Canadian Statistical Review

Cette revue est disponible en édition française. Revue Statistique du Canada, n° du catalogue 11-003F.

Series published in this Review are available from CANSIM, the computerized time series data bank of Statistics Canada, on printouts or in machine-readable form for use on computers. Identification numbers given as a reference at the top of each column of data refer to the unadjusted and seasonally adjusted (SA) monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375) which is omitted from this publication for lack of space. The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada. A special Canadian Statistical Review tape is created about the 15th of each month which contains historical and current data for all series in this Review. It should be noted that all time series in CANSIM are regularly updated as new or revised data are released. The date in the base may therefore be more timely than data on the CSR tape. For additional information, see inside back cover.

Seasonal Adjustment

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used in Statistics Canada is the U.S. Bureau of the Census Method II, X-11 variant.

Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing. Additional adjustments may be necessary for series which contain variation caused by the difference in the number of working or trading-days in each month or for holidays or other events with variable dates. Such adjustments are made prior to the seasonal adjustment but are treated as part of the seasonal adjustment.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series still contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series the MCD is 1, for the most erratic series it is 6. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

A weekly supplement containing data published between release dates of this review is distributed free of charge to all subscribers. Historical data for selected economic indicators, both unadjusted and adjusted for seasonal variation, are distributed to subscribers in an Annual Supplement.

NOTE TO USERS

This section is used to announce changes in tables of the *Canadian Statistical Review* and in related CANSIM series.

Section 4. Tables 9 to 16

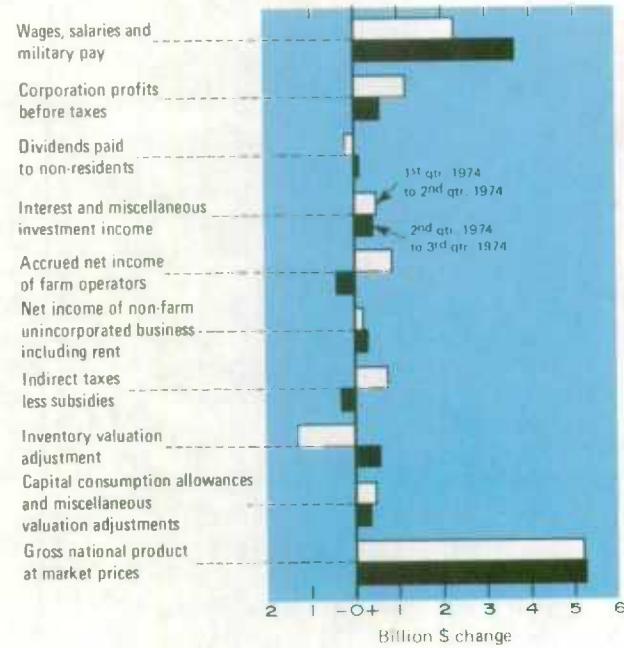

Users are asked to note the revisions of the employment indexes, average hourly earnings and average weekly hours data. Information on historical revisions can be obtained from Mr. G.L. Cohen, Labour Division, Statistics Canada.

Gross National Product, seasonally adjusted at annual rates, increased by 3.8 per cent to \$143 billion. As in the second quarter, prices accounted fully for this increase.

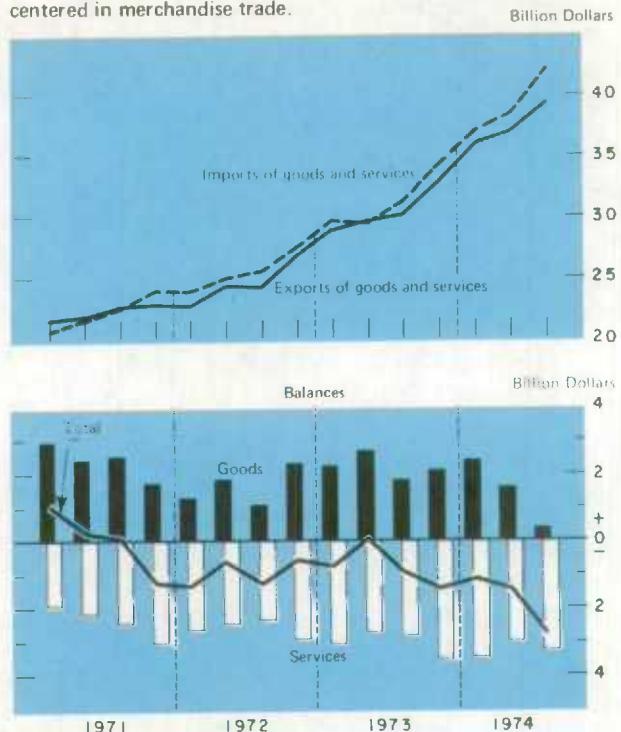

Wages, salaries and supplementary labour income, after a second quarter deceleration, recorded its largest quarterly percentage increase since early 1951. Corporation profits before taxes continued to grow but at a lesser rate than in the preceding several quarters. Farm income declined sharply from its second quarter level.

Quarterly changes in GNP and components

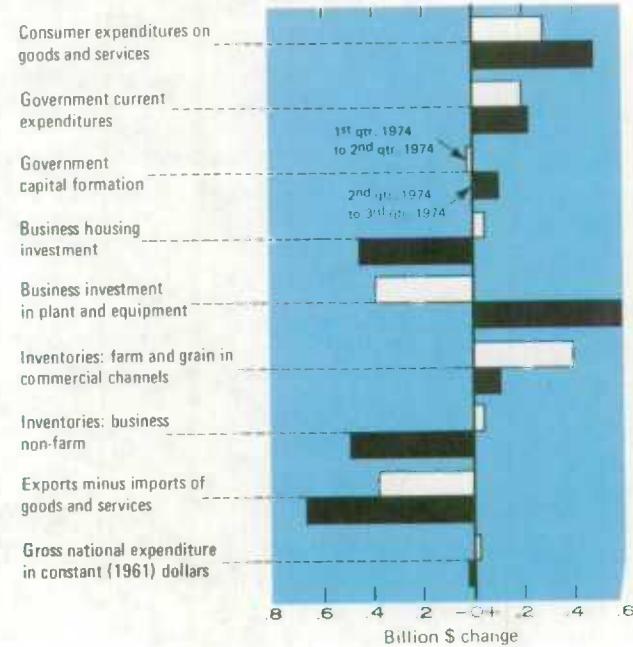

All data adjusted for seasonal variation and at annual rates.

Activity in the external sector was a major cause of the third quarter weakness in total Gross National Expenditure. Exports rose 5.9 per cent, while imports were up 9.3 per cent, raising the deficit to \$2,772 million, compared to \$1,396 million in the second quarter. This deterioration in the balance was centered in merchandise trade.

