Canadian Statistical Review

Cette revue est disponible en édition française. Revue Statistique du Canada, n° du catalogue 11-003F.

Series published in this Review are available in print-outs or from CANSIM, the computerized time series data bank of Statistics Canada, in machine-readable form for use on computers. Identification numbers given as a reference at the top of each column of data refer to the unadjusted and seasonally adjusted (SA) monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375) which is omitted from this publication for lack of space. The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada. A special Canadian Statistical Review tape is created about the 15th of each month which contains historical and current data for all series in this Review. It should be noted that all time series in CANSIM are regularly updated as new or revised data are released. The data in the base may therefore be more timely than data on the CSR tape. For additional information see inside back cover.

Seasonal Adjustment

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used in Statistics Canada is the U.S. Bureau of the Census Method II, X-11 variance.

Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing. Additional adjustments may be necessary for series which contain variation caused by the difference in the number of working or trading-days in each month or for holidays or other events with variable dates. Such adjustments are made prior to the seasonal adjustment but are treated as part of the seasonal adjustment.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series still contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series the MCD is 1, for the most erratic series it is 6. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

* * * * *

A weekly supplement containing data published between release dates of this review is distributed free of charge to all subscribers. Historical data for Selected Economic Indicators, both unadjusted and adjusted for seasonal variation, are distributed to subscribers in an Annual Supplement.

* * * * *

SYMBOLS

The following standard symbols are used in this and other Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- amount too small to be expressed
- nil or zero.
- † advance estimates.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.
- MCD months for cyclical dominance (see above).

3.1. Financial Flows	36	11. Production of Leather Footwear	71
4. Balance of International Payments		12. Primary Textiles	71
4.1. Canadian Balance of International Payments, Current Account, All Countries	38	13. Production of Sawn Lumber	72
4.2. Canadian Balance of International Payments, Current Account, Country Distribution	38	14. Pulpwood, Wood Pulp and Newsprint	72
4.3. Canadian Balance of International Payments, Capital Account, All Countries	39	15. Primary Iron and Steel	73
Section 4. Labour		16. New Motor Vehicles	74
1. Wages and Salaries, by Province	40	17. Refrigerators, Freezers, Washing Machines and Clothes Dryers	75
2. Wages and Salaries, by Industry	41	18. Radio and Television Sets	75
3. Labour Force Characteristics	42	Section 7. Fuel, Power, Mining	
4. Selected Series by Sex and Main Age Group		1. Electric Power	76
4.1. Employed	43	2. Electric Power Available, by Province	76
4.2. Unemployed	43	3. Coal and Coke	77
4.3. Participation Rates	44	4. Crude Oil and Natural Gas	77
4.4. Unemployment Rates	44	5. Petroleum Products	78
5. Labour Force Regional Data		6. Metals	79
5.1. Labour Force	45	7. Non-metallic Minerals	80
5.2. Employed	45	Section 8. Construction	
5.3. Employed in Non-agriculture	46	1. Building Permits, by Type	81
5.4. Unemployed	46	2. Building Permits, by Province	81
5.5. Participation Rates	47	3. Dwelling Units, Started, All Areas	82
5.6. Unemployment Rates	47	4. Dwelling Units, Completed, All Areas	82
		5. Dwelling Units, Under Construction, All Areas	82
		6. Dwelling Units Started, Centres 10,000 and Over	83
		7. Dwelling Units Completed, Centres 10,000 and Over	83
		8. Dwelling Units, Under Construction, Centres 10,000 and Over	84
		9. Mortgage Loans, Approvals	84
		10. Domestic Shipments of Building Materials by Canadian Manufacturers	85

Section 9. Food and Agriculture

1. Farm Cash Receipts, by Source	86
2. Farm Cash Receipts, by Province	86
3. Farm Implement and Equipment Sales at Wholesale Prices, by Province	86
4. Slaughter and Cold Storage Stocks	87
5. Selected Agricultural Price Indexes	87
6. Exports of Grains and Livestock Products	88
7. Milk, Milk Products and Eggs	88
8. Fish	89
9. Manufactured Food	89
10. Sugar	90

Section 10. Domestic Trade

1. Value of Retail Trade	91
2. Department Store Sales and Stocks	93
3. Value of Wholesale Sales	93
4. Chartered Banks' General Loans	94
5. Retail Trade - Consumer Credit Outstanding	94
6. Consumer Credit Balances Outstanding	95

