INTRODUCTION.

All the leading tables have been retained in this, the third issue of the Statistical Abstract, and have been revised, in some cases enlarged, and brought down to the close of either the financial or calendar year, as the case may be, while, on some matters, information has been given up to the end of May, 1888. A number of new tables have also been added throughout the book, more particularly in the Preliminary Remarks and in Chaps. I, II, III, IV, VII and VIII.

An entirely new chapter on Mineral Statistics has been added, which will be found to contain information of much value, hitherto not available to the public.

The full text of the proposed Fishery Treaty is given in Chap. IX, but owing to the returns of the Fishery Department not having been made up at date of going to press, the figures relating to the fisheries for 1887 are necessarily meagre and incomplete.

As it was found impossible to obtain all the Provincial Reports on Education in time for an early issue of this work, the chapter on Education has been omitted, and will be inserted again, brought down to a common date, in future issues.

Some misapprehension respecting the tariff, as published in last year's issue, having been found to exist, the appendix

to the present number contains a complete tariff, revised to the 31st May, 1888, together with a list of decisions made by the Board of Customs down to the same date.

Official publications have, in all cases, been used when available, and where information has been taken from other works, only the most trustworthy have been used, and in all cases duly acknowledged.

The greatest care has been taken to have all statements and figures absolutely correct, but as liability to error always exists, it is requested, as in former years, that if any errors are detected, they may be reported to this office.

DEPARTMENT OF AGRICULTURE,

Ottawa, 23rd June, 1888.

A D D E N D A .

MINISTERIAL CHANGES.

Page 43. The Hon. Thomas White, Minister of the Interior and Superintendent General of Indian Affairs, died on the 21st April, 1888. The offices have not yet (23rd June, 1888) been filled.

The Hon. Sir Charles Tupper, G. C. M. G., resigned the position of Minister of Finance, and on 23rd May, 1888 was re-appointed High Commissioner for Canada in the United Kingdom.

The Hon. G. E. Foster, late Minister of Marine and Fisheries, was appointed Minister of Finance on 29th May, 1888.

Mr. Charles H. Tupper, M. P., was appointed Minister of Marine and Fisheries on 31st May, 1888.

LATEST APPOINTMENTS.

The Hon. A. W. McLelan, Postmaster General, to be Lieutenant Governor of Nova Scotia from 9th July, 1888.

The Hon. John Christian Schultz, to be Lieutenant Governor of Manitoba from 1st July, 1888.

Mr. Joseph Royal, M.P., to be Lieutenant Governor of the North-West Territories from 1st July, 1888.

CANADA.

STATISTICAL ABSTRACT AND RECORD.

FOR THE YEAR 1887.

Preliminary Remarks.

1. The Dominion of Canada consists of the Provinces of Ontario and Quebec (formerly Upper and Lower Canada), Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island, and the North-West Territories, which latter contain the vast territory formerly under the control of the Hudson's Bay Company. It therefore comprises the whole of the northern half of North America, with the exception of the United States Territory of Alaska on the west, and Labrador, which is under the control of the Government of Newfoundland, on the east. It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States, and on the east by the Atlantic Ocean.

The Dominion of Canada.

2. The origin of the word Canada is obscure, but the derivation now generally accepted is that from an Indian word "Kannatha," meaning a village or collection of huts, and it is supposed that Jacques Cartier hearing this word used by the Indians with reference to their settlements, mistook its meaning, and applied it to the whole country.

Origin of the name 'Canada.'

3. Canada has an area of about 3,470,257 square miles, or including its water surface, 3,610,000 square miles, and is about 3,500 miles from east to west, and 1,400 miles from north to south.

Area.

The Great
Lakes.

4. Among its principal physical features are its inland lakes, which are remarkable for their size and number, and contain more than half the fresh water of the globe. The largest of these, generally known as the great lakes, separate Canada from the United States, and consist of Lakes Superior, Huron, St. Clair, Erie and Ontario, and the following table gives their length, breadth, area and height above the sea :—

LAKES.	Length.	Breadth.	Area.	Height above Sea.
	Miles.	Miles.	Sq. Miles.	Feet.
Superior.....	420	160	32,000	630
Huron—with Georgian Bay...	280	190	24,000	578
St. Clair.....	26	25	320	570

Lake
Michigan.

5. Lake Michigan is in the United States, but is connected with Lake Huron by the Strait of Mackinaw.

The Great
Lakes.

6. These lakes form a complete system of navigation from the head of Lake Superior to the Atlantic Ocean, a distance of 2,384 miles. Lake Superior is connected with Lake Huron by the Ste. Marie River and the Sault Ste. Marie Canal. Lake Huron flows into Lake St. Clair by the St. Clair River, and Lake St. Clair into Lake Erie by the Detroit River. Lake Erie flows into Lake Ontario by the Niagara River, fourteen miles from the mouth of which are the renowned Niagara Falls, 160 feet in height. The two lakes are connected for the purposes of navigation by the Welland Canal. The St. Lawrence River, flowing out of Lake Ontario into the Gulf of St. Lawrence, forms the outlet of this system.

Lakes.

7. The other principal lakes in Ontario are the Lake of

the Woods (1,500 square miles), Lakes Nepigon, Nipissing and Simcoe, and the Muskoka Lakes, Muskoka, Rosseau, Joseph and the Lake of Bays. In Quebec are Lake Temiscamingue, which is on the borders of Ontario and Quebec, Lake St. John, Grand Lake and Lake Mistassini; and in the Territories and Manitoba are Lakes Great Bear (10,000 square miles), Great Slave (12,000 square miles), Athabasca (3,000 square miles), Winnipeg, 280 miles long, 57 miles broad, 650 feet above the sea and an area of 8,500 square miles; Winnipegosis, 120 miles long, 17 miles broad, 700 feet above the sea, and an area of 1,936 square miles, and Manitoba, length 120 miles, breadth 16 miles, elevation above sea 670 feet, and area 1,909 square miles.

8. The principal mountains are the Rocky Mountains in the west, which extend from the Arctic Ocean to the United States, and contain the highest points in the Dominion, among the chief being Mount Hooker, 16,760 feet, Mount Brown, 16,000 feet, and Mount Murchison, 15,700 feet, while there are several others of nearly the same height. The Canadian Pacific Railway crosses this range through the Kicking Horse Pass at an altitude of 5,300 feet above the sea. West of the Rocky Mountains, and between them and the Pacific Ocean, are the Cascade Mountains, which follow the coast from the Fraser River to Alaska, and in some places are as high as 10,000 feet. The other ranges of any size are the Wotschish and Notre Dame Mountains in Quebec, and the North and South Mountains and the Cobequid Mountains in Nova Scotia.

9. The principal rivers are, in the Territories and Manitoba, the Mackenzie River, over 2,400 miles in length, the Copper Mine and Great Fish Rivers, which flow into the Arctic Ocean; the Saskatchewan, Assiniboine and Red Rivers, which flow into Lake Winnipeg, and the Churchill,

Severn and Albany Rivers, which flow into Hudson's Bay. In Ontario and Quebec the St. Lawrence, with its tributaries the Ottawa, St. Maurice, Richelieu and Saguenay. In New Brunswick the St. John, Restigouche and Miramichi Rivers; and in British Columbia, the Fraser River, which flows into the Gulf of Georgia, the Peace River which rises in that Province and flows into the Mackenzie River, and the Columbia River, over 1,200 miles in length, which flows through the United States into the Pacific Ocean.

Gulfs and bays.

10. The coast line of Canada is very much broken and contains several large gulfs, bays and inlets, besides innumerable smaller ones. On the east the principal indents are the Gulf of St. Lawrence, the Bay of Fundy and Bay of Chaleurs; on the north, Hudson's Bay, which is really a large inland sea, being 1,000 miles long, and 600 miles wide, with an area of 350,000 square miles, Baffin's Bay, the Gulf of Boothia, and Melville and Lancaster Sounds; and on the west the Strait of Juan de Fuca, the Gulf of Georgia and Queen Charlotte Sound.

Islands.

11. The largest islands on the west are Vancouver, and Queen Charlotte Islands, the former is about 300 miles in length, has an area of about 20,000 square miles and contains Victoria, the capital of British Columbia, and on the east, Prince Edward Island, which forms the Province of that name, Cape Breton, which is part of the Province of Nova Scotia, being separated from the mainland by the Gut of Canso, and Anticosti, in the Gulf of St. Lawrence on which the Dominion Government have important signal and wrecking stations. A great network of islands the limits of which have not been well defined, extends along the entire north coast of Canada. It is known generally as the Arctic Archipelago.

Physical features.

12. The whole of the eastern part of Canada, from the

Atlantic to the north-west boundaries of Ontario was formerly one vast forest, and is still very extensively wooded, timber in various forms being one of the principal exports of the country. In the southern part of the centre of the Dominion is a vast tract of prairie land, while the northern portion is principally forest, and is inhabited only by a few tribes of Indians, and by officers of the Hudson Bay Company in their most advanced posts. The prairie land is covered with soil of great richness, and is adapted for the raising of cereals and roots of all kinds, while for grazing purposes it is unsurpassed, the climate being suitable for stock breeding, and the pasturage excellent, and almost unlimited. West of the Rocky Mountains is another great tract of forest land, the timber on which is invaluable, while the soil is very fertile, and the country as it becomes cleared, is found to possess great agricultural capabilities.

13. The timber in British Columbia attains in many cases to an enormous size, specimens of the Douglas pine being among the largest trees in the world. The following illustrations will give some idea of their great size, square timber has been cut from the Douglas pine, measuring eight feet by one hundred and five feet in length, and from one log no less than eight pieces of timber have been cut, each piece measuring 12 inches by 12 inches and fifty feet in length. Cedar trees also have been found 24 feet in diameter and 300 feet high.

Timber in
British
Columbia.

14. The climate is dry, healthy and invigorating, and owing to the great area of the country extending over 20 degrees of latitude, or from the latitude of Constantinople to the North Pole, has a wide range of temperature. The extreme dryness of the atmosphere, however, makes both cold and heat less acutely felt than the readings of the thermometer would lead people to expect. In the Maritime Provinces the climate somewhat resembles that of the British

Climate.

Isles; in Ontario, Quebec and Manitoba the summers are warm and the winters cold, but the cold is pleasant and bracing, and the snow that generally covers the ground during the winter is of the greatest benefit alike to the farmer, the lumberman and the merchant. In the North-West Territories cattle graze at large all through the winter months; and on the Pacific slope west of the Rocky Mountains, the climate is milder than in any other part of the Dominion.

Climate.

15. The popular idea in other countries for a long time was, and indeed to a certain extent still is, that Canada is a country of perpetual winter, and normally covered with snow, and Canadians themselves are to a large extent to blame for the continuation of the idea, by almost invariably representing Canadian winter scenes in their pictures, by writing descriptions of winter amusements and pastimes alone, and, if desirous of sending their portraits to friends in other countries, by being always taken in winter costume, with probably a snow covered forest or frozen lake in the back ground. The facts are, that the average winter is about four and a half months, and though the spring may begin two or three weeks later than in England, the conditions for rapid growth—warm sunshine and rain—are so favorable that the crops of the two countries are about equally advanced by the middle of July, and as during the last few years the country has become better known, it is beginning to be understood that though the winters are at times severe, they are healthy and enjoyable, while the summer weather is not surpassed in the most favoured parts of Europe. That the climate is superior to that of England is admitted by all who have experienced both.

Temperature and
rainfall
1884.

16. The report of the meteorological service for 1884, which for some reason was not published until late in 1887, affords

the latest available information in any complete form, and from it the following summary of observations taken at ninety-seven stations has been compiled, and it is believed that a very fair idea of the variations of temperature in different parts of the Dominion can be gained therefrom.

Extremes
of mean
tempera-
ture.

17. According to the above figures, the extremes of mean temperature in the several Provinces were as follows:—

	Max.	Min.
Ontario.....	47·81	34·14
Quebec.....	41·67	27·59
Nova Scotia	44·51	39·03
New Brunswick	42·18	37·45
Manitoba	31·96	28·66
British Columbia.....	46·97	38·48
Prince Edward Island.....	39·48	37·88
The Territories.....	37·77	26·65

The highest mean temperature was at Windsor, Ontario, viz., 47·81, and the lowest at Fort Chipewyan, N.W.T., 26·65.

Tempera-
ture 1887.

18. The following information respecting the weather of 1887 has been taken from the *Monthly Weather Review*, a useful publication issued by the Superintendent of the Meteorological Service at Toronto. The mean temperature and total precipitation at a station in Prince Edward Island, and at the capitals of the other Provinces and of the Territories have been given, with remarks applicable to all parts of the Dominion. The first table gives the mean temperature at the places named in each month in 1887:—

MEAN TEMPERATURE AT THE UNDERMENTIONED PLACES IN CANADA.

PLACES.	Jan.	Feb.	Mar	April.	May.	June.
Kilmabumaig, P. E. I.....	12·88	11·72	22·35	30·52	47·45	57·08

MEAN TEMPERATURE AT THE UNDERMENTIONED PLACES—*C* m.

PLACES.	July.	Aug.	Sept.	Oct.	Nov.	Dec.
Kimbahumaig, P. E. I.....	65.90	61.57	55.08	44.45	33.96	22.02
Halifax, N.S.....	67.10	64.30	56.80	48.10	38.00	27.00
Fredericton, N.B.....	68.51	62.64	54.98	44.15	32.11	19.33
Montreal, Que.....	73.48	65.94	56.38	44.30	30.00	16.84
Toronto, Ont.....	73.14	66.19	56.40	44.20	35.11	28.39
Winnipeg, Man.....	66.52	61.03	53.76	32.42	17.35	2.39
Regina, N. W. T.....	62.8	60.30	53.00	32.70	23.20	2.50
Victoria, B. C.....	67.66	57.11	54.13	47.62	42.56	41.58

The average in all cases means the average obtained from thirteen years' observation, except where otherwise mentioned. The temperature in January was below the average for the month in Manitoba, Ontario, Quebec and New Brunswick; at Winnipeg it was as much as $8^{\circ}1$ below. In Nova Scotia and British Columbia, the temperature was above the average. The lowest temperature was registered at Regina, viz., 52° below zero, and the highest at Halifax, $54^{\circ}9$. In February the temperature was below the average at all the stations, except a few on Lakes Erie and Ontario; at Medicine Hat, N. W. T., it was $23^{\circ}6$ below the average of three years. The lowest temperature was again registered at Regina, viz., 48° below zero, and the highest at Victoria, 59° . In March and April the temperature was generally below the average, except in the latter month in Manitoba and the North-West. In May, June and July the temperature was very generally above the average, especially in May when it was universally so, and the exceedingly hot weather during these three months will long be remembered. In Toronto the mean temperature in May was $6^{\circ}51$ higher than the average of forty-seven years, and in Montreal $6^{\circ}35$ higher than the average of thirty years. The highest recorded temperature in this month was $93^{\circ}3$ at Windsor, Ont. The same temperature was recorded at a number of places during the following

June, while in July, the thermometer reached 97°·2 at Toronto, and 100° at several places in Ontario. This period of excessive heat was followed by unusually cool weather in August, September and October, the temperature being generally below the average, particularly in the two latter months. The temperature in November and December was, on the whole, slightly below in the former and above the average in the latter month.

Rain and
snowfall
1887.

19. The next table gives the total precipitation in inches during the year at the same places:—

The
weather
1887.

20. The precipitation in January and February was generally above the average, particularly in Ontario and Quebec in February, when the snowfall was very heavy. In

the city of Quebec forty-eight inches fell in January, fifty-nine inches in February, and thirty-seven inches in March. In May the rainfall throughout the Dominion was very light, many districts being absolutely rainless, and the crops suffered much from drouth in consequence. In June the rainfall was generally below the average, and in July it was almost universally so throughout the Dominion, "but," Mr. Carpmael says "the mere expression of the rainfall "being below the usual quantity, conveys but a poor idea of "the effect of the drouth, in many parts of the Dominion "crops ruined, pastures burnt up, wells running dry and the "foliage of the trees resembling October instead of mid-"summer." In August and September the rainfall was again below the average, particularly in September, and in the N. and N. E. parts of Ontario, in many places the pastures were destroyed, and the farmers forced to feed hay to their cattle. In October rain was still lacking, being the eighth month during which in some parts of the Dominion, the same conditions had prevailed. In November the fall was an average one, but was generally above the average in December, especially in British Columbia.

21. A remarkable meteor was observed in the Maritime Provinces on 15th September, of which a number of accounts have been furnished, the best of which is probably that of Mr. M. H. Nickerson, of Barrington, as follows: * "As "observed in Barrington, the meteor appeared at an altitude "of say 60°, in a direction about N. by W. and at 8 34 local "time. Its course as near as could be judged was S.S.E. "Its maximum brightness was attained at the moment of its "vanishing. The point of its disappearance was about S. "25° E, and at an altitude of 20° As the meteor was in the "form of a spheroid, its greater apparent diameter was nearly "twice that of the moon, and one-third longer than the less.

Remark-
able
meteor in
Septem-
ber 1887.

* *Monthly Weather Review*, September, p. 7.

“The duration of its visible flight was not more than four seconds. The noise in connection, which at first could not be distinguished from thunder, at a distance of twelve or fifteen miles, began one minute and twenty seconds after the meteor had disappeared, and lasted forty-five seconds. Soon as the meteor vanished from sight, its track appeared to fill with a dull reddish hue, which was slowly diffused on both sides, and remained distinctly perceptible till near midnight.”

**Storm
warnings.**

22. The number of storm warnings issued during the year by the Meteorological Service was 1,093, of which 972, or 88·9, were verified, no warnings of this nature were issued during the months of May, June and July.

The following table shows the number of storm warnings issued and verified in each year since 1877:—

YEAR.	Number Issued.	Number Verified.	Percentage Verified.
1877.....	743	510	68·6
1878.....	860	673	78·3
1879.....	712	591	83·0
1880.....	889	736	82·8
1881.....	854	727	85·1
1882.....	841	658	78·2
1883.....	1,085	858	79·1
1884.....	798	663	83·2
1885.....	830	741	89·3
1886.....	906	799	88·2
1887.....	1,093	972	88·9

It will be seen, therefore, that out of a total of 9,611 storm warnings issued during the last 11 years, 7,928, or 82·4 per cent have been verified.

**Weather
predic-
tions.**

23. The total number of weather predictions of all kinds was 7,603, of which 79·6 per cent. were fully, and 90·8 per cent. fully and partly verified.

24. Minerals of almost every kind are known to exist, and their development in the future will constitute one of the chief sources of wealth for the country. Gold has been found extensively in Nova Scotia and British Columbia. In the former Province there are fifty-eight mines in working order, and in the latter there is scarcely a stream of any importance in which the "colour" of gold cannot be found, and paying mines exist in localities extending through ten degrees of latitude. The total value of gold exported from this Province, since its admission into Confederation, to 30th June, 1887, has reached the large sum of \$15,274,065. Gold has also been found in Ontario and Quebec, and it is not improbable that valuable discoveries of that metal are yet to be made in these Provinces. Iron is found in considerable quantities in all the Provinces, and the supply is practically inexhaustible; that of Nova Scotia is particularly fine, and brings in the market nearly double the price of English iron. More complete details respecting the mineral resources of Canada are given in a subsequent chapter.

25. What may be called the natural industries of the Dominion are:— In Prince Edward Island, agriculture, fishing and shipbuilding; in Nova Scotia, coal and gold mining, shipbuilding, agriculture, lumber and fishing, the fisheries of this Province being the most valuable and productive in the world; in New Brunswick, shipbuilding, lumbering, agriculture and fishing, the value of the fisheries being second only to that of Nova Scotia; in Quebec, agriculture, shipbuilding, lumbering, fishing and mining; in Ontario, agriculture, lumbering and mining; in Manitoba and the Territories, agriculture and stock-raising; coal mining is expected to become a very important industry in these regions, it being estimated that there are about 65,000 square miles of coal-bearing strata east of the Rocky Moun-

tains; and in British Columbia, mining, lumbering, fishing and agriculture.

Manufacturing
Industries.

26. The leading manufacturing industries, principally in Ontario and Quebec, are works for making all kinds of agricultural implements in iron and wood, waggons, carriages, and railroad rolling stock (including locomotives), cotton factories, woollen factories, saw-mills, tanneries, machinery, iron and hardware works, flax works, furniture, paper, soap, woodenware, boot and shoe, cloth and linen, door, sash, stave, tobacco, meat and food preserving, and cheese factories. Sugar refining is extensively carried on in Halifax and Montreal.

Discovery
of Canada.

27. According to what may be rather called tradition than history, the shores of North America were visited on several occasions as early as the tenth century by parties of Norsemen, some of whom settled in what is now the State of Massachusetts, but were eventually either killed or expelled by the natives. The earliest authentic record of the landing of Europeans on these shores, is that of Sebastian Cabot who reached some part of the coast of Labrador on the 21st June, 1497, and two days afterwards discovered the Island of Newfoundland. Columbus did not reach the mainland until the following year, 1498, and Amerigo Vespucci, from whom the Continent took its name, until 1499. Cabot therefore is fairly entitled to be considered as the discoverer of what is now the Dominion of Canada. In 1517 Cabot made another voyage and succeeded in making his way into what was afterwards called Hudson's Bay, but nothing further was done towards the exploration of the mainland until the expedition of Jacques Cartier in 1534, who landed at Gaspé on the 24th July in that year, and with this date Canadian history proper may be said to begin.

28. Commencing with the first voyage of Cartier, the following are some of the principal events of importance in the history of this country :—

Principal events in Canadian history.

1534. July 24. Landing of Jacques Cartier at Gaspé.
The Bay of Chaleurs was so named by him on account of the great heat of the weather.
1586. July. Second visit of Cartier.
August 10. Cartier anchored in a small bay at the mouth of the St. John River, which, in honour of the day, he named after St. Lawrence. The name was afterwards extended to the gulf and river.
1540. Third visit of Cartier.
- 1542-43. The Sieur de Roberval and his party wintered at Cape Rouge.
1598. The Marquis de la Roche landed 40 convicts on Sable Island, where they were left for five years without relief, and only twelve were found alive at the end of that time.
1603. First visit of Samuel de Champlain to Canada.
1605. Founding of Port Royal (Annapolis), Acadia (derived from an Indian word "Cadie," a place of abundance), by the Baron de Poutrincourt.
1608. Second visit of Champlain. Founding of Quebec, the first permanent settlement of Canada. The name is said to be an Indian one, "Kébec," a strait. 28 settlers wintered there, including Champlain.
1611. Establishment of a trading post at Hochelaga.
1613. St. John's, Newfoundland, founded.
1615. Champlain sailed up the Ottawa River, crossed Lake Nipissing and descended French River into Georgian Bay and Lake Huron, returning by Lake Ontario.
1620. Population of Quebec, 60 persons.
1629. July. Capture of Quebec by the English under Sir David Kirk. 117 persons wintered there.
1632. Canada ceded to France by the Treaty of St. Germain-en-Laye.
1635. December 25. Death of Champlain at Quebec.
1642. May 18. Ville Marie (Montreal) founded.
- 1642-1667. Frequent and serious wars between the French and the Iroquois Indians.
1667. Population of New France, 3,918.
1672. Count de Frontenac appointed Governor. Population, 6,705.
1689. August. Massacre at Lachine by Indians, and capture of the Fort at Montreal, which they held till October.
1690. Capture of Port Royal by Sir Wm. Phipps, and unsuccessful attack upon Quebec.
1692. Population of New France, 12,431.
1698. Death of Frontenac. Population, 13,355.

1701. August 4. Ratification of a treaty of peace with the Iroquois at Montreal.
1713. Treaty of Utrecht by which Hudson's Bay and adjacent territory, Nova Scotia (Acadia) and Newfoundland were ceded to the English.
1720. Population of New France 24,434, and of St John Island (Prince Edward Island) about 100.
1739. Population of New France, 42,701.
1745. Louisbourg, Cape Breton, taken by the English.
1748. Restoration of Louisbourg to the French in exchange for Madras by the peace of Aix-la-Chapelle.
1749. The City of Halifax founded by Lord Halifax. 2,544 British emigrants brought out by the Hon. Edward Cornwallis, the first English Governor of Nova Scotia.
1752. March 23. Issue of the Halifax *Gazette*, the first paper published in Canada.
1755. Expulsion of the Acadians from Nova Scotia, about 6,000.
1758. July 26. Final capture of Louisbourg by the English.
1759. July 26. Capture of Fort Niagara by the English under General Prideaux, who was killed during the assault
- June 25. Commencement of the siege of Quebec.
- September 12. Battle of the Plains of Abraham, and defeat of the French by General Wolfe, who was killed on the field. Loss of the English, 700, and of the French 1,500.
- September 13. Death of General Montcalm, commander of the French forces.
- September 18. Capitulation of Quebec to General Townshend.
1760. April. Unsuccessful attack on Quebec by General de Lévis.
- September 8. Capitulation of Montreal, and completion of the conquest of Canada. Population of New France, 70,000.
1762. British population of Nova Scotia, 8,101.
1763. February 10. Treaty of Paris signed, by which France ceded and guaranteed to His Britannic Majesty in full right "Canada with all its dependencies."
- General Murray was the first Governor General of the Province of Quebec.
1764. June 21. Issue of the Quebec *Gazette*.*
- In this year Pontiac, chief of the Ottawas, organized a conspiracy for a simultaneous rising among the Indian tribes, and a general massacre of the British. The plan was successfully carried out in several places, where not a soul was left alive, but finally the Indians were forced to succumb.
1766. General Carleton, afterwards Lord Dorchester, appointed Governor General.
1770. Prince Edward Island made into a separate province, with Walter Paterson the first Governor. The first meeting of the House of Assembly took place in July, 1773.

*This has generally been considered as the first paper published in Canada, but the Halifax *Gazette*, though lasting barely two years, has undoubtedly the claim to priority.

1774. The "Quebec Act" passed. This Act gave the French Canadians the free exercise of the Roman Catholic religion, the enjoyment of their civil rights, and the protection of their own civil laws and customs. It annexed large territories to the Province of Quebec, provided for the appointment by the Crown of a Legislative Council, and for the administration of the criminal law as in use in England.
1775. Outbreak of the American Revolution, and invasion of Canada by the Americans; every place of importance rapidly fell into their hands, with the exception of Quebec, in an attack upon which Gen. Montgomery was defeated and killed on 31st December.
1776. Reinforcements arrived from England, and the Americans were finally driven out of Canada.
1783. September 3. Signing of the Treaty of Paris, and definition of the boundary line between Canada and the United States, viz., the Great Lakes, the St. Lawrence, the 45th parallel of north latitude, the highlands dividing the waters falling into the Atlantic from those emptying themselves into the St. Lawrence and the St. Croix River.
1784. Population of Canada, 113,012. (United Empire Loyalists in Upper Canada not included).
 British population of Nova Scotia, 32,000 (about 11,000 Acadians not included).
 Separation from Nova Scotia, and erection into a new province of New Brunswick, population, 11,457.
 About this time began the migration into Canada and Nova Scotia of the United Empire Loyalists, as they were called, that is, of those settlers in the American States who had remained faithful to the British cause. This migration lasted for several years, and though it is not possible to arrive at any exact figures, it is probable that the number altogether was not less than 40,000. The Loyalists were well treated by the British Government, and large grants of lands were made to them in various parts of the country. The banks of the St. Lawrence and shores of Lake Ontario in particular, were settled by about 10,000, on lands allotted to them by the Government.
1785. Re-introduction of the right of *habeas corpus*.
1791. Division of the Province of Quebec into two Provinces, viz., Upper and Lower Canada. Each Province to have a Lieutenant Governor, and a Legislature composed of a House of Assembly and a Legislative Council. The members of the Council were to be appointed by the Lieutenant Governor for life, those of the Assembly to be elected by the people for four years.
 Population of the two Provinces, 161,311.
1792. September 17. First meeting of the Parliament of Upper Canada at Newark (Niagara) under Lieut. Governor Simcoe. The House of Assembly consisted of sixteen members.
 December 17. Opening of the Legislature of Lower Canada, at Quebec, by Gen. Clarke. The House of Assembly consisted of fifty members.

1793. Abolition of slavery in Upper Canada.
1796. The seat of Government of Upper Canada removed from Niagara to York (Toronto).
1798. The name of St. John's Island changed to that of Prince Edward Island, in honour of the Duke of Kent, the change to take effect in 1800. Population, 4,500.
1806. November. Issue of *Le Canadien*, the first newspaper printed entirely in French.
Population of Upper Canada, 70,718, and of Lower Canada, 250,000.
1812. War declared between Great Britain and the United States.
August 11. Surrender of Detroit by the Americans under General Hull to General Brock.
October 13. Battle of Queenston Heights, and defeat of the Americans. Death of General Brock.
1812. November. Defeat of General Dearborn by Col. de Salaberry at Lacollé River.
1813. April 25. Capture of York by the Americans.
June 5. Battle of Stony Creek and defeat of the Americans.
September. Battle of Moraviantown. Retreat of the British, and death of the Indian chief Tecumseth.
Battle of Chateauguay—Defeat of three thousand Americans under General Hampton, by Colonel de Salaberry and four hundred French Canadian militia.
September 25. Battle of Chrysler's Farm—Defeat and rout of General Wilkinson and the Americans by the Canadian militia under Col. Morrison.
1814. Battle of Lundy's Lane, and defeat of the Americans.
December 24. War terminated by the Treaty of Ghent.
Population of Upper Canada, 95,000, and Lower Canada, 335,000.
1818. October 20. Convention signed at London regulating the rights of Americans in the British North American fisheries.
1821. Commencement of the Lachine Canal.
1831. Population—Upper Canada, 236,702; Lower Canada, 553,134.
1836. July 21. Opening of the railroad from Laprairie to St. John's—the first railroad in Canada.
- 1837-38. Outbreak of rebellion in both Provinces. It was suppressed in Upper Canada by the Militia, and in Lower Canada by British troops.
1840. Death of Lord Durham, to whose exertions the subsequent Union of the Provinces was mainly due.
1841. February 10. Union of the two Provinces under the name of the Province of Canada, and establishment of Responsible Government. The Legislature was to consist of a Legislative Council and Legislative Assembly, each Province to be represented by 62 members, 42 elected by the people, and 20 appointed by the Crown.
Population of Upper Canada, 455,688.
June 13. Opening of the first united Parliament at Kingston, by Lord Sydenham.

1842. Settlement of the boundary line between Canada and the United States, by the Ashburton Treaty.
1844. Population of Lower Canada, 697,084.
1845. Large fires in the City of Quebec. 25,000 people rendered homeless.
1848. The St. Lawrence canals opened for navigation.
1849. Riots in Toronto and Montreal over the Rebellion Losses Bill, and burning of the Parliament Library at Montreal.
1850. The first sod of the Northern Railway turned by Lady Elgin.
1851. Transfer of the control of the Postal system from the British to the Provincial Governments, and adoption of a uniform rate of postage, viz, three pence per $\frac{1}{2}$ ounce. The use of postage stamps was also introduced.
Population of Upper Canada, 952,004; of Lower Canada, 890,261; of New Brunswick, 193,800, and of Nova Scotia, 276,854.
1852. Commencement of the Grand Trunk Railway.
1853. The number of members in the Legislative Assembly was increased from 84 to 130, being sixty-five from each Province.
1854. January 27. Main line of the Great Western Railway opened for traffic.
Abolition of Seigniorial Tenure in Lower Canada, and settlement of the Clergy Reserves question.
June 5. Reciprocity treaty with the United States, signed at Washington, It provided for mutual rights of fishing in certain Canadian and American waters, for the free interchange of the products of the sea, the soil, the forest and the mine; it allowed Americans the use of the St. Lawrence River and Canadian Canals on the same terms as British subjects, and gave to Canadians the right to navigate Lake Michigan. This treaty was to last ten years.
1856. The Legislative Council was made an elective chamber.
1858. Adoption of the decimal system of currency. Selection by the Queen of the city of Ottawa as the capital of the Dominion and permanent seat of Government.
1860. August 25. Opening of the Victoria Bridge by the Prince of Wales. This bridge crosses the St. Lawrence at Montreal, on the line of the Grand Trunk Railway. It is the largest iron tubular bridge in the world, is sixty feet high in the centre, and nearly two miles in length.
- September 1. Laying of the corner stone of the Parliament Buildings at Ottawa by the Prince of Wales. These buildings, together with the Departmental Buildings, have been erected at a total cost up to 30th June, 1887, of \$4,486,176.
1861. Population of Upper Canada, 1,396,091; of Lower Canada, 1,111,566; of New Brunswick, 252,947; of Nova Scotia, 330,857; of Prince Edward Island, 80,857; of Vancouver's Island, exclusive of Indian, 3,624.
1866. March 17. Termination of the Reciprocity Treaty in consequence of notice given by the United States.
June 1. Invasion of Canada by Fenians. Battle of Ridgeway, and retreat of the volunteers.

- June 3. Withdrawal of the Fenians into the United States.
- June 8. First meeting of Parliament in the new buildings at Ottawa. At this meeting the final resolutions necessary to effect the Confederation of the Provinces were passed.
1867. February 10. The British North America Act passed by the Imperial Legislature.
- July 1. Union of the Provinces of Canada, Nova Scotia and New Brunswick under the name of the Dominion of Canada. The names of Upper and Lower Canada were changed to Ontario and Quebec respectively.
- Lord Monck was the first Governor General of the Dominion, and the first Parliament met on the 6th November, Sir John A. Macdonald being Premier.
1868. April 9. Hon. T. D'Arcy McGee, M.P., murdered at Ottawa.
- July 31. The Rupert's Land Act passed by the Imperial Government providing for the acquisition by the Dominion of the North-West Territories.
1869. June 22. Bill passed providing for the Government of the North West Territories.
1869. October 29. Hon. Wm. Macdougall, appointed Lieutenant Governor.
- Red River rebellion.
- November 19. Deed of surrender signed, Hudson's Bay Company to Her Majesty.
1870. March 4. Thomas Scott shot at Fort Garry.
- August. Arrival at Fort Garry of the expedition under Colonel (Lord) Wolseley, when the rebels were found to have dispersed.
- May 25. Fenians crossed the frontier at Trout River in Quebec, but were driven back by the volunteers.
- July 15. Addition of the North-West Territories to the Dominion and admission of the Province of Manitoba into the Confederation. This Province was made out of a portion of the newly acquired Territory.
1871. May 8. Signing of the Treaty of Washington.
- July 20. Admission of British Columbia into the Confederation.
- Population of the Dominion, 3,485,761; of Manitoba 18,995; of British Columbia, 36,224, and of Prince Edward Island, 94,021. Total 3,635,024.
1872. Abolition of dual representation.
1873. May 2. Death of Sir George E. Cartier, in London.
- July 1. Admission of Prince Edward Island into the Confederation.
1876. Opening of the Intercolonial Railway from Quebec to Halifax.
1877. June 20. Great fire in St. John, New Brunswick.
- November 23. Award of the Halifax Fisheries Commission of the sum of \$5,500,000 to be paid by the United States to the Imperial Government.
1879. Adoption of a Protective Tariff, otherwise called the National Policy.
1880. Death of the Hon. George Brown.
- October 21. Contract signed for the construction of the Canadian Pacific Railway. This contract was subsequently ratified by 44 Vic., c. 1 (1881).
1881. April 4. Population of the Dominion, 4,324,810.
- May 2. First sod turned by the Canadian Pacific Railway Company.

1882. June 22. Legality of the Canada Temperance Act confirmed by the Privy Council.
- August 23. The new seat of Government for the North-West Territories received the name of Regina.
1885. March 26. Outbreak of rebellion in the North-West, commencement of hostilities at Duck Lake.
- April 2. Massacre at Frog Lake.
- April 14. Fort Pitt abandoned.
- April 24. Engagement at Fish Creek
- May 12. Battle of Batoche, and defeat of the rebels.
- May 26. Surrender of Poundmaker.
- July 1. Termination of the fishery clauses of the Washington Treaty, by the United States.
- July 2. Capture of Big Bear, and final suppression of the rebellion. Total loss of the Militia and Volunteers under fire, killed 38, wounded 115. The rebel loss could not be ascertained. Estimated at about 140 killed.
- November 7. Driving of the last spike of the Canadian Pacific Railway.
1886. June 28. First through train left Montreal for Vancouver.
-

CHAPTER I.

CONSTITUTION AND GOVERNMENT.

- Constitution.** 29. The Constitution of the Dominion of Canada is similar in principle to that of the United Kingdom.
- Executive authority.** 30. By the British North America Act, the Executive Government and authority of and over Canada, as well as the command in chief of the Land and Naval Militia, and of all Naval and Military Forces of and in Canada, were declared to be vested in the Queen.
- Parliament.** 31. The Parliament consists of the Queen, the Senate and the House of Commons. The Queen is represented by the Governor General, who is assisted by a Privy Council, to which belong all those who are or have been advisers of the Crown, the acting portion of the Council, however, consists only of the Ministry of the day.
- The Governor General.** 32. The Governor General is appointed by the Queen, and holds office for five years. He takes no part in legislation, but assents in the Queen's name to all measures which have passed both the Senate and the Commons. He may, however, refuse such assent, or may reserve bills for Her Majesty's consideration. He may also disallow Acts of the Provincial Legislatures, within one year of their having been passed in the Province.
- The Senate.** 33. The Senate is composed of members appointed for life by the Crown under the Great Seal of Canada. A Senator is entitled to be styled Honourable. He must be a British subject, born or naturalized, have passed the age of thirty years, be a resident in the Province for which he is appointed, and hold property to the value of \$4,000 above all liabilities. His seat becomes vacant if he fails to attend two

consecutive sessions of Parliament, if he becomes bankrupt, or takes advantage of any insolvent law, or is attainted of treason or convicted of felony. The Speaker, who must be a Senator, is appointed by the Governor General, and fifteen members, including the Speaker, form a quorum. Each Senator receives \$1,000 per annum as an indemnity. The number of Senators cannot exceed 78, until the admission of Newfoundland, when it may be increased to 82. There are at present 78 members, representing the several provinces as follows: Ontario, 24; Quebec, 24; Nova Scotia, 10; New Brunswick, 10; Manitoba, 3; British Columbia, 2; Prince Edward Island, 4, and the North-West Territories 1. Bills, of all kinds, except money bills, can be originated in the Senate. A Senator cannot be elected a member of the House of Commons.

34. The members of the House of Commons must also be British subjects, but require no other qualification. They are elected by the people for five years, unless the House is sooner dissolved, under a uniform franchise for the whole Dominion. The Speaker is elected by the members themselves, twenty of whom (including the Speaker) constitute a quorum. Members are paid at the rate of \$10 a day, if the session is less than thirty days, and \$1,000 for the session, if over thirty days. All bills for appropriating any part of the Public revenue, or for imposing any tax or impost, must originate in the House of Commons, and must first be recommended by message of the Governor General. The House shall be called together from time to time by the Governor General in the name of the Queen, under the Great Seal of Canada, but there must be a session of Parliament once at least in every year, and twelve months must not intervene between the last sitting of one session and the first sitting of the next.

The House
of Com-
mons.

35. The concurrence of the Governor General, the Senate, Concurrence.

and House of Commons, is necessary before any measure can become law. Every member of the Senate and the House of Commons must take the oath of allegiance before taking his seat.

Oath of allegiance.

Authority of Parliament.

36. The exclusive legislative authority of the Parliament of Canada extends to all matters connected with the following subjects:—

Public Debt.	Currency and Coinage.
Trade and Commerce.	Banking.
Taxation.	Savings Banks.
Borrowing money on public credit.	Weights and Measures.
Postal Service.	Bills of Exchange.
Census and Statistics.	Interest.
Militia and Defence.	Legal Tender.
Military and Naval Service.	Bankruptcy.
Civil Service.	Patents.
Lighthouses, Buoys, &c.	Copyrights.
Navigation and Shipping.	Indians.
Quarantine and Marine Hospitals.	Naturalization.
Sea Coast and Inland Fisheries.	Marriage and Divorce.
Inter-provincial Ferries, and with Foreign Countries.	Criminal Law.
	Penitentiaries.

Administration of public affairs.

37. The administration of public affairs is at present divided into the following thirteen departments, viz. :—Finance, Justice, Public Works, Railways and Canals, Militia and Defence, Customs, Agriculture, Post Office, Marine and Fisheries, Inland Revenue, Interior, Indian Affairs, and Department of Secretary of State, but provision was made during the last session of Parliament for the amalgamation of the Departments of Customs and Inland Revenue, the new Department to be known as that of Trade and Commerce, presided over by a Minister designated accordingly, while in the place of the present Ministers of Customs and Inland Revenue, two Comptrollers will be appointed who shall vacate their offices on any change of government, but shall not necessarily have seats in the Cabinet.

The Cabinet.

38. Each Department is presided over by a Minister who

may be a member either of the Senate or the House of Commons, and these Ministers form the Cabinet for the time being.

39. The Lieutenant Governors of the several Provinces are appointed by the Governor General. The forms of the Legislatures vary in the different Provinces. Quebec, Nova Scotia, New Brunswick and Prince Edward Island each has two Chambers (a Legislative Council and a Legislative Assembly) and a responsible Ministry; in Ontario, Manitoba and British Columbia there is only one Chamber (the Legislative Assembly) and a responsible Ministry. In Prince Edward Island the members of the Council are elected; in Quebec, Nova Scotia and New Brunswick they are appointed for life by the Lieutenant Governor. The following are the numbers of the members of the Provincial Legislatures :—

Provincial Legislatures.

LEGISLATURES.	Legislative Council.	Legislative Assembly.
Prince Edward Island	13	30
Nova Scotia.....	17	38
New Brunswick.....	17	41
Quebec.....	24	65
Ontario.....		90
Manitoba.....		35
British Columbia.....		25
The Territories (North-West Council).....		20

40. The North-West Territories are presided over by a Lieutenant Governor and a Council partly elected by the people and partly appointed by the Privy Council of the Dominion.

North-West Council.

41. The Provincial Legislatures have the exclusive right to legislate on such matters as: the Constitution of the Province, taxation and raising money for Provincial pur-

Authority of Provincial Legislatures.

poses, management and sale of Provincial lands, establishment and management of prisons, hospitals, asylums, municipal institutions, licenses, local works and undertakings, property and civil rights in the Province, the administration of justice, education, and generally all matters of a local or private nature in the Province.

Provincial qualifications for voters.

42. The qualifications for voters at elections for the Provincial Assemblies are determined by the several Legislatures, and vary accordingly.

Number of members of House of Commons.

43. The original number of members of the House of Commons was 181, but in accordance with the provisions of the British North America Act described below, and in consequence of the admission of new Provinces and the Territories this number has been increased to 215, distributed as follows: Ontario, 92; Quebec, 65; Nova Scotia, 21; New Brunswick, 16; Manitoba, 5; British Columbia, 6; Prince Edward Island, 6, and the North-West Territories, 4. By section 51 of the British North America Act it was provided that the number of representatives for Quebec should always be 65, and that the other Provinces should be represented in such proportion to their population, as ascertained at each decennial census, as the number 65 would bear to the population of Quebec so ascertained.

Representation.

44. The following table gives the proportionate representation of each Province according to the Re-distribution Act of 1882:—

Ontario.....	One member to	20,908	of the population.
Quebec.....	“	20,901	“
Nova Scotia.....	“	20,979	“
New Brunswick.....	“	20,077	“
Manitoba.....	“	13,190	“
British Columbia.....	“	8,243	“
Prince Edward Island...	“	13,148	“
The Territories.....	“	13,090	“
Canada.....	“	20,496	“

The original numbers of representatives from Manitoba, British Columbia and Prince Edward Island were specially provided for in the Acts admitting these Provinces into the Confederation. Subsequent readjustment will be in accordance with the above mentioned section of the British North America Act. According to the census of 1886 the representation in Manitoba was one member to 21,728 of the population.

45. The qualifications for voters at elections for the Dominion Parliament are as follow: A vote is given to every male subject of the full age of 21 years, being the owner, tenant or occupier of real property of the actual value in cities of \$300, in towns of \$200, or elsewhere of \$150, or of the yearly value wherever situate of not less than \$2 per month, or \$6 per quarter, or \$12 half-yearly, or \$20 per annum, or who is a resident in any electoral district with an income from earnings or investments of not less than \$300 per annum, or is the son of a farmer, or any other owner of real property which is of sufficient value to qualify both father and son, or is a fisherman and owner of real property, which with boats, nets and fishing tackle amounts to \$150 actual value. Voting is by ballot, except in the Territories.

Qualifications for voters at Dominion elections.

46. Indians in Manitoba, British Columbia, the District of Keewatin and the Territories are not entitled to vote. Indians in other parts of Canada, possessed of land on a reserve, with improvements of not less value than \$150, and not otherwise qualified, shall be entitled to vote.

What Indians may vote.

47. By special provision votes are given to persons in British Columbia and Prince Edward Island, who, not coming within the Dominion franchise, were at the time of the passing of the Act (20th July, 1885), entitled to vote according to the then existing Provincial laws, but only for so long as they shall be so qualified.

Voters in B. Columbia and P. E. Island.

What persons disqualified.

48. The following persons, in addition to the Indians above mentioned, are disqualified for voting at elections for the Dominion Parliament, viz., the chief justice and judges of the Supreme Court, the chief justices and judges of the Superior Courts, and the judges of all other courts in the Dominion. Revising officers, returning officers and election clerks, and all counsel, agents, attorneys and clerks of candidates, who have been or may be paid for their services, are disqualified from voting in the district in which they have been so engaged, but not elsewhere.

Election procedure.

49. Writs for new elections are dated and made returnable as the Governor General shall determine, the date of the nomination, which shall be named in the writ, being also fixed by him. Within eight days from the receipt of the writ, the returning officer shall post up at each polling place in the district, a proclamation setting forth the dates for the days of nomination and polling, which latter in the case of general elections shall be everywhere on the same day (except as is specially provided for in British Columbia and the Territories, and in the Districts of Algoma, Chicoutimi and Saguenay and Gaspé) and of the official declaration of the return of the poll, together with a list of the several polling places, such proclamation to be posted up at least eight days before the day fixed for the nomination. The polling day is to be the seventh after the day of nomination, except as specially provided. It is proposed by a Bill now before the House to make uniform the dates for holding elections in British Columbia and the other electoral districts for which special provisions had been made in consequence of the difficulties of communication.

Franchise Act

50. The last general election was held on the 22nd February, 1887, and the preceding one on the 20th June, 1882. In the interval, viz., on 20th July, 1885, an Electoral

Franchise Act was passed providing for a uniform franchise for the whole Dominion in elections for the House of Commons, the right to vote at such elections having previously been determined by the Franchise Acts in force in the several Provinces.

51. The following table gives the number of voters registered, the number of votes polled, and the number of ballots spoiled and rejected at the last two general elections. Particulars of general elections 1882 and 1887.

*Elected by acclamation.

† No lists in unorganized districts.

52. It will be seen that 25 members were returned by acclamation in 1882 and only 8 in 1887, consequently there were contests in 18 more seats at the last election. Elections by acclamation.

53. The following table shows the total number of voters in 1882 and 1887, and the numerical as well as the proportional increase in each Province and in the Dominion. As these tables are meant to be comparative, the Territories have not been included:— Number of voters 1882 and 1887.

PROVINCES.	Number of Voters on List.		Numerical Increase.	Percentage of Increase.
	1882.	1887.

Estimated.

Increase
in num-
ber of
voters.

54. According to a statement published by Mr. Joseph Pope, from which the figures in the foregoing table are partly taken, the natural increase in the number of electors between 1882 and 1887 may be set down approximately at 6 per cent., which would make the increase consequent on the passing of the Franchise Act of 1885, 16.40 per cent. The largest increases were naturally to be found in Manitoba and British Columbia, while the smallest was in Prince Edward Island, which was owing to the extremely liberal franchise previously in force in that Province. If the Territories are included, the inhabitants of which were enfranchised by special Act in 1886, the total increase in the number of voters since 1882 will be found to have been 190,327 or 23.68 per cent.

Summary
state-
ment.

55. The next table is a summary of the table on page 31:—

PROVINCES.	1882.			1887.		
	Number of Voters on Lists.*	Total Votes Polled.	Spoiled and Rejected Ballots.	Number of Voters on Lists.	Total Votes Polled.	Spoiled and Rejected Ballots.

* In contested constituencies. † Partly estimated. ‡ Approximate.

Constitu-
encies re-
turning
two mem-
bers.

56. The constituencies of Ottawa, Hamilton, Halifax, Pictou, Victoria, B.C., Cape Breton, St. John, N.B. (City and County) and the three counties of Prince Edward Island each return two members and every elector has the privilege of two votes. In order, therefore, to avoid, as far as possible, the

counting of the same elector twice, the highest number of votes cast for a Ministerial candidate and the highest number for an Opposition candidate, in each of these places have been added together and considered as the total vote. This plan is considered a better one than that of halving the total vote as being more likely to represent the individual vote.

57. The total increase in the number of voters (exclusive of the Territories) was 180,012 and the increase in the number of votes polled was 169,601, being 94·21 per cent. of the total increase. Including the Territories, the increase was 176,821 or 92·90 per cent.

58. The following table gives the proportions of votes polled to voters on the lists, and of spoiled ballots to votes polled at each general election:—

PROVINCES.	Percentage of Votes polled to total Voters.		Percentage of spoiled ballots to Votes polled.	
	1882.	1887.	1882.	1887.
Ontario.....	69·59	69·51	1·25	0·96
Quebec.....	66·63	68·13	3·79	1·77
Nova Scotia.....	83·77	81·61	1·56	1·44
New Brunswick.....	73·82	77·79	3·03	1·66
Manitoba.....	34·55	45·60	2·15	1·38
British Columbia.....	96·54	56·78	9·60	2·18
Prince Edward Island.....	75·83	87·41	1·73	1·23
Canada.....	69·68	70·27	2·04	1·28

It will be seen that there was an increase of nearly one per cent. in the proportion of votes polled to voters on the list, in spite of the very large falling off in the figures of British Columbia, which probably should be attributed to the season of the year, the election in 1882 having been held in June, and in 1887 in February. There was an increase

in the proportion in Quebec, New Brunswick, Manitoba and Prince Edward Island, and a decrease in Ontario, Nova Scotia and British Columbia. In Ontario the proportions at the two elections were almost identical.

Spoiled
and re-
jected bal-
lots.

59. There was a decrease in the number of spoiled and rejected ballots of 1,530, and in proportion to the number of votes polled, the decrease was noticeable in every Province, particularly in Quebec, Nova Scotia and British Columbia, and for the whole Dominion it amounted to 37·20 per cent. As the increased franchise included a large number of persons who had never previously been entitled to vote, the above result may be considered as very satisfactory evidence of the progress of education in this country.

Propor-
tions of
voters to
popula-
tion, &c.