A decline in spending on consumer durables coupled with a strong acceleration in other categories of consumer expenditure produced an overall real increase of 1 per cent. The second quarter contraction in real gross fixed capital formation was reversed in the third quarter, mainly as a result of a spurt in investment in machinery and equipment.

Quarterly changes in GNE and components in constant (1961) dollars

NATIONAL INCOME AND EXPENDITURE ACCOUNTS

Third Quarter 1974

Introductory Review

In the third quarter, Gross National Product in real terms was again unchanged from the level achieved in the first quarter. Prices continued to rise, but there was some abatement in the rate of increase for most categories of expenditure. Final domestic demand was strong, despite a substantial cutback in residential construction. There was a further deterioration in the trade balance as the growth of imports exceeded that of exports. Notwithstanding a weakness in industrial production, employment, as measured by the Labour Force Survey, increased by a substantial 1.3 per cent. This was not enough to offset the growth of the labour force, and the unemployment rate increased during the quarter.

Gross National Product, seasonally adjusted at annual rates, increased by 3.8 per cent to \$143 billion. As in the second quarter, prices accounted fully for this increase. Current dollar consumer expenditure increased at an accelerated rate of 3.9 per cent during the quarter. A decline in spending on consumer durables coupled with a strong acceleration in other categories of consumer expenditure produced an overall real increase of 1 per cent. The second quarter contraction in real gross fixed capital formation was reversed in the third quarter, mainly as a result of a spurt in investment in machinery and equipment. Government current expenditure in real terms also made an important contribution to the 1.2 per cent increase in final domestic demand. There was continued strong accumulation of business non-farm inventories.

Among income components, there were significant changes from the pattern of growth witnessed in the second quarter. Wages, salaries and supplementary labour income, after a second quarter deceleration, recorded its largest quarterly percentage increase since early 1951. Corporation profits before taxes continued to grow but at a lesser rate than in the preceding several quarters. Farm income declined sharply from its second quarter level.

Consumer Outlays

Personal expenditure on goods and services rose to \$81.3 billion, an increase of 3.9 per cent, following a second quarter increase of 3.5 per cent. Outlays on goods decelerated, as in the second quarter, while spending on services accelerated. In volume terms, the gain in personal expenditure was 1 per cent, compared with 0.6 per cent in the second quarter; the increase in the implicit price index for consumer expenditure registered a slight deceleration, from 2.9 per cent in the second quarter to 2.8 per cent in the third.

Spending on consumer durables grew by only 1 per cent, and since prices rose by 3.3 per cent, spending

on durables in real terms declined by 2.2 per cent. Decreases in purchases of furniture, household appliances and recreation equipment neutralized the 6.1 per cent real increase in sales of new and used automobiles. The increase in prices represents an acceleration from the second quarter increase of 2.6 per cent; car and household appliances prices led this acceleration.

Expenditures on semi-durable and non-durable goods increased by 6 per cent and 4.5 per cent respectively during the quarter. The gains in the semi-durables group were spread among clothing, footwear and household furnishings, and after allowing for price increases, the volume increase in semi-durables was a very strong 3.3 per cent. Within non-durables, expenditures on food continued to increase at about the same rate as in the previous quarter. Food prices continued to climb but there was some deceleration in the rate of increase. Outlays on gasoline, oil and grease increased at a faster rate than in the second quarter, while there was a moderation in price increases of these products and of home heating fuels.

Consumer expenditure on services increased by 3.7 per cent, an acceleration from the previous quarter. This strength was based on increased spending on rents and lodging, and on household services and purchased transportation. Insurance and hospital care registered strong price increases, which were offset by lower rates of increase in prices of other items so that the implicit price for services rose by 2.7 per cent, the same as in the second quarter.

Fixed Capital Formation

Business gross fixed capital formation was up 4.5 per cent in the third quarter. In real terms, this increase was only 1 per cent.

The weakness stemmed from the housing component which was down 4.9 per cent in current dollars, and 10.6 per cent in real terms. Housing starts during the second and third quarters were down 15 per cent from the previous six months. Starts in the third quarter declined by 22.9 per cent, which was the most serious slowdown since the first quarter of 1971. Because of construction lags and because all types of dwellings — singles, multiples and apartments — were affected, this decline in starts will continue to be felt for several quarters.

Housing prices were up 6.5 per cent in the third quarter. The deceleration since July in the list prices of residential building materials will show up with at least a one quarter lag.

Investment in business plant and equipment was a source of strength in the quarter. Non-residential con-

struction expenditures were up 2.6 per cent in real terms over the strike-affected second quarter, with building and engineering sharing equally in the rise. The rate of price increase slowed considerably, from 5.4 per cent in the second quarter to 2.4 per cent in the third.

The main strength in business capital formation was in machinery and equipment, which rose by 7.2 per cent in real terms. A surge in expenditures on all categories of imported machinery and equipment was primarily responsible for the increase, as domestic shipments rose only moderately. The price rise of 3.9 per cent was somewhat above the 3.4 per cent increase in the second quarter.

Inventory Investment

Investment in non-farm business inventories in the third quarter was at a level of \$2,032 million. After accumulations of \$2,672 million and \$2,740 million in the first two quarters of the year, the third quarter, although strong, represents a considerably lower rate of investment. A slowdown in accumulation in wholesale trade was responsible for most of the \$700 million cutback, although there were additions to stocks at all three major industry levels.

Within manufacturing, investment in stocks of non-durables was the major source of accumulation, accounting for two-thirds of the total. Most categories of non-durables showed increases, with the exception of food and beverages where stocks showed a sizable liquidation. In durables, a substantial decrease in stocks owned by the primary metal industries was more than offset by increases in all other manufacturing industries. Increases were widespread within wholesale and retail trade. Major exceptions, however, were motor vehicles, motor vehicle parts and accessories, and petroleum bulk tank stations. Stock-to-sales ratios were somewhat higher than those of the previous quarter for the three major industry levels.

The External Sector

Activity in the external sector was a major cause of the third quarter weakness in total Gross National Expenditure. Exports rose 5.9 per cent, while imports were up 9.3 per cent, raising the deficit to \$2,772 million, compared with \$1,396 million in the second quarter. This deterioration in the balance was centered in merchandise trade, as the surplus moved from \$1,632 million in the second quarter to \$412 million in the third.

Merchandise exports were up 7.4 per cent in current dollars and 4.2 per cent in real terms. The 3 per cent price rise represented a notable deceleration from recent quarters. The growth in exports was attributable to increases in motor vehicles and parts which outweighed decreases in all other major groupings. The wheat, fuel and lumber components declined markedly.

Merchandise imports rose 11.9 per cent in current dollars, with a 4.7 per cent price rise. The 7 per cent real increase represents a turnaround from the second quarter decline of 0.3 per cent. The major source of the import growth was finished goods, with some additional strength coming from semi-finished goods. Imports of all categories of industrial machinery and equipment increased significantly. Autos, trucks and parts recovered strongly from a weak second quarter performance. The volume of imports of food, feed and beverages rose moderately, while that of crude materials dropped, due to a reduction of fuel imports.

