MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. VI

OTTAWA, JUNE, 1931

No. 6

DOMINION STATISTICIAN: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.
CHIEF, BRANCH OF GENERAL STATISTICS: S. A. CUDMORE, M.A., F.S.S.
ASSISTANT ON BUSINESS STATISTICS: SYDNEY B. SMITH, M.A.

THE CURRENT BUSINESS SITUATION IN CANADA

SUMMARY

Business operations in Canada showed an improvement in May over the preceding month despite recession in several important industries. The production of pig iron and steel showed a decline in May even before adjustment for seasonal tendencies. The output of pig iron was 50,511 tons as compared with 53,792 tons in the preceding month. May was the first month this year to show a decline from the preceding month in the daily rate of production. Production of steel ingots and castings amounted to 75,235 tons, a daily rate of 2,407 tons. This rate of output was 20 p.c. under the 3,049 tons per day in April.

The production of automobiles showed marked contraction, the output being 12,738 units compared with 17,159 units in the preceding month. May is normally the most active season of the year, and adjustment for seasonal tendencies consequently accentuates the extent of the reduction.

The output of newsprint at 202,607 tons showed moderate recession from the preceding month and the exports of lumber were down after seasonal adjustment.

The imports of raw materials indicating the trend of future production in certain lines, showed a marked gain in the month under review. The imports of crude rubber were 6,155,000 lbs. compared with 4,638,000 lbs. in April, a decline being normal for the season. The imports of raw cotton at 8,405,000 lbs. showed a marked gain over April, when cotton is normally imported in larger quantities. The imports of raw wool and wool yarn also showed considerable expansion. The imports of crude petroleum at 107,209,000 gallons was at the highest point for the present year, even when adjustment is made for seasonal tendencies. The net result was that the index of manufacturing production was 163.3 in May compared with 145.9 in April, each of the component factors having been adjusted for seasonal tendencies.