Section 11. External Trade

1. Merchandise Exports, Major Countries and Areas	96
2. Merchandise Imports, Major Countries and Areas	97

Section 11. External Trade - Concluded

3. Merchandise Exports, by Commodity	98
4. Merchandise Imports, by Commodity	99

Section 12. Transportation

1. Carloadings of Revenue Freight	102
2. Railway Operating Statistics	103
3. Operating Statistics of Canadian Air Carriers	103
4. Operating Statistics of Canadian	104
5. Shipping and Canal Traffic	104

Section 13. Finance

1. Bank of Canada	105
2. Chartered Banks	106
3. Currency and Chartered Bank Deposits	107
4. Cheques Cashed in Clearing Centres	108
5. Life Insurance Sales	109
6. Life Insurance Payments	109
7. Security Issues and Retirements	110
8. Security Prices	111
9. Stock Exchange Statistics	112
10. Commercial Failures and Liabilities	112
11. Government Revenues	113
12. Government Expenditures	113

NOTE TO USERS

Changes occur from time to time in tables contained in this Review to reflect newly available economic series, changes made in concept, composition, comparability, seasonal adjustment methods, benchmark data, etc. Changes in this issue are as follows:

Publications of Interest

Ontario Educators. A table has been compiled showing citizenship, country of first degree and country of highest degree for new full-time staff appointments for universities and colleges in Ontario for the 1971-72 academic year. It is available on request to Dr. W. Dube (613-994-5398), Education, Science and Culture Division, Statistics Canada, Ottawa K1A 0Z5.

Series published in the Canadian Statistical Review form part of larger data blocks which are available in machine readable form for use on computers, or in printouts, from the Statistics Canada computerized time series bank (CANSIM). For all series in the data bank, current and revised data are entered immediately on release. Approximately the 10th of each month a special Canadian Statistical Review public tape is created which contains historical and current data for all series in the Review, plus some supplementary series.

Inquiries concerning either this Review or CANSIM may be directed to the General Time Series Staff, Statistics Canada.

RECENT CHANGES IN THE ORGANIZATION OF STATISTICS CANADA

David Davidson*

Statistics Canada is moving decisively to improve its role as Canada's major collector and publisher of statistical information. A key to enhancing the quality of the agency's work and making it more responsive to the ever increasing demand for timely, useful and usable information is the major reorganization and strengthening of top management announced earlier this year by Dr. Sylvia Ostry, Chief Statistician of Canada.

The announcement of substantial organizational changes in the agency followed a comprehensive reassessment of its responsibilities under the Statistics Act by a study group comprising Dr. Ostry, senior Statistics Canada staff, management consultants and other advisers.

The group examined what Statistics Canada had been doing, consulted many major users of statistics, and defined areas for improvement. It concluded that Statistics Canada must:

- clarify its role as a producer of statistics within the National Statistical System;
- improve its mechanisms for co-ordinating statistical activity;
- strengthen its co-ordinating and advisory role within the National Statistical System;
- establish new mechanisms to aid in the dissemination of statistical information;
- strengthen its co-ordinating and advisory role within the National Statistical System;
- establish new planning and control systems.

The principal goals of the reorganization were defined as the strengthening of top management, the consolidation of activities that should work closely together, the pinpointing of responsibility for control functions currently not well executed and the building up of functions that are underdeveloped in relation to Statistics Canada's role and responsibilities.

Statistics Canada's new organization not only attempts to meet the above goals but also is aimed at improving management and statistical processes in the future. The reorganization is, in effect, the first state in a long-term development that will continuously seek better ways for Statistics Canada to do its job.

As an example, a production centre combining the field, computer, auxiliary production services, and an integrated production planning and scheduling system will be considered within the next few years once these separate functions are operating more effectively.

*Mr. Davidson is Acting Director of the Statistics Canada Information Division.

As well, several subject-matter branches are now developing centralized collection, coding and editing services rather than having these tied in to separate subject-matter divisions as they are now.

In a move to strengthen top management, in line with the study group's recommendation, six Assistant Chief Statisticians and two Directors General have been named to head areas of key responsibility in the bureau. Together with Dr. Ostry, they form the agency's executive committee.

The Assistant Chief Statisticians and their areas are:

- V.R. Berlinguette, Business Statistics;
- Lorne Rowebottom, Household and Institutional Statistics;
- Peter G. Kirkham, Economic Accounts and Integration;
- I.P. Fellegi, Statistical Services;
- Antonin Boisvert, Marketing Services;
- R.A. Wallace, Census.

G.R. Labossière was named Director General for Administration and David A. Worton, Director General for Policy, Planning and Evaluation.

