**NATIONAL ACCOUNTS, INCOME AND EXPENDITURE
SECOND QUARTER, 1967**

Introductory Review

Gross National Product in the second quarter reached a level of \$61.5 billion, seasonally adjusted at annual rates, an increase of 2.2 per cent from the first quarter. With prices rising, this advance represented a gain of close to 1 per cent in real terms.

Although the rise in the current value of GNP roughly matches the average increase in three of the four preceding quarters, the advance in constant dollars compares less favourably.

At over \$2 billion, the increase in total demand (GNE plus imports) was the largest in five quarters; components of demand displayed wide fluctuations. On the income side the factors of production con-

tributed fairly evenly to the domestic portion of this increase; this was strongly reinforced by supplies coming from abroad. Although its effect cannot be fully evaluated in quantitative terms, centennial celebrations and in particular EXPO had a pervasive effect on the economy.

In absolute terms, seasonally adjusted, the main strength in demand came about equally from the government sector and persons. Expenditures on new residential construction increased sharply after three quarters of decline. Exports continued to advance with a gain of nearly \$700 million, following a \$1 billion advance in the first quarter. Offsetting these increases were declines in business construction and machinery and equipment, while investment in non-farm inventories added very little to overall demand.

Percentage Change from Preceding Quarter
(Seasonally adjusted data)

	1966				1967	
	1Q	2Q	3Q	4Q	1Q	2Q
GNP current	\$ 4.5	2.0	0.5	2.2	1.8	2.2
GNE constant	\$ 2.7	1.0	- 0.7	1.3	0.5	0.8
Price (implicit).....	1.8	1.0	1.2	0.9	1.3	1.4

The \$800 million increase in personal expenditure was widely shared. Aided by a 14 per cent rise in new car purchases — only the second increase in the last seven quarters — durables reversed the decline of the two previous quarters and advanced by 6½ per cent, while many other items also increased substantially. A 22 per cent increase in outlays for new residential construction added some \$432 million to demand; significantly affecting this rise was a special inflow of mortgage funds. This offset the declines of the last three quarters and restored expenditures to the level of a year ago. However, the availability of mortgage funds is decreasing, and housing starts in urban areas have been declining from the high point in May. The rate of investment in machinery and equipment declined for only the third time since 1961; a contributing factor to the lower value of investment was the reduction in April and the elimination in June of the sales tax on production machinery.

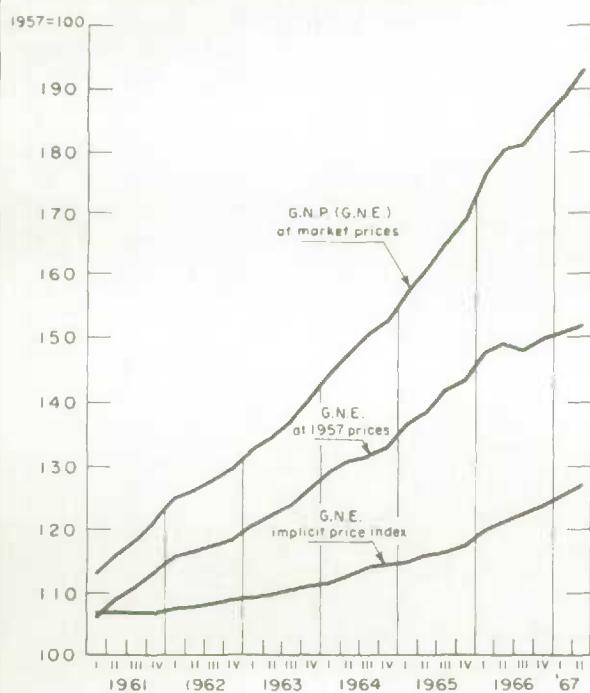

After a sizeable cut-back in the rate of accumulation in the first quarter, the rate of investment in non-farm business inventories showed virtually no change. Unlike the situation in the United States, where a substantial decline in the rate of accumula-

tion took place in the last two quarters, in Canada this process was spread more evenly over the last four quarters.

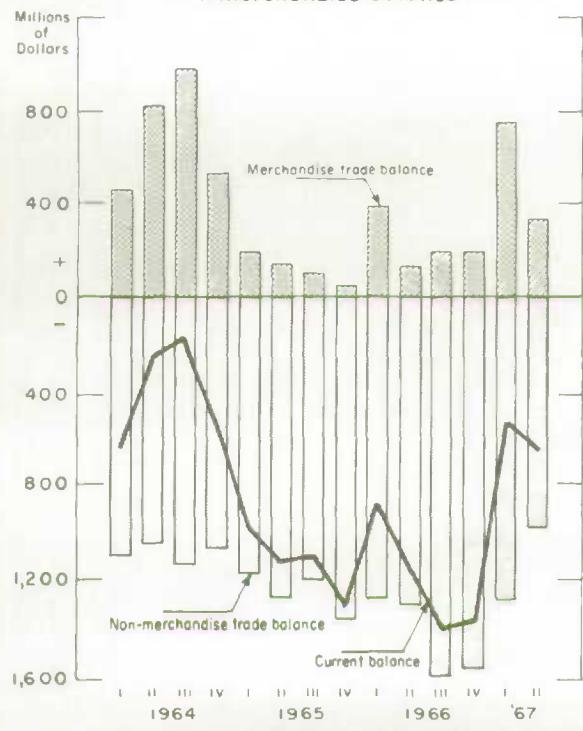

The deficit on current account widened somewhat as the largest increase in imports in the expansion more than offset a considerable rise in exports. The gain in the exports was more than fully accounted for by a net gain in the travel account of \$800 million, while the surplus on merchandise account declined by over \$400 million as exports increased only fractionally from the exceptionally high levels of the first quarter.

On the income side, labour income increased by less than 2 per cent — the smallest quarterly gain since the fourth quarter of 1964. The trend of the previous quarter continued with small payroll increases in the goods-producing industries compared with the service industries. Most of the gain in employment was absorbed by the service sector; employment in goods-producing industries actually declined. Seasonally adjusted unemployment rates showed month-to-month increases in May and June but declined in both July and August. Corporation profits increased some 5½ per cent from the low first quarter level, but remained significantly below the level of the first half of last year.

