PUBLICATION No 11-003 MONTHLY/VOLUME 47 NUMBER 9

Canadian statistical review

FOR REVIEW

September 1972

ARTICLE:

National Income and Expenditure
Accounts 2nd Quarter 1972.

Canadian Statistical Review

Cette revue est disponible en édition française. Revue Statistique du Canada, n° du catalogue 11-003F.

Series published in this Review are stored in CANSIM, the computerized time series data bank of Statistics Canada. All or any part of the data bank contents may be purchased on magnetic tape or as computer print-outs. For additional information, see inside back cover.

Selected Economic Indicators appearing in the Section I are published in seasonally adjusted form. Seasonally adjusted data are most useful for analysis forecasting as they bring out the underlying trends of economic time series. Seasonal adjustments remove the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing. Additional adjustments may be necessary for series which contain variation due to the difference in working or trading-days in each month or for holidays or other events with variable dates. Such adjustments are made prior to the seasonal adjustment but are treated as part of the seasonal adjustment.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used in Statistics Canada is the US Bureau of the Census Method II, X-II version.

The *MCD*, or *Months for Cyclical Dominance*, in a table containing seasonally adjusted series indicates the smallest span of months for which the average change in the cyclical factor is greater than that in the irregular factor. For the smoothest series the MCD is 1, for the most erratic series it is 6. Applying moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend-cycle.

Smoothed data have been used for the graphs of some of the seasonally adjusted series with MCD of 4, 5 or 6. A 5-term moving average was applied for smoothing these series.

* * * * *

A weekly supplement containing data published between release dates of this review is distributed free of charge to all subscribers. Historical data for Selected Economic Indicators, both unadjusted and adjusted for seasonal variation, are distributed to subscribers in an Annual Supplement.

* * * * *

SYMBOLS

The following standard symbols are used in this and other Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- amount too small to be expressed
- nil or zero.
- † advance estimates.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.
- MCD months for cyclical dominance (see above).

NOTE TO USERS

Changes occur from time to time in tables contained in this Review to reflect newly available economic series, changes made in concept, composition, comparability, seasonal adjustment methods, benchmark data, etc. Changes in this issue are as follows:

Section 3, Tables 2.1 to 2.3—Domestic Product by Industry

Users should note that data for the Indexes of Real Domestic Product and the Index of Industrial Production contained in Section 3, Tables 2.1 to 2.3 have been revised for the period January 1968 to May 1972. The revisions result from the incorporation of more recent annual data (causing revisions in level), and from the incorporation of new monthly information as well as updated seasonal adjustment factors. Revised data are available with the June issue of 61-005 Indexes of *Real Domestic Product by Industry* or CANSIM matrices 15, 16 and 1421.

Section 3, Table 3.—Financial Flows Matrix

Data for the first quarter 1972 and supplementary revised tables covering first quarter 1971 and annual 1970 and 1971 incorporate the latest revisions of the National Income and Expenditure Accounts.

Section 10, Table 2—Department Store Sales and Stocks

Revisions for these series have been made from January 1971 to date.

Section 11, Tables 1 and 2—Merchandise Exports, Major Countries and Areas

Revisions to the seasonally adjusted series in this table, included with the August issue, extend back to January 1969.

Section 13, Table 4—Cheques Cashed in Clearing Centres

The seasonally adjusted series Cheques Cashed, Atlantic Provinces, has been revised from 1945 to date as follows:

The total obtained by summing seasonally adjusted series for the four component provinces has been replaced by direct adjustment of the Atlantic Provinces total. This revision reflects a reevaluation of the quality of adjustment obtained by these two methods. The revised historical data are available on request.

With the advent of centralized data processing, Bank Clearing Houses as they were known have been closed down.

The current debit to individual accounts figures continue to reflect data from what had been the previous centres but it will be incorrect to assume that this comparison will remain valid through time.

An examination is currently underway in an attempt to establish boundaries that could be more precisely defined.

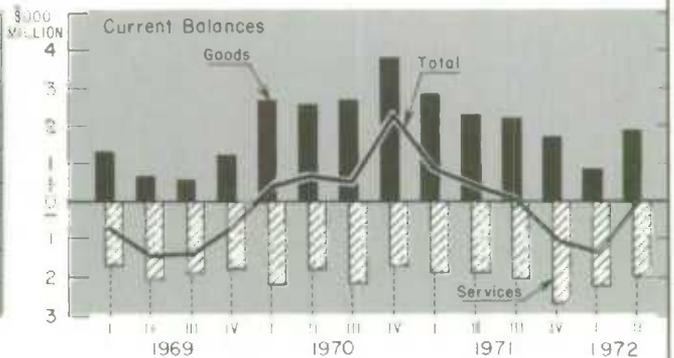

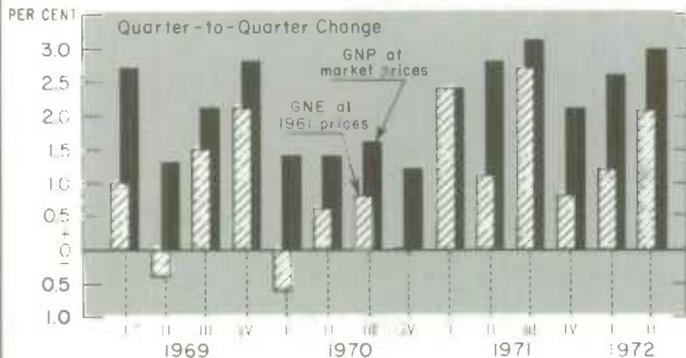

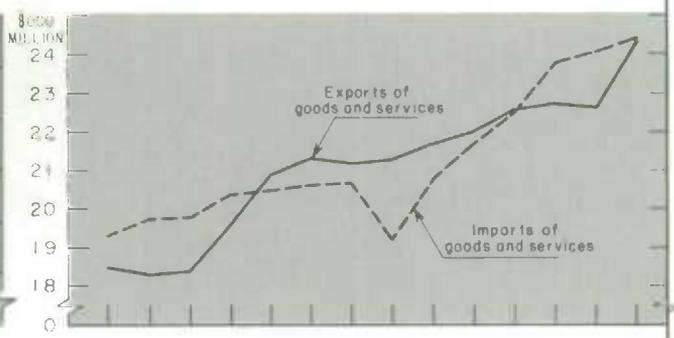

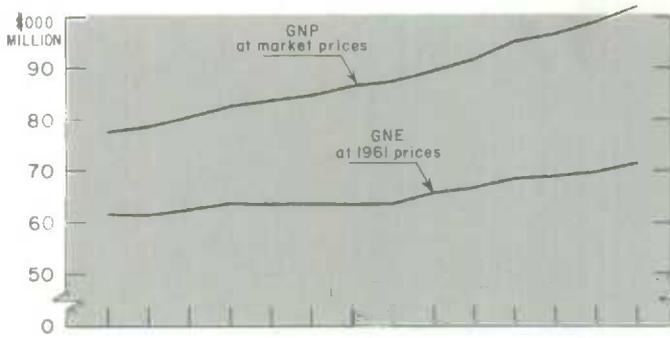

Recent Publications of Interest

Non-institutional Special Care Facilities, 1971-1972 (Catalogue 83-519). This publication indexes and describes some 3,000 "Outreach" health and welfare facilities throughout Canada. They offer non-institutional special care, and include such facilities as drug centres, street clinics, home visiting groups, suicide prevention and legal counselling services.

Prices and Price Indexes (Catalogue 62-002). A Special study of Inter-City Indexes of Fuel and Electricity Costs as of May 1971 and February 1972 for eleven Canadian centres appears in the first pages of the June 1972 issue.