60. In 1882 the proportion of voters to the population of 1881 was 1 to every 5·33 persons, and in 1887 to the estimated population of 1886, the proportion was 1 to every 4·82. At the time of the census of 1831, 24 per cent. of the population were males at and over 21, and of these 77 per cent. were entitled to vote, and the proportion of members to males at and over 21 was 1 to every 4,914 and to the number entitled to vote 1 to every 3,808. In 1837 the proportion of members to the number entitled to vote was 1 to every 4,575, or, including the Territories, 1 to every 4,623.

Propor-
tion in the
United
Kingdom.

61. In 1881 the proportion of members to the population of the United Kingdom was 1 to every 54,255 persons.

Propor-
tion of
members
to popula-
tion.

62. The proportion of members per 100,000 of the population at the census of 1881 in the following countries was :

United Kingdom.....	2·0
Canada.....	5·0
Victoria.....	10·0
New South Wales.....	14·4
Queensland.....	25·8
South Australia.....	18·0
Tasmania.....	27·6
New Zealand.....	16·5

The figures for the Australasian Colonies are taken from the Victorian Year Book, 1885-86, p. 100.

It will be seen that in proportion to population, Canada has more than twice as many members as the United Kingdom, but is considerably behind all the Australasian Colonies Queensland and Tasmania having more than five times as many.

63. The North-West Territories were not represented in 1882 and have not therefore been included in the comparative tables, but the following are particulars of the election in 1887, being the first held in those districts:—

Election
in the Ter-
ritories.

ELECTORAL DISTRICTS.	Number of Votes on List	Total Votes Polled.	Percentage of Votes Polled to total Voters.
Alberta.....	2,960	2,055	69·66
Assinibola East.....	3,772	2,746	72·80
Assinibola West.....	1,885	1,149	60·95
Saskatchewan.....	1,708	1,270	74·35
The Territories.....	10,315	7,220	70·00

As specially provided by Statute, the voting in the Territories is open, consequently there could be no spoiled or rejected ballots. It will be seen that the proportion of votes, polled to the total number of voters on the list was very much higher than in the neighbouring Province of Manitoba, the fact of this being the first opportunity that the inhabitants had of exercising the franchise, since representation was given them, may have acted as a special inducement to many to go to the polls.

Open
voting.

64. The franchise in the Territories is somewhat different to the rest of the Dominion, every *bonâ fide* male resident and householder, of the age of 21 years, not an alien or an Indian

Franchise
in the Ter-
ritories.

and who has resided within the electoral district for not less than twelve months preceding the election being entitled to vote.

Total proportion of votes to voters.

65. It is a curious fact that whether the Territories are included or excluded, the proportion of votes polled to the number of voters remains precisely the same, viz., 70.27.

Naturalization.

66. Any person, an alien, who has resided for three years in this country can, after taking the oath of residence and allegiance before a judge, commissioner or magistrate, and having the same registered, obtain a certificate of naturalization, and become entitled to the privileges of a British subject. An alien woman, when married to a British subject, becomes thereby a naturalized British subject.

Governors General of Canada.

67. The following is a list of the Governors General of Canada since Confederation, with the dates of their respective appointments:—

GOVERNORS GENERAL OF CANADA SINCE 1867.

NAME.	Date of Appointment.	Date of Assumption of Office.
The Rt. Hon. Viscount Monck, G.C.M.G.	June 1, 1867..	July 1, 1867
The Rt. Hon. Lord Lisgar, G.C.M.G. (Sir John Young).....	Dec. 29, 1868..	Feb. 3, 1869
The Rt. Hon. the Earl of Dufferin, K.P., K.C.B., G.C.M.G.....	May 23, 1872..	June 25, 1872
The Rt. Hon. the Marquis of Lorne, K.T., G.C.M.G., P.C., &c.....	Oct. 5, 1878..	Nov. 25, 1878
The Most Hon. the Marquis of Lansdowne, G.C.M.G., &c.....	Aug. 18, 1883..	Oct. 23, 1883

The Dominion Government and Privy Council.

68. The next tables give the names of the present members of the Dominion Government arranged according to precedence and of the members of the Privy Council and the dates of the opening and closing of each Session composing the different Parliaments since Confederation.

6th Parliament.....	1st.....	April 13, 1887..	June 23, 1887..	

* Adjourned from 21st December, 1867, to 12th March, 1868, to allow the Local Legislatures to meet. † Adjourned 23rd May till 13th August.

69. It will be seen that there have been five complete Parliaments and one Session of the sixth since Confederation. The first Parliament was the longest one, and the second was the shortest. The average length of each Session has been 87 days, or about 12 weeks, the longest Session was in 1885, viz., 24 weeks, 4 days, and the next longest was in 1867-68, viz., 16 weeks, 4 days. The shortest Session was in 1873, and only lasted 2 weeks and 1 day.

Duration
of Parlia-
ment.

70. The next table gives the names of the holders of the different Cabinet offices since Confederation, with the dates of their respective appointments. There have only been two changes of Government and three Ministries, and with the exception of from 7th November, 1873, to 17th October, 1878, Sir John A. Macdonald has been in power during the whole period.

Cabinet
Ministers.

71. In 1879 a Bill was passed dividing the office of the Minister of Public Works; the new Department assuming exclusive control of Railways and Canals, and in the same Session the office of Receiver General was abolished.

Depart-
mental
changes.

CABINET MINISTERS OF CANADA SINCE 1867.

Switzerland.....	W. F. Hertenstein.....		President of Swiss Confederation.*	1888
Tunis.....	Sidi Ali Pasha.....	1817	Bey of Tunis.....	1882
Turkey.....	Abdul Hamid II.....	1844	Sultan of Turkey.....	1876
United States.....	Grover Cleveland.....	1837	President of the United States.	1885
Zanzibar.....	Sayyid Burghash bin Saeed.		Sultan of Zanzibar.....	1870

* Elected annually.

76. It will be noticed that the Emperor of Brazil has reigned longer than any other Monarch, having succeeded to the throne in 1831, at the age of six years. Queen Victoria comes next, succeeding in 1837, at the age of eighteen years. Owing to the death of William I, Emperor of Germany, on 9th March, 1888, a few days before completing his 91st year, William III of Holland is the oldest Sovereign. The King of Spain is still the youngest Sovereign in the world, being not yet two years old.

Oldest and
longest
reigning
Sover-
eigns.

CHAPTER II.

POPULATION AND VITAL STATISTICS.

Census
1871 and
1881.

77. The last census of the Dominion of Canada was taken on the 4th April, 1881, and the following table is a comparative statement of the population at that date, and on 2nd April, 1871, the date of the preceding census:—

POPULATION OF CANADA—1871 AND 1881.

PROVINCE.	1871			1881.		
	Males.	Females	Total.	Males.	Females.	Total.
Prince Edward Island	47,121	46,900	94,021	54,728	54,163	108,891

Total	346,604	343,182	689,786	18.81	19.1	18.97

For full particulars of the census of 1881, see Statistical Abstracts for 1885 and 1886, Chap. II.

78. In order to ascertain what progress had been made in the settlement of the North-West, a census of three of the provisional districts of the North-West Territories was taken on the 24th August, 1885, which showed that their population consisted of 48,362, of whom 20,170 were Indians, as follows:—

Census of the Provisional Districts of the North-West 1885.

CENSUS OF THE THREE DISTRICTS OF THE NORTH-WEST TERRITORIES—1885.

POPULATION AND OCCUPIED DWELLINGS.

DISTRICT.	SUB-DISTRICT.	POPULATION.			Occupied Dwellings.
		Males.	Females	Total.	
Assiniboia, 95,000 square miles.	Broadview.....	4,971	3,396	8,367	3,007

Protestants	22	Russia and Poland	97
Universalist	20	France	93
Adventist	1	Italy	31
Other denominations.....	26	British Columbia	16
Not given	4,464	At Sea	2
		Spain and Portugal	1
		Other Countries.....	105
		Not given.....	146

Natives of
the three
Districts.

81. The natives of the Territories comprised 52 per cent. of the population, but most of them were Indians, only 14 per cent. of the whites having been born in the Territories.

Enumeration
of
Indians.

82. It was not thought well to enumerate the Indians in the usual way, on account of the many difficulties in the way of doing so successfully, and their numbers were therefore taken from the books of the Government agents, who keep records in connection with supplies and treaty payments. No information, however, could be obtained regard-

ing their ages, conjugal condition, &c., and, therefore, the following table relates almost entirely to the ages of the white population. As a general rule the largest portion of a population is found to be under the age of five years, but in the Territories it will be seen that this only applies to females, the largest number of males being between the ages of 20 and 30, a fact easily to be explained and understood, when the large number of young single men who have gone in to settle are taken into account.

Ages of
the people.

CENSUS OF THE THREE DISTRICTS, 1885.
AGES OF THE WHITE POPULATION.

Ages.	Males.	Females.	Ages.	Males.	Females.
Under 5 years.....	2,159	2,014	55 to 60 years.....	296	181
5 to 10 ".....	1,957	1,895	60 to 65 ".....	216	123
10 to 15 ".....	1,566	1,467	65 to 70 ".....	113	62
15 to 20 ".....	1,501	1,273	70 to 75 ".....	53	33
20 to 25 ".....	3,215	1,302	75 to 80 ".....	23	20
25 to 30 ".....	3,130	1,282	80 to 85 ".....	10	22
30 to 35 ".....	1,942	883	85 to 90 ".....	7	2
35 to 40 ".....	1,396	700	90 and over.....	5	3
40 to 45 ".....	902	460	Not given.....	7,562	8,810
45 to 50 ".....	624	416			
50 to 55 ".....	446	302	Total.....	27,113	21,249

83. The following statements with reference to the conjugal condition of the people, do not, of course, include Indians:

Conjugal
condition.

HUSBANDS AND WIVES OF WHITES AND HALF-BREEDS IN THE
THREE DISTRICTS, 1885.

DISTRICTS.	HUSBANDS.			WIVES.		
	Under 21 years.	Over 21 years.	Total.	Under 21 years.	Over 21 years.	Total.
Assiniboia.....	28	3,486	3,514	204	3,110	3,314
Saskatchewan.....	4	681	685	59	608	667
Alberta.....	9	1,976	1,985	112	1,622	1,724
Total.....	41	6,143	6,184	375	5,340	5,715

Excess of husbands.

84. Husbands exceeded wives by 469, which was a large number, considering the size of the population. Only '66 per cent. of the husbands were under 21 years, but 6'56 per cent. of the wives were under that age.

Proportions of wives to husbands.

85. The proportions of wives to husbands were as follows:—

WIVES TO EVERY 1,000 HUSBANDS IN THE THREE DISTRICTS—1885.

Assiniboia	943
Saskatchewan	973
Alberta.....	874
The Territories.....	924

Wives were a decided minority in all the districts, but especially in Alberta.

Husbands and wives under and over 21 years.

86. As shown by the following figures, the proportion of husbands under 21 was about the same in the three districts, but that of wives was considerably the highest in Saskatchewan:—

HUSBANDS AND WIVES UNDER AND OVER 21 YEARS IN EVERY 1,000 HUSBANDS AND WIVES IN THE THREE DISTRICTS, 1885.

DISTRICTS.	HUSBANDS.		WIVES.	
	Under 21 years.	Over 21 years.	Under 21 years	Over 21 years.
Assiniboia.....	8	992	62	938
Saskatchewan	6	994	88	912
Alberta	5	995	65	935
The Territories	7	993	66	934

Proportion of population to area.

Some idea of the scantiness of the population in proportion to the area of the three districts may be gained from the facts that there only '15 persons to the square mile, '01 persons to the occupied acre, and '25 persons to the culti-

vated acre. The proportion of cultivated to occupied area was only 5.07 per cent., but it must be remembered that by far the largest portion of the occupied area is used for stock raising, the number of acres held under grazing leases in Alberta and Assiniboia alone being on the 31st December, 1887, no less than 4,466,844.

The following is a statement of the occupiers of lands and lands occupied in 1885. Occupiers of lands and lands occupied.

CENSUS OF THE THREE DISTRICTS—1885.

OCCUPIERS OF LANDS AND LANDS OCCUPIED.

DISTRICT.	Total occupiers.	OCCUPIERS OF			Total acres occupied.	Total acres cultivated.
		160 acres and under.	161 acres to 320.	321 acres and over.		
Assiniboia	5,147	1,225	3,742	180	1,641,752	160,133
Saskatchewan	749	350	340	59	505,953	19,545
Alberta	1,091	367	584	140	1,714,113	16,307
Total.....	6,987	1,942	4,666	379	3,681,818	195,985

89. In 1881 the total number of occupiers in the whole of the North-West Territories was only 1,014, of occupied lands only 314,107 acres, and of cultivated lands 28,833 acres, so that in four years, the number of occupiers has increased over 600 per cent., and more than 3,000,000 acres have been taken up for settlement. Occupiers &c., in 1881.

Occupations of the people in the three Districts, 1885.

90. The following is a classified summary of the occupations of the people in the three Provisional Districts in 1885 :

CENSUS OF THE THREE DISTRICTS—1885.
OCCUPATIONS OF THE PEOPLE.

Occupations.	Number	Occupations.	Number
Employés of general Government	109	Persons engaged in building and building material..	29
Employés of municipal Government	3	“ furniture and decorating..	49
Militia officials	99	“ food	76
Policemen and constables.....	793	“ drinks and stimulants, including hotel-keepers...	150
Clergymen and all ministering to religion	155	“ dress, clothing, &c.....	56
Lawyers, judges and law court officers	52	“ livery and stage teamsters, &c.....	111
Physicians, surgeons, &c.....	43	“ mining	77
Chemists and druggists.....	15	“ metals other than gold and silver.....	161
Persons engaged in art and literary pursuits.....	2	“ boots and shoes.....	15
Surveyors and civil engineers...	32	“ wood, including carpenters	313
Teachers	36	“ various other industries...	12
Musicians	2	“ various domestic occupations	295
Merchants	125	“ various commercial occupations	140
Commercial employés.....	153	“ various professional occupations	30
Bankers	7	“ agricultural pursuits.....	8,388
Railway and telegraph employés.....	316	Contractors	18
Messengers and porters.....	6	Dealers and traders	50
Manufacturers.....	4	Freighters	128
Mechanics	7	Millers and millwrights	21
Persons engaged in lumbering, including mill hands...	43	Hunters	3,196
“ navigation and boat building	8	Keepers and guards.....	2
“ fishing	5	Labourers	1,033
“ books	30	Pensioners (military).....	1
“ watch making and jewelry	16	Persons of independent means..	50
“ carriages and harness.....	25	Engaged in various occupations	1

As might be expected, by far the largest proportion of the inhabitants were engaged in agricultural pursuits, while over 3,000 got their living by hunting. The North-West Mounted Police are included in the number of policemen and constables.

CENSUS OF THE THREE DISTRICTS—1885.

Industrial
establish-
ments.
1885.

Saw mills	13	490,000	218	60,385	92,850	227,580
Tailors and clothiers....	3	600	4	3,250	2,348	6,100
Tinsmithing	10	12,900	14	9,850	25,925	52,400

91. No comparison of value can be made in detail between the above figures and those of 1881, but the following figures will show the great progress that had been made in the intervening four years:—

Compari-
sons with
1881.

	1881.	1885.	Increase.
Capital invested.....	\$ 104,500	\$ 771,451	\$ 666,951
Hands employed.....	83	546	463
Yearly wages	35,425	186,917	151,492
Value of raw material.....	79,751	518,428	438,677
Value of articles produced...	195,938	1,029,235	833,297

These figures may be taken as fairly representing the values they profess to, but as the enumerators have to trust almost entirely to the owner's estimates, there is naturally a tendency in some cases to over valuation.

Animals and field products in the three Districts, 1885.

92. The next tables give the census returns of the number of animals in, and the quantity of butter and cheese made in the three districts in 1885, also particulars concerning the field products in the same year, and a column has been added to this, as well as to the next table, giving the corresponding figures for the whole North-West, in 1881, in order that a general idea may be obtained of the progress made during the last four years.

93. The information in the foregoing table was obtained principally from the traders, and not as had been the custom in previous census, from the hunters themselves, for it was found that there was considerable liability to have the skins reported twice, once by the hunter, and again by the trader; it was, moreover, impossible to obtain any correct information from the Indian hunters. The figures are not supposed to be absolutely correct, and it is altogether likely that some of the animals were killed outside of the district, but they represent a very fairly correct statement of the number of skins disposed of by the traders during the census year.

94. The North-West Territories constitute not only the largest but almost the last remaining fur preserve in the world, every variety of fur being found within their

limits, and they yield three quarters of all the furs sold in the markets of Leipsic and London, which are the great fur markets of the world. Beaver, which were formerly so abundant, have become very scarce indeed, and their fur has gone up in value more rapidly than that of any other animal, but as they are easily domesticated, and, in addition to their valuable skins, make capital food, it has been suggested that preserves should be created in suitable parts of the Territories, to be attended to by the Indians, who would thus be furnished with sources both of profit and food.

Buffalo in
America.

95. Thirty-six buffalo were reported to have been killed during the year, but it is most probable that they were actually killed outside, though possibly by residents in, the three districts. The buffalo, which ten years ago could be counted by millions, is now practically extinct; as far as known there being none left in Canada except a herd of about 68, kept at Stony Mountain, Manitoba, which are semi-domesticated, and with which successful crosses with domestic cattle have been made. The total number left in the United States is variously estimated at from 600 to 1,000.

Cross be-
tween buf-
falo and
domestic
cattle.

96. In the second report of the Committee appointed by the Senate to collect information regarding the natural food products of the North-West, it is stated in regard to the reproduction of the buffalo as a food supply, that in the changed condition of the country, the presence of those animals would probably disturb the present agricultural training of the Indians, and interfere with the farming and herding efforts of the white settlers, but attention was called to the evidence received with reference to successful crosses between a Buffalo bull and Durham cow, and a Durham bull and Buffalo cow, at Stony Mountain,

the former cross being the one preferred ; " the hybrid animal thus produced being said to be larger, hardier, stronger, heavier and more easily wintered than the domestic animal, with the additional advantage of yielding a skin as heavily but more evenly furred than the buffalo robe, and worth, it was said, as much as the full price of a domestic animal." The Committee recommended that the Government Experimental Farms about to be established in Manitoba and the Territories should continue these experiments, and also endeavour to obtain hybrids between the moose and musk ox and domestic stock. The practicability of a successful cross with the buffalo having been fairly established, it is likely that in the near future this may prove a very valuable source of food supply as well as of profit from the heavy skins. It was suggested before the Committee that a cross between a buffalo and Galloway or Polled Angus would produce fine black robes, which would be worth from \$75 to \$100 each.

97. The total quantity of fish caught in the census year, according to the returns was 3,713 barrels, but this amount can only be considered as approximate, and the quantity actually taken was probably far larger. Owing to the growing scarcity of fish in consequence of the large exports to the United States, the committee above mentioned, strongly recommended the prohibition of the exports of almost all fish, and the establishment of a local hatchery for the breeding of certain varieties at some point central for distribution ; the varieties recommended being the sturgeon, whitefish, gold eye, catfish, perch, eels, pike, maskinongé and carp.

Fish in the North-West.

98. The total number of churches in the 3 districts was 66 viz., 19 Church of England, 18 Presbyterian, 15 Roman Catholic, 11 Methodist, and other Denominations 3. In

Churches in the Three Districts 1886.

proportion therefore to the number of followers to each religion, there were 525 persons to each Church of England Church, 428 to each Presbyterian, 620 to each Roman Catholic, and 628 to each Methodist. There were also one hospital, one orphanage, two colleges, and five convents.

Census of
Manitoba
1886.

99. A census of Manitoba was taken on the 31st day of July, 1886, with the following result :

CENSUS OF MANITOBA—1886.

POPULATION AND OCCUPIED DWELLINGS.

ELECTORAL DISTRICT.	POPULATION.			Occupied Dwell- ings.
	Males.	Females.	Total.	
Selkirk.....	19,501	14,855	34,356	8,580
Marquette	12,833	9,917	22,750	5,348
Provencher	7,076	6,334	13,410	2,604
Lisgar	9,578	8,308	17,886	3,508
Winnipeg (City)	10,606	9,632	20,238	3,831
Total	59,594	49,046	108,640	23,871

Increase
since 1881.

100. The last census of Manitoba was taken on the 4th April, 1881, when the population was 65,954. Soon after that date, however, a large portion of the Province, known as the Manitoba Extension, was taken away and added to Ontario and the District of Keewatin, reducing the area of Manitoba from 123,200 square miles to 60,520. For the purpose of comparison, therefore, the population of the Extension should be deducted from that of the Province in 1881, which reduces the numbers to 62,260, showing that the increase in the five years, 1881-1886 was 74.49 per cent., which, while not perhaps quite as high as was expected, still shows a very remarkable rate of increase. The numerical increase was 46,380.

101. The proportion of females to males was 82.30 females per 100 males; in 1881 the proportion was 77.26 females per 100 males. In old settled countries, where the growth of population depends entirely on the natural increase, females are always found to predominate, but in newer countries, where the population is largely made up by immigration, the reverse is almost invariably the case, the male immigrants being in excess of the female ones. The increase in the proportion of females, as shown by the above figures, probably indicates, after making due allowance for the natural increase, the extent of which it is impossible to determine, that there has been a slight falling off in the excess of male immigration since 1881, which falling off may be expected to continue as the country becomes settled and developed. The average ratio of sexes per 1,000 of population in old countries is about 495 males and 505 females (Statistical Abstract, 1886, p 90), in Manitoba in 1886 the ratio was 549 males and 451 females.

Proportions of males and females.

102. There was an increase of 11,068, or 86.44 per cent. in the number of occupied dwellings, but the number of inhabitants to each dwelling was less than in 1881, being 4.55 as compared with 5.15. This is doubtless due to the number of single men who have immigrated and are for the present living alone on their homesteads.

Occupied dwellings in Manitoba 1886.

103. There was an increase in the number of uninhabited houses of 1,162, being an increase of no less than 146 per cent., and as the proportion of dwellings per 100 of population increased from 20.62 per cent. in 1881 to 23.77 per cent. in 1886, it is evident that there has been an unnecessary excess of building operations, the consequence, no doubt, of the unnatural inflation in 1882. There were only 41 uninhabited houses in Winnipeg in 1881, while there were 436 in 1886. The total number of families was 25,155,

Uninhabited houses 1881 and 1886.

Families.

being at the average rate of 4.31 persons to a family. This was a lower proportion than in 1881, when it was 4.65. In 1881 the number of persons to the square mile, when the area of the Province was 123,200 square miles, was .53; in 1886, when the area had been reduced by 62,680 square miles, the number was 1.79 per square mile.

Religions
and birth-
places in
Manitoba
1886.

104. The following table is a summary of the religions and birthplaces of the people in Manitoba in 1886:—

CENSUS OF MANITOBA, 1886.
RELIGIONS AND BIRTHPLACES OF THE PEOPLE.

New Brunswick.....	704		
Germany.....	528		

Full comparisons of the above returns with those of 1881 will be found in the Statistical Abstract for 1886, chap. II.

105. The next table gives the ages of the people in 1886. The proportion of children under five years has not varied as much as might have been expected, being only a trifle higher—viz: 15.55 per cent. of the total population in 1886, and 14.88 per cent. in 1881, but there was a larger difference in the numbers between the ages of 20 and 30, the proportion being 20.51 per cent. as compared with 24.24 per cent. in 1881. There was an increase in the males and a decrease in the females under 20, as shown by the following figures:—

	Males.	Females.
1881.....	42.79 per cent.	51.50 per cent.
1886.....	43.71 “	49.87 “

CENSUS OF MANITOBA, 1886.

AGES OF THE PEOPLE.

Ages.	Males.	Females.	Ages.	Males.	Females.
Under 5 years.....	8,605	8,288	55 to 60 years...	1,029	731
5 to 10 “	6,736	6,469	60 to 65 “ ...	785	610
10 to 15 “	5,642	6,106	65 to 70 “ ...	440	319
15 to 20 “	5,069	4,599	70 to 75 “ ...	274	168
20 to 25 “	6,361	4,831	75 to 80 “ ...	121	97
25 to 30 “	6,571	4,520	80 to 85 “ ...	55	54
30 to 35 “	5,012	3,394	85 to 90 “ ...	19	26
35 to 40 “	3,788	2,522	90 and over.....	12	8
40 to 45 “	2,707	1,898	Not given.....	2,752	2,751
45 to 50 “	2,013	1,448			
50 to 55 “	1,603	1,217	Total	59,594	49,046

The population was slightly older in 1886, those under 21 forming 46.49 per cent. of the whole number, as compared with 47.38 in 1881.

106. There was an increase in the number of females between the ages of 15 and 45, the proportions being 4,437 females between those ages in every 10,000 females living in 1886, and 4,326 in every 10,000 in 1881.

Females
at 15 to 45.

Husbands and wives in Manitoba 1886.

107. The following is a comparative statement of the number of husbands and wives in Manitoba in 1881 and 1886, distinguishing between those under and over 21 years:

HUSBANDS AND WIVES IN MANITOBA—1881 AND 1886.

YEAR.	HUSBANDS.			WIVES.		
	Under 21 years.	Over 21 years.	Total.	Under 21 years.	Over 21 years.	Total.
1881.....	76	10,872	10,948	686	9,857	10,543
1886.....	38	17,351	17,389	699	16,372	16,971

Decrease in husbands and wives under 21.

108. A very large decrease will be seen to have taken place in the number of husbands and wives under 21 years, more particularly in that of husbands, and there is no immediate way of accounting for it, unless it has arisen from the fact that in 1881 an attempt was made to enumerate Indians the same as whites, and particulars of their conjugal condition were taken which could not fail to be more or less inaccurate.

Increase in number of wives.

109. It was natural to expect an increase in the proportion of wives to husbands, many husbands coming in first to find land and then sending for their families; there were 9,759 wives to every 10,000 husbands in 1886, as compared with 9,630 wives to the same number of husbands in 1881.

Husbands and wives in every 10,000, 1881 and 1886.

110. The following figures give the numbers of husbands and wives under and over 21 years in every 10,000 of each class respectively in 1881 and 1886:

HUSBANDS AND WIVES UNDER AND OVER 21 YEARS IN EVERY
10,000 HUSBANDS AND WIVES.

YEAR.	HUSBANDS.		WIVES.	
	Under 21 years.	Over 21 years.	Under 21 years.	Over 21 years.
1881.....	69	9,931	650	9,350
1886.....	22	9,978	412	9,588

111. The single males of 20 and upwards, and the single females of 15 and upwards, *i. e.*, the bachelors and spinsters of the population, numbered 15,174 and 11,035 respectively. Adding to these numbers the widowers and widows at all ages, *viz.*, 979 and 1,357, it is found that the total marriageable population amounted to 16,153 males and 12,392 females, the former exceeding the latter by 3,761, the marriageable males being in the proportion of 130 to every 100 females. In 1881 the marriageable males were in the proportion of 162 to every 100 marriageable females, showing that the excess of bachelors is being steadily reduced. It follows almost as a matter of course that the single males exceeded the single females, the excess amounting to 9,431. In every 10,000 single men there were 7,765 single women. In 1881 the similar proportion was 6,137.

Marriageable males and females.

112. The percentage of married to total married and marriageable men was about the same as in 1881, while that of women to total married and marriageable women was somewhat smaller, as is shown by the following figures:—

Proportion of marriageable men and women.

PERCENTAGE OF MARRIED TO TOTAL MARRIED AND MARRIAGEABLE MEN AND WOMEN IN MANITOBA—1881 AND 1886.

	Males.	Females.
1881.....	51.42	62.43
1886.....	51.84	56.76

Proportion of married &c., to total population.

113. The following is a comparative statement of the percentage of married, widowed, unmarried and children to the total male and female population respectively in 1881 and 1886 :—

PERCENTAGE OF MARRIED, WIDOWED, UNMARRIED AND CHILDREN TO TOTAL MALE AND FEMALE POPULATION IN MANI-TOBA—1881 AND 1886.

MALES.

YEAR.	Married.	Widowers.	Bachelors, 20 and over.	Children under 20.
1881.....	29.43	1.42	26.36	42.79
1886.....	29.18	1.64	25.46	43.72

FEMALES.

YEAR.	Married.	Widows.	Spinsters, 15 and over.	Children under 15.
1881.....	36.67	3.20	18.87	41.26
1886.....	34.60	2.77	22.50	40.13

The changes among the males are about what might have been expected, except that there is a slight decrease in the proportion of the married, but among females it is not quite the same. The proportions of married, widows and children are smaller, and of spinsters decidedly larger.

Supporting and dependent ages.

114. It may be said to be a general rule that persons between the ages of fifteen and sixty-five are able to contribute more or less to their own maintenance, the majority as a rule being able to support themselves altogether, while those under fifteen and over sixty-five rely generally on others for support, whence it follows that the physical effectiveness of a country may be pretty accurately gauged

by the proportion of its inhabitants at the middle period of life

115. The following table shows the proportions in Manitoba in every 10,000 persons living, and in every 10,000 males living at the sustaining, as compared with those at the dependent ages, in 1881 and 1886:—

Relative strength of the population of Manitoba 1886.

RELATIVE STRENGTH OF THE TOTAL AND OF THE MALE POPULATION OF MANITOBA—1881 AND 1886.

NUMBERS IN EVERY 10,000 PERSONS LIVING.

YEAR.	AT SUPPORTING AGES.	AT DEPENDENT AGES.	
	15 to 65.	Under 15 years.	65 years and over.
1881	5,934	3,932	134
1886	5,955	3,898	147

NUMBERS IN EVERY 10,000 MALES LIVING.

1881	6,287	3,582	131
1886	6,198	3,647	155

In proportion to the total population there was a slight increase in the numbers at the middle period, but in proportion to males only, there was on the other hand a small decrease.

116. The following figures show the number of men available in Manitoba for active service under the provisions of the Militia Act, in 1881 and 1886. The numbers are divided into the three periods at which calls would be made if necessary. Due allowance must be made for those specially exempted from service and those physically incapacitated:

Males at the soldiering age in Manitoba 1886.

MALES AT THE SOLDIERS' AGE IN MANITOBA—1881 AND 1886.

AGES.	1881.	Number in 10,000 Per- sons Living.	1886.	Number in 10,000 Per- sons Living.
18 to 30 years.....	11,787	1,787	15,081	1,388
30 to 45 "	6,587	998	11,507	1,059
45 to 60 "	2,873	435	4,645	427

The number of persons therefore liable to be called on for active service (subject as above mentioned) in Manitoba in 1886 was 31,233. There was a decrease as compared with 1881 in the proportions at the 1st and 3rd periods, and a small increase at the 2nd period.

Occupiers of lands and lands occupied Manitoba 1886.

117. The next table is a statement of the number of occupiers of land in Manitoba in 1886, together with the number of acres of land occupied :

CENSUS OF MANITOBA—1886.

OCCUPIERS OF LANDS, AND LANDS OCCUPIED.

DISTRICT.	Total Occu- piers.	OCCUPIERS OF			Total Occupied Acres.	Total Cul- tivated Acres.
		160 Acres and under.	161 Acres to 320.	321 Acres and over.		
Selkirk.....	7,915	3,673	3,744	498	2,060,337	416,148
Marquette	4,588	2,065	2,158	365	1,249,729	218,596
Provencher.....	2,033	1,296	624	113	366,549	71,633
Lisgar	2,981	2,197	625	159	493,265	45,362
Winnipeg city	54	54	1,344	532
Manitoba	17,571	9,285	7,161	1,135	4,171,324	752,571

Increase in cultivated area.

118. The total number of occupiers in 1881 was 9,077; of acres occupied, 2,384,837, and of acres cultivated, 250,416. The largest proportion of increase therefore has been in

acres cultivated. The average area in cultivation was about $3\frac{1}{2}$ acres to each person in 1881, and almost 7 acres in 1886. Of the land cultivated, 20 per cent. was sown with wheat in 1881, and 48 per cent. in 1886.

119. The following table gives the urban and rural population of Manitoba in 1886. All towns having over 500 inhabitants are included:—

Urban
and rural
popula-
tion in
Manitoba
1886.

CENSUS OF MANITOBA, —1886.

URBAN AND RURAL POPULATION.

CITIES AND TOWNS.	Males.	Females.	Total.
Brandon.....	1,240	1,198	2,348
Portage la Prairie.....	1,039	939	2,028

Total, Cities and Towns.....	14,736	13,377	28,113
Total, Rural Population.....	44,858	35,669	80,527

120. It is well-known that females are almost always more numerous than males in cities and towns, but the Province of Manitoba is altogether too newly a settled country for the ordinary conditions yet to prevail there, and it is found from the above figures that males were in excess in every town in the Province, with the exception of St. Boniface, where there was a slight excess of females. Taking the total urban population the proportion was 90.77 females per 100 males; in Winnipeg alone the proportion was 90.81 per 100 males, and in other towns, exclusive of Winnipeg, the proportion was 90.67; the proportion being almost the same in all three cases. In Winnipeg the proportion has increased very considerably since 1881, when it was only 71.79 per 100 males, and it is quite possible that by 1891 females will be in

Excess of
females
and pro-
portion of
the sexes.

a fair way to attain their normal excess. The proportion of females in the rural population was almost the same as in 1881, being 79.51 per 100 males, as compared with 78.01 in the former year. The proportion of urban population to the total population of the Province has increased very largely, since 1881—viz., from 12.10 per cent. to 25.88 per cent., and is now higher than was the proportion in any other Province in 1881. (Statistical Abstract, 1885, p. 80.)

Occupations of the people in Manitoba 1886.

121. The following table is a classified summary of the occupations of the people in Manitoba in 1886:—

CENSUS OF MANITOBA—1886.

OCCUPATIONS OF THE PEOPLE.

Occupations.	Number	Occupations.	Number
Employés of general Government.....	224	Persons engaged in carriages and harness.....	119
Employés of municipal Government, including policemen.....	60	“ building and building material	314

“ books.....	215	Pensioners (military).....	4
“ engraving, &c.....	9	Independent means.....	104
“ watchmaking, jewellery, &c.....	44	Engaged in various occupations.....	108

122. The number of persons engaged in agricultural pursuits was very large, and slightly in excess of the proportion similarly engaged in 1881, being 210 in every 1,000 persons as compared with 205 in the former year. Agricultural class.

123. The large increase in the number of railway and telegraph employes, viz., 490, is a proof of the large extension of these facilities in the Province. There was a decrease of 1,125 in the number of hunters, but it is probable that a number of Indians were returned as such in 1881. Railway employes.

124. The following is a list of the industrial establishments in Manitoba in 1886, showing the number of each kind, the amount of capital invested, number of hands employed and other particulars:— Industrial establishments in Manitoba 1886.

CENSUS OF MANITOBA, —1886.

Tendency
to over-
valuation.

125. The above figures are as correct as it was possible to obtain them, but as the valuation must always be necessarily left to the owners themselves, a certain amount of over-valuation is certain to exist. Great care was, however, taken to keep the amounts within bounds.

126. A comparative statement of the several amounts, showing the increase in each, between 1881 and 1886, is given below :

Industrial establishments 1881 and 1886 compared.

INDUSTRIAL ESTABLISHMENTS IN MANITOBA—1881-1886.

	1881.	1886.	Increase.
Number of establishments.....	344	553	209
Capital invested.....	\$1,383,331	\$3,474,583	\$2,091,252
Number of hands employed.....	1,921	2,307	386
Yearly wages paid.....	\$755,507	\$971,537	\$216,030
Value of raw materials.....	\$1,024,821	\$2,887,677	\$962,856
Value of articles produced.....	\$3,413,026	\$5,526,166	\$2,113,140

The amount paid in wages in 1881 was at the average rate of \$393 per annum per each hand employed, in 1886 the average had risen to \$421 per hand. Perhaps the largest and most important increase was in flour and grist mills, the increase in number being 18, in hands employed 158, in wages paid \$85,048, in capital invested \$701,364, in value of raw material \$1,027,982, and in value of articles produced \$1,538,453.

127. The next table gives the yield of field products in Manitoba in 1886, according to the census returns, together with the totals of the census of 1881, as far as available.

Field products in Manitoba 1886.

Cultiva-
tion of
hay and
wheat.

128. Cultivated was not separated from prairie hay in 1881, the total crop in that year having amounted to 185,279 tons. The amount of cultivated hay is at present very small, the prairie grass yielding more to the acre, and being amply sufficient for all services. The increase in wheat is naturally the largest, upwards of 350,000 acres having being brought under the cultivation of this grain since 1881. The yield to the acre was apparently larger in 1881, the average having been 20.1 bushels, as compared with 18.4 bushels in 1886.

Animals
in Mani-
toba 1886.

129. The next table gives similar information respecting the number of animals and their products. The largest proportionate increase was in the number of swine, and the

smallest in the number of working oxen, which have been to a great extent superseded by horses.

CENSUS OF MANITOBA—1886.

131. In view of the proposed negotiations with reference to the entry of Newfoundland into the Confederation, the following information will be of interest :—

Area &c.,
of New-
found-
land.

The Island of Newfoundland, which, with Labrador, is the only part of British North America not included in the Dominion, is situated on the north-east side of the Gulf of St. Lawrence, and is 350 miles long by about 130 wide, with an estimated area of 40,000 square miles. The coast of Labrador has an area of about 120,000 square miles, but the number of inhabitants is very limited. A census of the colony was taken in 1884, when it was found to contain 197,835 persons, of whom only 4,211 were living in Labrador.

132. The sex of those living in Labrador was not given, but of the 193,124 inhabitants of Newfoundland, 99,344 were males and 93,780 females, being an excess of males of 5,564; the proportion of females being 94.30 per 100 males. The population of St. John, the capital of the colony, was 33,145, viz., 18,503 males and 19,642 females, the numerical excess of females being 1,139, and the proportion 106.15 females per 100 males.

Popula-
tion of
New-
found-
land.

133. The Roman Catholic, Church of England and Wesleyan are the principle religious denominations, the numbers and proportions being as follows :—

Religions.

	Number.	Proportion to Population.
Roman Catholic	75,254	38.13
Church of England.....	69,000	34.36
Wesleyan	48,767	24.17
Presbyterian	1,495	0.75
Other denominations	1,470	0.74
Not given	1,349	0.68

134. The factories, mills, &c., numbered 198 and employed 2,459 hands; their total value was \$1,161,352, and the value of goods produced \$1,891,167.

Industrial
establish-
ments.

Farm stock. 135. The total area under cultivation was 46,996 acres, and the numbers of farm stock were as follow:—Cows, 19,088; horses, 5,536; sheep, 40,326; swine, 21,555; and goats, 7,934

Fishing industry. 136. The principal industry is fishing, principally cod and seal, and 60,419 persons, being 30·61 per cent. of the population, were engaged in it, the total number of vessels and boats employed being 25,225. In the Bank fishery for cod 60 vessels, aggregating 2,507 tons and employing 1,093 persons were engaged, and in seal fishing there were 21 steam vessels of 5,877 tons and employing 4,778 men. The number of seals caught was 365,931.

Education. 137. In 1885, there were 204 Roman Catholic schools, 174 Church of England, 107 Methodist and 7 others, making a total of 492, at which the attendance was 27,322. The Government grant amounted to \$4.17 per head of attending scholars, and the proportion of denominational population attending school was: Church of England, 15·25 per cent.; Methodist, 13·63 per cent.; Roman Catholic, 13·01 per cent.; other denominations, 10·05 per cent.

Area of Canada. 138. The area of Canada is estimated to contain 3,610,257 square miles. It is the largest of all the British possessions, embracing very nearly one-half of the whole Empire. The continent of Australia is the next largest, having an area of 2,944,628 square miles, and the area of Tasmania and New Zealand added to this, makes the total area of the Australasian Colonies 3,075,030, or 535,227 square miles less than that of Canada. The total area of the British Empire is 7,999,618 square miles. The combined area, therefore, of Canada and the Australasian Colonies comprises very nearly seven-eighths of the whole Empire.

Area of Europe. 139. The area of the whole continent of Europe is

3,756,002 square miles. It is therefore only 145,745 square miles larger than the Dominion of Canada.

140. The area of Great Britain and Ireland is 121,115 square miles, so that Canada is nearly thirty times as large as the whole of the United Kingdom. It is 600,000 square miles larger than the United States without Alaska, and about 18,000 square miles larger than both combined.

Area compared with Great Britain and United States.

141. The estimated area of the world is 52,511,004 square miles, and its estimated population 1,433,887,500. Canada, therefore, covers rather more than one-fourteenth part of this surface, but contains only about one-two hundred and eighty-sixth part of the estimated population.

Area of the world.

142. The following are the areas of the several Provinces and Districts :

Areas of the several Provinces, &c.

	Square Miles.
Ontario	181,806
Quebec	188,688
Nova Scotia.....	20,907
New Brunswick	27,174
Manitoba	60,520
British Columbia	341,305
Prince Edward Island.....	2,133
District of Keewatin	about 400,000
" Alberta	" 100,000
" Assiniboia.....	" 95,000
" Athabasca.....	" 122,000
" Saskatchewan	" 114,000
Remainder of the Territories	1,816,730
	<hr/>
	3,470,257
Great lakes, rivers, &c., not included in above areas	140,000
	<hr/>
	3,610,257
	<hr/>

The area of the Province of Manitoba was erroneously stated at 123,200 square miles in the Statistical Abstract, 1886, that portion which was added to the District of

Keewatin and to Ontario not having been deducted. The areas of the Provinces of Ontario and Quebec can only be considered as approximate, the northern boundaries of both Provinces not having yet been exactly defined. It will be seen that Canada has an area of inland water surface which is alone 18,885, square miles larger than the combined area of Great Britain.

Density of population.

143. Prince Edward Island is the smallest of all the Provinces, but is more than twice as thickly populated as any other Province, the proportion being 51·0 persons to the square mile. Nova Scotia comes next in density of population, with 21·0 persons. The following is the order in which the Provinces stand, according to density of population :

Prince Edward Island,	Quebec,
Nova Scotia,	Manitoba,
New Brunswick,	British Columbia,
Ontario,	

Population and area of British possessions.

144. The following table, compiled principally from official sources, gives the population and area of the United Kingdom and its possessions, according to the latest available information :—

AREA AND POPULATION OF BRITISH POSSESSIONS.

PART II.—VITAL STATISTICS.

147. Twenty-two towns made returns of mortuary statistics for the year 1886, and with the exception of certain figures collected by the Provincial Government with more or less accuracy, these returns are the only means of information respecting the urban rate of mortality in Canada that are available, and they, moreover, comprise the only vital statistics of any nature collected by the Dominion Government, except such as are obtained at the taking of each census, and except those statistics of the French population of Quebec, which, with the assistance of the Government, are taken by the Roman Catholic Church. The large extent of territory, and consequently the great outlay that would be necessary have hitherto prevented the adoption by Government of any comprehensive plan for the collection of this class of statistics, but as their importance is becoming more fully recognized every day, and as the Government have in contemplation the establishment of a Statistical Bureau in connection with the new Department of Trade and Commerce, it is possible that some endeavour will be soon made to secure correct returns of births, deaths and marriages throughout the Dominion, though it will necessarily be some time before they can attain any very high degree of accuracy.

Collection
of vital
statistics.

148. The following table gives the number of deaths in twenty-two cities and towns in Canada, together with the ratio per 1,000 deaths at different ages. The figures are taken from the mortuary statistics, and while fairly correct must be accepted with a certain amount of reserve.

Deaths in
certain
towns in
Canada.

DEATH RATE IN SOME OF THE PRINCIPAL CITIES AND TOWNS IN CANADA, 1886.

CITIES.	Total Deaths.	Ratio per 1,000 of Population.	Ratio Per 1,000 Deaths at						Ages not Given.

Peterborough.....	161	19.75	360.25	130.43	204.97	149.07	155.28	
Fredericton.....	144	20.77	423.61	215.28	104.17	62.50	194.44	
Sorel.....	303	44.88	663.37	171.62	52.80	36.30	72.61	3.30	
St. Hyacinthe.....	264	41.63	541.67	166.66	75.76	68.18	147.73	
Galt.....	114	18.03	377.19	87.72	122.81	140.35	271.93	

149. The heaviest death rate in the table was that of Sorel, viz., 44·88, as this is the first time this place has made complete returns, it is not possible to know whether the above figures are anywhere near the normal rate or not, but it is probably they are not. The town appears to have suffered from a visitation of diphtheria and throat affections, the combined deaths from these two causes having been 92 out of a total of 303, or 30·36 per cent. St. Hyacinthe, which had the second highest rate last year, viz., 48·83, is again second in the list, with a reduced rate, but still a very high one: out of a total of 264 deaths, 106, or 40·15 per cent., occurred from atrophy and debility and teething, 82 of which were of infants under two years of age. There were also 39 deaths from small-pox, being an increase of 3 over the preceding year. The death rate in Montreal was lower than it had been since the returns were first made, but no particular value can be attached to any comparison of this description, for previous to 1886 the various populations were only estimated, and in many cases considerably under or over the mark, now, however, that the plan of taking the population, according to the municipal returns in each year, has been adopted, comparisons of the death rate between places and years will soon become of distinct value.

150. The largest number of deaths was in every instance of children under 5 years of age, the proportion to the total number having been 52·43 per cent. There were 5,738 deaths returned of children under 1 year of age, being 34·54 per cent. of the total deaths, a larger proportion than in 1885 when it was 31·6 per cent. Diarrhœal affections were, as before, most fatal to these young children, 1,428 deaths from this cause being recorded, 1,332 from atrophy and debility, 702 from diseases of the respiratory organs, and 332 from premature birth, so that 66·15 per cent. of the deaths under one year resulted from the above four causes. The

Death rates compared.

Deaths of children.

Deaths of illegitimate children.

total number of deaths of illegitimate children returned was 1,146, but with the exception of those from Montreal Quebec and Ottawa, the figures are far too wide of the mark to be of any value. Owing to the natural desire for concealment on the part of the parents, the difficulty of obtaining accurate returns of this class of deaths is excessive. Out of the above number, no less than 1,080 or 94.24 per cent. were under one year of age. The number of cases of children still-born returned was 756. The number of deaths recorded from suicide was 31, viz., 22 males and 9 females, the number returned in 1885 from 19 cities, was 21. The above number of suicides were divided among 12 out of the 22 cities, the largest number, viz., 9, being from Toronto.

Deaths from suicide.

Deaths from most fatal diseases.

151. The following table gives the number of deaths from eight most fatal diseases in the 22 cities making returns in 1886 :—

DEATHS FROM THE MOST FATAL DISEASES—1886.

CITIES.	Atrophy and debility.	Diarrhoeal.	Lung diseases.	Phthisis.	Cerebro-spinal affections.	Diphtheria.	Throat affections.	Diseases of heart and blood vessels.
Montreal	1,014	687	465	486	341	235	200	216

Total	2,005	1,822	1,711	1,638	1,029	988	756	727

152. The order of fatality was somewhat different from that of 1885, as will be seen from the following arrangement, the most fatal disease being placed first:—

1885.	1886.
Atrophy and debility.	Atrophy and debility.
Lung diseases.	Diarrhoeal affections.
Phthisis.	Lung diseases.
Diarrhoeal affections.	Phthisis.
Cerebro spinal affections.	Cerebro spinal affections.
Diphtheria.	Diphtheria.
Diseases of heart and blood vessels.	Throat affections.
Throat affections.	Diseases of heart and blood vessels.

Order of fatality
1885, 1886

153. The total number of deaths from atrophy and debility was 5 less than in 1885, but it is still the largest number from any one cause. Out of 2,005 deaths from this cause 1,477 were of children under 5 years of age, being 73.66 per cent. of the whole number, a proportion slightly less than that of 1885, which was 74.51 per cent. There was an increase of 546 or no less than 42.79 per cent. in the number of deaths from diarrhoeal affections, of this number 1,427 were of children under one year, and 318 of children under 5 years, so that 95.77 of all the deaths from this cause were of children under 5 years, a proportion higher than in the preceding year, when it was 94.20. In Ottawa 24.37 per cent. of the total number of deaths from all causes, were of children under one year, from diarrhoeal affections.

Deaths from atrophy and debility.

From diarrhoeal affections.

154. There was a total increase in the number of deaths from phthisis of 214, of which 104 were returned from the 3 cities not included last year, leaving an increase of 110 deaths from this cause as compared with 1885, an increase of 7.72 per cent. Similarly there was an increase of 138 or 9.34 per cent. in deaths from lung diseases. The total deaths from all kinds of lung diseases were 3,101 (*i.e.* in the same 19 cities in 1885 and 1886), as compared with 2,901 in 1885,

From phthisis and lung diseases.

From diphtheria.

showing that there was an increase in 1886 of 200, or 6·89 per cent. There was again a large increase of the number of deaths from diphtheria, and in spite of all the precautions taken, this disease seems to be steadily on the increase. There was an increase as compared with 1885 of 133, or 18·35 per cent. Comparing the returns from 10 cities in 1884 with returns from the same places in 1886, there was an increase of no less than 53·71 per cent. in the number of deaths from diphtheria. It is well known that this disease is particularly fatal to children, and out of 988 deaths in 1886, 911, or 92·20 per cent. were of children under 11 years of age. In Sorel 13·20 per cent. of the whole number of deaths were from this cause. The increase in deaths from diphtheria appears to be very general in England,* in 1885 the number was 19 per cent. above the mean for the previous 10 years, and in 1886 in Ireland† the number was 15 in excess of the average for the previous 10 years.

From cerebro-spinal affections.

155. There was a decrease of 75 in the deaths from cerebro-spinal affections as compared with 1885, and an increase of 87 in deaths from affections of the throat. From diphtheria and affections of the throat, deaths in Sorel formed 30·36 per cent. of the total number.

Death rate in principal cities in Canada.

156. The following table, the figures for which are taken, with the exception of the average column, from the mortality statistics, gives the death rate per 1,000 of population in six of the principal cities in the Dominion, but, as before explained, the figures must not be taken as by any means conclusive, owing to the inaccuracy of the estimated populations, on which they are based, previous to 1886:—

* 48th Report of the Registrar General. † 23rd Report of the Registrar General (Ireland)

CITIES.	1883.	1884.	1885.	1886.	Average for four years.
Montreal	30.98	33.05	54.25	27.99	36.56
Toronto	22.40	20.30	20.61	21.50	21.20
Hamilton	20.59	19.66	19.01	20.71	19.99
Halifax	19.56	20.92	21.72	20.52	20.68
Ottawa	26.94	23.11	24.88	28.76	25.92
St. John, N. B.	22.03	22.29	24.32	21.18	22.43

157. All deaths from typhus, enteric or typhoid and simple continued fevers are included in one item, and it is not, therefore, possible to separate exactly the deaths from the different diseases; but as cases of pure typhus are extremely rare in this country, it will not be very far wrong to consider all the deaths under the above head as deaths from typhoid fever. The absolute difference between typhus and typhoid has now been so thoroughly well established that it would be well if the two fevers were treated as two separate and distinct diseases. As long ago as 1869 they were separated in the Registrar General's returns for England and Wales, and in his presidential address to the Epidemiological Society on 9th November, 1887, Dr. Thorne said that since the differentiation of these two poisons, the deaths from typhus had fallen from 1.9 to 0.1, and from typhoid from 3.9 to 1.7 per 10,000 living. He further stated that it had been now conclusively established that they were two distinct diseases, due to two separate specific contagia and developing under two altogether different circumstances.

