A NOTE TO USERS

Revisions:

Page S-6 and Table 67: Building Permits by Type

Seasonally adjusted data for building permits by type are revised for the entire period commencing with January 1948. The series have been adjusted by the X-11 variant of the United States Bureau of the Census, Method II, seasonal adjustment program. Adjustments made for trading-day variation were derived from actual variations in the data.

Page S-9: Commercial Failures

The series on commercial failures has been adjusted by the X-11 variant of the United States Bureau of the Census, Method II and revised from 1955 onwards. The unadjusted data are unchanged.

Annual Subscription: \$5.00 — Single copy: 50c.

This Review and other publications of the Dominion Bureau of Statistics, including a free annotated catalogue of current publications may be ordered from Publications Distribution, Dominion Bureau of Statistics, Ottawa, Ont. or from the Queen's Printer, Ottawa, Canada, and remittances made payable to the Receiver General of Canada.

**NATIONAL ACCOUNTS, INCOME AND EXPENDITURE,
FOURTH QUARTER AND PRELIMINARY ANNUAL,
1967**

Annual Review

This report incorporates some revisions to data for the years 1964, 1965, 1966 and the first three quarters of 1967, mainly resulting from the availability of new information. The series affected are government revenue and expenditure for the years 1964 on; personal expenditure on consumer goods and services, and wages, salaries, and supplementary labour income starting with 1965 and, business gross fixed capital formation, value of physical change in inventories, corporation profits, and capital consumption allowances and miscellaneous valuation adjustments for the year 1966 and the first three quarters of 1967.

A seventh consecutive year of expansion carried the gross national product to a level of \$62.1 billion in 1967, an increase of 6.8 per cent following the exceptionally large advance of 11.3 per cent of the previous year. Prices continued to rise, but at a somewhat lower rate than in 1966—3.9 per cent compared with 4.5; the gain in real terms was reduced to 2.8 per cent. A dampening influence on GNP was exerted by a western grain crop much smaller than the record crop of 1966 which bolstered that year's rise; excluding the accrued net income of farm operators, the advance in GNP in value terms was 8 per cent in 1967 compared with 10.5 per cent in 1966.

For the year as a whole, the general profile of the economy was one of a widespread easing of demand pressures. Every major expenditure category showed a lower rate of increase than in 1966 except business gross fixed capital formation which dropped by 1 per cent; within this category divergent movements occurred, with residential construction expenditures rising much more strongly than in the prior year and outlays on plant and equipment declining by 3.5 and 2 per cent respectively.

Within the year, the pace of expansion in GNP was somewhat uneven—2 per cent in each of the first two quarters, one-half of one per cent in the third and 1 per cent in the fourth. Personal expenditure rose continuously during the year while the capital formation aggregate declined throughout; other components displayed fluctuations, with considerable volatility occurring in non-farm inventories and in the external sector.

A major source of strength was personal expenditure; buoyed up by outlays related to Expo, it increased by over 8 per cent, not much lower than the 1966 rate of advance. Both non-durables and services continued to show strength, while durables advanced only moderately in spite of a 3 per cent rise in new and used car purchases which showed no change in the prior year. In real terms, the advance in total spending of over 4.5 per cent was also close to the gain of last year. However, there

was a shift in price movements; food prices were virtually unchanged, while a pronounced degree of price acceleration in durables and services accounted for half the increase in value terms.

Developments in the external sector were among the highlights of the year. The current account deficit on a national accounts basis narrowed substantially to \$549 million from \$1,207 million in 1966, as exports of goods and services increased by 11.5 per cent while imports advanced 6 per cent overall but declined in the last two quarters. An increase in merchandise exports of 10.5 per cent combined with an 8 per cent advance in imports more than doubled the merchandise surplus to \$480 million. Exports to the United States, where economic activity quickened in the second half of the year after a slowdown in the first half, rose 17 per cent while imports advanced 12.5 per cent, substantially reducing the trade deficit; notable also was an increase of 45 per cent in exports to Japan. On non-merchandise transactions, receipts increased by over 17 per cent while payments rose barely 2 per cent; thus the deficit was reduced by \$402 million. Prominent in this development was the Expo-affected tourist and travel account which switched from a deficit of \$63 million to a surplus of \$427 million, only the second surplus since 1950.

Government expenditures on goods and services rose considerably less than in 1966—9.5 per cent compared with 17.5. All levels of government reflected the reduced rate of advance: at the federal level, the rise was 8.5 per cent as against 19 per cent, while the increase at the provincial-municipal level was 10 per cent compared with 16.5 per cent. Inclusive of contributions to the Canada and Quebec Pension Plans, the combined government surplus was reduced by more than half, to \$157 million. Excluding the pension plan contributions the provincial-municipal deficit narrowed by \$62 million while the federal government switched from a small surplus to a deficit of \$256 million.

Notable differences from the pattern of the previous year occurred among the components of business gross fixed capital formation. Expenditures on new residential construction advanced 7.5 per cent, up sharply from 2 per cent in 1966. Aided by developments in the money market and government action relating to interest rates on NHA—approved loans and to CMHC direct loans to builders in the spring, housing starts jumped sharply in the second quarter and remained near this level in the latter half of the year. For the year, starts increased to 164,000, some 30,000 units over 1966. This was heavily concentrated in multiple units which rose to 92,000; single family unit starts advanced by 2,000.

In striking contrast, investment in plant and equipment declined by 3 per cent after annual increases of over 20 per cent in the period 1964-66.

IN 1967 G.N.P. INCREASED BY 6.8 PER CENT.

FELL BELOW THE INCREASE IN LABOUR FORCE

QUARTERLY DATA, SEASONALLY ADJUSTED, AT ANNUAL RATES

A small decline in the first quarter deepened substantially in the next two before moderating in the fourth quarter; in the last three months of 1967, such investment was running 16 per cent below the peak of the fourth quarter of 1966. Movements in the two components diverged somewhat: non-residential construction declined for the first three quarters before recovering in the fourth, while machinery and equipment declined in the last three quarters after a small increase in the first. With the exception of investment in manufacturing, outlays on plant and equipment ran slightly ahead of last year; however, manufacturing investment declined by 14 per cent with drops of 9 and 19.5 per cent in non-durables and durables respectively.

An anticipated 1.5 per cent rise in business capital formation is revealed in the 1968 investment intentions survey, with the entire increase coming from a 9.5 per cent rise in residential construction; outlays on plant and equipment are expected to be

virtually unchanged, with a 1 per cent increase in non-residential construction offset by a 1 per cent decline in machinery and equipment.

Investment in non-farm business inventories showed a small increase for the year, but was almost \$600 million below the accumulation of 1966. Over three quarters of the reduction was at the manufacturing level, where durables shifted from sizeable accumulation to moderate liquidation, but reduced investment also occurred at the retail and wholesale levels. Considerable accumulation in the third quarter followed two quarters of moderate investment; however, this gave way to liquidation in the fourth quarter.