The slight deterioration in the deficit on non-merchandise trade was due to continued declining tourist and travel receipts.

Incomes

Labour income rose 5.1 per cent in the third quarter of 1974, a sharp acceleration from the second quarter increase of 3.3 per cent. As already noted, this was the highest quarterly increase since the early fifties. Most of the increase was due to the payment of lump sum cost-of-living allowances in the public sector and higher average earnings throughout the economy.

Wages and salaries in the goods-producing industries increased by 4.2 per cent, compared with an increase of 2.1 per cent in the second quarter. The higher rate of growth in the third quarter was attributable to gains in average earnings, particularly in the manufacturing and mining industries, and to the cessation of major labour disputes in the construction industry.

Wages and salaries in the service-producing industries advanced sharply in the quarter, by 5.8 per cent. The sharpest increase occurred in the community, business and personal service industries, which rose by 8.1 per cent, largely as a result of the payment of cost-of-living allowances to some school and hospital employees. Increases in the other industries were largely due to higher average earnings.

Corporation profits grew by 3.3 per cent in the third quarter following an increase of 7.1 per cent in the second. Within manufacturing, paper, printing and publishing, and primary metals recorded significant increases while rubber and wood declined substantially. In the non-manufacturing group, transportation, communications and utilities declined while retail trade increased moderately. For the first nine months of 1974, profits before taxes were more than 35 per cent higher than in the same period in 1973.

The inventory valuation adjustment, intended to remove from income those profits which do not reflect current production, declined moderately this quarter, but remained at a very high level. The IVA in the third quarter was \$4.0 billion, compared with the record level of \$4.6 billion in the second quarter.

Accrued net income of farm operators from farm production declined by 10 per cent in the third quarter from the high second quarter rate. Labour disputes, which disrupted the export movement of grain, and some price decreases were major factors in this drop.

Personal income rose by 4.6 per cent in the third quarter, compared with a 3.6 per cent rise in the second. However, because of a very sharp increase in tax collections, personal disposable income rose by only 2.1 per cent compared with 4.7 per cent in the previous quarter. This led to a drop in the personal savings rate from an irregularly high level of 9.1 per cent in the second quarter to 7.5 per cent in the third.

The Government Sector

Seasonally adjusted at annual rates, total expenditures of all levels of government combined, excluding intergovernmental transfers, rose by 7.7 per cent in the third quarter, much more sharply than in the second quarter and the highest quarterly increase in several years. About half the increase took place in spending on current goods and services which rose by 7.1 per cent with particularly large increases at the federal, local and hospital levels. The increase in the latter two levels largely reflected the payment of costs-of-living allowances. After a decline in the second quarter, subsidies increased by more than \$1 billion in the third quarter,

mainly because of a very large increase in the subsidies to oil importers in eastern Canada and higher dairy payments. Transfer payments to persons rose 4.8 per cent, mainly at the federal level as a result of increases in family and youth allowance and unemployment insurance benefit payments.

Total revenue of all levels of government combined also rose much more sharply in the third quarter than in the second quarter, 8.8 per cent compared with 2.2 per cent. Reflecting the continuing high levels of income, revenues from direct taxes rose strongly. The largest increase was in revenues from personal direct taxes, up by 16.8 per cent from the second quarter which was affected by unusually high refunds. Corporate direct taxes rose by 5.8 per cent. Recent proposed changes in corporate tax legislation have not been incorporated in the estimated tax liability although some companies, through their reported tax provision, may have attempted to reflect these changes. Indirect taxes increased by 3.7 per cent with most of the increase at the federal level due to the oil export charge. The other revenue components also showed increases.

As a result of expenditures rising more slowly than revenues, the surplus of the government sector on a National Accounts basis and including the Canada and Quebec Pension Plans increased from \$2,068 million in the second quarter to \$2,736 million in the third quarter.

TABLE I. National Income and Gross National Product, by Quarters, 1973 and 1974
Seasonally adjusted at annual rates

¹ Excludes profits of government business enterprises.

² Includes the withholding tax applicable to this item.

