NATIONAL ACCOUNTS, INCOME AND EXPENDITURE, SECOND QUARTER 1968

Introductory Review

An increase of 2.3 per cent in the second quarter carried GNP to a level of \$66.4 billion, seasonally adjusted at annual rates. With prices continuing to rise, by about 1 per cent, the gain in real terms was reduced to 1.3 per cent.

Although smaller than the first quarter gain of 3 per cent,¹ the present advance is again well above the average quarterly rate of growth in 1967, when the Canadian economy went through a period of readjustment. Manufacturing activity which was slowed down in the first quarter by strikes, notably in the automotive industry, was an important factor in the second quarter expansion. GNP, excluding accrued net farm income which showed substantial swings in the two quarters, increased in the second quarter at a somewhat faster rate than in the first (2.8 versus 2.5 per cent).

Total demand (GNP plus imports) increased in the quarter by about 2 per cent. Exports remained a dominant element of the increase in total demand, accounting for nearly 40 per cent of the change. Imports increased only fractionally from the very high levels reached in the preceding period; thus the increase in final domestic demand was met almost entirely from domestic supply sources. Investment outlays, particularly on housing, played an important role in sustaining demand this quarter, contributing about a third of the increase. Among the widespread increases in the income flows there were sizable gains in labour income and in corporation profits.

The increase in exports was particularly notable; important gains were made in automotive products, iron ore and steel products. This exceptional performance was largely due to the continued expansion in economic activity coupled with inventory accumulation in the U.S. during the first half of the year. The fractional increase in imports resulted from a slight decline in merchandise imports being more than offset by increases in service payments (largely interest and dividends). The net effects of external transactions this quarter were improved balances in both merchandise and non-merchandise accounts, and a swing from an overall deficit of \$312 million (on a National Accounts basis) to a surplus of \$236 million, seasonally adjusted at annual rates. This was the first current account surplus in almost 16 years.

Business gross fixed capital formation made further sizable gains. However, there was a reversal in the movements of individual components

this quarter, with construction accounting for all of the increase while investment in machinery and equipment declined somewhat. The increase in residential construction, at an exceptional rate of 21 per cent, reflected the high level of starts in the first months of the year. Non-residential construction also advanced, by 5 per cent. This second consecutive gain in business gross fixed capital formation, after declines throughout 1967, coincided with an upward revision of business investment intentions for the whole year as indicated by the mid-year survey of business intentions. Personal and government expenditures on goods and services continued to increase, recording advances of 1 and 2 per cent respectively. The moderate gain in consumer expenditure followed a large increase of 2.5 per cent in the first quarter.

Turning to the income side, the more notable gains occurred in corporation profits before taxes, 7 per cent, and in labour income, 3 per cent. There were also significant increases in the net income of unincorporated business and in rent, interest and miscellaneous investment income.

Net corporation profits before taxes paced the advance on the income side, reaching a level 4 per cent above the previous peak achieved in the first quarter of 1966 and nearly 17 per cent above the subsequent trough in the first quarter of 1967. Gross profits, which include capital cost allowances, also increased sharply, by 5.5 per cent.

The progress of the Canadian economy so far this year is also evident if viewed in a semi-annual perspective. The upturn in business investment and in external trade in the first half of 1968 was especially notable. Outlays on plant and equipment increased by a little more than 10 per cent at annual rates over the last two quarters of 1967, exports and imports by over 20 per cent. There was also a marked acceleration in wages and salaries, personal disposable income and gross profits. The overall increase in Gross National Product was close to 10 per cent.