The following table summarizes the pattern of demand and the sources of supply for the last three years. Interesting to note is the relative decline of imports in 1967 as a source of supply for the increase in demand.

Demand and its Sources of Supply
Value of change from preceding year¹

	1965	1966	1967
billions of dollars

² GNP inclusive of the residual error of estimate.

Implicit in the aggregates of the income side are some significant developments relating to output and employment. Excluding agriculture, the gain in output as measured by the indexes of real domestic product was slightly more than 3 per cent; the increase in services was somewhat lower than in the last two years, while the rise in the goods-producing sector was much reduced largely due to an increase of only one half of 1 per cent in durable manufacturing. As a result, there was a considerable shift in the composition of output, with services accounting for over two thirds of the increase as compared with two fifths in the two previous years. The labour force increased almost as rapidly as in 1966, but employment rose by a substantially lesser

amount and remained virtually stationary in the latter half of the year. The industrial composite employment index recorded a 1.5 per cent advance, while declines occurred in the durable manufacturing and construction indexes. The bulk of the increase in employment occurred in the service sector; with greater job opportunities for woman in this area, the rise in female employment was much larger than that for man - 6 per cent as against 2 per cent - and for the first time since 1961 women accounted for more than half the total increase. The unemployment rate rose from 3.6 per cent in 1966 to 4.1 per cent, and reached 4.7 per cent during the last quarter before declining somewhat in early 1968.

Labour income increased by over 9 per cent, reduced from the exceptionally large 13.5 per cent rise of 1966; almost three quarters of the advance occurred in the service-producing sector, while pay increases in both goods and services were greater than last year. Preliminary indications are that the increase in output per person employed in the commercial non-agricultural industries during 1967 was lower than that of 1966, itself a below-average year. Unit costs continued to rise and were partly absorbed by profit margins; gross profits advanced 1 per cent compared with 3 per cent in 1966, while net profits declined a further 2.5 per cent after a 1 per cent decline previously.

A special feature of 1967 was agriculture. The value of the grain crop was some 22 per cent lower than the value of the record 1966 crop. Reflecting this, accrued net income of farm operators declined 23 per cent after the 34 per cent increase of 1966, though it was some 3 per cent higher than in the

less exceptional year of 1965. An unusual development, however, was a break in the downward trend of agricultural employment which increased for the first time since 1954; combined with lower production, this resulted in a very substantial reduction in output per person employed.

Price Movements

Price increases in 1967, though somewhat lower than in the previous year, were still strong and widespread. Overall prices as measured by the implicit price index of Gross National Expenditure rose 3.9 per cent compared with 5.4 per cent in 1966. Quarterly price movements reveal a deceleration in the second part of the year and especially in the last quarter. The year-to-year movements in the implicit price indexes of the major components of Gross National Expenditure are shown in the following table:

Implicit Price Indexes
Percentage change from the previous year

	1962	1963	1964	1965	1966	1967
Personal expenditure	1.3	1.6	1.5	1.9	3.5	3.3
Non-durable goods	1.2	1.7	1.7	1.9	4.1	1.9
Durable goods	- 0.2	0.3	- 1.0	- 0.3	-	2.6
Total goods	0.9	1.4	1.0	1.5	3.2	2.2
Of which: Food	2.0	2.6	1.6	2.6	6.2	0.1
Non-food goods	0.2	0.7	0.9	0.9	1.9	3.3
Services excluding net expenditure abroad	1.7	1.4	2.3	2.9	3.9	5.7
(Personal expenditure excluding food)	(1.0)	(1.1)	(1.6)	(1.7)	(2.8)	(4.2)
Government expenditure	2.7	4.1	3.2	5.0	5.9	6.2
Business gross fixed capital formation	2.8	3.1	4.4	4.3	3.8	2.3
Residential construction	2.9	3.4	5.5	5.0	6.0	7.2
Non-residential construction	2.2	3.4	4.4	6.1	5.4	5.0
Machinery and equipment	3.0	2.6	3.8	2.7	2.1	- 1.8
Exports	3.1	1.2	2.0	1.4	3.2	1.7
Imports	4.1	2.9	1.2	0.4	2.0	1.2
Gross National Expenditure	1.5	1.8	2.6	3.0	4.5	3.9

The most striking increases occurred in non-food goods, in services, government expenditure and in construction. Within non-food goods there was an increase in the price of durables, reversing the apparent trend of the last few years towards slowly declining prices. Virtually unchanged food prices — after the strong rises of previous years culminating with a 6.2 per cent increase in 1966 — exerted a moderating influence on the overall price advance. Another notable factor dampening overall price pressure was the decline in machinery and equipment prices.

In personal expenditures all major non-food categories showed accelerating rates of price increase. These price increases were in part a reflection

of increased indirect taxes by all levels of government. The rise in durable goods prices started in the second quarter and was maintained at a somewhat slower rate through the rest of the year. Particularly notable were the more than 5 per cent rise in the prices of furniture and miscellaneous durables and the 1.6 rise in car prices. There was a marked acceleration in the rate of price increase of non-durables other than food; many major items such as clothing, newspapers and magazines, electricity, tobacco, and gasoline, grease and oil showed increases of between 3 and 7 per cent. The implicit index for services rose by 5.7 per cent, the strongest increase in many years. Most prominent were the increases in prices associated with medical care, recreation, education and transportation. Rents also rose strongly, continuing the acceleration noted in

1966. Within food, the rate of price increase of most components was reduced, while some items—pork, poultry, eggs, and fresh vegetables declined sharply.

More than half of the very strong rises in the implicit price indexes for both residential and non-residential construction was largely attributable to labour cost for the second successive year. Machinery and equipment prices declined for the first time

since the current expansion began in 1961; this resulted from the complete removal in June of the federal sales tax on production machinery and equipment.

The increase in export prices was more moderate than in the previous year. Some important components showed price declines, notably wheat, and meat and meat preparations.

The Components of Demand

Personal Expenditure on Consumer Goods and Services

Personal Expenditure on goods and services reached a level of \$37.7 billion in 1967, an increase of some 8 per cent compared with 8.5 per cent in the preceding year. Expo and other centennial events had a considerable part in this rise, though it should be noted that the large expenditures made by foreign tourists are not included in this aggregate.¹

The large increase in non-durables was broadly based, but especially notable were rises of some 11 per cent in alcoholic beverage purchases, 10 per cent in outlays on energy sources and 9 per cent on drugs and cosmetics. Total food outlays increased at a lower rate than in 1966—6 per cent as against 7—with prices increasing only fractionally after a 6 per cent advance previously. The gain in volume terms, however, was significantly larger.