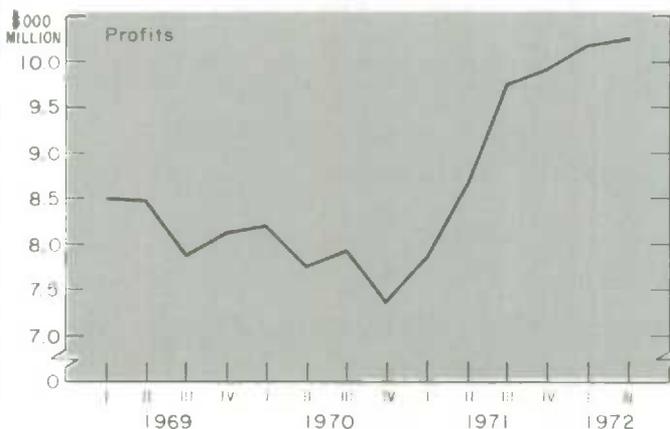

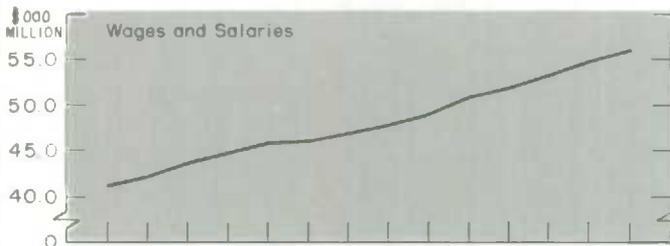

GNP at market prices rose 3.0 per cent to reach \$102.1 billion. Expressed in 1961 prices the rise was 2.1 per cent

With exports rising by 7.1 per cent and imports by only 1.6 per cent, the deficit on the balance of transactions in goods and services was reduced by \$1,276 million. Most of the gain originated in the goods balance.

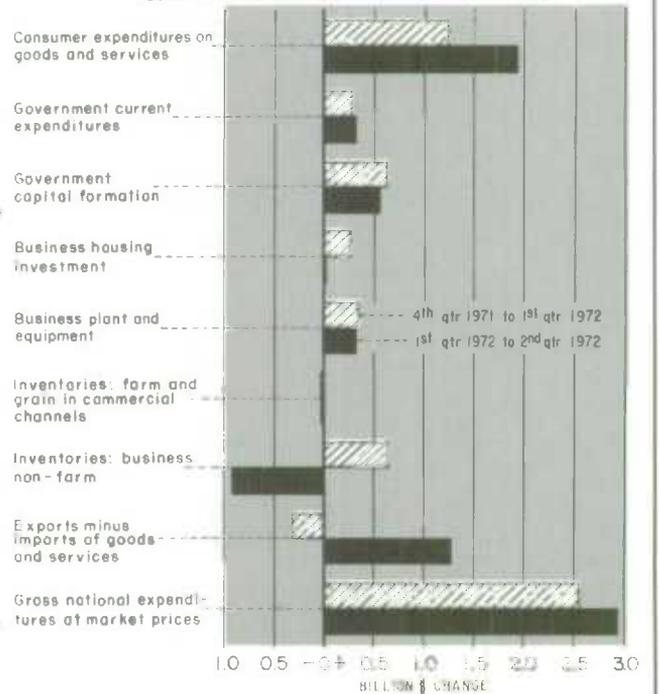

On the income side, labour income registered a strong 2.4 per cent increase. Corporation profits continued to rise, but at a much diminished pace.

The bulk of the increase in GNE originated in consumer demand and in net exports. These gains were somewhat offset by a steeply diminished rate of inventory investment.

QUARTERLY CHANGES IN GNE AND COMPONENTS

ALL DATA SEASONALLY ADJUSTED AT ANNUAL RATES.

NATIONAL INCOME AND EXPENDITURE ACCOUNTS SECOND QUARTER 1972

Preliminary estimates of the National Income and Expenditure Accounts indicate a quickened tempo of economic activity in the second quarter, characterized by strong final domestic and foreign demand and by a moderation in the overall rate of price increase.

Gross National Product at market prices, seasonally adjusted at annual rates, rose by \$2.9 billion to a level of \$102 billion, a quarterly increase of 3.0%. Reflecting some easing in the rate of increase of most price measures, as well as sizable weight shifts in demand, the implicit price index for GNP decelerated, rising by 0.8% compared with 1.4% in the revised first quarter estimate. Deducting that part of the market value of deduction attributable to price change yields a 2.1% volume gain in GNP. Real growth in the preceding period was 1.2%.

The stimulus to production in the second quarter was provided by final domestic demand, mostly personal expenditure on consumer goods and services, and by net foreign demand, as export gains exceeded the growth of imports by a wide margin. Investment in fixed capital also contributed to growth, although to a much lesser extent, as large gains in business spending on machinery and equipment and in government capital outlays more than offset the lackluster performance in construction, which was affected by strikes. Perhaps not surprisingly, in view of the pervasive strength of demand in the quarter, the rate of business investment in inventories declined sharply. By contrast, in the previous two quarters the rebuilding of business inventories had been one of the major sources of strength.

Since the closing quarter of 1971, real GNP has been rising at a quarterly rate of 1.6%, about the same rate as during 1971. In current dollars, continuing strong gains in consumer expenditure, which rose at a quarterly rate of 2.7% in the six-month period, and resumed growth in business capital outlays, mostly in machinery and equipment and in non-farm inventories, were major forces behind the expansion. The external sector also contributed to the strength of demand in the first half of the year, as exports rose much faster than imports. The highlight on the income side was an acceleration in the rate of increase of labour income. It rose at a quarterly rate of 2.8% compared with a rate of 2.1% in the second half of 1971. Corporation profits, on the other hand, rose at a much diminished rate.

In the second quarter, consumer outlays on goods and services rose by \$1.9 billion, or 3.3%, to a level of \$59.3 billion. This increase was one of the largest in recent years. The acceleration was entirely due to an upsurge of 4.2% in spending on goods, twice the first quarter rate of increase. New automobiles in particular, rebounded strongly after

a decline in the first quarter. The rise in spending on services of 2.1%, was slightly lower than in the first quarter. Probably contributing to the strength of consumer demand was a billion-dollar increase in government transfer payments to persons. These were mostly in the form of old-age pensions, due to a retroactive increase in the rate; and of unemployment insurance benefits, for which higher rates and extended coverage were introduced at the beginning of the year.

The increase of 5.4% in expenditure on durable goods (contrasting with virtually no change in the first quarter) was entirely accounted for by the new and used automobile components. Spending on new automobiles was up by almost 18% after an 8.6% decline in the first quarter. The only other major item in this category to show an increase in spending was furniture, up by 2.0%.

The rate of consumer spending on other types of goods was also very brisk. In particular, sales of semi-durable goods rose by 5.7%—the largest increase in over four years. The previous quarterly increase had been 1.0%. The greatest advances were in expenditure on men's and boys' clothing, on books and magazines, each of which rose by about 9%. Expenditure on footwear rose by 6.2%, and outlays on women's and children's clothing rose 3.3%. Spending on non-durable goods, also rose strongly, by 2.9%, although the rate of advance was somewhat lower than the very strong 3.6% gain registered in the previous quarter. Among items showing the largest percentage increases, were expenditures on pharmaceutical products, household supplies (such as cleaning compounds) and tobacco. Partly because food prices moderated their rate of advance in the second quarter, expenditures on food rose by a lesser percentage than in the first quarter, 2.6% versus 3.1%.

Expenditure on services rose by 2.1%. The most notable movement was shown by expenditures in hotels, restaurants and cafes, which continued to rise strongly. They were up 4% after a rise of 6% in the first quarter. Rents, the largest component in services, which accounts for approximately a quarter of the total of such expenditure, rose by 2%, approximately the same rate as in the first quarter.