The new top-management structure reduces to 8 from 13 the number of units in Statistics Canada that report directly to the Chief Statistician. The new officers generally have a more senior stature than those who reported formerly to the Chief Statistician and while not lessening the Chief Statistician's responsibility, the strengthening of the top-management team is seen as a means to better internal direction of Statistics Canada's activities and more capacity to develop the statistical system.

In setting as a goal the consolidation of bureau activities that should work closely together, the study group found that the former organization diffused accountability and responsibility and placed impediments in the way of the effective co-ordination of interrelated activities. It gave as an example the more than 200 internal bureau committees for the resolution of issues.

Four steps have been taken to link related bureau functions more closely:

- The development of tools for integration of statistical data is being aligned with the use and refinement of the main tool—the Economic Accounts;
- Statistics-gathering activities have been grouped by the three types of supplier of the data—the business sector, the personal sector and the public sector;
- The user advisory services, formerly carried out by two separate staffs, have been amalgamated;

— Electronic data processing operations and field surveys, the main operational expressions of systems and methodology design, have been joined.

The study group, in pinpointing responsibilities for control functions currently not well executed, said that the quality of statistics produced by the bureau varies appreciably. It suggested two additional control functions—the Statistical Services Branch now is responsible for controlling methodological procedures, the responsibility for which had been unclear, and the Economic Accounts and Statistical Integration Branch will have the job of reviewing questionnaires and controlling all concepts and definitions essential to the quality of the Economic Accounts. Such concepts and definitions had been handled by subject-matter divisions.

Here are some of the underdeveloped bureau functions slated for improvement under the new organization:

- strategic planning and program evaluation capability;
- unifying frameworks and concepts for social statistics and social indicators;
- a more comprehensive marketing function responsible for public relations, advertising, editorial services and distribution of products;
- a “statistical information clearing house” to make the information in Statistics Canada and other departments more available to the general user;
- better current economic intelligence for policy analysis.

The realignment of bureau activities is as follows:

Business Statistics: Produces statistical information on prices, labour, foreign trade, agricul-

ture, transport, communications, construction, primary industries, manufacturing and service industries.

Household and Institutional Statistics: Produces statistics on health, welfare, crime, education, science, culture, government finance, consumer income and expenditure, employment and unemployment; and is developing new social indicators.

Economic Accounts and Integration: Operates the Canadian system of national accounts (including gross national product, the balance of payments and financial flows); produces statistics on production and foreign ownership and control; develops industrial input-output tables and current economic analysis; develops and operates CANSIM; publishes the *Canadian Statistical Review*, regionalization of the bureau's data base; and is evolving fuller integration tools such as standard classification systems, etc.

Statistical Services: Supports data collection and compilation operations, including survey methodology, field survey work and data processing.

Marketing Services: Promotes awareness and use of statistical information, operates user advisory services and publishes the *Canada Year Book*.

Census: Carries out the census and produces statistics on population, agriculture, housing and other demographic information.

Administration: Manages production scheduling, finance and personnel.

Policy, Planning and Evaluation: Carries out strategic and medium-term planning, program forecasting and evaluation, and advises on priorities.

BIOGRAPHICAL SKETCHES OF STATISTICS CANADA'S NEW SENIOR MANAGEMENT TEAM

Dr. Ostry, a native of Winnipeg, was named Chief Statistician of Canada in June, 1972.

She took two years of pre-medicine and a year of medicine at the University of Manitoba, before switching to McGill University and economics. She obtained her B.A. (honors economics) from McGill in 1948, an M.A. in 1950, and a Ph.D. from McGill and Cambridge in 1954. Honorary doctorates of Laws have been conferred on Dr. Ostry by York, McGill and McMaster Universities, the University of New Brunswick, the University of Western Ontario and the University of British Columbia.

The Chief Statistician taught economics and statistics at McGill, Carleton University, Sir George Williams and the University of Montreal in the late

1950s and early 1960s. She was named Assistant Director for Research in the Labour Division of the then Dominion Bureau of Statistics in 1964 and from 1965 to 1969 was Director of Special Manpower Studies for the bureau.

In 1969, Mrs. Ostry was appointed Director, Economic Council of Canada, where for three years she directed a program of research that resulted in the Council's **Eighth Annual Review, Design for Decision-making**, and a series of background studies to that document.

Mr. Berlinguette, has spent most of his career with Statistics Canada (formerly DBS). He was born in Ottawa.