G.N.P. rose 2.2 per cent in the second quarter.
In real terms the advance was close to 1 per cent.

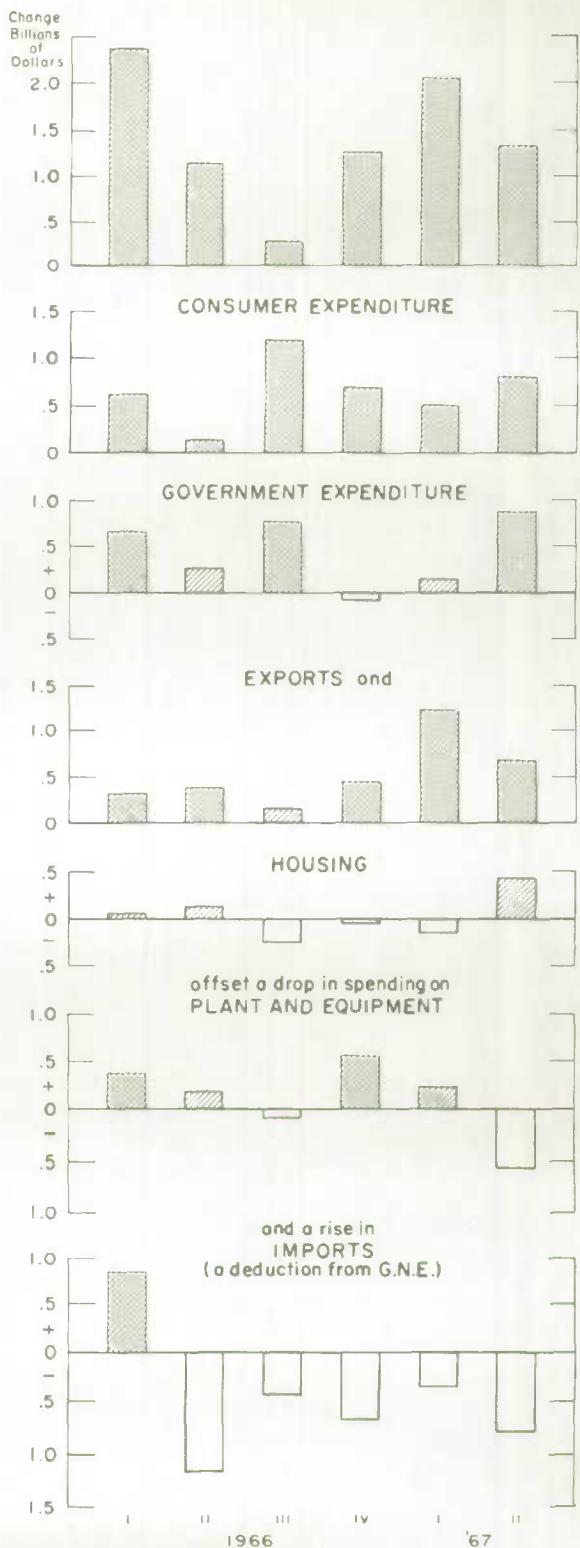

CURRENT ACCOUNT deficit increased as an improvement of \$300 million in service balance less than offset a drop of \$424 million in merchandise balance

ALL DATA SEASONALLY ADJUSTED, AT ANNUAL RATES

G.N.E. in current dollars rose \$1.3 billion in the second quarter as increases in

Price Movements

The implicit price index of gross national expenditure rose 1.4 per cent from the first quarter.

Seasonally adjusted food prices, which fell 1.2 per cent in the first quarter, declined fractionally this quarter; they were about 0.8 per cent below their level of the second quarter of 1966. Some increase occurred in miscellaneous meats, vegetables, and fish, but these were more than offset by price decreases in beef, eggs, pork, and poultry.

Non-food commodities showed an overall price increase of more than 1 per cent. This was partly a reflection of changes in sales tax. Tax increases in Quebec and in Newfoundland from 6 to 8 per cent and 5 to 6 per cent respectively affected the entire quarter, while a 5 per cent sales tax was introduced in Manitoba effective June first. Within non-durables, prices for men's clothing, footwear, and newspapers and magazines all increased by about 2 per cent on a seasonally adjusted basis. Electricity showed a sharp 10 per cent increase owing mainly to higher rates in Quebec and British Columbia. Price increase in durable goods was more moderate than in non-durables. Increases were relatively large in

home furnishings, jewellery, and furniture, all of which increased by more than 1 per cent. A one-half per cent increase occurred in the seasonally adjusted price of cars.

Nearly all items contributed to the 2½ per cent rise in service prices. Purchased transportation, education, and recreation rose by more than 3 per cent; a similar increase in medical care was largely the result of rises in the fees charged by medical practitioners and dentists.

The implicit price index for business gross fixed capital formation declined fractionally, the net effect of an upward movement in construction prices and a fall in the prices of machinery and equipment. Price increases in residential and non-residential construction reflected higher costs—mostly in labour, but also in materials. The 2½ per cent decline in seasonally adjusted machinery prices was largely due to changes in the federal sales tax on production machinery, which was lowered from 11 to 6 per cent in April and eliminated in June.

The following table summarizes the price changes outlined above.

Implicit Prices Indexes — Percentage Change from the Preceding Quarter
(Based on seasonally adjusted data)

	1966				1967	
	I	II	III	IV	I	II

	1.3	1.6	1.3	1.1	0.8	1.2

¹ The implicit price indexes in some quarters may not provide reasonable measures of price change as a result of marked quarter-to-quarter changes in expenditure patterns. Such was the case notably in the third quarter of 1966. The quarter-to-quarter changes footnoted in the table are based on price indexes in which the effect of changes in expenditure patterns has been discounted.

² Changes in this component for the first and second quarters of 1967 are not necessarily analytically significant.

The Components of Demand

Personal Expenditure on Consumer Goods and Services

Total personal expenditure reached a level of \$37.3 billion, seasonally adjusted at annual rates, an increase of more than 2 per cent from the first quarter as compared with a little less than 1½ per cent advance in the previous quarter. It should be noted that this total does not include the surge of expenditure made by foreign tourists coincident with EXPO 67 and centennial celebrations.¹

¹ Personal expenditure on consumer goods and services is a measure of all expenditures by Canadian residents, including those temporarily abroad. Since measures of the value of outlays on consumer goods and services in Canada are derived from sales made within the territorial boundaries of Canada, the values must be adjusted to include expenditures abroad by Canadian residents and to exclude outlays in Canada by non-residents. This adjustment is called **Net expenditure abroad**.