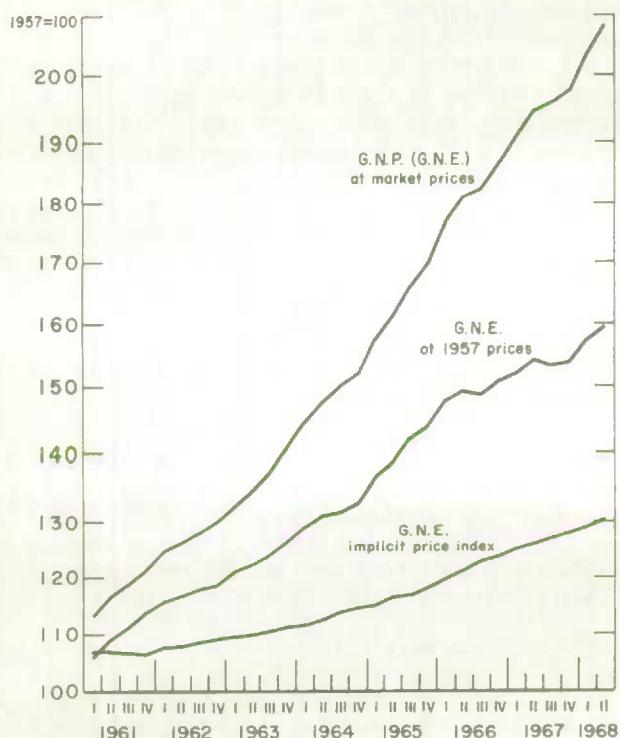

Price Movements

In the second quarter, prices rose by 0.9 per cent, the same rate as in the preceding quarter. Both consumer expenditure and business gross fixed capital formation prices increased by 1 per cent, while export and import prices registered lower rates of advance. The table below gives details of price changes for the major components of gross national expenditure.

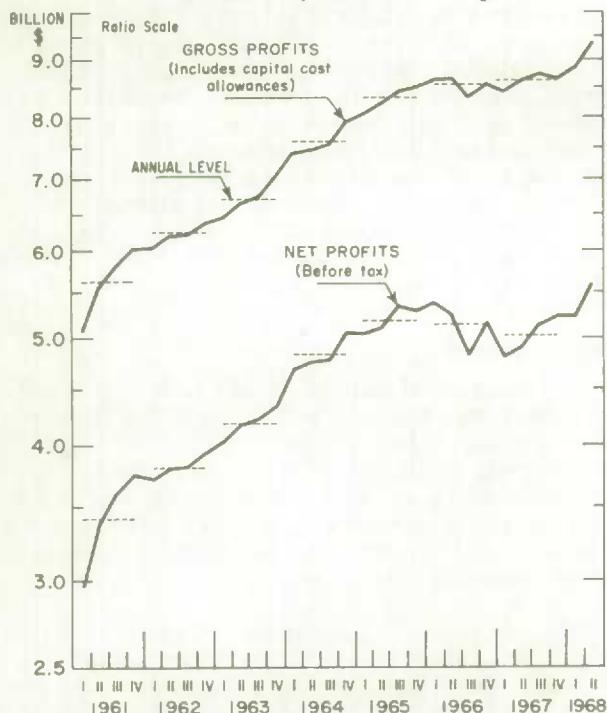

Within personal expenditure the dominant influence was exerted by services which rose by 1.3 per cent. Rent, rising 0.9 per cent, continued its steady upward trend; the index was 4.4 per cent higher than a year ago. The advance of 7.0 per

¹ As a result of the August forecast, the value of the grain crop has been revised upwards from the April estimate, based on acreage intentions and ten-year average yields. Gross National Product for the first quarter has accordingly been increased by \$128 million to reflect this revision.

G.N.P. in the second quarter rose 2.3 per cent at current prices and 1.3 per cent in real terms.