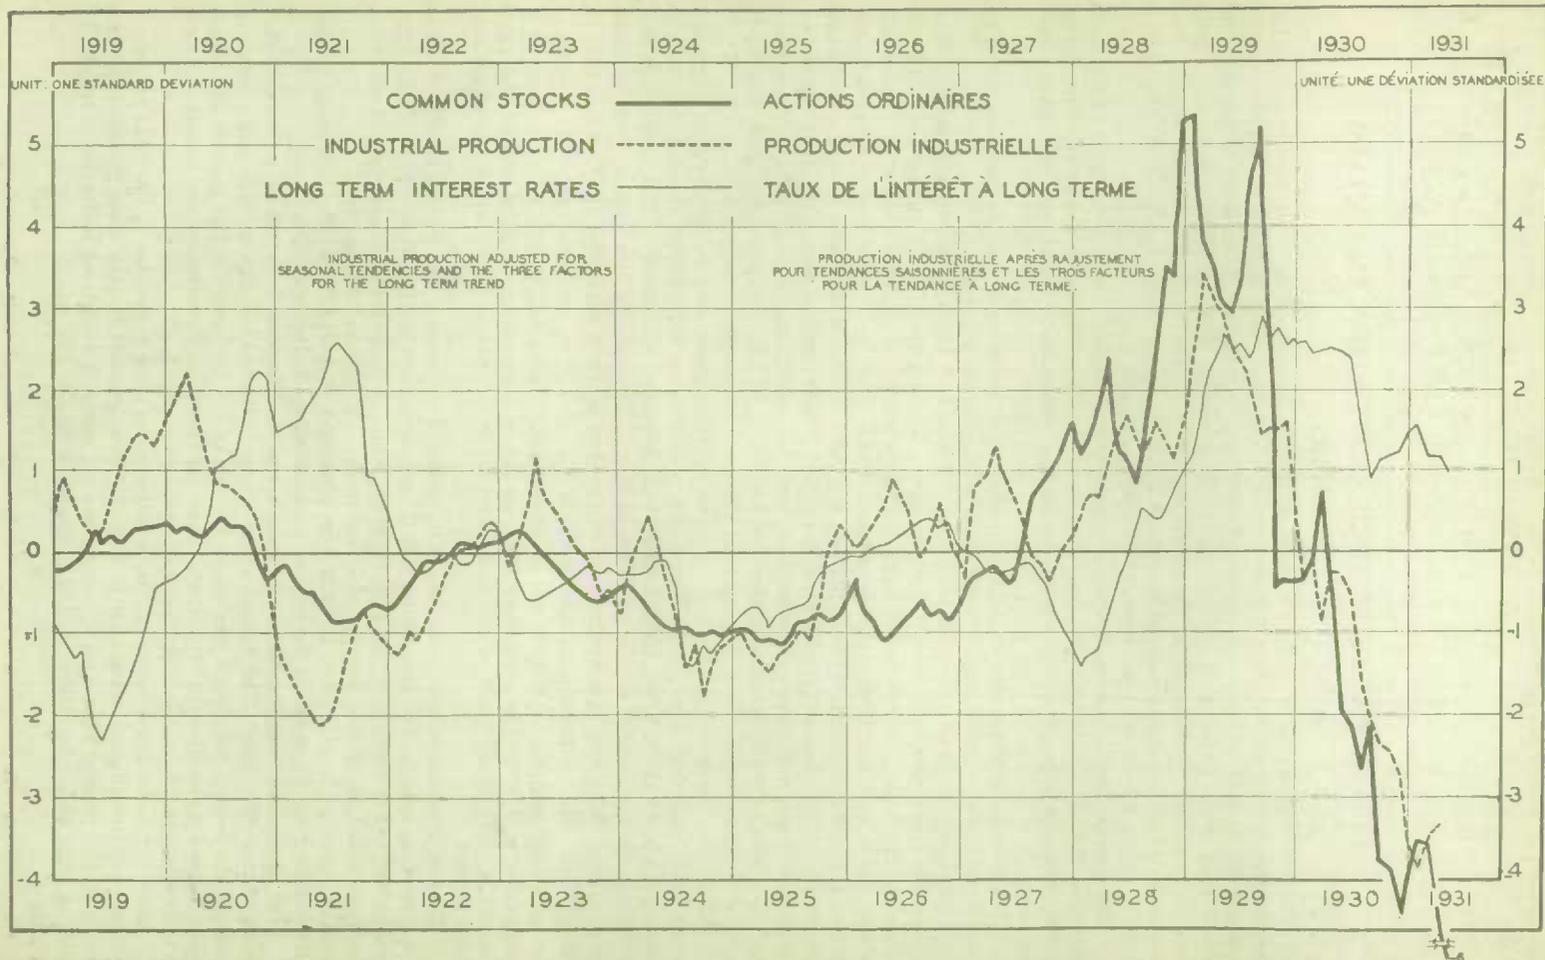

While the construction contracts awarded in May, amounting to \$36,900,000, showed a considerable gain over April, when the awards amounted to \$22,708,000, the sum for the two months is considerably below normal, indicating depressed conditions. This tendency is confirmed by the low level of building permits in May. The value of the building permits issued by 61 cities during May was lower by 13.9 p.c. than in April, and lower by 41.6 p.c. than in May, 1930. The authorizations amounted to \$11,868,171 as compared with \$13,786,466 in the preceding month and \$20,321,160 in May, 1930. The total for the first five months of 1931, namely, \$49,001,536, was lower than for the corresponding period of any of the years since 1921. Wholesale prices of building materials were lower in 1931 than in any other year of the record.

Mineral production, after adjustment for seasonal tendencies, was greater in May than in the preceding month, the index being 149.7 as compared with 146.1 in April. Gains were recorded in the shipments of silver and copper, while gold, nickel and zinc showed recession. The coal mined in May at 901,504 tons was moderately greater than in April.

Car loadings in May were 215,973 cars compared with 214,425 in the preceding month. After adjustment for seasonal tendencies, a considerable decline was shown.

The chief unsettling factor of the month was the continued decline in commodity and speculative stock prices. The liquidation of stocks continued throughout May and a new low point on the present movement was reached at the end of the month. The price of high grade bonds showed appreciation in May, the averages for Dominion Government and Ontario Government bonds being at a relatively higher price than in April.

Bank debits to individual accounts, constituting a good barometer of the total volume of business and speculation transacted in Canada, were greater in May than in any preceding month of the present year. After adjustment for seasonal conditions and price changes, the index of bank debits for May was 145 compared with 139.1 in April.

Economic Changes.

The chart of three representative factors appearing on page 4 shows that the Index of industrial production, after taking the three months moving average for smoothing purposes, registered a gain from February to April, affording excellent resistance to reactionary tendencies. The trend of common stock prices was sharply downward in April and May, a new low point being reached in the present movement. In the month under review, the index of common stock prices was six times the standard deviation below computed normal or the long-term trend. Long-term interest rates as determined by the yields on Ontario Government bonds showed a decline in May.

In the chart appearing on page 10, five economic factors, expressed as a percentage of the monthly average for 1926, are presented for the period from 1919 to the present. The inter-connection of the basic factors in the economic situation is illustrated by the general downward movement in the five factors since the cycle reached its zenith in 1929. Industrial production reached its highest point in March 1929 and the subsequent decline was pronounced. Employment with seasonal adjustment has been declining since August, 1929. Wholesale prices which, contrary to historical precedent, had not shown an advance during the prosperous period from 1924 to 1929, have recorded a marked decline since August 1929, the liquidation in this line forming one of the main elements in the present depression. The decline in interest rates in New York to the lowest point in the history of the Federal Reserve system is a natural result of the decline in commodity and security prices as well as the contraction in business operations.

Despite the relatively low level of industrial production during the first part of 1931, the operations of the central electric stations were fairly well maintained, Ontario being the only one of the five economic areas showing important recession. (See chart on page 15).

The Wheat Situation.

Wheat production is one of the main factors in the economic situation of Canada, and much interest is taken at present in crop prospects and the future trend of prices. The unsatisfactory price obtained for wheat during the last 12 months has contributed to the economic depression of the Dominion. The underlying causes of the change from the prosperous conditions of 1927 to 1928 were the generally favourable climatic conditions resulting in large world crops, combined with restrictive influences on demand attributed to the world-wide depression of major proportions, as well as to the self-sufficiency tendencies. The high production, most notable in Europe, led to reduced demands for North American supplies and heavy stocks accumulated. The sale of large consignments of wheat by Russia in the fall of 1930 added to the uncertainties of a weak grain market.

