

Canadian statistical review

July 1987

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Electronic Data Dissemination Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8200)
or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(983-4020)
Montréal	(283-5725)	Regina	(780-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories,
for users who reside outside the local dialing area of
any of the regional reference centres.

Newfoundland and Labrador	1-800-563-4255
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1-800-667-7164
Alberta	1-800-222-6400
British Columbia (South and Central)	1-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Call collect 403-420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

Canadian Statistical Review

Data in this publication were retrieved from CANSIM† (Official Mark of Statistics Canada for its Canadian Socio-Economic Information Management System), and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in this Review (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The identification numbers at the top of each column of data refer to the unadjusted and seasonally adjusted monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375). The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada.

More details on which data is available can be found in the following:

CANSIM Main Base Series Directory, 1987 — \$100.00 Canada, \$120.00 other countries

This Directory is an essential instrument for any regular user of the CANSIM Main Base.

The Directory includes:

- a full list of series on the Base, with both matrix /series and databank identifiers,
- an alphabetical subject index with corresponding matrix numbers,
- a list of subject matter contacts,
- and much other useful information.

A subscription to the 1987 Directory includes notification of any changes to the Base, on a quarterly basis.

Another valuable tool for CANSIM users is the 1987 CANSIM Main Base Cross Reference between Data-bank Identifiers and Matrix and Series Numbers — \$25.00 Canada, \$30.00 other countries.

CANSIM Mini Base Series Directory, Catalogue 12-569 — \$45.00 Canada, \$54.00 other countries

This Directory is a detailed guide to the data on the CANSIM Mini Base — a standard subset of data originating from the CANSIM Main Base which is available at various Secondary Distributors.

CANSIM-Cross Classified Data Base Index — \$7

This index provides a summary of available data on the Cross Classified Data Base.

CANSIM-Cross Classified Data Base Directory — \$20

This directory provides a detailed guide to the Cross Classified Data Base. It provides a description of the structure of each table.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the Statistics Canada X-11-ARIMA seasonal adjustment method. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD is 1, for the most erratic series it is 6. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

Editorial Board

This publication is produced under the guidance of the Canadian Statistical Review Editorial Board, composed of the following members:

J.S. Wells (Acting Chairman) — Assistant Chief Statistician, National Accounts and Analytical Services Field
R.E. Drover — Director, Transportation Division
B.J. Lynch — Director General, Operations Branch
E. Boyko — Director, Electronic Data Dissemination Division
G.J. Brackstone — Director General, Methodology Branch

A. Meguerditchian — Director, International and Financial Economics Division
L.O. Stone — Director, Population Studies Division
P.N. Triandafillou — Director, Agriculture/Natural Resources Division
K. Lal — Director General, System of National Accounts Branch
D. Bergeron — Editor, Canadian Statistical Review

Inquiries about the contents of the Canadian Statistical Review should be directed to the editor at: Electronic Data Dissemination Division, 9th Floor, R.H. Coats Bldg., Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

Subscriptions

The *Canadian Statistical Review* and other catalogued publications of Statistics Canada, may be ordered from Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6 and remittances made payable to the Receiver General for Canada.

Correspondence should be directed to the *Canadian Statistical Review* Electronic Data Dissemination Division, Statistics Canada, R.H. Coats Tower, Ottawa, Ontario, K1A 0T6.

Table of Contents

1	Section 1	Selected Economic Indicators — Analytical Summary
13	Section 2	Population Statistics
17	Section 3	System of National Accounts
41	Section 4	Labour
63	Section 5	Prices
73	Section 6	Manufacturing
89	Section 7	Fuel, Power, Mining
95	Section 8	Construction
101	Section 9	Food and Agriculture
107	Section 10	Domestic Trade
113	Section 11	External Trade
127	Section 12	Transportation
131	Section 13	Finance

Note to Users

This section is used to announce changes in tables of the *Canadian Statistical Review* and in related CANSIM series.

Section 3 — Tables 3.1-3.4: Balance of International Payments

Please note the restructuring of these tables and that a new selection of series are available with this issue.

Accordingly, the figures from these tables, represented in Section 1 are modified.

Monthly or quarterly data may not add to totals due to rounding.

Section 9 — Table 1: Farm Cash Receipts, by source

Please note that the frequency of this table has been changed from monthly to quarterly in this issue in line with the reporting structure of the source.