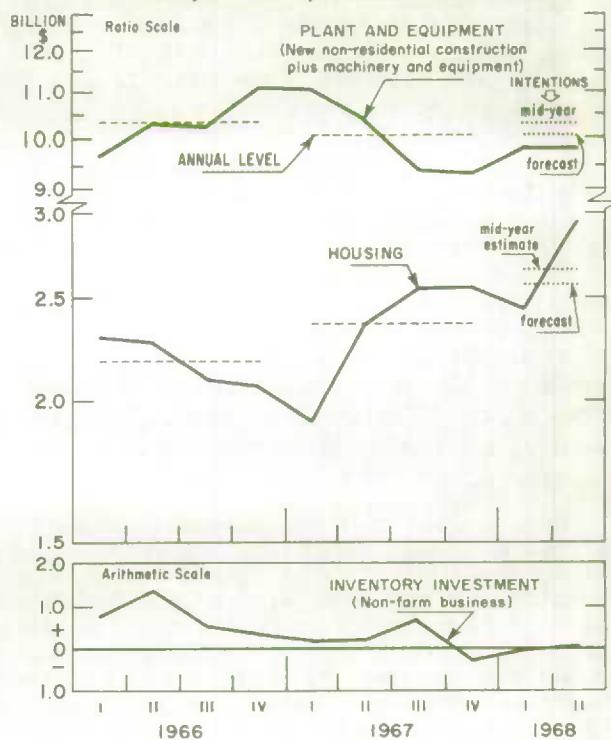

Second quarter net corporation profits were 4 per cent above previous first quarter 1966 peak, and 17 per cent above first quarter 1967 trough.

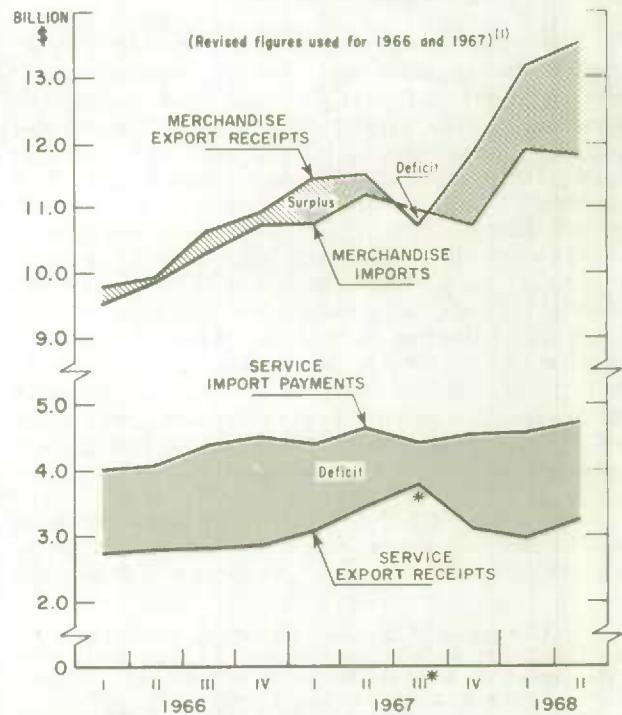

ALL DATA SEASONALLY ADJUSTED, AT ANNUAL RATES.

Business capital formation rose \$0.4 billion through higher construction investment, particularly housing. Second quarter gain in non-residential construction was offset by drop in machinery and equipment outlays. Inventory investment was small.

A larger second quarter surplus on merchandise trade and a lower deficit on non-merchandise trade resulted in a current account surplus, the first in 16 years.

* Expo induced receipts.

(1) See Note pp 8-9

cent in domestic air fares, the first since mid-1965, accounted for a significant part of the 2.4 per cent rise in the index of purchased transportation. The price of dental care rose a strong 7.7 per cent, while doctors' fees and costs of hospital care increased moderately.

Non-durable goods prices advanced 0.8 per cent compared with a rise of 1.8 per cent in the first quarter. Moderate price declines were shown for auto parts and accessories, drugs and food. The fractional decline in the seasonally adjusted price of food was due to virtually offsetting movements, with rises in the prices of dairy products, pork and fresh fruits and declines in the prices of beef, fresh vegetables, bakery products, and fats and oils. Prices of tobacco products and gasoline showed increases of 4.6 per cent and 3.1 per cent respectively and largely reflected higher taxes on these commodities.

The prices of durable goods rose 0.5 per cent as compared with a decline of 0.4 per cent in the previous quarter. New automobiles and home furnishings, with increases of 0.5 per cent and 1.3 per cent respectively, were mainly responsible for the rise.

Business gross fixed capital formation prices advanced at a slightly lower rate than in the first quarter, the result of a slight decline in the machinery and equipment index after a 1.2 per cent increase in the previous quarter. Seasonally adjusted labour and material costs in construction rose at higher rates, 3.3 and 0.9 per cent respectively.