After graduation with a bachelor's degree in commerce from the University of Ottawa in 1941, Mr. Berlinguette worked briefly with Imperial Tobacco Co. as an accountant and statistician before joining the army. Following the Second World War, he joined DBS as a statistician and in 1951, was named chief of business statistics, a post held until appointed assistant to the Director of the Industry and Merchandising Division in 1959.

From 1963, he was Director of the Industry Division until his 1967 appointment as Director General of the Economic Statistics Branch.

Mr. Rowebottom, a native of Victoria, joined the former Dominion Bureau of Statistics in 1943 at Vancouver following graduation from the University of British Columbia with a bachelor of arts degree in economics.

He joined the bureau's prices section at Ottawa in 1946 as a statistician and was the section's chief from 1950 until his appointment in 1957 as Assistant Director of the Labour and Prices Division.

The following year, Mr. Rowebottom became Director of the Prices Division and in 1960, Assistant to the Dominion Statistician, a post he held until his appointment in 1963 as Assistant Chief Statistician responsible for socio-economic statistics.

Dr. Kirkham, a graduate in civil engineering of the University of British Columbia, holds masters degree in economics and business administration from the University of Western Ontario and in 1970, graduated from Princeton University with a doctorate in economics.

Before moving to his new job, Dr. Kirkham was an associate professor at Western's school of business administration. He was born in Red Deer, Alberta.

Dr. Fellegi, is a graduate in mathematics of the University of Budapest and holds a master of science degree and doctorate in mathematical statistics from Ottawa's Carleton University.

He joined DBS shortly after his arrival in Canada in 1957 and has been chief of sampling research and consultation, and director of the Sampling and Survey Research Staff. Since 1970, Dr. Fellegi has been Director General of the Methodology and Systems Branch.

Dr. Fellegi is a fellow of the American Statistical Association and the American Association for the Advancement of Science.

Mr. Boisvert holds a licence in psychology from the University of Montreal and is a native of Sillery, Quebec.

He has held several responsible jobs with the Canadian Broadcasting Corporation including the directorship of information services for the corporation at Montreal and of the French section of its Social Affairs Division at Ottawa.

In 1970, Mr. Boisvert became Vice-President and Associate Director General of the Quebec government's radio-television bureau and was Director General of the Federated Appeal of Greater Montreal before joining Statistics Canada.

Mr. Wallace, a bachelor of science in agriculture and a master of science of the University of Manitoba, worked with the Manitoba Department of Agriculture from 1953 to 1968. He was named the department's Assistant Deputy Minister in 1964 and Deputy Minister in 1967.

In October 1968, Mr. Wallace, a native of Kenton, Manitoba, was appointed secretary of the planning and priorities committee of the Manitoba cabinet and held that job until April 1972, when he was appointed the province's deputy minister of Mines, Resources and Environmental Management. He was named Northern Affairs Deputy Minister when that Department was established last fall and came to Statistics Canada from that job.

Mr. Labossière, a native of St. Leon, Manitoba, is a graduate in arts and commerce of the University of Manitoba and began his government career in 1954 as a financial officer with the National Revenue Department. He later moved to the Public Service Commission as an appeals officer and to the Treasury Board as a program analyst.

He served in senior personnel jobs with the Public Works Department for two years before joining DBS in 1967 as Director of Personnel Administration. Since 1971, he has been Director General of Administration for Statistics Canada.

Mr. Worton, a native of Leeds, England, is an economics graduate of Leeds University and a master of arts in economics of the University of Toronto.

Before joining DBS in 1962 as assistant chief of Productivity Research and Analysis, he was a teacher and administrator at the Ryerson Institute of Technology, Toronto.

In 1964, Mr. Worton was named chief of Productivity Research and Analysis, a post he held until appointed Assistant Director of the Central Planning and Programming Staff. Since 1971, he has been Director of the Central Planning and Programming Staff.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancés or fiancées and other unspecified persons not intending to enter the labour force. Source: Quarterly Bulletin, Department of Manpower and Immigration.

¹Excludes profits (net of losses) of government business enterprises. ²Includes the withholding tax applicable to this item. ³Includes profits (net of losses) of government business enterprises and interest and miscellaneous investment income of government. ⁴Includes value of physical change in farm inventories. The seasonally adjusted data includes an arbitrary smoothing of crop production and standard seasonal adjustment for withdrawals of grain from farm stocks and the change in other farm-held inventories. Because of the arbitrary element, too precise an interpretation should not be given the seasonally adjusted figures. ⁵Includes net income of independent professional practitioners. ⁶See footnote 4, Table 1.2. Source: National Income and Expenditure Accounts (13-001), Statistics Canada.