Section 1 ▪ Selected Economic Indicators

Analytical Summary

- 1.7 Charts
- 8.11 Analytical Summary
- 12 Business Leading Indicators for Canada

Selected Economic Indicators — Seasonally Adjusted

* At Annual Rates

Selected Economic Indicators — Seasonally Adjusted

Gross Domestic Product at factor Cost – in 1981 Prices

Canadian Balance of International Payments

Capital Account – Net Flow

Selected Economic Indicators — Seasonally Adjusted

Selected Economic Indicators — Seasonally Adjusted

Employment Survey, Total Number of Employees by Industry Group

Selected Economic Indicators — Seasonally Adjusted

* Balance of payments basis.

¹The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1971 Census, see Occupational Classification Manual, Census of Canada, 1971, Catalogue Number 12-536E, Vol. I. ²Beginning with 1978, this is subdivided into entrepreneurs and managers-administrators. For breakdown refer to CANSIM main base. ³Includes logging, fishing, trapping and hunting. ⁴Includes mechanical and construction. ⁵Includes a small number in non-specified occupations. ⁶Beginning with 1978 includes fiancées and fiancées. ⁷Does not include students entering Canada on students' visas. ⁸Includes also retired persons, elderly dependents, and other unspecified persons.

¹Includes military pay and allowances. ²These aggregates differ from those shown in earlier publications in that they are on a "domestic" basis and thus include interest and dividends paid to non-residents and exclude interest and dividends received from non-residents. ³Includes profits (net of losses) of government business enterprises and other government investment income. ⁴Includes value of physical change in farm inventories. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. Book value of inventories is deflated to remove the effect of price changes and the derived physical change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment. ⁵See footnote 3, Table 1.2.

^AIncludes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. ^BIncludes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. ^CThe book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment (shown in Table 1.1). ^DSee footnote 4, Table 1.1.

^EExcludes investment income received from non-residents. ^FExcludes investment income paid to non-residents.

¹The period 1961-1986 was deflated in three time periods 1961-1971, 1971-1981, 1981-1986 with price indexes based on 1961, 1971 and 1981 respectively. The prices were then linked arithmetically at the major group, component and total levels to the 1981 base. The linking process produced residual differences between the sum of the linked groups and linked aggregates. These differences are shown as adjusting entries. ²Excludes investment income received from non-residents. ³Excludes investment income paid to non-residents.

¹The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four. Since real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted tax series. ²Includes capital consumption allowances. ³Includes net purchase of existing non-financial assets.

¹These implicit price indexes derived by dividing the value figures in current dollars by the constant dollar figures, are current weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on data for seasonality and therefore may be used as indicators of price changes. ^aExcludes investment income received from non-residents.

¹The labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. ²The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001.

Source: The Labour Force (71-001), monthly.

¹The number of persons covered by unemployment insurance is an estimate comprising armed forces personnel, beneficiaries and paid workers from the Labour Force Survey. ²Claimants who receive benefits through the Commission's computer pay system during the reference week. ³Benefits paid for adoption, training, work sharing and job creation claims are included in the total benefits paid. ⁴Annual figures are 12-month averages.

¹Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month.

²The industry groups from January 1976 forward, are based on the 1970 Standard Industrial Classification. ³The number of person-days is calculated by multiplying the number of workers involved in a work stoppage by the number of normal working days during the stoppage. Adjustments are made for establishments on shift work, etc. *The total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost will also be shown in the total. ^aIncludes publishing and allied industries. ^bIncludes storage and communication industries.

^aThese weights, provided as a general guide, show the relative importance of the major components of the C.P.I. They are based on expenditure values derived from quantities and prices of year 1982. ^bIncludes water, fuel and electricity, and traveller accommodation. ^cExcludes water, fuel and electricity.

* For further information on the weights and methodology associated with the Consumer Price Index, see "The Consumer Price Index Reference Paper, updating based on 1982 expenditures," cat. 62-553, occasional.