Net expenditure abroad is composed of outlays on both commodities and services. As it is impossible to determine these elements in the net figures, the whole adjustment has traditionally been included with services. The item is generally small and does not significantly distort quarter-to-quarter comparisons of either aggregates or individual series. However, with the exceptional influx of tourists occurring in the second quarter of 1967, the adjustment to exclude purchases by non-residents has become large, distorting the analytical continuity of the Services series. The values of net expenditure abroad and the values of services excluding net expenditure abroad for the last six quarters are shown in the table below (in millions of dollars and seasonally adjusted at annual rates):

	1 Q'66	2 Q'66	3 Q'66
Services including NEA.....	13,384	13,556	13,892
Services excluding NEA	13,268	13,488	13,772
Net expenditure abroad	116	68	120
	4 Q'66	1 Q'67	2 Q'67
Services including NEA	14,200	14,580	14,476
Services excluding NEA	14,104	14,512	15,108
Net expenditure abroad	96	68	- 632

The following table indicates the impact of this item on total personal expenditure in Canada.

Almost all components of the non-durables category showed increases from the previous quarter. The largest increase occurred in expenditures on energy sources (fuel, electricity, gas) which rose by 7½ per cent. The clothing category increased by 5 per cent. Within this category men's clothing showed the strongest gain, while women's and children's clothing advanced more moderately. Expenditures on tobacco increased by 4½ per cent and on alcoholic beverages by 6 per cent. The food category rose by 2 per cent, while food prices decreased slightly. Spending for gasoline, oil and grease increased fractionally, declined 1 per cent for auto parts and accessories, and rose 3½ per cent for household non-durables.

The dominant feature of the 6½ per cent gain in durables was a 14 per cent increase in expenditures on new automobiles. A parallel increase in trade-ins coupled with a small decline in used car purchases resulted in a large decline in the net value of used cars purchased; taken together, expenditures on new and used autos rose by 9 per cent. Furniture showed an 11 per cent gain as against a 3 per cent decline last quarter, while appliances and radios rose by 4 per cent and home furnishings registered a second successive 4½ per cent increase. Jewellery purchases rose by 5½ per cent.

The 4 per cent increase in services inclusive of non-resident spending was largely centered in the three components significantly affected by EXPO. Sharpest was the 25½ per cent gain in recreation expenditures, but notable also were the 9½ per cent increase in purchased transportation (the revenues of urban transit facilities in Quebec in May and June were almost double those for the corresponding period in 1966) and the 4½ per cent increase in miscellaneous services, which includes accommodations in hotels and motels. Gains of 2 to 2½ per cent were made in user-operated transportation, household operations, and medical care; personal services rose by 1 per cent. The shelter component, accounting for nearly 40 per cent of the value of services, increased by one half of 1 per cent.

	Millions of dollars, seasonally adjusted, at annual rates				
	4 Q '66	1 Q'67	2 Q'67	Change	
				4 Q to 1 Q	1 Q to 2 Q
Non-durables	17,520	17,740	18,372	220	632
Durables	4,268	4,168	4,440	- 100	272
Services (excluding NEA)	14,104	14,512	15,108	408	596
Total personal expenditure in Canada	35,892	36,420	37,920	528	1,500
Net expenditure abroad (NEA)	96	68	- 632	- 28	- 700
Personal expenditure on consumer goods and services	35,988	36,488	37,288	500	800

A 2 per cent increase in personal income, together with a 6½ per cent decline in personal direct taxes, a largely irregular effect resulting from later than usual income tax refunds, produced a 3 per cent rise in personal disposable income and permitted both a 2 per cent advance in personal expenditure and nearly half a billion dollar increase in personal net saving.

Business Gross Fixed Capital Formation

Gross fixed capital formation in the second quarter was running at a seasonally adjusted annual rate of \$12.5 billion, some 1 per cent lower than in the first quarter, as increased outlays for housing failed to offset lower expenditures for new plant and equipment.

Expenditures for residential construction rose by 22 per cent between the first and second quarters of 1967. Housing starts, seasonally adjusted and at annual rates, jumped by 76,600 units to a record level of 198,200 units. Housing completions climbed 19,300 units to a level of 136,900 units.

Starts in urban areas dropped from 98,000 units, seasonally adjusted, in January to 92,600 in February, then rose in each of the next three months to a peak of 171,400 units in May. They showed little change in June and then slipped to 151,000 in July.

According to the mid-year review of investment intentions, spending on new housing was expected to reach \$2.26 billion, raising housing starts to above the 134,000 of last year. Because of the

reduced carryover of incomplete houses into 1967, the number of units completed was expected to be considerably less than the 162,000 last year.

Business outlays on plant and equipment dropped 5.1 per cent between the first and second quarters. Non-residential construction expenditures declined by 5.7 per cent, and outlays for machinery and equipment by 4.5 per cent. Both domestic shipments and imports of producers' non-farm durable goods (other than transportation equipment) dropped in the second quarter. A special factor in the second quarter was the tax change relating to production machinery and equipment. This accounted for about half of the decrease in value of investment in machinery and equipment; in constant dollars the decline was about 2 per cent.

In the first six months of 1967, business outlays for plant and equipment at \$10.4 billion were very close to the mid-year investment intentions figure of \$10.3 billion.

Non-farm Business Inventories

As in the first quarter, investment in non-farm business inventories contributed very little to the level of economic activity in the second quarter of 1967. Investment in inventories at a seasonally adjusted annual rate was \$184 million. From the following table it may be noted that although stocks of manufacturing industries increased, stocks of retailers declined while stocks of wholesalers remained virtually unchanged.