The slightly higher rate of advance in durables in 1967, 4.5 as against 4 per cent, was due to a 3

per cent gain in new and used car purchases which showed no change in 1966. All other components had lower rates of increase than in the previous years, with furniture rising by 4 per cent, home furnishings by 8 per cent, and radios and appliances by 7 per cent. If price increases are allowed for, the real increase in durables outlays in 1967 was half the increase of the previous year.

The 11.5 per cent increase in services in services excluding net expenditure abroad¹ was also broadly based, but the most pronounced increases were in the series affected by Expo. Recreation expenditures soared by almost 30 per cent, while outlays on purchased transportation rose by over 19 per cent. Other significant advances were registered in medical outlays and household operations (10.5 per cent each) and in the shelter component (9 per cent). Also noticeable were sharp increases in price, which accounted for fully half the overall rise.

¹ See footnote to following table.

Personal Expenditure — Per cent Changes

	Year 1963 to year 1964	Year 1964 to year 1965	Year 1965 to year 1966	Year 1966 to year 1967
Total non-durables	6.4	7.3	9.7	9.2 ¹
Purchased food	5.1	5.7	7.3	5.8
Clothing (including footwear)	6.3	6.2	5.8	7.0
Alcoholic beverages	5.5	9.2	7.7	11.3
Tobacco	1.8	8.2	6.2	6.4
Total durables	10.7	11.4	4.2	4.7
New and used cars	11.8	14.2	—	2.9
Furniture	6.0	6.2	7.0	4.1

Radios and appliances	7.9	8.5	10.9	7.0
Total goods	7.3	8.1	8.5	8.3
Total services (including net expenditure abroad)	9.0	8.0	8.9	8.1 ¹
Shelter	6.3	6.8	8.5	8.8
Total transportation	7.4	7.9	7.9	14.3
Household operations	9.9	9.2	10.7	10.7
Total personal expenditure	7.9	8.1	8.7	8.2

¹ Personal expenditure on consumer goods and services is a measure of all expenditures by Canadian residents, including those temporarily abroad. Since measures of the value of outlays on consumer goods and services in Canada are derived from sales made within the territorial boundaries of Canada, the values must be adjusted to include expenditures abroad by Canadian residents and to exclude outlays in Canada by non-residents. This adjustment is called **Net expenditure abroad**. Net expenditure abroad is composed of outlays on both commodities and services. As it is impossible to determine these elements in the net figures, the whole adjustment has traditionally been included with services. The item is generally small and does not significantly distort period-to-period comparisons of either aggregates or individual series. However, with the exceptional influx of tourists occurring in the second and third quarters of 1967, the adjustment to exclude purchases by non-residents has become large, distorting the analytical continuity of the non-durable and services aggregates and certain of their components.

Business Gross Fixed Capital Formation

Business gross fixed capital formation including housing totalled \$12.4 billion in 1967, a decline of 1 per cent from the revised 1966 level. While outlays for new housing advanced 7.5 per cent, business expenditure on plant and equipment fell by 3 per cent consisting of declines of 3.5 per cent and 2 per cent respectively in non-residential buildings and structures and in machinery and equipment. These decreases resulted from a considerable falling-off in investment activity by manufacturers both durables and non-durables, and by service establishments. Declines occurred in all four quarters, though outlays on structures recovered somewhat in the last three months of the year.

The diminution of 2 per cent in new machinery and equipment outlays from the final 1966 estimates (revised upward) reflected major cutbacks by manufacturers. The sharp drop of 3.5 per cent in non-residential building and engineering construction expenditures in 1967 was associated with decreases for all industries except agriculture and, notably, electric power. However, the service industry expenditure decline was confined to the commercial sector, with university and hospital construction continuing its upward course.

A number of fiscal measures were effected in 1967 to prevent a larger decline in business investment expenditures. The sales tax on production

machinery and apparatus was lowered from 11 to 6 percentage points in April and completely removed in June. Other measures included the termination on March 31, 1967 of the refundable tax on business profits and the removal of the previous year's measure regarding capital cost allowances.

The value of new residential construction rose by 7.5 per cent between 1966 and 1967 to a level of \$2.3 billion. However, completions actually fell by close to 9 per cent from 162,000 to 149,000 units as a consequence of the low carryover of units under construction (89,000) at the beginning of the year. By the end of 1967, units under construction had risen to 103,000. Starts eased from a peak annual rate of 174,000 in the second quarter to 168,000 in the fourth, still well above the 1966 level of 134,000; the total number of starts for 1967 was 164,000.

The following table shows that, although total mortgage approvals increased from the low 1966 level, the major part of the improvement was the result of increased lending by approved lenders under the National Housing Act and continued provision of funds by CMHC. In particular, as a result of changes in the Bank Act in May of the year, chartered banks figured prominently in the mortgage market for the first time. Conventional mortgage lending, although up for the year, remained substantially below the 1965 level despite rises in interest rates during the year.

Mortgage Loan Approvals Gross Basis

Dwelling units

	1965	1966	1967
Under National Housing Act:			
Approved lenders	25,516	14,567	27,154
Central Mortgage and Housing Corporation	33,942	37,560	42,689
Sub-totals	59,458	52,127	69,843
Conventional lenders	90,221	54,489	68,586
Totals	149,679	106,616	138,429

Investment in Non-farm Business Inventories

Investment in non-farm business inventories showed an accumulation of \$189 million in 1967, a sharp drop from the \$777 million accumulation of the previous year. In the first half of the year there was a moderate accumulation, while a notable build-up followed by a sharp liquidation occurred in the latter half.

Manufacturing contributed about 20 per cent to the total accumulation in 1967. This was entirely concentrated in the investment of non-durable goods-producing industries, which more than offset

a noticeable liquidation in the stocks of durable goods. Mixed movements occurred in the components of both durables and non-durables. The stock-to-shipments ratio for the year as a whole was much above the average ratio of the previous year.

Investment in wholesale trade contributed about 50 per cent to the total accumulation of non-farm business inventories in 1967. The accumulation in wholesale took place entirely in the stocks of durable goods. In non-durable goods there was a slight liquidation resulting from mixed movements in the components. The stock-to-sales ratio for the year was higher than in 1966.

About 20 per cent of the total increase in the investment of business inventories occurred in retail trade. This stock building was mainly concentrated in durable goods with the exception of stocks of motor vehicle dealers which showed a moderate depletion. At the total level in non-durable lines,

there was a small build-up, with a noticeable accumulation in the stocks of food dealers offsetting a general liquidation in most other categories. The stock-to-sales ratio for the year was lower than in the previous year.