Typhus
and
typhoid
fevers.

158. The long continued drought of the summer and autumn of 1887 has been held responsible for a very general outbreak of typhoid fever and diphtheria, and though the returns are not yet available, there is no doubt that in pro-

Causes of
typhoid.

portion to population, the deaths have been very numerous. Great as the advances are that have been made in sanitary conditions in this country of late years, it is clear that the arrangements are by no means as perfect yet as they ought to be. Bad drainage in one form or another is almost invariably the original cause of these diseases. In the address above alluded to Dr. Thorne says that typhoid is due to specific infection, always operating through the agency of filth, and which finds its nidus in conditions brought by failure to deal properly with the solid and liquid refuse of populations. Its potency of infection is such that when present in potable water in quantities infinitesimal, and altogether beyond the reach of discovery either by chemistry or physics, it is yet able to lead to widespread disaster. Since 1869 no less than \$40,000,000 have been spent in England "on sanitary work aimed essentially at the removal of conditions favourable to this and allied diseases."

Deaths
from ty-
phoid.

159. As no returns are made, it is, of course, not possible to ascertain the number of deaths from typhoid in the Dominion, the only figures available being those in the mortuary statistics, and the following is a comparative statement of the number of deaths from typhoid fever in 19 cities in 1885 and 1886:

CITIES.	1885.	1886.	CITIES.	1885.	1886.
Montreal.....	96	92	Guelfh.....	3	2
Toronto.....	53	38	Belleville.....	4	5
Quebec.....	35	16	Chatham.....	4	3
Hamilton.....	8	12	Sherbrooke.....	6	7
Halifax.....	9	6	Peterborough.....	8	1
Winnipeg.....	22	18	Fredericton.....	4	2
Ottawa.....	12	15	St Hyacinthe.....	7	8
St. John.....	6	7	Galt.....	1	1
Kingston.....	6	3			
St Thomas.....	4	2			
Charlottetown.....	4	7			
			Total.....	292	245

160. According to the above figures, the deaths from typhoid and simple continued fever in 19 cities with a population of 675,674 in 1886 was 0.36 per 1,000 living. In London in 1885, with a population of 4,083,928, the deaths from typhoid were 0.15, and from simple and ill defined fever 0.02; in the same year in England and Wales from the same causes the deaths were 0.17 and 0.02 respectively per 1,000 living. In Ireland in 1886, the deaths from the same causes, with a population of 5,174,836, were 0.14 and 0.07 respectively per 1,000 living. While the death rate in London from both causes combined was 0.19 per 1,000 living, in Montreal it was 0.49 in Ottawa 0.45, and in Toronto 0.32.

Deaths from typhoid in United Kingdom compared.

161. Serious as these figures are in themselves, when the returns for the current year are published they will be found still more alarming, and it is plainly the duty of civic and municipal authorities to take vigorous and immediate steps towards remedying this dangerous state of affairs. The colony of Queensland in 1884 suffered from a similar visitation, and the following extract from the Register General's report for that year describes so closely the condition of affairs in Canada, that it is worth quoting: "The absence of the ordinary rain, cleansing the open water-courses and drains in our large centres of population and also washing all impurities from the surface, rendered the task imposed on the various Boards of Health of cleansing our cities and towns, a very difficult one. It is evident from the result that, unaided by nature in the manner indicated, they have been unable to combat successfully with the death-dealing germs engendered during the hot and dry season in 1884. The increased mortality from this cause, the highest ever recorded in the colony, must be looked upon with the utmost gravity, and those charged with the sanitary conditions of our

Cause of an outbreak of typhoid in Queensland.

“ townships should make strenuous efforts to fight against this fatal disease, one which in nearly all cases attacks the very flower of the population, those in the prime of life and strength. The more glaring sanitary defects may have been dealt with by them, but it is apparent that many death-dealing nuisances are still in existence to cause such a heavy loss of life from typhoid fever, as that which occurred last year.”

162. The report of the Toronto Local Board of Health for 1887 calls special attention to the serious increase of diphtheria and typhoid fever in that city. The cases of typhoid increased from 52 in 1886 to 193 in 1887 and of diphtheria from 214 to 625. As has been pointed out, these diseases are pre-eminently filth diseases, and as such are more or less preventable if only proper precautions are taken. It is only too apparent that “many death-dealing nuisances are still in existence,” and it is doubtful if in many places even “the more glaring sanitary defects have been dealt with.”

163. The following extract from the Toronto Report is full of truth, and should be read by every one, the conditions being possible in almost every part of the Dominion, but more particularly applicable to cities, towns and villages :

“ So long as privy pits continue in the built up parts of cities, storing up filth to putrify during warm weather, and give forth noxious gases, so long as wells containing foul organic matter continue to be used, so long as cisterns with putrified rain water remain in yards, often near windows and doors, so long as the yards continue to be fouled by kitchen slops and fluid excrement from want of house drainage, so long as stables are allowed with flooring which absorbs the liquid manure, and allows it to pass into the ground, and the manure is allowed to accumulate lying upon the ground and exposed to the rain, and so long as garbage is used for filling up low ground

Board of
Health.

“to decompose and ferment, perhaps to have a dwelling erected over it, so long as these evils are allowed to exist, there is no chance for a cessation of these frightful diseases. On the contrary a steady increase may confidently be looked for.”

164. Water is always a most important factor in spreading typhoid fever, and whenever the slightest suspicion of danger exists, it should be always boiled before using. It is also said that one-half grain of alum to each gallon of water will render it comparatively pure and free from contamination.

Purification of water.

165. There was a slight decrease in the number of deaf and dumb in Manitoba in 1886, the proportion being one in every 1,357 persons as compared with one in every 1,346 in 1881. There were 19 deaf and dumb in The Territories in 1885, being one in every 2,545 of the population. There was a decided increase in the number of those of unsound mind, the proportion being one in every 1,308, in 1881 it was one in every 1,090. In The Territories the total number was 10, being one in every 4,862 persons. The decrease in the number of blind persons in Manitoba in 1886 was very marked, the number being only one in every 6,790 persons, against one in every 2,127 in 1881. In The Territories the proportion was very large indeed, being as high as one in every 819 persons, this high rate is presumably caused by the dirt and smoke among the Indians.

Deaf and dumb, insane and blind, in Manitoba and the Three Districts, 1886 and 1885.

* Toronto Board of Health Report, 1887 p. 17.

CHAPTER III.

FINANCE.

The fiscal year.

166. The fiscal year of the old Province of Canada used to be identical with the calendar year, and terminate on the 31st December ; in 1864, however, a change was made, and it was decided to commence the fiscal year on the 1st July and end it on the 30th June. At Confederation the same plan was adopted for the Dominion, and has since been maintained. As therefore, all financial and commercial returns, and as a general rule departmental reports, are made up to the 30th June in each year, the fiscal year beginning on the 1st July and ending on the 30th June, is the one spoken of and referred to throughout this work, except where specially mentioned.

Conversion of foreign currency.

167. In all cases where figures relating to foreign countries have been used, their values have been first changed into pounds sterling, and then converted into currency at the rate of \$4.86'66. For the sake of convenience, cents have been omitted from most of the tables, and only used with reference to amounts per head and similar calculations.

Consolidated Fund.

168. The receipts from the sources of the ordinary revenue of the country are paid into what is called the Consolidated Fund, and payments thereout are made to cover the ordinary expenses. These receipts and payments therefore constitute what may be called the regular income and expenditure of the country, and the figures relating thereto are among the principal indicators of its financial and commercial condition.

Sources of revenue.

169. The ordinary revenue is derived from a variety of sources, which may, however, be divided into two classes viz., "Taxation" and "Other sources." The amounts raised by taxation consist solely of Customs and Excise duties,

and those raised from other sources consist of money derived from the postal service, railways, public works &c. The ordinary expenditure provides for the charges for debt and provincial subsidies, charges on revenue, and the current expenses of the country.

170. The following figures give the ordinary revenue and expenditure for the year ended 30th June, 1887:—

Revenue and expenditure, 1887.

Revenue	\$35,754,993
Expenditure	35,657,680
	\$97,313
Revenue in excess of expenditure.....	\$97,313

171. The revenue was \$2,577,953 in excess of that of the preceding year, while there was a decrease in the expenditure amounting to \$3,353,932. The increase in revenue was derived almost entirely from taxation, there being an increase in the receipts from Customs duties of \$3,005,250 and from excise duties of \$455,296, and a decrease in receipts from various sources of \$882,593. The amount paid on account of the North West Rebellion of 1885, was much less than that paid in the previous year, and was moreover charged to a different account (see par. 176) which facts to a large extent explain the reduction in expenditure. There was also a decrease in charges for debt and subsidies, and in the expenses of Legislation.

Increase and decrease.

172. The following table gives the receipts and payments on account of the Consolidated Fund, that is, the ordinary revenue and expenditure of the country for the last 20 years, and shows the surplus or deficiency in each year:

The Consolidated Fund, 1868-1887.

RECEIPTS AND PAYMENTS ON ACCOUNT OF THE CONSOLIDATED FUND (ORDINARY REVENUE AND EXPENDITURE)—1868 to 1887.

YEAR ENDED 30 JUNE,	CONSOLIDATED FUND.		Revenue in Excess of Expenditure.	Expenditure in Excess of Revenue.
	Revenue.	Expenditure		
	\$	\$	\$	\$
1868.....	13,687,928	13,486,092	201,836	
1869.....	14,379,174	14,038,084	341,090

1880.....	23,307,406	24,850,634	1,543,228
1881.....	29,635,297	25,502,554	4,132,743	
1882.....	33,383,455	27,067,103	6,316,352	
1883.....	35,794,649	28,730,157	7,064,492	
1884.....	31,861,961	31,107,706	754,255	
1885.....	32,797,001	35,037,060	2,240,059
1886.....	33,177,040	39,011,612	5,834,572
1887.....	35,754,993	35,657,680	97,313	

Surplus and deficit of revenue.

173. In thirteen years out of the twenty that have elapsed since Confederation, there has been a surplus of revenue, and in the remaining seven an excess of expenditure. The total amount of surplus during the period has been \$30,375,863, and of deficit \$16,044,817, being a net excess of revenue over expenditure of \$14,331,046. The revenue raised in 1887 was, with one exception, the largest ever raised (that raised in 1883 having exceeded it by \$39,656.) and was \$22,067,065 in excess of that of 1868, the first year after Confederation, being an increase of 161 per cent. After deducting the war expenditure from the expenditure of 1886, it will be seen that there was a decrease of ordinary expenditure in the year under review amounting to \$176,712, with

the exception however of 1886, the expenditure was the largest since Confederation, exceeding that of 1868 by \$22,171,588, being an increase of 164 per cent. The expenditure has therefore increased in a somewhat larger proportion than the revenue, but when the difficulties and expenses attending the opening up of new country are considered, it will be seen to be inevitable that at the beginning the expenditure should increase in faster proportion than the revenue, and in connection with the increase in expenditure the large extent of additional territory brought under control since Confederation must not be overlooked.

Increase
in expendi-
ture.

174. The following is a detailed comparative statement of the various receipts on account of the Consolidated Fund from all sources in the years 1886 and 1887, showing the increase or decrease in each item:—

Increase
and de-
crease
under va-
rious
heads.

175. As previously stated, the largest increase in revenue was from Customs and Excise duties, and the amount realized from these two sources had only been exceeded once before, viz., as regards Customs, by \$630,781 in 1883, and as regards Excise by \$140,900 in 1885. There was an increase in receipts from railways of \$210,409 as compared with only

\$5,093 in 1886, and there were also increases from hydraulic rents, slides and booms, and minor public works. The revenue derived from the Post Office was materially larger, showing an increase of \$111,907 as compared with an increase of \$61,661 in 1886, while the decrease in revenue from money orders in 1886 of \$1,342 was changed to an increase of \$7,026. The decrease of \$17,797 in telegraph receipts was due to the fact of the British Columbia lines have been taken over by the Canadian Pacific Railway Company, and these lines were the only ones belonging to the Government, the revenue from which exceeded the expenditure thereon. The decrease also in interest on investments was very large, amounting to \$1,308,191.

176. The following is a comparative statement of the principal items of ordinary expenditure in the years 1886 and 1887. The expenditure on account of the North-West Rebellion of 1885 having been charged to Consolidated Fund or revenue account in 1886 and to capital account in 1887, it has been thought advisable for the purposes of just comparison to eliminate the payments on that account in 1886 from this table, which will explain why the total of 1886 does not agree with that given in the table in par. 172.

Total Expenditure on account of Consolidated Fund	35,834,392	35,657,680		176,712

NOTE.—The items of exceptional expenditure are printed in italics.

177. There was a decrease of \$454,079 in the amount of interest paid on the public debt, and of \$86,631 in the charges of management, and in the total charges for debt and subsidies, a decrease of \$539,761. The amount of investments for sinking funds was less by \$13,317 than in the preceding year; this fund it will of course be remembered consists of money set aside for the redemption of the public debt, and is therefore, though entered as an expenditure, practically a reduction of liability. Although a general election was held during the year, there was a decrease in the

Increase and decrease of expenditure under various heads.

amount expended for legislation of \$60,476, but if the sum of \$141,000 for extra sessional indemnity which was totally exceptional expenditure, be deducted from 1886, it will be found that there was actually an increase in 1887 of \$80,524, which was in consequence of the general elections. There was but slight difference in the amounts expended for civil government, the principal changes being an increase of \$14,339 in the Post Office, a decrease of \$15,156 in the Department of the Secretary of State, and of \$5,780 in that of Finance. The total increase of expenditure on public works was \$86,764, the largest item being \$83,425 on harbours and rivers. The total decrease in other expenditure amounted to \$401,455. The expenditure under the new item of Experimental Farm amounted to \$91,544. The exceptional expenditure, viz., for the Manitoba census, and Colonial Exhibition was \$117,693.

178. With the exception of public works and minor revenues, there was an increase under every head of charges on revenue, the largest being for railways and the post office, as the expenses in connection with the Liquor License Act may be considered as exceptional. The cost of collection however was a trifle less in 1887, viz., 23·42 per cent. of the total revenue, as compared with 23·53 per cent. in 1886. The payment, in 1886, on account of the North-West Rebellion amounted to \$3,177,220, for those made in 1887, see par. 181.

179. There was a decrease in the amount of subsidies authorized by Parliament paid to railways of \$1,294,716; the total amount paid being \$1,406,533, as follows:

Albert Southern Railway Company.....	\$ 1,000
Baie des Chaleurs	250,000
Buctouche and Moncton	40,480
Canada Atlantic	44,384
Caraquet	61,200
Erie and Huron	96,000
Esquimalt and Nanaimo	327,480
Great Eastern	19,200

Irondale, Bancroft and Ottawa Railway Company.....	15,000
L'Assomption "	11,200

Montreal and Sorel '	4,950
New Brunswick and Prince Edward Island Railway Com- pany	97,440
Northern and Western Railway Company.....	18,200
Northern and Pacific Junction "	78,370
Pontiac and " "	60,580
Quebec and Lake St. John "	202,219
St. Lawrence and Lower Laurentian and Saguenay Railway Company.....	64,430
	\$1,406,533

Particu-
lars of
subsidies
to rail-
ways.

180. The total amount of subsidies voted by Parliament towards the construction of railways, on which payments have been made, or liabilities still exist, was, on the 31st December, 1887, \$10,395,565; of this amount the sum of \$4,082,307 had been already paid, leaving \$6,251,334 still due, \$61,924 not having been earned, owing to an over estimate of mileage. The above amount of \$10,395,565 had been voted among 89 companies, but as, on the 31st December, 1887, no contracts had been entered into by 43 companies, it is not at all probable that the full amount will ever become payable. In addition to the above money subsidies, grants of land have been made to 11 companies in Manitoba and the North-West Territories, amounting to 19,787,744 acres, of which quantity 75,690 acres have been patented. The average grant was 7,300 acres per mile, and the estimated number of miles subsidised was 2,710. A loan was also authorized to one company, in 1886, of \$15,000, of which \$13,778 has been paid, and \$1,222 is still due.

Capital
account.

181. The total amount paid on capital account was \$4,439,939, being \$2,036,461 less than in 1886. The amount was made up as follows:—

Canadian Pacific Railway.....	\$ 915,057
Cape Breton ".....	76,502
Carleton Branch ".....	2,300
Intercolonial ".....	823,071
P. E. Island ".....	5,800
Short Line ".....	24,157
Lachine Canal.....	28,772
Murray ".....	142,564
Ottawa Works.....	73,784
St. Lawrence Canals.....	237,257
St. Peter's ".....	1,088
Tay River Navigation.....	49,618
Trent River Canal.....	179,542
Welland ".....	1,071,074
Cape Tormentine Harbour.....	7,706
Esquimalt Graving Dock.....	207,308
Government Buildings, Ottawa.....	98,060
Port Arthur Harbour.....	39,969
Dominion Lands.....	162,392
North-West Rebellion.....	293,918
	<hr/>
	\$4,439,939

182. The sum of \$655,435 was laid out in investments, being a decrease of \$2,491,630 as compared with 1886. The investments were as follow :—

Albert County Railway Co.....	\$ 11,437
Montreal Harbour Commission.....	191,000
Quebec ".....	452,795
Three Rivers ".....	203
	<hr/>
	\$655,435

183. The total expenditure on capital account and subsidies to railways, together with the sums invested as above, amounted to \$6,501,907, being a decrease of expenditure under these heads, as compared with the preceding year of \$5,822,807. The subsidies to railways authorized at the last Session of Parliament amounted to \$2,187,600, as compared with \$2,073,065 voted at the previous Session, but \$470,000 of the former amount was in lieu of the same amount previously granted.

Estimated
revenue
and ex-
penditure,
1887.

184. The revenue for 1887 was estimated at \$35,300,000 which was \$454,993 less than the amount actually realized, and the expenditure, including Supplementary Estimates, was put at \$35,761,322, which was \$103,642 more than was expended.

Silver and
copper
imported.

185. Silver and copper to the value of \$275,000 were imported during the year, at a profit of \$82,194, which was \$12,041 more than the total expenditure of the Finance Department, including contingencies.

Heads of
revenue
and ex-
penditure,
1867-1887.

186. The several amounts received and expended under the principal heads of ordinary revenue and expenditure in each year since Confederation, are given in the following table:—

Manitoba, not included in estimated population until 1871.

British Columbia do do 1872.

Prince Edward Island do do 1874.

The Territories do do 1831.

Increase
and de-
crease per
head.

188. The revenue was 41 cents per head more than in 1886, and with the exception of the years 1882 and 1883 was higher than in any year since Confederation, in those years however it was 21 cents and 59 cents respectively more per head than in 1887. The expenditure was 82 cents less than in the preceding year, but with the exception also of 1885 was in advance of any other year in the table.

189. The following statement gives the revenues and expenditures in the United Kingdom and British Possessions, principally in the year 1886, with the proportion of each per head of population :

Revenues and expenditures in British Possessions.

Revenues
in Austra-
lasian co-
lonies.

190. The expenditure exceeded the revenue in 27 out of the 36 countries and colonies named in the list, and the total expenditure was \$30,346,668 in excess of revenue. In proportion to population, both the revenues and expenditures of the Australasian Colonies, are very high, the chief explanation of which is that "a considerable revenue is derived from the usufruct of the unsold lands, which is not generally the case elsewhere, the revenues also are swelled by the large sums which are received annually from the alienation of Crown Lands, and from the working of the State railways."* "The practice of treating money derived from the sale of Crown Lands as revenue obtains in all the Australian Colonies, and the money so raised forms one of the largest items of their annual income."‡ Canada will undoubtedly in a few years be deriving a large revenue from the sale of Dominion Lands, provided that the practice of treating such moneys as revenue will be in force, but all the principal railways are in the hands of private companies. Both in India and Cape Colony, the railways are principally owned by the Government, producing a corresponding difference in the amount of revenue.

Revenues
and ex-
penditures
in foreign
countries.

191. The ordinary revenues and expenditures in some of the principal foreign countries, as nearly as they could be ascertained, have been given in the following table:—

* Victorian Year Book, 1884-5. p. 131. ‡ Wealth and Progress of New South Wales, p. 383.

REVENUES AND EXPENDITURES IN FOREIGN COUNTRIES.

*Not including the revenues and expenditures of the several States.

France has both the largest revenue and the largest expenditure of any country in the world, considerably exceeding that of the United Kingdom, in 1887 it will be seen that the two amounts were almost identical, the proportion per head of population being the same; the same remark applies to Japan. Expenditure was in excess of revenue in ten out of the eighteen countries about which particulars are given.

192. As stated above in paragraph 169, the sources from which the ordinary revenue is derived, may be divided into two classes, viz., 1, taxation; 2, other sources. And the following figures give the amount raised in each class in 1887:—

Amount derived from taxation and other sources.

Revenue raised by taxation.....	\$28,687,002
“ “ from other sources.....	7,067,991
Total.....	\$35,754,993

Receipts
from taxation.

193. As compared with the preceding year, there was an increase in receipts from taxation of \$3,460,546, and a decrease from other sources of \$882,593, and of the total revenue 80·23 per cent. was derived from taxation as against 76·03 per cent. in 1886. The receipts from taxation being derived solely from Customs and Excise duties, it follows, in the absence of any extreme increase in the tariff, that the more prosperous the country, and the larger its trade, the greater will be the amount derived from taxation, and as the largest part of the revenue is obtained in this manner, in the years of the largest revenues, the amount of taxation per head of population will also be found to be largest. It will be seen, however, that in 1882 when the amount derived from taxation was \$1,137,956 less than in the year under review, the amount paid per head was 34 cents more, and it will also be noticed that the proportion of revenue raised by taxation in these days of a protective tariff, is not so large as it was in the years when a revenue tariff was in force.

Amounts
raised by
taxation,
1867-1887.

194. The following table gives the amount raised by taxation in each year since 1st July, 1867, also the average amount of such taxation paid per head of population, and the proportion of total revenue :—

TAXATION—1868 TO 1887.

YEAR ENDED 30TH JUNE.	TAXATION.				Percentage of Total Revenue
	Gross Amount.	Increase.	Decrease.	Average per Head.	
	\$	\$	\$	\$ cts.	
1868.....	11,700,681			3 47	85.48
1869.....	11,112,573		588,108	3 26	77.28
1870.....	13,087,882	1,975,309		3 79	84.37
1871.....	16,320,368	3,232,486		4 64	84.41
1872.....	17,715,552	1,395,184		4 91	85.52
1873.....	17,616,554		98,998	4 80	84.64
1874.....	20,129,185	2,512,631		5 26	83.16

1877.....	17,697,924		916,491	4 41	80.23
1878.....	17,841,938	144,014		4 37	79.74
1879.....	18,476,613	634,675		4 46	82.05
1880.....	18,479,576	3,963		4 38	79.29
1881.....	23,942,138	5,462,562		5 51	80.79
1882.....	27,549,046	3,606,908		6 22	82.52
1883.....	29,269,696	1,720,652		6 43	81.77
1884.....	25,483,199		3,786,499	5 53	79.98
1885.....	25,384,529		98,670	5 40	77.39
1886.....	25,226,456		158,073	5 26	76.03
1887.....	28,687,002	3,460,546		5 88	80.23

195. The largest amount derived from taxation in any one year during the period was in 1883, when the amount was \$582,696 in excess of that of 1887, in which year, however, the next largest amount was raised; the smallest amount raised was in 1869, viz., \$11,112,573, or \$17,574,429 less than in 1887. Comparing the first and last years of the above period of twenty years, it will be found that while the total receipts have increased 145 per cent., the amount paid per head of population has only increased 69 per cent., while the proportion to total revenue has decreased 6.14 per cent.

196. Several very important changes were made in the tariff in 1887, more particularly in the iron duties. A slight change was made in the export duties by cedar logs

capable of being made into shingle bolts being classed with shingle bolts and liable to the same duty, viz., \$1.50 per cord.

Amounts raised by Customs and Excise duties, 1867-1887.

197. The following table gives the amounts raised from Customs and Excise duties during the last twenty years, together with the proportion of each to population :—

TAXATION BY CUSTOMS AND EXCISE DUTIES, AND PROPORTION TO POPULATION—1868-1887.

Proportion derived from Customs.

198. It will be seen that considerably the largest part of the whole amount of taxation is derived from Customs duties, the proportion in 1887 being 78 per cent., in 1886 it was 76 per cent., in 1885, 74 per cent. and in 1884, 78 per cent. This is a larger proportion than in either the United Kingdom and most of the colonies, or in many European countries and the United States.

199. The expenses of collection of Customs revenue were only 3.66 per cent. of the amount realized, and with the exception of the years 1882 and 1883 was the lowest proportion in any year since Confederation. The fact, however, of those two years and the one under review being the years in which the largest amounts were realized, shows that the proportion does not always increase with the amount, and that it costs as much to collect a small Customs revenue as a large one. Considering the large area of the Dominion, and the length of its frontiers, together with the large number of ports of entry it is necessary to keep up, the cost of collection must be considered as being moderate. In the United Kingdom in 1887 it was 4.70 per cent.

Collection
of Customs
revenue.

200. There being no system of direct taxation in this country, and the use of articles on which Excise duties are collected being to a very large extent optional, it follows that the Customs duties alone form that part of the general taxation of which everyone must pay a share, and it will therefore, be satisfactory to notice from the foregoing table that the receipts from Customs duties have increased in far larger proportion than has the proportion of population, showing that the ability to purchase has increased in much greater ratio than the burden of taxation, the increase in the receipts from Customs being 160 per cent. since 1868, and in the amount per head only 41 per cent.

Indirect
taxation.

201. In the United Kingdom in 1887 the proportion per head was \$2.62, in the United States in the same year it was \$3.53, in both cases being a smaller proportion than in this country, while in some of the Australian colonies it was very much higher; for instance, in New South Wales it was \$10.04, in New Zealand \$10.86, and in Queensland \$15.27 per head.

Customs
duties per
head in
some fo-
reign
countries.

202. The following is a statement for the last twenty years of the amounts received from the principal heads under which taxation has been levied by means of customs and excise duties. As the tariff has undergone many changes during the period, notably in 1879, no comparisons can be strictly made from year to year, and the figures must always be considered with reference to the tariff in force at the time:—

Heads of
taxation,

Duty on
bill
stamps.

203. The duties on bill stamps, &c., were all repealed in 1882, the amount received in that year up to the date of repeal having been \$82,616, and the total amount received since Confederation, \$2,686,850. The receipts from tobacco were higher than in any year since 1876, owing, however, more to increased duty than to increased consumption, and the decrease in duties on cigars was owing to a larger consumption of domestic manufactures. The receipts from sugar duties were \$863,703 more than in 1886, and were larger than in any other year in the table. The duties on tea and coffee were taken off in 1882, causing a large reduction of revenue.

Receipts
from to-
bacco and
sugar
duties.

Consump-
tion of tea
and sugar.

204. The consumption of tea and sugar per inhabitant has been generally considered one of the best standards by which to judge the condition of the people, it having been found that the consumption of these two articles indicates more clearly than almost anything else their well-being, or otherwise; and judging the condition of the inhabitants of Canada by this test, it will be found that there has been a steady and satisfactory improvement. In 1868 the consumption of sugar was 15 lbs. per head, in 1877 it was 23 lbs. per head, and in 1887 it was no less than 41 lbs., an increase of 13 lbs. per head in the last ten years, and nearly double the quantity consumed in 1877. As far as information is available it would appear that the *per capita* consumption of sugar in Canada is larger than that of almost any other country, with the exception of the United Kingdom and the United States, a fact that speaks well for the condition of the working classes in this country. In the United Kingdom the amount was 66½ lbs. per head, a decrease of 4 lbs. as compared with 1885; in the United States it was about 44 lbs., not very much more than in this country. The consumption of tea has also very largely increased, in 1868 it was 2 lbs. per head, in 1877

it was 3½ lbs. per head, and in 1887 about 4 lbs. per head. The consumption of tea in England in 1886 was about 4½ lbs. per head. According to the Trade and Navigation Returns there was a large decrease in the consumption of tea in 1887 as compared with 1886, but this article being free of duty, it is all entered as for consumption, and no notice of its future course taken; some of it may again leave the country, and some of it may be yet in warehouse, however about 4 lbs. per head is probably now the consumption in Canada.

205. The amount of taxation in the United Kingdom, and in such other British possessions for which the figures for any recent period were available, are given, as nearly as could be ascertained, in the following table:—

Taxation
in British
Possessions.

TAXATION IN PRINCIPAL BRITISH POSSESSIONS

COUNTRY.	Year	TAXATION.		
		Amount.	Per Head.	Percentage of Total Revenue.
		\$	\$ cts.	
United Kingdom.....	1887	370,426,000	9 93	83 85
India.....	1887	136,628 182	0 68	37 70
Cape of Good Hope	1881	8,175,074	7 79	56 00
Natal.....	1882	1,353,406	3 28	42 28
Canada.....	1887	28,687,002	5 88	80 23
New South Wales	1887	12,710,930	12 68	34 39
Victoria.....	1887	13,607,983	13 56	43 14
South Australia.....	1885	3,647,308	11 65	32 45
Queensland.....	1887	5,872,013	17 14	42 94
Western Australia.....	1885	709,730	20 83	45 11
Tasmania.....	1886	1,842,957	13 43	66 56
New Zealand.....	1886	10,956,405	18 58	61 04

A larger percentage of revenue is raised in Canada than elsewhere, with the exception of the United Kingdom, but, India excluded, the amount raised per head by tax-

tion is, in all the countries, very much larger than in the Dominion. In New Zealand, Western Australia and Queensland it is nearly four times as much.

Taxation
in foreign
countries.

206. The following table gives the amount of taxation in some of the principal foreign countries:—

TAXATION IN FOREIGN COUNTRIES.

COUNTRY.	Year.	TAXATION.		
		Amount.	Per Head.	Percentage of Revenue.
EUROPE.		\$	\$ cts	
Austria (proper).....	1887	163,353,647	7 08	81·8
Belgium.....	1887	31,974,622	5 41	52·6
France.....	1887	446,857,294	11 69	72·4
German Empire.....	1887	126,780,487	2 70	56·5
Greece.....	1887	10,741,828	5 42	74·1
Italy.....	1887	246,200,645	8 22	81·2

Spain.....	1887	146,054,379	8 05	88 2
ASIA.				
Japan.....	1887	64,983,402	1 70	81 3
AMERICA.				
Mexico.....	1887	29,000,000	2 77	81·1
United States.....	18 7	336,143,175	5 59	90·5

Proportion of
taxation
to revenue
in foreign
countries.

207 The actual figures for 1886, not being available, most of the above figures are taken from the estimated revenue for 1887. The United States, it will be seen, expected to raise the largest proportion from taxation, over 90 per cent. being derivable from this source, Spain, the Netherlands and Portugal raising the next largest proportions. Belgium only raised half its revenue in this manner, and Russia two-thirds, all the other countries raise over 70 per cent. It will

be observed that of the countries given in the two tables, the amount raised by taxation is largest in France, the United Kingdom and the United States in the order named, and that with the exception of the Australasian Colonies, the amount per head in France is larger than in any other country named. The percentage of taxation to revenue is lowest in South Australia, New South Wales and India.

208. The gross debt of the Dominion of Canada on the 30th June, 1887, amounted to \$273,187,626, on the same date in 1886 it was \$273,164,341, there was therefore during the year an increase in the gross amount of liabilities of \$23,285. Gross debt
of Can-
ada, 1887.

209. The net public debt on the same date in 1887 was \$227,314,775, and in 1886, \$223,159,107, being an increase in the actual net liabilities of \$4,155,668. Net debt
1887.

This increase is to be accounted for as follows:—

Public Works (including Railways and Canals).....	\$3,983,629

210. The preceding table gives the total liabilities and assets and the net liabilities, together with the respective increase or decrease of each, for every year since Confederation. The number of years of revenue required to pay off a sum equivalent to the debt are also given.

State-
ment of
assets and
liabilities,
1867-1887

211. With the exception of the years 1871 and 1882 there has been an increase in the amount of debt in every year since Confederation, the total increase amounting to \$151,585,270, being an average annual increase of \$7,579,263. The assets it will be seen show a decrease in 1887 of \$4,132,383.

Increase
in debt.

212. In 1868 the debt was equivalent to five and one half year's revenue, in 1872 it would only have taken four years' revenue, and in 1887 it would have required 6 years and 4 months of revenue to pay off the debt. It will be seen, therefore, that the debt has increased in a somewhat greater ratio than the revenue, the proportion of increase being 200 per cent. and 161 per cent. respectively.

Proportion
of
revenue
to debt.

213. The principal objects upon which this large increase of debt has been laid out have been the following, viz., the assumption by the Dominion of the debts of the various Provinces on their entering the Confederation, the construction of the Intercolonial and Canadian Pacific Railways and of numerous public works, the enlargement and improvement of canals, and the acquisition and management of the North-West Territories.

Objects of
the debt.

214. The combined debt of the four Provinces which was assumed by the Dominion at the time of Confederation was \$77,500,000. In 1869 a further allowance of \$1,186,756 was made to Nova Scotia, and since that date additional Provincial debts have been assumed or allowed by the Dominion to the extent of \$30,743,393, making a total assumption of

Assump-
tion of
provin-
cial debts.

Provincial debts of \$109,430,148, leaving therefore the sum of \$117,883,763 as the actual net liability created by the Dominion Government since Confederation. For it must be remembered that the allowance of these debts to the Provinces was in accordance with arrangements made at that time, and that though the amount of the public debt has been thereby increased, no new liabilities have been actually created, inasmuch as these debts, if not taken over by the Dominion, would still be owing by the Provinces, and this assumption of Provincial debts has been therefore a simple transfer of liability, and the burden on the people has not been increased, but has been made actually lighter, since the Government were enabled to change the high interest-bearing bonds of the Provinces for their own bonds at a lower rate.

Particulars of Provincial debts assumed.

215. The following are particulars of the Provincial debts assumed by the Dominion at Confederation :

Canada.....	\$ 62,500,000
Nova Scotia.....	8,000,000
New Brunswick.....	7,000,000
	\$ 77,500,000

Debts subsequently assumed or allowed :

Nova Scotia (1869).....	1,186,756
The old Province of Canada (1873).....	10,506,089
Province of Ontario.....	2,848,289
“ Quebec.....	2,549,214
“ Nova Scotia.....	2,343,059
“ New Brunswick.....	1,807,720
“ Manitoba.....	3,775,606
“ British Columbia.....	2,029,392
“ Prince Edward Island.....	4,884,923

Total Provincial debts assumed.....\$ 109,430,148

Increase of debt accounted for.

216. On the Canadian Pacific Railway has been expended \$61,760,785, on the Intercolonial Railway \$32,049,420, and on miscellaneous public works \$37,243,100, making a total

of \$131,053,305. Not only therefore is the whole debt thus accounted for, but it will be seen that under the above three heads alone there has been spent the sum of \$13,169,541 more than the total actual increase of the debt since Confederation

217. The total expenditure on capital amount since Confederation has been \$169,524,446, made up as follows:—		Expenditure on capital account since Confederation.
Debts allowed to Provinces.....	\$ 30,743,393	
Canadian Pacific Railway.....	61,760,785	
Miscellaneous Public Works.....	37,243,100	
Intercolonial Railway.....	32,049,420	
North-West Territories.....	3,213,918	
Dominion Lands.....	2,723,729	
Eastern Extension Railway.....	1,286,552	
Prince Edward Island Railway.....	218,088	
Short Line Railway.....	208,959	
Cape Breton Railway.....	76,502	
	\$169,524,446	
Increase of Debt.....	151,585,270	
	\$ 17,939,176	

218. Including the expenses attendant on the acquisition of the North-West Territories, the following amounts, including expenditure charged to revenue, have been spent on public works since Confederation:—

Railways.....	\$100,326,856
Canals.....	31,660,498
Lighthouses and Navigation.....	8,284,580
Acquisition and Management of the North-West.....	5,356,035
Government Buildings and Miscellaneous Public Works.....	16,236,348
	\$161,864,317
Prior to Confederation there was expended on Railways and Canals.....	52,944,175
On Public Works.....	10,890,917
	\$225,499,409

219. The following table shows the amounts spent by the Government in each year since Confederation on the construction of Railways, Canals, Public Buildings and other works:—

Government expenditure on Public Works 1867-1887.

GOVERNMENT EXPENDITURE ON THE CONSTRUCTION OF PUBLIC
WORKS OF CANADA, SINCE 1st JULY, 1867.

YEAR ENDED 30TH JUNE.	Railways.	Canals.	Public Buildings.	Other Public Works.	Total.
	\$	\$	\$	\$	
1868.....	483,353	128,965	105,960	94,629	812,907
1869.....	382,615	126,954	113,453	60,028	583,049
1870.....	1,729,381	105,588	73,514	184,270	2,092,753

1887.....	3,270,433	1,783,698	1,029,859	1,525,660	7,609,650
Total.....	100,326,856	31,660,498	11,448,249	13,072,079	156,508,273

Expenditure for working expenses, &c.

220. In addition to the large amount shown to have been expended upon construction, there has also been spent for working expenses, staff maintenance and repairs the sum of \$46,535,025, which amount has however been to a large extent provided for out of corresponding revenue.

Cost of the Parliament Buildings.

221. The Parliament Buildings at Ottawa, which are acknowledged to be among the finest on the Continent of America, have been erected at a total cost up to the 30th June, 1887, of \$4,270,772, and the sum of \$117,346 during 1886, and of \$98,058 during the past year having been spent on the new Departmental Building in Wellington Street, the total expenditure on construction of the Parliament and Departmental Buildings to 30th June, 1887, has been \$4,486,176.

222. In 1868 the assets amounted to \$17,317,410, and in 1887 to \$45,872,851, showing an increase of \$28,555,441. The assets only include interest-bearing investments, loans, cash and banking accounts, no account being taken of the unsold lands belonging to the Government, or of the railways, canals, public buildings and other public works, which it either owns or has assisted in construction, and which are the material results of the large expenditure of public money. The following are details of the assets on 30th June, 1887 :—

Sinking Funds.....	\$19,054,577
Quebec Harbour Debentures.....	2,822,289
Graving Dock, Quebec.....	744,000
Improvement of St. Lawrence.....	2,530,504
Montreal Harbour Bonds, &c.....	452,200
Northern Railway Bonds.....	316,333
St. John River and Railway Extension Company.....	433,900
Canadian Pacific Railway Land Grant Bonds.....	29,000
North Shore Railway Bonds.....	970,000
Bank Deposits.....	130,000
Sundry investments.....	608,076
Total Interest-bearing investments.....	\$ 28,090,859
Province accounts.....	7,390,540
Miscellaneous accounts.....	1,601,533
Banking accounts.....	6,002,951
Specie reserve.....	2,777,815
Silver coinage accounts.....	9,153
Total Assets.....	\$45,872,851

223. In 1868 the interest-bearing assets amounted to the sum of \$15,853,720, or over nine-tenths of the whole amount, in 1887, they were \$28,090,859, or not quite two-thirds of the whole.

224. The reduction in high-interest bearing debts, and consequently the decrease in the rate of interest now payable, has been very considerable, as shown by the following table, in which the amounts given are those of the actual interest paid and received, and of the actual net interest; and the average rate of net interest is the average rate of the interest actually paid on the gross debt, after deducting that received on assets :—

Details of assets.

Interest bearing assets.

Rates of interest payable on debt and assets.

AVERAGE INTEREST ON THE DEBT AND ASSETS OF CANADA, FROM 1ST JULY, 1867, TO
30TH JUNE, 1887.

		454,080		1,308,103			854,113		

225. It will be seen that the average rate of interest actually paid on the net debt has decreased from \$4 51 per cent. in 1867 to \$3 18 per cent. in 1887, being a reduction of \$1.33 per cent. The rate, it will be noticed, is 32 cents per cent. higher than in 1886, which will be easily accounted for, when the sudden fall in the rate of interest received on assets, viz., from \$4 59 per cent. to \$2.16 per cent. is considered. This fall is due to the repayment of the loans to the Canadian Pacific Railway and of other high interest-bearing investments. While the rate of actual net interest paid has slightly increased, there has been a further reduction in the net rate of interest paid on the gross debt of 17 cents, caused by the redemption of some of the small loans bearing high rates of interest. The total reduction in the net rate since Confederation has been \$1.10 per cent.

Reduction
in rate of
interest.

226. The following table gives the proportions per head of estimated population, of the gross and net debt, of the assets, and of the interest on the same paid and received in each year since Confederation:—

Proportions of
debt, assets
and interest
per head.

YEAR ENDED 30TH JUNE,	Gross Debt per Head.	Total Assets per Head.	Net Debt per Head.	Interest paid per Head.	Interest received p r Head.	Net Interest paid per Head.
	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.	\$ cts.
1868.....	28 74	6 27	22 47	1 33	0 04	1 29
1869.....	32 92	10 70	22 22	1 44	0 09	1 35

1887.....	56 03	9 41	46 62	1 98	0 20	1 78

NOTE.—Estimated population will be found on page 136.

Increase
in propor-
tion of
debt and
assets.

227. There was a decrease of 95 cents per head in the gross debt, and \$1.02 per head in the assets, and there was consequently a decrease of 13 cents in the gross interest paid per head, and of 27 cents per head in the amount of interest received on assets, but an increase in the net amount of interest per head of 15 cents, consequent on the reduction of assets previously mentioned. While the amount per head of the net debt was more than double what it was at Confederation, the net interest paid per head has only increased 38 per cent.

Fixed
charges.

228. The fixed charges, that is, the charges for debt, sinking fund and subsidies to provinces amounted in 1868 to 58 per cent. of the revenue; in 1887 they had been reduced to 44 per cent.; in 1886 they were 49 per cent. A large item among the liabilities that does not bear interest is the amount of Dominion notes in circulation; in 1867 they amounted only to \$3,113,700; on 30th June, 1887, to \$15,059,836: and on the 31st December, 1887, to \$15,702,101.

Dominion
notes.

The debt
created
solely for
public
improve-
ments.

229. From the foregoing pages it will be clearly seen that, with the exception of the debts allowed to provinces, which allowances were rendered more or less necessary by the conditions of Confederation, and which debts, it must be remembered, were themselves originally incurred for the purpose of public improvements, the whole of the public debt has been created by the construction of public works of great utility and national importance; the principal portion having been spent on railways and canals, facility of transport being the essence of progress, not only in a new but in any country, and these are the reasons that place the debts of Canada and other British colonies, whose debts have been contracted for similar purposes, on so entirely a different footing to those of European countries and the United States, the debts of which have accumulated solely by aggressive and defensive wars.

230. Notwithstanding the large debts that have been incurred by the Australasian Colonies and Canada, the credit of these countries is remarkable good, and their stocks are eagerly sought after in European markets, e. g., tenders for a Victorian Government four per cent. loan of £1,500,000, minimum price of issue £104 per cent., were opened on 10th January, 1888, and amounted to £3,466,500, at an average price of £103 13s. 10d., and that notwithstanding the fact that the public debt of Victoria was at the time \$146 per head of population, more than three times the amount of the net debt of Canada per head.

Victorian
loan 1888.

231. The following table gives particulars of the latest Canadian and Australasian loans offered in London, and will help to show the position of the credit of Canada in financial circles. It must, however, be remembered that there was a period of two years between the dates of the Canadian and Australasian loans, and there is sound reason for supposing that when this country applies for another loan the price realized will be considerably higher. The figures for the Australasian colonies are taken from "Wealth and Progress of New South Wales" by Mr. T. A. Coghlan, Government Statistician, p. 411:—

Canadian
and Aus-
tralasian
credit in
London.

Total.....		5,565,778,486	21 82	5 58

233. The total public debts of Great Britain and her possessions amount to \$5,565,778,486, of which Great Britain owes 64 per cent., India 15 per cent., the Australasian Colonies 13 per cent., and Canada 4 per cent. With the exception of the Australasian Colonies, the amount per head in the United Kingdom was higher than in any of her colonies, and with the exception of New Zealand and South Australia, the multiple of revenue was also the highest. At the time of Confederation five years and 6 months of the revenue would have been required to pay off the net debt of Canada, in 1887 it would have taken 6 years and 4 months.

234. The proportions of debt to population in the Australasian Colonies and also in Cape Colony are very large, but while, as in Canada, the whole amounts have been incurred in the construction of public works, by far the largest portion has been expended on railways, which in those colonies are almost altogether the property of the State, and there is consequently a very much larger revenue available for the payment of interest derived directly from the expenditure of loans, than there is in this country, where the money has been spent on works directly productive to the country, but only indirectly so to the State revenue. In proportion moreover to the wealth and general trade, more particularly of the Australasian Colonies, their populations are very scanty.

Expenditure on railways in Australia and Cape Colony.

235. It is doubtful whether the calculations as to the amount of debt per head of population really possess as much value as is generally ascribed to them; what may seem an enormous amount *per capita* for a country to carry, may be relatively a far smaller burden than a much reduced amount in another country, and, therefore, if possible, the debt of a country should be compared with its wealth and resources, which would afford a far more accurate, in fact,

Proportion of colonial debts to assets.

the most accurate idea possible; of its actual financial position, but unfortunately the wealth of a country can only be estimated approximately, and in no two cases can such an estimate be expected to agree, the absence of certainty therefore doing away with the value of such calculations. If the value of the enormous resources of the principal colonies could be put into figures, the present debts, large as they appear to be, would seem justified by the assets set against them, and it must be remembered that the development of natural wealth in this or any other country is absolutely impossible without an expenditure, more or less large, first being made, in order to provide the means of bringing that wealth within reach of its proper markets. Mr. Mulhall calculates that the debt of the United Kingdom is 8 per cent., of the Australasian Colonies 20 per cent. and of Canada $6\frac{1}{2}$ per cent. of the national wealth of each country respectively. If these figures are at all correct, Canada's position is a very favorable one.

236. That the *future prospects of England's principal colonies are well thought of in the financial markets of the world, the following quotations of prices of Colonial Government securities in London in March of the present year, will testify :—

New South Wales.....	4 per cent.	118
Canada.....	4 do	116
Victoria.....	4 do	114
Western Australia.....	4 do	114
Cape Colony.....	4 do	110
Queensland.....	4 do	108½
Natal.....	4 do	107
South Australia.....	4 do	108
Canada.....	3½ do	109
New South Wales.....	3½ do	108
New Zealand.....	4 do	104½

237. The public debts of some of the principal foreign countries are given below :—

238. The national debt of France is the largest in the world, and it is possible that it even exceeds the enormous total given above, as it is difficult to ascertain its exact

Debts of foreign countries.

amount. The debt of the German Empire is the Federal debt, alone, exclusive of the debts of the several States, which amount to \$1,813,623,148. Though the amount per head of debt is larger in France, the Netherlands and Portugal, yet the country of Peru is actually in a worse financial position than any other on the list; it would take more than 31 years of its revenue to pay off the debt, while it owes for unpaid interest the sum of \$87,054,155. Of European countries the least burdened with debt is Switzerland, as hardly 8 months of revenue would suffice to discharge its liabilities, it moreover possesses assets amounting to \$8,600,000. Persia is the only recognized country in the world which has no public debt. The debt of the United States was reduced \$74,291,065 during the fiscal year 1887, and if the cash in the Treasury on 1st July, 1887, be deducted, the amount of debt is reduced to \$1,218,338,031.

Debts of
the United
States.

239. In 1857 the debts of the several States forming the United States, exclusive of the public debt, and of all county, city and municipal debts, amounted to \$228,347,462, a sum larger than the whole net debt of Canada. In 1880 the combined net state, county and municipal debt of the several States and Territories amounted to \$1,056,584,146, and in addition to this, the several cities of the United States have debts amounting in the aggregate to about \$550,000,000. If the national debt is added to the above figures, a total liability is produced of \$3,307,356,094, being about \$55 per head of the present population, which amount however is, of course, not divided equally, but varies with the locality, some of the States having no debt at all. If the States debts alone are added to the national debt, the amount will be found to be about \$32 per head.

Provin-
cial debts.

240. The total debt of the Province of Quebec, including temporary loans, on 30th June, 1886, was \$19,068,023, with assets amounting to \$10,220,818, leaving a net debt of \$8,847,-

205; the debt of Nova Scotia, on 1st January, 1887, was \$823,000, with assets \$399,225; the debt of New Brunswick on 31st December, 1887, was \$1,991,700, with assets \$596,449; and the debt of British Columbia on the 30th June, 1886, was \$921,546, with assets \$743,011. The total net provincial debts therefore amounted to \$10,844,766. If this amount is added to the public debt, the amount per head of the total population will be \$48.85. No figures are at present available for determining either the county or municipal debts in Canada, or the debts of its several cities.

241. Under the provisions of the Civil Service Superannuation Act, 1883, retiring allowances are granted to such members of the Civil Service coming within the scope of the Act, who have served for not less than ten years and have attained the age of sixty years, or become in some manner incapacitated from properly performing their duties, or whose office may be abolished for the better promotion of efficiency or otherwise.

Superannuation.

242. These allowances are calculated on the average yearly salary received during the then last three years, as follow: for ten years but less than eleven years service an allowance of ten-fiftieths of such average salary; for eleven years but less than twelve years service an allowance of eleven-fiftieths, and a further allowance of one-fiftieth for each additional year of service up to 35 years, when the maximum allowance of thirty-five-fiftieths may be granted but no addition is made for any service over thirty-five years.

Calculation of allowances.

243. These provisions practically apply to all officers, clerks and employes of the Inside and Outside Civil Service, including those of the Senate, House of Commons and Library of Parliament.

To whom applicable.

244. As a provision towards making good the above allowances, a reduction is made of two per cent. per annum

Assessment of salaries.

on all salaries over \$600, and of one and a quarter per cent. on those under that amount.

Liability
to serve.

245. All persons under sixty years of age, in receipt of a superannuation allowance, and not mentally or bodily disabled, are liable to fill, if required, under pain of forfeiture of such allowance, any public position in any part of Canada, for which their previous services have rendered them eligible. No such position, however, is to be lower in rank or salary than the position retired from.

Gratu-
ties.

246. Provision is also made for the granting of gratuities in cases where an allowance has not been earned by duration of service.

Amount
paid in
1887.

247. The total amount paid out on account of superannuation allowances and gratuities in 1887 was \$202,285, and the following table shows the manner in which that sum was divided among the different departments and divisions:—

SUPERANNUATION ALLOWANCES AND GRATUITIES—1887.

DEPARTMENT.	Num- ber.	AMOUNT PAID DURING FISCAL YEAR.	
		Outside Service.	Inside Service.
		\$	\$
Department of Customs.....	143	49,542	3,809

Governor General's Secretary's Office.....	1	1,564
Library.....	2	1,680
	461	132,930	69,355

248. Pensions, which are of a different nature to superannuation allowances, are also granted in accordance with various Acts of Parliament to retired judges, and to a certain number of persons, or their widows and children, for military services. The total amount paid under this head in 1887 was \$102,109, being \$13,790 more than in the preceding year. Pensions.