Value of Physical Change in Non-farm Business Inventories

(Seasonally adjusted at annual rates)

	1 Q '67	2 Q '67
	millions of dollars	
Manufacturing		
Durables	40	248
Non-durables	88	132
- 48		116
Wholesale	124	12
Retail	108	- 88
"Other" industries	- 96	12
Grand totals	176	184

Among manufacturing industries, though the accumulation was almost equal at the total level between durable and non-durable goods-producing industries, the change in the rate of increase from the previous quarter was much more pronounced in non-durables, where a shift from liquidation to accumulation took place. A small liquidation in the stocks of electrical and non-metallic industries was more than offset by a general increase in the stocks of other durable goods industries. Among the non-durable goods industries, significant increases

in the food, tobacco and petroleum industries handsomely counterbalanced the liquidation which occurred in the stocks of paper and rubber industries.

Classified by level of processing, manufacturing stocks increased at all levels but more evidently in finished goods. With shipments being higher than new orders, the quarter ended with a lower backlog of unfilled orders. The ratio of total stocks-to-shipment was below that of the preceding quarter, but above the average of the past six years.

Stocks of retail trades of both durable and non-durable lines were lower at the total level, partly as a result of a notable increase in retail sales. The substantial accumulation of stocks of non-durables in the previous quarter was reversed and stocks were liquidated with the exception of food. Retailers of non-durable goods reduced their stocks at a faster rate than those of durable goods. Motor vehicle dealers continued to draw down their inventories although at a lower rate than that of the previous quarter. Even so, this liquidation more than offset the total accumulation in the rest of the durable goods trades.

Wholesale trades were also responsible for the moderate investment in stocks in the present quarter, showing almost no change from the previous quarter. A small accumulation in the stocks of

durable goods lines which was mainly concentrated in industrial, transportation, commercial, institutional, and service equipment and supplies, was to some extent offset by a small liquidation in the non-durable segment of wholesale trade.

Exports and Imports of Goods and Services

The deficit in Canada's external account, on a national accounts basis, moved from a seasonally adjusted annual rate of \$536 million in the first quarter to \$660 million in the second. From the following table it may be noted that the change of \$124 million resulted from an improvement of \$300 million in non-merchandise trade failing to offset a drop of \$424 million in the merchandise trade surplus.

Exports and Imports of Goods and Services¹

(Seasonally adjusted at annual rates)

	Goods			Services			Current balance
	Exports	Imports	Net	Exports	Imports	Net

1 Q'67 to 2 Q'67 per cent change	0.8	4.7		20.1	6.8		

¹ National Accounts figures do not include estimates of migrant funds and inheritances.

The improvement in the non-merchandise trade can be ascribed to a very large increase in EXPO-oriented tourist and travel receipts. There was as well a sharp drop in travel payments, along with a minor increase in freight and shipping receipts. Offsetting these favourable changes in part, however, was a rise in payments combined with a smaller decline in receipts of interest, dividends and miscellaneous transactions.

The decline in merchandise surplus resulted from an increase in merchandise exports of \$88 million compared with a rise of \$512 million in merchandise imports.

In exports, gains were made over the first quarter in newsprint, wheat clearances, crude petroleum, non-farm machinery, asbestos, natural gas, iron ore and re-exports. Declines were recorded in lumber, wood pulp, fish, aluminum, nickel, copper, zinc, fertilizers, and farm machinery.

Data are not available to indicate the items which contributed to the increase in imports from the first quarter. It is known that these increases were largely from United States sources.

The Government Sector

Total expenditures of all governments combined, excluding inter-governmental transfers, increased by over 7½ per cent in the second quarter to \$21,252 million from the first quarter of \$19,728 million. Over half of this increase resulted from higher expenditures on goods and services with the federal and provincial-municipal levels contributing about equally to the rise. At the federal level, higher outlays were made on both defence and non-defence items. The rise in expenditures on goods and services by provincial and municipal governments were in general the result of higher salaries and wages and higher spending on capital goods at the municipal level.

Also, federal transfer payments to other levels of government rose markedly in the quarter. This reflected, in part, changes in the new fiscal arrangements with the provinces which resulted in larger equalization payments. The new arrangements included a system of post-secondary education payments to the provinces which began in the second quarter and overlapped the former system of grants to universities. Payments under the Canada Assistance Plan, which commenced during the second quarter, also contributed to the sharp increase in federal transfer to other levels.

Total revenues of all governments combined increased only slightly from \$20,536 million in the first quarter to \$20,580 million in the second quarter. However, there were divergent and irregular movements in the components.

Revenues from personal direct taxes declined by 6½ per cent from the unusually high rate of the first quarter. The irregular movement in this series is partly a reflection of a later start in processing of the 1966 income tax returns, causing a shift in the pattern of refunds from the first to the second quarter.

Revenues from indirect taxes declined by slightly less than 1 per cent. Federal revenues from this source declined by almost 3 per cent, mainly due to changes in the sales tax rate on production machinery and equipment. The federal decline was partially offset by rising provincial-municipal revenues which were affected by higher retail sales tax rates in Quebec and the imposition of a retail sales tax in Manitoba.

Offsetting the declines in revenues from personal direct taxes and from indirect taxes were increased corporation tax liabilities and a sharp rise in investment income, largely due to higher trading profits of federal government enterprises.

With total government spending increasing by over 7½ per cent while government revenues remained virtually unchanged, the government sector as a whole (inclusive of the Canada and Quebec pension plans) moved from a surplus, on a National Accounts basis and seasonally adjusted at annual rates, of \$808 million in the first quarter to a deficit of \$672 million in the second quarter. Most of the change came at the federal level and resulted, in part, from the irregular movements mentioned above in both the revenue and expenditure series in the first and second quarters.

It should be noted that in a period of such irregularities the averaging process inherent in the seasonal procedure may sometimes not fully reflect the true movement of the current situation. This is particularly true where a series is not seasonally adjusted directly but is obtained as a difference of large, seasonally adjusted aggregates, such as in the case of the surplus or deficit position of government. The deficit at the provincial-municipal level

narrowed slightly during the quarter while the surplus of the Canada and Quebec pension plans showed little change.

The Components of Income

Labour Income

During the second quarter of 1967 the total labour income (seasonally adjusted) increased by almost 2 per cent. This compared with an increase of over 2½ per cent in the first quarter of 1967. The goods-producing industries were responsible for this reduced rate of payroll increase, showing little change compared with a 2 per cent rise in the first quarter, while the service-producing industries continued their advance, increasing by over 3 per cent.