In times of depression, there is a natural tendency toward the extended use of staple commodities such as wheat. A relatively low price range also discourages the breaking in of additional acreage, while large areas previously sown to wheat are allowed to remain idle or are devoted to other purposes. The notable reductions in the area to be sown in the spring and summer of 1931 are reported as follows: United States 15 p.c. or 3 million acres; Canada 8 p.c. or 2 million acres; Argentina 12 p.c. or 2.5 million acres; and the Danube basin 7.5 p.c. or 1.5 million acres. The five-year plan in Russia contemplates an area of 101 million acres in wheat or an increase of 15 million acres over last season. Spring seeding in Russia was delayed by backward weather, but has recently been speeded up to surpass last year's total at the same date.

The decidedly improved tone in the world wheat market during May was due to the necessity of building up the depleted port, mill and farm stocks in Europe, while the Orient made heavy purchases of Australian wheat. Facilitated by the relaxation of European tariff barriers and milling regulations especially in France and Germany, continued large imports are anticipated for Germany, France, Holland, Belgium and Italy until the new European crop becomes available.

Stocks to be carried into the new season by exporting countries will be about 20 p.c. higher than in 1930 and are rather heavily concentrated in North America. A major influence will be the United States winter wheat crop, estimated on June 8 at 649,000,000 bushels, the largest since the harvest of 1918. On the other hand, the European crop will be below the average of recent years and the spring wheat crop of North America has at present about 80 p.c. of the promise of the 1930 crop.

Canal Traffic.

Traffic through the St. Lawrence canals in May created a new high record for that month, amounting to 1,165,791 tons, as compared with 841,348 tons in May, 1930, and with 1,094,346 tons in May, 1927, the previous record year. Wheat shipments totalled 531,605 tons or 17,720,-

160 bushels; barley, 148,104 tons as against 14,954 tons in 1930; and oats, 47,144 tons as against 14,048 tons last year. Pulpwood increased from 31,984 tons in 1930 to 37,450 tons, and sand from 40,580 tons to 77,260 tons.

Total traffic through the Canadian and United States locks at Sault Ste. Marie amounted to 4,335,021 tons, which, with the exception of May, 1922, was the smallest tonnage passing through in any month of May in the past decade. Iron ore was particularly light, amounting to only 1,704,747 tons as against 6,777,911 tons in May, 1930, and 9,544,792 tons in May, 1929. Coal was light, amounting to 934,242 tons as against 2,866,604 tons last year. Wheat increased from 29,080,481 bushels in 1930 to 29,439,077 bushels, and other grains more than doubled, amounting to 12,342,303 bushels as against 6,049,005 bushels last year.

Total traffic through the Welland Canal, amounting to 1,165,853 tons, was the heaviest handled during May in any year in the past ten years. Wheat tonnage was more than double the tonnage of 1930, amounting to 181,809 tons, or 6,060,300 bushels. Barley increased from 21,672 tons in 1930 to 131,036 tons and oats increased from 20,392 tons to 55,732 tons.

Wholesale Prices.

The downward trend of wholesale prices was continued in May, the official index being 73.0 compared with 74.5 in April. The background of commodity prices in principal industrial countries was reactionary, the tendency of representative indexes in April being more definitely downward than in March, if exceptions are made in the case of France and several countries in central and northern Europe.

The price of wheat on the Winnipeg grain exchange averaged slightly higher in May than in the preceding month. Dry weather in western Canada, especially in the first two weeks, gave substantial support to prices. Moving against the trend of wheat quotations, flour prices declined still further in May. The price of Cuban raw sugar in New York dropped back again to \$1.20, the same average as reported for March. May rubber markets following a weak start, exhibited considerable firmness, influenced by reduced Malayan shipments in April compared with the preceding month and a decline in dealers stocks in the far east.

Lower prices for cotton were attributed chiefly to reports of renewed liquidation and weak security markets. In both eastern and western Canada seasonal demand for lumber did not realize expectations and the volume of exports was light with no advance in prices. Copper prices dropped to the level of 1894 in the U.S. basic market, and recession in tin prices reduced quotations for May to the lowest point since 1899.

In view of the recent pronounced declines in basic commodity prices, considerable interest has been of late directed toward living cost movements. The Bureau's index of retail prices, rents, and costs of services in Canada (1926=100), was 90.4 for May, this total being struck from sub-groups indexes as follows: Foods 77.7, fuel 94.2, rent 103.3, clothing 84.7, and sundries 98.1. Indexes for merchandise sold over the counter have shared to a much greater extent in the current decline of prices than such items as rents and service costs. In fact the index for rents moved against the downward trend until the fall of 1930, when it was considerably out of line with other group numbers. Foods have kept pace very closely with the decline in wholesale prices as indicated by a comparison of the May retail index of foods, 77.7, and the May wholesale index of foods, beverages, and tobacco which was 72.1. The retail index of clothing at 84.7 also compared favourably with the wholesale index for clothing items of 80.3.

FINANCE

Banking.

The bank return as of April 30 reflected the moderate gain in business operations. Current loans showed a gain of more than \$15,000,000, the increase after seasonal adjustment being 8.5 p.c. The gain in April reversed the downward trend of the preceding twelve months. The net result of the changes during the period was a decline of \$214,500,000.

The gain in notice deposits in April was nearly \$8,000,000. The minimum of this account in the present depression was reached in July, 1930. Since that time successive gains have been recorded except in December. The gain on April 30 last over the same date of 1930 was \$12,000,000. The excess of notice deposits over current loans on April 30 was \$323,000,000 compared with \$96,000,000 on the same date of 1930.