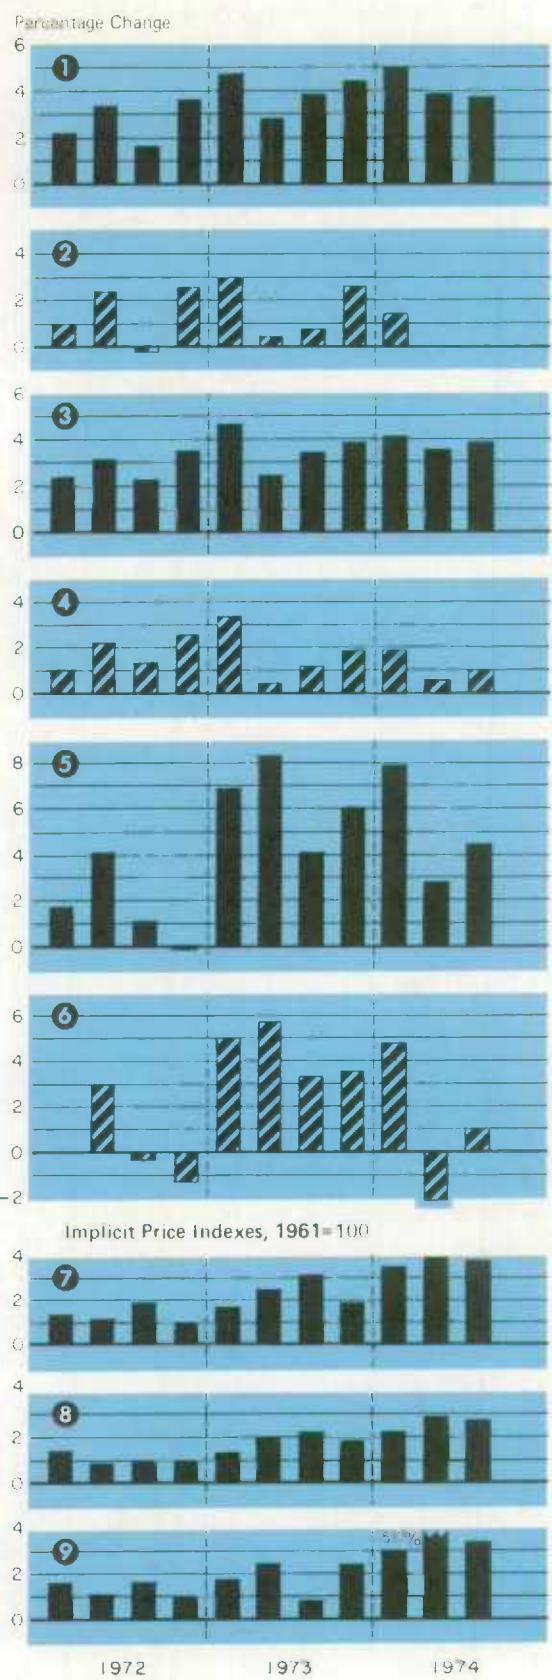

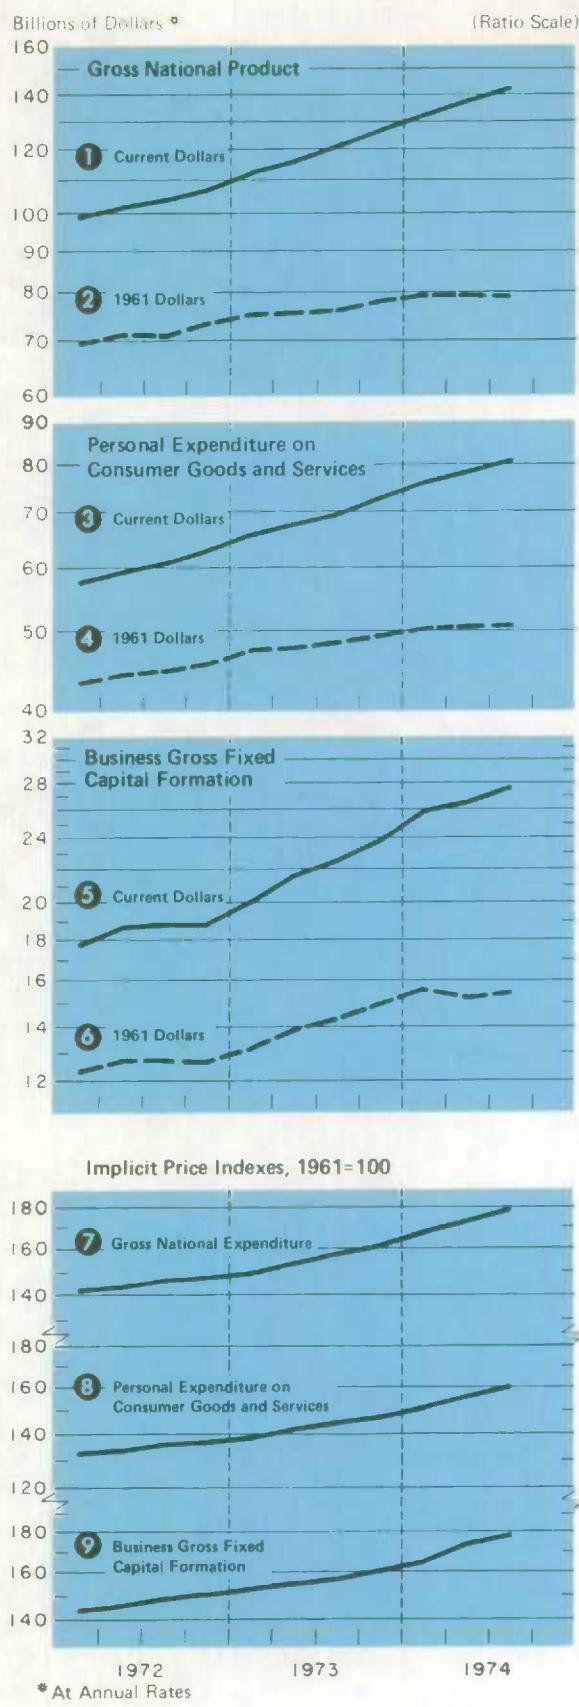

³ Includes profits (net of losses) of government business enterprises and other government investment income.

⁴ Includes an arbitrary smoothing of crop production, and standard seasonal adjustment for withdrawals of grain from farm stocks and for the change in farm-held livestock and other inventories. Because of the arbitrary element, too precise an interpretation should not be given to the seasonally adjusted figures of accrued net income of farm operators.