Value of Physical Change in Non-farm Business Inventories

	Seasonally adjusted at annual rates, 1967				1966	1967	1967 minus 1966

Grand totals	176	208	684	- 312	777	189	- 588

Exports and Imports of Goods and Services

Canada's exports of goods and services rose to \$14.6 billion in 1967, an increase of 11.5 per cent over the level of 1966. At the same time, imports of goods and services rose 6 per cent. Thus, the improvement in the deficit on international current account from \$1.2 to \$0.5 billion (on a national accounts basis) was one of the feature developments of the year. Improvement in the deficit was attributable to an increase in the balance on merchandise trade of \$256 million, dramatically reinforced by a contraction of the deficit on non-merchandise trade of \$402 million.

Merchandise exports rose in the first half of the year, dropped sharply in the third quarter, and moved to a peak in the fourth quarter. At \$11.4 billion for the year, they were 10.5 per cent higher

than in 1966. Trade of Canada figures for domestic exports show a gain of \$1,051 million in United States markets. Of this increase, \$963 million was in end products, in particular, cars and trucks, engines and parts, as well as aircraft engines and parts. A sharp drop in sales of wheat to Eastern Europe and Asia, in particular to the Soviet Union and China, was offset by very large increases in exports to Japan, Italy and the Netherlands.

Merchandise imports reached a peak in the second quarter and declined during the second half of 1967. At \$10.9 billion, they were about 8 per cent higher than in 1966. Trade of Canada revised data attribute \$752 million of the \$802 million increase to the United States suppliers. Increased imports of automotive products accounted for more than 70 per cent of the rise. Other important items included aircraft with engines and parts, and crude petroleum.

Exports and Imports of Goods and Services

	Goods			Services			Current balance
	Exports	Imports	Net	Exports	Imports	Net	
	millions of dollars						
1963	7,082	6,579	503	2,029	3,039	- 1,010	- 507
1964	8,238	7,537	701	2,340	3,433	- 1,093	- 392
1965	8,745	8,627	118	2,520	3,773	- 1,253	- 1,135
1966	10,326	10,102	224	2,747	4,178	- 1,431	- 1,207
1967	11,385	10,905	480	3,223	4,252	- 1,029	- 549
1966-67 (per cent)	10.3	7.9		17.3	1.8		

Turning to consider the service account, receipts rose nearly 17.5 per cent, payments by less than 2 per cent. The major factor was the turnaround in the net tourist and travel account from a deficit of \$63 million to a surplus of \$427 million. This was only the second surplus since 1950; in 1963 there was a modest positive balance of \$24 million.

The remarkable lift of Expo and other centennial activities along with a small decline in the deficit in freight and shipping transactions offset a drop in gold production available for export, higher official contribution payments, and larger deficits for income, business and other governmental transactions.

³ Components will not necessarily sum to totals because of roundings.

The Government Sector

Total revenue of all governments combined (excluding intergovernmental transfers) rose by \$2,265 million to \$21.3 billion, an increase of nearly 12 per cent. Of this, \$167 million were higher revenues of the Canada and Quebec Pension Plans. Total expenditure rose somewhat more, \$2,456 million, or 13 per cent, so that the overall surplus, on a national accounts basis, declined from \$348 to \$157 million.

On the revenue side, direct taxes increased by nearly \$1 billion or 14 per cent. Personal direct tax, almost all income tax, increased by rather more than this, while corporation tax revenue decreased slightly. The proportionately greater income of the provincial governments from these sources was the result of increased abatements to the provinces from the federal government. Part of the increase in personal direct taxes at the federal level can be attributed to the doubling of the maximum old age security tax on personal income imposed at the beginning of the year.

In indirect taxes the rise of \$761 million, or 9 per cent, went mainly to the provincial and municipal governments, with the federal government receiving only one-sixth. At the provincial level, larger sales tax revenue accounted for most of the increase, with higher rates levied in Quebec, New Brunswick and Newfoundland, and the introduction of a sales tax in Manitoba. The only other large gain was in gasoline taxes. The rise in municipal indirect tax revenue resulted from an 11.5 per cent increase in property taxes. The smaller rise in fed-

eral indirect tax revenue came mainly from an increase of 1 per cent in the sales tax rate, partially offset by the abolition of sales tax on production machinery and equipment and drugs during the year.

In expenditures, total outlays on goods and services rose by over \$1 billion, with each of the three levels of government increasing its spending by about the same amount. At each level of government this was mainly caused by increases in wages and salaries, with capital formation rising more slowly than the previous year. Transfer payments rose by \$1.3 billion, with large increases in Old Age Security Fund payments resulting from the lower age limit and the introduction of the guaranteed minimum monthly income supplement to old age security recipients, and in hospital and education grants. Smaller increases occurred in employment benefits and Workmen's Compensation benefits.

With the inception of the Canada Assistance Plan, and higher transfers under taxation agreements, transfers from the federal government to the provincial and municipal governments rose by \$330 million.

Thus, with federal expenditures increasing by nearly 13 per cent while revenues were rising by 8.5 per cent, the federal surplus of \$164 million in 1966 became a deficit of \$256 million in 1967. At the provincial-municipal level the deficit eased from \$535 million in 1966 to \$473 million in 1967.

The Components of Income

Labour Income

Labour income was more than 9 per cent higher in 1967 than in 1966. Most of the increases reflected higher average earnings, largely the result of higher rates of pay. The increase in the number of employees was less than in the previous year.

Continuing the trend established in the latter half of 1966, labour income in the service-producing sector advanced more rapidly than in the goods-producing sector. The increase in the service-producing industries of 12 per cent, slightly higher than last year, accounted for almost three-quarters of the increase in total wages and salaries, compared with slightly more than one-half of last year's increase. The largest relative gains in wages and salaries were recorded in public utilities (15.5 per cent), service (13 per cent), and transportation, storage and communication (12 per cent). Increases in average weekly earnings were greater this year than last, offsetting a slightly reduced rate of increase in employment. This trend was common to most components.

Government wages and salaries rose by almost 14 per cent in 1967; provincial government payrolls showed a greater increase than the federal government, 20 per cent compared with 10.5 per cent. Municipal government payrolls rose by about 12 per cent over the year.

In the goods-producing sector, wages and salaries increased by approximately 6 per cent as compared to about 13.5 per cent in 1966. The primary industries showed an increase of 7 per cent, about the same rate as last year. Within the group, wages and salaries in mining increased faster than in 1966, in spite of lower average hours worked and a lower rate of increase in employment. Declining rates of increase were recorded in the other primary industries. Manufacturing wages and salaries advanced by about 6 per cent, compared with 11.5 per cent in 1966. Employment in this industry showed little change for the year, and average hours worked were lower, but the increase in average hourly earnings was somewhat greater than in 1966. Wages

and salaries in construction were about 4 per cent higher than last year, as compared with increases of almost 25 per cent in both 1965 and 1966. The slowdown in the rate of increase was the result of declines in employment and in average weekly hours worked, although average hourly earnings increased at a slightly faster rate than in the prior year.