Merchandise export prices, on balance, rose fractionally. Increases occurred in lumber, aluminum, wheat, motor vehicles and auto parts, while newsprint, wood pulp and copper all showed price declines.

The Components of Demand

Personal Expenditure on Consumer Goods and Services

After the rather strong 2.5 per cent advance of the first quarter, personal expenditure increased by 1 per cent to reach a level of \$40.3 billion, seasonally adjusted at annual rates. All three major aggregates contributed to the increase, but somewhat unevenly: outlays on services rose by 1.5 per cent and by about 1 per cent on non-durables, while the advance in durables was fractional.

Some divergence in movement occurred among components of non-durables, with declines in several items which recorded large increases in the previous quarter. Decreases of between 1 and 5 per cent were recorded in outlays on clothing, energy sources for home use, gasoline, oil and grease, and tobacco. On the other hand, purchases of household supplies and alcoholic beverages showed increases. The food component continued to advance, but at a lower rate - 1.5 per cent compared with 3.5 per cent; however the advance in real terms was close to that of the previous quarter.

Among the components of durable goods, increases of between 4 and 4.5 per cent were recorded in each of furniture, home furnishings, appliances and radios, and jewellery and watches; these gains were almost offset by a decline of 3.5 per cent in purchases of new and used cars after a large advance previously. New car outlays declined by 2.5 per cent, though expenditures on overseas automobiles increased for the fifth consecutive quarter.

With the exception of an unchanged rate of outlays for personal services, all service components showed increases. Advances of 3.5 per cent occurred in shelter, medical care, and purchased transportation, while outlays for household services rose by 2.5 per cent. Expenditures on financial services and user-operated transportation increased by 1.5 and 1 per cent respectively.

Business Gross Fixed Capital Formation

Business spending on fixed capital formation increased by 4 per cent in the second quarter, reaching an annual rate of \$12.8 billion. This rise reflects a large pick-up in housing investment and a lesser increase in non-residential construction;

these were partially offset by a decline in machinery and equipment outlays. As shown in the table below, capital outlays in the first half of this year were running at an average annual rate of \$12.5 billion. Investment intentions, for the year 1968, as forecast in "Private and Public Investment in Canada: Outlook 1968", were \$12.6 billion. Anticipated capital spending was revised upwards in the mid-year survey to reach \$12.9 billion, an increase of 4.6 per cent over 1967. Realization of these revised anticipations would require a 6.5 per cent increase in the rate of investment over the first half of the year.

Expenditures for new residential construction advanced 21 per cent in the second quarter to an annual rate of \$2.9 billion. Starts declined slightly from a seasonally adjusted annual rate of 204,000 to 191,200 units, after the 26.5 per cent jump in the first quarter—while completions rose by 9.5 per cent. In August, Central Mortgage and Housing Corporation revised upward by 10,000 its estimate of starts in 1968 to 185,000 units—close to the 190,000 unit target of the Economic Council of Canada. Multiple housing, particularly apartments, dominated housing activity in the first half of 1968.

Business Gross Fixed Capital Formation

	Anticipated 1968		
	Reported in 1968 Intentions survey in		Average of first two quarters 1968
	November 1967	June 1968	
millions of dollars			
Totals	12,577	12,928	12,514
Housing	2,564	2,648	2,692
Other construction	4,712	4,828	4,658
Machinery and equipment	5,301	5,452	5,164

Non-farm Business Inventories

In the second quarter of 1968 non-farm business inventories showed an increase of \$60 million, seasonally adjusted at annual rates, compared with a marginal liquidation in the previous quarter. Large offsetting movements occurred, with notable accumulation at the retail level and substantial depletion in manufacturing.