The holdings of Dominion Government bonds showed further gain in April, the total at the end of the month being \$444,700,000. This compares with \$288,190,000 on the same date of last year. The investment holdings of the three classes of securities on April 30 was \$651,-

300,000 compared with \$427,800,000 on April 30, 1930. During the year the gain in the holdings of Dominion Government bonds was \$156,500,000, while public securities and railway securities were up \$56,000,000 and \$11,000,000, respectively.

Call loans in Canada showed a decline of \$52,200,000 in the long-term comparison and call loans elsewhere were down \$65,500,000.

Stock Prices.

The liquidation of stock prices in process during April, was continued further in May, the general index for 132 stocks being 81.4 in the month under review compared with 97.1. Each group in the classification moved to lower levels in May. The index for 98 industrials declined from 106.8 to 89.0 or 16.6 p.c., while the drop in utilities was from 104.8 to 85.2 or 18.7 p.c.

Measured by the weekly index of 124 stocks a low point was reached in the week ended June 4, while a rally general to all groups with one exception was registered in the week of June 11. The gain in the general index between the two weeks in question was from 71.1 to 74.7 or about 5 p.c.

The traders index of 25 most active stocks listed on the Canadian exchanges was 495.2 in May compared with 621.5 in April, a decline of 20.3 p.c. The index number of 22 preferred stocks at 73.8 in May was 6.4 p.c. less than in the preceding month.

The yield on Ontario Government bonds averaged 4.40 p.c. in May compared with 4.50 p.c. in April. The index of long-term interest rates consequently declined from 92.9 to 91.9, the average for 1926 equalling 100.

The reaction in Canadian exchange in New York on June 12 to a discount of nine-sixteenths of one p.c. resulted in the shipment on the following day of \$3,000,000 in gold, the first transfer of the metal from the Dominion since January.

CONDITIONS IN THE UNITED STATES

The trend of business operations turned downward in the United States in May after moderate betterment had been shown for the three preceding months. Construction contracts awarded declined in May slightly more than seasonally to a new low level for the current depression, due entirely to a slackening in the value of contracts for public works and utility projects. The iron and steel industry met with slow demand for principal products and marked curtailment was registered in May. The unfilled orders of the steel corporation showed a decrease of less than one-half of 1 p.c. more than the usual seasonal downturn for the end of May. Steel ingot production in May dropped in the daily rate by 8 p.c. in contrast with a normal seasonal decline of 3.7 p.c.

Preliminary reports of automobile production indicate that operations were well maintained in May. While a decline was shown in cotton consumption from the relatively high level of the preceding month, operations in cotton manufactures after seasonal adjustment were, with the exception of April, at a higher point than at any time in the last eleven months. Carloadings after seasonal adjustment were 7 p.c. less than in April.

The decline in commodity prices continued to be an unsettling factor. The *Annalist* weekly index was 100.5 in the week ended June 2 compared with 104.9 in the week ended April 28, marked declines being shown in farm and food products. The stock market reflected the uncertainty as to the future trend of economic conditions. According to the Standard Statistics daily index of 90 stocks, average prices receded about 28 p.c. from the level of late February and at the close of May had reached the lowest point since October 1926.

The Federal Reserve bank of New York reduced its rediscount rate on May 8 from 2 p.c. to 1½ p.c., the lowest ever in effect at any Federal Reserve bank.

Table 1. Weighted Indexes of the Physical Volume of Business in Canada, Based on the Six-Year Period from 1919-1924 and Corrected where Necessary for Seasonal Variation.

Classification	1930								1931

¹ The indexes under this heading are for the purpose of measuring the trend from month to month of the volume of production and business in terms of physical units, the monthly average from 1919 to 1924 being regarded as equivalent to 100 and adjustment made for seasonal tendencies. In the group index *s*, the relative numbers for single items are weighted according to values during the base period. A description of the method of compilation is given in the number for June, 1927, pp. 8-9.

Table 2. Trend of Business Movements

Items	1930								1931				
	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May
Rubber, crude imports..... 000 lbs.	5,896	5,777	7,496	4,723	3,534	4,346	4,768	3,016	3,820	4,316	6,748	4,638	6,155
Cotton, raw imports..... 000 lbs.	7,056	4,981	4,732	3,457	5,524	12,716	15,788	12,343	10,152	5,389	10,837	6,155	8,405

Table 23. Index Numbers of Security Prices, Weighted.

The indexes of stocks are expressed as a percentage of the average price during 1926, the compilation of the common stock indexes for 1927 and 1928 being based on the quotations for 112 stocks, while beginning with January 1929 125 stocks were used. Further information in regard to security prices may be obtained free upon application to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa.

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. VI

OTTAWA, JUIN, 1931

N° 6

STATISTICIEN DU DOMINION: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.
CHEF DE LA SECTION DE LA STATISTIQUE GÉNÉRALE: S. A. CUDMORE, M.A., F.S.S.
ADJOINT (STATISTIQUES ÉCONOMIQUES): S. B. SMITH, M.A.