¹Includes defence expenditures. ²Includes outlay on new durable assets such as building and highway construction by governments, other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. ³Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals and business investors. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. ⁴The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment. (as shown in Table 1.1). ⁵See footnote 4, Table 1.1 Source: National Income and Expenditure Accounts (13-001), Statistics Canada.

¹The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in current dollars by the constant dollar figures, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure, on a quarter-to-quarter basis. Quarter-to-quarter movements in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

¹This item differs from column 6, table 1.1 by excluding the adjustment which has been made to take account of the accrued earnings arising out of the operations of the Canadian Wheat Board and the Canadian Co-Operative Wheat Producers.

²Charitable contributions and bad debts.

³Includes all interest on the public debt paid by government to persons.

For source see table 1.9.

¹Includes the newly imposed taxes on life insurance companies. At the present time, for National Accounts purposes, life insurance companies are treated as associations of individuals in so far as their investment activities are concerned. The new taxes are thus included here pending a complete review of the treatment of insurance. ²Excludes the special refundable tax on corporations introduced in May 1966. Refunding of the tax began in 1968. ³Withholding taxes. ⁴The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four since real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes of series. Far source see Table 1.9.

¹These implicit indexes are currently weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted Data are less subject to the problem of shifting weights than are similar comparisons based on data unadjusted for seasonality, and therefore may be used as indicators of price change. For source see Table 1.9.

¹A minus sign except for official monetary movements, indicates an outflow of capital from Canada. ²Includes guaranteed issues. ³This reflects a new treatment of resident holdings of foreign currencies - see note contained in second quarter 1973 report "Change in Presentation". ⁴Includes changes in loans and accounts receivable and payable, and also balancing item representing difference between recorded measures of current, capital and reserve movements and embodies all unidentified transactions. ⁵Canada's Special Drawing Rights are shown from the first quarter 1970. SDR's were issued January 1, 1970 by the International Monetary Fund (IMF) to member countries participating in the agreement.

¹The labour force as a percentage of the population 14 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. Seasonally-adjusted participation rates are obtained by direct adjustment (i.e. by dividing the unadjusted participation rate by the seasonal factor). ²The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001.

¹In calculating time loss, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of a work stoppage is not included. ²The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; the total, however, includes all work stoppages. ³The agricultural, finance, insurance and real estate and public administration and defence industries are not shown separately; should strikes occur in these industries, they also will be shown in the total. ⁴Includes miscellaneous manufacturing industries. ⁵Includes also publishing and allied industries. ⁶Includes also the storage and communication industries. Source: Labour Gazette, Department of Labour.

¹The data in Tables 8 to 15 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing. ¹Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 for Quebec City and Thunder Bay), those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. ²The previous supplementary classification has been revised. Historical series relating to the revised classification replace the previously published supplementary indexes. ³Includes constant weighted food component. ⁴These rounded weights, based on 1967 expenditure patterns, are provided as a general guide to the relative importance of C.P.I. major components from May 1973 forward. ⁵Includes shelter and household operation. Until April 1973, the shelter element of regional cities⁵ housing indexes moved on the basis of changes in rents only. However, from May 1973 on home-ownership has been included in the shelter element of regional cities⁵ housing indexes, so that the Canada and regional cities⁵ shelter indexes now contain the same elements. Sources: Prices and Price Indexes (62-002), Statistics Canada.

Table 1: total inventories, shipments and orders in manufacturing based on the 1960 standard industrial classification (million dollars)

annual average and month	inventory at end of month									
	shipments ¹	new orders received during month ²	unfilled orders at end of month	owned ³	held but not owned	all inventory held				ratio of inventories owned to shipments
						total	raw materials	goods in process	finished products

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ³Total manufacturing inventory owned by manufacturers including warehouse stocks. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 2: manufacturing shipments¹ by industry based on the 1960 standard industrial classification (million dollars)

¹Monthly shipments represent an estimated projection of the latest available Census of Manufactures values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

¹Prior to January 1969 shoe classifications were different from those now in use. The change was undertaken in order to eliminate ambiguity. The discontinuity is virtually insignificant except perhaps in two classifications, i.e. girls' under size 4 and infants' and "little children's". Source: Footwear Statistics (33-002), Statistics Canada.

¹100 cu. ft. of solid wood; pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. ²Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. ³Customs exports. ⁴Mill shipments destined for export. Sources: Pulpwood and Wood Residue Statistics (25-001), Trade of Canada, Exports (65-004), Statistics Canada; Bulletins of Canadian Pulp and Paper Association and Newsprint Association of Canada.