Preliminary estimates of government current expenditure on goods and services indicate a moderate rise of 1.5%—about the same as in the first quarter. Most of the increase took place at the federal level, where expenditure rebounded upward by 6.2%, after an unusually large decline of 5% in the first quarter centered in defence spending. The second quarter gain was in goods and services other than wages and salaries, as the latter showed little change at the federal and local government level and declined at the provincial level, which were

affected by strikes, especially in Quebec. Government expenditure on fixed capital rose strongly, by 5.0%, after a 0.1% decline in the first quarter. Most of this increased outlay was in highway construction.

Total expenditures of all governments combined rose by a sharp 4.3%, the major part of the increase being in the form of transfer payments (as distinct from current and capital outlays on goods and services). With total revenues showing little change, the deficit of the government sector (on a national accounts basis) widened from a rate of \$216 million in the first quarter to \$1,696 million in the second quarter. Both the federal and provincial governments registered the largest deficits in several years.

Spending on housing had been rising sharply for over a year. In the second quarter, investment at \$5,036 million was about the same as in the first quarter. This levelling was mostly due to prolonged labour stoppages in British Columbia. There are indications that the strikes affected mostly the construction of apartment buildings. Value of work put in place in single dwellings continued to rise strongly. The underlying situation in housing remained strong. The continuing high level of new starts at 256,800 units was only slightly off the first quarter record level of 262,300 units.

Business investment on plant and equipment, as indicated by changes in employment, labour and material prices, rose by 2.5%—roughly the same rate as in the first quarter. The second quarter strength in such outlays flowed entirely from a notable acceleration in the rate of spending on machinery and equipment (up 5.7% compared with 3.3% in the first quarter), particularly on commercial vehicles, passenger cars for business use and farm implements. Outlays on non-residential construction, also seriously affected by the strikes in British Columbia, declined by 0.9%, following a rise now estimated at 2.2%.

As has already been mentioned, the falling rate of investment in business non-farm inventories dampened the growth of aggregate demand. The modest accumulation of \$164 million followed an unusually large accumulation of \$1,084 million in the first quarter. In the second quarter the growth of final domestic demand and of foreign demand combined was almost as large as that of production and imports, preventing a further sizable inventory build-up.

The decline in the rate of inventory investment, which occurred at all three major industry levels, was most notable in retail trade, where a \$628 million accumulation in the first quarter gave way to a \$20 million liquidation in the second quarter—a turnaround of \$648 million. The bulk of this decline was centered in the stocks of motor vehicle dealers, accompanying rising sales of such

products in the period. In wholesale trade, stock accumulation declined from \$740 million in the first quarter to \$252 million in the second quarter. The softening was concentrated in durable goods. In manufacturing decumulation continued. The value of physical change declined by \$72 million, from a liquidation of \$60 million in the first quarter to one of \$132 million in the second quarter. Pronounced declines occurred in transportation equipment and in food products. The stock-to-shippments ratio declined in the quarter to its lowest level in several years.

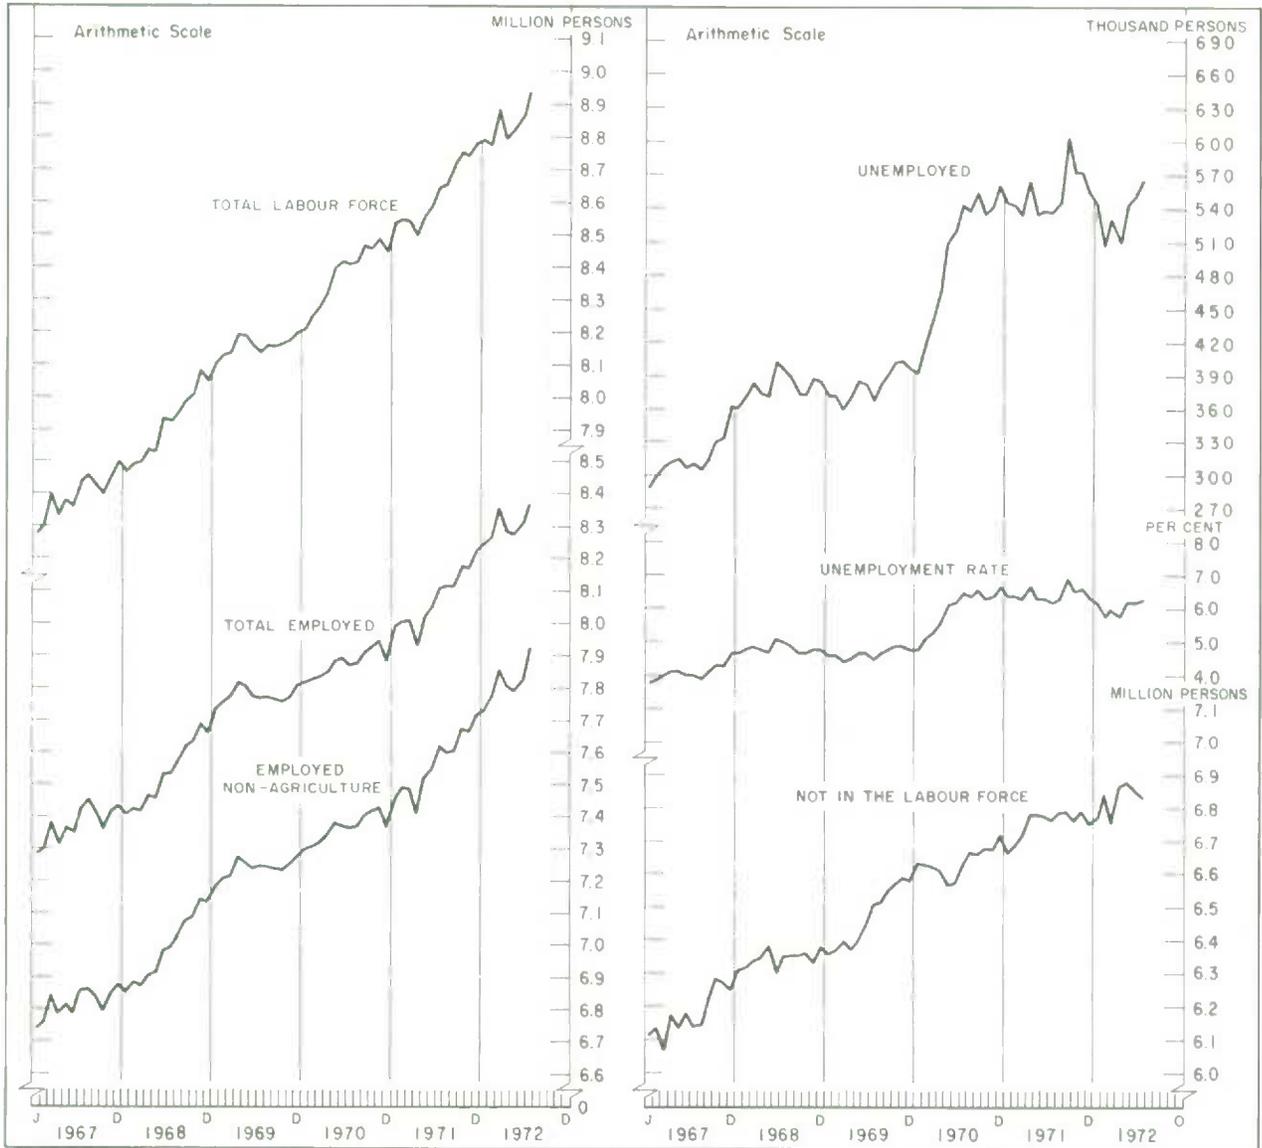

In sharp contrast with the pattern of the four previous quarters, the external sector gave a considerable boost to the economy in the second quarter. The deficit in transactions on goods and services with non-residents narrowed by \$1,276 million, contributing about 40% of the GNP increase. Most of this gain was due to a jump of \$1,044 million in the merchandise surplus. Some net gain was also derived from the non-merchandise balance, for which the deficit fell by \$232 million, largely on account of freight and shipping transactions.