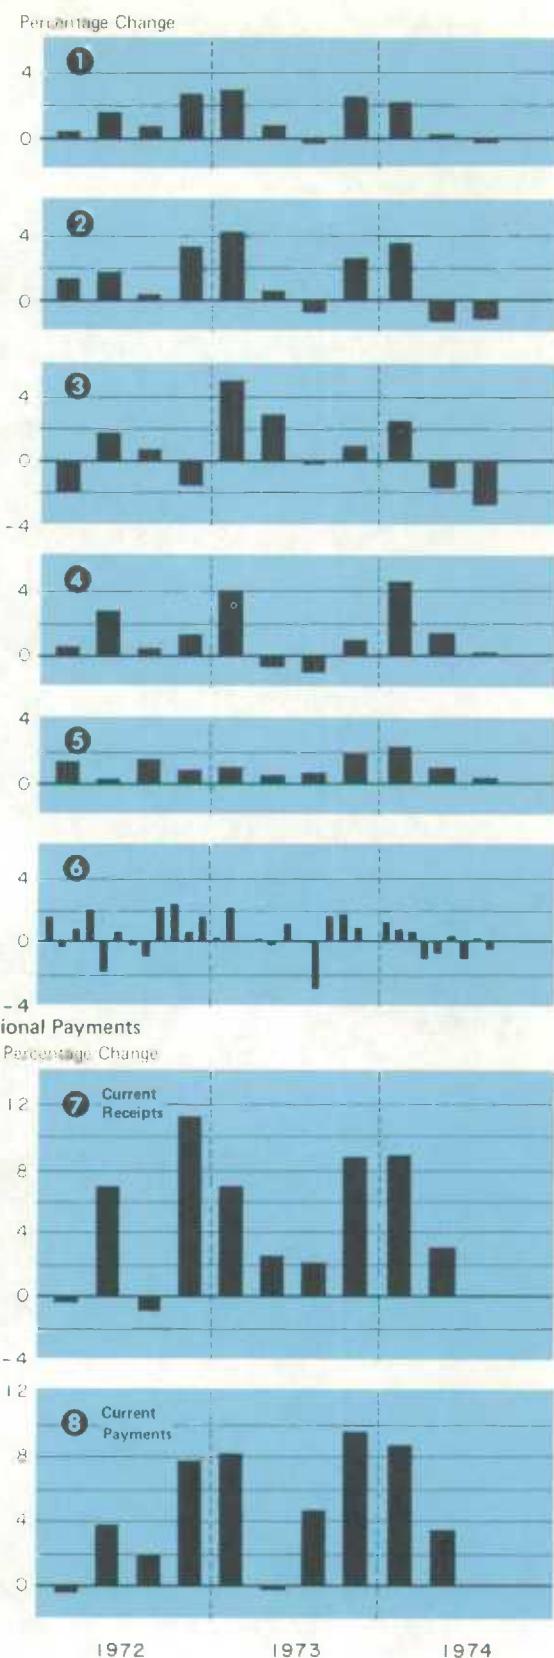

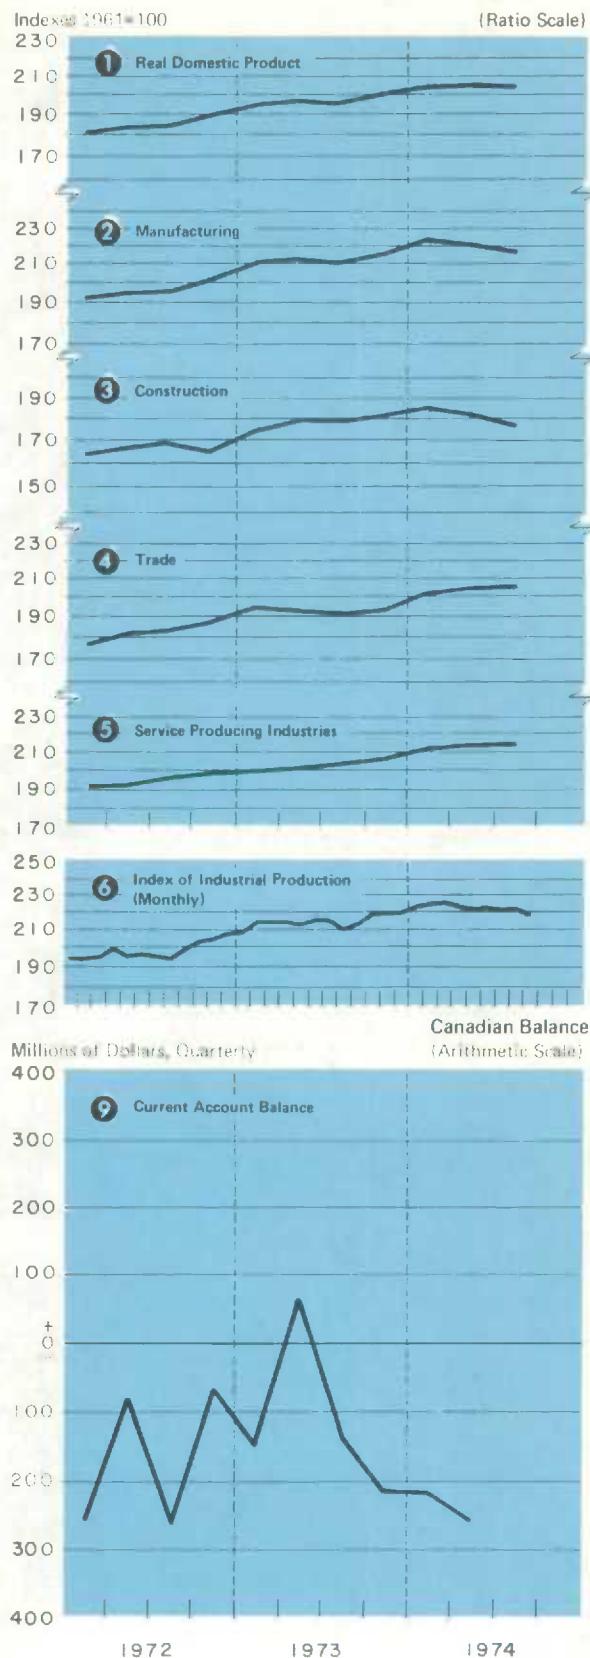

⁵ Includes net income of independent professional practitioners.

⁶ See footnote 4, of Table 2.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1961 Census; see Occupational Classification Manual, Census of Canada, 1961, Catalogue Number 12-506. ²Includes logging, fishing, trapping and hunting. ³Includes mechanical and construction. ⁴Includes a small number in non-specified occupations. ⁵Does not include students entering Canada on students' visas. ⁶Includes also retired persons, elderly dependents, fiancées or fiancées and other unspecified persons not intending to enter the labour force.

¹Excludes profits (net of losses) of government business enterprises. ²Includes the withholding tax applicable to this item. ³Includes profits (net of losses) of government business enterprises and interest and miscellaneous investment income of government. ⁴Includes value of physical change in farm inventories. The seasonally adjusted data includes an arbitrary smoothing of crop production and standard seasonal adjustment for withdrawals of grain from farm stocks and the change in other farm-held inventories. Because of the arbitrary element, too precise an interpretation should not be given to the seasonally adjusted figures. ⁵Includes net income of independent professional practitioners. ⁶See footnote 4, Table 1.2. Source: National Income and Expenditure Accounts (13-001), Statistics Canada.

¹Includes defence expenditures. ²Includes outlay on new durable assets such as building and highway construction by governments, other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. ³Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals and business investors. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. ⁴The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment, (as shown in Table 1.1). ⁵See footnote 4, Table 1.1. Source: National Income and Expenditure Accounts (13-001), Statistics Canada.

¹The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in current dollars by the constant dollar figures, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by compositional shifts which occur within the unadjusted components of Gross National Expenditure, on a quarter-to-quarter basis. Quarter-to-quarter movements in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

¹Includes the taxes on life insurance companies introduced in 1969. At the present time, for National Accounts purposes, life insurance companies are treated as associations of individuals in so far as their investment activities are concerned. The 1969 taxes are thus included here pending a complete review of the treatment of insurance. ²Excludes the special refundable tax on corporations introduced in May 1966. Refunding of the tax began in 1968. ³Withholding taxes. ⁴The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four. Since real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted taxes of series. For source see Table 1.9.

¹These implicit indexes are currently weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on data unadjusted for seasonality, and therefore may be used as indicators of price change. For source see Table 1.9.

¹The labour force as a percentage of the population 14 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. Seasonally-adjusted participation rates are obtained by direct adjustment (i.e. by dividing the unadjusted participation rate by the seasonal factor). ²The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001.

¹In calculating time lost, only the workers directly affected by the strike or lockout are taken into account; time lost by workers indirectly affected, such as those laid off as a result of work stoppage, is not included. ²The industry groups prior to January 1973 are based on the 1960 Standard Industrial Classification. From January 1973 forward, the 1970 S.I.C. is used. ³The number of man-days is calculated by multiplying the number of workers involved in a work-stoppage by the number of normal working days during the stoppage. Adjustments are made for establishments on shift work, etc. ⁴The statistics for individual industries exclude strikes and lockouts involving fewer than 100 workers; however, the total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost will also be shown in the total. In addition, the total is revised quarterly whereas the individual categories are revised annually. ⁵Includes miscellaneous manufacturing industries. ⁶Includes publishing and allied industries. ⁷Includes storage and communication industries.