The total labour force in the country continued to grow with increasing participation from females and juveniles as well as regular growth increases. The bulk of the increase in the quarter was absorbed by the service industries. The goods-producing industries experienced a decline in employment which was apparent in most of the industries, notably so in manufacturing, construction (especially in the engineering sector), and forestry. This decline in the goods-producing industries was partially offset by increases in average weekly hours worked from a low in the first quarter and by slight increases in average hourly earnings.

Seasonally adjusted, the increase in wages and salaries in the manufacturing industries was 1 per cent and in mining, 3 per cent. However, in construction and forestry they declined by 2½ per cent and 5 per cent respectively. All service-producing industries showed continued increases in wages and salaries, roughly at the rate established in 1966 and in the first quarter of 1967. Lower average weekly wages and salaries in the service-producing industries, relative to the goods-producing industries, affected the lower rate of increase in total labour income in the second quarter.

Corporation Profits

Seasonally adjusted at annual rates, net corporation profits (before taxes and before dividends paid to non-residents) moved ahead to a level of \$4.9 billion in the second quarter of 1967. This represents an improvement of 5½ per cent over the first quarter level.

The long pronounced general rise in the level of net profits which commenced in mid-1961 levelled off in the last quarter of 1965 and remained stable through the first half of 1966. After a fall-off in the profit level in the third quarter of 1966, profits rebounded in the fourth quarter, but slipped again in the first quarter of 1967. Second quarter profits moved ahead at a brisk pace, but failed to advance to the high levels that prevailed in the late stages of the upswing in profits.

Within the industry groupings, marked rises were recorded in the transportation storage and communication industry, where subsidies influenced the upward trend, and the retail and service industries, whereas a moderate rise of 5 per cent was experienced in the wholesale trade industry. Profits in the manufacturing and finance industries held virtually steady with changes of less than 1 per cent.

A widespread mixture of rises and declines was scored in the manufacturing group. The strike-affected electrical industry experienced a slight rise in profits but remained at a relatively low level compared with profits achieved in earlier periods. Profits in the textile, wood, non-metallic mineral and miscellaneous categories decreased by more than 12 per cent from their first quarter level, whereas declines in the paper, printing, and petroleum and coal industries were more moderate—7, 10 and 4 per cent respectively. Offsetting these declines was a step-up in the profit level of the food and beverage industry, with a rise of 12 per cent, metal, 6 per cent, and chemicals, 2 per cent.

Net profits for the first half of 1967 showed a decline of 9 per cent from the corresponding period of 1966. This decline was more pronounced in the first quarter. The advance in capital consumption allowances in the first half of 1967 accounts for greater part of this drop. On a gross basis, corporate profits edged down only 3 per cent.

In the half year comparison, net corporation profits slipped noticeably in the mining, manufacturing, transportation storage and communication, and wholesale trade industries with all showing declines exceeding 10 per cent. Profits in the retail trade industry drifted down 6 per cent. Profit rises were pronounced in the utility and service industries each with gains of over 15 per cent. The finance industry profits rose by 4 per cent.

Total manufacturing half year profits, as noted above, fell off with a large portion of the industries following this pattern. The electrical products industry experienced a significant slump in profits, with the food and beverage, textile, wood, paper, metal, non-metallic mineral, and chemical industries all registering drops of more than 10 per cent. Profits in the rubber, printing, and petroleum and coal industries exceeded their respective first half of 1966 levels.

Rent, Interest and Miscellaneous Investment Income

Seasonally adjusted, rent, interest and miscellaneous investment income rose by 7.4 per cent during the second quarter, reaching a record level of \$4,304 million at annual rates. Profits of government business enterprises accounted for \$228 million of the total increase of \$296 million in the quarter.

Accrued Net Income of Farm Operators

Accrued net income of farm operators from farm production seasonally adjusted showed little change from the first quarter. The value of livestock production increased sharply due mainly to inventory accumulation, while the value of grain production rose slightly. Offsetting these increases was a decline in cash income from the sale of other farm products, mostly the result of a substantial drop in cash income from the sale of tobacco from an irregularly high first quarter.

Net Income of Non-farm Unincorporated Business

Net income of non-farm unincorporated business rose to a seasonally adjusted annual rate of \$3,124 million, 5.5 per cent above the first quarter. Higher net incomes in the construction and service industries were mainly responsible for the increase.

Real Gross Domestic Product at Factor Cost

Production by Industry

Seasonally adjusted real domestic product less agriculture for the second quarter of 1967 rose by 1.6 per cent, resuming the quarter-to-quarter upward climb in non-agricultural output that had been interrupted by the slight drop that occurred in the first quarter of this year.

The service-producing industries provided the strength shown in the second quarter increase, with the goods-producing industries adding only fractionally to their production.

Within the service industries, trade showed the largest advance, increasing by 4½ per cent. This increase amounted to a contribution of 40 per cent toward the total increase in non-agricultural output. Wholesale trade rose by 6 per cent, while retail trade went up 3½ per cent. Sales by motor vehicle dealers, which rose by 9½ per cent, contributed significantly to the increase in retail trade; most of the other retail components also recorded advances. Many of the components of wholesale trade also increased, recovering from the low levels experienced in the first quarter of this year.

The community, recreation, business and personal service group contributed 21 per cent of the second quarter increase in total output. Production in both the business and personal service groups was apparently increased by EXPO.

The transportation, storage and communication grouping accounted for 18 per cent of the total increase in non-agricultural output. An increase of 3 per cent in this grouping was concentrated mainly in the transportation components. Statistics for the transportation of passengers appear to indicate that travel to and from EXPO was a major factor.

Within the goods-producing industries, mining, with a rise of 3 per cent, contributed 12 per cent to the total increase in non-agricultural output, largely because of a 7½ per cent advance in the mining of crude petroleum.

Manufacturing, in contrast to most quarters, made only a minor contribution, of 9 per cent, to the change in total non-agricultural output. Almost all of this contribution came from the manufacturing of non-durables, chiefly the textile products and foods and beverages components. Although durables-manufacturing as a whole contributed little to the increase in total output for this quarter, the manufacture of motor vehicles rose by 11 per cent.