Underlying the striking improvement in the merchandise surplus, was a 8.5% forward thrust in merchandise exports—the largest quarterly gain since the first quarter of 1968. (Merchandise exports had increased marginally in the first quarter.) Partial commodity details indicate particularly large wheat exports. Other important gains occurred in automotive products, crude petroleum, lumber and aircraft engines and parts. Merchandise imports rose at a much slower pace than exports—they were up 2.9%, after an increase of 6.2% in the first quarter. Notable gains were shown by some machinery and equipment components, particularly mining, construction and drilling machinery, trucks and truck tractors and communications and related equipment. The gain in the merchandise balance resulted from trade with the United Kingdom and other overseas countries. Even though exports to the United States continued to rise strongly, imports rose even more, causing a decline in the balance with that country.

Whereas the expenditure side of the accounts gives an unambiguous picture of buoyancy in the second quarter, movements on the income side are rather mixed. In particular, the more volatile components, such as accrued farm income and interest and miscellaneous investment income made an uncommonly large contribution to the overall advance. By contrast, corporation profits and capital consumption allowances rose modestly, and the rise in labour income though sizable, was appreciably smaller than in the first quarter. A reverse pattern of income and expenditure growth in the first quarter suggests timing problems in the recording of transactions. Thus, if the two first quarters of the year are taken together, there emerges a far more consistent pattern of income and expenditure

LABOUR FORCE (More detail in Section 4, Table 3)

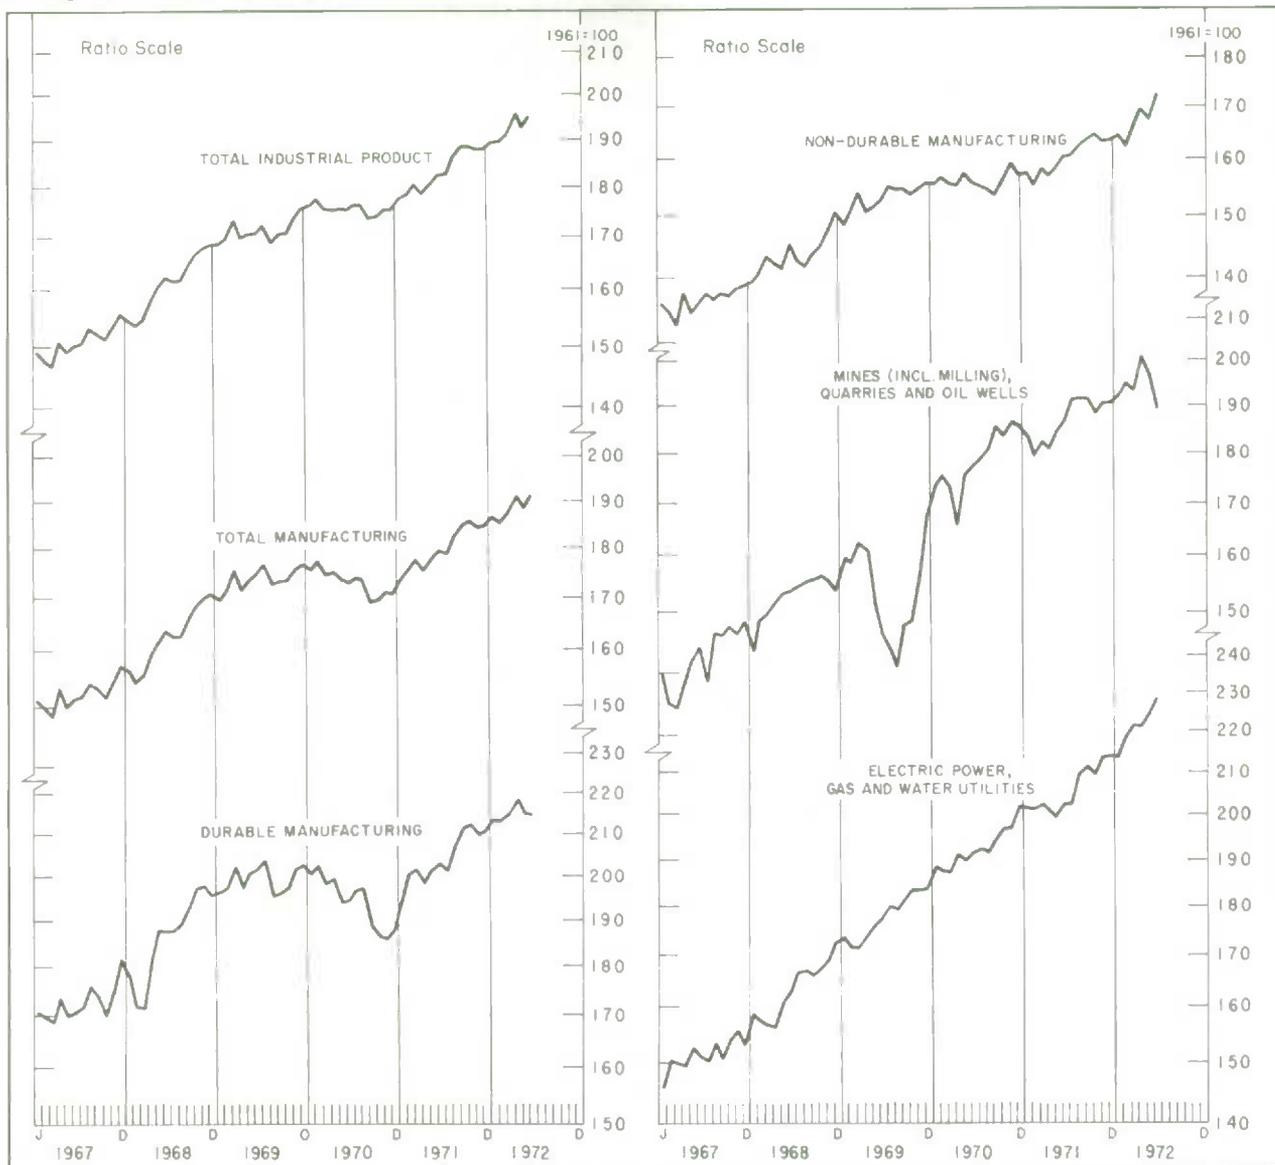

Both employment and unemployment increased between June and July. The unemployment rate was 6.3 per cent.

INDUSTRIAL PRODUCTION (More detail in Section 3, Table 2.3)