In manufacturing, the liquidation which started in the fourth quarter of 1967 continued into the current quarter. The stocks showed a depletion of \$344 million, compared with one of \$132 million in the previous quarter. Four fifths of this occurred

in non-durables, while the depletion in durables also continued, though at a reduced rate. There was a widespread liquidation among all the non-durable goods-producing industries with the exception of only a small accumulation in the petroleum industry. Among durables a substantial accumulation in the electrical products industry was more than offset by a general decline in the stocks of the other component industries, especially of transportation equipment. By stages of production, the stocks of raw materials and goods-in-process declined, whereas the stocks of finished goods showed a slight increase. The stock-to-shipments ratio was lower than the ratio of the previous quarter.

Value of Physical Change in Non-farm Business Inventories
Seasonally adjusted at annual rates

	1968	
	1 Q	2 Q
	millions of dollars	
Manufacturing	- 132	- 344
Durables	- 120	- 72
Non-durables	- 12	- 272
Wholesale trade	24	- 64
Retail trade	284	324
"Other" industries	- 188	144
Totals	- 12	60

In wholesale, the two-year trend of accumulation was reversed. This liquidation was entirely due to the stock depletion of non-durable goods dealers, as the stocks of durable goods showed a small increase. The stock-to-sales ratio was much lower than that of the previous quarter.

Stocks of retail traders rose considerably in the current quarter. Nearly 80 per cent of this total increase was contributed by a build-up of the stocks of motor vehicle dealers, although some accumulation occurred in non-durable lines as well. The stock-to-sales ratio was virtually the same as in the previous quarter.

Exports and Imports of Goods and Services

With exports of goods and services increasing by 3.5 per cent and imports by less than 1/2 of 1

per cent the balance on current account for the quarter swung from a deficit of \$312 million at annual rates to a surplus of \$236 million—the first surplus since the third quarter of 1952. The deficit on non-merchandise trade declined by \$108 million, while the merchandise surplus increased markedly by \$440 million.

Exports of goods rose by 2.5 per cent, following a 12 per cent advance in the first quarter, with the gains being made mainly in American markets. Increases occurred in motor vehicles, iron ore, nickel, steel products, pulp, newsprint, lumber, veneers, crude wood products, wheat, fish, tobacco, alcoholic beverages, crude vegetable products, television and radio sets, fertilizers and natural gas. Decreases were registered in motor vehicle parts, farm machinery, asbestos, copper and zinc.

¹ See note on page 8.

Seasonally adjusted commodity detail on the 1 per cent decline in merchandise imports is not available, owing to the difficulty of determining normal quarterly changes resulting from a new classification in recent years and revisions to 1966 and 1967 estimates.

The significant item in the reduced non-merchandise deficit was \$204 million improvement (from deficit to surplus) in the tourist and travel account which, together with a smaller improvement in freight and shipping trade, offset a widening deficit in interest and dividends.

The Government Sector

Total expenditures of all governments combined, excluding intergovernmental transfers, rose by 4.5 per cent in the second quarter to \$23,272 million from \$22,288 million in the first quarter. Nearly \$300 million of this increase was in expenditures on goods and services. The high outlays in this category occurred entirely at the provincial-municipal level and were associated with higher capital spending; outlays on goods and services at the federal level declined.

Transfer payments to persons increased by over \$500 million, or nearly 8 per cent. At the federal level, increased disbursements for scholarships and other educational programs and higher war veteran pension payments, accounted for most of the rise of \$304 million. At the provincial-municipal level the increase was caused by higher payments to hospitals and other institutions.

Total revenues of all governments combined declined slightly from \$23,016 million in the first quarter to \$22,960 million in the second quarter. This was due to a \$400 million decline in personal direct taxes, the result of delayed payments of refunds which usually take place in the first quarter; this led to an unusually high first quarter and a consequently lower than usual second quarter.

Indirect taxes rose slightly but, while the federal portion fell, the provincial-municipal level increased by \$168 million, caused by higher gasoline and sales taxes introduced in several provinces during the second quarter.

The \$140 million rise in corporation tax liabilities was associated with the gain in corporate profits. Investment income rose by \$112 million,

mainly caused by increased trading profits of government enterprises, especially at the federal level.