Electric power and gas utilities rose by 2½ per cent. The contribution of this grouping, of 7 per cent, was divided almost evenly between the two components.

Construction, which was strike-affected, was one of the few industries to show a drop in the second-quarter. This decrease of 1½ per cent, was the result of a 7 per cent fall in public construction. Within the private construction component, a large increase in housing, which represented a recovery to the levels of the first half of 1966, was almost totally offset by a decrease in non-residential construction. The decrease in total construction had only a minor dampening effect on the rise in total non-agricultural output.

LABOUR FORCE (More detail in Table 19)

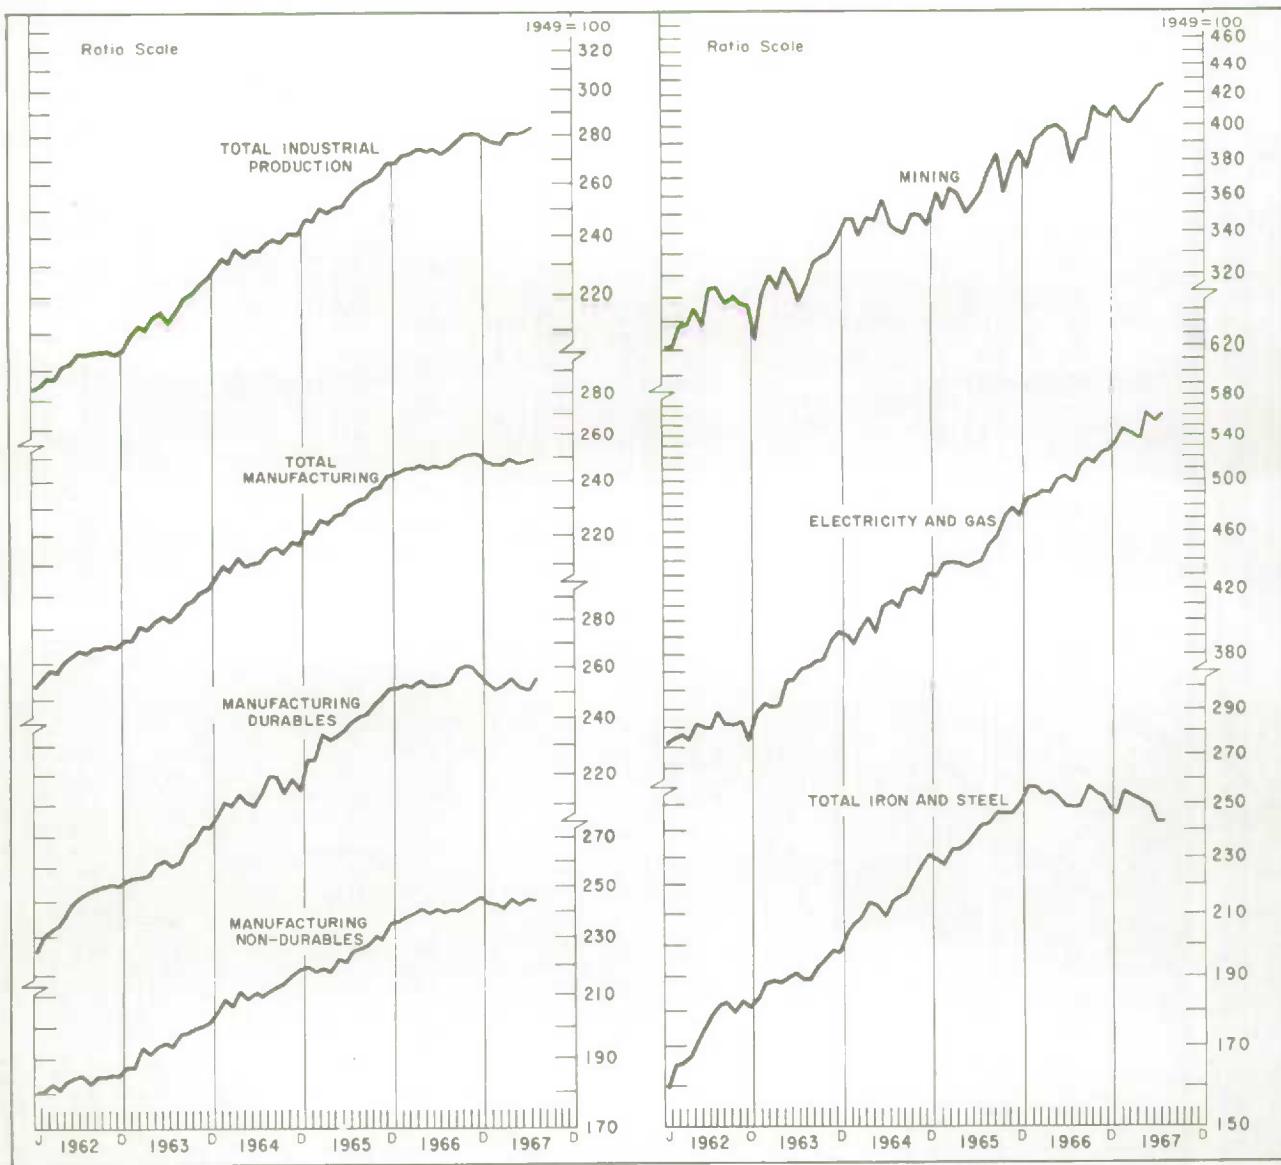

Employment was 7,442,000 in August, almost unchanged from July. A decline of 18,000 for unemployed and of 17,000 for labour force reflected reduced participation of teenagers who were temporarily in the labour market during the summer months. Unemployment was 4.1 per cent of the labour force.