CHAPTER IV.

TRADE AND COMMERCE.

249. The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon and the Imperial bushel. Weights and measures.

250. By Act of 42nd Vic., cap. 16, it was provided:—That in contracts for sale and delivery of any of the undermentioned articles the bushel should be determined by weighing, unless a bushel by measure be specially agreed upon, the weight equivalent to a bushel being as follows:— Measures by weight determined.

Wheat.....	60 lbs.	Castor beans.....	40 lbs.
Indian corn.....	56 "	Potatoes.....	60 "
Rye.....	56 "	Turnips.....	60 "
Peas.....	60 "	Carrots.....	60 "
Barley.....	48 "	Parsnips.....	60 "
Malt.....	36 "	Beets.....	60 "
Oats.....	34 "	Onions.....	60 "
Beans.....	60 "	Bituminous coal.....	70 "
Flax seed.....	50 "	Clover seed.....	60 "
Hemp.....	44 "	Timothy.....	48 "
Blue grass seed.....	14 "	Buckwheat.....	48 "

And by the same Act the British hundredweight of 112 pounds, and the ton of 2,240 pounds, were abolished, and the hundredweight was declared to be 100 pounds and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

Customs
valuations.

251. Customs valuations upon goods imported subject to *ad valorem* duties are made at the fair market value thereof, when sold for home consumption in the principal markets of the country whence they were exported. The values of goods subject to export duty are to be their actual cost, or the value which they truly have at the port and time of exportation.

Classification of imports and exports.

252. The classification of goods in the following table is the same as that adopted in this work for the first time last year, and has in the present issue been extended to exports, and the figures have been so arranged that the relative values of imports and exports of any article during the past two years can be seen at a glance.

The mode of classification is that in use in Victoria and other Australasian Colonies, the principle of which is that articles of a like nature shall be classed together. A copy of the tariff at present in force, certified to by the Department of Customs, will be found at the end of this book, together with an alphabetical index with reference numbers to the following table and to the tariff, so that the order in which any article is placed, and the duty (if any) payable thereon can be immediately found.

CLASSIFICATION OF IMPORTS AND EXPORTS.

CLASS I.—ART AND MECHANIC PRODUCTIONS.

Order 1. Books.	Order 8. Arms, ammunition, &c.
“ 2. Musical instruments.	“ 9. Machines, tools and imple- ments.
“ 3. Prints, pictures, &c.	“ 10. Carriages, harness, &c.
“ 4. Carving, figures, &c.	“ 11. Ships, boats, &c.

	77,756,704	7,494,610	85,251,314	80,960,909	8,554,902	89,515,811

253. The total value of imports and exports, and amount of duty collected in 1887, as compared with 1886, was as follows :—

	Imports.	Exports.	Duty Collected.
1886.....	\$104,424,561	\$85,251,314	\$19,448,123
1887.....	112,892,236	89,515,811	22,469,705

There was therefore an increase in the value of imports of \$8,467,675, and in the value of exports of \$4,264,497, making an increase in the total trade of \$12,732,172, while the increase in duty collected amounted to \$3,021,582. The above satisfactory showing justifies therefore the opinion expressed last year that the indications were that the depression of trade which had been prevalent during the past 4 years was passing away.

254. The value of the total trade is still considerably below the returns for 1882 and 1883, but the decline in values in many of the principal articles of merchandise has been so marked, that there is good reason to suppose that at former prices, the trade of 1887 would not have fallen far short of the highest point yet reached. That the decline in values has exceeded the decrease in the volume of trade to a considerable extent will be apparent on examining the following comparative statement of the quantities and values of the principal articles of food exported during the years of 1882 and 1887 respectively, from which it will be seen that with scarcely an exception the percentage of increase or decrease in value was respectively considerably smaller or larger than the corresponding percentage in quantities.

Imports and exports, 1886 and 1887, and increase in value.

Decrease in values and increase in quantities.

255. The following tables relating to the trade of the United Kingdom, furnish a good illustration of the decline in values but increase in quantities of late years. They were prepared by Mr. Giffen of the Imperial Board of Trade and are taken from the Board of Trade Journal, May, 1888. The figures they contain are very significant, and demonstrate in a marked manner the absolute importance of making allowance for prices when comparing statements of imports and exports. At the prices of 1873 the total imports would have been over 500 millions instead of 350 millions, and the exports 350 millions instead of 212½ millions. Thus it will be seen that "the real progress has been immense," "although, on the footing of declared values only, there" "would seem to be no progress at all."

*Average.

258. The value of imports has been exceeded six times, and the value of exports five times since Confederation, and in six years during the same period the total trade was also larger. The average value per head during the twenty years has been of imports \$25·88, of exports \$20·36, and of the total trade \$45·74, so that in 1887 imports were \$2·14,

Average
value of
imports
and ex-
ports.

exports \$2, and the total trade \$4.17 below the average. The amount of the total trade per head was considerably below that of several previous years, though the total aggregate trade was \$16,698,345 above the average.

Canadian
and American
trade compared

259. The amount of trade done by the United States is only exceeded by three countries in the world, and is therefore many times larger than the trade of Canada, but in proportion to population, the trade of the Dominion is considerably in advance of that of the United States as is shown by the following statement:—

FOREIGN TRADE OF CANADA AND THE UNITED STATES
PER CAPITA, 1887.

COUNTRY.	Imports.	Exports.	Total Trade.
	\$ cts.	» cts.	\$ cts.
Canada.....	23 16	18 36	41 52
United States.....	11 54	11 93	23 47
Excess per head in favour of Canada.....	11 62	6 43	18 05

Excess of
imports.

260. During the last twenty years, the exports have only once exceeded the imports, viz., in 1880, in every other year there having been an excess of imports. The average annual excess of imports has been \$20,285,558, therefore the excess in 1887 was \$3,090,867 above the average.

261. Whether a continual excess of imports is or is not prejudicial to the interests of a country, is a complex and much debated question. The imports into the United Kingdom have for many years largely exceeded the exports, yet that country is steadily augmenting its wealth. India, on the other hand, has had a large excess of exports for several years, and yet is by no means in a pros-

perous financial condition. The numerous financial transactions between England and her colonies also tend to increase the excess of imports, as Mr. Coghlan says*: "The loans raised in England do not come as coin but as merchandise, and form the greater part of the excess of imports over exports which is so marked a feature of these colonies."

262, The next table gives the value of imports, exports and duty collected, per head of population, and the value of goods entered for consumption, in each year since Confederation:—

Goods entered for consumption, duty collected, &c.

VALUE OF IMPORTS AND EXPORTS PER HEAD IN CANADA, AND DUTY COLLECTED; ALSO VALUE OF GOODS ENTERED FOR CONSUMPTION, 1868 TO 1887.

Articles on which export duty is collected, viz.:—Pine, oak and spruce logs and shingle and stave bolts.

*Wealth and Progress of New South Wales, p. 412.

Duty collected.

263. With one exception, viz., in 1883, the amount of duty was the largest ever collected, and was 155 per cent. larger than that collected in 1868, though the amount per head shows an increase only of 76 per cent. There was again a considerable increase in the duty collected on exports.

Comparative value of goods entered for consumption.

264. In goods entered for consumption there was an increase of \$6,036,734 over 1886, and of \$2,929,409 over 1885, which is a further confirmation of the general improvement in trade. The value per head of these imports in 1886 was \$20.77, and in 1887 \$21.67, an increase of 90 cents per head. The value of similar goods in the United States in 1887 was \$12.10 per head, being \$9.57 per head less than in Canada.

Summary of imports 1885, 1886 and 1887.

265. A comparative summary of the value of the principal articles imported in the last three years will be found in the following table, dutiable goods being distinguished from those admitted free:—

VALUE OF THE PRINCIPAL IMPORTS INTO CANADA, DUTIABLE AND FREE, DURING THE YEARS 1885, 1886 AND 1887.

ARTICLES.	VALUE OF IMPORTS.		
	1885.	1886.	1887.

Grand total.....	108,941,486	104,424,561	112,892,236

Increase
in duti-
able and
decrease
in free
goods.

266. There was an increase in the value of dutiable goods imported in 1887 of \$9,942,642 as compared with 1886, and of \$5,865,292 as compared with 1885, while there was a decrease in the value of free goods of \$1,474,967 as compared with the preceding year, which was due to the reduced importations of coin and bullion, there having been a decrease under this head of \$3,078,339.

Principal
increases
in duti-
able goods

267. Among dutiable articles the principal increases are found in imports of grain of all kinds, manufactures of copper, fancy goods, flax, hemp and jute and manufactures of the same, green and dried fruits, hats and bonnets, manufactures of iron and steel, jewellery, manufactures of paper, manufactures of silk, spirits and wines, sugars, watches and woollen manufactures, the increase under the latter head amounting to \$2,572,948. It is satisfactory to note the increases in fancy goods, hats and bonnets, jewellery, manufactures of silk, spirits and wines, watches, &c., these being articles that are more luxuries than necessities, and their increased importation indicates a greater margin out of the savings of the people for their purchase.

Principal
decreases.

268. The principal decreases among dutiable articles were in imports of books, flour and meal, manufactures of cotton (these imports have steadily decreased during the last five years), provisions, soap, tea and manufactures of wood.

Increases
and de-
creases
among
free goods.

269. Among free goods the principal increases were in lumber and timber, sawn, but not otherwise manufactured, animals for improvement of stock, fur skins not dressed, raw hides (there was a decrease in imports of manufactures of leather), and steel rails; and the principal decreases were in logs and unmanufactured timber, tobacco manufactured, coffee and tea and coin and bullion.

Goods en-
tered for
consump-

270. The following table gives the value of goods entered for consumption (dutiable being distinguished from free)

in each Province in 1887, and the amount of duty collected thereon :—

VALUE OF GOODS ENTERED FOR CONSUMPTION BY PROVINCES, 1887.

PROVINCES.	Dutiable Goods.	Free Goods.	Total.	Duty Collected.
	\$	\$	\$	\$
Ontario.....	32,678,815	9,992,604	42,671,419	8,003,391
Quebec.....	31,647,834	12,117,906	43,765,740	9,770,958
Nova Scotia.....	4,647,604	2,206,683	6,854,287	1,757,350
New Brunswick.....	3,912,604	1,740,417	5,653,021	1,346,768
Manitoba.....	1,678,177	334,006	2,012,183	508,947
British Columbia.....	3,065,791	560,348	3,626,139	883,421
Prince Edward Island.....	424,228	179,990	604,218	153,861
The Territories.....	65,626	386,795	452,421	13,609

271. The dutiable goods entered for consumption were \$7,461,860 in excess of the preceding year, while free goods similarly entered were less by \$1,425,126. The percentage of duty on goods entered for consumption was 21·24, being higher than in any year since Confederation, the next highest having been in 1881 viz., 20·19. The percentage of duty on the total value of imports was 19·87, being also the highest during the last 20 years.

272. The figures in the preceding table must only be taken as indicative of the channels by which goods enter the Dominion, and not as by any means representing the individual consumption of each Province. Quebec, containing the principal ports of entry by the St. Lawrence, and Ontario the principal ports of entry for goods from the United States, it is clear that a very large portion of the duty collected is really paid by the other Provinces, and it is probable that the largest portion of the duty collected in the Province of Quebec is actually paid by the Province of Ontario. The same remarks apply more or less equally well to exports, the Province of Prince Edward Island

tion by
Provinces.

Increase in
value and
percentage of
duty.

being now the only Province whose returns can be considered as applying almost exclusively to that Province.

Value of
exports
since Con-
federation

273. The next table is a statement of the value of the exports in every year since Confederation, distinguishing those of Canadian produce and manufacture in each class from the total foreign exports:—

EXPORTS FROM CANADA, DOMESTIC AND FOREIGN, 1868-1887.

YEAR.	DOMESTIC.				
	Produce of the Mine.	Produce of the Fisheries.	Produce of the Forest.	Animals and their Products.	Agricultural Products.
	\$	\$	\$	\$	\$

1887	3,079,972	644,361	3,002,458	8,549,333	89,515,811

274. Without reference to the intervening fluctuations in amount, the percentages of increase in the various classes of domestic exports in 1887 as compared with 1868 were as follows:—

Produce of the mine.....	163.0	per cent.
“ fisheries.....	104.7	“
“ forest.....	12.2	“
Animals and their products.....	251.0	“
Agricultural products.....	46.3	“
Manufactures.....	95.8	“

275. The increase in the value of domestic exports in 1887, was as follows:—Produce of the fisheries, \$32,422; animals and their products, \$2,181,504; agricultural products \$1,173,456; manufactures, \$255,835; miscellaneous articles, \$40,350; and in foreign exports, \$1,111,254. There was a

decrease in exports of produce of the mine and of the forest respectively of \$145,188 and \$549,865.

Exports of
Canadian
produce,
1867-1887.

276. The value of the exports of articles the produce or manufacture of Canada during the last twenty years, together with their value per head of population, and percentage of total exports, in each year, will be found in the following table:—

EXPORTS OF CANADIAN PRODUCE—1868-1887.

YEAR ENDED 30TH JUNE,	Total Value.	Value per Head.	Percentage of Total Exports.
	\$	\$ cts.	
1868	45,543,177	13 50	79·11

1886	74,975,506	15 61	87·94
1887	77,964,020	16 00	87·10

In three years, only since Confederation has the value of exports of Canadian produce in 1887 been exceeded, viz., in 1881, 1882 and 1883, and the percentage of total imports, though a trifle lower than in 1886, had only been exceeded in two years, viz., 1882 and 1886. The value per head, however, while 36 cents more than in 1886, was yet much lower than the value in many previous years.

Value and
quantities
of imports
and ex-
ports of
bread-
stuffs, 1867-
1887.

277. The following tables give the value of the imports for home consumption and of exports of home produce of wheat, flour and other breadstuffs in each year since Confederation, with the quantities of the same respectively:—

VALUE OF IMPORTS OF WHEAT, FLOUR, AND OTHER BREADSTUFFS,

* Not separated from other grain. † Rye included.

278. The very marked effect which the adoption of the National Policy, in 1879, had upon the imports of wheat and flour will be immediately apparent upon looking at the above tables. It will be seen that while the average importation of wheat in each year from 1868 to 1879 was \$5,480,735, in the period 1880 to 1886 it only averaged \$149,374 per annum, increasing the home market for wheat to the extent of \$5,331,361 annually. That amount of money was therefore expended in the country, which otherwise would have been paid away for imported wheat, and considering the universal depression of the agricultural industry, this result cannot but have been of benefit to the farming community.

Effect of the National Policy on the imports of wheat.

279. The total wheat crop of 1886 was about 37,731,275 bushels, and there were imported for home consumption in 1887 (reckoning five bushels of wheat to the barrel of flour) 3,213,918 bushels, making a total of 40,945,193 bushels. Of this quantity, there was exported of wheat and flour, 8,232,791 bushels, and at two bushels to the acre, 4,561,540 bushels were retained for seed, leaving 28,150,862 bushels available for consumption, being at the rate of 5.77 bushels per head of population. The consumption in the United States is said to be over six bushels per head, and estimating the consumption in the United Kingdom at 204,000,000 bushels, the amount per head in 1886 was 5.47 bushels.

Consumption of wheat per head in Canada.

280. "Such is the importance of the question of the price of wheat, that it partakes of the nature of a grave social problem, and it is therefore not surprising to find it always before us, and always being discussed in one form or another." So says M. François Bernard in an article on the world's wheat production*, and as, owing to the extreme decline in value of late years, this question

Importance of the question of the price of wheat.

*Royal Statistical Society's Journal, December, 1887.

has assumed more than ordinary prominence, it may not be out of place to attempt some explanation of the causes that have led to the fall, and of the reasons why it is unlikely that former prices will obtain again.

Average price of wheat, London and New York, 1871-1887.

281. During the week ended 1st October, 1887, the price of wheat in London was the lowest touched for 125 years, viz., 28s. 5d. per quarter, or 86 cents per bushel. And the steady fall of late years is shown in the following table which gives the average price of wheat in London, and the average export price in New York for 15 years from 1871:—

Reasons for the supremacy of the United States in the wheat market.

282. A series of bad harvests in Europe, commencing in 1872 and culminating in 1879, 1880 and 1881, during which years particularly the failure of the crop was for duration and extent without a parallel in the last four centuries, necessitated an unusually large demand for foreign supplies, and a coincident series of good seasons in the United States, together with the enormous area rapidly brought under cultivation for wheat (in 1870 the area of wheat was 18,992,591 acres, and in 1880, 37,986,717 acres, or almost exactly double the quantity), and the fact that there was

practically no competition, gave that country for a number of years the control of the European markets, and the price of wheat was regulated by the American supply. Farmers, therefore, in the United States, having a ready market at a good price for all the wheat they could raise, prospered accordingly. This state of things has, however, during the last six years, undergone a complete change, the American supremacy in the wheat market of the world is gone and may never return.

283. This change has been brought about by two great causes both being concurrent in their effect, these causes are : 1. Increase in the sources of supply. 2. Improvement in means of transport. First with reference to the increase in the sources of supply.

284. The United States still stand first in the list of wheat exporting countries, and in all probability must yet hold that position for some years. The area under wheat cultivation has not varied very much since 1880, remaining always about 37,000,000 acres, but the amount of production and export show greater fluctuations, as will be seen from the following figures :—

YEAR.	Area under Wheat Cultivation in United States.	Total Production.	Total Exported.
	Acres.	Bushels.	Bushels.
1880.....	37,986,717	498,549,868	144,483,007

Causes of
its decline

Production of
wheat in
the United
States.

Exports of wheat from United States to United Kingdom.

285. It is almost unnecessary to say that far the largest portion of the above exports went to the United Kingdom, and the next statement gives the amount in each year:—

EXPORTS OF WHEAT FROM THE UNITED STATES TO THE UNITED KINGDOM—1880-1887.

YEAR.	Amount Exported to the United Kingdom.
	Bushels.
1880.....	67,556,186
1881.....	67,355,844
1882.....	65,583,389
1883.....	48,773,687
1884.....	42,263,293
1885.....	45,309,324
1886.....	46,010,684
1887.....	48,800,000

Amount available for export in United States not likely to increase.

286. It is estimated that of the crop of 1887, the United States will have 104,000,000 bushels available for export. M. Bernard predicts that in twenty years the production will reach 550,000,000 bushels, and the annual export 137,000,000 bushels. But taking into consideration the rapidity with which the population is increasing, the small average yield, not exceeding at its best 13 bushels to the acre, the actual average for a number of years being about 12.4 bushels, and the fact that the area of land available for wheat cultivation is much nearer exhaustion than is generally supposed, while much of the land formerly raising good wheat, has been run down through reckless farming and will require many years of careful nursing to recover its fertility, the amount available for export is not likely to increase to any extent.

Export of wheat from India 1880-1887.

287. India now stands second in importance as a wheat growing country, and judged only by the rapid increase in

the quantity exported seems likely to be able soon to rival the United States, to whom she has already proved herself a formidable competitor. The following table gives the total quantities of wheat exported, and the quantities exported to the United Kingdom, from British India, in the years 1880 to 1887:—

EXPORTS OF WHEAT FROM INDIA - 1880-1887.

YEAR.	Total Exported.	Exported to United Kingdom.
	Bushels.	Bushels.
1880.....	13,896,168	6,027,560
1881.....	37,078,571	13,691,283
1882.....	26,402,893	15,793,874
1883.....	39,118,791	20,998,111
1884.....	29,550,741	14,897,551
1885.....	30,312,969	22,717,802
1886.....	41,558,250	20,578,038
1887.....		11,344,000

288. In 1886 the total area under wheat cultivation was 20,658,163 acres in British India, and about 7,000,000 acres belonging to the Native States. The average production varies very much, ranging from 21 bushels to 6 bushels per acre, the general average being about 13 bushels, the same as in the United States, the conditions of production, however, are very different, the price of labour in India being excessively cheap, the average wages of the agricultural labourer not being more than 6 cents per day, and the extension of the railway system and of the system of irrigation have both progressed so rapidly of late years that the question of Indian wheat taking the place of American wheat on the European markets has often been seriously discussed. But the total population of India is about 250,000,000, and the amount used for home consumption is at

Exports of
Indian
wheat not
likely to
increase
to any
extent.

present very small in proportion to population, and it is not unlikely that increased production will bring about increased home consumption, the supply in this case creating the demand, so that the amount available for export will necessarily be curtailed, and recent investigations have thrown so much more light on the matter, that there appears now to be no probability that the predictions will ever be realized of those who have said that the time will come when not a bushel of wheat will cross the Atlantic, and the European markets will be supplied entirely from the East. The total yield in 1878 was estimated at 280 million bushels, and in 1886-7, at 238,585,947 bushels, an actual decrease of 42 million bushels, while the exports increased from 11,896,580 bushels to 41,558,250 bushels. Sir James Laird, one of the Indian Famine Commissioners, said that "there had been no material increase either in acreage or product, but the surplus that had been pitted and preserved for famine years had been exported, owing to increased facilities for transportation." Supposing this to be really the case, and Sir James Laird's authority is of the very highest, it seems that if a famine should occur in India, and famines do occur in that country periodically, there will be no reserves of wheat to fall back on as in former years, and even if the home production is sufficient for the home consumption at such a time, the withdrawal of supplies from the European markets must have a disturbing effect, and a tendency to considerably increase prices. Under these circumstances it would appear as if the increase in the supply of Indian wheat had been largely overestimated, and the *London Times*, in a recent article on a report on the extent of wheat cultivation in India by Hon. J. R. Dodge, Statistician to the United States Department of Agriculture, in which he shows very conclusively, that the American farmer has no reason to be very seriously afraid of Indian competition, said that the report entirely demonstrated "that the popu-

“ lar notions regarding Indian wheat were utterly fallacious
“ and erroneous.”

289. It was at one time thought probable that Russia and Hungary would not only grow enough wheat to supply the European markets, but also the general markets of the world, but that idea is no longer entertained. The total wheat crop in Russia in 1886 was 172,000,000 bushels, and was estimated at 216,000,000 for 1887, and the following are the latest available figures of exports since 1880 :

EXPORT OF WHEAT FROM RUSSIA, 1880-1886.

YEAR.	Total Exported.	Exported to United Kingdom.
	Bushels.	Bushels.
1880.....	36,565,653	5,376,605
1881.....	48,972,597	7,553,745
1882.....	76,373,532	17,874,513
1883.....	83,777,096	24,913,956
1884.....	67,719,720	10,034,473
1885.....	91,754,000	22,354,535
1886.....	6,945,236

290. In this country, also, with its large and ever increasing population, it is probable that a larger demand for home consumption, which is also very small at present in proportion to population, will accompany increased production, and that the surplus for export will not assume any very large proportions. In the report on the Foreign Commerce of the United States, Mr. Switzler says (p. 30): “ Russia seems to be losing its hold as a source of wheat supply to the British market, while British India is making rapid strides, increasing its share of this very important trade.” The Statist, however (Supplement, 11th Feb., 1888), says: “ The shipments of Russia have only

Exports of wheat from Russia.

Russian exports of wheat likely to vary.

“lately become liberal, but the good yield is practically unquestioned, and there must still remain in that vast empire a large supply, which can come forward if prices in 1888 are good enough to draw it forth.”

Exports of
Australasian
wheat.

291. The Australasian colonies have undoubtedly a very important future before them as wheat exporting countries, though owing to bad harvests the amount exported has been comparatively small, but the climate is favourable, and the area available exceedingly large. The average yield appears to be about 14 bushels per acre, varying from 7.10 bushels in South Australia to 26.21 bushels in New Zealand*.

The export of wheat from the Australasian colonies has been as follows:—

QUANTITIES OF WHEAT EXPORTED FROM AUSTRALASIAN COLONIES, 1880-1886.

YEAR.	Total Exported.	Exported to United Kingdom.
	Bushels.	Bushels.
1880.....	13,999,415	7,926,569
1881.....	9,729,596	5,541,629
1882.....	8,506,904	4,620,237
1883.....	7,481,949	5,345,368
1884.....	19,466,921	9,503,596
1885.....	12,593,890	9,854,566
1886.....	2,462,763	1,378,905

The crop of 1887-88 is said to be 8,000,000 bushels in advance of that of the preceding year. Victoria, South Australia and New Zealand are at present the principal wheat exporting colonies.

Production of
wheat in
Canada.

292. Canada has the reputation of producing, in the Province of Manitoba, the finest wheat in the world; and there

* Victorian Year Book 1885-86, p. 499.

is probably no other country where soil and climate combined are more favourable to the growth of this cereal. The wheat exporting Provinces of the Dominion are Ontario and Manitoba and the North-West Territories. Wheat in all the other Provinces grows well, but the quantity raised is never likely to exceed that required for home consumption. Particulars of the yield in The Territories are not available, except for the census year 1885, when 67,256 acres were sown with wheat, and yielded 1,147,124 bushels, giving an average of 17 bushels per acre. In 1887 in Ontario the total acreage was 1,382,564, and the yield 20,075,728 bushels, being an average of 14 bushels to the acre; this however was, owing to the heat and drought, much below the average of the last six years, which was for fall wheat 20.2 bushels and for spring wheat 15.5 bushels. In Manitoba in 1887 the acreage was 432,134, the yield 12,351,724 bushels, and the average 27.7 bushels. The average yield for the period 1883-1887 was 19.4 bushels. The total crop in Canada in 1887 was probably about 37,000,000 bushels.

293. The following are the export figures of wheat from Canada since 1880, flour being reduced to wheat, at five bushels to the barrel :—

Exports of
Canadian
wheat.

QUANTITIES OF WHEAT EXPORTED FROM CANADA, 1880-1887.

YEAR.	Total Exported.	Exported to United Kingdom.
	Bushels.	Bushels.
1880.....	7,813,560	6,366,867
1881.....	4,722,313	4,209,998
1882.....	6,193,730	5,109,370
1883.....	8,312,688	6,675,896
1884.....	1,732,471	1,484,256
1885.....	2,959,841	2,409,041

1887.....	8,232,791	6,776,929

Future
probabilities
for
Canadian
wheat.

294. Almost the entire quantity exported goes to the United Kingdom, which is and probably always will be the best and nearest market. The area at present under wheat cultivation is only small, not amounting to 2,000,000 acres, but the area available is enormous, and with increased population and extended transport facilities the future of Canada as a wheat exporting country is very promising. In the article already alluded to, M. Bernard appears to have entirely overlooked Canada as one of the future sources of the wheat supply, thinking, it is presumed, that the quantity available for export, would always be too small to be worth much consideration, but it is believed that it will not be many years before the export of Canadian wheat becomes a very important item in the consideration of the world's supply.

Wheat in
the Argentinian
Republic.

295. The valley of the La Plata is also undoubtedly destined at some future time to produce an enormous quantity of wheat. M. Bernard predicts that in twenty years it will hold the position with reference to wheat, now occupied by the United States.

Imports of
wheat into
United
Kingdom
from principal
countries
1871-1886.

296. The following table, taken from the report of the Foreign Commerce of the United States, 1887, p. 33, shows the share of the principal countries in the import of wheat into the United Kingdom during the years 1871 to 1886 inclusive :—

TABLE SHOWING THE PROPORTIONATE QUANTITIES OF WHEAT IMPORTED INTO THE UNITED KINGDOM FROM THE PRINCIPAL WHEAT EXPORTING COUNTRIES, 1871-1886.

YEAR.	IMPORTED FROM							
	Russia.	Germany	British North America.	United States.	Chili.	British India.	Australia.	Other Countries.
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
1871	35.37	9.60	8.52	35.22	1.33	0.50	0.84	8.62

1873	18.78	5.85	8.36	42.17	3.56	1.43	4.05	15.80
1874	11.76	8.13	8.71	55.16	4.47	2.18	2.35	7.24
1875	17.06	11.11	6.83	44.29	1.51	2.24	2.13	14.83
1876	17.17	6.72	5.35	42.81	1.95	6.35	5.48	14.17
1877	17.33	11.03	5.14	37.16	1.28	9.62	0.71	17.73
1878	15.32	10.91	5.03	56.27	0.09	3.04	2.62	6.72
1879	11.12	6.52	7.33	61.12	2.04	1.22	3.15	7.50
1880	4.33	4.12	6.63	65.42	2.12	4.72	6.74	5.92
1881	5.75	4.34	4.49	64.05	1.64	10.29	4.64	4.80
1882	12.01	6.91	3.87	56.72	2.13	10.51	3.83	5.02
1883	15.91	6.25	2.87	47.57	2.72	13.30	3.30	8.08
1884	8.34	4.95	3.96	53.74	1.60	12.06	8.11	7.24
1885	14.86	4.61	2.58	47.90	2.00	14.98	6.69	6.38
1886	6.03	3.43	6.20	58.05	2.74	17.75	1.31	4.49

277. Some idea can be formed from the foregoing remarks of the great changes that have taken place in the last few years in the sources of the wheat supply of the world, and of the still greater changes it is both possible and probable will take place in the course of the next twenty years. It will be seen that wheat is being raised in ever increasing quantity in countries that at one time were not only thought incapable of growing it, but were thought to be too far away from the principal countries of demand, ever to make the exportation of wheat possible at any reasonable cost; but, coming now to the second reason for the fall in price, such have been the scientific discoveries, and such the improvements in and extension of means of transport and consequent reduction in cost of freight, that the products of India and Australia and the far west of America

Changes in the source of supply.

can be placed on the European markets at a cost enabling them successfully to compete with the productions of even the nearest sources of supply.

Extract
from
speech of
Sir Lyon
Playfair.

298. Sir Lyon Playfair, speaking at Leeds in December, 1837, said: "If our landlords and farmers want to know the names of the three persons who have knocked out the bottom of our old agricultural system, I can tell them. Their names are Wheatstone, Sir Henry Bessemer, and Dr. Joule. The first, by telegraphy, has changed the whole system by which exchanges are made; the second, by his improvements in steel, has altered profoundly the transportation of commodities by sea and by land; and the third, by his discoveries of the mechanical equivalent of heat, has led to great economy of coal in compound engines. By these changes the United States, Canada, India and Russia have their corn crops brought to our doors."

Decrease
in freight
rates.

299. Not many years ago the freight from New York to Liverpool was from 12 cents to 15 cents a bushel, while now it is from 5 cents to 7 cents, and owing to extreme competition the inland freights have undergone even greater reduction; and similar reductions have taken place all over the world. "The effect of these changes has been to destroy local markets and to consolidate all into one market—the world.*" "The actual wheat market is universal, the prices of this commodity are governed by the supply, and the international requirements, and it is to the development of the ways of communication that this phenomenon is attributable.†" It would seem therefore that it is no longer possible for any one country to control the supply, and therefore the markets, as was the case formerly, but that that country which can furnish the cheapest labour,

* Sir Lyon Playfair. † M. François Bernard.

and the fastest and cheapest facilities of transport, will obtain the largest share of the world's purchases; and as scientific discoveries are perpetually being made which tend to shorten time and space between the producer and consumer, it would seem inevitable that the price of wheat must fall in harmony. If farmers would realise that wheat will never again obtain its former prices (excepting of course any special combination of a failure of crop and a general war, or some such other untoward circumstances) and never again be the profitable crop that it was, and would turn their attention to mixed farming on scientific principles, they would probably not feel so keenly the present agricultural depression.

The price of wheat not likely to rise.

300. The following table gives the estimated wheat crop of the world, 1887* :—

* Supplement to the Statist, February, 1888.

Imports of wheat into the United Kingdom 1887.

302. The total imports of wheat into the United Kingdom in the calendar year 1887 were 149,272,776 bushels, the value of which was 151½ million dollars, and if paid for at the same rate as twenty years ago the value would have been 273 million dollars.

Imports and exports of Canada by countries 1887.

303. The next table gives the imports from and exports of Canada to the United Kingdom, other British Possessions and Foreign Countries during the year 1887, with the percentage of the total amount in each case :—

IMPORTS AND EXPORTS OF CANADA BY COUNTRIES, 1887.

*Includes Danish, French and Spanish West Indies.

304. The imports from Great Britain exceeded the exports thereto by \$595,194, and the imports to the United States were in excess of the exports by \$13,346,124. The trade with the United Kingdom showed a marked increase as compared with that of 1886, and formed the largest proportion of the total trade, viz., 44.33 per cent., the proportion of the United States trade being slightly less, viz., 43.80—the two forming 88 per cent. of the whole trade, a smaller proportion than in 1886. According to Canadian figures,

Trade with United Kingdom and United States.

the trade with the United States formed 6·30 per cent. of their total trade, and according to American official figures, 5·49 per cent. of their total imports were exports from British North America (including Newfoundland), and 4·76 per cent. of their exports were imports into the same. There is, however, and probably there always will be, a large discrepancy between the two sets of figures, owing to the carelessness in valuation of exports on both sides of the line.

The ex-
port trade.

305. Almost all the exports went to the United Kingdom and United States, the proportion of the whole being 91·86 per cent.; of the remainder, 4·58 per cent. went to Newfoundland, South America and British West Indies. The exports to exceeded the imports from six countries only, viz., British West Indies, Newfoundland, Portugal, Norway and Sweden, Australasia and Denmark. The imports from British Possessions were \$47,052,596, and the exports to the same \$48,018,656, being an excess of exports of \$966,060, and forming altogether 46·97 per cent. of the total trade as compared with 46·20 per cent. in 1886.

Imports
from for-
eign coun-
tries 1886
and 1887.

306. The next table is a comparative statement of the imports from foreign countries in 1886 and 1887 :—

307. There was an increase in the value of imports from every country in the list, with the exception of six, the largest increase being from the United Kingdom, viz., \$4,577,540. The imports from France have shown a steady increase for some years, and those from Germany have also very largely increased. The increase from Australasia was proportionately very large, and far exceeded the business of any previous year. The largest decrease was from the British West Indies.

Increase
in imports
in 1887.

Exports to
foreign
countries
1886 and
1887.

308. A similar comparative statement of exports will be found below :—

Increases
and de-
creases in
exports.

309. There was a decrease in value of exports to ten countries, the largest being to France. Ninety-six per cent. of the total increase was in exports to the United Kingdom and United States, the largest portion of the remainder being to Belgium, Germany and South America. The total increase was 5.00 per cent. as compared with a decrease of 4.46 per cent. in 1886.

310. The following table gives the imports and exports of the United Kingdom and her possessions for the year 1886, together with the amount per head in each case. The figures have all been taken from official sources, and the calculations made in this office :—

Value of diamonds exported from the Cape of Good Hope.

311. With the exception of the United Kingdom and India, the aggregate trade of Canada is larger than any other British Colony; but in proportion to population the trade of the Australasian Colonies is far in advance of that of any other British possession. The value of diamonds exported through the post office is not included in the exports of the Cape of Good Hope, but their value is shown in the following statement which gives the value of diamonds passed through the Kimberley Post Office since 1876, by which some idea can be obtained of the richness of the fields. The figures are official:—

1876.....	\$ 8,796,656	1882.....	\$19,430,177
1877.....	10,280,478	1883.....	13,246,347
1878.....	13,007,354	1884.....	13,662,139
1879.....	13,853,604	1885.....	12,116,340
1880.....	16,390,432	1886.....	17,056,479
1881.....	20,324,183		
		Total.....	<u>\$158,264,189</u>

Value of total trade of British Possessions.

312. The value of the total trade of the United Kingdom and her possessions was \$4,864,405,038, as compared with \$5,029,337,410 in 1885, being a decrease of \$164,932,372, of which amount \$115,693,645 was due to the decline in the trade of the United Kingdom. The total imports exceeded the total exports by \$432,367,074, the excess of imports into the United Kingdom having amounted to \$395,156,081.

Excess of imports and exports respectively in British Possessions.

313. The following is a list of British Possessions in which imports and exports were respectively in excess in 1886:—

Imports exceeded Exports in

United Kingdom.	Jamaica.
Straits Settlements.	Windward Islands.
Ceylon.	New South Wales.
Natal.	Victoria.
Cape of Good Hope.	South Australia.
St. Helena.	Western Australia.
Canada.	Queensland.
Newfoundland.	Tasmania.
Bermudas.	New Zealand.
Bahamas.	

Exports exceeded Imports in

India.	British Guiana.
Mauritius.	Turk's Island.
Lagos.	Leeward Islands.
Gold Coast.	Trinidad.
Sierra Leone.	Fiji.
Gambia.	Falkland Islands.
Honduras.	

314. The total value and the value per head of the imports and exports of some of the principal foreign countries in the latest available years are given in the following table. The figures have been taken from official sources, and the calculations made in this office :—

Imports and exports of foreign countries.

IMPORTS AND EXPORTS OF FOREIGN COUNTRIES.

* Including Merchandise, Specie and Bullion.

Aggregate
trade of
principal
countries.

315. The total trade of the United Kingdom is the largest in the world, Germany and France taking second and third places; and the following is the order in which the principal countries doing the largest trade stand, with the amount of that trade in each case:—

United Kingdom.....	\$3,126,541,547
Germany.....	1,643,773,532
France.....	1,507,913,600
United States.....	1,504,671,460
Netherlands.....	815,609,955
Italy.....	783,049,400
India.....	759,799,631

Value of
trade per
head in
various
countries.

316. In proportion to population the largest trade among foreign countries is done by the Netherlands, the amount per head being considerably larger than that of any other country, the countries next in order being Switzerland, Belgium and Uruguay; but with the exception of the Netherlands, the per capita value of the trade in the Australasian Colonies is higher than elsewhere. Exports exceeded imports in Russia, Spain, Austria, Hungary, Greece, Japan, Egypt, Chili, Mexico and Brazil.

Exports of
the United
States.

317. The United Kingdom takes the largest share of the exports of the United States: in 1860 the proportion was 52·50 per cent, and in 1887 51·65 per cent.; in the latter year 7·80 per cent. went to other British Possessions, making a total export to British Possessions of 59·45 per cent. In return for this, however, the States only imported 23·84 per cent. from the United Kingdom in 1887 as compared with 39·17 per cent. in 1860, and 10·75 per cent. from other British Possessions as compared with 10·84 per cent. in 1860, so that while the imports from other British Possessions are about the same in the two years, the imports from the United Kingdom show a decrease of 15·23 per cent. since 1860.

318. Considerable interest having been taken in the tables that were given last year respecting the trade between Great Britain and her Possessions, they have been repeated in this issue, the figures of a later year having been substituted for those of a former one. In 1886 the exports from Great Britain to foreign countries were \$908,116,623, and to British Possessions \$399,396,194, being a somewhat lower proportion than in preceding years, as the following figures show :—

Trade of Great Britain with her Possessions.

Exports.

PROPORTION OF EXPORTS TO BRITISH POSSESSIONS TO TOTAL EXPORTS FROM THE UNITED KINGDOM.

1871.....	19.59 per cent.
1875.....	27.22 “
1880.....	28.46 “
1884.....	29.83 “
1885.....	31.47 “
1886.....	30.55 “

In proportion to population the exports to British Possessions are much larger than to foreign countries, having been in 1886 \$1.92 and 92 cents per head respectively.

319. The following is a comparative statement of the imports into British Possessions during the years 1885 and 1886, showing in each year the amount and proportion per head that came from Great Britain and other countries respectively :—

Imports into British Possessions.

Imports into British Possessions from Great Britain and foreign countries compared.

320. The total amount imported from Great Britain was \$26,559,954 less than in 1885, and the proportion to the total imports was also less, being 52·00 per cent. as compared with 53·85 per cent. in the preceding year. The excess of imports from Great Britain over imports from other countries has been as follows in the years named, viz., in 1884 \$72,371,510, in 1885 \$74,073,065, and in 1886, \$36,833,675, showing a very considerable falling off in the last year. The imports from Great Britain exceeded those from other countries in eleven colonies, the largest importers being India, New South Wales, Victoria and Canada in the order named. The Straits Settlements only imported \$15,379,746 from Great Britain, and \$82,692,166 from other countries.

Proportion of imports from British Possessions into Great Britain to total imports.

321. The proportion of imports from British Possessions to the total imports into the United Kingdom has remained much about the same for a number of years, as shown by the following figures, though the larger proportion in 1886 may be an indication of a tendency to increase :—

PROPORTION OF IMPORTS FROM BRITISH POSSESSIONS TO TOTAL IMPORTS INTO THE UNITED KINGDOM.

1871	22·03 per cent.
1875	22·57 “
1880	22·50 “
1884	24·56 “
1885	22·75 “
1886	23·40 “

But the proportion of exports to Great Britain to the total Colonial exports has steadily decreased during the same period :—

Similar proportion of exports.

PROPORTION OF EXPORTS TO THE UNITED KINGDOM TO THE TOTAL EXPORTS FROM BRITISH POSSESSIONS.

1871	50·45 per cent.
1875	49·47 “
1880	46·46 “
1884	43·33 “
1885	42·84 “
1886	41·54 “

322. The total foreign trade of British Possessions has increased very largely since 1871, but, as will be seen from the following figures, the trade with foreign countries has increased in a greater ratio than that with the United Kingdom:—

Similar proportion of total trade.

PROPORTION OF THE TRADE WITH THE UNITED KINGDOM TO THE TOTAL FOREIGN TRADE OF BRITISH POSSESSIONS.

1871	51·41 per cent.
1875	52·33 “
1880	49·36 “
1884	46·72 “
1885	48·44 “
1886	45·31 “

323. The following table, taken from Mulhall's "Fifty Years of National Progress," p. 30, shows the distribution of the trade of the United Kingdom at various dates, and shows also that the trade with India and the Colonies has increased in a very much greater degree than that with foreign countries:—

Distribution of the trade of the United Kingdom 1840-1885.

DISTRIBUTION OF THE TRADE OF THE UNITED KINGDOM, 1840-1885.

CHAPTER V.

POST OFFICE AND TELEGRAPHS.

Transfer
of Post
Office to
Colonial
Govern-
ments.

325. By an Act of the Imperial Parliament, 12-13 Vic., chap. 66, the management of the Postal systems in the Colonies of British North America was transferred to the various Provincial authorities, and up to the time of Confederation each Province controlled its own system, under its own laws and regulations.

Post Office
Act 1868.

326. After Confederation, these various laws were allowed to remain in force until the 1st April, 1868, when the Post Office Act, 31 Vic., chap. 10, came into effect, establishing uniform rates and regulations for the Dominion.

Postal
agree-
ment with
United
States.

327. In 1875 an agreement was made with the United States, by which a common rate of postage between the two countries was adopted, each country retaining all money collected, and no accounts being kept between the two post offices in regard to International correspondence.

Admis-
sion of
Canada
into Postal
Union.

328. At the Second Congress of the General Postal Union, held at Paris in May 1878, Canada was admitted a member from the following 1st July, and letters, newspapers and other printed matter, samples and patterns, became subject to uniform postage rates and regulations for all places in Europe, and for all other countries that were members of the Union. The existing postal arrangements with the United States were allowed to remain undisturbed, being of a more liberal and advantageous character than the ordinary regulations of the treaty.

Forma-
tion of
Postal
Union.

329. The Universal Postal Union was formed at a meeting held at Berne in 1874, and the first treaty was signed on 9th October in that year; the countries represented being the

several countries of Europe, the United States and Egypt. The object of the Union was to form all the countries of the world into one single postal territory, and to establish, as far as possible, uniform reduced rates of postage, and also to further the interchange of correspondence, by arranging that every country should be bound to convey the mails of other countries by its land or sea services at the lowest possible rates.

330. At the meeting in 1878 the regulations were revised, and embodied in a Convention which came into force on 1st April, 1879. The Third Congress was held at Lisbon, in February, 1885, and Canada was represented by the delegates of the British Post Office. No material change was made in the Convention of 1879.

Meetings
of Postal
Union.

331. All the States of Europe and America, some countries of Asia and Africa, and all the British Colonies and Possessions, except the Australasian Colonies and South Africa, are now included in the Union.

Countries
that have
joined it.

332. A new agreement between the United States and Canada was signed at Washington on 12th January, 1888, to come into effect on the following 1st March and to supersede the agreement of February, 1875. The principal change in the agreement was the establishment of a parcel post between the two countries, subject to certain regulations for the protection of Customs with respect to articles liable for duty. All the principal provisions of the agreement of 1875 were retained.

New
Postal
agreement
with
the United
States.

333. The following table gives the number of post offices in the Dominion, and the estimated number and number per head of letters and post cards sent in each year, from 1st July, 1867, to 30th June, 1887:—

Number
of letters,

*Including post cards.

Increase
in number
of letters,
&c.

334. During the past year 239 new offices were opened, and the total number of post offices is now more than double the number at Confederation, there having been an increase of 3,896. The increase in the number of letters sent, as compared with 1886, was : Registered letters, 160,000 ; and ordinary letters, 3,290,000 ; making a total increase of letters posted of 3,300,000, being 700,000 more than the increase of 1886 over 1885. The total number of letters sent in 1886, was 56,200,000 more than was sent in the first year of Confederation, being over three times as many. The number of letters sent per head of estimated population was, according to the above figures, a little over 15. Post cards, which were first issued in 1871 have now reached the large total

of 16,356,000, the increase over 1886 being 1,247,000 as compared with an increase of 1,309,000 in 1886 over 1885. There was a decrease of 150,000 in the number of free letters sent.

335. The next table gives the number of newspapers, books, periodicals and parcels sent during the same period :—

Number
of news-
papers,
&c., 1867-
1887.

NEWSPAPERS, PERIODICALS, BOOKS, CIRCULARS, PARCELS, &c.,
1868 TO 1887.

YEAR ENDED 30TH JUNE,	Newspapers and Periodicals posted otherwise than from Office of Pub- lication.	Newspapers and Periodicals posted from Office of Pub- lication.	Books, Circulars, Samples and Patterns, &c.	Parcels.	Total.	Number per Head.

Postal
rates on
news-
papers.

336. In the figures in the first column for the years 1868 to 1877 inclusive, are included all newspapers and periodicals sent by mail, whether from the office of publication or otherwise. In 1877 a change was made in the regulations, and all newspapers, periodicals, &c., sent from the office of publication were carried at the rate of 1 cent per lb., and the number carried has, since that date, been estimated in the above table at nine newspapers to one pound. By an Act that came into operation on the 1st June, 1882, all such newspapers were entirely exempted from postage, and have since been carried free of charge, and as no attempt is now made to ascertain the number so carried, the figures given for the years 1883 to 1887, inclusive, can only be considered as approximate. The increase in the number of books, circulars, &c., carried in 1887, as compared with the previous year, was very large, amounting to no less than 4,860,000.

Proportion of
post offices
to area.

337. In proportion to area the post offices are distributed as follows:—

Prince Edward Island.....	1 post office to	7 sq. miles.
Nova Scotia.....	1 “	16 “
New Brunswick.....	1 “	26 “
Ontario.....	1 “	63 “
Quebec.....	1 “	138 “
Manitoba.....	1 “	183 “
British Columbia.....	1 “	2,917 “
The Territories.....	1 “	6,296 “

Number
of letters,
&c., by
Provinces
1883-1887.

338. The number of letters and post cards sent in the several Provinces during the last five years, as estimated in the official reports, are given below:—

ESTIMATED NUMBER OF LETTERS AND POST CARDS, BY PROVINCES, 1883 TO 1887.

	1887	463	264,000	150,000	4,200,000	380,000	19-05

339. The number of letters per head slightly increased in each Province, with the exception of Manitoba and the

Estimated increase and decrease.

Territories in which there was an apparent decrease of more than two letters per head, though the actual number of letters sent was larger. This is owing to the census population used in the calculation in 1887 being less than the estimated population used in former years. The increases in the other Provinces were small, in no case amounting to as much as one letter per head. The largest number of letters both numerically and proportionately were sent in Ontario, and with the exception of Prince Edward Island fewer letters were sent proportionately in Quebec than anywhere else. The above figures however, are, as will readily be seen, only estimated on averages, and can only be taken as giving a very approximate idea of the distribution of correspondence in this country.

Postal
revenue
and ex-
penditure
1867-1887.

340. The following table gives the postal revenue and expenditure for every year, since Confederation, and the proportion each year per head of population :—

POSTAL REVENUE AND EXPENDITURE OF CANADA FROM
1868 TO 1887.

YEAR ENDED 30TH JUNE,	Revenue.	Expendi- ture.	Expenditure in excess of Revenue.	AMOUNT PER HEAD.	
				Reve- nue.	Expen- diture.
	\$	\$	\$	\$ cts.	\$ cts.
1868.....	1,024,710	1,053,570	28,859	0 30	0 31

1887.....	2,603,255	3,457,100	854,845	0 53	0 71

341. The expenditure has exceeded the revenue continuously during the last 20 years, and with the exception of 1886, the excess in 1887 was the largest during the period. The revenue, however, showed a satisfactory increase of \$133,876, being double the increase of last year. When the long distances that have to be covered in this country are considered, as well as the comparatively scanty population of many parts of it, particularly in the North-West Territories and British Columbia, it will easily be understood that it must be some time yet before the revenue can either balance or exceed the expenditure. The successful development of the country has required and will for some years require continual additions to and extensions of the postal system, and in order to provide postal facilities *pari passu* with the progress of settlement, it is from time to time necessary to establish offices; the expenditure for which must for a number of years be in excess of the revenue derived therefrom. The Postal Service, however, is managed on sound, economical principles, and the importance of carrying out the principle of providing every part of the country with postal communication is so well recognized, that exception is seldom or ever taken to these deficits, it being well understood that as the population increases and the country progresses, it cannot be very long before this service is at least self-sustaining, the revenue from the older and wealthier Provinces covering the excess of expenditure in newer districts.

342. As confirmatory evidence of the foregoing it will be found that whereas the expenditure in 1887 increased 2.30 per cent., the revenue increased 5.42 per cent., or 92 per cent. more than the expenditure. The Postmaster General in his report says: "From present indications it may be reasonably estimated that this process of reduction in the annual deficit will be maintained in the amounts of postal

Reasons

of revenue
propor-
tionately
larger
than that
of expend-
iture.

“revenue and expenditure for the current year,” and it is mentioned that the issue of postage stamps for the first six months of the present year exceeded the issue of the same for the corresponding period of last year by \$102,868.

Postal
operations
1867-1887.

343. The following comparative statement, shows not only the extended operations, but also the increased efficiency of the service since 1868, inasmuch as a much larger quantity of mail matter is carried at same expense :—

POSTAL OPERATIONS IN CANADA COMPARED, 1868 AND 1887.

YEAR.	Number of Offices.	Number of Money Order Offices.	Miles of Post Route.	Miles Travelled.	Amount paid for conveyance of Mails.	Number of Letters, &c.	Number of Newspapers, &c.	Total Cost per Head.
					\$			\$ cts.
1868.....	3,638	515	27,674	10,622,216	543,109	18,100,000	18,884,800	0 31
1887.....	7,534	933	54,786	24,324,217	1,654,703	90,656,000	85,066,326	0 71

Cost of
transmission
1867-
1887.