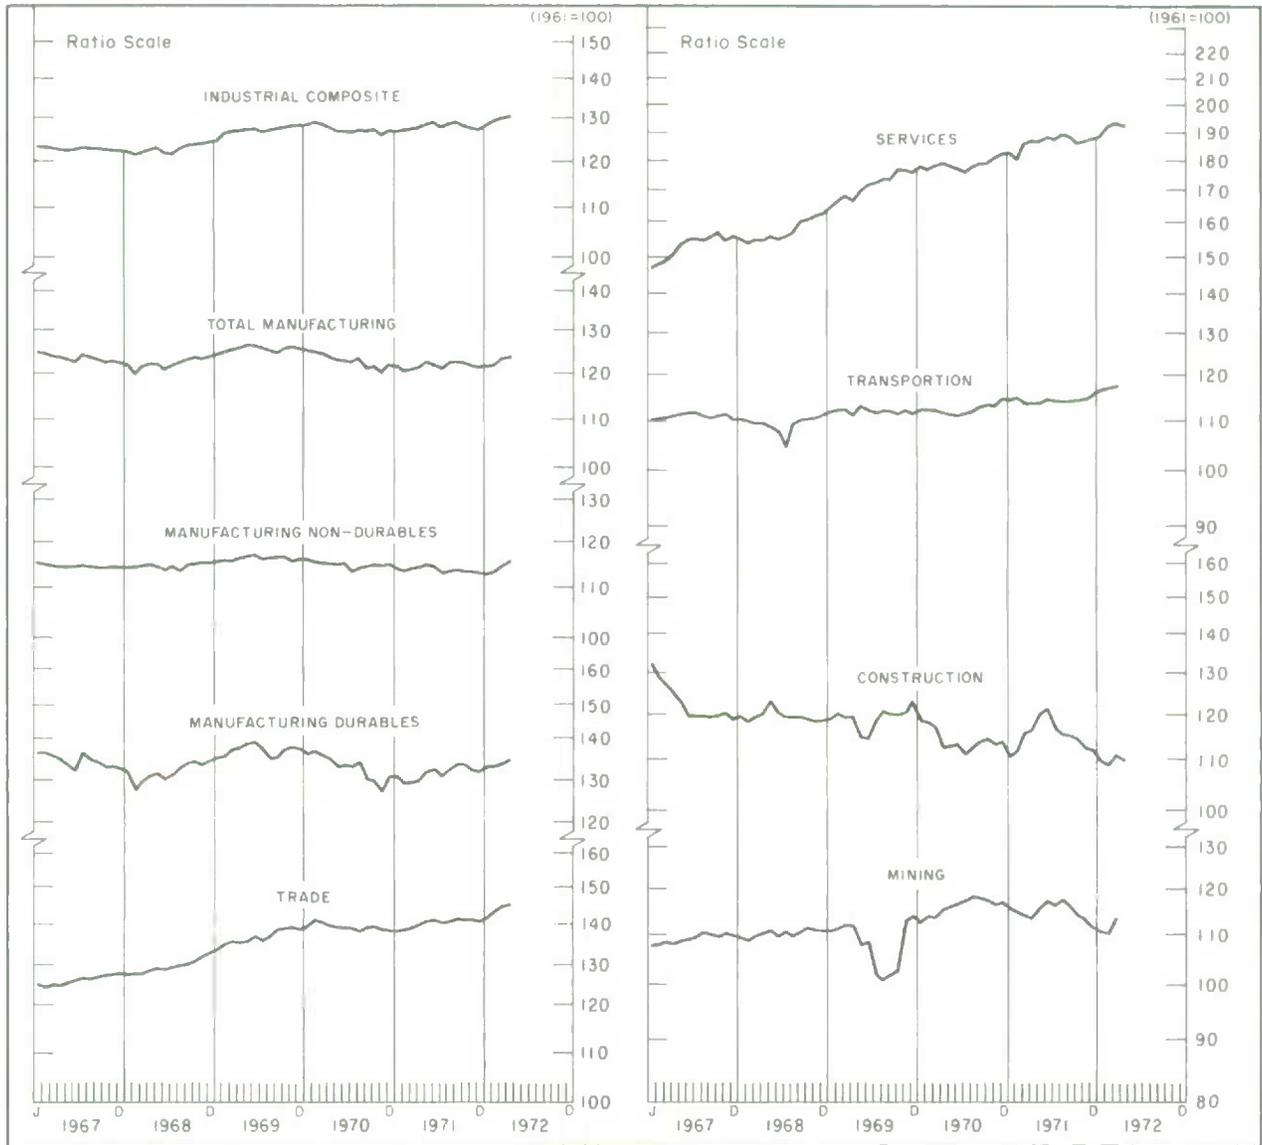

The seasonally adjusted Index of Industrial Production for June increased to 194.2 (1961=100), 0.7% above the revised May level. Output of manufacturing and electric power and gas utilities increased while mining output declined.

	total industrial production (1961=100)	manufacturing (1961=100)			(1961=100)

RETAIL TRADE, NEW MOTOR VEHICLE SALES (More detail in Section 6, Table 16 and Section 10, Table 1)

Canadian retail trade, seasonally adjusted, increased by 0.4% between May and June 1972, although only five of the 18 trade groups surveyed registered gains. Two of the five were grocery and combination stores and motor vehicle dealers, which account for approximately 20% of total retail sales.

Seasonally adjusted sales of new motor vehicles in June 1972 were down 4.4% following exceptionally high sales in May, but were still 18.9% greater than in June 1971.

INCOME & EXPENDITURE ACCOUNTS, BALANCE OF INTERNATIONAL PAYMENTS (More detail in Section 3, Tables 1.2 and 4.1)

Preliminary estimates indicate a quickened tempo of economic activity in the second quarter, stimulated by strong final domestic demand, particularly consumer expenditure, and by net exports. GNP rose by 3.0 per cent in current dollars and by 2.1 per cent in constant 1961 dollars.

	gross national product ¹		personal expenditure on goods and services	business gross fixed capital formation	labour income	corporation profits before taxes ²	balance of international payments

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. Source: Quarterly Bulletin, Department of Manpower and Immigration.

¹Excludes profits (net of losses) of government business enterprises. ²Includes the withholding tax applicable to this item. ³Includes profits (net of losses) of government business enterprises and interest and miscellaneous investment income of government. ⁴Includes value of physical change in farm inventories. The seasonally adjusted data includes an arbitrary smoothing of crop production and standard seasonal adjustment for withdrawals of grain from farm stacks and the change in other farm-held inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures. ⁵Includes net income of independent professional practitioners. ⁶See footnote 4, Table 1.2. Source: National Income and Expenditure Accounts (13-001), Statistics Canada.

¹Includes defence expenditures. ²Includes outlay on new durable assets such as building and highway construction by governments, other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. ³Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals and business investors. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. ⁴The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment. (as shown in Table 1.1). ⁵See footnote 4, Table 1.1. Source: National Income and Expenditure Accounts (13-001), Statistics Canada.

¹The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in current dollars by the constant dollar figures, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure, on a quarter-to-quarter basis. Quarter-to-quarter movements in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

¹Includes the newly imposed taxes on life insurance companies. At the present time, for National Accounts purposes, life insurance companies are treated as associations of individuals in so far as their investment activities are concerned. The new taxes are thus included here pending a complete review of the treatment of insurance. ²Excludes the special refundable tax on corporations introduced in May 1966. Refunding of the tax began in 1968. ³Withholding taxes. ⁴The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes of series. For source see Table 1.9.

Table 2.3: industrial production, volume indexes (1961 = 100), based on the 1960 standard industrial classification - continued

year and month	durable manufacturing																
	primary metal industries				metal fabricating (ex mach. & transportation equipment)												
	total	iron & steel mills	steel pipe & tube mills	iron foundries	smelting and refining	total	boiler & plate works	fabricated structural metal	ornamental & architectural metal	metal stamping, wire & coating products	hard-ware, tool & cutlery	machinery (except electrical)	transp. equipment				
													total	aircraft and parts	motor vehicles ¹

¹A minus sign except for official monetary movements, indicates an outflow of capital from Canada. ²Includes guaranteed issues. ³Bank balances and other short-term funds abroad (excluding official reserves). ⁴Includes changes in loans and accounts receivable and payable, and also balancing item representing difference between recorded measurements of current and capital accounts. ⁵Canada's Special Drawing Rights are shown from the first quarter 1970. SDR's were issued January 1, 1970 by the International Monetary Fund (IMF) to member countries participating in the agreement. Sources for above tables: Annual and Quarterly Estimates of the Canadian Balance of International Payments (67-201 and 67-001), Statistics Canada.

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. ²The labour force as a percentage of the population 14 years of age and over. ³The unemployed as a percentage of the labour force. Source: The Labour Force (71-001), Statistics Canada.

¹See footnote 1, table 3. Labour force obtained as the sum of employed and unemployed from tables 5 and 7. ²Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page 7. The small differences result from the seasonal adjustment of the Canada and regional data having been carried out independently of each other. Source: The Labour Force, (71-001), Statistics Canada.

¹Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. ²Canada totals, obtained by summing the seasonally adjusted data for the five regions, are usually different from the totals given on page 7. The small differences result from the seasonal adjustment of the Canada and regional data having been carried out independently of each other. Source: The Labour Force (71-001), Statistics Canada.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ³Includes miscellaneous manufacturing industries. ⁴Includes also publishing and allied industries. ⁵Includes also the storage and communication industries. Source: Labour Gazette, Department of Labour.