INDUSTRIAL PRODUCTION (More detail in Table 16)

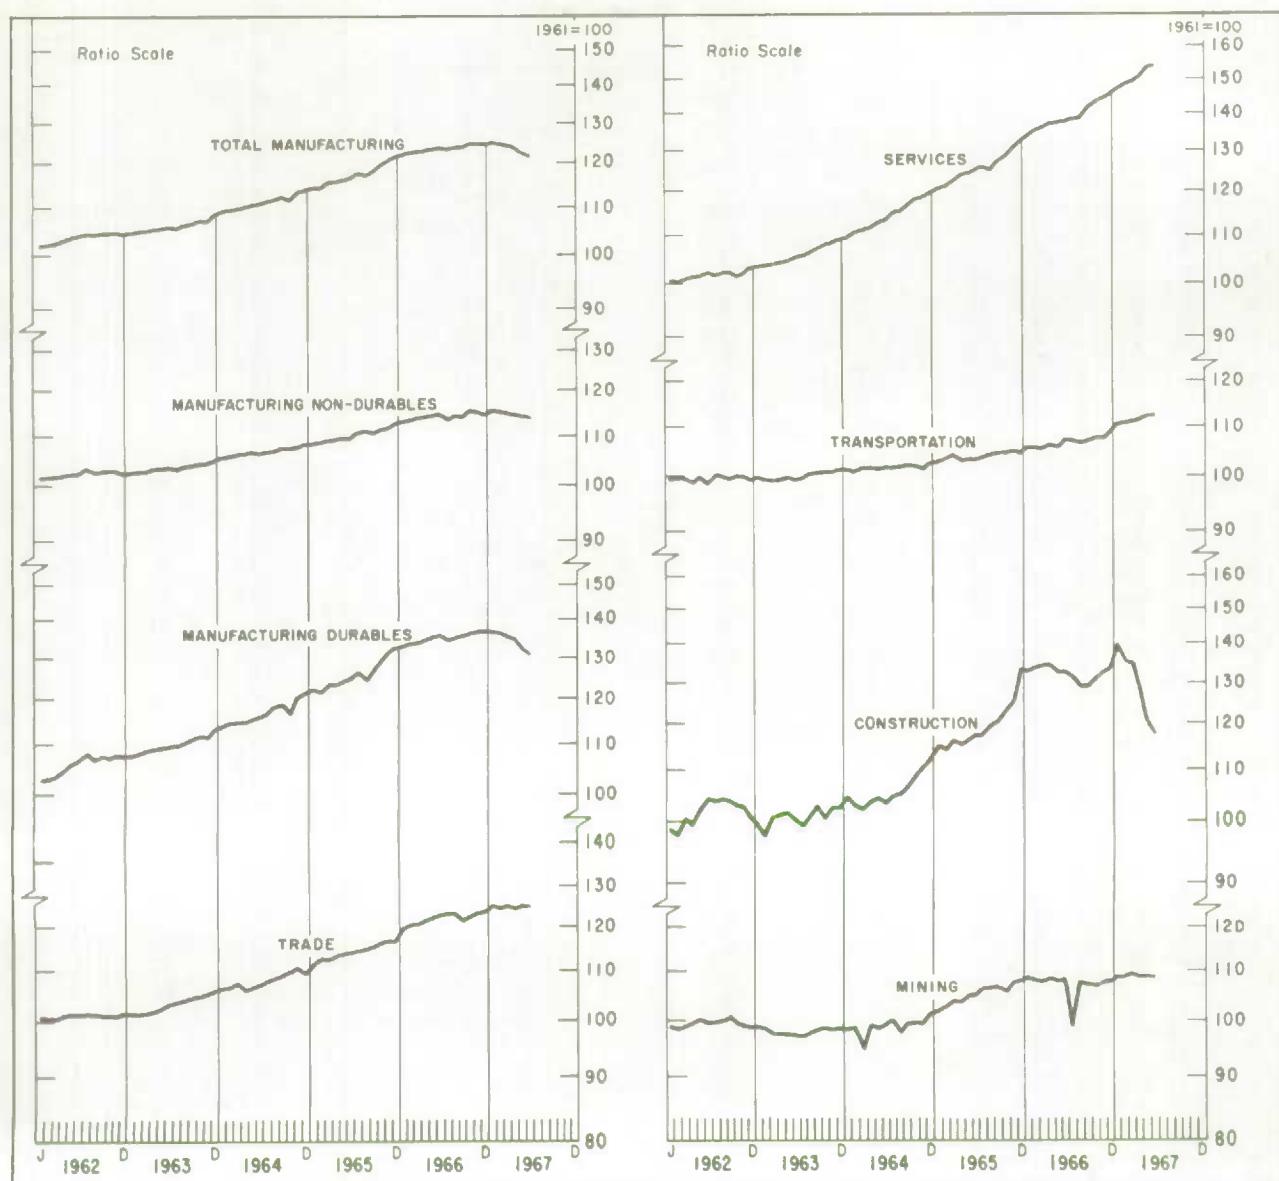

The index of industrial production advanced by 0.9 per cent in July to 283. All three principal components of the index contributed to the gain as mining rose by 0.7 per cent, electric power and gas utilities by 0.9 per cent and manufacturing by 0.8 per cent. The gain in manufacturing originated in durables.

EMPLOYMENT, SELECTED INDUSTRIES (More detail in Table 28)

The index of employment in manufacturing decreased 0.7 per cent to 121.6 in June mainly due to a decline in durable manufacturing. Employment in construction at 117.5 was 2.8 per cent lower, and in trade 0.9 per cent higher at 125.7.

CONSTRUCTION (More detail in Tables 67, 72 and 73)

The value of building permits declined 15.8 per cent in July to \$315.6 million. The increase in residential permits of 7.5 per cent was offset by a sharp decline of 36.5 per cent in non-residential permits.

Housing starts, with 146 thousand units at annual rates in July, were 3.1 per cent lower than in June. Completions, with 144 thousand units at annual rates, were 17 thousand units or 13.5 per cent higher.

¹The arrival of an unusually heavy backlog of import documents referring to previous months' activities increased total imports shown for April 1967, by some \$60 millions.

SELECTED MONTHLY SERIES (More detail in Tables 45, 90, 98 and 108)

New orders in manufacturing increased 2.0 per cent in June. Inventories and unfilled orders showed minor increases, while shipments were almost unchanged.

Cheques cashed in clearing centres decreased 4.6 per cent to 47.1 billion dollars in July.

Consumer Credit was \$47 million or 0.8 per cent higher in June.

¹Total of all series available monthly as in column 10, Table 90.

SELECTED QUARTERLY SERIES (More detail in Tables 7, 11, 69, 70, 71, 75, 90 and 104)

Gross national product increased 2.2 per cent in the second quarter 1967, to 61.5 billion at annual rates. With prices rising, this advance represented a gain of close to 1 per cent in real terms.