With total government spending increasing by 4.5 per cent while revenues remained virtually unchanged, the government sector (including the Canada and Quebec Pension Plans) moved from a surplus, seasonally adjusted at annual rates and on a National Accounts basis, of \$728 million in the first quarter to a deficit of \$312 million in the second quarter. The deficit at the federal level widened from \$172 million to \$872 million, the result of irregular movements in the revenue and expenditure components. At the provincial-municipal level, the deficit also widened, from \$40 million to \$480 million. The surplus of the Canada and Quebec Pension Plans increased from \$940 million to \$1,040 million in the quarter.

Components of Income

Labour Income

During the second quarter, total labour income increased by about 3 per cent, the largest advance since 1966. The major influence in this rise was a substantially higher rate of advance in goods-producing industries, as that in services was about the same as in previous quarters.

Wages and salaries in the goods-producing industries advanced by about 3 per cent, compared with 1 per cent in the first and still lesser gains in the preceding three quarters. Manufacturing rose by 3 per cent, construction by 2 per cent and the primary industries by 4 per cent. Employment in these industries showed little change over the first six months of the year except for reductions due to labour disputes. The increase in the second quarter wages and salaries was due to a mixture of extra hours worked, bonus and incentive payment and higher wage rates in comparison with the first quarter.

Wages and salaries in the service-producing industries also increased by almost 3 per cent. Employment increased moderately, about 1 per cent, while average earnings rose by over 2 per cent. There were rises of 1.5 per cent in transportation, storage and communication and other utilities, 2.5 in trade, almost 4 per cent in finance and commercial and institutional services, and over 2.5 per cent in government services.

Investment Income

Gross corporation profits mounted substantially by over 5 per cent in the second quarter. With capital consumption allowances in this sector

rising by 3 per cent, there was a 7 per cent improvement in net profits. The increases in both gross and net profits were among the largest in the seven year expansion.

By industry, net profits of the manufacturing group continued the rising trend begun in early 1967 and, with a 10 per cent surge, contributed the largest share of the overall profits increase. Within this group, particular improvement over the first quarter was evident in the metals group with a 23 per cent gain; sizable advances were also displayed in the textiles, and non-metallic minerals and chemical groups, while lesser gains were made in wood, paper, printing and publishing, and petroleum and coal. Profits dipped in the rubber and the food and beverage industries, both affected by labour disputes, and in the electrical apparatus industry. The rise in manufacturing profits accompanied a sizable increase in production.

The profits of both the finance and the transportation, storage and communications industries recovered from first quarter declines and recorded 20 per cent advances. In contrast to the strength in these industries, and related to the easing of demand in the personal sector, the profits of the trade groups shifted downward. Profits of the retail trade, wholesale trade, and service industries fell by 8, 3, and 5 per cent respectively. Mining industry profits fell off slightly from their relatively high first quarter level, while profits of the utilities category dropped abruptly after a substantial first quarter rise.

Accrued Net Income of Farm Operators

During the second quarter accrued net income of farm operators fell to \$1,548 million, 14.5 per cent below the revised first quarter level. All major components were responsible for the change. Cash income from "other" farm products, notably tobacco and dairy products, registered the largest drop, while the values of grain and livestock production also declined somewhat.

Net Income of Non-farm Unincorporated Business

Net income of non-farm unincorporated business rose to \$3,400 million, about 4 per cent over the first quarter. The construction industry contributed over half of this increase with marginal gains being recorded for most other industries.

Production by Industry²

In the second quarter of 1968 the seasonally adjusted Index of Real Domestic Product rose by 1.3 per cent from the revised first quarter level of 141.9. Real Domestic Product less agriculture rose by 1.5 per cent from its first quarter level, which was also slightly revised. Almost all of this advance came from the goods-producing industries less agriculture, which were 3.1 per cent higher than they were in the strike-affected first quarter. In contrast, the service-producing industries, partially dampened by strikes, increased only fractionally (40.3 per cent). The Index of Industrial Production components registered a strong recovery, increasing by 2.7 per cent.