Section 6 • Manufacturing

- 74 1. Total Inventories, Shipments and Orders in Manufacturing
- 75 2. Manufacturing Shipments by Industry
- 77 3. Manufacturing Inventories by Industry
- 79 4. Estimated Value of Shipments and Unfilled Orders by Economic Use Classification
- 80 5. Estimated Value of Inventories Owned and Raw Materials by Economic Use Classification
- 81 6. Estimated Value of Goods in Process and finished Products by Economic Use Classification
- 82 7. Tobacco and Beverages
- 83 9. Footwear
- 84 10. Production of Sawn Lumber
- 84 11. Pulpwood, Wood Pulp and Newsprint
- 85 12. Primary Iron and Steel
- 86 13. New Motor Vehicles
- 87 14. Production of Motor Vehicles in Canada
- 88 15. Refrigerators, Freezers, Washing Machines and Clothes Dryers

Table 1: Total inventories, shipments and orders in manufacturing based on the 1980 standard industrial classification (million dollars)¹. Projected from 1982 Census of Manufactures benchmark.

Year and month	Shipments ²	New orders received during month ³	Unfilled orders at end of month	Owned ⁴	Held but not owned	Inventory at end of month			Ratio of inventories owned to shipments	
						All inventory held				
						Total	Raw materials	Goods in process

¹Estimates of manufacturers' shipments, inventories and orders are based on a monthly survey of a sample of manufacturing establishments, benchmarked to the annual census of manufacturers. ²Shipments of goods manufactured within the establishments. ³Total new orders received during the period at estimated selling value, net of cancellations. ⁴Total manufacturing inventory owned by manufacturing establishments. Other inventory such as that of goods purchased for resale is not included.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 2: Manufacturing shipments¹ by industry based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

¹Total inventories owned by manufacturers including warehouse stocks

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 4: Estimated value of shipments and unfilled orders in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

Year and month	Shipments ¹							Unfilled orders at end of month						
	Consumer goods			Construction materials and components	Other intermediate goods & supplies	Export-oriented industries	Supplementary classification: automotive products	Consumer Goods			Construction materials and components	Other intermediate goods & supplies	Export-oriented industries	Supplementary classification: automotive products

¹Separate industries series combined for the Supplementary Classification automotive products, are also components of other classifications. Other economic use classification groups are mutually exclusive and except for rounding differences add to relevant Canada totals in section 6, table 1.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 5: Estimated value of inventories owned and raw materials in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

¹Pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. ²Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. ³Customs exports. ⁴Mill shipments destined for export.

¹Data compiled according to the Steel Distribution Index revised January, 1964.²Figures on net shipments relate to semi finished and rolled steel products only. Shipments to con-

suming industries of castings, forgings and steel pipe are not included.

³Excluding shipments for re-processing at maker's own plant.⁴Data compiled as submitted by the steel

producers according to the steel industry distribution code.

¹Gas types are included. ²Includes producers' shipments for export. ³In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. ⁴End of period. ⁵Electric and other. ⁶Excludes apartment type machines. ⁷Excludes other than electric.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision.

¹Supply and disposition for both Crude Oil and Natural Gas will not agree because of losses, inventory changes, pipeline fuel used etc.

plus

Sources: Crude Petroleum and Natural Gas Production (26-006), Gas Utilities (55-002), Statistics Canada.

²Includes crude oil, condensate and pentanes

¹A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

Source: Housing Starts and Completions (64-002), Statistics Canada.

¹Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of input. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. The price indexes for the last two years are subject to revision. ²The major groups include additional components than the selected ones shown.

¹Total exports includes domestic exports and re-exports, for further information please refer to Summary of External Trade (65-001). ²The figures reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. For more information about these adjustments, please refer to Quarterly Estimates of the Canadian Balance of International Payments (67-001). ³For definition of major trading areas and sections, please refer to Summary of External Trade (65-001).

¹Data for 1970 through 1972 refer to class 1 and 2 carriers whose gross annual revenues totalled \$500,000 or more. Information for the period January 1973–December 1978 refers to only 6 major railways. Commencing January 1979, data for 7 major railways (accounting for 95 per cent or more of the total operating revenues) are shown.

*Bank of Canada deposits are averages of the judicial days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [†]Daily averages for period. [‡]Mainly deposits of foreign banks. ^aCapital, rest fund and undivided profits as at the latest fiscal year-end. ^bIncluding issues payable in foreign currency. ^cExcluding Canadian day-to-day loans. ^dSecurities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. ^eLoans to finance purchase of Canada Savings Bonds at time of issue. ^fThese series reflect the combination of two CANSIM series.