Corporation Profits

Net corporation profits declined a further 2.5 per cent in 1967 following a 1 per cent dip in the previous year. However, these annual levels conceal some fluctuations within the period. A rising trend in profits came to a high point in the first quarter of 1966 and was followed for several quarters by movements around a generally declining trend. Profits have moved upward through the last three quarters of 1967, but are still slightly below the first quarter 1966 peak.

Three factors influenced the fluctuations of the last two years. First, the drop in profits in the third quarter of 1966 was reinforced by a number of strikes in the economy. Second, those rail subsidies which are included in corporation profits were particularly high in the fourth quarter of 1966, and had the effect of bolstering the rise in that quarter. Third, fluctuations in the movements of quarterly capital consumption allowances over the past two years influenced movements in net profits.

Net profits in 1967 were lower in the mining industry by 1 per cent, manufacturing 4 per cent, and wholesale trade 5 per cent. A 21 per cent drop in transportation, storage and communication was related to a significant rise in capital consumption allowances, when a tax ruling was introduced in the early part of the year permitting telephone companies to claim higher allowances than previously permissible. Profits of the utility group expanded nearly 25 per cent, while advances of 6, 7 and 15 per cent respectively were experienced in the retail trade, finance, and service industries.

Within the manufacturing industry, profit changes in 1967 were varied with more declines than gains. The textile, wood, paper, electrical, non-metallic mineral, and chemical categories all marked profit declines. The profits of the rubber, petroleum and coal, and printing and publishing groups progressed from their 1966 level, while little change was noted in the food and beverage, and metal industry profits.

Fourth Quarter 1967

Introduction

The Gross National Product increased by 1 per cent in the fourth quarter to reach a level just below \$63 billion. After allowing for price increases, almost half of the advance represented a gain in real terms; this compared with a decline of about one-half of one per cent in the volume of production in

Other Investment Income

Rent, interest and miscellaneous investment income rose by nearly 13 per cent in 1967 compared with about 9 per cent in 1966. Government investment income for all levels combined was higher by \$336 million against a rise of \$142 million in 1966. About 40 per cent of the increase in government investment income came from higher trading profits of government enterprises. This was mainly at the provincial level, with the trading profits of liquor commissions accounting for about half the rise.

Accrued Net Income of Farm Operators

Accrued net income of farm operators from farm production fell by 23 per cent from the exceptionally high level of the previous year.

Predominant in the decline in the value of grain production was a much smaller grain crop than the record crop of 1966; moreover, Canadian Wheat Board profits were considerably reduced from the record level of 1966, reflecting much lower exports in the third and fourth quarters.

Slightly offsetting this movement were advances in livestock production and higher income from other farm products—mainly dairy products, where subsidies were a factor, and tobacco.

Operating expenses again recorded a moderate increase and contributed further to the decline in net income.

Net income of farm operators from farm production, which is reflected in the personal account, declined by nearly 13 per cent in 1967. The smaller decline in this component resulted from the record high final payments made by the Canadian Wheat Board in the first quarter.

Net Income of Non-farm Unincorporated Business

Net income of non-farm unincorporated business rose to \$3,194 million, slightly more than 8 per cent over the 1966 total.

Most industries registered gains over the levels reached in 1966. The service industries alone accounted for just under half the increase—a portion of which was due to Expo—while smaller gains were recorded in retail trade and construction.

the previous quarter. There were divergent movements in components of demand and some levelling on the income side.

Personal expenditure increased by \$640 million. Government expenditure rose by \$400 million to return to the second quarter level; increased outlays

by provincial and municipal governments accounted for over three quarters of the advance. New non-residential construction reversed the trend of three previous quarters with an 8.5 per cent advance. However, with residential construction little changed from the third quarter level, the 8.5 per cent decline in machinery and equipment kept the capital formation component as a whole at approximately the same level as in the third quarter. There was a liquidation in inventories of \$312 million, three quarters of which occurred at the manufacturing level.

Merchandise exports increased by 11 per cent, all of it going to the United States; the gain was largely in crude and fabricated metals, with little change in automobiles and automotive components. Non-merchandise receipts declined some 19 per cent, with all of the \$700 million decline occurring in tourist receipts as Expo came to end in October. The combination of an overall rise of 3 per cent in exports and a 1 per cent decline in imports resulted in a current account deficit of \$152 million, the lowest deficit since the surpluses of the first three quarters of 1952.

Some slowdown in the rate of increase of labour income was the most notable development on the income side, the 1 per cent rise being the smallest

since the first quarter of 1961. A fractional drop in employment occurred in the quarter while unemployment increased from 4.1 to 4.6 per cent.

Price Movements

As measured by the base weighted price index of GNE, prices advanced by 0.7 per cent in the fourth quarter; this compared with a 1.0 per cent increase in the third. Significantly slowing down the aggregate index were lower rates of increase in all major components of personal expenditures except durables. Business gross fixed capital formation, exports and imports all showed stronger movements this quarter than in the last two.

The softening in the rate of increase in consumer prices was most apparent in non-food non-durable goods, which did not increase at all. There was a fall in the price of women's clothing and a further decline in drug prices due to the removal of the federal sales tax on pharmaceuticals last September. Food prices rose by 0.8 per cent, significantly lower than the 2.0 per cent rise registered in the previous quarter. Seasonally adjusted data reveal that last quarter's strong increase was based in dairy products, cereal products, beef, fresh fruits and fresh vegetables. All these items except beef showed lower rates of price increase in the current

Gross National Expenditure (excluding inventories)	1.3	0.5	1.0	0.7
GNE (implicit price)	1.3	0.6	1.0	0.5

¹ Beginning with the third quarter the analysis of price movements is based on a new base weighted price index. It is felt that this improves analysis. Previously the table summarizing percentage price change was based on implicit price indexes derived from seasonally adjusted constant dollar aggregates. Implicit prices are affected by changes in current expenditure patterns as well as price, so that often an adjustment for weighting shifts is required in order to obtain a true picture of price change. The new index is weighted with expenditure patterns for the year 1966. For the most part the prices used are the seasonally adjusted prices used to derive seasonally adjusted constant dollars. In addition, the seasonally adjusted price detail used for the government index has been substantially improved.

² Quarter-to-quarter changes in this component are not necessarily analytically significant owing to incomplete price data.

period. Within services, prices of purchased transportation and recreation fell, while rents showed less of an increase than previously. For the third consecutive quarter, durable goods registered a very strong price increase of about 1 per cent. As in the last two quarters, increases in new car prices accounted for much of the increase but other durables also increased strongly. In contrast do most components, household appliances and radios declined slightly.

Within business gross fixed capital formation, machinery and equipment prices, which had been declining sharply in the second and third quarters largely as a result of the removal in June of the federal sales tax on production machinery, remained stable at these lower levels. Prices associated with construction showed increases, most of which were due to increases in the labour cost components of the indexes.