STATISTIQUE COURANTE DES AFFAIRES DU CANADA

RÉSUMÉ

Les opérations commerciales au Canada montrent une certaine amélioration en mai comparativement au mois précédent malgré une récession dans plusieurs industries importantes. La production de fer en gueuse et d'acier montre un déclin en mai même après rajustement pour tendances saisonnières. La production de fer en gueuse est de 50,511 tonnes comparativement à 53,792 tonnes le mois précédent. Mai est le premier mois de cette année montrant, comparativement au mois précédent, une diminution dans le volume de la production quotidienne. La production d'acier en billes ou en moulages, à 75,235 tonnes, donne une moyenne quotidienne de 2,407 tonnes; c'est 20 p.c. de moins que les 3,049 tonnes en avril.

La production d'automobiles montre une contraction prononcée, soit 12,738 unités comparativement à 17,159 unités le mois précédent. Mai est normalement la saison la plus active de l'année et le rajustement pour tendances saisonnières accentue encore l'importance de cette réduction.

La production de papier à journal à 202,607 tonnes montre une récession modérée sur le mois précédent et les exportations de bois-d'œuvre ont baissé, après rajustement pour tendances saisonnières.

Les importations de matières premières indiquant les tendances de la production future dans certaines lignes accusent un gain marqué au cours du mois sous revue. Les importations de caoutchouc brut s'élèvent à 6,155,000 livres comparativement à 4,838,000 livres en avril, alors qu'un déclin est normal pour la saison. Les importations de coton brut à 8,405,000 livres donnent un gain prononcé sur avril alors que normalement le coton y est importé en plus grande quantité. Les importations de laine brute et de fils de laine montrent aussi une expansion considérable. Les importations de pétrole brut à 107,309,000 gallons sont à leur point le plus élevé de l'année courante, même après rajustement pour tendances saisonnières. Comme résultat net, l'indice de la production manufacturière est à 163.3 en mai, comparativement à 145.9 en avril, après rajustement pour tendances saisonnières de chacun des facteurs.

Bien que les contrats de construction en mai, s'élevant à \$36,900,000, montrent un gain considérable sur avril, qui ne donnait que \$22,708,000, la somme des deux mois est considérablement inférieure à la normale, indiquant des conditions déprimées. Cette tendance est confirmée par le bas niveau des permis de construction en mai. La valeur des permis de bâtir émis dans 61 villes au cours de mai est de 13.9 p.c. inférieure à celle d'avril et de 41.6 p.c. inférieure à celle de mai 1930. Le chiffre des permis s'élève à \$11,868,171 comparativement à \$13,786,466 le mois précédent et \$20,321,160 en mai 1930. Le total des cinq premiers mois de 1931, soit \$49,001,536, est plus faible que celui de la période correspondante de toute année depuis 1921. Les prix de gros des matériaux de construction sont plus faibles en 1931 qu'en toute autre année depuis le commencement de la compilation.

La production minière, après rajustement pour tendances saisonnières, est plus grande en mai que le mois précédent, l'indice marquant 149.7 comparativement à 146.1 en avril. Des gains sont constatés dans les expéditions d'argent et de cuivre tandis que l'or, le nickel et le zinc montrent des récessions. La quantité de charbon extraite en mai à 901,504 tonnes est modérément plus grande qu'en avril.

Le nombre de wagons chargés en mai, 215,973, se compare à 214,425 le mois précédent. Après rajustement pour tendances saisonnières il y a un déclin considérable.

Le principal facteur de malaise au cours du mois se trouve dans un déclin continu du prix des denrées et des titres de spéculation. La liquidation des titres s'est continuée en mai et un nouveau fond a été atteint à la fin du mois. Le cours des obligations de tout repos a monté en mai, les moyennes des obligations du gouvernement fédéral et du gouvernement d'Ontario étant relativement plus hautes qu'en avril.

Changements économiques.

Le graphique des trois facteurs représentatifs paraissant à la page 4 montre que l'indice de la production industrielle, calculé sur la moyenne trimestrielle mobile, marque un gain de février à avril, offrant une excellente résistance à la réaction. La cote des actions ordinaires a subi une violente baisse en avril et mai et a atteint un nouveau fond dans le mouvement actuel. Au cours du mois sous revue l'indice des actions ordinaires est tombé à six fois la déviation standardisée au-dessous de la normale ou de la tendance à long terme. Le loyer de l'argent à long terme tel que déterminé par le rendement des obligations d'Ontario a aussi baissé en mai.

Dans le graphique de la page 10 les cinq facteurs économiques exprimés en pourcentages de la moyenne mensuelle de 1926 sont présentés pour la période de 1919 jusqu'à aujourd'hui. L'interdépendance des facteurs basiques de la situation économique est illustrée par le mouvement général de baisse des cinq facteurs depuis que le cycle a atteint son zénith en 1929. La production industrielle a atteint son plus haut point en mars 1929 et le déclin qui a suivi a été très prononcé. L'emploi après rajustement pour tendances saisonnières a décliné depuis août 1929. Les prix de gros, qui contrairement au précédent historique n'avaient pas fait d'avance au cours de la période de prospérité de 1924 à 1929, ont subi un déclin marqué depuis août 1929, la liquidation dans cette ligne fournissant un des principaux éléments de la présente dépression. Le déclin des taux d'intérêt à New-York au point le plus bas de l'histoire du système de la Federal Reserve est un résultat naturel de la baisse des denrées et des valeurs mobilières aussi bien que la contraction des opérations commerciales.