Personal disposable income and corporation profits before taxes advanced 3.1 per cent and 5.5 per cent respectively in the second quarter 1967, while Farm Cash Receipts declined 3.9 per cent.

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 113. ³Total of all monthly and quarterly series as in column 14, Table 90. ⁴Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

The general wholesale index (1935-39=100) moved up from 263.7 to 264.6 in August; the thirty industrial materials index eased from 253.0 to 252.0. The index of industrial common stocks (1956=100) advanced 2.2 per cent to 189.3.

The consumer price index (1957=100) was 0.5 per cent higher in August. The increase was largely attributable to higher food prices, which moved the food index up 1.8 per cent.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series.

²Includes residual error of estimate. Source at bottom of Table 12.

¹Quarterly indexes for agriculture and for aggregate domestic product for the current year become available later in the year. ²Includes public administration and defence; hospitals; education; welfare, religion and other community service, n.e.c.; and domestic service. Sources: Index of Industrial Production, (61-005). For detailed description of concepts and methods see Indexes of Real Domestic Product by Industry of Origin, 1935-61, (61-505) D.B.S.

Table 16: industrial production, volume indexes (1949 = 100)¹, based on the unrevised standard industrial classification

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. ²The labour force as a percentage of the population 14 years of age and over. ³The unemployed as a percentage of the labour force. ¹See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. ²Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. Source: The Labour Force, (71-001) D.B.S.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. ³The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ⁴Includes miscellaneous manufacturing industries. ⁵Includes also publishing and allied industries. ⁶Includes also the storage and communication industries.

¹The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and public administration and defence. ³Includes storage, electric power, gas and water utilities. ⁴Excludes domestic service. Source: Employment, Average Weekly Wages and Salaries, (72-002), D.B.S.

¹See footnotes 1 and 2 and source in Table 28. ²Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 28. ³In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. ⁴Except machinery and transportation equipment industries.

Table 31: average weekly wages and salaries,¹ by industrial divisions, based on the 1960 standard industrial classification-(dollars)

¹Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Sources: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D.B.S.

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted.
²Total manufacturing inventory owned by manufacturers including warehouse stocks.
³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month.
⁴End of period. Annual figures for inventories and unfilled orders are end of December values.

¹Data on shipments relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. ⁴Excluding shipments for re-processing at maker's own plant.

¹End of period. ²Does not include apartment-type machines. ³Electric and other. ⁴Gas types are included. ⁵In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field and processing plants less field flared and waste, Canadian sources only. ⁴By gas utilities, Canadian sources only. Sources: Crude Petroleum and Natural Gas Production (26-006) and Gas Utilities (55-002), D.B.S.

¹Barrels of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries.³Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used.⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns.⁶Includes stove oil, kerosene and tractor fuel. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes.⁹Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

¹The data are collected for 1,400 municipalities and individual figures are available on request. ²Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional.

Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. Source: Building Permits (64-001), D.B.S.

¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. ²End of period. Source: New Residential Construction (64-002), D. B. S.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for oil firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), D.B.S.

¹These indexes are available for January, April and August only. ²Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. ³Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. ⁴Barley No. 1 feed; hogs grade "B" alive. ⁵Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. ⁶Quotations refer to steers of all weights. ⁷Grade "B1" hogs. Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001). D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.

¹Monthly totals for current years are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months. ²Includes also seaweeds and other species such as whelks, worms etc.

³Exports include sea and freshwater fish and shellfish products but exclude bait, meal, oils, offal, livers, fish roe n.e.s. and fishery foods and feeds n.e.s.

⁴Total holdings (all forms) of fresh and smoked frozen fish. Sources: Monthly Review of Canadian Fisheries Statistics (24-002), Trade of Canada, Exports (65-004), D.B.S.

¹Department store stocks at end of period of selling value. The series on "total sales, all departments" is a revised series based on the results of the 1961 Census of Merchandising and Service Establishments, (see also column 5, Table 85). The departmental breakdown for the months prior to January 1967 has not been adjusted to the new basis. The stock series at the total level and by components for the period prior to 1967 are based on the 1951 Census. Sources: Department Store Sales and Stocks (63-002), D.B.S.

Note: Components may not add to totals due to rounding.
¹Fully secured by marketable bonds and stocks. Excludes loans to finance the purchase of Canada Savings Bonds.
²Includes loans on the security of household property.
³Includes loans to finance companies which are affiliates of retail merchandisers.
⁴Religious, educational, health and welfare institutions.
⁵Not available on a monthly basis.
⁶Differs from general loans in Table 106 by the exclusion of loans to instalment finance companies.

¹Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months.²Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over \$60,000 annually prior to January, 1964 and over \$100,000 annually since. ³United States and other foreign carriers. Excludes in transit passengers. ⁴Cargo includes air freight and express but excludes mail and excess baggage. ⁵Data prior to 1964 do not include bulk transportation. Because of survey limitations, data after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18,000 lbs.

¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. ¹Excluding revivals, increases, dividend additions, reinsurance acquired, credit insurance and pension bonds without insurance. Value totals are estimates projected from the sales reported by 34 companies operating in Canada representing 82% of new ordinary and 83% of new group contracts. ²The monthly Canada totals for 1964 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces. Neither the monthly figures for 1964 nor the monthly averages for 1964 have been revised to agree with the Canada total. ³Total new settled-for ordinary sales in Canada. ⁴Under new or amended contracts.

¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (excluding government-owned companies). ²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes agriculture, forestry, fishing and construction. Source: Corporation Profits (61-003), D.B.S.

Table 117: federal government budgetary expenditures¹ (million dollars)

Note: Some of the current statistics in this table are not entirely comparable to the corresponding figures of previous years due to transfers of duties which took place during the current year and which have not been adjusted.

¹This statement does not include any disbursements other than regular budgetary expenditures, from increases in loans, advances and investments. ²Expenditures for administration applicable to the Treasury Board have not been transferred from Finance.

³Under the Technical and Vocational Training Assistance Act. ⁴Government contributions under the Hospital Insurance and Diagnostic Services Act. ⁵Includes treatment and rehabilitation services. Sources: Canada Gazette and Dept. of Finance.

*April 1 to January 31.