The most notable price rises in merchandise exports were recorded in crude vegetable materials, lumber, copper, nickel, and zinc.

The Components of Demand

Personal expenditure reached a level of \$38.8 billion, seasonally adjusted at annual rates, an increase of about 1.5 per cent as compared with a 2 per cent rise in the previous quarter. The total includes the adjusting item "net expenditure abroad", which swung sharply as Expo and other centennial events came to an end;² the impact of the net non-resident spending is shown in the following table:

² See footnote to table on page v.

Millions of Dollars, Seasonally Adjusted at Annual Rates, 1967

	1 Q	2 Q	3 Q	4 Q	Quarter-to-quarter change		
					1 Q-2 Q	2 Q-3 Q	3 Q-4 Q
Non-durables	17,768	18,388	18,844	18,952	620	456	108
Durables	4,136	4,408	4,544	4,372	272	136	- 172
Services (ex NEA)	14,500	15,132	15,672	15,608	632	540	- 64
Total personal expenditure in Canada	36,404	37,928	39,060	38,932	1,524	1,132	- 128
Net expenditure abroad	40	- 540	- 868	- 100	- 580	- 328	768
Personal expenditure	36,444	37,388	38,192	38,832	944	804	640

Non-durables and services both contributed to the advance. However, certain of their components are affected by the shift in net expenditure abroad, thereby qualifying their analytical usefulness.

After two quarters of increase, durable goods turned down by some 4 per cent, reflecting a 7 per cent decline in net purchases of new and used cars; excluding this category durables rose fractionally.

Mixed movements occurred among non-durable components. Increases occurred in tobacco (5.5 per cent) and liquor (1.5 per cent) which were affected by new excise taxes introduced in the November budget; expenditures on energy sources (fuel, electricity and gas) rose by 3 per cent and on household non-durables by one-half of one per cent. Outlays on clothing declined by 1.5 per cent as a 3 per cent decline in women's and children's clothing outweighed increases of 1.5 per cent and one-half per cent in footwear and men's clothing respectively. Declines of about 1 per cent occurred in both gasoline, oil and grease, and in food, with the latter affected in the meals sub-series by the end of Expo.

The fractional decline in services inclusive of net non-resident spending was confined to the Expo-affected series, though the Montreal transit strike also contributed to the 3.5 per cent decline in purchased transportation. After the exceptional increases of the previous two quarters, the 17.5 per cent decline in recreation was quite natural; also registering decreases were user-operated transportation (2.5 per cent) and miscellaneous services where hotel and motel accommodations are included (1 per cent). Increases of about 2 per cent were noted in medical care, household operations, and shelter.

Business gross fixed capital formation dropped by one-half of one per cent in the fourth quarter, continuing the quarterly declines from the peak fourth quarter 1966 level.

Expansion was recorded in both the construction components, with a sharp step-up of 8.5 per cent in non-residential buildings and structures, and a small advance of one-half per cent in residential outlays. However, investment in machinery

and equipment dropped by 8.5 per cent and more than outweighed the increases in the other components.

Housing outlays increased only slightly in the last quarter of 1967. While dwelling starts dropped slightly to an adjusted annual rate of 168,000 units, completions moved up from 156,000 to 170,000 units—a feedback from the high levels of starts in the spring and summer months.

The sizeable decline in demand for machinery and equipment was reflected in lower shipments of producer's durables as well as lower imports of non-farm machinery.

In contrast with the pronounced rate of accumulation in non-farm business inventories evident in the third quarter of 1967, a sharp liquidation took place in the fourth quarter, mainly at the manufacturing level. Seasonally adjusted estimates show a liquidation of \$312 million at annual rates, compared with a build-up of \$684 million in the previous quarter.

The decline in the stocks of manufacturing was the first since 1963. In non-durables, there was a swing from a noticeable accumulation to a significant liquidation, whereas in durables the third quarter liquidation deepened further in the fourth quarter. Though the major part of depletion in the stocks of manufacturers took place among durables, the turnaround was much sharper among non-durables. In durable goods-producing industries, the declines were general with the exception of the transportation goods-producing industries where there was a considerable accumulation. Among non-durables, the movements were mixed. A small amount of accumulation in tobacco, textiles, and paper industries was largely offset by a liquidation in the food, leather, clothing, petroleum and chemicals producing industries. There were declines in the stocks at every stage of processing. With new orders increasing more than shipments, the result

was a backlog of unfilled orders. The stock-to-shipments ratio was lower than in the previous quarter.

Investment at the wholesale level showed a moderate accumulation which was entirely concentrated in the hands of durable goods dealers. Though there was a modest accumulation in the stocks of groceries, stocks of non-durable goods dealers declined somewhat. The stock-to-sales ratio was a little higher than in the previous quarter.

At the total retail level, investment in inventories showed no increase at all—a large and widespread build-up in the stocks of durable goods was offset by an equal liquidation in those of non-durable goods. Among durables, the major strength came from the stocks of motor vehicle dealers. Disinvestment in the stocks of non-durables was general with the exception of stocks of food which showed a fractional increase. The stock-to-sales ratio for the current quarter was higher than that of the previous quarter.

With exports of goods and services rising by 3 per cent and imports declining by about 1 per cent, the deficit on external account narrowed by \$584 million. This net change in the overall balance of trade reflected an improvement of \$1,388 million in merchandise and a deterioration by \$804 million in non-merchandise trade.

Exports of goods rose almost 11 per cent. Lower shipments of wheat and lumber were offset by higher shipments of fish, iron ore, aluminum, copper, nickel, zinc, natural gas, asbestos, newsprint, fertilizers, primary iron and steel, steel bars-rod-plate, non-farm and farm machinery. Part of the 2 per cent drop in imports was due to the current quarter decline in investment outlays, particularly machinery and equipment.

Most of the deterioration in the services account resulted from sharply reduced tourist and travel receipts with the closing of Expo in October.

Exports and Imports of Goods and Services

Seasonally adjusted, at annual rates, in millions of dollars

1967-3 Q-4 Q	10.8	- 2.2		- 19.2	2.6		

The Government Sector

Seasonally adjusted at annual rates, total expenditures of all governments combined (excluding intergovernmental transfers) rose by \$996 million to a rate of \$22,092 million. Higher outlays on goods and services, particularly at the provincial-municipal level, accounted for almost half the increase. An increase of similar size occurred in transfer payments, again mainly at the provincial-municipal level, partly associated with higher education and adult training grants.

Total revenues rose by \$484 million to a rate of \$22,032 million. Most of the increase resulted from higher returns from personal direct taxes, and was divided fairly evenly between the federal and provincial governments. Indirect taxes rose by \$148 million, partly because of higher sales tax revenue from a higher volume of sales, especially at the provincial level.