Malgré le taux relativement bas de la production industrielle dans la première partie de 1926 les opérations des usines centrales électriques se sont assez bien maintenues, l'Ontario étant la seule des cinq régions économiques montrant une récession importante. (Voir le graphique, p. 15).

La situation du blé.

La production de blé est un des principaux facteurs de la situation économique au Canada et l'on porte beaucoup d'intérêt aux perspectives actuelles de la récolte et à la tendance des prix futurs. La faiblesse des cours du blé pendant les derniers douze mois a grandement contribué à la dépression économique du Dominion. Les causes sous-jacentes du changement des conditions prospères de 1927 et 1928 se trouvent dans les conditions climatiques généralement favorables qui ont eu pour résultat de fortes récoltes mondiales combinées avec des influences restreignant la demande, attribuées à une dépression mondiale de proportions majeures aussi bien qu'à l'effort de plusieurs pays pour se suffire à eux-mêmes. La forte production, notable plus particulièrement en Europe, a réduit la demande pour provisions de l'Amérique du Nord et il en est résulté une lourde accumulation de stocks. La vente de fortes consignations de blé russe, dans l'automne de 1930, a aggravé les incertitudes d'un marché du blé déjà faible.

Dans les temps de dépression, la tendance naturelle est à un plus grand usage de denrées primaires comme le blé. Des prix relativement bas en même temps luttent contre l'expansion des emblavures, et de grandes superficies antérieurement consacrées au blé sont laissées incultes ou employées à d'autres cultures. Les réductions les plus notables dans les ensemencements de blé de printemps et d'été de 1931 sont comme suit: États-Unis, 15 p.e. ou 3 millions d'acres; Canada, 8 p.e. ou 2 millions d'acres; Argentine, 12 p.e. ou 2.5 millions d'acres; et bassin du Danube, 7.5 p.e. ou 1.5 million d'acres. Le plan de cinq ans en Russie prévoit une superficie de 101 millions d'acres en blé pour cette saison, soit une augmentation de 15 millions d'acres sur la saison dernière. Les semences de printemps ont été retardées par le mauvais temps en Russie, mais elles ont été ensuite accélérées au point qu'elles dépassent maintenant le total de l'an dernier à la même date.

Trafic des canaux.

Le trafic des canaux du St-Laurent en mai a dépassé tous les précédents pour ce mois atteignant 1,165,791 tonnes comparativement à 841,348 tonnes en mai 1930, 1,094,346 tonnes en 1927, le record précédent. Les expéditions de blé donnent 531,605 tonnes ou 17,720,160 boisseaux; d'orge, 148,104 tonnes contre 14,954 tonnes en 1930; d'avoine, 47,144 tonnes comparativement à 14,048 tonnes l'an dernier. Le bois de pulpe a augmenté de 31,984 tonnes en 1930 à 37,450 tonnes et le sable de 40,580 tonnes à 77,260 tonnes.

Le trafic local par les écluses canadiennes et américaines au Sault Ste-Marie se chiffre à 4,335,021 tonnes ce qui, exception faite de mai 1922, est le plus faible tonnage passé par ces écluses en mai au cours de la dernière décennie. Le minerai de fer a été particulièrement léger ne donnant que 1,704,747 tonnes comparativement à 6,777,911 tonnes en mai 1930 et 9,544,792 tonnes en mai 1929. Il en est de même pour le charbon qui a donné 934,242 tonnes au lieu de 2,866,604 tonnes l'an dernier. Le blé a augmenté de 29,080,481 boisseaux en 1930 à 29,439,077 boisseaux et le volume des autres grains a plus que doublé étant à 12,342,303 boisseaux au lieu de 6,049,005 boisseaux l'an dernier.

Le trafic par le canal Welland au chiffre de 1,165,853 tonnes a été le plus lourd pour un mois de mai quelconque dans les derniers dix ans. Le blé a plus que doublé son tonnage de 1930 donnant 181,809 tonnes ou 6,060,300 boisseaux. L'orge a augmenté de 21,672 tonnes en 1930 à 131,036 tonnes, et l'avoine a augmenté de 20,392 tonnes à 55,732 tonnes.

Prix de gros.

Le fléchissement des prix de gros s'est continué en mai, l'indice officiel marquant 73.0 comparativement à 74.5 en avril. L'arrière-plan du cours des denrées dans les principaux pays industriels a été réactionnaire, la tendance des indices représentatifs en avril étant plus définitivement à la baisse qu'en mars, si l'on fait des exceptions dans le cas de la France et plusieurs autres pays de l'Europe centrale et méridionale.

Le prix du blé à la bourse des grains de Winnipeg a été un peu plus fort en mai que le mois précédent. La sécheresse dans l'ouest canadien, principalement les deux premières semaines du mois, a contribué à maintenir les prix. Au lieu de suivre les cours du blé les prix de la farine ont fléchi en mai. Le sucre brut de Cuba a baissé de nouveau à \$1.20 à New-York ce qui est la même moyenne que celle de mars. Le caoutchouc a débuté faiblement mais ensuite a montré une fermeté considérable sous l'influence d'expéditions réduites de Malaisie comparativement au mois précédent et à un déclin des stocks visibles.

La baisse des prix du coton est attribuée principalement aux rapports de liquidation et à la faiblesse du marché des valeurs mobilières. Tant dans le Canada oriental que dans le Canada occidental la demande saisonnière pour bois-d'œuvre n'a pas été à la hauteur des attentes et le volume des exportations a été faible et sans avance des prix. Les prix du cuivre ont tombé à leur niveau de 1894 sur le marché basique des Etats-Unis et la récession des prix de l'étain a réduit les cotations de mai à leur point le plus bas depuis décembre 1899.