Manufacturing advanced by 3.2 per cent, with durables up by 5.1 per cent and non-durables by 1.4 per cent. The large increase in durables was mainly the result of recoveries from first quarter strikes in the motor vehicle and motor vehicle parts and accessories manufactures industries. These recoveries continued throughout the second quarter but were dampened by further strikes in April and June. In non-durables, paper and allied industries were largely responsible for the increase.

Construction rose by 6.1 per cent from the first quarter level, reflecting the substantial increases which occurred in the residential, engineering, and highways components. The increase in residential construction was evident in both multiple and single-housing units.

Agriculture and the strike-affected transportation, storage and communication division were the only industries to record significant declines in output during the second quarter. Agriculture³ fell by 4.1 per cent while transportation, storage and communication decreased by 1.5 per cent. The water transport and storage components were affected by the strike which closed the St. Lawrence Seaway on June 21.

² It should be noted that the movements shown here may not always coincide with the constant price gross national expenditure data in the quarterly national income and expenditure accounts, due to conceptual and statistical differences. Among these differences are factor cost versus market price valuation, the use of domestic versus national boundaries, and the use of different weight-base periods.

³ Includes an estimate of crop production based on the August forecast of production of principal field crops.

Revision Note

The Balance of Payments Division revised data for 1966 and 1967 in the second quarter of 1968. Revised figures are shown in "Quarterly Estimates of the Canadian Balance of International

Payments", DBS 67-001, starting with their report for the second quarter. These revisions have not been incorporated in the National Accounts. They are shown below on a National Accounts basis.

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 113. ³Total of all monthly and quarterly series as in column 14, Table 90. ⁴Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

THE GENERAL WHOLESALE INDEX INCREASED SLIGHTLY IN AUGUST FOLLOWING A DECLINE. THE THIRTY INDUSTRIAL MATERIALS INDEX CONTINUED TO MOVE UP.

THE INDEX OF INDUSTRIAL COMMON STOCKS DECREASED IN AUGUST AFTER INCREASES FOR FOUR MONTHS.

THE CONSUMER PRICE INDEX WAS AGAIN HIGHER IN AUGUST. THE FOOD COMPONENT INCREASED; DURABLES DECREASED; OTHER COMPONENTS SHOWED LITTLE CHANGE.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. Source: Quarterly Bulletin, Department of Manpower and Immigration.

¹Figures for births, marriages and deaths for 1968 are provisional and represent registrations filed in provincial vital statistics offices during the month under review, regardless of the month of occurrence. Figures for this year are exclusive of the Yukon and the Northwest Territories. Births and deaths are also exclusive of stillbirths.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series.

²Includes residual error of estimate.

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. ²The labour force as a percentage of the population 14 years of age and over. ³The unemployed as a percentage of the labour force. Source: Labour Force Bulletin, (71-001), D.B.S.

¹See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. ²Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. Source: The Labour Force, (71-001) D.B.S.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included.²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ³Includes miscellaneous manufacturing industries. ⁴Includes also publishing and allied industries. ⁵Includes also the storage and communication industries.

Source: Labour Gazette, Department of Labour.

*Revised monthly data will be available later.

¹The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and public administration and defence. ³Includes storage, electric power, gas and water utilities. ⁴Excludes domestic service. *Sources:* Employment and Average Weekly Wages and Salaries, (72-002), D.B.S.

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total manufacturing inventory owned by manufacturers including warehouse stocks. ³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ⁴End of period. Annual figures for inventories and unfilled orders are end of December values.

¹Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

²100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. ³Customs exports. ⁴Mill shipments destined for export. Sources: Pulpwood and Wood Residue Statistics (25-001), Trade of Canada, Exports (65-004), D. B. S.; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.

¹Data on net shipments relate to rolled steels products only. Shipments to consuming industries of castings, forgings and steel pipe are not included.²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal.⁴Excluding shipments for re-processing at maker's own plant. Source: Primary Iron and Steel (41-001), D. B. S.

J	36.0				120.5	39.5	5.2	29.9	4.4			

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field less field flared and waste, Canadian sources only. ⁴By gas utilities, Canadian sources only.