With expenditures rising more rapidly than revenues, the government sector as a whole moved from a surplus, on a national accounts basis, of \$452 million in the third quarter to a deficit of \$60 million in the fourth quarter. Most of this change resulted from movements at the provincial-municipal level, where the deficit showed a sharp increase from \$236 million to \$676 million. The federal deficit increased somewhat, from \$208 million to \$296 million, while the surplus of the Canada and Quebec Pension Plans showed little change.

Components of Income

In the fourth quarter of 1967, labour income rose by slightly more than 1 per cent. This was lower than the rise in the second and third quarters of 1967, and less than half as large as the quarterly increases recorded throughout 1966 and the first quarter of 1967. The lower rate of increase was partially due to a reduction in employment in the goods-producing industries, although the rise in payrolls in the service-producing sector was also lower than that recorded throughout 1966 and the first three quarters of 1967.

In the goods-producing sector, total labour income increased slightly. This was almost entirely accounted for by increased earnings since declines in employment were recorded. In manufacturing, a slight increase in hours worked and continuing increases in average hourly earnings were partially offset by a decline in employment, resulting in a small increase in total payrolls. In the primary industries, wages and salaries rose by slightly more

than 1 per cent after a decline during the third quarter and a slight increase in the second. Construction payrolls declined for the third successive quarter.

The service-producing sector showed an increase in total wages and salaries of almost 2 per cent. Employment increased in all components except transportation and other utilities. The largest relative gains in labour income were recorded in public utilities, governments and service.

Net corporation profits advanced by 1.5 per cent in the fourth quarter to return to the level of the second quarter of 1966. This increase was related to a 5 per cent decline in capital consumption allowances; on a gross basis, profits dipped by 1 per cent.

By industry, net profit gains were recorded in all but four categories. The industries experiencing advances were mining with a 6 per cent increase in profits, manufacturing, 7 per cent, transportation, storage and communication, 5 per cent, and wholesale trade, 4 per cent. Profits in retail trade, service, and utilities slipped 24, 18, and 3 per cent respectively, whereas the profits of the finance industry dropped 1 per cent.

Within the manufacturing group, profits of a majority of industries mounted. Improvements of over 10 per cent were registered in the rubber, textile, chemical and electrical industries, while more moderate rises occurred in the wood, petroleum and coal and metal industries. Profits held steady in the printing and publishing group, but declined in the food and beverage, paper and non-metallic minerals industries.

Rent, interest and miscellaneous investment income rose by \$96 million or just over 2 per cent from the level of the third quarter, on a seasonally adjusted basis.

Accrued net income of farm operators from farm production declined by 2.5 per cent from the level of the previous quarter. Much of the decrease occurred in the value of grain production, due mainly to the unusually low level of profits of the Canadian Wheat Board reflecting declining exports.

Net income of non-farm unincorporated business fell slightly below the third quarter level to \$3,316 million, seasonally adjusted at annual rates. Mixed movements occurred, but most significant were declines in retail trade and service.

LABOUR FORCE (More detail in Table 19)

TOTAL LABOUR FORCE AND EMPLOYMENT WERE SLIGHTLY LOWER IN MARCH, WHILE UNEMPLOYMENT MOVED UP. UNEMPLOYMENT WAS 4.7 PER CENT OF THE LABOUR FORCE.

		total labour force	total employed	employed non-agriculture	unemployed	unemployment rate	not in the labour force
		thousands				per cent	thousands
1966	A	7,463	7,173	6,648	290	3.9	6,034

INDUSTRIAL PRODUCTION (More detail in Table 16)

THE INDEX OF INDUSTRIAL PRODUCTION FELL BY 1.1 PER CENT IN FEBRUARY. DECREASES IN MANUFACTURING AND ELECTRIC POWER AND GAS UTILITIES WERE ONLY PARTIALLY OFFSET BY AN INCREASE IN MINING. WITHIN MANUFACTURING, THE DECLINE WAS CONFINED TO DURABLES AS NON-DURABLES ROSE.

		total industrial production (1949=100)	manufacturing (1949=100)			(1949=100)		
			total	durables	non-durables	mining	electricity & gas	iron & steel

¹Gross National Product at market prices excluding accrued net income of farm operators from farm production. ²Before dividends paid to non-residents; see also footnotes on Table 113. ³Total of all monthly and quarterly series as in column 14, Table 90. ⁴Seasonally adjusted figures for this series do not incorporate revisions to the original data in table 75.

PRICES (More detail in Tables 37, 38, 39, 93, 94 and 114)

THE GENERAL WHOLESALE INDEX AND THE THIRTY INDUSTRIAL MATERIALS INDEX WERE HIGHER IN MARCH. THE INDEX OF INDUSTRIAL COMMON STOCKS CONTINUED ITS DOWNWARD TREND IN MARCH. THE CONSUMER PRICE INDEX WAS AGAIN HIGHER IN MARCH. EXCEPT FOR FOOD WHICH DECLINED, ALL COMPONENTS CONTRIBUTED TO THE INCREASE.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. Source: Quarterly Bulletin, Department of Manpower and Immigration.

¹Includes change in farm inventories. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for withdrawals of grain from farm stocks and the change in livestock items. Because of arbitrary elements, too precise an interpretation should not be given to the series. ²Includes residual error of estimate. Source: at bottom of Table 12.

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. ²The labour force as a percentage of the population 14 years of age and over. ³The unemployed as a percentage of the labour force. Source: Labour Force Bulletin, (71-001), D.B.S.

¹See footnote 1, table 19. Labour force obtained as the sum of employed and unemployed from tables 21 and 23. ²Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page S-1. These differences are small and are due to a statistical discrepancy. Source: The Labour Force, (71-001) D.B.S.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ³Includes miscellaneous manufacturing industries. ⁴Includes also publishing and allied industries. ⁵Includes also the storage and communication industries.

¹The data in Tables 28 to 35 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and public administration and defence. ³Includes storage, electric power, gas and water utilities. ⁴Excludes domestic service. Source: Employment and Average Weekly Wages and Salaries, (72-002), D.B.S.

¹The data for the current year are subject to revision. ²Includes gold. ³Consists of general wholesale index less animal products and vegetable products component groups. ⁴Consists of iron products and non-ferrous metals products component groups less gold. ⁵These two series comprise the general wholesale index. ⁶Excludes gold.

Source: Prices and Price Indexes (62-002), D. B. S.

Canadian farm products³ (1935-39 = 100)

¹Calculated as an unweighted geometric average of 30 prices. ²Arithmetically converted from 1935-39=100. ³Indexes are final to July, 1966.

supplementary classifications

¹Total of commodities and services does not add up to 100 per cent; the portion of shelter which includes taxes and mortgage interest, and amounts to 8 per cent, is excluded. Source: Prices and Price Indexes (62-002), D. B. S.

¹Monthly shipments represent an estimated projection of the latest available census of manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.