Vu les récents déclinés prononcés des denrées basiques, les mouvements du coût de la vie commandent de l'intérêt. L'indice du Bureau couvrant les prix de détail, le loyer et le coût des services au Canada (1926=100) étaient à 90.4 en mai, ce total étant calculé sur les indices de sous-groupes comme suit: alimentation 77.7, combustible 94.2, loyer 103.3, vêtement 84.7 et divers 98.1. L'indice des marchandises vendues au comptoir a suivi ce déclin beaucoup plus que certains autres items, tels que le loyer et le coût des services. Même l'indice des loyers a avancé en sens contraire jusqu'à l'automne de 1930 alors qu'il était considérablement en écart des autres groupes. Les aliments ont suivi étroitement le déclin des prix de gros comme l'indique une comparaison des prix de détail, des aliments et breuvages et du tabac à 72.1. L'indice des prix de détail du vêtement à 84.7 se compare aussi favorablement à l'indice du prix de gros des vêtements qui marque 80.3.

FINANCE

Affaires bancaires.

Le rapport des banques à la date du 30 avril fait voir un gain modéré dans les opérations commerciales. Les prêts courants accusent un gain de plus de \$15,000,000 ce qui donne après rajustement saisonnier une augmentation de 8.5 p.c. Le mois d'avril a renversé la tendance à la baisse des 12 mois précédents. Le résultat net des changements au cours de la période est un déclin net de \$214,500,000.

La gain en dépôts à vue en avril touche presque \$8,000,000. Le minimum de ce compte a été touché en juillet 1930. Depuis cette époque des gains successifs ont été enregistrés tous les mois excepté décembre. Au 30 avril dernier le gain était de \$12,000,000 comparativement à la même date de 1930. L'excédent des dépôts à terme sur les prêts courants le 30 avril était de \$323,000,000 comparativement à \$96,000,000 à la même date de 1930.

Les obligations du Dominion en portefeuille montrent un autre gain en avril, le total à la fin du mois étant de \$444,700,000 comparativement à \$288,190,000 à la même date de l'an dernier. Les trois classes de valeurs mobilières en portefeuille le 30 avril donnaient \$651,300,000 comparativement à \$427,800,000 le 30 avril 1930. Au cours de l'année l'augmentation d'obligations du Dominion en portefeuille est de \$156,500,000 et les titres d'utilité publique et de chemin de fer ont augmenté respectivement de \$56,000,000 et de \$11,000,000.

Les prêts à vue au Canada montrent un déclin de \$52,200,000 dans la comparaison à long terme et les prêts à demande ailleurs qu'au Canada ont diminué de \$65,500,000.

Valeurs mobilières.

La liquidation des valeurs mobilières d'avril s'est continuée en mai, l'indice général de 132 titres marquant 81.4 en mai comparativement à 97.1 en avril. Chaque groupe de la classification est descendu à un nouveau fond en mai. L'indice de 98 titres industriels a décliné de 106.8 à 89.0 ou 16.6 p.c. tandis que la baisse des utilités publiques a été de 104.8 à 85.2 ou 18.7 p.c.

Mesuré par l'indice hebdomadaire de 124 titres, un nouveau bas a été touché la semaine terminée le 4 juin et un raffermissement général de tous les groupes avec une seule exception s'est produit dans la semaine du 11 juin. La gain de l'indice général entre ces deux semaines a été de 71.1 à 74.7 ou environ 5 p.c.

L'indice du spéculateur dans les 25 titres les plus actifs inscrits aux bourses canadiennes était à 495.2 en mai comparativement à 621.5 en avril, un déclin de 20.3 p.c. Le nombre-indice de 22 titres d'action privilégiée à 73.8 en mai marquait 6.4 p.c. de moins que le mois précédent.

Le rendement des obligations d'Ontario à une moyenne de 4.40 p.c. en mai se compare à 4.50 p.c. en avril. En conséquence l'indice du loyer de l'argent à long terme a décliné de 92.9 à 91.9 moyenne de 1926 = 100.

La baisse du change canadien à New-York le 12 juin à un escompte de neuf-seizièmes d'un pour cent a eu pour résultat le jour suivant une expédition de \$3,009,000 en or, le premier transfert de métal du Dominion depuis janvier.

LA SITUATION AUX ÉTATS-UNIS

L'activité commerciale et industrielle aux États-Unis a montré en mai une tendance au ralentissement après une accélération modérée des trois mois précédents. Les contrats de construction en mai ont fléchi plus bas que le recul saisonnier et ont atteint un nouveau fond au cours de la présente dépression, provenant entièrement d'une diminution dans la valeur des contrats pour travaux publics et autres entreprises d'utilité publique. L'industrie du fer et de l'acier a vu ralentir la demande pour ses principaux produits et a dû réduire ses opérations en mai. Les commandes à remplir de la U.S. Steel Corporation montrent un déclin de moins d'un pour cent, ce qui dépasse la diminution ordinaire pour la fin de mai. La production quotidienne d'acier en lingots en mai a baissé de 8 p.c. alors que le déclin normal de la saison est de 3.7 p.c.