344. In 1868 the conveyance of mails over 10,622,216 miles cost per mile $5\frac{1}{10}$ cents, and the transmission of 36,984,800 letters, newspapers, &c., cost $1\frac{4}{10}$ cents apiece; in 1887 the conveyance of mails over 24,324,217 miles cost $6\frac{8}{10}$ cents per mile, and the transmission of 175,722,326 letters, newspapers, &c., $\frac{9}{10}$ of 1 cent apiece, so that there is a decrease in the cost of each article carried of $\frac{1}{2}$ of 1 cent; and it must not be overlooked that, if newspapers were carried now at the old rate of 1 cent per lb., between \$50,000 and \$60,000 would be added to the revenue each year.

Revenue
from postage
stamps.

345. Almost the whole of the revenue is derived from the sale of postage stamps, the sum of \$2,577,714 having been

realized from this source in 1887, an increase of \$157,509 over 1883. The total number issued to postmasters during the year was 118,349,660.

346. The increase in expenditure in consequence of increased mail service was principally— Increase in expenditure.

Mail service.....	\$150,127
Salaries.	150,103
	\$300,230
	\$300,230

347. The system of free delivery of letters by carriers in the principal cities was commenced in 1875, and it was estimated that the total number delivered in this manner in 1887 was: letters, 27,489,124, and newspapers, 9,514,164. The number of carriers employed was 269. Free delivery.

348. The next table gives the postal revenue and expenditure in each Province, since 1883:— Postal revenue and expenditure by Provinces 1867-1887.

POSTAL REVENUE AND EXPENDITURE OF CANADA, BY

	1887	151,658	286,555	134,897	0 69	1 30

It appears that 56 per cent. of the total revenue was derived from the Province of Ontario, and 47 per cent. of the expen-

diture was paid out in that Province. There was a decrease in the excess of expenditure over revenue in all the Provinces, with the exception of British Columbia, Manitoba and the Territories, and as would naturally be expected, the expenditure in the last named places was in proportion to revenue and population much heavier than elsewhere. The revenue and expenditure in Ontario more nearly equalize than anywhere else, and this Province will soon make its postal service pay for itself.

349. The following are statements of the number of registered letters in each year since 1868, with particulars of their disposal since 1879 :—

Number of registered letters 1867-1887.

Registered
letters
that mis-
carried.

350. There was an increase in the number of registered letters of 160,000, and in the number that miscarried of six. Only one in every 21,446 letters registered failed to reach its destination, and the proportion would be much larger if those that failed owing to accidents beyond the control of any system of registration were deducted, quite a number having been destroyed by fire or other accidents while under conveyance, and of 34 only was the miscarriage traced to negligence on the part of post office officials, by whom in each case the amounts lost were made good.

Number
of letters
sent to the
Dead Letter
Office
1867-1887.

351. The numbers of letters and other articles sent to the Dead Letter Office in each year, since Confederation, are given below :—

LETTERS, POST CARDS, CIRCULARS, BOOKS, PARCELS, &c.,
RECEIVED AT THE DEAD LETTER OFFICE IN CANADA
DURING THE YEARS 1868 TO 1887.

YEAR.	Total Number.	HOW DISPOSED OF.						
		Returned to other Countries.	Delivered or For warded to Ad- dress.	Returned to Writers.	Remain- ing in Office or with Post- master.	Failed of delivery, con- tained no value, des- troyed.	Returned to printed Address	Returned to Government Depart- ment.

352. There was an increase of 80,258 in the number of letters sent to the Dead Letter Office in 1887. The number fluctuates, but it is only natural that it should increase as the total number of letters increases. Of the total number sent to the office 193 failed of delivery, and were destroyed, being found to contain nothing of value. A large number of letters contained money, either in cash, or as cheques, notes, drafts, bonds, &c., to the amount of \$349,962. The number of letters sent to the Dead Letter Office in the United States in 1887 was 5,578,965

Dead Letters that failed of delivery.

That contained money.

353. The following statement shows the general operations of the money order system, year by year, from 1st July, 1867, to 30th June, 1887. It will be seen that there has been a steady and satisfactory increase:—

Operations of the money order system 1867-1887.

OPERATIONS OF THE MONEY ORDER SYSTEM IN CANADA,
1868 TO 1887.

YEAR ENDED 30TH JUNE,	Number of Offices.	Number of Orders Issued.	Amount of Orders Issued.	Amount of Orders issued in other Countries, payable in Canada.	Losses sustained.
			\$	\$	\$

1887.....	933	574,899	10,328,984	1,495,674	1,179

Increase
in number
and de-
crease in
average
amount.

354. There was an increase in the number of orders sent of 45,441, being 15,226 more than the increase in 1886, and there was also an increase in the amount sent of \$97,795, but the average value of each order has been still further reduced. In 1868 it was \$37.18; in 1885, \$20.79; in 1886, \$19.32; and in 1887, \$17.96. It may be argued from this, that as the country progresses and banking facilities increase for the business and wealthier classes, the money order system is used almost entirely by the working classes, who keep no banking accounts, and the large increase in the volume of business done is a significant sign of the improved condition of the people.

Money
order
offices by
Provinces.

355. The number of money order offices in operation increased by 23; they are distributed among the Provinces in the following order:—

Ontario.....	502	British Columbia.....	21
Quebec.....	146	Manitoba.....	17
Nova Scotia.....	134	The Territories.....	11
New Brunswick.....	93	Prince Edward Island.....	9

Excess of
revenue.

356. The revenue from fees, profit on exchange, &c., amounted to \$79,326, and the expenditure for salaries, &c., in connection with the system to \$76,845, being an excess of revenue of \$2,481.

Orders
payable in
Canada
and else-
where.

Of the total amount of orders issued in Canada, \$8,093,887 were payable in Canada, and \$2,235,097 were payable in other countries, being a decrease in the first amount of \$52,208, and an increase in the second amount of \$150,004; and of the total transactions with other countries \$2,235,097 were sent out of the country, and \$1,495,673 came in.

357. The large increase in the amount of losses sustained was caused by the absconding of a clerk in the Winnipeg money order office, the loss incurred thereby amounting to \$902; of the remainder \$239 were stolen from various post offices, and \$35 were lost in transmission.

MONEY ORDER TRANSACTIONS BETWEEN THE DOMINION AND OTHER COUNTRIES, 1867 TO 1887.

1887	837,146	304,115	1,262,381	1,096,363	11,997	42,114	123,568	53,051

* Including all those British Possessions and a few foreign countries between which and Canada there is not a direct money order exchange.

From the above table it is seen that the principal money order business with other countries is transacted with the United States, the United Kingdom, and Newfoundland. Since the year 1876, inclusive, the amount of money sent by this system to the United Kingdom has exceeded the amount payable in Canada, by \$4,448,122; during the same period, however, the amount sent to the States has only exceeded the amount received by \$114,915; while the amount received from Newfoundland has exceeded that sent to the Island by \$231,184.

Money order business with Italy.

358. The sum of \$102,855 has been sent by this means to Italy during the last three years, being considerably more than that sent to any other country. This is accounted for by the large number of Italian workmen that have been employed in this country, particularly in railway construction. Money orders are now issued in Canada on almost all British possessions, and on the principal foreign countries, either directly, or through London, England.

Ocean mail service.

359. The sum of \$126,533 was paid as a subsidy to the Montreal Ocean Steamship Company (Allan Line) for the twelve months ending 31st March, 1887, for the conveyance of mails to and from the United Kingdom. This mail service has been performed by this company continuously since May, 1856, until the close of 1885, since which time the "Vancouver" and "Oregon" of the Dominion Steamship Company have assisted in the service, about one passage in three being made by one of these vessels. In the first year of service, viz., 1856, the average passage westward was 12 days 20½ hours, and eastward 11 days 2 hours.

Suggested fast service.

360. As the contract for the conveyance of mails with the Allan Line is about to expire, the Government have been asked to consider the advisability of increasing the subsidy, and providing for a line of steamers that will equal in speed, if not surpass those running to New York. It is believed by many that if this was done, a large amount of freight and passenger traffic might be directed from New York, and, in connection with the Canadian Pacific Railway, a popular line of travel established between Great Britain, the East, and the Australasian colonies.

Comparisons of wages 1867 and 1887.

361. The following particulars of the passages in 1867-68 and in 1868-87 will be interesting for comparison:—

WINTER SEASON.

YEAR.	Average Passage to Liverpool.			Number of Passengers.	Barrel Bulk.	Average Passage to Portland.			Number of Passengers.	Tons of Freight.
	d.	h.	m.			d.	h.	m.		
1867-68.....	10	12	44	1,026	169,375	12	12	0	4,399	16,095
1868-69.....	9	1	45	1,719 *	To Halifax.			6,730	58,611
						10	0	16		

SUMMER SEASON.

1868.....	9	20	34	5,044	241,877	To Quebec.			14,073	28,398
1869.....	8	21	9	4,163	660,732	8	20	46	14,654	57,766

* The bulk of cargo was loaded at Portland and Baltimore.

362. The fastest passage from Quebec to Liverpool in 1868 was made in 8 days 14 hours 15 minutes and in 1869 in 7 days 21 hours 10 minutes. In the latter year the passage from Liverpool to Quebec was made in 7 days 14 hours 45 minutes, and the average of the westward voyage was the highest during the season, but as a general rule the eastward passages are the fastest. Fastest passages.

363. The following table gives the numbers and number per head of letters and post cards sent in the principal countries of the world. The figures have been taken partly from official sources, and partly from the Statesman's Year Book, and the calculations have been made in this office. Attention is again called to the extraordinary quantity of mail matter sent in the Australasian Colonies. The Australasian trade is undoubtedly very large in proportion to population, and the correspondence may be expected to be accordingly large, but it does not seem likely that it should be so much larger than, and out of all proportion to that of any other civilized country, and the high figures are pro- Number of letters sent in principal countries.

bably caused by some defect in the system of enumeration, by which duplication occurs, or it may be by a more perfect system than in use elsewhere. The system adopted in Canada does not do justice to the correspondence of the country, as no notice whatever is taken of the foreign correspondence coming into this country, which is exceedingly large.

LETTERS AND POST CARDS IN VARIOUS COUNTRIES.

COUNTRIES.	Year.	Number Sent.	Number per Head.
New Zealand.....	1886	38,084,592	64.62

364. The number of offices open in the United States in 1887 was 55,157, but no statistics of the number of letters sent are available ; the number of pieces of ordinary mail matter handled in the railway postal cars was 5,884,690,875. In proportion to population there was one post office to every 10·88 persons ; in Canada the proportion was one to every 6·47 persons.

Postal statistics of the United States.

PART II.—TELEGRAPHS.

365. The principal telegraph lines in Canada are in private hands, and the Government only own and operate those lines which have been built by them in furtherance of the public service, between places where the traffic could not be expected to be sufficient to compensate private outlay, but where public interests required that there should be communication, especially in connection with the signal and other stations established by the Marine Department along the shores of the Gulf of St. Lawrence, the Maritime Provinces and British Columbia, and also, for the advancement of settlement, in the North-West Territories.

Government telegraph lines.

366. There were 1,590 miles of land lines and 174 miles of cable along the St. Lawrence and eastern coasts, 869 miles of land lines in the Territories, and 680 miles of land lines and 41 miles of cable in British Columbia. The principal cable lines on the eastern coasts are in connection with the Island of Anticosti and the Magdalen Islands ; and in British Columbia, across the Straits of Georgia, and between Vancouver's Island and Washington Territory.

Situation of lines.

367. In consequence of the completion of the Canadian Pacific Railway through British Columbia, and the establish-

Purchase of British Columbia lines

by the
Canadian
Pacific
Railway.

ment of its accompanying telegraph system, which would necessarily be in competition with the lines operated by the Government over the same territory for the benefit of the public, it was decided to accept an offer made by the Canadian Pacific Railway Company for the purchase of the existing Government lines along the railway route, and the following lines were accordingly sold to the company for the sum of \$15,780 :—

	Miles.
Victoria to Dungeness, including cable.....	19½
Victoria to Cache Creek.....	356
New Westminster to Port Moody.....	7½
Cache Creek to Kamloops.....	48
	<hr/>
	431
	<hr/>

An arrangement, terminable at any time, was at the same time made for the operation by the company of the lines 294½ miles in length north of Ashcroft and elsewhere, the lines remaining the property of the Government. The arrangement came into force on the 1st October, 1886.

Length
and situa-
tion of
Govern-
ment
lines.

368. The following table gives the length of the various lines controlled by Government on 30th June, 1887 :—

LAND AND CABLE TELEGRAPH LINES IN CANADA, OWNED,

Excess of Revenue.....			323
Total excess of Expenditure.....			19,678

Apparent
decrease
but actual
increase in
receipts.

370. As compared with 1886, there was a decrease of \$7,886 in the revenue, and of \$6,826 in expenditure, but this was in consequence of the sale of lines, as mentioned above, in British Columbia, there having been actually an increase in receipts on almost every line. A new line from Cheticamp to Mabou was constructed during the year, the North Shore line was extended to Birch River, 45 miles below Moisie, and 45 miles of new line constructed in the North-West.

New lines.

Tele-
graphs in
principal
countries.

371. The following table gives particulars of telegraphs in all the principal countries in the world :

TELEGRAPHS IN PRINCIPAL COUNTRIES OF THE WORLD, 1886.

* State lines only. † Indo European Telegraph Company's lines only.

‡ Not including shipping and weather reports.

Total telegraph mileage in the world.

372. According to the American Almanac, the total length of telegraph lines in the world is 719,415, of which the United States owns the largest portion, or just about one-fourth, but though that country possesses 147,954 miles of line more than the United Kingdom, the difference in the number of messages sent is small, and the Western Union Telegraph Company of America, which possesses 156,814 miles of line and 524,641 miles of wire, sent 2,849,109 messages less than were sent in Great Britain. There are, it will be seen, only six countries that possess a greater telegraphic mileage than Canada, and with the exception of one or two of the Australasian colonies, no other country possesses the same telegraphic facilities in proportion to population.

Canadian Telegraph companies.

373. The telegraph business of Canada is in the hands of the Great North-Western Telegraph Company, the Canadian Pacific Railway Company, and, in the Maritime Provinces, the Western Union Telegraph Company. The following are particulars concerning them in 1887:—

COMPANY.	Miles of Line.	Miles of Wire.	Number of Messages.	Number of Offices.
Great North-Western Tel. Co.....	17,663	32,710	3,101,584	1,503
Canadian Pacific Railway Co.....	5,090	17,000	500,000	550
Western Union	2,924	7,320	391,500	176

Press messages are not included in the number sent by the Canadian Pacific Railway Company, particulars not being available.

Tele-phones.

374. The telephone system of Canada is almost entirely in the hands of the Bell Telephone Company of Montreal, which has 290 offices, 15,000 sets of instruments in use, 700 miles of poles, and 7,800 miles of wire. No exact record is

kept of the number of messages or communications, but the average number is about 68,000 daily. The American Bell Telephone Company had in 1887, 353,518 instruments in use, and 128,231 miles of wire. The laying of a telephone cable is projected between London and Paris, and this mode of communication is coming more into use in almost all countries every day.

CHAPTER VI.

CANALS AND INLAND REVENUE.

Super-
vision of
Canals.

375. The collection of revenue derivable from the various canal systems is under the control of the Department of Inland Revenue, while their construction, repairs and maintenance are attended to by the Department of Railways and Canals.

Canal
revenue.

376. The total revenue from all sources from the several systems amounted, in 1887, to \$353,110, as compared with \$364,456 in 1886, showing a decrease of \$11,346, the net revenue showing a decrease of \$3,340.

St. Law-
rence
system.

377. The system of inland navigation in Canada is the largest and most important in the world. The St. Lawrence system alone, in conjunction with the great lakes, extends for 2,260 miles, viz., from the Straits of Belle Isle to Port Arthur, at the head of Lake Superior; of this distance 71 miles are artificial navigation by means of canals, and 2,189 miles open navigation; from Port Arthur to Duluth, which is the principal port in that section of the United States for the produce of the Western States, is a further distance of 124 miles, making altogether 2,384 miles. When it is considered that by this means unbroken water communication is afforded from Port Arthur and Duluth to Liverpool, a total distance of 4,618 miles, the importance of this system and the necessity for its thorough maintenance will be at once understood.

Sault Ste.
Marie
Canal.

378. Lake Superior and Lake Huron are connected by the St. Marie River, which is not capable of navigation, owing to the numerous rapids. This difficulty has been overcome by the construction of a canal on the United States side of

the river, which is rather more than one mile in length, and has one lock 515 feet long and 80 feet wide, with a rise of about 18 feet. Provision was made during the Session of Parliament in 1887, by the voting of a sum of one million dollars, for the construction of a canal on the Canadian side, and through Canadian territory. The work will be proceeded with during the coming summer. The necessity for this work will be apparent when it is considered that this country has no means of access to the waters of Lake Superior, except through the United States. It will be seen also from the following table that the traffic through the existing canal is growing to such enormous dimensions, that one canal will soon be no longer sufficient:—

COMPARATIVE STATEMENT OF THE TRAFFIC THROUGH THE SAULT STE. MARIE CANAL IN THE YEARS 1886 AND 1887.

			69,060,072	79,031,758

Period of navigation through Sault Ste. Marie Canal.

379. The canal was only open for navigation for 224 days in 1886 and for 216 days in 1887, and during that time the traffic through was relatively almost as large as that through the Suez Canal, which will accommodate the largest vessels, and is open to the commerce of the whole world.

Traffic through the Suez Canal.

380. The following table gives the number and total tonnage of the vessels passing through the Suez Canal in the years 1882 to 1886. The figures are taken from the Statesman's Year Book 1888.

TRAFFIC THROUGH THE SUEZ CANAL—1882-1886.

YEAR.	Number of Vessels.	Tonnage.
1882	3,198	7,122,125
1883	3,307	8,106,001
1884	3,284	8,319,967
1885	3,624	8,985,411
1886	3,100	8,183,313

Sault Ste. Marie and Suez Canal traffic compared.

381. If the Sault Ste. Marie Canal had been open for the whole year, and the traffic had maintained the same rate during all that time as it did during the season of navigation, the tonnage passing through in 1887 would have amounted to 8,276,033 tons, which would have been more than the total tonnage through the Suez Canal in the same year.

Canals on St. Lawrence system.

382. In addition to this, the canals on the St. Lawrence system are the Welland, from Port Colborne on Lake Erie to Port Dalhousie on Lake Ontario, 26 $\frac{3}{4}$ miles in length by the enlarged or new line, with 26 locks, and a total rise of 326 $\frac{3}{4}$ feet; and, along the St. Lawrence, the Galops, 7 $\frac{1}{2}$ miles in length, with three locks and a rise of 15 $\frac{3}{4}$ feet; the Rapide Plat, 4 miles in length, with 2 locks and a rise of 11 $\frac{1}{2}$ feet;

Farran's Point, three-quarters of a mile long, with 1 lock and a rise of 4 feet; the Cornwall, $11\frac{1}{2}$ miles in length, with 6 locks and a rise of 48 feet; the Beauharnois, $11\frac{1}{4}$ miles in length, with 9 locks and a rise of $82\frac{1}{2}$ feet and the Lachine Canal, $8\frac{1}{2}$ miles in length, with 5 locks and a rise of 45 feet.

383. The difference in level between Lake Superior and tidewater is about 600 feet. The total number of locks on this system is 53, and the total height directly overcome by locks is 533 feet. The greatest navigable depth is 14 feet, and that at present is only to be found in the Welland Canal, the improvements in which are now completed, and the canal will be open for a 14 feet navigation during the present season. The greatest available depth in the other canals is at present 12 feet, but all improvements are now made with a view to having a uniform depth of 14 feet throughout the systems.

Height of Lake Superior above the sea.

Depth of canals.

384. The other canal systems of the country are as follows:—The Ottawa, which connects Montreal and the city of Ottawa, and the Rideau, which in conjunction with the Ottawa system, affords communication between Montreal and Kingston, a total distance of 246 miles. The lockage on this system (not including that of the Lachine Canal) is 509 feet, 345 rise and 164 fall, and the number of locks is 55. The Rideau Canal was originally built by the Imperial Government for military purposes. It was begun in 1826 and finished in 1834, at a cost of \$3,860,000.

Ottawa and Rideau Canals.

385. The Richelieu and Lake Champlain system, or Chambly Canal, extends from the junction of the Rivers St. Lawrence and Richelieu, 46 miles below Montreal, into Lake Champlain, a distance of 81 miles. There are 10 locks, and a rise of 79 feet. By the Lake Champlain Canal, communication is obtained with the Hudson River, and thence

Chambly Canal.

to New York, to which place from the boundary line is a distance of 830 miles.

Burlington Bay Canal.

386. The Burlington Bay Canal, half a mile in length, connects Burlington Bay and Lake Ontario, giving access to the port of Hamilton. There are no locks on this canal.

St. Peter's Canal.

387. St. Peter's Canal, Cape Breton, Nova Scotia, gives access from the Atlantic to the Bras d'Or Lakes. It is 2,400 feet long, and has one tidal lock. The rise and fall of the tide is 4 feet.

Trent River system.

388. The Trent River system is only efficient for local use. The scheme of making use of these waters to effect a system of through water communication between Lakes Huron and Ontario has been in contemplation for many years, but up to the present time only certain sections have been made navigable, or fit for the passage of timber. The total distance between the lakes is 235 miles, and about 155 miles of this are available for light draft vessels.

Murray Canal.

389. The Murray Canal has been built through the Isthmus of Murray, giving connection westward between the Bay of Quinté and Lake Ontario. It is $4\frac{1}{2}$ miles in length, and has no locks.

Expenditure on canals.

390. The total amount spent on canals by the Imperial Government previous to Confederation was \$4,173,921, and by the Provincial Governments, \$16,028,840. At the time of Confederation all the systems became the property of the Dominion Government, who have expended the further sum of \$31,192,795, making a total amount spent for construction and enlargement alone of \$51,395,556, the amount expended for repairs not being included in these figures.

391. The following table gives the number, tonnage and nationality of vessels that passed through the several canals, during the years 1883 to 1887, and also the tons of freight and number of passengers carried, as well as the revenue received from tolls and other sources : -

Summary
of traffic
through
canals
1883-1887.

392. And the next table is a summary of the preceding one, showing the total amounts and quantities under the various heads in each year:—

SUMMARY STATEMENT OF THE TRAFFIC THROUGH THE CANADIAN CANALS, 1883 TO 1887.

YEAR.	Number of Vessels, Canadian.	Tonnage.	Number of Vessels, United States.	Tonnage.	Total Number of Vessels.	Total Tonnage.
1883.....	21,904	3,463,854	4,414	599,908	26,318	4,062,762
1884.....	19,485	3,144,272	4,492	669,708	23,977	3,813,980

† Less refunds, \$387; ‡ \$8,958; § \$15,304; || \$9,575; * \$31,390.

Various
increases
and de-
creases.

393. There was an increase of 1,411 in the total number of Canadian vessels passing through the canals, and a decrease of 416 American vessels, making a total increase of 995 vessels, and 8,411 tons. Though there was this increase in the number of vessels, there was a decrease in the amount of freight carried of 114,947 tons. Passengers increased 10,-

586 in number. St. Peter's and the Chambly Canals were the only two that returned a decrease in the number of vessels passing through, but there was a decrease in the amount of freight in the Welland, Chambly, Rideau, and Newcastle District Canals. The tolls on the Burlington Canal were abolished in 1886, and no returns were made last year of the traffic through it.

More than half the total freight carried, viz., 63 per cent., was carried on the Welland and Ottawa Canals, the St. Lawrence Canal taking the next largest proportion, viz., 23 per cent.

394. The following table gives the amounts that have been spent on the different canals, during the past five years, for construction, repairs, and staff maintenance :—

Expenditure for construction, repairs, &c., 1883-1887.

	1887	1,873,193	199,537	285,172	2,357,902

It will be seen that the heaviest expenditure has been on the Welland, Carillon and Grenville, and Lachine Canals.

**Inland
revenue.**

395. The functions of the Department of Inland Revenue are the collection of excise duties, and of canal, slides, boom and ferry tolls, also fees for the inspection of food, gas and weights and measures, as well as administering the laws relating to the same. The total revenue that accrued to the Department during 1887 was \$6,978,285, which was \$581,954 more than in the preceding year, and was the largest amount that had accrued during the last five years, as it is shown by the following table, which gives the amount that accrued under each head, in each year since 1883:—

HEADS OF ACCRUED INLAND REVENUE, 1883-1887.

HEADS OF REVENUE.	1883.	1884.	1885.	1886.	1887.
	\$	\$	\$	\$	\$
Excise.....	6,282,796	5,545,391	6,428,688	5,883,530	6,466,151
Public Works.....	510,969	516,349	409,886	440,677	448,806
Culling Timber.....	49,560	43,609	28,557	30,073	19,707
Bill Stamps.....	45				
Weights and Measures, Gas and Law Stamps.....	34,889	36,401	40,504	42,001	43,621
Total.....	6,878,259	6,141,750	6,917,635	6,396,331	6,978,285

396. There was a decrease in the amount that accrued from culling timber, as compared with 1886, but an increase under all other heads. The Stamp Act was repealed in 1882. Increase and decrease.

397. The number of proof gallons of spirits manufactured in 1887 was 5,119,506, as compared with 4,355,736 gallons in 1886, being an increase of 763,770 gallons; and the quantity taken for consumption was 2,864,905 proof gallons, being an increase of 386,807 gallons as compared with 1886. Manufacture and consumption of spirits.

398. The increase in the quantity of spirits manufactured is attributed to the new provision of the Inland Revenue Act, which came into force on 1st July, 1887, by which the sale of spirits which have not been manufactured at least twelve months is prohibited, distillers in consequence finding it necessary to increase their stock. Though there was an increase in the quantity taken for consumption, as compared with 1886, there was a decrease as compared with the average consumption for the four preceding years, which amounted to over 3,500,000 gallons. The increased duty, and the increased price consequent on the enforced warehousing for one year previous to sale, will have a tendency to reduce consumption, "and perhaps this may be Increase in manufacture of spirits.

esteemed an advantage, especially when it is known to the general public, that the maturing of spirits, even for twelve months, eliminates the most deleterious ethers and noxious elements, which not only injure the stomach of the consumer, but create and stimulate a vitiated taste."

Materials
used.

399. In the production of the above mentioned quantity of spirits, 90,872,151 lbs. of grain and 38,750 lbs. of molasses were used, making a total quantity of raw material of 90,910,901 lbs.

Manufac-
ture of
malt.

400. The quantity of malt manufactured during the year was 54,662,804 lbs., and entered for consumption 42,630,440 lbs., being an increase, as compared with 1886, of 6,450,109 lbs. and 5,025,732 lbs respectively. Distillers used 4,730,000 lbs. of the quantity entered for consumption, and the remainder was employed in the production of 14,786,255 gallons of malt liquor.

Consump-
tion of
tobacco.

401. There was an increase of 309,357 lbs. in the quantity of tobacco entered for consumption, as compared with 1886, but the amount was below the average of six years, as shown by the following figures :—

TOTAL AMOUNT OF TOBACCO ENTERED FOR CONSUMPTION IN
CANADA—1882-1887.

	Lbs.
1882	8,377,201
1883	8,965,416
1884	10,072,745
1885	11,061,589
1886	8,507,216
1887	8,916,573
	<hr/>
	55,800,044
Average.....	<u>9,300,007</u>

402. The quantity of Canadian tobacco taken for use, during the last six years, has been :—

Consumption of Canadian tobacco.

	Lbs.
1882.....	492,402
1883.....	377,197
1884.....	326,804
1885.....	495,721

1887.....	0·74	0·09	3·08	2·59
Average.....	1·22	0·14	2·57	2·11

Decrease
in con-
sumption.

104. According to the above figures the consumption of spirits is decidedly less than it was 19 years ago, and, with the exception of 1880 and 1886, was less last year than in any other year in the table. The consumption of wine also has decreased, but that of beer and tobacco has increased.

Product
and ex-
port of
tobacco in
the United
States.

405. The average annual product of tobacco in the United States since 1880 has been 498,106,173 pounds, and the average annual export during the same period 239,011,012; the exports in 1886 and 1887 were, however, considerably above the average, having been 231,737,120 pounds and 293,666,995 pounds respectively. Almost the whole of the amount exported goes to Europe, nine-tenths of the whole going to seven countries—Germany, Great Britain, France, Italy, Netherlands, Spain and Belgium, in the order named. The average quantities and proportions for a number of years are shown in the following table:—

COUNTRIES.	Twelve Years, 1870-81.		Five Years, 1882-86.	
	Lbs.	Per cent.	Lbs.	Per cent.

Average
duty on
spirits,
beer and
wine and
tobacco.

406. The average amount per head paid annually in Canada for duty on spirits since Confederation has been \$1.00 and on tobacco 38 cents; on beer and wine it only amounted to fractions of 1 cent in each case. The report of the Minister of Inland Revenue gives the amounts per head by Provinces, but it is not possible to obtain any correct figures regarding the actual consumption in each Province, for the Province that has the greatest number of breweries and distilleries will show the largest consump-

tion, without reference to the fact that a large quantity of that liquor, paying duty in one Province, is actually consumed in another.

407. In the United States, in 1887, the amount consumed per head was, spirits 1·18, wine 0·55, and beer 1·19. The increase in the consumption of beer and the diminution in consumption of spirits appear to be general in Europe as well as on this continent.

Consumption of spirits, beer and wine in the United States and some foreign countries.

The following table, which, with the exception of the figures for Canada, have been taken from the Victorian Year Book, 1886-87, give the annual consumption of beer and spirits per head in various countries:—

ANNUAL CONSUMPTION OF SPIRITS PER HEAD IN VARIOUS COUNTRIES.

COUNTRIES.	Gallons.	COUNTRIES.	Gallons.
Holland	2·08	Germany	0·95
Queensland	1·85	New Zealand	0·92
Western Australia	1·46	Canada	0·86
New South Wales	1·39	France	0·85
United States	1·34	South Australia	0·70
Sweden	1·27	Tasmania	0·69
Victoria	1·12	Austria-Hungary	0·63
Switzerland	1·04	United Kingdom	0·59

ANNUAL CONSUMPTION OF BEER PER HEAD IN VARIOUS COUNTRIES.

COUNTRIES.	Gallons.	COUNTRIES.	Gallons.
United Kingdom	28·74	Queensland	9·55
Germany	19·38	Switzerland	8·15
Holland	19·05	Austria-Hungary	6·83
New South Wales	16·70	France	4·53
Victoria	16·41	Canada	2·82
United States	10·74	Sweden	2·53
Tasmania	10·00		

The figures for Canada are the average consumption for the last three years. The consumption of intoxicating liquors in Holland is very large, and allowing for increased potency of spirits is considerably in excess of that of any other country.

CHAPTER VII.

RAILWAYS.

408. In India and in all of the principal British Colonies with the exception of Canada, the railways have been principally, and in some cases entirely, built by the Government with public money, and large portions of the public debts have been incurred for that purpose, but in this country the Government have only built such lines as were required by public policy, those being the Intercolonial and Prince Edward Island Railways; the first being built in accordance with the wishes of the Imperial Government, and the second to fulfil the pledges made to Prince Edward Island when that Province entered Confederation. The Government, however, has always been active in encouraging private enterprise, and in that way has expended no less a sum than \$129,810,633 in the shape of bonuses at different times to different railways, which sum represents a considerable portion of the public debt, and which as previously mentioned, though directly productive to the country at large, brings in no immediate return to the Government. In addition to the above the Government has at various times made loans to railways, the amount of such loans at present outstanding being \$20,592,026. The Provincial Governments have also contributed aid to the extent of \$21,204,793, and various municipalities to the extent of \$12,812,836.

Government aid to public railway companies.

409. The first railway in Canada was opened on the 21st July, 1836, between Laprairie and St. Johns in the Province of Quebec, its length being 16 miles, but such little progress was made in railway development, that when the first sod of the Northern Railway was turned by Lady

Early railways in Canada.

Elgin in 1850, there were but 71 miles in operation. Speaking of that ceremony the *Illustrated London News* said: "The inhabitants of the frozen and hitherto imperfectly understood region of Canada have not until recently availed themselves of the modern advances in public improvements." Slow though this country undoubtedly was at one time in the matter of railway construction, it has of late years made very considerable progress. In 1867 there were 2,258 miles in operation, and on 30th June, 1887, 11,691 miles, with a total of 12,332 miles completed, being an increase in the 20 years since Confederation of 9,433 miles. In 1868 the paid-up capital amounted to \$160,471,190, and in 1887 to \$683,773,191.

Progress
in railway
construc-
tion.

Particu-
lars of
capital
paid.

410. The following table gives the sources from which the various sums have been derived that make the total capital paid, the amount derived from each source, and the amount of each per mile of completed railway:—

PARTICULARS OF RAILWAY CAPITAL PAID, 1887.

SOURCE OF CAPITAL.	Amount.	Amount per Mile.
	\$	\$
Ordinary share capital	227,335,811	18,435
Preference do	96,792,927	7,849
Bonded debt	194,801,553	15,796
Aid from Dominion Government.....	129,497,666	10,501

do Quebec do	7,729,989	635
do New Brunswick do	3,979,095	323
do Nova Scotia do	1,653,903	134
do Manitoba do	1,895,000	154
do Municipalities	12,812,837	1,031
Capital from other sources.....	1,327,404	107
Total.....	683,773,191	55,447

411. The proportion that each amount bears to the total capital is as follows:—

	Per cent.
Ordinary share capital.....	33·
Bonded debt.....	28·
Dominion Government aid	19·
Preference share capital.....	14·
Provincial Government aid	3·
Municipal aid	2·
Other sources	0·2

Proportion of details of capital to total.

Twenty-five per cent. of the total capital has thus it will be seen been contributed by state and municipal aid.

412. Though returns of a certain kind were annually made to the Government, they were, previously to 1874-75, more or less incomplete, and only since that year have any accurate statistics been collected. The following table gives the train mileage, number of passengers and tons of freight carried, and the receipts and expenditure of all railways in the Dominion for each year since the 1st July, 1874:—

Railway statistics 1875-1887.

YEAR ENDED 30TH JUNE,	Miles in Operation.	Train Mileage.	Number of Passengers.	Tons of Freight.	Earnings.	Working Expenses.
					\$	\$
1875.....	4,826½	17,680,168	5,190,416	5,670,836	19,470,539	15,775,532

Particulars of increases.

413. It will be seen that there was a very marked increase indeed in the business of the railways in 1887, and the totals in each column are considerably larger than they have ever been before. The earnings per mile in 1880 averaged \$3,418, in 1884 \$3,490, in 1885 \$3,175 in 1886 \$3,106, and in 1887 \$3,322, being an increase of \$216 per mile as compared with the year before, making a decided break in the tendency which was manifesting itself for the earnings to decrease as the mileage was extended. The average amount of working expenses per mile in 1886 was \$2,166, and in 1887 \$2,363, showing an increase of \$197 per mile, but there was an improvement in the proportion of net receipts to capital cost; in 1886 it was 1.41 per cent., and in 1887, 1.64 per cent. There was an increase in train mileage of 3,157,660 miles, in the number of passengers carried of 837,614, in the tons of freight carried of 685,875, and in the net receipts of \$1,005,527.

Business of Canadian Railways 1886 and 1887.

414. The following is a comparative statement of the business done by Canadian Railways in the years 1886 and 1887, particulars of the principal lines being given separately:—

TRAFFIC RETURNS OF RAILWAYS OF CANADA, 1886 AND 1887.

415. There was again a decrease in the proportion of working expenses to receipts, amounting altogether to 1 per cent.; in 1884 the proportion was 76 per cent., in 1885 74 per cent., in 1886 72 per cent., and in 1887 71 per cent., the decrease being gradual but steady. The proportion, however, is still higher than in most European countries, where it ranges from 50 to 55 per cent., higher than in the Australasian Colonies, where in 1884 it was 63 per cent., and higher than in India, where it was, in 1886, under 48 per cent. The decrease, it will be seen, was confined entirely to public lines, there having been an increase among Government lines in the excess of working expenses over receipts from 107 per cent. to 111 per cent. The Canada Southern and the Northern and North-Western were the two roads whose expenses bore the smallest proportion to receipts, and the South-Eastern system and the Central Ontario the largest. Since the commencement of the present year, the Northern and North-Western Railway has been taken over by and been made part of the Grand Trunk Railway system.

416. The excess of expenses over receipts on Government lines may be attributed principally to two causes, one being that both the Intercolonial and Prince Edward Island Railways were built from national considerations, and for the advancement of public convenience, the first road running through districts sparsely settled, and therefore requiring considerable time for the development of traffic, while it will probably be many years before the travel on the Prince Edward Island Railway will be sufficient to cover expenses; and the other being that while every effort is made to secure economy and profit, the public interests are first considered, and many things are done which, while advantageous to the public, are, to say the least, unremunerative to the Government; for instance, the coal

Proportion of working expenses to receipts.

Excess of expenses over receipts on Government lines.

from the Nova Scotia mines is, with a view to developing that industry, carried by the Intercolonial Railway at almost an actual loss. The difficulty also of keeping the track of the Intercolonial free from snow during the winter will always be the source of an expense, to which other roads are not liable in the same degree.

Sources of receipts and expenditure.

417. The following table gives the principal sources of receipts and expenditure on the most important railroads as well as the earnings and expenses per mile. Owing to the absence of details in the cases of one or two small roads, a difference will be found in the total earnings, as compared with the totals of the principal sources, of \$46,216, and in a similar way in the expenditure of \$10,514.

SUMMARY STATEMENT OF EARNINGS ON CANADIAN RAILWAYS, 1887.

Other Lines.....	697,189	661,309	565,001	1,934,013	848
Total.....	6,405,390	11,876,804	9,331,975	27,624,683	2,363

418. The receipts from freight traffic formed 63·28 per cent., and from passenger traffic 30·55 per cent. of the total, while of working expenses 42·99 per cent. were for working and repairs, 33·78 per cent. for general working expenses, and 23·18 per cent. for maintenance of line, &c. Both receipts and expenses were considerably larger per mile on the Canada Southern Railway than on any other road, the traffic being very heavy in proportion to the length of the line.

Proportions of sources of receipts and expenses.

419. The next table gives some particulars of the quantities of the leading articles of freight carried by Canadian railways in 1887. The largest quantities of freight of all kinds were carried by the Grand Trunk system, and of the total freight tonnage carried by all the lines in Canada that system carried 39·48 per cent. the next largest proportion being carried by the Canada Southern, viz. 15·77 per cent. The proportion of freight however to the length of

Quantities of principal freight carried.

the road was very much higher on the Canada Southern ; on that road it was 7,129 tons per mile in operation, and on the Grand Trunk system it was only 2,486 tons per mile.

SUMMARY STATEMENT OF DESCRIPTION OF FREIGHT CARRIED
ON CANADIAN RAILWAYS, 1887.

RAILWAYS.	Flour.	Grain.	Live Stock.	Lumber of all kinds, except Firewood.

* Windsor Branch included.

421. The expenditure on the construction and equipment of the Grand Trunk system has, it will be seen, been very much in excess of that on any other road, the expenditure on the main line during its original construction having been exceptionally heavy. The North-Western Coal and Navigation Company's road, which connects the coal mines on the Belly River with Medicine Hat, and which has a gauge of 3 feet only, is the road that according to the above table has been built at the least expense, which is probably explained by the fact of its running through a level prairie country, and that no outlay was required for the purchase

Expenditure on Grand Trunk and North-West Coal and Navigation Company.

of land. The difference in gauge also probably reduced the expenditure.

Average cost in Canada and some foreign countries.

422. The total average cost per completed mile of all the railways in Canada is \$55,447, which it will be seen from the following table compares favorably with the figures for some principal countries :—

COST OF RAILWAY CONSTRUCTION IN PRINCIPAL COUNTRIES.

COUNTRIES.	Cost per Mile.	COUNTRIES.	Cost per Mile.
	\$		\$
United Kingdom	206,765	Australasia	57,976
Belgium	177,672	Canada	55,447
France	134,826	United States	54,301
Germany	103,349	Cape Colony	44,856
Russia	97,333	New Zealand	42,403
Victoria	66,951	Tasmania	41,026
India	61,250	Queenland	32,333
New South Wales	62,021	South Australia	31,302

Railway accidents in Canada.

423. The following is a statement of the number of accidents in connection with the railways in Canada, including Government railways, for the last 12 years :—

	Killed.	Injured.
1876.....	109	304
1877.....	111	317
1878.....	97	361
1879.....	107	66
1880.....	87	102
1881.....	99	147
1882.....	147	397
1883.....	169	550
1884.....	227	796
1885.....	157	684
1886.....	144	571
1887.....	178	633

Causes of accidents.

424. There was a very large increase in the number of persons killed in 1887, amounting to 34, but of the total number, 128 lost their lives by carelessness, disregard of

regulations, or some other cause preventable by their own actions, leaving as the number killed from causes over which they had no control, 50 persons, all of whom were railroad employés. Eleven passengers were killed during the year, all of whom, with one exception, were responsible for their own deaths, 5 being killed by falling from the cars, 4 by getting off trains in motion and 1 by walking on the track. Thirty-nine passengers were injured in various ways, being 20 less than in 1886. No less than 69 out of the 84 persons killed, other than employés and passengers, met their death through walking on the track.

425. In calculating the safety of railway travelling in Canada, none of the passengers killed in 1887, should strictly speaking be included, since the companies were in no way responsible for their deaths, but even if the whole number is taken, it will be seen from the following figures, that this country stands very well as regards safe travelling :—

Passengers killed per million carried in Canada.

PASSENGERS KILLED PER MILLION CARRIED—1875-1887.

YEAR.	Passengers Killed per Million Carried.	YEAR.	Passengers Killed per Million Carried.
1875.....	2.11	1882.....	1.07
1876.....	0.90	1883.....	0.52
1877.....	0.82	1884.....	4.60
1878.....	1.40	1885.....	0.82
1879.....	1.38	1886.....	0.61
1880.....	1.55	1887.....	1.03
1881.....	0.72		
Average for the whole period, 1.38.			

These figures, however, are capable of a large amount of improvement, the safety of travelling having been by no means yet reduced to the minimum that is both desirable

and practicable, as is shown by the figures for the United Kingdom in 1887, which say that only 1 passenger in every 7,637,780 was killed during the year from any cause whatever.

Passengers and freight per head of population and miles of line.

426. The next table gives some particulars concerning the passengers and freight carried relatively to population and length of line in each year from 1875 :

PASSENGERS AND FREIGHT CARRIED PER HEAD OF POPULATION AND MILES OF LINE OPEN IN CANADA, 1875-1887.

YEAR.	PASSENGERS.		FREIGHT.	
	Per Head of Population.	Per Mile of Line open.	Tons per Head of Population.	Tons Per Mile of Line open.
1875.....	1.34	1,055	1.46	1,175
1876.....	1.40	1,075	1.60	1,228
1877.....	1.51	1,090	1.71	1,231
1878.....	1.58	1,049	1.93	1,283
1879.....	1.57	1,006	2.01	1,288
1880.....	1.53	938	2.36	1,442
1881.....	1.60	956	2.78	1,662
1882.....	2.12	1,242	3.06	1,802
1883.....	2.12	1,098	2.94	1,520
1884.....	2.17	1,043	2.98	1,432
1885.....	2.06	953	3.12	1,444
1886.....	2.06	922	3.27	1,465
1887.....	2.19	914	3.36	1,401

As regards population both passenger and freight traffic have increased in a faster ratio, but in both cases it will be seen that the total mileage has increased in a faster proportion than has the traffic carried over it.

Freight per head of population in principal countries.

427. The following table, the figures in which are mostly taken from "Wealth and Progress of New South Wales," p. 361, will give some idea of the tonnage moved per head of population in some of the principal countries of the world :—

TONS OF FREIGHT CARRIED PER HEAD OF POPULATION IN SOME PRINCIPAL COUNTRIES.

COUNTRIES.	Tons per Head.	COUNTRIES.	Tons per Head.
Scotland.....	9.5	France.....	2.5
England and Wales.....	8.4	Ireland.....	0.8
United States.....	7.6	British India.....	0.8
Belgium.....	6.5	Japan.....	0.8
Germany.....	5.3	Spain.....	0.6
Canada.....	3.3	Italy.....	to
New South Wales.....	3.3	Russia.....	0.4
Australia.....	3.0		

428. The cost of a railway, it has been said, should not be more than ten times its annual traffic, that is, that the annual traffic should be 10 per cent. of its capital cost.* If this standard is applied to Canadian railways, their cost will be found to very far exceed the limit, as in 1887 the gross receipts only amounted to 5.72 per cent. of the total capital expenditure. In the United Kingdom, France and Belgium, the cost of railways is above this standard, while in Germany and the United States it is slightly below it.

Proportion of traffic to cost.

429. Almost all the railway companies in the Dominion use a gauge of 4 feet 8½ inches. The only exceptions are the Carillon and Grenville, and Cobourg, Peterboro' and Marmora roads, with a gauge of 5 feet 6 inches, the Prince Edward Island Railway, with a gauge of 3 feet 6 inches, and the North-Western Coal and Navigation Company, where the gauge is 3 feet.

Gauge of Canadian Railways.

430. The quantity and description of rolling stock in the years 1886 and 1887 will be found in the next table. With the exception of platform cars, there is an increase under each head:—

Rolling stock in use.

*Railway Problems, p. 25.

ROLLING STOCK OF RAILWAYS IN CANADA, 1886 AND 1887.

YEAR.	Loco- motives.	Sleeper and Parlour Cars.	First Class Cars.	Second Class and Emi- grant Cars.	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Plat- form Cars.	Coal and Dump Cars.
1886	1,571	73	734	497	415	23,845	13,178	2,533
1887	1,633	74	762	514	462	24,399	13,136	3,057
Increase....	62	4	28	17	47	554	524
Decrease...	42

Rolling
stock
hired.

431. The above table represents the rolling stock in use ; to ascertain the quantity owned, the following numbers of cars hired must be deducted in each year:—

YEAR.	Loco- motives.	Sleeper and Parlour Cars.	First Class Cars.	Second Class and Emi- grant Cars.	Baggage, Mail and Express Cars.	Cattle and Box Cars.	Plat- form Cars.	Coal and Dump Cars.

1887	46	8	35	16	23	376	345	50

Canadian
Pacific
Railway.

Comple-
tion of the
Algoma
Branch.

432. A concise description of the building of the Canadian Pacific Railway will be found in the "Statistical Abstract," 1886. During 1887 the company completed the laying of the rails on the extension from Algoma to Sault Ste. Marie, known as the Algoma Branch, and the line is expected to be open for traffic in June. By this means the company have direct communication with the American railway system. As provided for by 49 Vic., c. 9, the company after having settled their indebtedness to the Government, issued mortgage bonds on the above branch, which were most favourably received in London. The amount offered was £750,000, and before 12 o'clock on the same day that the prospectus was advertised, applications for £5,000,000 had been received. In order to make communication with the

American railways complete, it was necessary to build a bridge across the River Ste. Marie, which has been done. The bridge was begun in May, 1887, and completed in January, 1888, at a cost of \$300,000. It has a total length of $1\frac{1}{2}$ miles, and is the joint property of the Canadian Pacific Railway, the Duluth, South Shore and Atlantic Railway and the Minneapolis, Sault Ste. Marie and Atlantic Railway. When this branch is in complete running order it will be the shortest route for the conveyance of the produce of the North-Western States to the seaboard, and is probably destined to largely increase the importance of Montreal as a commercial port.

Bridge
over the
Ste. Marie
River.

433. The company's lines now cover a total mileage of 4,960 miles, distributed as follows:—

Total

All other articles	Tons.	498,940	534,976

Earnings
and ex-
penses.

435. The earnings for 1887, calendar year, amounted to \$11,606,413 and the working expenses to \$8,102,295, the proportion of expenses to earnings being 69·81 per cent. The receipts showed an increase of \$1,524,609 over those of 1886, the figures for the last 3 years having been \$8,368,493, \$10,081,804 and \$11,606,412 respectively.

Equip-
ment,
Canadian
Pacific
Railway.

436. The equipment of the road on 31st December, 1887, consisted of:

Locomotives.....	374
Passenger and baggage cars.....	330
Sleeping and dining cars.....	48
Parlour and official cars.....	23
Freight and cattle cars.....	9,296
Conductor's vans.....	185
Boarding, tool and auxiliary cars.....	86

Steam-
ship ser-
vice be-
tween
Vancouver
and
Hong
Kong.

437. The temporary steamship service between Vancouver and Yokohama and Hong Kong freely justified the expectations of the company as to the value and importance of the trade to be developed in that direction. The negotiations with the Imperial Government for the establishment of a permanent line of first-class steamships, suitable for service as armed cruisers in case of need, resulted in an official notification that Her Majesty's Government had decided to grant a subsidy of \$300,000 (£60,000) per annum for a monthly service between Vancouver and Hong Kong *via* Yokohama. In December last the details of a formal contract were practically settled, but owing to negotiations still pending between the Imperial and Dominion Governments, with reference to an improved Atlantic service, the contract has not yet been signed.*

Canadian
route to
China the
shortest.

438. The distance between Liverpool, Yokohama and Shanghai is less *via* Quebec, Montreal and the Canadian

* Annual Report, C.P.R., May, 1888.

Pacific Railway than by any other route, and the winter route *viâ* Halifax is 17 hours shorter than the shortest winter route through the United States, and attention has already been called by the American press to the manner in which this road is cutting into the business of the transcontinental roads of the United States.

439. The company had sold, up to the 31st December, 1887, a total of 3,272,749 acres out of the 18,206,986 acres remaining to them of the original grant of 25,000,000 acres. The sales during 1887 were 59,993 acres, at an average price of \$3.89½ per acre, as compared with \$3.28 per acre in 1886.

Landsales
by the
Canadian
Pacific
Railway
Company.

440. By clause 15 of the original contract between the Government and the company it was provided that for 20 years from the date thereof (21st October, 1880) no line of railway should be authorized by the Dominion Parliament to be constructed south of the Canadian Pacific Railway, except such lines as should run south-west or west south-west, nor to within 15 miles of latitude 49 (the international boundary.)

The mono-
poly
clause.

441. Considerable agitation having, during the last two years, arisen in the Province of Manitoba in consequence of the enforcement of this clause, it was deemed best in the interests both of the country and of the company that some arrangement should be made by which, in return for adequate compensation, the company should resign all their rights under the clause, and an agreement was accordingly made between the Government and the company to the following effect:—

Agree-
ment for
cancellat-
ion of
monopoly
clause.

The company agreed that all restrictions imposed upon the Dominion Parliament by said clause 15 should cease to exist and be forever removed.

The Government agreed to guarantee the payment of interest for not longer than fifty years from date of issue on bonds of the company to an amount not exceeding \$15,000,000, such interest to be at the rate of three and a half per cent. per annum, the bonds to be secured on the unsold lands of the company, estimated at 14,934,238 acres. The net proceeds of the sales of such lands to be from time to time paid over to the Government to constitute a fund for the payment of the principal of the bonds, the interest, at the same rate of three and a half per cent., on the money so set apart to be applied towards payment of the interest on the bonds.