¹The data in Tables 9 to 16 are based on reports from firms employing 20 persons or more in any month of the year and relate to the last pay periods in the month. Greater industrial and area detail and more explanatory notes are given in the source publication named below. ²Excludes agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households, public administration and defence. ³Includes storage, electric power, gas and water utilities. ⁴Excludes domestic service.

¹See footnote 1 and source in Table 10.

²Employment indexes in total manufacturing and in its total durable and non-durable components are given in Table 9.

³In addition to those listed, tobacco products; knitting mills; printing, publishing and allied; and miscellaneous manufacturing industries are included in non-durable manufacturing.

⁴Except machinery and transportation equipment industries.

¹Indexes prior to May 1973 incorporate 1957 expenditure weights (1964 for Quebec City and Thunder Bay), those for May 1973 forward are based on 1967 expenditures. The revised series is linked to its predecessor at April 1973. ²The previous supplementary classification has been revised. Historical series relating to the revised classification replace the previously published supplementary indexes. ³Includes constant weighted food component. ⁴These rounded weights, based on 1967 expenditure patterns, are provided as a general guide to the relative importance of C.P.I. major components from May 1973 forward. ⁵Includes shelter and household operation. Until April 1973, the shelter element of regional cities' housing indexes moved on the basis of changes in rents only. However, from May 1973 on home-ownership has been included in the shelter element of regional cities' housing indexes, so that the Canada and regional cities' shelter indexes now contain the same elements.

Source: Prices and Price Indexes (62-002), Statistics Canada.

Table 1: total inventories, shipments and orders in manufacturing based on the 1970 standard industrial classification (million dollars)

annual average and month	shipments ¹	new orders received during month ²	unfilled orders at end of month	owned ³	held but not owned	inventory at end of month			ratio of inventories owned to shipments	
						all inventory held				
						total	raw materials	goods in process

¹Monthly shipments represent an estimated projection of the latest available Census of Manufacturers values except for those industries whose long-term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been substituted. ²Total new orders received during the period at estimated selling value, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month. ³Total manufacturing inventory owned by manufacturers including warehouse stocks.

Sources: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 2: manufacturing shipments¹ by industry based on the 1970 standard industrial classification (million dollars)

¹Monthly shipments represent an estimated projection of the latest available Census of Manufactures values except for those industries whose long term contracts result in large intermittent shipments; for these a monthly estimate of work put in place has been estimated. Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 3: manufacturing inventories¹ by industry based on the 1970 standard industrial classification (million dollars)

annual average and month	total inventories owned	non-durables	durables	foods and beverages	tobacco products	rubber	leather	textile	knitting mills	clothing	wood

¹Data compiled according to the Steel Distribution Index revised January, 1964. Figures on net shipments relate to rolled steel products only. Shipments to consuming industries of castings, forgings and steel pipe are not included. ²Includes building contractors, public and utility construction, structural steel fabricators, national defence and public works and utilities. ³Includes appliances and utensils. ⁴Excluding shipments for re-processing at maker's own plant.

¹Production plus imports less re-exports, minus exports. ²Commencing January 1967, the value of new motor vehicles sold in Canada (as reported by manufacturers and distributors) was based on "actual cost to purchaser" rather than the suggested list price as in the past. Sources: Motor Vehicle Shipments (42-002), New motor Vehicle Sales (63-007), Trade of Canada, Imports (65-007), Exports (65-004), Statistics Canada.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision. ¹Includes crude oil, condensate and pentanes plus. ²Deliveries to refineries and exports do not add to total new supply due to losses, other uses and inventory changes. ³Gross new production by field less field flared and waste. ⁴By gas utilities, does not include imports. Sources: Crude Petroleum and Natural Gas Production (26-006), Gas Utilities (55-002), Statistics Canada.

¹Buckets of 35 Canadian gallons. ²Includes domestic and imported crude oil, condensate and pentones plus received by Canadian refineries. ³Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. ⁴Includes deliveries of butane commingled in the crude stream in Saskatchewan and Alberta. ⁵Includes inventories at end of period being held at gas plants and in storage caverns. ⁶Includes stove oil, kerosene. ⁷Includes aviation gasoline and aviation turbo fuel. ⁸Due to conceptual changes, the stock and sales series are not available on a comparable basis prior to June 1965. Includes propane and propane mixes and butane and butane mixes. ⁹Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products. ^aSources: Refined Petroleum Products (45-004), Statistics Canada.

¹The coverage was extended to 507 municipalities in 1948, and as of 1965, stands at more than 1,400; minor revisions are still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation. Source: Building Permits (64-001), Statistics Canada.

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly. Source: New Residential Construction (64-002), Statistics Canada.

Note: Components may not add to totals due to rounding. ¹The estimates for the current year are subject to revision since the factors used in the blow-up are based on the previous years' operations and may change when the current annual totals for all firms are known the following year. ²Excluding trucks. ³The total value of all machines shown in this table is greater than the value shown for farm machinery in section 10, table 3 which covers wholesalers proper only. The above table covers all sales to users and includes sales by manufacturers through their agents as well as the sales of importers and other dealers made directly to users. Even though sales are to users, i.e., farmers, values are stated at wholesale prices, i.e., cost to dealers. Source: Farm Implement and Equipment Sales (63-009), Statistics Canada.

¹Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of output. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. ²1972 and 1973 price indexes are subject to revision. ³1973 price indexes are subject to revision. ⁴Farm share only of motor vehicles. ⁵In addition to the components listed, the major group includes Building Repairs, Fencing Construction and Repairs, Mortgage Credit, and Farm Rent. ⁶In addition to components listed, the major group includes Seed, Custom Work, Artificial Insemination, Small Tools and Supplies, and Electricity.

¹Monthly totals for current years are not equivalent to annual data due to receipt of additional statistics which cannot be allocated by months. ²Includes also seaweeds and other species such as whales, worms etc.

³Exports include sea and freshwater fish and shellfish products but exclude bait, meal, oils, offal, livers, fish roe n.e.s., and fishery foods and feeds n.e.s.

⁴Total holdings (all forms) of frozen fish commencing October 1969 excludes freshwater species.

^aCustoms exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last current year are not so adjusted.
^bProduction is calculated as the sum of the current manufacturers' shipments and the net change in manufacturers' inventories from the previous months. ³Includes baking and frying oils and fats. ⁴Includes stocks held by manufacturers and other warehouses. ⁵Includes fresh sausage, frankfurters, weiners and all other sausage. ⁶Includes solid, coated, bulk, packages and novelties. ⁷The quarterly data on jams, jellies and marmalades which was previously collected on the basis of production will, starting with the first quarter of 1970, be collected on the basis of factory sales. Sources: Grain Milling Statistics (32-003), Oils and Fats (32-006), Quarterly Reports, Biscuits and Confectionery (32-016), Fruit and Vegetable Preparations (32-017) and Miscellaneous Food Preparations (32-018), Monthly Production of Soft Drinks (32-001), Monthly Report, Meat and Meat Preparations, Statistics Canada.