Les rapports préliminaires de la production d'automobiles indiquent que les opérations se sont bien maintenues en mai. Alors que la consommation de coton montre un déclin du niveau relativement élevé du mois précédent, les opérations dans les manufactures de coton ont été, après rajustements saisonniers, à un point plus élevé qu'à tout autre temps dans les derniers onze mois, excepté en avril. Les wagons chargés après rajustement donnent 7 p.c. de moins qu'en avril.

Le déclin du prix des denrées continue d'être un facteur d'instabilité. L'indice hebdomadaire de l'"Annalist" à 100.5 la semaine terminée le 2 juin se compare à 104.9 la semaine terminée le 28 avril, les déclinés les plus marqués étant dans les produits de la ferme et autres produits alimentaires. Le marché des valeurs mobilières a reflété l'incertitude sur les tendances futures des conditions économiques. D'après l'indice quotidien de 90 titres, de Standard Statistics, les prix moyens ont reculé d'environ 28 p.c. de leur niveau de février dernier jusqu'à la fin de mai et ont atteint leur point le plus bas depuis octobre 1926.

La banque Federal Reserve de New-York a réduit son taux d'escompte le 8 mai à 1½ p.c., le plus bas jamais donné par aucune banque de la Federal Reserve.

PUBLICATIONS ISSUED BY THE DOMINION BUREAU OF STATISTICS

1. ANNUAL OR SPECIAL REPORTS ISSUED DURING THE MONTH ENDED JUNE 16, 1931

Administration.—The tourist trade of Canada, 1930.

Population.—Vital statistics 1928, eighth annual report.

Production.—Announcement of telegraphic crop reports and list of correspondents in the Prairie Provinces, 1931. **ANIMAL PRODUCTS.**—Preliminary report on the fur production of Canada, season 1929-1930. Fisheries statistics of Quebec, 1930. Fisheries statistics of New Brunswick, 1930. Fisheries statistics of British Columbia, 1930. Preliminary report on concentrated milk plants, Canada, 1930. Estimated consumption of meat, poultry and eggs. **MINERAL PRODUCTION.**—Rapport préliminaire sur la production minière du Canada pendant l'année civile 1930. Preliminary summary report on chemicals and allied products in Canada, 1930. The non-ferrous smelting and refining industry in Canada, 1930. Metals of the platinum group, 1930. Ammonium sulphate, 1930. Arsenic, 1930. Cobalt, 1930. Gold, 1930. Nickel, 1930.

Manufactures.—**VEGETABLE PRODUCTS.**—Preliminary report on the tobacco manufacturing industry in Canada, 1930. **MANUFACTURES OF NON-FERROUS METALS.** Preliminary summary report of manufactures of non-ferrous metals, 1930. The electric vacuum industry in Canada, 1930.

External Trade.—Quarterly report of the trade of Canada months of January, February and March, 1931, and twelve months ending March, 1930 and 1931.

Internal Trade.—Changes in the value of retail sales, January, 1929, to April, 1931.

Transportation, Communications and Public Utilities.—Preliminary report central electric station industry in Canada, 1929. Express statistics for 1930.

Finance.—Assessment valuations by provinces, 1929. Report on the bonded indebtedness of urban and rural municipalities in Canada, 1929. Municipal statistics, 1929.

Education.—Summer schools in Canada, 1930.

General.—Survey of production in Canada, 1929.

2. PUBLICATIONS REGULARLY ISSUED BY THE WEEK, MONTH OR QUARTER

Weekly Bulletins.—Canadian Grain Statistics. Carloadings of Revenue Freight. Investors and Traders' Indexes of Security Prices. Index Number of 17 mining Stocks.

Monthly Bulletins.—Agricultural Statistics. The Wheat Situation. Cold Storage Holdings. Production of (a) Flour. (b) Sugar. (c) Boots and Shoes. (d) Automobiles. (e) Iron and Steel. (f) Coal and Coke. (g) Leading Mineral Products. (h) Concentrated Milk Products. Building Permits. Summary of the Trade of Canada current month and 12 months. Summary of Canada's domestic exports. Summary of Canada's imports. Asbestos trade. Footwear trade. **EXPORTS:** Grain and flour, lumber; meats, lard and sausage casings; milk, milk products and eggs; non-ferrous ores and smelter products; paints and varnishes; petroleum and its products; pulpwood, wood pulp and paper; rubber and insulated wire and cable; vehicles (of iron). **IMPORTS:** lumber; meats; lard, and sausage casings; milk and its products and eggs; non-ferrous ores and smelter products; paints and varnishes; petroleum and its products; rubber; stoves, sheet metal products; refrigerators; vehicles (of iron).

Railway Operating Statistics. Traffic of Canadian Railways. Canal Statistics.

Prices and Price Indexes. Automobile Financing.

The Employment Situation as reported by Employers. Commercial Failures. Bank Debts.

Review of Business Statistics.—Price \$1.00 per year.

Vital Statistics, Births, Marriages and Deaths by Provinces.

Quarterly Reports.—Trade of Canada.—Price \$2.00 per year.

The publications listed above will be furnished upon application addressed to the Dominion Statistician, Dominion Bureau of Statistics, Ottawa. They will be supplied free of charge, with the exception of the Monthly Review of Business Statistics and the Quarterly Report of the Trade of Canada, for which the annual subscription price is \$1.00 and \$2.00, respectively.