Other provisions were made respecting the land grant bonds at present outstanding, and the company's roads between Winnipeg and St. Boniface and the American boundary.

The money to be raised by the bonds was to be expended as follows:—On account of capital expenditure on main line between Quebec and Vancouver, in buildings and improvements of various kinds, \$5,498,000; for rolling stock required, \$5,250,000, and for improvements required on the main line and elsewhere, \$4,252,000.

442. The agreement was signed on the 18th April, 1888, and was subsequently ratified by the Dominion Parliament.

443. The following table gives the railway mileage in British Possessions, together with the number of persons and of square miles of area to each mile:—

Ratifica-
tion of
agree-
ment.

Railways
in British
Posses-
sions.

RAILWAYS IN BRITISH POSSESSIONS, 1886.

Malta.....	8	19,904	15

444. Canada, it will be seen, has nearly 4,000 miles of railway more than all the Australasian Colonies combined, but on the assumption that a railway only opens up country to the extent of about 20 miles on either side, there is yet a vast amount of country waiting for development, as on that basis there are only 493,280 square miles of this country within ordinary reach of railway facilities—only a little more than one-seventh of the total area. In the Australasian Colonies only about one-ninth of the area has been thus developed.

445. The total railway mileage of the British Empire is 65,383, which on the estimated area of 7,999,618 square miles gives an average of one mile of railway to every 122 square miles, and on the assumption in the preceding paragraph

Proportion of railway development to area.

Total railway mileage of the British Empire.

allows for one-third of the area of the whole Empire being within reach of railway accommodation.

Railways
in foreign
countries.

446. The next table gives particulars of the railways in the principal foreign countries in 1886:—

RAILWAYS IN PRINCIPAL FOREIGN COUNTRIES, 1886.

* 1887.

Railway
mileage of
the world.

447: According to the American Almanac, 1888, the total railway mileage of the world was 339,028, and of this quantity 148,987 miles, or 44 per cent. of the whole length, was in the United States. Belgium, the German Empire and Switzerland possess the largest amount of railway accom-

modation, and Brazil the smallest. There are no railways in Persia.

448. The railways owned by the Dominion Government are the Intercolonial, Windsor Branch, Eastern Extension and Prince Edward Island railways, with a total mileage in operation of 1,204 miles; and the following statement shows the financial position of each road on the 30th June, 1887:—

FINANCIAL POSITION OF GOVERNMENT RAILWAYS IN CANADA,
1886-87.

RAILWAYS.	Capital paid up	Earnings.	Expenses	Profit	Loss.	Percentage of Expenses to Earnings.
	\$	\$	\$	\$	\$	
Intercolonial.....	44,995,982	2,596,010	2,828,116	232,106	108·9
Eastern Extension	1,284,496	64,107	94,254	30,147	147·0
Windsor Branch.....	25,327	26,042	715	102·8
P. E. Island.....	3,741,781	155,303	204,237	48,934	131·5
Total.....	50,022,259	2,840,747	3,152,649	311,902	110·9

449. There was a very decided increase in excess of expenditure over earnings on Government railways during 1887, the percentage of expenses to earnings being 110·9 as compared with 107·2 in 1885, and the total excess being \$311,902 as compared with \$190,637. This excess was largely attributable to the severity of the snow storms, which entailed an unusually large expenditure, the amount directly spent on the Intercolonial for clearing snow being \$92,000, or more than double the average cost for the last 6 years, and also to a large amount spent on improvements on the same road which would ordinarily be placed to capital account. The traffic on the Eastern Extension was also seriously interfered with owing to the absence of the large

Government railways and their financial position.

Reasons for excess of expenditure.

fish trade from the Straits of Canso, American fishermen being debarred from landing their fish in Canada.

Windsor
Branch.

450. The Windsor Branch is owned and maintained by the Government, but is operated by the Windsor and Annapolis Railway, who pay one-third of the gross earnings to the Government. The Government's share is generally sufficient to cover the cost of maintenance, but last year a good deal of extra expense was incurred in substituting steel for iron rails and in building a new station. This road runs from Halifax to Windsor a distance of 32 miles, and owing to the heavy cost of maintenance the loss during 1887 amounted to \$715.

Intercol-
onial
Railway.

451. The main line of the Intercolonial Railway runs from Point Lévis, Quebec, to Halifax, a distance of 688 miles, and in connection with the Canadian Pacific Railway now forms part of the through route between the Atlantic and Pacific oceans. The extensions consist of 192 miles, making a total length of 880 miles.

Traffic on
the Inter-
colonial
Railway
1878-1887.

452. The following are figures of the traffic during the past 10 years:—

TRAFFIC ON THE INTERCOLONIAL RAILWAY, 1878-1887.

YEAR.	Earnings.	Freight.	Passengers.
	\$	Tons.	No.
1878.....	1,378,947	522,710	678,957
1879.....	1,292,100	510,861	640,101
1880.....	1,506,298	561,924	581,483
1881.....	1,760,394	725,577	631,245
1882.....	2,079,262	838,956	779,994
1883.....	2,370,921	970,961	878,600
1884.....	2,353,647	1,001,163	920,870
1885.....	2,368,154	970,069	914,785
1886.....	2,383,201	1,008,545	889,864
1887.....	2,596,010	1,131,334	940,144

It will be seen that the traffic has increased very considerably, the figures for 1887 being in all cases the largest during the period, yet the financial results continue to be unsatisfactory, partly owing to the heavy expenses each winter necessarily incurred in keeping the line open and partly to the extremely low rate at which coal is carried from Nova Scotia into Quebec and Ontario, as well as to the number of improvements that have been charged to working expenses. The quantity of coal carried has increased very rapidly from 570 tons in 1880 to 175,512 tons in 1887, but it is carried at so low a rate as to be unremunerative to the railway.

453. The train mileage was 4,512,599, an increase of 472,772 miles, and the expenses per mile of railway were \$3,266, an increase of \$375 per mile.

Expenses
per mile.

454. The Eastern Extension Railway is 80 miles in length and extends from New Glasgow to Port Mulgrave on the Strait of Canso, and connects with Cape Breton by means of a ferry. It is worked by the officers of the Intercolonial Railway. There was a decrease both in freight and passenger receipts, and the expenditure for renewals of bridges, &c., was very heavy. Expenditure for these purposes may be expected to be costly for the next few years.

Eastern
Extension
Railway.

455. The Prince Edward Island Railway runs the whole length of the island, a distance of 154½ miles, and, including extensions, has a total length of 212 miles. There was an increase in the passenger traffic during 1887, but an unexpected and unexplainable falling off in the freight business. In proportion to its cost, the traffic on this road is very light, and it will probably be several years before the earnings equal the expenditure.

Prince
Edward
Island
Railway.

Cape Breton Railway

456. A line of railway is now in course of construction by the Government through the Island of Cape Breton, a distance of 98 miles, from Point Tupper, at the Strait of Canso, to Sydney. This road will form part of what is known as the Short Line, in which expression is comprised a scheme for connecting Montreal with Canadian Atlantic ports by the shortest route.

Government expenditure on construction, &c., 1883-1887.

457. The following table shows the amounts spent by the Government during the last five years, on the construction, staff and maintenance of railways:—

STATEMENT SHOWING AMOUNT OF GOVERNMENT EXPENDITURE ON CONSTRUCTION, STAFF AND MAINTENANCE OF RAILWAYS IN CANADA, FOR THE LAST FIVE YEARS.

RAILWAYS.	YEAR ENDED 30TH JUNE,

Total.....		11,097,062	9,836,638	995,800	

In addition to the above sum of \$6,466,633 shown to have been expended, there was also paid to the Grand Trunk Railway Company the sum of \$35,373 on account of fuel.

CHAPTER VIII.

ARTS, AGRICULTURE AND IMMIGRATION.

PART I.—ARTS.

The
Patent
Office.

458. The business of the Patent Office continues to increase every year, the number of applications and the amount received from fees during 1887 being in excess of corresponding figures in any previous year, the increase in fees amounting to \$2,184, which however was not so large an increase as that in 1886 over 1885 which was \$4,874.

Transac-
tions of
the Patent
Office.

459. The following table shows the different transactions of the Patent Office in each year since 1st July, 1867:—

BUSINESS OF THE PATENT OFFICE OF CANADA, 1867-1887.

YEAR ENDED 30TH JUNE,	Applica- tions for Patents.	Patents.	Certifi- cates.	Totals.	Caveats	Assign- ments of Patents.	Fees Received, including Designs and Trade Marks.

* There were no caveats until 1869.

460. The limit of duration of a patent is fifteen years which period can be reduced by the applicant to five or ten years, on payment of a proportionate fee. In 1882, there were 1,846 patents granted, of which 187 were for 15 years, 26 for 10 years, and the remainder, 1,633, for five years, and of this last number, 1,382 were allowed to lapse at the expiration of the term, showing that the large majority of Canadian patents are not kept in force for more than 5 years.

Duration
of Pa-
tents.

461. The business in the Copyrights and Trade Marks Branch also showed a very considerable increase, the receipts being \$1,603 in excess of those of 1886.

Copy-
rights and
Trade
Marks.

The following table shows the large increase in the business of this branch since Confederation:—

Liverpool
and Sal-
taire Ex-
hibitions.

462. A large portion of the collection which had been shown at the Indian and Colonial Exhibition in 1886, was utilized for the exhibitions at Liverpool and Saltaire in 1887, special attention being devoted to illustrating the agricultural resources of the Dominion. The general interest shown in the exhibits was very considerable, and the effect produced is stated to have been very favourable.

PART II.—AGRICULTURE.

Decrease
in impor-
tation of
pure bred
cattle.

463. The decrease in the number of pure bred cattle imported from Europe during 1887 was very considerable, the total number only being 152 as compared with 601 in 1886. This falling off is attributed to the unfortunate outbreak of pleuro-pneumonia in the preceding summer, and also to the want of demand and depressed state of the market for imported cattle in the Western States. There was an increase of 160 in the number of sheep, and a decrease of 4 in the number of pigs imported. That the decrease has been steady is shown by the following comparative figures:—

IMPORTATIONS OF CATTLE, &c., FROM EUROPE, 1884 TO 1887.

YEAR.	Cattle.	Sheep.	Pigs.
1884.....	1,607	473	26
1885.....	1,356	255	37
1886.....	601	328	16
1887.....	162	488	10

Destina-
tions of
animals
imported.

464. With the exception of 147 sheep, all the animals imported in 1887 were destined for places in Canada, and the particulars of their breeds were as follow:—

CATTLE.

Shortbors	80	Polled Angus.....	2
Galloways	58	Jersey	1
West Highlands.....	11

Shropshire	359	Cotswold	15
Leicester	12	Southdown.....	63
Lincoln	6	Dorset	33

PIGS.

Berkshire.....	5	Suffolk.....	2
Yorkshire	3		

465. The total importation of animals into Canada for breeding purposes in 1887 was:—

Cattle	549
Sheep	6,539
Pigs.....	262

Total importation of animals for breeding purposes.

The increase in the number of sheep imported into Manitoba and the North-West was very considerable.

466. There was a decided increase in both the number and value of horses, cattle and sheep exported, as will be seen from the following table which gives particulars of the export trade since 1874:—

Horses, cattle and sheep exported 1874-1887.

HORSES, CATTLE AND SHEEP EXPORTED FROM CANADA,
1874 TO 1887.

YEAR ENDED 30TH JUNE,	HORSES.		CATTLE.		SHEEP.

Total	190,456	20,679,526	892,676	44,351,381	4,212,448	15,118,307

467. Some idea can be formed of the extent and importance of this trade when it is seen that the value of the horses, cattle and sheep exported during the last 14 years has reached the enormous sum of \$80,149,214, and as the above table shows, the dimensions of the trade are continually increasing. Previous to 1872 no meat, either live or dead, was exported

Live cattle export trade.

from this country to Great Britain, except a certain quantity of salted beef, and the export of live cattle may be said to have commenced in that year—the first shipment being made through the United States owing to there being no vessels trading to Canada suitable for the purpose. Since that time however vessels have been built specially fitted for the carrying of live stock; and this circumstance, by reducing the rates of freight, has contributed largely towards keeping the business a fairly remunerative one in spite of the fall in prices and the reduced demand owing to a much larger home supply. (Statistical Abstract, 1886, p. 274.)

468. The following table shows how very rapidly the trade has increased since its inception :—

EXPORT OF LIVE CATTLE TO GREAT BRITAIN AND THE UNITED STATES, 1872-1887.

Total.....	447,498	35,357,356	423,801	9,819,018

Export of live cattle to Great Britain and the United States.

The figures are taken from the Trade and Navigation returns, but there would appear to be an error in the value of the cattle sent to Great Britain in 1874, it not being likely that the average value of the animals exported would be as high as \$2,200 a piece. The great difference in the value of the cattle going to the United Kingdom, and in that of those going to the United States, is of course explained by the fact that only first class specially fed beasts, ready for the butcher were shipped to England, while all sorts and conditions of animals are sent across the line, many of them doubtless to be subsequently sent to the same market.

469. The next table gives similar particulars of the shipments of sheep to the two countries :—

Exports of
live sheep
to the
United
Kingdom
and United
States.

Total.....	665,807	5,053,798	4,104,513	11,665,527

Importance of the live meat trade with England.

470. A far larger number of sheep, it will be seen, are sent to the United States than to Great Britain, but for similar reasons to those given above, their value is relatively much smaller, the average value of each sheep exported to the United Kingdom being \$7.59, and to the United States only \$2.84. It will be therefore clearly seen from the two preceding tables how very much more important this trade is with Great Britain than with the United States, the total value of cattle shipped to the two countries since 1872 having been \$45,176,374, of which no less than 78 per cent. represents the value of shipments to England, while of the exports of sheep to the two countries, only 14 per cent. of the number, but 30 per cent. of the value, went to England.

Shipment of cattle to England from Alberta.

471. Rapid as has been the development of this trade, there is every reason to suppose that it will yet assume much larger proportions, and a very important event in connection with its future prospects was the successful shipment, in October, 1887, of about 700 head of cattle direct from the ranches in the District of Alberta, at the foot of the Rocky Mountains, to England. The experiment was carried through without any difficulties, and the animals were disposed of in London at what was, considering the extremely low prices then ruling, the handsome average of \$80 per head. The *Liverpool Journal of Commerce* says: "The effect of this new source of supply upon British and other meat producers, including the older provinces of Canada, will be watched with much interest."

Australian mutton and Canadian beef.

472. The mutton supplied from Australia and South America appears to find more favour in the English market than that from this country, and the demand for Canadian mutton is not increasing; but it speaks well for the quality of Canadian beef, when it is able, in the face of the keenest

competition, to not only hold its own, but to find the demand for it steadily growing, and it is a trade which deserves to be encouraged in every possible manner.

473. The quantity of dead meat exported from the Australasian Colonies to England is increasing as is shown by the following figures of meat delivered in London :—

Export of
dead meat
to Eng-
land from
Australas-
ian col-
onies.

AUSTRALIAN AND NEW ZEALAND KILLED FRESH MEAT DELIVERED
IN LONDON, 1881-1886.*

	Cwt.
1881.....	11,300
1882.....	34,540
1883.....	93,420
1884.....	222,560
1885.....	230,400
1886.....	294,220

The rapidity with which this trade has sprung into existence may be gathered from the fact that Australian-killed fresh meat was delivered in London for the first time in 1880, and consisted of only 69 bodies of beef and 555 carcasses of sheep.

474. The Argentine Republic also, for both live and dead meat threatens to become a very formidable competitor. In 1883, that country only exported to Great Britain \$50,000 worth of mutton, and in 1886, \$1,802,483 worth, and last year its Government passed a law according bounties to the extent of \$500,000 a year for 3 years on the exportation of live and dead meat.

Export of
live and
dead meat
from the
Argentine
Republic.

475. Some idea of the quantity of meat required annually by Great Britain from foreign countries may be obtained from the following figures of the imports of meat in 1887 :—

Imports of
meat into
United
Kingdom.

IMPORTS OF MEAT INTO THE UNITED KINGDOM, 1887.

Cattle.....	No.	265,961
Sheep and lambs.....	"	971,403
Beef.....	Cwt.	873,991
Mutton, fresh.....	"	784,841
Preserved meats.....	"	519,180

*Agricultural Department Returns, Privy Council Office, London, September, 1887.

Though it has been shown that the competition is not only very severe, but is also increasing, there seems no reason to doubt but that Canada, with the limitless prairies of the North-West for a breeding ground, will continue to successfully hold her own in this trade, and the shortness of the voyage, as compared with those from South America and Australasia, should be an important factor in assisting her to maintain a prominent position on the English market.

Shipment
of young
stock to
Aberdeen
for fatten
purposes.

476. A new trade in connection with cattle has also been inaugurated in the shipment of young stock to Aberdeen, where they are distributed among the feeding farms in the neighbourhood, and it is found that they fatten very satisfactorily.

Number
of horses
exported.

477. The total number of horses that have been exported from this country since Confederation is 261,750, of which 252,159 have gone to the United States, 4,943 to Great Britain and 4,648 to other countries. The total number imported during the same period, principally for improvement of stock, is 29,290.

Export of
horses to
England
for army
purposes.

478. The apparent success of the horses imported into the United Kingdom from Canada for army purposes, and the satisfaction that they gave, aroused the jealousy of English agriculturists, and the authorities were persuaded to discontinue these purchases, and to turn their attention to encouraging breeders at home. It is, however, extremely probable that the demand will before long be revived, and it is to be hoped that Canadian farmers will lose no time in profiting by the advice and remarks of the officers sent out to purchase, with reference to the style of animal required, that when the time does come again, as it inevitably will, a far larger supply will be found available, than was the case in the first instance, and even if the animals thus produced are not required for army purposes, they will be found

greatly improved for general purposes. The market is sure to come, and there is likely to be much money made out of the trade.

479. The number of ranches in operation was 135, and they comprised 4,466,844 acres, and the quantity of stock in the districts of Alberta and Assiniboia was, as far as returns were available, 101,382 cattle, 6,924 horses and 15,266 sheep. The actual numbers are undoubtedly larger. Owing to the unprecedented severity of the winter of 1886-87 cattle suffered considerably, and many very severe losses were sustained, but it is satisfactory to know that they were trifling in comparison with the losses in Wyoming, Dakota and Montana. Judged by the experience of that winter, there seems no doubt that unacclimatized cattle from the east suffer more from severe weather than range cattle, the losses among the former having been about 25 per cent., and among the latter from 8 to 10 per cent.

The
ranches in
the North-
West.

480. The work in connection with the establishment and organization of experimental farms, as provided for by legislation in 1886 has proceeded very satisfactorily during the past year. The Central Farm at Ottawa is almost in complete working order, the buildings necessary for carrying on the work in the most approved manner are being provided, and there will be every facility for making useful experiments in testing all sorts of cereals, roots and other farm products for the purpose of proving which are the most promising and profitable varieties to be grown in the different Provinces.

Experi-
mental
Farm at
Ottawa.

481. Sites for the experimental farms for the Maritime Provinces, Manitoba, British Columbia and the North-West Territories have been determined on, one near Nappan, Nova Scotia, one near Brandon, Manitoba, one at Agassiz Station,

Experi-
mental
Farms in
the Prov-
inces.

British Columbia, and one near Indian Head, N.W.T. It is expected that during the present year the organization of the entire system will be nearly completed, and the several farms provided with the necessary buildings and equipments.

Experiments and tests with seed.

482. A large number of samples of agricultural seeds were received at the Central Farm from farmers throughout the country, sent for the purpose of having their vitality tested, the results of the tests being communicated to the senders. An early ripening hard spring wheat, known as Ladoga wheat, was also obtained from northern Russia, and distributed among the farmers generally, but more particularly in Manitoba and the North-West; the reports concerning it have so far been very satisfactory, and a further quantity has been imported for the purpose of fully completing the experiments.

PART III—IMMIGRATION.

(The figures in this section relate to the calendar year.)

Increase in immigrant arrivals.

483. According to the returns published by the Department of Agriculture, the increase in the number of immigrants, during 1887, was very considerable, both as regarded immigrant passengers and immigrant settlers.

Immigrant settlers 1887.

484. The total number of immigrant arrivals was 175,579, of whom 91,053 were passengers for the United States, while the remaining 84,526 expressed their intentions of remaining in Canada, this being an increase in the number of settlers, as compared with the preceding year, of 15,374. The following numbers are those of immigrant arrivals in

each of the years named, who stated their intention of settling in Canada :

IMMIGRANT SETTLERS IN CANADA, 1880-1887.

1880.....	38,505
1881.....	47,991
1882.....	112,458
1883.....	133,624
1884.....	103,824
1885.....	79,169
1886.....	69,152
1887.....	84,526

485. It is stated that 27,390 persons went into Manitoba and the North-West Territories during the year, and that 5,705 persons went out, making the net total number of settlers 21,685, leaving 62,841 persons as settlers in other parts of the Dominion.

Settlers in
the North-
West.

486. Assisted passages were granted during the year to agricultural labourers and their families, and to female domestic servants, but the Government have decided to change their policy in this respect, and no assisted passage tickets have been granted since the 27th of April in the present year, it being now their intention to encourage desirable immigration in every possible way, except that of paying any part of the passage money, or arranging for tickets at reduced rates. In a country situated geographically as Canada is, it is impossible to organize any system by which the ultimate destination of the immigrants can be guaranteed. It is hoped that the new policy will not cause any material check in the immigration of desirable classes, and it is to be remarked that the conditions are now different than those which obtained when the assisted passage policy was inaugurated.

Discon-
tinuance
of assisted
passages.

487. Some of the Australasian colonies did offer large inducements in the way of free and assisted passages, but with one exception, they have at present withdrawn from

Assisted
passages
in Aus-
tralasian
colonies.

that system. It has been used to the extent of directing a large volume of emigration towards those colonies.

Nationalities of immigrants.

488. The nationalities of the immigrants arriving at the ports of Quebec and Halifax were as follow :—

Nationalities.	Quebec.	Halifax.	Total.
English.....	16,034	9,829	25,863
Irish.....	3,128	860	3,988
Scotch.....	3,094	736	3,830
Germans.....	570	464	1,034
Scandinavians.....	7,659	935	8,594
French and Belgians.....	147	240	387
Other countries.....	2,117	339	2,456
	32,749	13,403	46,152

And the nationalities of the numbers reported in each province by the Customs officials are given below :—

PROVINCES.	English	Irish.	Scotch.	German.	United States.	Canadian	Others.	Total.
Ontario.....	514	140	104	85	681	13,071	1,700	16,295
Quebec.....	63	15	7	6	116	601	26	834
Nova Scotia.....	133	8	62	1	74	513	63	854
New Brunswick..	1,374	467	434	460	2,122	4,925	317	10,100
Manitoba.....	265	45	37	12	150	289	138	936
British Columbia	24	11	24		15	106	6	186
P. E. Island.....	170	11	38	10	196	172	20	617
	2,480	697	706	574	3,354	19,677	2,270	29,822

Customs arrivals.

489. The arrivals with settlers' goods, as reported by the Customs officials, showed an increase of 4,545 as compared with 1885, and the number of those, chiefly children, brought into Canada last year by charitable societies and individuals, was 2,298 being 310 more than in the previous year. The following are the number brought out in this way during the last six years:—

	Number.
1882.....	1,048
1883.....	1,218
1884.....	2,011
1885.....	1,746
1886.....	1,988
1887.....	2,298

490. All the immigrants by sea arrived in steamers, sailing vessels not having been for some years used for this purpose. Arrivals
by sea.

491. The numbers of immigrants reported by the agents and by the Custom houses may be taken to be correct as far as they go, but there not any means of ascertaining with accuracy the arrivals and departures from and to the United States. Where there is such a long line of open frontier, there must always be a considerable movement of population on both sides, of which it is impossible to obtain any record. The nearest possible approximation would be to obtain a record of the *ins* and the *outs* on the principal routes of travel, the differences between which would be the net immigration or emigration, as the case may be. Difficulty
of obtain-
ing correct
returns.

492. It is only possible to form a general idea of the numbers that yearly settle in each Province; the agents have no means at their command by which they can follow the immigrants after they once leave the agency, and the subsequent movements of many would probably considerably alter the figures given. The greatest care is taken by the Department and by the agents, that all the returns shall be as accurate as possible, but the only ones that can be thoroughly relied on, except the entries at Custom houses, which are a registration by names, are those of arrivals at the principal sea ports, as Quebec and Halifax, which are also a registration by names and callings, from the ships' passenger lists. No distinction is made in British Columbia between passengers and immigrants, and the figures for that Uncer-
tainty of
immigra-
tion re-
turns.

Province can only be arrived at by estimation. The numbers of immigrants reported by the several agents, while correct in themselves, are subject to subsequent unascertainable movements, and should, therefore, be taken as approximate. The figures from which the totals for the Dominion are made up, are those supplied by the agents at the various points of entrance, and are, therefore, of course, liable to similar alterations, for while a record is kept of all immigrants arriving, no account is taken of those emigrating from the country

Money,
and effects
brought in
by settlers.

493. A comparative statement of the values of money and effects brought into Canada by immigrants during the years 1885, 1886, and 1887, according to the reports from the various agencies, is given below, to which is added the amount of money brought in by other arrivals reported by Custom houses:—

	1885.	1886.	1887.
Reported at Agencies.....	\$3,058,592	\$2,458,241	\$2,731,005
do Customs	1,085,274	997,335	1,148,903
Total.....	\$4,143,866	\$3,455,576	\$3,879,908

And an examination of the following comparative table will show that the value of money and effects brought in by immigrants is a very important addition every year to the wealth of the country :

VALUE OF MONEY AND EFFECTS BROUGHT INTO CANADA
BY SETTLERS SINCE 1875

	Value.
1875.....	\$1,344,573
1876.....	686,205
1877.....	632,269
1878.....	1,202,563
1879.....	1,152,612
1880.....	1,295,565
1881.....	4,188,925
1882.....	3,171,501
1883.....	2,784,881
1884.....	4,814,872
1885.....	4,143,866
1886.....	3,455,576
1887.....	3,879,908

It must be remembered, however, that the means of obtaining information of this kind is very defective, and there can be little doubt that the actual value is considerably above the amount reported.

494. The trades and occupations of the immigrants landed at Quebec and Halifax were as follow :—

	Quebec.	Halifax.	Total.
Farmers	2,371	1,018	3,389
Labourers	12,406	4,834	17,240
Mechanics	986	345	1,331
Clerks and Traders.....	111	108	219
Female Servants.....	No returns	1,212	1,212
	<hr/>	<hr/>	<hr/>
	15,874	7,517	23,391

Trades and occupations of immigrants.

495. Of the single adults that arrived at Quebec, 13,226 were males and 3,780 females. The demand for female help and domestic help from all parts of the Dominion continues unabated, and it must be a very long time before there is an adequate supply to meet it.

Demand for female help.

496. The total expenditure in 1887 was \$313,773, and in 1886, \$300,920 ; there was an increase, therefore, in the year under consideration of \$12,853.

Immigration expenditure.

497. The cost of settlers per head, not including arrivals reported through the Customs, was \$5.74 and including arrivals so reported, was \$3.71 ; the figures for the preceding year, 1886, being \$6.87 and \$4.36 respectively. The following table shows the cost per head of settlers since 1875 :—

Cost of settlers per head.

YEAR.	NOT INCLUDING CUSTOMS.		INCLUDING CUSTOMS.	
	Settlers.	Amount.	Settlers.	Amount.
		\$ cts.		\$ cts.
1875.....	19,243	14 00	27,382	10 83
1876.....	14,499	19 60	25,633	11 12
1877.....	15,323	12 00	27,082	6 78
1878.....	18,372	9 63	29,807	6 23
1879.....	30,717	5 74	40,492	4 35
1880.....	27,544	6 59	38,505	4 71
1881.....	32,587	6 32	49,991	4 30
1882.....	81,904	1 23	112,458	3 08
1883.....	98,637	4 26	133,624	3 15
1884.....	68,633	6 28	103,824	4 15
1885.....	46,868	6 62	79,169	3 92
1886.....	43,875	6 87	69,152	4 36
1887.....	54,704	5 74	84,526	3 71

And it will be seen that the average cost per head is considerably less than it was some years ago.

Emigration from United Kingdom 1837-1887.

498. According to Mr. Mulhall (Fifty years of Progress, p. 12) the number of persons who have emigrated from the United Kingdom, during the fifty years of Her Majesty's reign, has been 9,101,000, and their destinations have been as follow:—

United States.....	5,902,000
Australia.....	1,484,000
Canada.....	1,311,000
Cape, &c.....	404,000
	9,101,000

By far the largest proportion, viz., 64·85 per cent., went to the United States, and a slightly larger number went to Australia than came to Canada, the proportions being 16·30 per cent. and 14·40 per cent. respectively. Mr. Mulhall says that the components of the above number were:

Irish.....	4,186,000
English.....	4,045,000
Scotch.....	870,000
	9,101,000

CHAPTER IX.

MINERAL STATISTICS.

499. There is hardly a mineral of value, with the exception of tin, that is not known to exist in greater or lesser quantity in some part of the Dominion, but its mineral wealth is to all intents at present an unknown quantity; many parts of the country where minerals are known to be, being, as yet, practically unexplored. Some idea, however, of the rich and varied resources of the country may be gathered from the following classified list of the economic minerals of Canada, as arranged in the Geological Museum at Ottawa, where specimens of all of them are exhibited:—

Classified
list of the
minerals
of Canada.

(1.) *Metals and their Ores*—Native iron, magnetic iron ore, iron sand, hematite, Ilmenite or titaniferous iron ore, limonite (including bog iron ore), spathic iron ore, clay iron-stone, native copper, sulphides of copper, sulphide of zinc, sulphide of lead or galena, native silver and ores of silver, gold, platinum, sulphide of antimony, oxysulphide of antimony, and sulphide of bismuth.

(2.) *Materials used in the Production of Heat and Light*.—Anthracite, bituminous coal, lignite or brown coal, Albertite, bituminous shale, petroleum, peat.

(3.) *Minerals applicable to certain Chemical Manufactures, and their Products*.—Iron pyrites, sulphuric acid, &c., pyrrhotine or magnetic iron pyrites, apatite or phosphate of lime, magnesite or carbonate of magnesia, calcite or carbonate of lime, chromic iron, oxides of manganese.

(4.) *Mineral Manures*.—Gypsum, shell-marl.

(5.) *Mineral Pigments and Detergents*.—Iron ochres, &c., barytes or heavy spar, soap clay.

(6.) *Salt, Brines, and Mineral Waters*.—Salt and brine, mineral waters.

(7.) *Minerals applicable to Common and Decorative Construction*.—Limestones, dolomites, sandstones, granite and syenite, gneiss, Labradorite rock, marbles (limestones), serpentines, breccias, slates, flagstones, common lime, hydraulic lime, bricks and brick clays, drain tiles.

(8.) *Refractory Materials, Pottery Clays, and Pottery*.—Plumbago or graphite, soapstone, potstone, mica rock, mica, asbestos, fire clays, sandstone (refractory), pottery clay, and pottery.

(9.) *Materials for Grinding and Polishing*.—Whetstones, hones, bath-brick, Tripoli, grindstones, millstones.

(10.) *Minerals applicable to the Fine Arts and to Jewellery*.—Lithographic stone, porphyrites, Labradorite, albite, Perthite, jasper conglomerate, amethystine quartz, agates, Canadian precious stones.

(11.) *Miscellaneous*.—Sandstone for glass-making, moulding sand and clay, carbonaceous shale, artificial stone.

500. The principal drawbacks to mining development hitherto have been want of capital, and the fact that a number of the enterprises that have been started have been purely of a speculative character, which has thrown suspicion on genuine undertakings, and driven investors to place their funds elsewhere, but as the explorations of the Government Geological Survey are continually making better

known the extent and locality of minerals, and the fiscal policy of the Government is calculated to stimulate production, public attention is becoming more attracted to our mining resources, and it may not be long before the mining industry becomes second in importance only to that of agriculture.

501. Nova Scotia, British Columbia, Quebec, and the north and west portions of Ontario are essentially the mining Provinces, New Brunswick not being in this respect so richly endowed, and Manitoba not being known at present to contain any metalliferous ores, though coal has been found in this Province, and in the North-West Territories the coal deposits are inexhaustible, the coal-bearing area being estimated at 65,000 square miles, and the quantity of fuel known to underlie some portions of this area at from 4,500,000 to 9,000,000 tons per square mile. This coal varies from lignite to bituminous coal, and in the Rocky Mountains anthracite coal has been found, beds of which are being worked near Banff on the Canadian Pacific Railway, by the North-West Coal and Navigation Company, and the Canadian Anthracite Company. All the coal supplied to the Canadian Pacific Railway at Brandon and points west, is now exclusively the product of Canada, and the Canadian Anthracite Company are finding a constant demand for their coal in the San Francisco market, and as the Banff mines are nearer to that city than are any of the United States anthracite coal fields, it is probable they will become the principal source of supply for that class of fuel. Anthracite coal has been found cropping out in Queen Charlotte Island, B. C., but though a considerable sum has been spent in perfecting and mining, no good results have as yet been accomplished. "The discovery and successful development of anthracite coal in the heart of the Rocky Mountains, midway between the coal fields of British Columbia and those

Distribution of minerals in Canada.

“of the prairie region on the east, situated, too, right on the
 “line of our great transcontinental railway, and within easy
 “reach of the Pacific coast, may furnish to those who are
 “concerned about the possible future relations of Canada and
 “the British Empire, some material for reflection.”*

Works re-
ferred to.

British Columbia and Nova Scotia are, however, at present the principal coal producing Provinces, the beds in the North-West, with the exception of those above mentioned, not being worked to any extent.

502. The figures relating to Canada used in this chapter have been taken almost entirely from a statistical report on the minerals of Canada, compiled by Mr. L. Coste of the Geological Survey. The figures relating to the United States and foreign countries have been principally taken from “The Mineral Resources of the United States, 1886,” by David J. Day, Chief of Division of Mining Statistics and Technology in the United States.

Mineral
production
of
Canada
1886.

503. The following statement of the mineral production of Canada in 1886, the latest year for which complete returns are available, will give some idea of the present value of an industry which is still in its infancy:—

* Report of Minister of Interior, 1887.

MINERAL PRODUCTION OF CANADA—1886.

PRODUCT.	Quantity.	Value.	
		\$	
Antimony ore.....	Tons. 665	31,490	
Arsenic.....	" 120	5,460	
Asbestos.....	" 3,458	206,251	
Charcoal.....	Bush. 901,500	54,000

Lime.....	Bush. 1,635,950	283,755	
Sands and gravels.....	Tons. 646,552	143,641	
Bricks.....	M. 139,345	873,600	
Tiles.....	" 12,416	142,617	
Miscellaneous clay products.....		112,910	
Total.....		10,529,361	

The quantity of salt produced was equivalent to 445,421 barrels of 280 lbs.

504. The estimated value of the mineral production in 1887 was \$12,959,073, but this amount is subject to revision; for details see the end of the chapter.

Mineral
production 1887.

**Export of
minerals.**

505. Minerals to the value of \$3,830,821 were exported in 1886, leaving a balance of \$6,698,540 representing the value used in the country, and the following table shows the total value of minerals exported by Provinces since, 1873:—

Ontario.....	\$ 8,826,464
Quebec.....	6,323,576
Nova Scotia.....	9,473,081
New Brunswick.....	1,908,601
Manitoba.....	5,153
British Columbia.....	22,442,765
Prince Edward Island.....	5,454
	<hr/>
Total.....	<u>\$48,985,094</u>

The largest quantities of minerals have been exported from British Columbia, Nova Scotia and Ontario, the first named Province having produced 45·81 per cent., the second 19·34 per cent., and the third 18·00 per cent. of the total amount.

**Countries
to which
minerals
were ex-
ported.**

506. The next statement shows the principal countries to which minerals have been exported since 1874, and the value of the respective exports:—

United States.....	\$33,437,397
Great Britain.....	7,212,366
Newfoundland.....	1,604,977
West Indies.....	467,866
Sandwich Islands.....	163,905
Germany.....	148,413
St. Pierre.....	141,818
Mexico.....	138,475
British West Indies.....	125,411
Other Countries.....	203,064
	<hr/>
Total.....	<u>\$43,650,692</u>

The United States took 76·24 per cent. of the total exports, Great Britain 16·44 per cent., and Newfoundland

3.66 per cent, leaving 3.66 per cent. to be divided amongst other counties.

507. First in importance, as regards value, among the minerals now being worked in Canada, is gold, the production of which is at present confined almost entirely to British Columbia and Nova Scotia, though a small quantity is annually produced in Quebec, and gold has been obtained from some parts of Ontario. It may be that when the country north and west of Lake Superior is fully explored, valuable deposits of gold may be found, as it is known to exist in many localities, and there is at present considerable excitement at Sudbury Junction on the Canadian Pacific Railway over reputed valuable discoveries of this metal, a number of claims have been taken up, and will probably be extensively worked during the present summer. A small amount of gold is also obtained each year from the Saskatchewan River near Edmonton. Gold was first discovered in British Columbia in 1857 in the Thompson River near Nicoamen, and in Nova Scotia in 1860 near Tangier Harbour, since which date the value of the production in the latter Province has been \$8,042,104. British Columbia since 1858 has produced \$50,209,517, as near as can be ascertained, but as only an estimate can be made of the quantity carried away in private hands, the actual amount is probably larger.

508. The following table gives the value of the gold production in the three gold producing Provinces since 1842:—

Gold mining.
Gold production in Canada.

VALUE OF PRODUCTION OF GOLD IN BRITISH COLUMBIA, NOVA SCOTIA AND QUEBEC, 1862-1886.

Year.	British Columbia.	Nova Scotia	Quebec.	Total.
	\$	\$	\$	\$

Total	43,259,431	8,042,104	202,502	51,504,037

The production of gold in the Province of Quebec has been regular since 1862, but figures are not available before 1877. The total quantity of quartz crushed in Nova Scotia since 1862 has been 552,789 tons, which has yielded an average of \$15.70 per ton.

Gold produce of the world.

509. The principal gold producing countries of the world are the Australasian Colonies, the United States and Russia, and the following figures give the total gold produce of the world in each of the years 1882 to 1885 :—

GOLD PRODUCE OF THE WORLD, 1882 TO 1885.

COUNTRY.	1882.	1883.	1884.	1885.
	Oz.	Oz.	Oz.	Oz.
Australasia	1,553,542	1,430,501	1,502,543	1,442,437
United States.....	1,572,199	1,451,251	1,489,928	1,537,930
Russia.....	1,154,603	1,154,603	1,055,452	1,225,414
Other Countries	661,454	668,945	683,155	707,063
Total.....	4,941,798	4,705,300	4,731,078	4,912,844

510. The gold produce in Australasia in 1886 was 1,389,048 oz. (Victorian Year Book, 1886-87, p. 471), which, if valued at £4 per ounce, would represent a total value in our currency of \$27,040,154. The gold produce in the United States in 1886 was 1,881,250 ounces, valued at \$34,869,000. According to Mr. Hayter, the total quantity of gold, raised in the Australasian Colonies from 1851 (the year of the first discovery of gold) to 1886, has been 81,024,307 ounces, which may be valued at \$1,577,273,176, and according to Mr. Day the total value of the gold produce of the United States since 1804 has been \$1,743,715,670. From 1804 to 1848, however, the amount is only placed at \$13,243,475.

Gold produce of the Australasian colonies and the United States.

511. The following table shows the amount of coal produced in British Columbia and Nova Scotia in each year since 1874:—

Production of coal in Nova Scotia and British Columbia.

PRODUCTION OF COAL IN NOVA SCOTIA AND BRITISH COLUMBIA,
1874 TO 1886.

YEAR.	Nova Scotia.	British Columbia.	Total.
	Tons.	Tons.	Tons.
1874	977,446	81,000	1,058,446
1875	874,905	110,000	984,905
1876	794,803	139,000	933,803
1877	848,395	154,000	1,002,395
1878	863,081	171,000	1,034,081
1879	882,863	241,000	1,123,863
1880	1,156,635	268,000	1,424,635
1881	1,259,182	228,000	1,487,182
1882	1,529,708	282,000	1,811,708
1883	1,593,259	213,000	1,806,259
1884	1,556,010	394,070	1,950,080
1885	1,514,470	365,000	1,879,470
1886	1,682,924	326,636	2,009,560
Total.....	15,533,681	2,972,706	18,506,387

The above figures, to all intent, represent the production of the Dominion during the period, though a small quantity of coal has been mined in New Brunswick in each year, of which particulars are not available, and in 1886 43,000 tons were produced in the North-West Territories.

Export of
coal from
Canada
1874-1886.

512. The next statement gives the quantities of coal exported from Nova Scotia, British Columbia, and New Brunswick, being the produce of each Province respectively, during the years 1874 to 1886, inclusive :—

EXPORTS OF COAL FROM NOVA SCOTIA, BRITISH COLUMBIA AND NEW BRUNSWICK, 1874-1886.

YEAR.	Nova Scotia.	British Columbia.	New Brunswick.	Total.
	Tons.	Tons.	Tons.	Tons.
1874.....	252,124	51,001	7,606	310,731
1875.....	179,626	65,842	4,527	249,995
1876.....	126,520	116,910	4,946	248,376
1877.....	173,389	118,252	9,669	301,310
1878.....	154,114	165,734	7,969	327,817

Total	2,441,352	2,332,403	102,199	4,875,954

513. The imports of coal into the Dominion during 1885 and 1886 were as follows:—

Imports of coal 1885 and 1886.

PROVINCES.	1885.	1886.
	Tons.	Tons.
Ontario.....	1,492,459	1,587,372
Quebec.....	355,158	343,150
Nova Scotia.....	25,516	20,046
New Brunswick.....	45,500	43,767
Manitoba.....	12,200	3,497
British Columbia.....	870	615
Prince Edward Island.....	1,990	1,783
Total.....	1,933,693	2,000,230

514. Newfoundland, the United States and the West Indies are the principal markets for Nova Scotia coal, and the United States take about 97 per cent., of the exports, from British Columbia. This coal is of a very high quality, and is considered the best that is produced on the Pacific Coast.

Countries to which coal was exported.

Superiority of British Columbia coal.

515. Mr. Day, speaking of this coal, says:* "The coal from this field (Nanaimo) possesses some of the characteristics of lignite. It bears transportation well, and is delivered in the market in excellent condition, especially that from the Wellington mines, which always commands the highest prices in San Francisco and sells very readily. It is a good coking coal.

"The quality and condition of the Nanaimo coal gives it a preference in the market over the Washington Territory coal.

"The Canadian Pacific Railroad and the entire districts through which it passes procure their supply of coals now principally from local interior mines which are rapidly being opened. Australia will continue to supply the eastern countries and the islands of the Pacific with all the coals they may require, and England having export freights from Chili and Peru, can send coal to these countries cheaper than they can be supplied from British Columbia, so that these circumstances will all combine to keep San Francisco the principal market for British Columbia coal."

Favourable analysis of British Columbia coal.

516 In the same work, in a table giving analyses of eighteen different qualities of coal from the mines in Washington Territory and British Columbia, the coal from Wellington mine, British Columbia, is the only one that contains no moisture, the analysis being: Fixed carbon 55.50, volatile matter 34.70, and ash 9.80=100.

Coal production of the world.

517. The following table taken from the same book, shows the commercial coal produced by the principal countries of the world, for the most part in 1886:

* Mineral Resources of the United States, Washington, 1887.

COAL PRODUCTION OF THE WORLD, 1886.

COUNTRY	Quantity.	COUNTRY.	Quantity.
	Tons.		Tons.
Great Britain.....	157,518,483	New Zealand.....	511,063
United States.....	112,743,403	India (Bengal).....	1,200,957
Germany.....	78,266,288	Borneo.....	5,866
France.....	20,044,597	Nova Scotia.....	1,682,924
Belgium.....	17,253,144	British Columbia.....	326,635
Austria-Hungary.....	17,191,000	Japan.....	900,000
Russia.....	4,500,000	Australia.....	2,878,863
Sweden.....	264,000	Other Countries.....	10,500,000
Spain.....	1,00,000		
Italy.....	320,000	Total.....	427,007,222

The figures for Nova Scotia have been altered to agree with Canadian returns. Long tons of 2,240 pounds are used with reference to Great Britain, Australia, India, New Zealand and Russia, short tons of 2,000 pounds for the United States, Nova Scotia and British Columbia, and metric tons of 2,204 pounds for continental countries. The increase in the world's production, exclusive of the United States, over that of 1885, was 5,275,295 tons.

It is calculated that even at the present state of consumption, there is coal enough still in England to last for 600 years, the Parliamentary report of 1874 estimating the amount at 90,000 million tons. Supply of coal in England.

" 518. Copper constitutes one of the most important of the mineral treasures of the Dominion, and is destined to occupy a very important rank amongst its resources. Its ores are distributed over vast tracts of country in Ontario, in the Eastern Townships of Quebec, in Nova Scotia, and British Columbia, and traces of it are met with in New Brunswick." There are no copper smelting works in operation in Canada, and consequently all the ores are exported for treatment abroad. It is said that smelting Copper.

works are to be established at Sudbury in Ontario, in which neighbourhood, are, what are perhaps the largest deposits of copper ore in the world. These deposits have been only very recently discovered.

Exports of
copper.

519. During the years 1860 and 1869 inclusive, copper ore to the value \$1,593,978 was exported from Quebec, and of \$2,495,008 from Ontario, but since that year, until 1886, there was no export from Ontario. The total value exported from the two Provinces since 1860 has been \$7,631,145. The exports from the other Provinces have been too small to be worth notice.

It is said the Customs returns of quantity and value have been low, and the amount actually exported has been considerably larger than the above figures. The following table give the exports of copper for the 10 years, 1877-1886:—

EXPORTS OF COPPER FROM CANADA, 1877 TO 1886.

YEAR	Quantity.	Value.	YEAR.	Quantity.	Value.
	Lbs.	\$		Lbs.	\$
1877.....	1,880,090	245,406	1882.....	1,864,170	182,562
1878.....	355,160	36,499	1883.....	1,400,300	148,709
1879.....	408,860	47,817	1884.....	2,714,400	273,423
1880.....	1,434,700	192,171	1885.....	2,626,000	262,600
1881.....	1,244,780	125,753	1886.....	2,403,040	249,259

In 1886, 164,040 lbs. of the value of \$16,404 were exported from Ontario, with that exception, the whole quantity during the period went from the Province of Quebec.

Iron.

520. Iron is found in great abundance and variety in all the Provinces of the Dominion except Manitoba, but it has nowhere received the attention it deserves, even in

Nova Scotia, where the ore is of extreme purity, and which is the only Province in which fuel and ore occur close together, the production is limited to the Acadia mines at Londonderry. It is to be hoped that the increased duties imposed on iron and steel by the Government in 1887, will have the intended effect of promoting the active development of this industry.

521. No exact returns of the total production of iron in the Dominion are at present available, but by treating the exports from Ontario as representing the production of that Province, Mr. Coste put the production for 1886 at :

	Tons.
Nova Scotia.....	49,735
Ontario.....	16,032
British Columbia.....	3,941
	69,708

Production of iron in Canada 1886.

representing a total value of \$126,982. According to the reports of the Province of Nova Scotia the production of iron ore since 1876 has been 431,625 tons of 2,240 lbs.

522. The following table gives the quantity and value of iron ore exported from Canada since Confederation : --

Exports of iron ore from Canada 1867-1886.

EXPORTS OF IRON ORE FROM CANADA, 1867-1886.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1867.....	4,194	12,798	1878.....	4,315	8,846
1868.....	25,312	54,723	1879.....	9,467	20,974
1869.....	27,848	60,298	1880.....	48,682	124,180

1875.....	13,338	28,565	1886.....	19,164	58,410
1876.....	9,455	18,397			
1877.....	3,785	10,528	Total.....	520,532	1,312,923

The world's production of iron and steel.

523. The following table gives the world's production of pig iron and steel, principally in 1886. Tons of 2,240 pounds are used with reference to Great Britain, the United States, Russia and "Other Countries," and metric tons of 2,204 pounds for continental countries:—

THE WORLD'S PRODUCTION OF IRON AND STEEL, 1886.

COUNTRIES.	Pig Iron.	Steel.
	Tons.	Tons.
Great Britain	6,870,665	2,364,670
United States.....	5,633,329	2,562,502
Germany and Luxemburg	3,489,231	1,360,620
France	1,507,850	466,913
Belgium	697,110	139,215
Austria Hungary.....	726,835	256,023
Russia.....	498,400	225,140
Sweden.....	464,737	80,550
Spain.....	139,920	15,000
Italy	18,405	3,450
Other Countries (estimated)	150,000	30,000
Total.....	20,246,482	7,504,083

Production of iron and steel in United Kingdom and United States.

524. Great Britain and the United States combined produced 62 per cent. of the total quantity of pig iron, and 64 per cent. of the total quantity of steel produced in the world, while of steel alone it will be seen that the United States is now the largest producer. The proportions respectively are: Great Britain, pig iron, 33 per cent.; steel, 31 per cent. The United States, pig iron, 28 per cent.; steel, 34 per cent.

Petroleum.

525. Though petroleum has been found in Quebec, Nova Scotia and New Brunswick, and traces of it in the North West Territories, it is in Ontario where the most of the oil has been and is obtained. Bothwell, Enniskillen and Petrolia are the largest oil producing districts, the oil being obtained at a depth of from 400 to 500 feet.

526. The following table, according to Mr. Coste, contains the only reliable statistics of Canadian production of oil that are available, and these figures do not give the total production since the quantity of crude oil used as such is not included :—

Canadian
production
of oil.

PRODUCTION OF CANADIAN PETROLEUM AND NAPHTHA AND CORRESPONDING QUANTITIES OF CRUDE OIL, 1881-1886.

YEAR.	Refined Oils.	Crude Equivalent calculated.
	Imp. galls.	Imp. galls.
1881	5,380,081	10,760,162
1882	5,111,893	11,359,762
1883	6,204,544	13,787,875
1884	6,730,063	16,825,170
1885	5,853,290	14,633,225
1886	6,469,667	17,025,439

527. And the following table shows the exports during the same period :—

Exports of
Canadian
oil.

EXPORTS OF CANADIAN PETROLEUM, 1881-1886.

YEAR.	Gallons.	Value.
		\$
1881	501	99
1882	1,119	286
1883	1,328	710
1884	1,098,090	33,168
1885	337,967	10,562
1886	241,716	9,855

528. The amount therefore of Canadian oil consumed in the country during those six years was 84,056,867 imperial gallons. The amount imported during the same period was 7,476,394 imperial gallons. The total consumption in Canada therefore amounted during that time to 41,533,261 gallons, being an average annual consumption of 6,922,210 gallons.

Consumption
of oil
in Canada.

Petro-
in the
United
States.