¹The data in Tables 12 to 19 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing, trapping and public administration and defence. ³Includes storage, electric power, gas and water utilities. ⁴Excludes domestic service. ¹The data in Tables 12 to 19 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. Excludes agriculture, fishing, trapping, non commercial services, plywood households, public administration and defence. Source: Employment and Average Weekly Wages and Salaries (72-002), Statistics Canada.

¹The data in Tables 12 to 19 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. Source: Employment and Average Weekly Wages and Salaries (72-002), Statistics Canada.

¹Total commodities and services does not add up to 100 per cent; the portion of shelter which includes taxes and mortgage interest, and amounts to 8 per cent, is excluded. ²These indexes measure within each city the percentage change in consumer prices from the base period to the subsequent time periods. They cannot be used to compare levels of prices between cities. Information on inter-city retail price differentials is contained in technical note No.6 published in the June 1969 issue of the Canadian statistical review. ³The shelter element of regional city housing indexes moves on the basis of changes in rents only, whereas in the Canada index this movement is derived from changes in both rents and home ownership costs. ⁴Indexes for Quebec City and Thunder Bay are on the (1969=100) base.

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ³Total manufacturing inventory owned by manufacturers including warehouse stocks. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturer's values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 3: manufacturing inventories¹ by industry based on the 1960 standard industrial classification (million dollars)

annual average and month	total inventories owned	non-durables	durables	foods and beverages	tobacco products	rubber	leather	textile	knitting mills	clothing	wood

¹Prior to January 1969 shoe classifications were different from those now in use. The change was undertaken in order to eliminate ambiguity. The discontinuity is virtually insignificant except perhaps in two classifications, i.e. girls' under size 4 and infants' and "little children's". Source: Footwear Statistics (33-002), Statistics Canada.

¹Data compiled according to the Steel Distribution Index revised January, 1964. Figures on net shipments relate to rolled steels products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. ⁴Excluding shipments for re-processing at maker's own plant. ⁵Data on shipments of steel shapes to consuming industries are not available for this period (August 69 to November 69) due to the effect of strikes in this industry. Source: Primary Iron and Steel (41-001), Statistics Canada.

¹Production plus imports less re-exports, minus exports. ²Commencing January 1967, the value of new motor vehicles sold in Canada (as reported by manufacturers and distributors) was based on "actual cost to purchaser" rather than the suggested list price as in the past. Sources: Motor Vehicle Shipments (42-002), New Motor Vehicle Sales (63-007), Trade of Canada, Imports (65-007), Exports (65-004), Statistics Canada.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field less field flared and waste. ⁴By gas utilities, does not include imports. Sources: Crude Petroleum and Natural Gas Production (26-006), Gas Utilities (55-002), D.B.S.

¹Barrels of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. ³Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. ⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns. ⁶Includes stove oil, kerosene and tractor fuel. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. ⁹Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

Note: Components may not add to totals due to rounding differences. ¹The data are collected for 1,400 municipalities and individual figures are available on request. ²Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 55 following the amalgamation of the cities of Fort William-Port Arthur (Thunderbay City). ¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. ²From January 1972 includes Yukon and the North West Territories. ¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in section 10, table 3 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), Statistics Canada.

¹Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of output. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. ²1970 and 1971 price indexes are subject to revision. ³1971 price indexes are subject to revision. ⁴Farm share only of motor vehicles. ⁵In addition to the components listed, the major group includes Building Repairs, Fencing Construction and Repairs, Mortgage Credit, and Farm Rent. ⁶In addition to components listed, the major group includes Seed, Custom Work, Artificial Insemination, Small Tools and Supplies, and Electricity.

¹Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last current year are not so adjusted. ²Production is calculated as the sum of the current manufacturers' shipments and the net change in manufacturers' inventories from the previous months. ³Includes baking and frying oils and fats. ⁴Includes stocks held by manufacturers and other warehouses. ⁵Includes fresh sausage, frankfurters, weiners and all other sausage. ⁶Includes solid, coated, bulk, packages and novelties. ⁷The quarterly data on jams, jellies and marmalades which was previously collected on the basis of production will, starting with the first quarter of 1970, be collected on the basis of factory sales. Sources: Grain Milling Statistics (32-003), Oils and Fats (32-006), Quarterly Reports, Biscuits and Confectionery (32-016), Fruit and Vegetable Preparations (32-017) and Miscellaneous Food Preparations (32-018), Monthly Production of Soft Drinks (32-001), Monthly Report, Meat and Meat Preparations, Statistics Canada.

¹Total value of retail trade seasonally adjusted includes sales of department stores, general merchandise stores, variety stores and all other stores. Due to changes in definition of department stores, the re-classification of some variety store firms and the introduction of general merchandise stores, formerly in all other stores, the unadjusted and seasonally adjusted department store data for 1968 and subsequent years are not comparable with the data of previous years. Sources: Retail Trade (63-005), Statistics Canada.

Table 1: value of retail trade by type of business and province, based on the 1960 standard industrial classification - concluded

Note: Components may not add to totals due to rounding.

¹Credit extended mainly to individuals and chiefly for personal consumption expenditures. Data excludes consumer indebtedness arising from residential mortgages home-improvement loans and bank loans fully-secured against marketable securities. Figures do not include statistics on interpersonal loans and bills owing to doctors, dentists, lawyers, and other personal service credit as they are not available. ²Owing to the considerable extent of common ownership and overlap of function within these two groups of companies their holdings are treated jointly beginning in January 1970. ³Conditional sales agreements held by sales finance companies and by consumer loan companies in connection with the financing of retail purchases of consumers' goods and repaid in installments. Starting with January 1970 this series affected by transfer of passenger cars financed for commercial purposes from consumer goods to commercial goods; from January 1971 amounts shown exclude unearned finance charges; for December 1970 this change had the effect of reducing the gross figure by 13.5 per cent. ⁴Personal cash loans of up to \$1,500, made by companies licensed under the Small Loans Act. Amounts shown are net of interest and other finance charges. ⁵Personal cash loans of over \$1,500, usually repaid in installments. From January 1971, amounts shown exclude unearned finance charges; for December 1970, the net figure was lower than the gross figure by 16.5 per cent. ⁶The data for Quebec savings banks loans are not seasonally adjusted as no seasonality is present; this series is repeated in the unadjusted form. ⁷Till December 1970 data for only Oil Companies. From first quarter 1971 figures include statistics for transportation and travel and entertainment card-issuing companies. For seasonal adjustment purposes seasonal factors for oil company credit cards were used to adjust the new series other credit card issuers on the assumption that the two series are subject to the same seasonal effects. ⁸Bills due for residential/domestic use of telephones, gas and electric power. Sources: Consumer Credit (61-004), Statistics Canada; Bank of Canada, and Dept. of Insurance.

¹Column numbers refer to tables 3 and 4 section 11. ²Includes special transaction-trade, not shown separately. ³The annual index, being calculated separately, will differ slightly from the index obtained by the average of the twelve months. ⁴Revisions made to ensure consistent coverage. The most important are: Farm machinery (73) now includes tractors; Drilling, excavating and mining (68-72) now exclude metalworking, woodworking machinery, etc. Source: Trade of Canada, Exports (65-004), Statistics Canada.

Table 4: merchandise imports, by commodity, based on the standard commodity classification¹ (million dollars)

¹Column numbers refer to tables 3 and 4, section 11. ²The annual index, being calculated separately, will differ slightly from the index obtained by the average of the twelve months. ³Includes special transaction-trade, not shown separately. ⁴Includes scrap. ⁵Some series such as General purpose machinery have been revised to ensure consistent coverage. Other important revisions were: Paper and board (44) now excludes woodpulp; Drilling, excavating and mining (68) now include oil and gas field machinery; Mechanical power transmission equipment (72) now exclude special industry machinery. Source: Trade of Canada Imports (65-007), Statistics Canada.