Table 41: manufacturing inventories¹, by industry, based on the 1960 standard industrial classification (million dollars)

end of year or month	total inventories owned	non-durable goods	durable goods	food and beverage	tobacco products	rubber	leather	textile	knitting mills	clothing	wood

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total manufacturing inventory owned by manufacturers including warehouse stocks. ³Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ⁴End of period. Annual figures for inventories and unfilled orders are end of December values. Sources: Inventories, Shipments and Orders in Manufacturing Industries (31-001), D. B. S.

¹Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. ²100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. ³Customs exports. ⁴Mill shipments destined for export. Sources: Pulpwood and Wood Residue Statistics (25-001), Trade of Canada, Exports (65-004), D. B. S.; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.

¹Data on net shipments relate to rolled steels products only. Shipments to consuming industries of castings, forgings and steel pipe are not included.²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. Note: Some groupings are not entirely comparable to year 1964 due to change in classifications but in general the differences are minimal. ⁴Excluding shipments for re-processing at maker's own plant.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field less field flared and waste, Canadian sources only. ⁴By gas utilities, Canadian sources only.

¹Barrels of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. ³Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. ⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns. ⁶Includes stove oil, kerosene and tractor fuel. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. ⁹Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. Source: Refined Petroleum Products (45-004), D.B.S.

Note: Components may not add to totals due to rounding differences. ¹The data are collected for 1,400 municipalities and individual figures are available on request. ²Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 56 following the annexation of the town of Riverside to the city of Windsor. Source: Building Permits (64-001), D.B.S.

¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), D.B.S.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. ²End of period. Source: New Residential Construction (64-002), D. B. S.

¹Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and Northwest Territories for which only annual statistics are collected. ²Planks and boards, flooring and square timber. ³Hollow blocks including fireproofing and load-bearing tile. ⁴For building insulation only.

⁵Figures cover the production of firms which normally account for 90 per cent of the total for Canada. ⁶Factory sales of firms which normally account for 96% of total Canadian production.

Source: Concrete Products (44-002), Products made from Canadian Clays (44-005), Asphalt Roofing (45-001), Rigid Insulating Board (36-002), Iron Castings and Cast Iron Pipes and Fittings (41-004), Steel Wire and Specified Wire Products (41-006), Gypsum Products (44-003), Mineral Wool (44-004), Sales of Paints, Varnishes and Lacquers (46-001), Production, Shipments and Stocks on Hand of Sawmills (35-002), (35-003) monthly, (35-204) annual and Trade of Canada, Imports (65-007), Exports (65-004), D. Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in Table 87 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), D.B.S.

¹These indexes are available for January, April and August only. ²Average rates of cash wages paid per month to male hired help on farms. They reflect the average of the wages paid to all male farm help regardless of age and skill. Data are available for January, May and August only. ³Exclusive of Newfoundland. Western grain prices used in the construction of the index prior to August 1, 1965 are final prices. From August 1, 1965 to date, the western grain prices used in the index are initial prices only for wheat, oats and barley. ⁴Barley No. 1 feed; hogs grade "B" alive. ⁵Price of 100 lbs. good steer as a percentage of the price of 100 lbs. live hog, grade B. ⁶Price of 100 lbs. good steer as a percentage of the price of 100 lbs. good lamb. ⁷Quotations refer to steers of all weights. ⁸Grade "B1" hogs. Sources: Price Index Numbers of Commodities and Services Used by Farmers (62-004); Farm Wages in Canada (21-002) Occasional; Coarse Grains Quarterly (22-001), D.B.S. and Livestock and Meat Trade Report, Dept. of Agriculture.

¹Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.²Customs exports are adjusted to reflect actual physical movement of wheat and wheat flour from Canada. Data shown for the last three months are not so adjusted.³Annual data are monthly averages of crop year. ⁴Includes eggs for hatching. Sources: Coarse Grains Quarterly (22-001), Wheat Review (22-005), and Trade of Canada. Exports (65-004), D. B. S.

¹Total value of retail trade seasonally adjusted includes department store sales, general merchandise store sales and sales of all other stores. Due to changes in definition of department stores and the introduction of general merchandise stores, formerly included in all other stores, the unadjusted data for 1968 are not comparable with the data of previous years; general merchandise store sales were \$42,730,000 in January and \$44,853,000 in February 1968. Source: Retail Trade (63-005), D. B. S.

¹The figures in the first four columns, i.e. all countries, United States, United Kingdom and all other countries, for the period April 1966 through July 1967 have been revised to account for delays in the receipts of customs documents. The revisions have not been extended to columns of figures for other countries, and their sum differs from the revised "all other countries" and "Total Imports" shown in this table. ²Includes Belgium, Luxembourg, France, Germany, Italy and Netherlands.

Sources: Trade of Canada, Imports (65-007), D. B. S.

¹Monthly averages for years 1965 and 1966 differ from the averages of the monthly data due to revisions which cannot be allocated by months. ²Includes scheduled and non-scheduled carriers, groups I to IV. These groups cover all air carriers with gross operating revenues of over \$60,000 annually prior to January, 1964 and over \$100,000 annually since. ³United States and other foreign carriers having scheduled services into and out of Canada. Excludes passengers in transit through Canada. ⁴Corao includes air freight and express but excludes mail and excess baggage. ⁵Data prior to 1964 do not include bulk transportation. Because of survey limitations, data on bulk transportation after January 1, 1964 refer only to aircraft having a minimum authorized take-off weight on wheels in excess of 18,000 lbs. Source: Civil Aviation (51-001), D. B. S.

¹Data from February 1967 onwards for net receipts include gathering and trunk lines. Prior to that date they include trunk lines only. Revenues include both gathering and trunk operations. ²Excludes distribution systems. ³Received from field and processing plants by transport systems. Sources: Oil Pipeline Transport (55-001) and Gas Utilities (55-002), D. B. S.

¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. ¹The definition of profits before taxes is based mainly on the accounting definition used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by sample of all companies incorporated in Canada (excluding government-owned companies).

²As is evident from the above footnote, the data reporting unit is the company; the data are therefore not entirely comparable with data where the establishment is the reporting unit. ³Includes also the furniture and furnishings industry. ⁴Includes the primary metal, the metal fabricating, the machinery and the transportation equipment industries. ⁵Includes tobacco products, leather and miscellaneous manufacturing industries. ⁶Includes also storage and communication industries. ⁷Includes agriculture, forestry, fishing and construction.

¹This statement does not include any receipts other than regular budgetary revenues. Excluded for example, are all receipts arising from payments of loans and advances, or from accumulations on annuity, pension and insurance funds. ²For comparative purposes figures may differ from those previously reported to reflect changes in accounting during 1967-68. Figures are rounded and may not add to totals. ³March includes supplementary payments arising from the closing of the accounts. Sources: The Canada Gazette and Dept. of Finance.