529. Petroleum is found in several other countries in the world, but principally in the United States, Russia, Egypt and Burmah. It was first discovered in the United States, in Pennsylvania, in 1859, and the total production of crude oil since then has amounted to 317,323,580 barrels, valued at an equal number of dollars, the States of Pennsylvania and New York having produced 307,956,250 barrels out of the above quantity. The very unexpected discovery of crude petroleum in enormous quantities in the Trenton limestone of north-eastern Ohio in 1886 will probably have an important effect on the output of that State.

Petro-
leum in
Russia.

530. The earliest records of production of petroleum in Russia commence in 1821, though the existence of oil was known hundreds of years before. The Baku oil fields at the eastern extremity of the Caucasus Mountains are the most important. The total shipment of petroleum products from Baku, from 1883 to 1886, have been :—

	Gallons
1883	145,180,705
1884	262,621,710
1885	300,147,775
1886	377,006,120

The total production of crude oil in Russia in 1886 was estimated at 650,000,000 gallons, and the export of refined oil in 1887 at 1,500,000 barrels.

Petro-
leum in
Egypt and
Burmah.

531. The product of Egypt and Burmah have not yet attained any dimensions, but it is probable that the fields of Burmah will now be extensively developed.

Salt.

532. "The salt produced in the Dominion is almost all "manufactured in Ontario, the largest number of wells "being situated in the County of Huron, while a few are "being operated in the Counties of Lambton on the south, "Bruce on the north, and Perth on the west."

533. Out of the 19 wells working in 1886, six were at Goderich where salt was originally discovered in 1865, during boring operations in search of petroleum, when a bed of rock salt 30 feet thick was struck at a depth of 964 feet. "In 1876 a diamond drill was put down near Goderich, which came upon the first salt bed at a depth of 997 feet, and 520 feet below this the drill penetrated six salt beds aggregating 126 feet in thickness, the thinnest bed measuring 6 feet and the thickest 35 feet." The most recently bored well is at Wingham, where salt was struck at a depth of 1,090 feet. The principal wells are those of Goderich, Seaforth, Clinton and Kincardine.

First discovery of salt.

Depth of wells.

534. "The process of manufacture consists of pumping the brine from the wells and evaporating by artificial heat in large pans made of boiler plate. From these the salt is raked from time to time as it crystallises out from the solution, the pans being only emptied at intervals for cleaning."

Process of manufacture.

535. The following figures are said to give the total sales of salt in the Lake Huron district in the years named, and they practically represent the production of the Dominion, the quantity manufactured in Nova Scotia and New Brunswick being exceedingly small:—

Production of salt in Canada.

	Barrels.	Value.
1883	315,236	\$256,400
1884	280,685	240,096
1885	241,300	183,888
1886	445,421	227,195

The business is not nearly so profitable as formerly, and the extreme decline in value will be at once noticed in the above figures.

Exports of
Canadian
salt.

536. The exports of Canadian salt since 1875 have been as follow :—

EXPORTS OF CANADIAN SALT, 1875-1886.

YEAR.	Ontario.	Quebec.	Other Provinces.	Total.	Value.
	Bush.	Bush.	Bush.	Bush.	\$
1875	541,669	1,089	42	542,800	66,834
1876	905,522	3,833	909,355	84,154
1877	702,494	2,150	704,644	60,677
1878	403,798	3,297	407,095	37,027
1879	587,805	2,616	345	590,766	49,367
1880	464,661	1,887	1,093	467,641	46,211
1881	336,608	6,600	343,208	44,627
1882	181,007	751	181,758	18,350
1883	199,733	199,733	19,493
1884	167,029	167,029	15,291
1885	246,584	210	246,794	18,756
1886	224,695	348	224,943	16,886

It may be taken for granted that all the salt exported from Quebec was manufactured in the Province of Ontario.

Salt out-
put in
United
States.

537. The total output of salt in the United States in 1886 was 7,707,081 barrels, valued at \$4,736,585.

Silver.

538. Almost all the silver ore exported from Canada is obtained from the Lake Superior District. The most celebrated mine has been that of Silver Islet, which was a mere rock in Lake Superior about half a mile from the mainland, its greatest diameter not exceeding 75 feet, and its greatest height above the water 8 feet. This mine was discovered in 1868, and was closed in 1884, and it is estimated that \$3,250,000 worth of silver was produced during that period. Several other mines are now being worked in the neighbourhood of Thunder Bay. Silver has been found in some of the other Provinces, but only to a very small extent.

539. As all the ore produced is exported, the following figures should represent the value of the total production in each year:—

Exports of Canadian silver ore.

EXPORTS OF CANADIAN SILVER ORE, 1873 TO 1886.

YEAR.	Value.	YEAR.	Value
	\$		\$
1873.....	1,243,758	1881.....	15,115
1874.....	493,463	1882.....	6,705
1875.....	472,992	1883.....	8,620
1876.....	354,178	1884.....	13,300
1877.....	42,848	1885.....	29,176
1878.....	665,715	1886.....	25,957
1879.....	154,273		
1880.....	68,205	Total.....	3,594,305

In addition to the above it was estimated that silver to the value of \$167,000 was contained in the copper ores exported from the Capelton mines in Quebec in 1886.

540. The total value of the production of silver in the United States since 1848 has been \$772,283,217. In 1886 the value was \$51,321,500.

United States production of silver.

541. Phosphate or apatite is a mineral which is now receiving considerable attention, and the demand for which, as a fertilizer, is increasing, and its production is likely to become before long a very important industry. Professor Boyd Dawkins, who visited the mines in Ottawa County, Quebec, in 1884, said in a paper that he read on his return to England on Canadian apatite, that: "It would become one of the most profitable resources of this country." The only two places where it is worked at present are in Ottawa County, Quebec, and north of Kingston, Ontario.

Phosphate or apatite.

542. It is to be regretted that no steps have yet been taken for the establishment of works in this country for

Raw material at present all shipped abroad.

the conversion of phosphate into superphosphate, in which case a large home market might be created for this valuable fertilizer, much to the benefit of the country, while the increase in profit to the manufacturer would be considerable. As it is, at present, all the raw material is shipped abroad, principally to England and Germany, and it is believed that a considerable quantity is shipped back to the United States, both in a crude and manufactured condition. Of the total output of 21,000 tons in 1887, only 200 tons were used in Canada and 300 tons sent to the United States.

Canadian
fertilizer
factories.

543. The only attempts so far made to utilize Canadian phosphate in this country have been at the fertilizer factories at Brockville and Smith's Falls, and the demand for these products is growing in a very encouraging manner. A mill has been erected at Buckingham for crushing and pulverizing the raw material which reduces it to a fineness equal to flour.

Experi-
ments
with phos-
phate and
super-
phos-
phate.

544. There is considerable difference of opinion respecting the beneficial results to the soil by the application of the raw pulverized material. Experience seems to show that for immediate returns, soluble phosphates, *i.e.*, the raw material treated with sulphuric acid, must be used, and where insoluble phosphate, or the raw pulverized material is used, it is absolutely necessary that it be reduced to an impalpable powder. Experiments have been made at different times, more or less favourable to the raw material, and a series of experiments will be made during the coming season at the Central Experimental Farm at Ottawa. Great interest is being excited in this question of the use of crude phosphate; since if its utility be established, it would create a home market, which would not only increase the demand, but would be of incalculable benefit to the agricultural interest.

545. The Canadian *Mining Review*, December, 1887, ^{Importance of fertilizers.} says: "There is evidently a large and extending field in this direction" (the manufacture of fertilizers), "both for profit and usefulness. The establishment of fertilizer factories in Canada, and the education of the farmer in the use of manures is a cause that invites the best attention, both of the capitalist and of the Government."

The Minister of Agriculture in his report, 1887, says: "It is to be hoped that our farming community will see the necessity of adopting some measures for keeping the land required for the growth of cereals, up to its standard, by using fertilizers, and it does seem anomalous that this rich natural product at our very door, should be shipped away to Great Britain and the United States, without its value being recognized by our own farming community."

546. The following table gives the exports of phosphate ^{Exports of phosphate from Canada.} from 1877 to 1886 :—

EXPORTS OF PHOSPHATE FROM CANADA, 1877 TO 1886.

Year.	Quantity.	Value.	Year.	Quantity.	Value.
	Tons.	\$		Tons.	\$
1877.....	2,823	47,034	1884.....	21,709	424,240
1878.....	10,743	208,109	1885.....	28,969	496,293
1879.....	8,446	122,035	1886.....	20,440	343,007
1880.....	13,060	190,086			
1881.....	11,968	218,456			
1882.....	17,153	338,357	Total.....	155,027	2,815,335
1883.....	19,716	427,668			

Of the above sum \$2,704,447 worth was exported from Quebec, and \$110,888 from Ontario, 96 per cent. therefore came from Quebec. The total shipments of phosphate in 1887 amounted to 21,733 tons.

Production of phosphate in the United States.

547. The production of phosphate in the United States in 1886, principally in the Carolinas was 432,049 tons of 2,240 lbs., of which 159,369 tons were shipped abroad.

Asbestos.

548. Asbestos is a mineral which is only worked in the Eastern Townships, and the shipments of which are steadily increasing in value, as shown by the following figures :—

SHIPMENTS OF ASBESTOS FROM CANADIAN MINES, 1879 TO 1886.

YEAR.	Quantity.	Value.	YEAR.	Quantity.	Value.
	Tons.	\$		Tons.	\$

1881.....	540	35,100	1886.....	3,458	206,251
1882.....	810	52,650			
1883.....	955	68,750	Total.....	10,024	624,489

Production of minor minerals.

549. There is not space in a work of this kind to take up all of the minor mineral productions in detail. The tables at the commencement and close of the chapter of the productions in 1886 and 1887 will be some guide to their annual value.

Mineral production of Canada 1887.

550. The following table published by the Geological Survey of Canada, is a statement of the mineral output of the past year, but it must be remembered that the returns are not all complete, and some of the figures are liable to alteration when revised.

MINERAL PRODUCTION OF CANADA, 1887. *

CHAPTER X.

MARINE AND FISHERIES.

PART I.—MARINE.

The Marine Department.

551. The special object of this Department is the protection of our mercantile marine, and of the shipping that frequent our coasts; it is therefore, of the highest consequence that it should be made as efficient as possible, and it is gratifying to know that no pains are spared in order to bring about this result, and to provide security to shipping equal to that of the most advanced of countries.

Number of light-houses, &c., 1868-1887.

552. An examination of the following table will give some idea of the progress made since Confederation. In it are shown the number of light stations, lighthouses, fog whistles and fog horns in every year from 1868 to 1887 inclusive. The light stations in Newfoundland that are maintained by the Dominion are included in these figures:

NUMBER OF LIGHTHOUSES, &c., IN CANADA, 1868-1887.

YEAR ENDED 31ST DECEMBER,	Light Stations.	Lighthouses	Fog Whistles	Automatic Fog-Horns.
1868.....	198	227	2
1869.....	219	233	2
1870.....	240	278	4
1871.....	264	297	8
1872.....	280	314	13
1873.....	316	363	17
1874.....	342	384	18
1875.....	377	444	22
1876.....	407	488	24
1877.....	416	509	5	2
1878.....	427	518	25	4
1879.....	443	542	23	6
1880.....	452	551	22	7
1881.....	462	553	23	9
1882.....	470	562	23	9
1883.....	484	578	23	9
1884.....	507	597	23	10
1885.....	526	617	23	12
1886.....	534	625	23	16
1887.....	561	658	23	24

553. It will be seen that there are no less than 363 light stations, 431 lighthouses, 21 fog whistles and 22 fog horns more than there were in 1868, without taking into account the large number of bell-buoys, buoys and beacons that have also been supplied since then.

Increase
in num-
ber.

554. The total number of light stations in the Dominion on 31st December, 1887, was 5,611; of lights shown, 658; of steam fog whistles and automatic fog horns, 47; and of lightkeepers, engineers of fog whistles, assistants and crews of lightships, 711; while the whole number of persons employed on the outside service was 1,460. The lights, beacons, &c., were distributed among the several divisions as follow:—

Total
number of
lights,
whistles,
&c., 1887.

555. The Ontario division, extending from Montreal to Manitoba, contained 179 lights, including two in Manitoba. There were also 246 buoys and 19 beacons. Three new lights and several buoys and beacons were added during the year. The total cost of maintenance for the year was \$75,691, and of construction, \$18,383.

Ontario
Division.

556. The Quebec division is a large and important one, comprising, as it does, the Richelieu River and Lake Memphremagog, the River and Gulf of St. Lawrence, the Strait of Belle Isle, the north-west coast of Newfoundland and the Labrador coast. In this division there were 149 lights, 8 lightships, 3 supplied with steam fog whistles, 7 steam fog whistles, 10 fog guns, 109 buoys, 59 beacons, and 9 life-saving canoes for service in the ice. The lights were supplied by the steamers "Druid" and "Napoleon III." The expenditure for maintenance was \$148,277.

Quebec
Division.

557. The Nova Scotia division, likewise a very important one, contained 153 lighthouses, showing 163 lights, 1 lightship, 12 steam fog alarms, 10 hand fog alarm stations,

Nova
Scotia
Division.

2 fog bells, 3 signal gun stations, 8 automatic single buoys, 5 bell-buoys, 555 other buoys, 8 stationary beacons, 8 life-boat stations, 3 humane establishments and 4 signal stations. The lights were supplied by the steamer "Newfield." Two new lights were erected and three new self-righting and self-bailing boats have been built, which are awaiting a decision as to their location. The amount expended for maintenance was \$117,808, and for construction, \$5,331.

New
Brunswick
Division.

558. In the New Brunswick division there were 107 lighthouses, including 2 lightships and 13 fog alarms. Three new lights were established during 1887, and 1 fog alarm. The expenditure for maintenance was \$96,425, and for construction, \$5,281.

Prince
Edward
Island
Division.

559. Prince Edward Island division contained 47 lights. The expenditure for maintenance was \$17,852, and for construction, \$384.

British
Columbia
Division.

560. British Columbia division contained 9 lighthouses and 1 fog whistle; these were supplied by the steamer "Sir James Douglas." The expenditure for maintenance was \$16,230, and for construction, \$322.

Government
steamers.

561. The Department has 7 steamers, the property of the Government, under its control, for the purpose of supplying the different lights, laying down and taking up buoys, attending to wrecks, &c., &c., besides the steamer "Sir James Douglas," which discharges the duties of this Department on the Pacific Coast. The total cost of maintaining these vessels during 1887 was \$142,936.

Harbour
Police.

562. A police force has been established for a number of years, at the harbours of Montreal and Quebec, for the purpose of keeping order and restraining crimping, to meet the expenditure for which a tax of 3 cents per ton is levied

on all vessels at either port, paid once a year by vessels under 100 tons, and twice a year by vessels over that amount. The force in 1887 consisted of 75 men, 36 at Quebec and 39 at Montreal, and the total number of arrests made was 978, being 71 less than in the preceding year. There was an excess of expenditure over receipts of \$17,415, and during the past 18 years the total expenditure has exceeded the total receipts by \$43,978.

563. In order to provide for the treatment of sick and distressed mariners, all vessels over 100 tons register are required to pay a duty of 2 cents per ton three times a year, vessels under 100 tons only paying once in the same period; fishing vessels are also now entitled to the same benefits as other vessels, provided the dues are paid before leaving on a fishing voyage. No vessel not registered in Canada and employed exclusively in fishing is subject to the payment of this duty. These provisions do not apply to Ontario, but a parliamentary grant of \$500 is made to each of the General Hospitals at Kingston and St. Catharines for the care of seamen. The total amount received from dues in 1887 was \$12,338, being an increase of \$1,487 as compared with 1886. The total expenditure was \$52,262, being \$9,928 in excess of receipts. A considerable number, however, of immigrants and residents are cared for at the Marine Hospital, Quebec, and if the amount expended for them be deducted, the receipts would be in excess to the extent of \$4,887. The total excess of expenditure over receipts during the past nineteen years has been \$12,705.

Provisions
for sick
and dis-
tressed
mariners.

564. The total number of steamboats in the Dominion was 1,031, with a gross tonnage of 174,896 tons; 81 were added to the number during the past year, with a gross tonnage of 3,426 tons, and 48 lost or put out of service. The receipts on account of the Steamboat Inspection Fund during the

Number
and in-
spection of
steam-
boats.

last 18 years have exceeded the expenditure by \$4,443. During the year, 831 certificates were granted to engineers.

Masters
and mates
examina-
tion.

565. Since the 16th September, 1871, when the Act came into operation, 1,571 candidates have passed and obtained masters' certificates, and 1,026 certificates as mates; of certificates of service, 926 have been issued for masters and 360 for mates. The receipts from fees amounted to \$1,209, and the expenditure to \$4,856. Since 1871 the expenditure has exceeded the receipts by \$44,806.

Inland
and coast-
ing certifi-
cates.

566. During the calendar year, 104 candidates for inland and coasting certificates passed and obtained masters' certificates of service, and 34 mates' certificates of service, while 66 obtained masters' and 20 obtained mates' certificates of competency.

Wrecks
and
casualties
1887.

567. The total number of wrecks and casualties to sea going vessels of all nations, that occurred in Canadian waters and to Canadian sea going vessels in other waters in the year ended 31st December, 1887, as reported to the Department, was 224, the tonnage involved was 112,846, and the amount of loss, so far as ascertained, \$1,102,628. The number of lives lost was 25, 6 in Canadian and 19 in other waters. The disasters to all vessels in Canadian inland waters and to Canadian vessels on American inland waters were 39, involving 13,137 tons, and causing loss to the extent of \$90,915. The number of lives lost was 21. It is not possible to make any just comparison of the returns for 1887 with those of previous years, as the Department does not receive particulars of all disasters in time to include them in its annual report, which will explain the difference in the figures for 1886 in the following table as compared with the figures given for the same year in last year's Statistical Abstract.

568. The following is a comparative statement of loss for each year since 1870, all casualties, whether at sea or on inland waters, being included in the table:—

Number
of wrecks,
&c., 1870-
1887.

COMPARATIVE STATEMENT OF WRECKS AND CASUALTIES,
1870 TO 1887.

YEAR ENDED 31ST DECEMBER.	Casualties.	Tonnage.	Lives Lost.	Damage.
1870.....	335		210	901,000
1871.....	274	81,035	81	2,100,000
1872.....	290	99,109	237	2,507,338
1873.....	350	99,523	813	2,844,133
1874.....	308	106,682	109	2,029,965
1875.....	286	99,437	78	2,468,521
1876.....	452	153,368	404	2,942,955
1876.....	468	177,896	133	3,952,582

1885.....	346	144,726	198	2,753,667
1886.....	377	150,277	54	1,950,799
1887.....	263	125,983	46	1,193,543
Total.....	6,722	2,461,084	4,308	50,086,182

* 545 persons were lost by the wreck of the White Star SS. "Atlantic."

569. It will be seen that the loss of life was considerably less in 1886 than in any other year in the table, and the amount of damage was also very much smaller than in any previous year, 1870 only excepted, and since the amount of shipping involved is continually increasing, it would appear as if the improved protection by means of lights, buoys, &c., and the greater attention now paid to the qualifications both of masters and mates, were having beneficial effects in reducing risks both to life and property.

Decrease
in loss of
life and
property.

Principal
casual-
ties 1887.

570. The most disastrous casualties in 1887, as at present reported, were as follow: The ship "Muskoka," of St. John, N. B., sailed from Java on 1st June last, and has not since been heard of; the schooner "Dionis," of Barrington, N. S., sailed from Lunenburg on 19th August last, and has not since been heard of; the barge "Oriental" went down off Port Dalhousie on 25rd October last with all hands, this vessel was overladen and unseaworthy; and the propeller "California" foundered off St. Helen's Island on 3rd October, 9 lives being lost, at an enquiry held subsequently, the certificates of the master and mate were suspended until the 1st October and 1st August, 1888, respectively.

Meteoro-
logical
service.

571. The proceedings of the Meteorological Service are referred to on page 14. The Superintendent, in his report, calls attention to the value of the excellent meteorological statistics collected by the Provinces of Ontario and Manitoba, and it is very much to be hoped that the other Provinces will speedily follow their good example.

Expendi-
ture 1887.

572. The following is a general summary of the expenditure of this department during the year ended 30th June, 1887. The expenditure in 1886 amounted to \$980,120, there was therefore a decrease of \$48,068:—

EXPENDITURE OF DEPARTMENT OF MARINE, 1887.

Departmental salaries.....	\$ 30,899
Maintenance of lights.....	476,514
Construction of ".....	30,991
Dominion steamers.....	141,424
Examination of masters and mates.....	4,859
Hudson Bay expedition.....	14,763
Marine hospitals.....	71,969
Meteorological service.....	57,141
Signal service.....	5,082
Rewards for saving life, purchasing lifeboats, &c.....	7,364
Georgian Bay survey.....	21,593
Water police.....	40,349
Steamboat inspection.....	22,838
Winter mail service, Prince Edward Island.....	6,313
Miscellaneous.....	4,953
Total.....	<u>\$937,052</u>

573. The following table gives the number of vessels and number of tons on the registry books of the Dominion on 31st December, 1887, all sailing vessels, steamers and barges are included:—

Number of registered vessels in Canada 1887.

NUMBER OF VESSELS, &c., ON THE REGISTRY BOOK OF CANADA ON 31st DECEMBER, 1887.

PROVINCES.	Number of		Gross Tonnage, Steamers.	Total Net Tonnage.
	Vessels	Steamers.		
New Brunswick.....	1,027	80	9,841	255,126
Nova Scotia.....	2,845	84	7,727	498,878
Quebec.....	1,586	319	56,516	189,064
Ontario.....	1,275	610	81,724	139,548
Prince Edward Island.....	225	14	3,114	29,031
British Columbia.....	149	90	14,421	12,789
Manitoba.....	71	43	4,846	5,811
Total.....	7,178	1,240	178,189	1,130,247

574. There was a decrease as compared with 1886 of 116 Decrease. in the number of vessels, and of 87,519 tons in the total tonnage, and assuming the average value to be \$30 a ton, the value of the total tonnage would be \$33,907,410, being a decrease in value of \$2,625,570. There was an increase of 42 in the number of steamers, but a decrease of 79,629 in steamers tonnage, this being due to the registers of some of the vessels of the Allan Line having been transferred to Glasgow.

575. The next statement shows the number of vessels and of tons on the register in each year from 1873:—

Vessels on the register 1873-1887.

YEAR.	Vessels.	Tons.	YEAR.	Vessels.	Tons.
1873.....	6,783	1,073,718	1881.....	6,394	1,310,896
1874.....	6,930	1,158,363	1882.....	7,312	1,260,777
1875.....	6,952	1,205,565	1883.....	7,374	1,276,440
1876.....	7,192	1,260,893	1884.....	7,254	1,253,747
1877.....	7,362	1,310,468	1885.....	7,315	1,231,856
1878.....	7,469	1,333,015	1886.....	7,294	1,217,766
1879.....	7,471	1,332,094	1887.....	7,178	1,130,247
1880.....	7,377	1,311,218			

New
vessels.

576. The following is a list of the new vessels built and registered in each province in 1887:—

	Number.	Tonnage.
New Brunswick	18	2,909
Nova Scotia.....	87	12,310
Quebec.....	28	2,888
Ontario	66	2,993
Prince Edward Island.....	7	601
British Columbia	9	376
Manitoba	8	439
Total.....	<u>223</u>	<u>32,516</u>

This was a decrease of 6 in number and of 9,691 in tonnage as compared with the preceding year. Assuming the value of the new vessels to be \$45 a ton, the total value would be \$1,013,220.

Decrease
in demand
for wood-
en ships.

577. Now that wood has been so completely superseded by iron and steel in the construction of ships, the demand for wooden ships is rapidly decreasing, and the decline in this industry has been very marked in consequence, and as far as can be seen, nothing can happen to revive it. It is not correct, therefore, as in some cases has been done, to attribute this decline in Canada to the policy of the Government, for it has been brought about by causes entirely outside the control of this or any other Government, and it is equally impossible that it can be revived by any Governmental action. Such questions as these are, at the present time, in the hands of scientific men, and it may be that iron and steel will yet be equally superseded by some other material.

Remarks
by Mr.
Coghlan.

578. Mr. Coghlan remarks to the same effect respecting this industry in New South Wales: "The general tendency to supplant sailing vessels by steam, and the substitution of iron for wood for the frames and hulls of vessels,

" have given a check to the wooden ship building industry, which at one time promised to grow to important dimensions. Every kind of timber suitable for the construction of ships is found on the rivers of the coast districts of the colony, but as the demand for this description of vessel has not increased, little advantage can be taken of our resources in this respect "

579. The following table is a comparative statement of the total shipping of Canada, inland as well as sea-going in the years 1886 and 1887 :

Shipping
of Canada
1886 and
1887.

COMPARATIVE STATEMENT OF ALL VESSELS (BOTH SEA-GOING AND INLAND) ARRIVED AT AND DEPARTED FROM CANADIAN PORTS (EXCLUSIVE OF COASTING VESSELS) IN 1886 AND 1887.

NATIONALITIES.	Number of Vessels.	Tons Register.	FREIGHT.		Number of Men.
			Tons Weight.	Tons Measurement.	
1886.

Increase
in ship-
ping.

581. There was a very decided increase in the shipping of this country during the past year, due partly to the improvement of trade and partly to the increased bulk of merchandise. It has been argued that during the years our trade was decreasing, our shipping was increasing, and therefore the shipping returns could not be correct, but it was overlooked that though through the decline in values the monetary value of our trade had decreased, yet the quantity had materially increased in bulk as pointed out in Chapter IV, p. 196. British vessels formed only 10 per cent. of the total number, but they carried 43 per cent of the total freight, 32 per cent of the remainder being carried by Canadian, and the balance by foreign vessels.

British
and col-
onial ship-
ping 1886.

582. The following is a statement of British and Colonial shipping for 1886. The figures are all taken from official sources :—

SHIPPING IN BRITISH POSSESSIONS, 1886.

COLONY.	Tonnage of Vessels Entered and Cleared.	COLONY.	Tonnage of Vessels Entered and Cleared.
United Kingdom.....	62,841,077	Tasmania.....	692,429
Hong Kong.....	9,080,390	Mauritius.....	681,865
Malta.....	8,884,059	British Guiana.....	627,845
Gibraltar.....	8,609,730	Newfoundland.....	612,714
Canada.....	8,044,571	Gold Coast.....	605,057
Straits Settlement.....	7,491,099	Western Australia ..	501,619
India.....	7,394,589	Lagcs.....	448,392
New South Wales.....	4,258,604	Sierra Leone.....	436,070
Ceylon.....	3,923,481	Natal.....	392,834
Victoria.....	3,735,387	Bermudas.....	281,528
Queensland.....	3,275,437	Honduras.....	237,247
Windward Islands.....	2,083,707	Turk's Island.....	232,415
South Australia.....	1,558,476	Bahamas.....	209,996
Cape of Good Hope.....	1,554,593	Gambia.....	136,296
Leeward Islands.....	1,402,114	St. Helena.....	127,559
Trinidad.....	1,196,076	Fiji.....	105,369
New Zealand.....	990,903	Falkland Islands.....	59,762
Jamaica.....	928,406	Labuan.....	52,278

Malta and Gibraltar being merely ports of call, it will be seen that Hong Kong is the only British Possession outside of the United Kingdom, that has a larger shipping trade than Canada, though the combined shipping of the Australasian Colonies considerably exceeds that of this country.

583. The following table shows the number and tonnage of merchant vessels (both steam and sailing) owned by the principal countries of the world, according to the latest available returns. The figures have been taken partly from official sources and partly from the Statesman's Year Book, 1888:—

Registered tonnage of the world.

REGISTERED TONNAGE OF THE PRINCIPAL COUNTRIES IN THE WORLD.

COUNTRIES.	Vessels.	Tonnage.	Average tons to each vessel.
United Kingdom.....	17,917	7,144,097	398
Sweden and Norway.....	11,632	2,080,081	178
German Empire.....	4,021	1,284,703	319
Canada.....	7,178	1,130,247	157
United States*.....	1,621	1,015,562	626

Spain.....	1,826	508,879	278
Australasia.....	2,786	361,634	129
Netherlands.....	692	286,455	413
Austria.....	455	261,588	574
Denmark.....	3,324	272,500	81
Greece.....	3,213	261,496	81
Portugal.....	392	104,348	266
Belgium.....	67	86,837	1,296
Turkey.....	401	72,762	181

* Licensed and enrolled vessels not included.

United States shipping.

584. Canada, it will be seen, stands fourth in the list, but if the licensed and enrolled vessels belonging to the United States which are employed in the river trade and home trade were included, that country would take second place, its total tonnage amounting to 4,105,844 tons. To such an extent has the American mercantile marine declined that, whereas in 1856 75·2 per cent. of the United States imports and exports were carried in American bottoms, in 1887 the proportion was only 13·80 per cent., the value carried having increased in the same period 138. per cent.

PART II.—FISHERIES.

Yield and value of Canadian Fisheries 1886 and 1887.

585. Owing to the report of the Minister of Fisheries not having been yet completed, full particulars concerning the fisheries for 1887 are not available, but the following is a summary comparative statement of the yield and value of the fisheries in 1886 and 1887:—

COMPARATIVE STATEMENT OF THE YIELD AND VALUE OF THE FISHERIES OF CANADA—1886-1887.

Decrease.....				445,915

586. There was a total decrease in value of \$445,915 as compared with 1886, the largest decrease being in canned lobsters, viz., \$894,378. The decreases by Provinces were New Brunswick, \$620,720; Prince Edward Island, \$104,565; Manitoba and the North-West Territories, \$57,896; Ontario, \$56,879, and Nova Scotia, \$35,579, while there were increases in British Columbia and Quebec of \$397,539 and \$32,185 respectively.

587. The following is a comparative summary of the value of the fisheries by Provinces, 1886 and 1887:—

COMPARATIVE STATEMENT OF THE VALUE OF THE FISHERIES OF CANADA, BY PROVINCES, 1886 AND 1887.

PROVINCES.	Value.	
	1886.	1887.
	\$	\$

Prince Edward Island.....	1,141,991	1,037,426
British Columbia.....	1,577,348	1,974,887
Ontario.....	1,435,998	1,379,119
Manitoba and North-West Territories.....	186,980	129,084
Total.....	18,679,288	18,233,373

588. The history of the fishery question down to the close of 1886 was briefly stated in last year's Statistical Abstract.* During 1887 matters remained in *statu quo*, though American fishermen did not come in contact with the Canadian authorities as frequently as in the preceding year. Early in the year, however (1887), negotiations were commenced between the respective governments with reference to some settlement of the question, which resulted in the appointment of a commission which met at Washington on the 15th November, 1887. Fishery negotiations.

589. The Plenipotentiaries appointed by Her Majesty were the Hon. Joseph Chamberlain, M. P.; the Hon. Sir Lionel Sackville Sackville West, the British Minister at Washington and Sir Charles Tupper. And by the President of the United States: Thomas F. Bayard, U. S. Secretary of State; William L. Putnam and James B. Angell. After considerable discussion a treaty was agreed upon and was signed at Washington on the 15th March, 1888. A *modus* Signing of treaty at Washington.

*Statistical Abstract for 1886, p. 328, *et seq.*

vivendi pending the ratification of the treaty was also suggested by the British Plenipotentiaries. The treaty has been ratified by the Canadian Parliament, and now waits ratification by the Imperial Parliament, the United States Senate, and the Parliament of Newfoundland.

Terms of
the treaty
and
modus
vivendi.

590. The full text of the treaty and of the *modus vivendi* are as follows:—

Preamble.

Whereas differences have arisen concerning the interpretation of Article I of the Convention of October 20, 1818; Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and the United States of America, being mutually desirous of removing all causes of misunderstanding in relation thereto, and of promoting friendly intercourse and good neighbourhood between the United States and the Possessions of Her Majesty in North America, have resolved to conclude a Treaty to that end, and have named as their Plenipotentiaries, that is to say:

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, The Right Hon. Joseph Chamberlain, M.P.; The Honourable Sir Lionel Sackville Sackville West, K.C.M.G., Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary to the United States of America; and Sir Charles Tupper, G.C.M.G., C.B., Minister of Finance of the Dominion of Canada:

And the President of the United States, Thomas F. Bayard, Secretary of State; William L. Putnam, of Maine; and James B. Angell, of Michigan;

Who, having communicated to each other in their respective full powers, found in good and due form, have agreed upon the following Articles:

ARTICLE I.

Article 1.

The High Contracting Parties agree to appoint a Mixed Commission to delimit, in the manner provided in this Treaty, the British waters, bays, creeks and harbours of the

coasts of Canada and of Newfoundland, as to which the United States, by Article I of the Convention of October 20, 1818, between Great Britain and the United States, renounced for ever any liberty to take, dry, or cure fish.

ARTICLE II.

The Commission shall consist of two Commissioners to be named by Her Britannic Majesty, and of two Commissioners to be named by the President of the United States, without delay, after the exchange of ratifications of this Treaty. Article II.

The Commission shall meet and complete the delimitation as soon as possible thereafter.

In case of the death, absence or incapacity of any Commissioner, or in the event of any Commissioner omitting or ceasing to act as such, the President of the United States or Her Britannic Majesty, respectively, shall forthwith name another person to act as Commissioner instead of the Commissioner originally named.

ARTICLE III.

The delimitation referred to in Article I of this Treaty shall be marked upon British Admiralty charts by a series of lines regularly numbered and duly described. The charts so marked shall, on the termination of the work of the Commission, be signed by the Commissioners in quadruplicate, three copies whereof shall be delivered to Her Majesty's Government, and one copy to the Secretary of State of the United States. The delimitation shall be made in the following manner, and shall be accepted by both the High Contracting Parties as applicable for all purposes under Article I of the Convention of October 20, 1818, between Great Britain and the United States:— Article III.

The three marine miles mentioned in Article I of the Convention of October 20, 1818, shall be measured seaward from low water mark; but at every bay, creek or harbour, not otherwise specially provided for in this Treaty, such three marine miles shall be measured seaward from a straight

line drawn across the bay, creek, or harbour in the part nearest the entrance at the first point where the width does not exceed ten marine miles.

ARTICLE IV.

Article iv. At or near the following bays the limits of exclusion under Article I of the Convention of October 20, 1818, at points more than three marine miles from the low water mark, shall be established by the following lines, namely :

At the Baie des Chaleurs the line from the Light at Birch Point on Miscou Island to Macquereau Point Light ; at the Bay of Miramichi, the line from the Light at Point Escuminac to the Light on the Eastern Point of Tabisintac Gully ; at Egmont Bay, in Prince Edward Island, the line from the Light at Cape Egmont to the Light at West Point ; and off St. Ann's Bay, in the Province of Nova Scotia, the line from Cape Smoke to the Light at Point Aconi.

At Fortune Bay, in Newfoundland, the line from Connaigre Head to the Light on the South-easterly end of Brunet Island, thence to Fortune Head ; at Sir Charles Hamilton Sound, the line from the South-east point of Cape Fogo to White Island, thence to North end of Peckford Island, and from the South end of Peckford Island to the East Headland of Ragged Harbour.

At or near the following bays the limits of exclusion shall be three marine miles seaward from the following lines, namely :

At or near Barrington Bay, in Nova Scotia, the line from the Light on Stoddard Island to the Light on the South Point of Cape Sable, thence to the Light at Baccaro Point ; at Chedabucto and St. Peter's Bays, the line from Cranberry Island Light to Green Island Light, thence to Point Rouge ; at Mira Bay, the line from the Light on the East Point of Scatari Island to the north-easterly Point of Cape Morien ; and at Placentia Bay in Newfoundland, the line from Latine Point, on the Eastern mainland shore, to the most Southerly Point of Red Island, thence by the most South-erly Point of Merasheen Island to the mainland.

Long Island and Bryer Island, at St. Mary's Bay, in Nova Scotia, shall, for the purpose of delimitation, be taken as the coasts of such bay.

ARTICLE V.

Nothing in this Treaty shall be construed to include Article v. within the common waters any such interior portions of any bays, creeks or harbours as cannot be reached from the sea without passing within the three marine miles mentioned in Article I of the Convention of October 20, 1818.

ARTICLE VI.

The Commissioners shall from time to time report to each Article vi. of the High Contracting Parties such lines as they may have agreed upon, numbered, described, and marked as herein provided, with quadruplicate charts thereof; which lines so reported shall forthwith from time to time be simultaneously proclaimed by the High Contracting Parties, and be binding after two months from such proclamation.

ARTICLE VII.

Any disagreement of the Commissioners shall forthwith Article vii. be referred to an Umpire selected by Her Britannic Majesty's Minister at Washington and the Secretary of State of the United States; and his decision shall be final.

ARTICLE VIII.

Each of the High Contracting Parties shall pay its own Article viii Commissioners and officers. All other expenses jointly incurred, in connection with the performance of the work, including compensation to the Umpire, shall be paid by the High Contracting Parties in equal moieties.

ARTICLE IX.

Nothing in this Treaty shall interrupt or affect the free Article ix, navigation of the Strait of Canso by fishing vessels of the United States.

ARTICLE X.

Article x. United States fishing vessels entering the bays or harbours referred to in Article I of this Treaty shall conform to harbour regulations common to them and to fishing vessels of Canada or Newfoundland.

They need not report, enter, or clear, when putting into such bays or harbours for shelter or repairing damages, nor when putting into the same, outside the limits of established ports of entry, for the purpose of purchasing wood or of obtaining water; except that any such vessel remaining more than twenty-four hours, exclusive of Sundays and legal holidays, within any such port, or communicating with the shore therein, may be required to report, enter, or clear; and no vessel shall be excused hereby from giving due information to boarding officers.

They shall not be liable in such bays or harbours for compulsory pilotage; nor, when therein for the purpose of shelter, of repairing damages, of purchasing wood, or of obtaining water, shall they be liable for harbour dues, tonnage dues, buoy dues, light dues, or other similar dues; but this enumeration shall not permit other charges inconsistent with the enjoyment of the liberties reserved or secured by the Convention of October 20, 1818.

ARTICLE XI.

Article xi. United States fishing vessels entering the ports, bays and harbours of the Eastern and North-western coasts of Canada or of the coasts of Newfoundland under stress of weather or other casualty may unload, reload, tranship or sell, subject to Customs laws and regulations, all fish on board, when such unloading, transhipment, or sale is made necessary as incidental to repairs, and may replenish outfits, provisions and supplies damaged or lost by disaster; and in case of death or sickness shall be allowed all needful facilities, including the shipping of crews.

Licenses to purchase in established ports of entry of the aforesaid coasts of Canada or of Newfoundland, for the homeward voyage, such provisions and supplies as are ordinarily

sold to trading vessels, shall be granted to United States fishing vessels in such ports promptly upon application and without charge, and such vessels, having obtained licenses in the manner aforesaid, shall also be accorded upon all occasions such facilities for the purchase of casual or needful provisions and supplies as are ordinarily granted to trading vessels; but such provisions or supplies shall not be obtained by barter, nor purchased for re-sale or traffic.

ARTICLE XII.

Fishing vessels of Canada and Newfoundland shall have on the Atlantic coasts of the United States all the privileges reserved and secured by this Treaty to United States fishing vessels in the aforesaid waters of Canada and Newfoundland. Article xi.

ARTICLE XIII.

The Secretary of the Treasury of the United States shall make regulations providing for the conspicuous exhibition by every United States fishing vessel, of its official number on each bow; and any such vessel, required by law to have an official number, and failing to comply with such regulations, shall not be entitled to the licenses provided for in this Treaty. Article xiii.

Such regulations shall be communicated to Her Majesty's Government previously to their taking effect.

ARTICLE XIV.

The penalties for unlawfully fishing in the waters, bays, creeks, and harbours, referred to in Article I of this Treaty, may extend to forfeiture of the boat or vessel and appurtenances, and also of the supplies and cargo aboard when the offence was committed; and for preparing in such waters to unlawfully fish therein, penalties shall be fixed by the court, not to exceed those for unlawfully fishing; and for any other violation of the laws of Great Britain, Canada, or Newfoundland relating to the right of fishery in such waters, bays, creeks or harbours, penalties shall be fixed by the court, not exceeding in all three dollars for every ton of the boat Article xiv.

or vessel concerned. The boat or vessel may be holden for such penalties and forfeitures.

The proceedings shall be summary and as inexpensive as practicable. The trial (except on appeal) shall be at the place of detention, unless the judge shall, on request of the defence, order it to be held at some other place adjudged by him more convenient. Security for costs shall not be required of the defence, except when bail is offered. Reasonable bail shall be accepted. There shall be proper appeals available to the defence only; and the evidence at the trial may be used on appeal.

Judgments of forfeiture shall be reviewed by the Governor General of Canada in Council, or the Governor in Council of Newfoundland, before the same are executed.

ARTICLE XV.

Article xv. Whenever the United States shall remove the duty from fish-oil, whale-oil, seal-oil, and fish of all kinds (except fish preserved in oil), being the produce of fisheries carried on by the fishermen of Canada and of Newfoundland, including Labrador, as well as from the usual and necessary casks, barrels, kegs, cans, and other usual necessary coverings containing the products above mentioned, the like products, being the produce of fisheries carried on by the fishermen of the United States, as well as the usual and necessary coverings of the same, as above described, shall be admitted free of duty into the Dominion of Canada and Newfoundland.

And upon such removal of duties, and while the aforesaid articles are allowed to be brought into the United States by British subjects, without duty being reimposed thereon, the privilege of entering the ports, bays and harbours of the aforesaid coasts of Canada and of Newfoundland shall be accorded to United States fishing vessels by annual licenses, free of charge, for the following purposes, namely:

1. The purchase of provisions, bait, ice, seines, lines and all other supplies and outfits;

2. Transshipment of catch, for transport by any means of conveyance ;

3. Shipping of crews.

Supplies shall not be obtained by barter, but bait may be so obtained

The like privileges shall be continued or given to fishing vessels of Canada and of Newfoundland on the Atlantic coasts of the United States.

ARTICLE XVI.

This Treaty shall be ratified by Her Britannic Majesty, ^{Article} having received the assent of the Parliament of Canada and ^{xvi.} of the Legislature of Newfoundland ; and by the President of the United States, by and with the advice and consent of the Senate ; and the ratifications shall be exchanged at Washington as soon as possible.

In faith whereof, We, the respective Plenipotentiaries, have signed this Treaty, and have hereunto affixed our seals.

Done in duplicate at Washington, this fifteenth day of February, in the year of Our Lord one thousand eight hundred and eighty-eight.

PROTOCOL.

The Treaty having been signed the British Plenipotentiaries desire to state that they have been considering the position which will be created by the immediate commencement of the fishing season before the Treaty can possibly be ratified by the Senate of the United States, by the Parliament of Canada, and the Legislature of Newfoundland. ^{Modus} ^{vivendi.}

In the absence of such ratification the old conditions which have given rise to so much friction and irritation might be revived, and might interfere with the unprejudiced consideration of the Treaty by the legislative bodies concerned.

Under these circumstances, and with the further object of affording evidence of their anxious desire to promote

good feeling and to remove all possible subjects of controversy, the British Plenipotentiaries are ready to make the following temporary arrangement for a period not exceeding two years, in order to afford a "*modus vivendi*" pending the ratification of the Treaty.

1. For a period not exceeding two years from the present date, the privilege of entering the bays and harbours of the Atlantic coasts of Canada and of Newfoundland shall be granted to United States fishing vessels by annual licenses at a fee of \$1.50 per ton—for the following purposes :

The purchase of bait, ice, seines, lines, and all other supplies and outfits.

Transhipment of catch and shipping of crews.

2. If during the continuance of this arrangement, the United States should remove the duties on fish, fish-oil, whale and seal oil (and their coverings, packages, &c.), the said licenses shall be issued free of charge.

3. United States fishing vessels entering the bays and harbours of the Atlantic coasts of Canada or of Newfoundland for any of the four purposes mentioned in Article I of the Convention of October 20, 1818, and not remaining therein more than twenty-four hours, shall not be required to enter or clear at the Custom house, providing that they do not communicate with the shore.

4. Forfeiture to be exacted only for the offences of fishing or preparing to fish in territorial water.

5. This arrangement to take effect as soon as the necessary measures can be completed by the Colonial Authorities.

J. CHAMBERLAIN.
L. S. SACKVILLE WEST.
CHARLES TUPPER.

WASHINGTON, 15th February, 1883.

CHAPTER XI.

MILITIA AND DEFENCE.

591. Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble, an account of which would be beyond the scope of this chapter, being, as it is, part of the history of Canada.

Defence of
Canada
before
Confeder-
ation.

592. After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax and a naval establishment there and on the Pacific coast.

With-
drawal of
Imperial
troops.

593. By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. This Act was subsequently amended in various ways, but is practically embodied in the present Consolidated Militia Act, 46 Vic., chap. 2, passed 25th May, 1883. By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under sixty, not exempted or disqualified by law, this population being divided into four classes, as follow:—

Command
in chief
vested in
the Queen.

Depart-
ment of
Militia.

The
Militia
Act.

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

Who con-
stitute the
Militia.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married or widowers with children.

The fourth class comprises those between 45 and 60.

Persons
exempt
from ser-
vice.

594. The following persons are exempt from enrolment and actual service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

Number of
men and
period of
drill.

595. The number of men to be trained and drilled annually is limited to forty-five thousand, except as specially authorized, and the period of drill is to be 16 days and not less than eight days every year.

Active
and re-
serve
Militia.

596. The militia is divided into active and reserve land and marine force. The active land and marine force is composed of men raised either by voluntary enlistment or ballot, and the reserve force consists of the whole of the men not serving in the active militia of the time being.

Period of
service.

597. The period of service is three years.

Military
Districts.

598. The Dominion is divided into twelve military districts, in each of which a permanent military staff is maintained, under the command of a Deputy Adjutant General.

Perma-
nent
corps.

599. The permanent corps and schools of instruction consist of "A" troop of Cavalry at Quebec, "A," "B" and

"C" Batteries, Schools of Artillery at Kingston, Quebec and Victoria, B.C.; "A," "B" and "C" Infantry School Corps, at Fredericton, N.B., St. Johns, Q., and Toronto, Ont., and a School of Mounted Infantry at Winnipeg. A fourth Infantry School Corps is in course of organization at London, Ont. The total strength of these permanent corps is limited to 1,000 men. The present strength is 950 men, exclusive of officers.

600. The Royal Military College at Kingston, which is under the control of the Militia Department, was founded in 1875, and has proved a most successful institution. The present number of cadets is 77, which number is likely to be shortly increased to 96. The total number of cadets who have joined has been 230, of whom 116 have graduated and 59 have been gazetted to commissions in the Imperial army.

Royal
Military
College.

601. The general officer commanding the militia, in his annual report for 1887, says: "It is most satisfactory in tracing the career, so far, of the graduates of this College, to notice how very successful they have been in civil as well as in military employment." "It ought to be clearly understood that the four years course at this College is calculated to fit a man for almost any appointment in this country, whether civil or military."

Opinion
of the
General
Com-
manding.

602. The following is a statement of the numbers of the Active Militia, showing the strength of the different arms of the service:—

Strength
of the
Active
Militia
1887.

STRENGTH OF THE ACTIVE MILITIA IN CANADA, 1887.

PROVINCE.	District.	Cavalry.	Field Artillery.	Garrison Artillery.	Engineers.	Infantry	Total District.	Total Province.

British Columbia.....	11	180	90	270	270
P. E. Island.....	12	230	45	342	617	617
Total.....	1,944	1,440	1,968	179	31,657	37,188	37,188
Royal Military College and Schools.....	43	433	488	964
Totals, 31st Dec., 1887.	1,987	1,440	2,401	179	32,145	38,152

There was a decrease in the total number of men of 81, as compared with 1886. The number of troops, batteries and companies was : troops, 43 ; batteries, 62½ ; and companies, 648½ ; making a total of 754.

603. The total ordinary expenditure amounted to \$1,193,693, and the special expenditure, in consequence of the rebellion in 1885, to \$87,562. The following is a summary of the expenditure by the Department of Militia in 1887 :—

MILITIA EXPENDITURE, 1887.

Salaries, district staff.....	\$ 24,100
Brigade majors.....	10,840
Royal Military College.....	51,503
Ammunition, clothing and military stores.....	202,199
Public armouries.....	61,606
Drill pay and camp purposes.....	257,386
Drill instruction.....	35,860
Dominion Rifle Association.....	10,000
Drill sheds and rifle ranges.....	15,306
Construction and repairs.....	81,834

Barracks in London.....	16,733
Care of military properties.....	13,526
Grant to Dominion Artillery Association.....	2,000
A, B and C Batteries.....	142,851
Cavalry and Infantry Schools.....	228,630
Contingencies.....	33,319
Total ordinary militia service.....	\$1,193,693
North West service (Rebellion 1885).....	87,562
Total expenditure.....	\$1,281,255

604. The Militia revenue for 1887 amounted to \$23,205, Militia revenue.
made up as follows :—

Ammunition, sale of.....	\$11,866
Military stores “.....	3,819
Clothing “.....	1,853
Miscellaneous stores, sale of.....	526
Military properties, rent of.....	5,141
Total.....	\$23,205

605. The sums paid for militia pensions amounted to Militia pensions.
\$34,100, as follow :—

Pensioners.	Number.	Amount.
Pensioners, 1812-1815.....	268	\$ 10,635
“ Fenian raids.....	26	3,681
“ Rebellion, 1885.....	102	19,784
	396	34,100

The number of pensioners of 1812-15 is rapidly decreasing, being less by 115 than in 1886.

606. In addition to the gratuities reported as having been paid in 1886, an additional amount of \$20,225 has been paid to 64 applicants, making a total of \$64,101 paid in this way to 230 persons. Gratuities.

CHAPTER XII

DOMINION LANDS.

607. In the face of the large immigration into the North-West Territories last year, the increase in the amount of land taken up, was by no means what was expected, there being only a small increase in the area taken up as homesteads, and a decrease under the heads both of pre-emptions and sales. The following are the comparative figures:—

	1886.	1887.
Homesteads.....	294,960 Acres	319,500 Acres
Pre-emptions.....	146,480 “	87,747 “
Sales.....	133,701 “	113,544 “

608. Two reasons are, however, given in the report of the Minister of the Interior for the comparatively small area taken up, one being that the extraordinary grain crop caused a very large demand for labour, and consequently a much larger proportion than usual of the immigration was absorbed in this way, and the other that settlers coming into the country appeared to realize to a much greater extent than formerly, the advisability of acquiring some experience of the modes of agriculture suitable to the country, before taking up land. “There is much” says the report “in the soil and climate of Manitoba and the North-West that requires to be studied by the newly arrived agriculturist, even assuming his former experience to have fitted him in every respect for the pursuit of his calling, and it would be to his personal interest that he should acquire a little practical knowledge of the country and its methods of farming before finally taking up land on his own account.” The report further says that “The opinion begins to gain favour with those who have paid close attention to the affairs of Manitoba and the North-West, that, so far as relates to the grain growing portions of the

Land
taken up
1886 and
1887.