¹Total value of retail trade seasonally adjusted includes soles of department stores, general merchandise stores, variety stores and all other stores. Due to changes in definition of department stores, the re-classification of some variety store firms and the introduction of general merchandise stores, formerly in all other stores, the unadjusted and seasonally adjusted department store data for 1968 and subsequent years are not comparable with the data of previous years.

Note: Components may not add to totals because of rounding.

¹Credit extended mainly to individuals and chiefly for personal consumption expenditures. Data exclude consumer indebtedness arising from residential mortgages, home-improvement loans and bank loans fully secured against marketable securities. Figures do not include statistics on interpersonal loans, bills owing to doctors, dentists, lawyers, and other personal service credit.²Conditional sales agreements held by sales finance companies and by consumer loan companies in connection with the financing of retail purchases of consumers' goods and repaid in instalments. Amounts shown exclude unearned finance charges.³Personal cash loans of up to \$1,500 made by companies licensed under the Small Loans Act. Amounts shown are net of interest and other finance charges.⁴Personal cash loans over \$1,500, usually repaid in instalments. Amounts shown exclude unearned finance charges. ⁵Includes bank-sponsored credit card balances.⁶The data for Quebec savings bank loans are not seasonally adjusted as no seasonality is present; this series is repeated in the unadjusted form. ⁷Amount owed by personal (non-commercial) credit card holders to oil companies, airlines, auto-rental firms, and international travel and entertainment credit card issuing companies.⁸Bills due for non-commercial use of telephones, gas and electric power. ⁹Personal cash loans only. The data for mortgage and trust companies are not seasonally adjusted because there are not yet enough data to determine a pattern of seasonality; this series is repeated in the unadjusted form. Sources: Consumer Credit (61-004), Statistics Canada; Bank of Canada; and Department of Insurance.

¹Column numbers refer to tables 3 and 4, section 11. ²The annual index, being calculated separately, will differ slightly from the index obtained by the average of the twelve months. ³Includes special transaction-trade, not shown separately. ⁴Includes scrap. ⁵Some series such as General purpose machinery have been revised to ensure consistent coverage. Other important revisions were: Paper and board (44) now excludes woodpulp; Drilling, excavating and mining (68) now include oil and gas field machinery; Mechanical power transmission equipment (72) now exclude special industry machinery. Source: Trade of Canada Imports (65-007), Statistics Canada.

¹Data for 1970 through 1972 refer to 24 class 1 and 2 carriers whose gross annual revenues totalled \$500,000 or more. Commencing January 1973, only 6 major railways (accounting for 95 per cent or more of the total operating revenues) are shown.

²The data for August 1973 do not follow the pattern for the other months of 1973. The decreases in most categories are a result of the railway strike in this month. Source: Railway Operating Statistics (52-003), Statistics Canada.

¹Beginning with 1970, figures include the operations of the seven largest airlines in Canada. These transcontinental (Air Canada and CP Air) and regional airlines (Eastern Provincial Airways, Nordair, Pacific Western Airlines, Quebecair and Transair) normally account for approximately 85 per cent of the total revenues and expenses reported by Canadian commercial air carriers. ²Cargo includes air freight and express but excludes mail and excess baggage. Sources: Air Carrier Operations in Canada (51-002) Statistics Canada Air Carrier Financial Statements (51-206) Statistics Canada.

NOTE: Components may not add to totals because rounding.

¹This series was designed to cover 50 clearing house centres. With the advent of centralized data processing, bank clearing houses have been eliminated. The current allocation of cheques cashed continues to reflect what had been the previous centres; however, this comparison may not remain valid through time. Discussions are underway in an attempt to establish boundaries which would be more precisely defined.²Seasonally adjusted data for Saskatchewan have been deleted because current data could not be satisfactorily adjusted.

¹This statement includes only receipts relating to budgetary revenue. Excluded are non-budgetary revenues such as Old Age Security Fund taxes, Prairie Farm Assistance Act levies, employer and employee contributions to government-held funds (Unemployment Insurance, Superannuation etc.), interest on government-held funds, and taxes collected on behalf of and transferred to other governments. ²Beginning in December 1973, this category includes oil export tax. ³March includes supplementary payments arising from the closing of the accounts. Sources: The Canada Gazette and Dept. of Finance.

National Income and Expenditure Accounts – (Continued from page 7)

TABLE 2. Gross National Expenditure, by Quarters, 1973 and 1974
Seasonally adjusted at annual rates

	1973					1974		
	I	II	III	IV	Year	I	II	III
	\$'000,000							
Personal expenditure on consumer goods and services	66,060	67,676	69,972	72,668	69,094	75,664	78,308	81,324
Government current expenditure on goods and services ¹	22,056	22,092	23,000	23,968	22,779	24,764	26,026	27,864
Gross fixed capital formation	24,176	26,112	27,180	28,540	26,502	30,676	31,572	33,100
Government ²	4,104	4,372	4,552	4,552	4,395	4,804	4,968	5,312
Residential construction	24	32	24	20	25	24	32	28
Non-residential construction	3,584	3,824	3,892	4,000	3,825	4,220	4,352	4,692
Machinery and equipment	496	516	636	532	545	560	584	592
Business ³	20,072	21,740	22,628	23,988	22,107	25,872	26,604	27,788
Residential construction	5,584	6,656	6,704	7,088	6,508	7,428	8,048	7,656
Non-residential construction	6,712	7,084	7,352	7,748	7,224	8,436	8,492	8,924
Machinery and equipment	7,776	8,000	8,572	9,152	8,375	10,008	10,064	11,208
Value of physical change in inventories	988	424	1,348	1,416	1,044	1,616	2,568	2,608
Government	-	24	-	52	0	16	-	12
Business:					15	24	12	24
Non-farm ⁴	1,260	652	344	1,436	923	2,672	2,740	2,032
Farm and grain in commercial channels ⁵	-	248	-	176	1,004	-	36	136
Exports of goods and services	29,024	29,804	30,236	32,900	30,491	36,148	37,332	39,544
Deduct: Imports of goods and services	-	29,804	-	29,776	-	31,208	-	31,276
Residual error of estimate		484	-	196	52	732	268	620
Gross National Expenditure at market prices	112,984	116,136	120,580	125,908	118,902	132,228	137,444	142,672
Detail of farm inventories and GICC:								
Value of grain crop production	-	204	-	140	-	400	208	-
Depletions of farm stocks of grain		176	-	440	860	-	124	400
Change in other farm-held inventories	-	220	-	476	544	-	368	-
Grain in commercial channels						130	-	88
							336	504

¹ Includes defence expenditures. Details are shown in line 45, Table 16 of the forthcoming publication *National Income and Expenditure Accounts, Second Quarter, 1974*, Catalogue 13-001.