¹Data compiled according to the Steel Distribution Index revised January, 1964. Figures on net shipments relate to rolled steel products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. ⁴Excluding shipments for re-processing at maker's own plant. Source: Primary Iron and Steel (41-001), Statistics Canada.

¹Production plus imports less re-exports, minus exports. ²Commencing January 1967, the value of new motor vehicles sold in Canada (as reported by manufacturers and distributors) was based on "actual cost to purchaser" rather than the suggested list price as in the past.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field less field flared and waste. ⁴By gas utilities, does not include imports. Sources: Crude Petroleum and Natural Gas Production (26-006), Gas Utilities (55-002), D.B.S.

¹Barrels of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. ³Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. ⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns. ⁶Includes stove oil, kerosene. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. ⁹Includes petro-chemical feed stocks, naphtha specialities, coke, lubricating oil and grease, still gas and other products. Source: Refined Petroleum Products (45-004), Statistics Canada.

Note: Components may not add to totals due to rounding differences. ¹The data are collected for 1,400 municipalities and individual figures are available on request. ²Historical data back to 1920 are available in "Historical Monthly Statistics" Catalogue No. 11-503, occasional. Starting with January 1966, the number of municipalities has been reduced to 55 following the amalgamation of the cities of Fort William-Port Arthur (Thunderbay City). ¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), Statistics Canada.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in section 10, table 3 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e. farmers, values are stated at wholesale prices, i.e. cost to dealers. Source: Farm Implement and Equipment Sales (63-009), Statistics Canada.

¹Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of output. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. ²1970 and 1971 price indexes are subject to revision. ³1971 price indexes are subject to revision. ⁴Farm share only of motor vehicles. ⁵In addition to the components listed, the major group includes Building Repairs, Fencing Construction and Repairs, Mortgage Credit, and Farm Rent. ⁶In addition to components listed, the major group includes Seed, Custom Work, Artificial Insemination, Small Tools and Supplies, and Electricity.

¹Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last current year are not so adjusted.
²Production is calculated as the sum of the current manufacturers' shipments and the net change in manufacturers' inventories from the previous months. ³Includes baking and frying oils and fats. ⁴Includes stocks held by manufacturers and other warehouses. ⁵Includes fresh sausage, frankfurters, wieners and all other sausage. ⁶Includes solid, coated, bulk, packages and novelties. ⁷The quarterly data on jams, jellies and marmalades which was previously collected on the basis of production will, starting with the first quarter of 1970, be collected on the basis of factory sales. Sources: Grain Milling Statistics (32-003), Oils and Fats (32-006), Quarterly Reports, Biscuits and Confectionery (32-016), Fruit and Vegetable Preparations (32-017) and Miscellaneous Food Preparations (32-018), Monthly Production of Soft Drinks (32-001), Monthly Report, Meat and Meat Preparations, Statistics Canada.

¹Total value of retail trade seasonally adjusted includes sales of department stores, general merchandise stores, variety stores and all other stores. Due to changes in definition of department stores, the re-classification of some variety store firms and the introduction of general merchandise stores, formerly in all other stores, the unadjusted and seasonally adjusted department store data for 1968 and subsequent years are not comparable with the data of previous years. ²Includes Yukon and North West Territories.

Note: Components may not add to totals due to rounding.

¹Credit extended mainly to individuals and chiefly for personal consumption expenditures. Data excludes consumer indebtedness arising from residential mortgages home-improvement loans and bank loans fully-secured against marketable securities. Figures do not include statistics on interpersonal loans and bills owing to doctors, dentists, lawyers, and other personal service credit as they are not available. ²Owing to the considerable extent of common ownership and overlap of function within these two groups of companies their holdings are treated jointly beginning in January 1970. ³Conditional sales agreements held by sales finance companies and by consumer loan companies in connection with the financing of retail purchases of consumers' goods and repaid in installments. Starting with January 1970 this series affected by transfer of passenger cars financed for commercial purposes from consumer goods to commercial goods; from January 1971 amounts shown exclude unearned finance charges; for December 1970 this change had the effect of reducing the gross figure by 13.5 per cent. ⁴Personal cash loans of up to \$1,500, made by companies licensed under the Small Loans Act. Amounts shown are net of interest and other finance charges. ⁵Personal cash loans of over \$1,500, usually repaid in installments. From January 1971, amounts shown exclude unearned finance charges; for December 1970, the net figure was lower than the gross figure by 16.5 per cent. ⁶The data for Quebec savings banks loans are not seasonally adjusted as no seasonality is present; this series is repeated in the unadjusted form. ⁷Till December 1970 data for only Oil Companies. From first quarter 1971 figures include statistics for transportation and travel and entertainment card-issuing companies. For seasonal adjustment purposes seasonal factors for oil company credit cards were used to adjust the new series other credit card issuers on the assumption that the two series are subject to the same seasonal effects. ⁸Bills due for residential/domestic use of telephones, gas and electric power. **Sources:** Consumer Credit (61-004), Statistics Canada; Bank of Canada, and Dept. of Insurance.