Sources: Crude Petroleum and Natural Gas Production (26-006), Refined Petroleum Products (45-004), Gas Utilities (55-002), D.B.S.

Table 63: statistics of refined petroleum products¹ (thousand barrels)

¹Barrels of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. ³Refinery production from crude oil, condensate and pentanes plus, and commingled propane/butane mixes plus other materials used. ⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns. ⁶Includes stove oil, kerosene and tractor fuel. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. ⁹Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. ²End of period. Source: New Residential Construction (64-002), D. B. S.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected.
²Planks and boards, flooring and square timber.
³Hollow blocks including fireproofing and load-bearing tile.
⁴For building insulation only.
⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada.
⁶Factory sales of firms which normally account for 96% of total Canadian production.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), D.B.S.

¹These indexes are available for January, April and August only. ²Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. ³Exclusive of Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the Index are initial prices only for wheat, oats and barley. ⁴Barley No. 1 feed; hogs grade "B" alive. ⁵Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. ⁶Quotations refer to steers of all weights. ⁷Grade "B" hogs. Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.

¹Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada.

Data shown for the last four months are not so adjusted.

²Production is calculated as the sum of the current manufacturers' shipments and the net change in manufacturers' inventories from the previous months. ³Includes stocks held by manufacturers, wholesalers and other warehouses. ⁴Includes baking and frying oils and fats. ⁵Includes stocks held by manufacturers and other warehouses. ⁶Includes beef stews and boiled dinners. ⁷Includes fresh sausage, frankfurters, weiners and all other sausage. ⁸Includes solid, coated, bulk, packages and novelties. ⁹Includes tomato sauce, sauces for meat and fish and sauces, other. ¹Total value of retail trade seasonally adjusted includes sales of department stores, general merchandise stores, variety stores and all other stores. Due to changes in definition of department stores, the re-classification of some variety store firms and the introduction of general merchandise stores, formerly in all other stores, the unadjusted data for 1968 are not comparable with the data of previous years; general merchandise store sales were \$42,730,000 in January, \$44,853,000 in February, \$53,768,000 in March, \$59,679,000 in April, \$63,110,000 in May and \$58,711,000 in June 1968. Source: Retail Trade (63-005), D.B.S.

¹Department store stocks at end of period at selling value. The sales and stocks data are revised series based on the results of the 1961 Census of Merchandising and Service Establishments. ²Due to changes in definition of department stores and the introduction of general merchandise stores, formerly included in all other stores, the 1968 figures are not comparable with the data of previous years.

¹The figures in the first four columns, i.e. all countries, United States, United Kingdom and all other countries, for the period April 1966 through July 1967 have been revised to account for delays in the receipts of customs documents. The revisions have not been extended to columns of figures for other countries, and their sum differs from the revised "all other countries" and "Total Imports" shown in this table. ²Includes Belgium, Luxembourg, France, Germany, Italy and Netherlands.

Source: Trade of Canada, Imports (65-007), D.B.S.

¹Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. ²Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over \$60,000 annually prior to January, 1964 and over \$100,000 annually since. ³United States and other foreign carriers having scheduled services into and out of Canada. Excludes passengers in transit through Canada. ⁴Cargo includes air freight and express but excludes mail and excess baggage. ⁵Data prior to 1964 do not include bulk transportation. Because of survey limitations, data on bulk transportation after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18,000 lbs.

¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. ¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (excluding government-owned companies). ²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes agriculture, forestry, fishing and construction. Source: Corporation Profits (61-003), D.B.S.

¹This statement includes only receipts relating to Budgetary Revenue. Excluded are Non-Budgetary Revenues such as Old Age Security Fund Taxes, Prairie Farm Assistance Act Levies, Employer and Employee Contributions to Government Held Funds (Unemployment Insurance, Superannuation etc.), Interest on Government Held Funds, and Taxes collected on behalf of and transferred to Other Governments. ²For comparative purposes figures may differ from those previously reported to reflect changes in accounting during 1967-68. Figures are rounded and may not add to totals. ³March includes supplementary payments arising from the closing of the accounts.