² Includes outlay on new durable assets such as building and highway construction by governments, other than government business enterprises. Excludes defence construction and equipment which are defined as current expenditure.

³ Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of the existing land and buildings.

⁴ The book value of inventories is deflated to remove the effect of price changes and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment. (See line 8, Table 1.)

⁵ In the seasonally adjusted series, the value of grain crop production in each quarter is taken as one fourth of the estimated value of crop production for the year as a whole (see footnote 4, Table 1). All other items in the farm inventories series are seasonally adjusted by standard techniques.

TABLE 3. Gross National Expenditure in Constant (1961) Dollars, by Quarters, 1973 and 1974¹
Seasonally adjusted at annual rates

	1973					1974		
	I	II	III	IV	Year	I	II	III
	\$'000,000							
Personal expenditure on consumer goods and services	47,424	47,624	48,196	49,088	48,083	50,020	50,308	50,792
Government current expenditure on goods and services	11,664	11,528	11,848	12,160	11,800	12,376	12,576	12,788
Gross fixed capital formation	15,908	16,776	17,316	17,760	16,940	18,532	18,168	18,420
Government	2,668	2,800	2,876	2,816	2,790	2,864	2,844	2,948
Residential construction	16	20	12	12	15	12	16	12
Non-residential construction	2,252	2,364	2,360	2,392	2,342	2,436	2,404	2,516
Machinery and equipment	400	416	504	412	433	416	424	420
Business	13,240	13,976	14,440	14,944	14,150	15,668	15,324	15,472
Residential construction	3,368	3,888	3,876	4,028	3,790	4,160	4,208	3,760
Non-residential construction	4,104	4,220	4,364	4,464	4,288	4,664	4,456	4,572
Machinery and equipment	5,768	5,868	6,200	6,452	6,072	6,844	6,660	7,140
Value of physical change in inventories	828	464	412	1,348	763	1,212	1,644	1,256
Government	-	20	-	40	12	16	4	-
Business:					14		16	36
Non-farm	1,084	576	356	1,288	826	1,660	1,704	1,220
Farm and grain in commercial channels	-	236	-	72	68	44	44	72
Exports of goods and services	21,548	21,108	20,496	20,916	21,07	21,004	20,360	20,876
Deduct: Imports of goods and services	-	22,344	-	21,744	-	22,144	-	22,454
Residual error of estimate		348	-	100	56	480	196	372
Gross National Expenditure in constant (1961) dollars	75,376	75,656	76,180	78,168	76,345	79,292	79,312	79,292

¹ The implicit price deflators of the seasonally unadjusted components of Gross National Expenditure, derived by dividing the value figures in current dollars by the constant dollar figures, are not suitable as indicators of quarter-to-quarter price change. This is because they are currently weighted and therefore are affected by the compositional shifts which occur within the unadjusted components of Gross National Expenditure, on a quarter-to-quarter basis. Quarter-to-quarter movements in the implicit price deflators based on seasonally adjusted data are less subject to the problem of shifting weights and may be used as a measure of price change.

Other Publications of the General Time Series Staff

Publication number	Title and Description	Publication number	Title and Description
11-003F	<i>Revue Statistique du Canada</i> , mensuel. This is the French edition of the <i>Canadian Statistical Review</i> .		CANSIM Manuals and other Publications (Cont'd)
11-004	Canadian Statistical Review Supplements <i>Weekly Supplement to the Canadian Statistical Review</i> —Free to <i>Canadian Statistical Review</i> subscribers.	*12-530	<i>CANSIM: Operational Manual for Data Entry (Occasional)</i> —Price \$1.40
	Contains figures produced by Statistics Canada and other agencies which are released during the week of issue. The data will, of course, appear in the following issue of the <i>Canadian Statistical Review</i> . Designed to keep users of the <i>Review</i> closely informed of the most recent changes in the major statistical series (Bilingual).		This manual will be of practical interest only to federal government agencies which store and maintain time series in the CANSIM data base. Users desiring a fuller knowledge of the codes used and the storage methodology will find this volume a useful companion to the Retrieval manual. (Available in French, catalogue no. 12-530F.)
11-206	<i>Annual Supplement to the Canadian Statistical Review</i> —Price \$1.40 (Free to <i>Canadian Statistical Review</i> subscribers.)	*12-531	<i>CANSIM: Users Manual for Data Retrieval and Manipulation (Occasional)</i> 1973 edition—Price \$2.10
	Contains monthly and quarterly historical records, adjusted and not adjusted for seasonality, of all the series of Section I of the <i>Canadian Statistical Review</i> . The series extend back to 1946 or as far back as the data are available (Bilingual).		Gives detailed instructions on procedures for obtaining data from the CANSIM data base. The new edition reflects enlargement and improvement of the retrieval package. (Available in French, catalogue no. 12-531F.)
-505	<i>Canadian Statistical Review—Historical Summary 1970</i> , E. and F. Price \$1.50 (Free to <i>Canadian Statistical Review</i> subscribers)	—	CANSIM: Summary Reference Index (Annual, with periodic amendments) 1974 edition—Free on request.
	This publication replaces the <i>Historical Summary</i> 1963 (catalogue no. 11-502, Occasional). It contains annual data for series published in the monthly <i>Canadian Statistical Review</i> (11-003). Its contents, table headings and table numbers, with a few exceptions, are the same as those in the tabular section of the <i>Review</i> . All tables include 1970 data, some have 1971, and extend back to 1926, or as far back as available. The figures were the latest available early in 1971.		This index summarizes data available from CANSIM and provides matrix identifiers. Order by title from General Time Series Staff.
	CANSIM Manuals and other Publications*	—	CANSIM: Series Directory (Annual, with periodic amendments) 1974 edition—Price \$15.00, or \$20.00 with amendment service.
—	<i>CANSIM: An Introduction to the Canadian Socio-economic Information Management System</i> —Free on request. Order by title from General Time Series Staff.		The CANSIM <i>Series Directory</i> contains matrix and series titles and descriptive detail for series available from CANSIM. It is used in conjunction with the <i>Summary Reference Index</i> and <i>CANSIM Manual for Data Retrieval and Manipulation</i> (12-531) to order series from Statistics Canada. Order by title from General Time Series Staff.
—	<i>CANSIM: Progress Report</i> —Free on request. Order by title from General Time Series Staff.		————— This Review, the above and other catalogued publications of Statistics Canada, including a free annotated catalogue of current publications, may be ordered from Publications Distribution, Statistics Canada, Ottawa, Ont., K1A 0T6 Canada, and remittances made payable to the Receiver General of Canada. For further information direct inquiries to:
			General Time Series Staff, R. H. Coats Tower, Statistics Canada, Ottawa, K1A 0T6.

121

Amendments to catalogue numbers 12-530 and 12-531 will be issued periodically and will be available from the Publications Distribution, Statistics Canada.