¹Column numbers refer to tables 3 and 4 section 11. ²Includes special transaction-trade, not shown separately. ³The annual index, being calculated separately, will differ slightly from the index obtained by the average of the twelve months. ⁴Revisions made to ensure consistent coverage. The most important are: Farm machinery (73) now includes tractors; Drilling, excavating and mining (68-72) now exclude metalworking, woodworking machinery, etc. Source: Trade of Canada, Exports (65-004), Statistics Canada.

¹Column numbers refer to tables 3 and 4, section 11. ²The annual index, being calculated separately, will differ slightly from the index obtained by the average of the twelve months. ³Includes special transaction-trade, not shown separately. ⁴Includes scrap. ⁵Some series such as General purpose machinery have been revised to ensure consistent coverage. Other important revisions were: Paper and board (44) now excludes woodpulp; Drilling, excavating and mining (68) now include oil and gas field machinery; Mechanical power transmission equipment (72) now exclude special industry machinery. Source: Trade of Canada Imports (65-007), Statistics Canada.

¹Data for 1970 through 1972 refer to 24 class 1 and 2 carriers whose gross annual revenues totalled \$500,000 or more. Commencing January 1973 only 6 major railways (accounting for 95% or more of the total operating revenues) are shown. ²Includes traffic interchanged between Canadian railways. Sources: Railway Operating Statistics (52-003) monthly, and (52-206) annual, Statistics Canada.

¹Prior to 1970, figures included the operations of scheduled Canadian air carriers. Beginning with 1970, figures include the operations of the seven largest airlines in Canada. These transcontinental (Air Canada and CP Air) and regional airlines (Eastern Provincial Airways, Nordair, Pacific Western Airlines, Quebecair and Transair) normally account for approximately 85 per cent of the total revenues and expenses reported by Canadian commercial air carriers. Note that Nordair is excluded prior to 1970. ²Carga includes air freight and express but excludes mail and excess baggage. Sources: Air Carrier Operations in Canada (51-002) Statistics Canada. Air Carrier Financial Statements (51-206) Statistics Canada.

Notes: Components may not add to totals due to partial revisions.

¹End of period. ²Excluding Treasury Bills, Canada Savings Bonds and other non-market issues. ³Figures are subject to revision. Series cover all publicly announced issues and some private placements not publicly announced. Notes with an original term to maturity of over one year. ⁴Includes Canadian Pension Plan series bonds issued by the provinces and their agencies and purchased by the C. P. P. Investment Fund. ⁵Consists of issues of Canadian religious and other institutions and Canadian dollar issues of foreign debtors. ⁶Allowance for the take-over of Nova Scotia Light & Power common shares. ¹The number of stocks included has varied over the period; the totals shown in the column headings represent the current coverage. ²The headings for "base metals" and "industrial mines" are not found in the Standard Industrial Classification. ³Combines the industrials, utilities and finance common stocks. ⁴Stocks included in industrial mines are listed on the exchanges as industrials. Their operations include smelting and refining. ⁵Includes also the machinery industries (except electrical machinery) and the transportation equipment industries. ⁶Stocks included in the mining index are for producing mines. ¹The statistics of failures in this table are limited to those bankruptcies filed under Federal legislation (the Bankruptcy and Winding-Up Acts) and does not include failures, sales or seizures carried out under other legislation. The figures for Atlantic provinces may be obtained by subtracting the sum of Quebec, Ontario, Prairie provinces and British Columbia from the total. ²In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available. Source: Commercial Failures (61-002) Quarterly, Statistics Canada.