¹Data in this table refer to class 1 and class 2 carriers which are railways with gross annual operating revenues of \$500,000 or over. Includes operations of United States railways operating in Canada but excludes operations of Canadian railways in the United States. ²Includes traffic interchanged between Canadian railways. Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, Statistics Canada.

¹Includes Class 1 carriers only. These are carriers having \$100,000 or more gross annual revenues primarily from inter-city and rural bus operations. Regular and chartered services are included. ²Includes Class I and Class II carriers only. These are trucking firms having \$100,000 or more gross annual operating revenues. ³Includes Class I carriers only. These are carriers having \$100,000 or more gross annual revenues primarily from urban transit operations. Data are totals for motor bus, trolley coach, street car, subway and chartered services. Sources: Motor Carriers-Freight (53-005) quarterly, Passenger Bus Statistics (53-002) monthly, and Urban Transit (53-003) monthly, Statistics Canada.

¹Prior to 1970, figures included the operations of scheduled Canadian air carriers. Beginning with 1970, figures include the operations of the seven largest airlines in Canada. These transcontinental (Air Canada and CP Air) and regional airlines (Eastern Provincial Airways, Nordair, Pacific Western Airlines, Quebecair and Transair) normally account for approximately 85 per cent of the total revenues and expenses reported by Canadian commercial air carriers. Note that Nordair is excluded prior to 1970. ²Cargo includes air freight and express but excludes mail and excess baggage. Sources: Air Carrier Operations in Canada (51-002) Statistics Canada. Air Carrier Financial Statements (51-206) Statistics Canada.

Note: Components may not add to totals due to partial revisions.

¹End of period. ²Excluding Treasury Bills, Canada Savings Bonds and other non-market issues. ³Figures are subject to revision. Series cover all publicly announced issues and some private placements not publicly announced. Notes with an original term to maturity of over one year. ⁴Includes Canadian Pension Plan series bonds issued by the provinces and their agencies and purchased by the C. P. P. Investment Fund. ⁵Consists of issues of Canadian religious and other institutions and Canadian dollar issues of foreign debtors. ⁶Allowance for the take-over of Nova Scotia Light & Power common shares. Source: Bank of Canada Review.

¹The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. ²The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. ³Combines the industrials, utilities and finance common stocks. ⁴Stocks included in industrial mines are listed on the exchanges as industrials. Their operations include smelting and refining. ⁵Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. ⁶Stocks included in the mining index are for producing mines. ¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. Sources: Commercial Failures (61-002) Quarterly, Statistics Canada.

growth. It should perhaps be emphasized at this point that the estimates are preliminary, being based in many instances on very partial information, and are sometimes subject to large revisions when more complete data become available.

Labour income grew by 2.4% compared with 3.1% in the revised first quarter. Part of the large increase in the first quarter was due to large retro-active payments in public administration, and to a sudden increase in supplementary labour income due to changes in the Unemployment Insurance Act providing for larger employer and employee contributions; on the other hand, industrial disputes slowed the growth of labour income in the second quarter.

Wages and salaries grew at a much faster pace in the goods-producing industries, up 3.1%, than in the service-producing industries, up 2.0%—a reversal of the general trend of recent years. Most of the gain in goods-producing industries originated in manufacturing which showed a 4.0% advance compared with 2.2% in the first quarter, but wages in primary industries also rose strongly, 2.8%. Wages and salaries in construction, on the other hand, which was affected by labour disputes in British Columbia advanced by 0.5%. In the service-producing industries, most of the deceleration was attributable to industrial disputes in the province of Quebec in April, particularly in education, health services and public administration. Among other service-producing industries, trade and commercial services rose very strongly, by 4.4% and 4.9% respectively.

Very preliminary estimates of corporation profits before taxes show a sixth consecutive quarterly increase, but the gain of \$64 million, or 0.6%, was considerably smaller than previous ones. The new level of \$10,260 million is almost 40% above the trough in the fourth quarter of 1970.

Among other income components, the most pronounced movements were shown by interest and miscellaneous investment income, up 8.7% largely on account of increased government investment income, and by income of unincorporated businesses, especially accrued net income of farm operators. The main factors behind the unusually large gain of \$608 million in farm income were higher subsidy payments due to the introduction of a two-price policy for wheat and rises in the prices of livestock. Much of the 4.7% rise in the net income of non-farm unincorporated business originated in trade; large gains were also recorded in construction and in service industries.

Mostly because of the large increase in transfer payments, personal income rose 4.3%—the largest percentage gain in many years. Due to higher than usual refunds of income taxes, personal disposable income grew even faster, by 5.5%. As a consequence of these unusual developments, and despite rising outlays on consumer goods and services, there

appears to have been a jump in the saving ratio (personal saving as a proportion of personal disposable income), from 8.5% to 10.3%.

Price Movements

The rise in the implicit price index of gross national expenditure, slowed to 0.8%, compared with the 1.4% increase witnessed in the first quarter. Lower price increases for personal expenditure, gross fixed capital formation, and current government spending were mainly responsible for this reduction in the rate of recent price rises. Strike conditions, which affected wage spending by governments, can be related to the 0.6% decrease in the implicit price of government current expenditure. (The slowing in the rate of increase of consumer prices was not continued into the first month of the third quarter. The July increase in the consumer price index, largely due to food prices amounted to 1.2%.)

Personal expenditure prices, up 0.7%, registered about half the first quarter rise. There was a relatively even deceleration in price increases in all individual components. Changing consumer purchases had an effect on implicit price indexes for durable and semi-durable goods. Weight shifts in the composition of spending, in particular due to the large relative increase in outlays on automobiles and on clothing, had the effect of slowing the rates of increase of durable and of semi-durable goods to 0.3% and 0.5% respectively. Prices for non-durable goods, and services which were higher by 1.1% and 0.8% respectively were mainly attributable to price moderation. A slower increase in food prices from 3.7% in the first quarter to 1.0% in the second was largely responsible for the dampening of the price rise in non-durable goods. The moderation in the prices for services was fairly evenly spread.

Gross fixed capital formation prices rose 0.8%, compared with 1.6% last quarter. The largest price rises continued to be in construction as machinery and equipment prices reflected a low 0.4% increase. The rate of building materials price increases slowed slightly in all construction sectors, but the movement of labour costs was mixed. Labour costs were higher in residential construction, but lower in non-residential building and engineering. This accounts for the fact that the residential components rose at 2.2%, a much stronger rate than the 1.1% in non-residential construction.

While second quarter prices for both exports and imports were lower, the net effect was to add strongly to the overall increase of GNE implicit price index. In the first quarter, the export and import price indexes both rose at an equivalent rate, whereas in the second quarter the 1.0% export price increase was accompanied by a 0.4% drop in the price of imports. In the second quarter, movements in the external sector were affected by a 1.5% increase in the exchange value of the Canadian dollar relative to the United States dollar.

Residual error of estimate	- 28	- 444	- 656	- 624	- 438	- 780	- 624
Gross National Product at market prices	89,308	91,828	94,644	96,596	93,094	99,152	102,092
(Gross National Product at market prices excluding accrued net income of farm operators)	(87,900)	(90,436)	(93,032)	(94,812)	(91,545)	(97,796)	(100,128)

¹ Excludes profits of government business enterprises.

² Includes the withholding tax applicable to this item.

³ Includes profits (net of losses) of government business enterprises and other government investment income.

⁴ Includes an arbitrary smoothing of crop production, and standard seasonal adjustment for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures of accrued net income of farm operators.

⁵ Includes net income of independent professional practitioners.

⁶ See footnote 4, of Table 2.

