cent in the third quarter. In real terms, production showed virtually no change.

Corporation profits (before taxes) registered a 7.6% drop in the third quarter.

						consumer credit outstanding ¹ (end of quarter)	dwelling units, all centres			commercial failures number

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 113. ³Total of all monthly and quarterly series as in column 14, Table 90. ⁴Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale index remained stable in November.

The index of thirty industrial materials continued its downward trend in November.

The consumer price index rose by 0.1% to 145.5 in November, as increases in durables, non-durables and services were almost entirely wiped out by a 0.6% decline in the food component.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series.

²Includes residual error of estimate. Source at bottom of Table 12.

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. ²The labour force as a percentage of the population 14 years of age and over. ³The unemployed as a percentage of the labour force. Source: Labour Force Bulletin, (71-001), D.B.S.

¹See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. ²Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. Source: The Labour Force, (71-001) D.B.S.

¹The unemployed as a percentage of the labour force for each region. Due to weighting differences, a simple average of the regional rates will not give the seasonally adjusted Canada rate on page S-1, nor the unadjusted Canada rate in table 19. Source: The Labour Force, (71-001) D.B.S.

Table 25: not in the labour force by region¹ (thousands of persons)

¹The data for the current year are subject to revision. ²Includes gold. ³Consists of general wholesale index less animal products and vegetable products component groups. ⁴Consists of iron products and non-ferrous metals products component groups less gold. ⁵These two series comprise the general wholesale index.

^aExcludes gold. Source: Prices and Price Indexes (62-002), D.B.S.

¹Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. ¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total manufacturing inventory owned by manufacturers including warehouse stocks. ³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ⁴End of period. Annual figures for inventories and unfilled orders are end of December values. ⁵Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

¹Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

²100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports. ³Customs exports. ⁴Mill shipments destined for export. ⁵Sources: Pulpwood Production (25-001), Trade of Canada, Exports (65-004), D. B. S; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.

¹Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils.

Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. ⁴Excluding shipments for re-processing at maker's own plant.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field and processing plants less field flared and waste, Canadian sources only. ⁴By gas utilities, Canadian sources only. Sources: Crude Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D. B. S.

¹Barrels of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. ³Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. ⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns. ⁶Includes stave oil, kerosene and tractor fuel. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. ⁹Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. Source: Refined Petroleum Products (45-004), D.B.S.

¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 5,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

²End of period. Source: New Residential Construction (64-002), D.B.S.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected.

²Planks and boards, flooring and square timber.

³Hollow blocks including fireproofing and load-bearing tile.

⁴For building insulation only.

⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada.

⁶Factory sales of firms which normally account for 96% of total Canadian production.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), D.B.S.

¹These indexes are available for January, April and August only. ²Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. ³Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. ⁴Barley No. 1 feed; hogs grade "B" alive. ⁵Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. ⁶Quotations refer to steers of all weights. ⁷Grade "B1" hogs. Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.

¹Monthly averages for 1964 and 1965 may differ from the averages of the monthly data due to revisions which cannot be allocated by months. ²Data in this table refer to class I and class 2 carriers which are railways with gross annual operating revenues of \$500,000 or over. ³Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. ⁴Includes traffic interchanged between Canadian railways. Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, D.B.S.

¹Includes Class I and Class II carriers only. These are trucking firms having \$100,000 or more gross annual operating revenues. ²Includes Class I carriers only. These are carriers having \$100,000 or more gross annual revenues primarily from inter-city and rural bus operations. ³Regular and chartered services are included. Revised figures to December 1963 only. ⁴Includes Class I carriers only. These are carriers having \$100,000 or more gross annual revenues primarily from urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Revised figures to December 1963 only. Sources: Motor Carriers-Freight, Quarterly (53-005), Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, D.B.S.

¹Monthly averages for years 1964 and 1965 differ from the averages of the monthly data due to revisions which cannot be allocated by months. ²Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over \$60,000 annually prior to January, 1964 and over \$100,000 annually since. ³United States and other foreign carriers. Excludes in transit passengers. ⁴Cargo includes air freight and express but excludes mail and excess baggage. ⁵Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18,000 lbs.

¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. ¹Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimates projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. ²The monthly Canada totals for 1964 do not correspond to the sum of the provincial totals, as revisions applied to the notional total are not yet available for the provinces. Neither the monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. ³Total new settled-for ordinary sales in Canada.

⁴Under new or amended contracts.

¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (excluding government-owned companies). ²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes agriculture, forestry, fishing and construction. Source: Corporation Profits (61-003), D.B.S.

¹The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. ²Stocks included in the mining index are for producing mines. ³Combines the industrials, utilities and finance common stocks. ⁴Stocks included in Industrial mines are for companies whose operations include smelting and refining. *The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. Includes also the machinery industries (except electrical machinery) and the transportation equipment industries.

Note: Some of the current statistics in this table are not entirely comparable to the corresponding figures of previous years due to transfers of duties which took place during the current year and which have not been adjusted.

¹This statement does not include any disbursements other than regular budgetary expenditures. Excluded, for example, are all government outlays arising from increases in loans, advances and investments. ²Expenditures for administration applicable to the Treasury Board have not been transferred from Finance.

³Under the Technical and Vocational Training Assistance Act. ⁴Government contributions under the Hospital Insurance and Diagnostic Services Act. ⁵Includes treatment and rehabilitation services.