MARKETING SERVICES

Assistant Chief Statistician	Antonin Boisvert	992-0418
Director	D. Davidson (acting)	996-0569
Information Division		
Director	R.E. Drover	994-5882
User Advisory Services		
Chief Librarian	Miss G. Phelan	992-0673

CENSUS

Assistant Chief Statistician	R.A. Wallace	996-4869
Associate Director	Dr. D.E. Bond	996-5075

POLICY, PLANNING AND EVALUATION

Director General	D.A. Worton	992-5426
Director	J.R. Welch	992-5426
Strategic Planning		
Director	J.B. Swayne	992-3562
Planning Operations		
Director	B. Lynch	992-5426
Program Evaluation		

ADMINISTRATION

Director General	G.R. Labossière	992-1214
Director	R.E. Rose	996-4502
Production Planning and Scheduling		
Director	W.C. McIver	995-8875
Financial and Administrative Services		
Director	D.W. Hall	992-1472
Personnel Administration		

All of the above may also be reached by writing to Statistics Canada, Ottawa, Ontario, K1A OT6.

Other Publications of the General Time Series Staff

Publication number	Title and Description	Publication number	Title and Description
11-003F	<i>Revue Statistique du Canada</i> , mensuel. This is the French edition of the Canadian Statistical Review.		
	Canadian Statistical Review Supplements		
11-004	<i>Weekly Supplement to the Canadian Statistical Review</i> —Free to <i>Canadian Statistical Review</i> subscribers. Contains figures produced by Statistics Canada and other agencies which are released during the week of issue. The data will, of course, appear in the following issue of the <i>Canadian Statistical Review</i> . Designed to keep users of the <i>Review</i> closely informed of the most recent changes in the major statistical series (Bilingual).		
11-206	<i>Annual Supplement to the Canadian Statistical Review</i> —Price \$1.00 (Free to <i>Canadian Statistical Review</i> subscribers.) Contains monthly and quarterly historical records, adjusted and not adjusted for seasonality, of all the series of Section I of the <i>Canadian Statistical Review</i> . The series extend back to 1946 or as far back as the data are available (Bilingual).		
11-505	<i>Canadian Statistical Review</i> —Historical Summary 1970, E. and F. Price \$1.50 (Free to <i>Canadian Statistical Review</i> subscribers) This publication replaces the <i>Historical Summary</i> 1963 (catalogue 11-502, Occasional). It contains annual data for series published in the monthly <i>Canadian Statistical Review</i> (11-003). Its contents, table headings and table numbers, with a few exceptions, are the same as those in the tabular section of the <i>Review</i> . All the tables include 1970, some 1971, and extend back to 1926, or as far back as available. The figures were the latest available early in 1971 and some of them are still subject to revision.		
	CANSIM Manuals and other Publications*		
—	<i>CANSIM: An Introduction to the Canadian Socio-economic Information Management System</i> —Free on request. Order by title, from General Time Series Staff.		
		CANSIM Manuals and other Publications (Cont'd)	
*12-530	<i>CANSIM: Operational Manual for Data Entry</i> (Occasional)—Price \$1.00 This manual will be of practical interest only to federal government agencies which store and maintain time series in the CANSIM data base. Users desiring a fuller knowledge of the codes used and the storage methodology will find this volume a useful companion to the "Retrieval manual" (available in French, pub. N° 12-530F).		
*12-531	<i>CANSIM: Users Manual for Data Retrieval and Manipulation</i> (Occasional) 1973 edition—Price \$1.50 Gives detailed instructions on procedures for obtaining data from the CANSIM data base. The new edition reflects enlargement and improvement of the retrieval package. (Available in French, cat. 12-531F).		
—	<i>CANSIM: Summary Reference Index</i> (Annual, with periodic amendments) 1973 edition—Free on request. This index summarizes data available from CANSIM and provides matrix identifiers. Order by title, from General Time Series Staff.		
—	<i>CANSIM: Series Directory</i> (Annual, with periodic amendments) 1973 edition—Price \$15.00 or \$20.00 with amendment service. The <i>CANSIM Series Directory</i> contains matrix and series titles and descriptive detail for series available from CANSIM. It is used in conjunction with the <i>Summary Reference Index</i> and <i>CANSIM Manual for Data Retrieval and Manipulation</i> (12-531) to order series from Statistics Canada. Order by title, from General Time Series Staff.		
			—————
			This Review, the above and other catalogued publications of Statistics Canada, including a free annotated catalogue of current publications, may be ordered from Publications Distribution, Statistics Canada, Ottawa, Ont., Canada, and remittances made payable to the Receiver General of Canada. For further information direct inquiries to:
			General Time Series Staff, Statistics Canada, Ottawa.

* Amendments to catalogue numbers 12-530 and 12-531 will be issued periodically and will be available from the Publications Distribution, Statistics Canada