TABLE 2. Gross National Expenditure, by Quarters, 1971 and 1972

Seasonally adjusted at annual rates

	1971					1972	
	I	II	III	IV	Year	I	II
	\$'000,000						
Personal expenditure on consumer goods and services	51,440	53,512	54,748	56,152	53,963	57,372	58,280
Government current expenditure on goods and services ¹	17,328	18,020	18,720	19,376	18,361	19,636	19,932
Gross fixed capital formation	18,912	19,972	20,564	21,064	20,128	21,672	22,192
Government ²	3,424	3,660	3,808	3,872	3,691	3,868	4,060
Residential construction	24	24	24	28	25	24	32
Non-residential construction	3,036	3,252	3,372	3,420	3,270	3,424	3,564
Machinery and equipment	364	384	412	424	396	420	464
Business ³	15,488	16,312	16,756	17,192	16,437	17,804	18,132
Residential construction	4,020	4,344	4,620	4,764	4,437	5,028	5,036
Non-residential construction	5,696	5,932	6,048	6,048	5,931	6,184	6,128
Machinery and equipment	5,772	6,036	6,088	6,380	6,069	6,592	6,968
Value of physical change in inventories	712	- 484	- 112	432	137	1,060	152
Government	- 44	- 24	- 96	4	- 40	16	44
Business:							
Non-farm ⁴	432	- 512	- 12	440	87	- 1,084	164
Farm and grain in commercial channels ⁵	324	52	- 4	12	90	40	56
Exports of goods and services	21,652	21,988	22,552	22,708	22,225	22,664	24,320
Deduct: Imports of goods and services	- 20,764	- 21,628	- 22,484	- 23,760	- 22,159	- 24,032	- 24,412
Residual error of estimate	28	448	656	624	439	780	628
Gross National Expenditure at market prices	89,308	91,828	94,644	96,596	93,094	99,152	102,092
Detail of farm inventories and GICC:							
Value of grain crop production	1,588	1,588	1,588	1,588	1,588	1,316	1,316
Depletions of farm stocks of grain	- 1,328	- 1,404	- 1,500	- 1,548	- 1,445	- 1,324	- 1,716
Change in other farm-held inventories	116	64	84	112	94	92	180
Grain in commercial channels	- 52	- 196	- 176	- 164	- 147	- 124	164

¹ Includes defence expenditures. Details are shown in line 45, Table I6 of the forthcoming publication "National Income and Expenditure Accounts, Second Quarter 1972" (Catalogue 13-001).

² Includes outlay on new durable assets such as building and highway construction by governments, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure.

³ Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of the existing land and buildings.

⁴ The book value of inventories is deflated to remove the effect of price changes and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The differences between this value of physical change and the change in book value is called the inventory valuation adjustment. (See line 8, Table 1.)

⁵ In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 1). All other items in the farm inventories series are seasonally adjusted by standard techniques.

TABLE 3. Gross National Expenditure in Constant (1961) Dollars, by Quarters, 1971 and 1972¹
Seasonally adjusted at annual rates

	1971					1972	
	I	II	III	IV	Year	I	II
	\$'000,000						
Personal expenditure on consumer goods and services	40,196	41,360	42,008	42,880	41,611	43,208	44,348
Government current expenditure on goods and services	10,400	10,528	10,980	11,128	10,759	11,012	11,244
Gross fixed capital formation	13,768	14,536	14,536	14,812	14,350	15,028	15,264
Government	2,492	2,628	2,716	2,728	2,641	2,708	2,820
Residential construction	16	16	16	20	17	16	20
Non-residential construction	2,160	2,280	2,348	2,348	2,284	2,340	2,412
Machinery and equipment	316	332	352	360	340	352	388
Business	11,276	11,656	11,820	12,084	11,709	12,320	12,444
Residential construction	2,820	3,000	3,124	3,180	3,031	3,296	3,232
Non-residential construction	3,952	4,032	4,064	4,024	4,018	4,028	3,948
Machinery and equipment	4,504	4,624	4,632	4,880	4,660	4,996	5,264
Value of physical change in inventories	584	- 368	20	248	121	820	28
Government	- 36	- 20	- 92	4	- 36	28	28
Business:							
Non-farm	368	- 400	156	320	111	1,004	188
Farm and grain in commercial	252	52	- 44	- 76	46	- 212	- 188
Exports of goods and services	17,852	18,016	18,312	18,508	18,172	18,240	19,380
Deduct: Imports of goods and services	- 16,976	- 17,544	- 17,940	- 19,096	- 17,889	- 19,084	- 19,468
Residual error of estimate	28	332	480	460	325	548	440
Gross National Expenditure in constant (1961) dollars	65,852	66,608	68,396	68,940	67,449	69,772	71,236

¹ The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in current dollars by the constant dollar figures, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure, on a quarter-to-quarter basis. Quarter-to-quarter movements in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

Other Publications of the General Time Series Staff

Publication number	Title and Description	Publication number	Title and Description
11-003F	<i>Revue Statistique du Canada</i> , mensuel. This is the French edition of the Canadian Statistical Review.		
	Canadian Statistical Review Supplements		
11-004	<i>Weekly Supplement to the Canadian Statistical Review</i> —Free to <i>Canadian Statistical Review</i> subscribers. Contains figures produced by Statistics Canada and other agencies which are released during the week of issue. The data will, of course, appear in the following issue of the <i>Canadian Statistical Review</i> . Designed to keep users of the <i>Review</i> closely informed of the most recent changes in the major statistical series (Bilingual).		
11-206	<i>Annual Supplement to the Canadian Statistical Review</i> —Price \$1.00 (Free to <i>Canadian Statistical Review</i> subscribers.) Contains monthly and quarterly historical records, adjusted and not adjusted for seasonality, of all the series of Section I of the <i>Canadian Statistical Review</i> . The series extend back to 1946 or as far back as the data are available (Bilingual).		
	CANSIM Manuals and other Publications*		
—	<i>CANSIM: An Introduction to the Canadian Socio-economic Information Management System</i> —Free on request. Order by title, from General Time Series Staff.		
*12-530	<i>CANSIM: Operational Manual for Data Entry</i> (Occasional)—Price \$1.00 This manual will be of practical interest only to federal government agencies which store and maintain time series in the CANSIM data base. Users desiring a fuller knowledge of the codes used and the storage methodology will find this volume a useful companion to the "Retrieval manual" (available in French, pub. N° 12-530F).		
			CANSIM Manuals and other Publications (Cont'd)
*12-531	<i>CANSIM: Users' Manual for Data Retrieval and Manipulation</i> (Occasional)—Price \$1.50 Gives detailed instructions on procedures for obtaining data on magnetic tape from the CANSIM data base. The initial very rudimentary retrieval package described will be enlarged and improved; the manual will be expanded and modified accordingly. Existing "commands" will, however, continue to be supported (available in French, pub. N° 12-531F).		
—	<i>CANSIM: Summary Reference Index</i> (Annual, with monthly amendments)—Free on request. This index summarizes data available from CANSIM and provides matrix identifiers. Order by title, from General Time Series Staff.		
—	<i>CANSIM: Series Directory</i> (Annual, with monthly amendments)—Price \$10.00 plus \$5.00 for amendments. The <i>CANSIM Series Directory</i> contains matrix and series titles and descriptive detail for series available from CANSIM. It is used in conjunction with the <i>Summary Reference Index</i> and <i>CANSIM Manual for Data Retrieval and Manipulation</i> (12-531) to order series from Statistics Canada. Order by title, from General Time Series Staff.		
			—————
			This Review, the above and other catalogued publications of Statistics Canada, including a free annotated catalogue of current publications, may be ordered from Publications Distribution, Statistics Canada, Ottawa, Ont., Canada, and remittances made payable to the Receiver General of Canada. For further information direct inquiries to:
			General Time Series Staff, Statistics Canada, Ottawa.

* Amendments to catalogue numbers 12-530 and 12-531 will be issued periodically and will be available from the Publications Distribution, Statistics Canada.