Reasons
for the
small
quantity
taken up.

"country at least, 160 acres is the limit of the area which "the average farmer can profitably work." The decrease in the number of pre-emptions would appear to be an indication of the growth of this feeling.

609. The following table gives particulars of the transactions in Dominion lands in each year from 1872 to 31st October, 1887, that being the end of the year in this Department, except in financial matters :—

Transactions in Dominion lands 1872-1887.

YEAR.	AREA.			
	Homesteads.	Pre-emptions.	Sales.	Total.
	Acres.	Acres.	Acres.	Acres.
1872.....	40,000	1,600	15,200	56,800
1873.....	136,640	2,400	16,620	155,660
1874.....	215,520	101,461	17,713	334,694
1875.....	84,480	67,314	4,908	156,702
1876.....	52,960	40,406	39,562	132,928
1877.....	145,280	107,715	170,989	423,984
1878.....	308,640	275,240	125,380	709,260
1879.....	555,296	270,178	271,343	1,096,817
1880 (Oct. 31st)	280,640	140,790	260,797	682,227
1881 ".....	438,707	263,647	355,166	1,057,520
1882 ".....	1,181,652	904,211	613,282	2,699,145
1883 ".....	970,719	659,120	202,143	1,831,962
1884 ".....	533,280	364,060	213,172	1,110,512
1885 ".....	249,552	106,213	126,049	481,814
1886 ".....	294,960	146,480	133,701	575,141
1887 ".....	319,500	87,747	114,544	521,791

Since the beginning of 1872, therefore, the total number of acres disposed of has been 12,026,977, of which 5,807,826 acres were homesteads, 3,538,582 pre-emptions and 2,680,569 sales.

610. The next table gives the total amount of pre-emption and homestead fees, and proceeds of sales, received in each year from 1st July, 1872, to 30th June, 1887 :—

Receipts from fees and sales 1873-1887.

1887.....	26,502	48,176	337,640	412,318

The receipts from 1st July, 1887, to 1st February, 1888, have amounted to \$206,744.

Increase
in 1887.

611. There was a total increase in 1887 of \$81,038, owing to the large redemption of scrip, but there was a decrease in fees and cash for sales, the receipts from pre-emptions being doubtless small on account of the extension of time granted within which to make payment.

Entries
cancelled.

612. The number of entries cancelled has been steadily decreasing; in 1874 62½ per cent. of the homestead and 92 per cent. of the pre-emption entries were cancelled, in 1886 only 60 of the former and 50 of the latter were cancelled. The number of patents issued was 4,599 as compared with 4,570 in the preceding year, and was the largest number yet issued in any one year, the number cancelled was 26.

Patents
issued.

Rocky
Moun-
tains
Park,
Banff,
N.W.T.

613. A large tract of land enclosing the hot mineral springs at Banff, N.W.T., was reserved and set apart for a National Park, under an Order in Council passed 25th

November, 1885. It is to be known as Rocky Mountains Park. Fifteen miles of the external boundaries of the Park were surveyed during 1887, and 18 miles of road opened up, a bridge was built over the Bow River, and considerable improvements were made in the Cave and the Basin, making them safer and more convenient for bathers. Upwards of 3,000 persons visited the Springs during the season, and there is now a permanent population of 650 persons. The Canadian Pacific Railway Company have recently completed a hotel at a cost of \$150,000.

614. Four other park reservations have been made in the Rocky Mountains, under an Order in Council passed 10th October, 1886. Other park reservations.

615. The total area set out for settlement since 1873, is as follows:— Area set out for settlement.

	Acres.	No of Farms of 160 acres each.
Previous to June, 1873.....	4,792,292	29,952
In 1874.....	4,237,864	26,487
1875.....	665,000	4,156
1876.....	420,507	2,628
1877.....	231,691	1,448
1878.....	306,936	1,918
1879.....	1,130,482	7,066
1880.....	4,472,000	27,950
1881.....	9,147,000	50,919
1882.....	9,460,000	55,125
1883.....	27,000,000	168,750
1884.....	6,400,000	40,000
1885.....	391,680	2,448
1886.....	1,379,010	8,620
1887.....	643,710	4,023
Total.....	<u>70,678,172</u>	<u>431,490</u>

At the rate of five souls to a homestead, these lands would sustain an agricultural population of 2,157,450.

Revenue
1887.

616. The total revenue of the Department of the Interior for the year ended 31st October, 1887, was :—

Gross revenue in cash.....	\$188,488
Scrup redeemed and warrants located.....	241,331
Total	\$429,819
Total in 1886.....	605,876
Decrease in 1887.....	*176,057

Total
receipts.

617. The total receipts on account of Dominion lands under the various heads to 31st October, 1887, are as follow :

Homestead fees.....	\$ 383,939
Pre-emption.....	185,273
Sales, cash.....	2,897,212
Timber, grazing and mineral.....	754,962
Colonization.....	857,456
Miscellaneous.....	189,617
	<u>\$5,268,464</u>

School
lands in
Manitoba.

618. Two sections of land of 640 acres each in every township in Manitoba are held in trust by the Dominion Government as school lands, for the purpose of aiding and promoting education. These lands are to be disposed of as and when it may seem fit to the Government, and the proceeds applied to the above purposes.

Sales of
school
lands.

619. A series of sales of these school lands was held in January, 1888, and the following table gives the result of such sales :—

SALES OF SCHOOL LANDS IN MANITOBA, 1888.

PLACE OF SALE.	Acres Sold.	Amount realized.	First Instalment (paid).	Average Price per Acre.	Maximum Price per Acre.	Minimum Price per Acre.
		\$	\$	\$ cts.	\$ cts	\$ cts.
Manitou.....	7,814	47,639	9,525	6 16	9 00	5 00

Brandon.....	2,560	17,184	3,437	6 71	10 00	5 00
Total.....	19,985	140,182	30,562	7 00	10 77	5 00

The Report of the Minister of the Interior says: "If the remainder of the school lands of Manitoba and the North-West Territories could be relied upon to bring, at the proper time, equivalent prices, the liberality of this educational endowment would be difficult to exaggerate."

620. Under the Dominion Lands Regulations all surveyed even numbered sections, excepting 8 and 26, in Manitoba and the North-West Territories, which have not been homesteaded, reserved to provide wood lots for settlers or otherwise disposed of or reserved, are to be held exclusively for homesteads and pre-emptions. Dominion
Lands
Regulations.

621. Homestead entry per one quarter-section (160 acres) of surveyed agricultural land, open to such entry, may be obtained by any person who is the sole head of a family, or by any male who has attained the age of 18 years, on application to the Local Agent of Dominion Lands, and on payment of an office fee of \$10, Conditions of
homestead
entry.

At the time of making entry the homesteader must declare under which of the three following provisions he elects to hold his land, and on making application for patent must prove that he has fulfilled the conditions named therein.

1. The homesteader shall begin actual residence on his homestead and cultivation of a reasonable portion thereof within six months from date of entry, unless entry shall have been made on or after the first day of September, in which case residence need not commence until the first day of June following, and continue to live upon and cultivate the land for at least six months out of every twelve months for three years from date of homestead entry.

2. The homesteader shall begin actual residence, as above, within a radius of two miles of his homestead and continue to

make his home within such radius for at least six months out of every twelve months for the three years next succeeding the date of homestead entry ; and shall within the first year from date of entry break and prepare for crop ten acres of his homestead quarter section ; and shall within the second year crop the said ten acres, and break and prepare for crop fifteen acres additional—making twenty-five acres ; and within the third year after the date of his homestead entry he shall crop the said twenty-five acres, and break and prepare for crop fifteen acres additional, so that within three years of the date of his homestead entry he shall have not less than twenty-five acres cropped ; and shall have erected on the land a habitable house in which he shall have lived during the three months next preceding his application for homestead patent.

3. The homesteader shall perfect his homestead entry by commencing the cultivation of the homestead within six months after the date of entry, or if the entry was obtained on or after the first day of September in any year, before the first day of June following, shall, within the first year after the date of his homestead entry, break and prepare for crop not less than five acres of his homestead ; shall, within the second year, crop the said five acres, and break and prepare for crop not less than ten acres in addition, making not less than fifteen acres in all ; shall erect a habitable house upon his homestead before the expiration of the second year after his homestead entry, and before the commencement of the third year, shall *bonâ fide* reside therein, and cultivate the land for three years next prior to the date of his application for his patent.

In the event of a homesteader desiring to secure his patent within a shorter period than the three years provided by law, he will be permitted to purchase his homestead on

furnishing proof that he has resided on the land for at least twelve months from the date of his perfecting his homestead entry, and that he has brought at least 30 acres thereof under cultivation.

Any homesteader may at the same time as he makes his homestead entry, but not at a later date, should there be available land adjoining the homestead, enter an additional quarter section of land as a pre-emption on payment of an office fee of \$10.

622. The pre-emption right entitles the homesteader, who obtains entry for a pre-emption, to purchase the land so pre-empted on becoming entitled to his homestead patent; but should the homesteader fail to fulfil the homestead conditions, or to pay for such pre-emption within six months after he becomes entitled to claim a patent for his homestead, he forfeits all claim to his pre-emption.

623. Every assignment or transfer of homestead or pre-emption right, made before the issue of the patent, is null and void, except in cases where any person or company is desirous of assisting intending settlers, when, the sanction of the Minister to the advance having been obtained, the settler has power to create a charge upon his homestead for a sum not exceeding six hundred dollars, and interest not exceeding eight per cent. per annum, provided that particulars of how such an advance has been expended for his benefit, be first furnished to the settler, or if the charge be made previous to the advance, then such charge shall only operate to the extent certified to by the local agent as having been actually advanced to the settler. One half of the advance may be laid out in the erection of buildings on the homestead.

Pre-emp-
tions.

Power to
create a
charge on
home-
stead for
advances.

Price of
pre-emp-
tions.

624. The price of pre-emptions, not included in town site reserves, is \$2.50 an acre. Where land is north of the northerly limit of the land grant, along the main line of the Canadian Pacific Railway, and is not within twenty-four miles of any branch of that railway, or twelve miles of any other railway, pre-emptions may be obtained for \$2 per acre.

Pay-
ments.

625. Payments for land may be in cash, scrip, or police or military bounty warrants.

Licenses
to cut
timber for
domestic
use.

626. Homestead settlers, whose land is destitute of timber, may, upon payment of an office fee of 50 cents, procure from the Crown timber agent a permit to cut the following quantities of timber free of dues: 30 cords of dry wood, 1,800 lineal feet of building timber, 2,000 poplar fence rails and 400 roof poles.

Or pur-
chase a
wood lot.

In cases where there is timbered land in the vicinity, available for the purpose, the homestead settler, whose land is without timber, may purchase a wood lot, not exceeding in area twenty acres, at the price of \$5 per acre cash.

Timber
licenses.

627. Licenses to cut timber on surveyed or unsurveyed lands are granted after competition to the highest tenderer. The lands covered by such licenses are thereby withdrawn from homestead and pre-emption entry and from sale.

Coal
districts.

628. Coal districts have been set apart as follows:—

1. On the Souris River, south of Moose Mountain.
2. On the South Saskatchewan River, near Medicine Hat.
3. On the North Saskatchewan River, near Edmonton.
4. On the Bow River.
5. On the Belly River.
6. On the Cascade River.
7. Wood Mountain.

The price per acre is, for land containing lignite or bituminous coal, \$10, and for anthracite coal, \$20.

When two or more parties apply to purchase the same land, tenders will be invited.

629. Leases of grazing lands in Manitoba and the North-West Territories can be granted only after public competition, except in the case of actual settlers to whom may be leased, without public competition, tracts of land not to exceed four sections and to be contiguous to the settler's homestead. Leases shall be for a period of not exceeding twenty-one years, and no single lease shall cover a greater area than 100,000 acres. Leases of grazing lands.

The lessee is obliged, within each of the three years from the date of granting the lease, to place upon his lease-hold not less than one-third of the whole amount of the stock which he is required to place upon the tract leased, namely, one head of cattle for every twenty acres of land embraced by the lease, and shall, during the rest of the term, maintain cattle thereon in at least that proportion.

After placing the prescribed number of cattle upon his leasehold, the lessee may purchase land, within the tract leased, for a home, farm and corral.

Any portion of the lands forming a grazing tract are open for homestead and pre-emption and to purchase from Government at \$2.50 per acre cash; and in the event of such settlement or sale, the lease (if any) to be void in respect of such lands so entered or purchased.

630. Any person may explore vacant Dominion lands not appropriated or reserved by Government for other purposes, and may search therein, either by surface or subterranean prospecting, for mineral deposits, with a view to obtaining a mining location for the same, but no mining location shall be granted, until the discovery of the vein, lode or Mining locations.

deposit of mineral or metal within the limits of the location or claim.

On discovering a mineral deposit, any person may obtain a mining location, upon marking out his location on the ground, in accordance with the regulations in that behalf, and filing with the agent of Dominion lands for the district, within ninety days from discovery, an affidavit in form prescribed by mining regulations, and paying at the same time an office fee of \$5, which will entitle the person so recording his claim to enter on the land and work it for one year.

At any time before the expiration of five years from the date of recording his claim, the claimant may, upon filing proof with the local agent that he has expended in actual mining operations on the claim, the amount prescribed in the mining regulations in that behalf, by paying to the local agent therefor the price per acre fixed by the regulations, and a further sum of \$50 to cover the cost of survey, obtain a patent for said claim as provided in the said mining regulations.

CHAPTER XIII.

BANKS AND SAVINGS BANKS.

631. The denominations of money in the currency of Canadian currency. Canada were declared by the Act 34 Vic., chap. 4, to be dollars, cents and mills, there being 100 cents in a dollar and 10 mills in a cent. By the same Act the British sovereign, as then coined, was declared to be legal tender for \$4.86 $\frac{2}{3}$.

632. Silver coins struck by order of Her Majesty for Silver and gold coins. circulation in Canada, were declared to be legal tender to the amount of ten dollars, and copper coins, similarly struck, to the amount of twenty-five cents. The gold eagle of the United States was also declared to be legal tender for ten dollars, and multiples and halves of the same for proportionate sums.

633. The coins in circulation in Canada are silver fifty, Coins in circulation. twenty-five, twenty, ten and five cent pieces, and bronze one cent pieces, all of which are struck in England. No twenty cent pieces have been coined for a considerable time, and they are gradually disappearing from circulation, Canada has no gold coinage of its own, but as stated above, British and American gold pieces pass current.

634. The notes issued exclusively by the Government are Paper currency. of the denominations \$4, \$2, \$1, and twenty-five cents fractional paper currency, no bank in the Dominion being allowed to issue notes for a less sum than five dollars, or for any sum not being a multiple of five dollars.

635. The chartered and incorporated banks of the Dominion The Bank Acts and principal provisions. are regulated by the Bank Act, 34 Vic., chap. 5, and subse-

quent amending Acts, by which it is provided, amongst other things,

Capital paid up.

That at least one hundred thousand dollars of capital shall be *bonâ fide* paid up to the satisfaction of the Treasury Board before any incorporated bank shall commence business.

Amount of notes for circulation.

The amount of notes issued for circulation by any bank shall never exceed the amount of its unimpaired capital, under a penalty varying with the amount of such excess.

Part payment to be in Dominion notes.

Any bank when making payment is compelled, if requested, to pay the same or part thereof, not exceeding sixty dollars, in Dominion notes, for \$1, \$2 or \$4 each.

Notes to be a first charge.

The payment of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency.

Limit to dividend.

No dividends or bonus exceeding 8 per cent. per annum shall be paid by any bank, unless, after deducting all bad and doubtful debts, it has a reserve fund equal to at least twenty per cent. of its paid up capital.

Monthly returns.

Monthly returns, certified by the President and General Manager, shall be made by every bank to the Government, according to the form and under the penalty provided by the Acts.

Proportion of cash in Dominion notes.

Every bank shall, subject to a penalty, always hold at least half, if possible, of its cash revenues in Dominion notes, and never a less proportion than forty per cent.

Private Banks.

No person, firm or company, other than a bank incorporated under the above Acts, may use the title of bank, banking company, banking house, banking association or banking institution, without adding the words "not incorporated."

636. There were forty-one incorporated banks that made returns to the Government on 30th June, 1887, distributed as follows: 13 in Ontario, 14 in Quebec, 9 in Nova Scotia, 3 in New Brunswick, and one each in Manitoba and British Columbia. The banks are assigned to the Provinces according to the situation of their head offices, but many of them have branches all over the Dominion.

Number of incorporated Banks.

637. The following is a comparative statement of the assets and liabilities of the various banks in Canada, on the 30th June, 1886 and 1887:—

Bank statement 1886 and 1887.

BANK STATEMENT, 30TH JUNE, 1886 AND 1887.

LIABILITIES.	1886.	1887.
	\$	\$
Capital paid up	61,841,395	60,815,356
Circulation	29,200,627	30,438,152
Deposits—		
Payable on demand	59,324,912	56,663,143
Payable after notice or on a fixed day	52,904,811	57,369,866
Held as security	762,940	550,180
Made by other banks	1,404,827	1,243,421

Total liabilities.....	147,547,682	149,413,632
ASSETS.		
Specie and Dominion notes	18,110,224	15,595,515
Notes of and cheques on other banks	6,736,621	6,193,085
Due from agencies and other banks	19,815,650	19,039,532
Dominion debentures or stocks	4,733,312	3,133,842
Other Government securities	3,407,407	3,518,406
Loans to Dominion and Provincial Governments....	3,039,099	3,548,960
Loans or discounts for which collateral securities are held	12,678,919	11,688,123
Loans to municipal or other corporations	15,503,366	16,615,734
Loans to or deposits made in other banks	757,511	415,166
Discounts	131,559,202	138,263,340
Debts overdue, not secured	1,431,307	1,166,334
Debts overdue, secured	1,733,492	1,623,795
Mortgages on real estate, and real estate held by the banks	2,148,913	2,020,109
Bank premises	3,511,964	3,570,955
Other assets	3,253,362	2,848,566
Total assets.....	228,422,353	229,241,464

The proportion of liabilities to assets was slightly larger in 1887, being 65·17 per cent. against 64·59 per cent. in 1886. The amount on deposit showed an increase of \$1,700,186, discounts an increase of \$6,704,138, almost identical with that of 1886 over 1885 which was \$6,704,976, and overdue debts a decrease of \$376,670.

Proportions of assets and liabilities.

638. The following statement shows the proportions of the principal items of assets and liabilities to the total amounts in the years 1868, 1877 and 1887 :—

ASSETS AND LIABILITIES—PERCENTAGE OF PRINCIPAL ITEMS.

ITEMS.	1868.	1877.	1887.
	p. c.	p. c.	p. c.
Liabilities—			
Notes in circulation	18·99	19·22	20·37
Deposits	75·03	75·03	76·62
Assets—			
Specie and Dominion notes	11·40	8·29	6·80
Debts due to the banks	70·28	77·31	75·60

Rate of interest.

639. The rate of interest allowed on deposit by the banks is at present in most cases $\frac{1}{2}$ per cent.

Particulars of Banks in Canada 1868-1887.

640. The next table gives the paid up capital, assets, liabilities, and other particulars of the various banks in operation in each year since Confederation, according to the returns made to the Government, as required by the Bank Acts :—

PARTICULARS OF BANKS IN CANADA, 1868-1887.

YEAR ENDED 30TH JUNE,	Capital Paid up.	Notes in Circulation.	Total on Deposit.	Liabilities.	Assets.	Percentage of Liabilities to Assets.
	\$	\$	\$	\$	\$	
1868 ...	30,389,048	8,307,079	32,808,103	43,722,647	77,872,257	56.15

1880 ...	60,584,789	20,186,176	84,818,804	108,833,271	181,741,074	59.88
1881 ...	59,384,987	26,102,368	94,158,621	125,063,546	198,967,278	62.85
1882 ...	58,739,980	32,229,937	113,820,495	153,001,994	229,271,064	66.73
1883 ...	61,404,554	32,211,945	107,148,664	145,296,836	226,803,491	64.06
1884 ...	61,443,397	29,654,511	106,594,253	140,973,233	223,855,601	62.97
1886 ...	61,821,158	29,692,803	104,656,566	138,510,300	217,264,655	63.75
1886 ...	61,841,395	29,200,627	112,991,764	147,547,682	228,422,353	64.69
1887 ...	60,815,356	30,438,152	114,483,190	149,413,632	229,241,464	65.18

641. The number of banks that made returns to the Government on 30th June, 1868, was 27, being 14 less than in 1887, and the following are the proportions of increase under the several heads, between those years:—Increase in amount of paid up capital, 101 per cent; in notes in circulation, 266 per cent.; in amount on deposit, 249 per cent.; in liabilities, 241 per cent.; and in assets, 194 per cent. The proportion of liabilities to assets was higher in 1887 than in any other year, with the exception of 1882, and was lowest in 1877.

Increase during the period.

642. The total amount of reserve held by the banks on the 30th June, 1887, was \$17,600,297. No returns of this fund were made previous to 1883, when an amendment to the Bank Act, requiring them, was passed.

Reserve fund.

Bank sus-
pensions.

643. During the fiscal year 1886-87 the Maritime Bank suspended, and since the 30th of June, 1887, two banks, at that time making returns, have suspended, viz., the Bank of London and the Central Bank. In both cases the trouble was caused by culpable mismanagement, in the first case on the part of the president, and in the second on the part of the directorate and general manager.

Total
amount
on deposit.

644. The total amount of money on deposit in 1886 in the Chartered Banks, Post Office and Government Savings Banks, Montreal and Quebec Savings Banks, and in the hands of Loan Companies, was \$179,477,121, equal to the sum of \$36.82 per head of population.

Dividends
and prices
of principal
stocks
1887.

645. The following table gives the share value, paid up capital, last six months' dividend, and highest and lowest quotations at Toronto in 1887, of the principal banks and loan companies in Canada. The prices quoted are taken from the statement published by the committee of the Toronto Stock Exchange :—

Stock.	Share.	Capital paid up.	Dividend last 6 months.	Prices during Year.	
				Highest.	Lowest.
	\$	\$	Per cent.		
Banks—					
Montreal.....	200	12,000,000	5	248½	202

Business
failures
1887.

646. The following is a statement of the business failures in Canada in 1887 by Provinces:—

	Number.	Liabilities.
Ontario	693	\$ 5,357,375
Quebec	390	4,085,926
Nova Scotia.....	120	716,860
New Brunswick.....	88	5,350,415
Manitoba	37	264,769
British Columbia	25	135,950
Prince Edward Island	13	162,600
Totals.....	<u>1,366</u>	<u>\$16,070,595</u>

Business
failures
1883-1887.

647. For the purposes of comparison the figures for the last five years are given below:—

	Number.	Liabilities.
1883	1,384	\$15,949,361
1884	1,327	19,191,306
1885	1,256	8,861,609
1886	1,252	10,386,884
1887	1,366	16,070,595
Average.....	<u>1,317</u>	<u>\$14,091,951</u>

Increase
in amount
due to
failure of
the Mar-
time
Bank.

648. The amount of liabilities in 1887 was above the average for five years, and considerably above the figures of 1886, but this increase was almost entirely due to the failure of the Maritime Bank in New Brunswick, and of the large lumber firms dependent on it. The average number and amount of failures in New Brunswick during the previous four years was 59 and \$808,576 respectively, and if these figures are substituted in 1887, the result appears as 1,337 failures with liabilities \$11,528,756, showing that but for the exceptional failure, in New Brunswick, the year was a fairly prosperous one, the amount of liabilities being below the average of five years.

Failures
in United
Kingdom.

649. The number of failures in the United Kingdom in 1887 was 5,852, being the largest number since 1883.

650. The system of Post Office Savings Banks was first established in the United Kingdom, and proved so successful that it has been almost universally adopted by other nations. The principal object of the system is to encourage the habit of saving among the working classes, by providing a place where they can deposit their surplus earnings at a fair rate of interest and with absolute security, no practical limit being made to the smallness of the deposit. This latter provision is one of the main features of the scheme, as the ordinary banks do not value this class of business, and in many cases will not receive deposits under a sum which would compel many people to hoard their money for a length of time, before they could save enough to place it in a position of safety.

Post Office Savings Banks and objects of the system.

651. The Post Office Act, which provided for the establishment of this system in Canada, was passed on the 20th December, 1867, and was limited in operation as regards the Savings Banks, to the Provinces of Ontario and Quebec. Under its provisions a deposit must not be less than \$1 and must not exceed \$300 in any one year, neither must the total amount on deposit exceed \$1,000

Provisions under the Post Office Act.

652. Government Saving Banks, under the management of the Finance Department, have been established in the Maritime Provinces and in Manitoba and British Columbia. In which banks deposits are allowed to the extent of \$1,000. The number of offices under this system is 50, viz., 29 in Nova Scotia, 14 in New Brunswick, 2 in Prince Edward Island, 1 in Ontario, 1 in Manitoba, and 3 in British Columbia. Arrangements are now being made for the transfer of the Government Savings Banks in the last mentioned Province to the Post Office Department.

Government Savings Banks.

653. The rate of interest paid in both classes of savings banks is at present four per cent, but during the last session

Rate of interest.

of Parliament, a bill was passed enabling the Government to reduce this rate if it appeared that the condition of the country required it.

Progress
of the Post
Office
system.

654. The Post Office system went into operation on the 1st April, 1868, when 81 offices were opened; at the close of the three months ended 30th June, 1868, there was 2,192 depositors, 3,247 deposits had been made, and the amount on deposit was \$204,589. On the 30th June, 1867, there were 415 offices open, 90,159 depositors, 143,076 deposits had been made during the year, and the total amount on deposit was \$19,497,750. Almost the whole of this enormous increase has taken place during the last eight years, the amount on deposit on 30th June, 1879, having been only \$3,105,190, the average annual increase since that date having been \$2,049,070. The average amount of each deposit received has considerably decreased, having been \$57.81, or \$2.71 cents less than in 1886. The average amount to the credit of each account was \$216.26.

Distribu-
tion of
offices.

655. On the 1st September, 1885, the system was extended to the Provinces of Nova Scotia and New Brunswick, and the offices are distributed in the several provinces as follow: Ontario 306, Quebec 75, Nova Scotia 21, and New Brunswick 13

Depositors
and de-
posits by
Provinces.

656. The following table shows the number of depositors in each province, the amount on deposit, and the proportion of that amount per head of population, on 30th June, 1887:—

PROVINCE.	Number of Depositors	Amount on Deposit.	Average Amount to each Depositor.	Average Amount per head of Population.
		\$	\$ cts.	\$ cts.
Ontario	75,036	15,686,012	209 04	7 37
Quebec	13,489	3,532,468	261 88	2 41
Nova Scotia	882	125,823	142 65	0 26
New Brunswick	752	152,447	204 04	0 44
Total	90,159	19,497,750	218 18	4 41

In the United Kingdom in 1885, the amount on deposit in Post Office Savings Banks averaged \$6.32 per head of population.

657. It is generally admitted that the amount on deposit in the savings banks of the country is more or less an indication of the saving power of the people, and the increase in these deposits in Canada of late years has been very large. Mr. Giffen in his address before the British Association in September, 1887, the purport of which address was to show that in spite of the depression, England had made and was making material progress, said: "Another fact is the steady increase of savings banks deposits and depositors. These deposits are not, of course, the deposits of working classes only, so called. They include the smaller class of tradesmen, and the lower middle classes generally. But *quantum valeant*, the fact as to a growth of deposits and depositors should reflect the condition of the country generally, in much the same way as the returns of pauperism." If then the figures for this country are taken, relating to post office saving banks alone, it is found that between 1870 and 1877 the number of depositors increased from 12,178 to 24,074, an increase of 97 per cent., and the deposits from \$1,588,848 to \$2,639,937, an increase of 66 per cent.; while between 1878 and 1887, the number of depositors increased from 25,535 to 90,159, an increase of 253 per cent., and the deposits from \$2,754,484 to \$19,497,750, an increase of 607 per cent. "Whatever special explanations there may be, facts like these are at least not inconsistent with a fuller employment of the population in the last ten years than in the previous ten."

Significance of increase in Savings Banks deposits.

658. The balance of deposits is not now required, as formerly, to be invested in Canadian Government securities, but forms part of the unfunded debt of the Dominion.

Disposal of balance.

Transactions of the Post Office and Government Savings Banks 1886 and 1887 and of loan companies 1888.

CHAPTER XIV.

INSURANCE.

PART I.—FIRE INSURANCE.

Fire Insurance companies in 1886.

660. During the year 1886 the business of fire insurance in Canada was carried on by 30 active Companies; of these 6 were Canadian, 19 British and 5 American. Inland Marine and Ocean Marine Insurance were also transacted by 5 of them (3 Canadian, 1 British and 1 American). This list of Companies differs from that of the previous year, by the addition of one American Company, viz., the Connecticut Fire Insurance Company of Hartford, Conn., and since the close of 1886 two additional British Companies, the Atlas Assurance Company and the Employer's Liability Assurance Corporation (Limited), have been licensed, the latter for the transaction of fire re-assurance and the former for the transaction of fire insurance generally.

Premiums received and losses paid 1886.

661. The cash received for premiums during the year, in Canada, amounted to \$4,932,335, being greater than that received in 1885, by \$79,875; and the amount paid for losses was \$3,301,388, exceeding that paid in 1885, by \$622,101. The ratio of losses paid to premiums received is shown in the following table:—

FIRE INSURANCE IN CANADA, 1886.

COMPANIES.	Paid for Losses.	Received for Premiums.	Percentage of Losses to Premiums.	
			1886.	1885.

665. The business done by the British fire companies resulted in a balance in their favour of \$237,216, being a decrease of \$437,763 as compared with 1885, as shown by the following statement:—

Business done by British companies.

	1885.	1886.
Paid for losses.....	\$1,912,873	\$2,347,433
“ general expenses.....	819,596	872,595
Total.....	<u>\$2,732,469</u>	<u>\$3,220,028</u>
Received for premiums.....	3,407,453	3,457,244
Balance in favour.....	<u>\$ 674,984</u>	<u>\$ 237,216</u>

The business of the last 12 years, 1875 to 1886, has resulted in an excess of payments over receipts of \$17,305, but this adverse balance is due to the disastrous fire at St. John, 1877, where the losses paid by the British companies amounted to four and one-half millions. It appears certain that another year will see the balance reversed.

666. The following is a comparative statement of the business done by American companies in 1885 and 1886:—

By American companies.

	1885.	1886.
Paid for losses.....	\$209,693	\$239,310
“ general expenses.....	86,206	97,438
Total.....	<u>\$295,899</u>	<u>\$336,748</u>
Received for premiums.....	396,683	427,844
Balance in favour.....	<u>\$100,784</u>	<u>\$ 91,096</u>

667. A similar comparative statement of the business done by Canadian companies is found below:—

By Canadian companies.

	1885.	1886.
Paid for losses.....	\$1,985,257	\$2,123,943
“ general expenses.....	917,879	926,299
“ dividends.....	99,896	114,809
Total.....	<u>\$3,003,033</u>	<u>\$3,170,051</u>
Received for premiums.....	3,089,381	3,090,851
“ from other sources.....	123,196	139,223
Total.....	<u>3,212,577</u>	<u>3,230,074</u>
Balance in favour.....	<u>\$209,544</u>	<u>\$60,023</u>

Proportion of payments to receipts by British and American companies.

668. For every \$100 received for premiums, the payments by British and American companies therefore, were as follow :—

COMPANIES.	For Losses.		For Expenses.		Balance for Companies.	
	1885.	1886.	1885.	1886.	1885.	1886.
	\$	\$	\$	\$	\$	\$
British.....	56.14	67.90	24.05	25.24	19.81	6.88
American.....	52.86	55.93	21.73	22.77	25.41	21.30

The business it will be seen was not nearly so favourable in 1886 for either class of companies, but more particularly for British ones.

By Canadian companies.

669. For every \$100 received for income by Canadian companies, the payments were :—

CANADIAN COMPANIES.	For Losses.		For Expenses.		For Dividends.	
	1885.	1886.	1885.	1886.	1885.	1886.
	\$	\$	\$	\$	\$	\$
For every \$100 of income....	61.80	65.91	28.57	28.68	3.11	3.55
“ “ premium..	64.26	68.88	29.97	29.97	3.23	3.71

Their total cash income in 1885 was \$3,212,577 and in 1886 \$3,230,074, and their cash expenditure was in the same years \$3,003,033 and \$3,170,051 respectively.

Inland marine insurance.

670 The inland marine insurance business did not compare at all favourably with that of the preceding year, the losses incurred having been 68.54 per cent. of the premiums received, as against 50.99 per cent. in 1885.

Ocean marine insurance.

671. The ocean business was equally unfavourable, the proportion of losses to premiums having been 82.43 and 68.87 per cent. in 1886 and 1885 respectively.

672. The following figures show the total business of both inland and ocean marine insurance in 1886 :—

Premiums received.....	\$543,761	Total business in- land and ocean marine.
Losses incurred.....	414,673	
“ paid.....	\$338,123	
“ “ for previous years.....	26,600	
Total losses paid during year.....	364,723	
Losses outstanding.....	80,925	

673. The total amounts at risk against fire in each year from 1869, are given in the next table. When it is considered that the very large increase in the amount, upwards of \$400,000,000, represents a proportionate increase in the value of property and in the wealth of the people, it must be admitted that the progress made during the period has been considerable :—

FIRE INSURANCE IN CANADA—AMOUNTS AT RISK, 1869 TO 1887.

YEAR ENDED 31ST DECEMBER,	Fire Insurance.	YEAR ENDED 31ST DECEMBER,	Fire Insurance.
	\$		\$
1869.....	188,359,809	1879.....	407,357,985

1875.....	364,421,029	1885.....	611,794,479
1876.....	454,608,180	1886.....	586,773,022
1877.....	420,342,681	1887.....	635,101,557
1878.....	409,899,701		

PART II.—LIFE INSURANCE.

674. There were 29 companies transacting a life insurance business in Canada in 1886, viz., 10 Canadian, 11 British and 8 American. One new license was issued during the year, to the Temperance and General Life Assurance Company of North America.

Number of life insurance companies.

Life insurance during 1886.

675. The value of the insurances effected during the year was \$35,171,34, being an increase of \$8,006,360. The business was divided among the several companies in 1885 and 1886, as follows.—

	1885.	1886.
Canadian companies.....	\$14,881,695	\$19,289,694
British ".....	3,950,647	4,054,379
American ".....	8,332,646	11,827,375
	<u>\$27,164,988</u>	<u>\$35,171,348</u>

Proportion of Canadian companies business to total.

676. The Canadian companies do a larger share of the business than all the other companies combined, their share in 1885 having been 54.78 per cent., and in 1886 54.84 per cent.

Life insurance 1869-1887.

677. The following table shows the amount of life insurances effected in each year from 1869 to 1887, inclusive:—

AMOUNT OF LIFE INSURANCES EFFECTED IN CANADA IN EACH YEAR, 1869-1887.

YEAR ENDED 31ST DECEMBER,	COMPANIES.			Total.
	Canadian.	British.	American	
	\$	\$	\$	\$

1885.....	14,881,695	3,950,647	8,332,646	27,164,988
1886.....	19,289,694	4,054,379	11,827,375	35,171,348
1887.....	23,560,849	3,112,160	11,435,721	38,108,730

* Imperfect.

678. The increase in the total amount of insurance in force in 1886 over 1885, and in 1887 over 1886 was very large, amounting to the sums of \$21,353,550 and \$20,364,156, respectively, as shown by the following figures:—

Increase during the last three years.

LIFE INSURANCE IN FORCE IN CANADA—1885, 1886 AND 1887.

COMPANIES.	Insurance in Force.		
	1885.	1886.	1887.
	\$	\$	\$
Canadian	74,591,139	88,181,859	101,772,080
British	25,930,272	27,225,607	28,173,585
American	49,440,735	55,908,230	61,734,187
Total	149,962,146	171,315,696	191,679,852

679. The Canadian companies' share of the increase in 1885 over 1884 was 55·63 per cent.; of that in 1886 over 1885, 63·64 per cent.; and of that in 1887 over 1886, 66·73 per cent.

Canadian companies share of increase.

680. The amounts at risk for both fire and life insurance are often used for the purpose of estimating the wealth and progress of a nation, and the amount at risk for life insurance may be more particularly used to indicate the progress made not only in wealth, but in what may be called surplus wealth. Fire insurance is to a large extent looked upon as a business expense, which must be incurred as necessarily as rent, salaries, &c., and which is therefore paid out of the gross receipts. But with life insurance, people far more generally insure in proportion to their ability to pay the premiums: not until after everything else is paid, and there is a surplus, is the question of life insurance considered. Life insurance therefore being generally paid out of surplus earnings of the people, the following figures indicate the very large increase in their premium paying power

Insurance a means of estimating progress in wealth.

during the last few years, and consequent improvement in their condition :—

Life insurance in Canada 1869-1887.

LIFE INSURANCE IN CANADA. AMOUNT AT RISK, 1869-1887.

1880.....	37,838,518	19,789,863	33,643,745	91,272,126
1881.....	46,041,591	20,983,092	36,266,249	103,290,932
1882.....	53,855,051	22,329,368	38,857,629	115,042,048
1883.....	59,213,609	23,511,712	41,471,554	124,196,875
1884.....	66,519,958	24,317,172	44,616,596	135,453,726
1885.....	74,591,139	25,930,272	49,440,735	149,962,146
1886.....	88,181,859	27,225,607	55,908,230	171,315,696
1887.....	101,772,080	28,173,585	61,734,187	191,679,852

Average amount of policies in force 1886.

682. The average amount of policies in force in 1886 was \$1,741, as shown by the next table, this amount was larger than in either of the two preceding years, which was \$1,659 and \$1,663, respectively:—

AVERAGE AMOUNT OF POLICIES IN FORCE IN CANADA, 1886.

COMPANIES.	POLICIES.		
	Number.	Amount.	Average Amount.
		\$	\$
Canadian.....	53,601	88,148,577	1,676
British.....	13,454	27,225,607	2,024
American.....	31,927	55,257,463	1,731
Total.....	97,982	170,631,647	1,741

The average amount of the new policies was for Canadian companies, \$1,807; for British companies, \$2,192, and for American, \$2,167, the corresponding amounts for 1885 having been \$1,781, \$2,139, and \$1,955.

Decrease in insurance terminated.

683. There was a decrease of \$92,046 in the amount of insurance terminated naturally, *i. e.*, by death, maturity or expiration, in 1886 as compared with 1885, the amount last year having been \$2,165,655; and a decrease of \$253,820 in the amount terminated by surrender and lapse, the total amount so terminated having been \$11,942,792.

Death rate 1880-1886.

684. The death rate was very much lower than in 1885, and was below the average of the last seven years, as shown below:—

INSURANCE DEATH RATE IN CANADA, 1880 TO 1886.

YEAR ENDED 31ST DECEMBER,	Number of Lives at Risk.	Number of Deaths.	Death Rate per 1,000.
1880.....	33,557	278	8.284
1881.....	38,115	309	8.107
1882.....	43,622	358	8.297
1883.....	59,031	455	9.094
1884.....	54,443	442	8.119
1885.....	60,120	576	9.581
1886.....	73,240	608	8.302
Total.....	353,128	3,026	8.569

685. The next table gives the amount of income from premiums received by all companies in each year from 1869 to 1886, inclusive:—

Premium
income
1869-1886.

INCOME FROM LIFE INSURANCE PREMIUMS IN CANADA—1869 TO 1886.

YEAR ENDED 31st DECEMBER,	COMPANIES.			Total.
	Canadian.	British.	American.	
	\$	\$	\$	
1869.....	164,910	515,741	557,708	1,238,359
1870.....	208,922	531,250	729,175	1,464,347
1871.....	291,897	570,449	990,628	1,852,974
1872.....	417,628	596,982	1,250,912	2,265,522
1873.....	511,235	594,108	1,492,315	2,597,658
1874.....	638,854	629,808	1,575,748	2,844,410
1875.....	707,256	623,296	1,551,835	2,882,387
1876.....	768,543	597,155	1,437,612	2,803,310
1877.....	770,319	577,364	1,299,724	2,647,407
1878.....	827,098	586,044	1,197,535	2,610,677
1879.....	919,345	565,875	1,121,537	2,606,757
1880.....	1,039,341	579,729	1,102,058	2,721,128
1881.....	1,291,026	613,595	1,190,068	3,094,689
1882.....	*1,562,085	674,362	1,308,158	3,544,605
1883.....	*1,715,089	707,468	1,414,736	3,837,295
1884.....	*1,931,668	744,227	1,518,991	4,194,886
1885.....	*2,157,448	803,980	1,723,012	4,684,409
1886.....	*2,450,061	827,848	1,988,634	5,266,543
Total.....	*18,367,695	11,339,281	23,450,388	53,157,364

* These include the premiums received for their foreign business by the Canada, Sun, and Dominion Safety Fund.

686. The total amount paid to policyholders during 1885 and 1886, was:—

Payments
to policy
holders;
1885 and
1886.

	1885.	1886.
Death claims (including bonus additions) ..	\$1,707,353	\$1,744,268
Matured endowment " " ..	269,001	226,024
Annuity holders ..	7,704	6,800
Paid for surrendered policies ..	213,438	174,631
Dividends to policyholders ..	346,605	700,258
	<u>\$2,544,101</u>	<u>\$2,851,981</u>

The amount received for premiums was \$5,266,543, therefore for every \$100 of premium, \$54.15 was paid to

policy holders, and \$45.85 carried to expense, profits and reserve; in the preceding year the proportions were \$54.31 and \$45.69, respectively.

Average
rate of pre-
miums.

687. The average rate of premiums received for every \$100 of current risk was in 1885 \$3.23, and in 1886 \$3.22, and of claims paid \$1.37 and \$1.22.

Financial
position of
Canadian
compan-
ies 1886.

688. The following tables give the condition of the Canadian companies in 1886, showing their assets and liabilities, income and expenditure:—

CANADIAN LIFE COMPANIES, 1886.

ASSETS AND LIABILITIES.

COMPANIES.	Assets.	Liabilities including Reserve, but not Capital Stock.	Surplus of Assets over Liabilities excluding Capital.	Capital Stock paid up.	Surplus of Assets over Liabilities and Capital Stock.

London Life.....	9,113	14,424	953	24,492	17,673
North American.....	37,506	57,493	4,800	99,800	85,155
Ontario Mutual.....	105,683	68,610	174,293	141,508
Sun.....	92,211	105,405	4,375	201,991	153,287
Temperance and General..	14,412	14,412
Totals.....	1,316,174	659,938	109,450	2,085,563	1,069,097

Receipts
1885 and
1886.

689. The receipts from income in 1885 and 1886 were respectively made as follows:—

	1885.	1886.
Premiums and annuity sales.....	\$2,157,417	\$2,482,113
Interest and dividends.....	555,131	628,558
Sundry.....	29,935	43,989
Total.....	<u>\$2,742,483</u>	<u>\$3,154,660</u>

Expendi-
ture 1885
and 1886.

690. And the expenditure during the same year was:—

	1885.	1886.
Paid to policy holders and annuitants.....	\$ 934,750	\$1,316,174
General expenses.....	527,371	659,938
Dividends to stockholders.....	36,769	109,450
Total.....	<u>\$1,498,890</u>	<u>\$2,085,563</u>

Propor-
tion of
payments
to income.

691. From the above figures therefore it appears that out of every \$100 of income received, the companies expended:—

	1885.	1886.
	\$ cts.	\$ cts.
Paid to policyholders	34 08	41 72
General expenses	19 23	20 92
Dividends to stockholders.....	1 34	3 47
Reserve.....	45 35	33 89

Assess-
ment com-
panies.

692. Four companies did business on the assessment plan in 1886, three Canadian and one American, having at the end of the year \$21,996,359 in force. The amount of policies taken during the year was \$9,784,755. The amount of insurance terminated by surrender and lapse was large, viz., \$6,303,450, being \$267.70 for every \$1,000 of current risk. The amount terminated by death was \$139,349 or \$5.92 for every \$1,000 of risk.

PART III.—ACCIDENT AND GUARANTEE INSURANCE.

693. Accident insurance business was transacted by seven Accident insurance. companies, viz., 3 Canadian, 3 British and 1 American, and guarantee business by two companies, one Canadian and one British. The business done in 1885 and 1886 was:—

ACCIDENT.	1885.	1886.
	\$	\$
Premiums received	145,502	165,384
Amount insured	24,066,283	26,443,366
Paid for claims	59,358	80,531
GUARANTEE.		
Premiums received	62,718	60,820
Amount guaranteed	9,971,050	9,495,850
Paid for claims	17,568	19,684

694. Plate glass insurance was transacted by 3 companies, British, Canadian and American, respectively. Two companies only made returns, according to which the premiums received during the year were \$15,252, the amount in force was \$94,691, and the losses incurred \$3,099. Two firms in Montreal transact this class of business, but work on the system of replacement, instead of paying the value of the glass broken, and their returns do not show the amount in force. Plate glass insurance.

695. At the close of 1886 there were 80 companies under the supervision of the Superintendent of Insurance, the same number as in the preceding year. They were engaged in business as follow:— Number of insurance companies of all kinds

Doing life insurance.....	41
“ “ assessment plan.....	4
“ fire insurance.....	30
“ inland marine insurance	6
“ ocean marine “	5
“ accident “	7
“ guarantee “	3
“ steam boiler “	1
“ plate glass “	3

Deposits
with Gov-
ernment.

696. The total amount of deposits held by the Receiver-General, for the protection of policyholders, amounted on 8th July, 1886, to the sum of \$12,007,086.

Total re-
ceipts of
all kinds
1885 and
1886.

697. The total amounts received for all forms of insurance in 1885 and 1886 were:—

YEAR.	COMPANIES.			Total.
	Canadian.	British.	American.	
	\$	\$	\$	\$
1885.....	3,707,360	4,253,733	2,210,324	10,171,417
1886.....	4,066,154	4,327,836	2,575,181	10,969,171

Amounts
from each
class of
business.

698. And these were divided among the different classes in the following sums:—

CLASS OF BUSINESS.	1885.	1886.
	\$	\$
Fire	4,852,460	4,932,335
Inland Marine.....	61,431	42,491
Ocean.....	331,736	294,320
Life	4,619,978	5,195,720
Life (Assessment).....	93,771	262,849
Accident.....	145,202	165,384
Guarantee	62,718	60,820
Plate Glass.....	4,121	15,252
Total	10,171,417	10,969,171

APPENDIX.

CUSTOMS TARIFF, CANADA, 1888.

GOODS SUBJECT TO DUTIES.

1. Acid, sulphuric.....	½c. p. lb.
2. Acid, acetic.....	25c. p. l. g. and 20 p. ct.

46. Brass in strips for printers' rules, not finished	15 p. ct.

47. Brass, manufactures of, not elsewhere specified 30 p. ct.
 48. Braces or suspenders (1887)..... 35 p. ct.

BREADSTUFFS, VIZ. :—

49. Breadstuffs, grain and flour and meal of all kinds, when damaged by water *in transitu*, twenty per cent. *ad valorem* upon the appraised value,—such appraised value to be ascertained as provided by sections 8, 71, 72, 73, 74, 75 and 76 of “*The Customs Act*”..... 20 p. ct.
 50. Barley..... 15c. p. bsh.
 51. Buckwheat..... 10c. p. bsh.
 52. Indian corn..... 7½c. p. bsh.
 53. Oats..... 10c. p. bsh.
 54. Rice (1887)..... 1½c. p. lb.
 55. Rice, uncleaned, unhulled or paddy when imported direct from the country of growth..... 17½ p. ct.
 56. Rye..... 10c. p. bsh.
 57. Wheat..... 15c. p. bsh.
 58. Pease..... 10c. p. bsh.
 59. Beans..... 15c. p. bsh.
 60. Buckwheat meal or flour..... ½c. p. lb.
 61. Cornmeal..... 40c. p. bri.
 62. Maccaroni and vermicelli (1887)..... 2c. p. lb.
 63. Oatmeal..... ½c. p. lb.
 64. Rye flour..... 50c. p. bri.
 65. Wheat flour..... 50c. p. bri.
 66. Rice and sago flour..... 2c. p. lb.
 67. Brick for building..... 20 p. ct.
 68. Britannia metal, manufactures of, not plated..... 25 p. ct.
 69. British gum, dressine, sizing cream and enamel sizing (1887) 1c. p. lb.
 70. Butter..... 4c. p. lb.
 71. Buttons of vegetable ivory or horn (1887)..... 10c. p. gross and 25 p. ct.
 72. Buttons, all other, not elsewhere specified (1887) 25 p. ct.
 73. Button covers, crozier 10 p. ct.
 74. Candles, tallow..... 2c. p. lb.
 75. Candles, paraffine wax..... 5c. p. lb.
 76. Candles, all other, including sperm..... 25 p. ct.
 77. Cane or rattan, split or otherwise manufactured 25 p. ct.
 78. Cans or packages made of tin or other material, containing fish of any kind admitted free of duty under any existing law or treaty, not exceeding one quart in contents one cent and a half on each can or package; and when exceeding one quart, an additional duty of one cent and a-half for each additional quart or fractional part thereof..... 1½c. p. qt.
 79. Canvas of hemp or flax, and sail twine, when to be used for boats' and ships' sails..... 5 p. ct.

80. Caplins, unfinished Leghorn hats 20 p. ct.
 81. Carpeting, matting and mats of hemp (1887)..... 25 p. ct.

CARRIAGES :—

82. Buggies of all kinds, farm waggons, farm, railway or freight carts, pleasure carts or gigs and similar vehicles, \$10 each and costing less than fifty dollars 20 p. ct.
 Costing fifty dollars and less than one hundred dollars (1887) \$15 each and 20 p. ct
83. All such carriages, costing one hundred dollars each and over (1887)..... 35 p. ct.
84. Railway cars, sleighs, cutters, wheel-barrow and hand carts 30 p. ct.
85. Children's carriages of all kinds 35 p. ct.
86. Celluloid, moulded into sizes for handles of knives and forks, not bored nor otherwise manufactured: also, moulded Celluloid balls and cylinders, coated with tin-foil or not, but not finished or further manufactured (O.C. 12th April, 1887)..... 10 p. ct.
87. Cement, raw, or in stone from the quarry (*See stone*)..... \$1 p. ton. of 13 cub. ft.
88. Cement, burnt and unground..... 7½c. p. 100 lbs.
89. Cement, hydraulic, or water lime, ground, including barrels 40c. p. brl.
90. Cement, in bulk or in bags..... 9c. p. bsh.
91. Cement, Portland or Roman, shall be classed with all other cement at specific rates as above provided.
92. Cheese 3c. p. lb.
93. Chicory, raw or green..... 3c. p. lb.
94. Chicory, or other root or vegetable used as a substitute for coffee, kiln dried, roasted or ground..... 4c. p. lb.
95. China and porcelain ware..... 30 p. ct.
96. Cider, clarified or refined..... 10 c. p. I. g.
97. Cider not clarified or refined..... 5c. p. I. g.
98. Clay tobacco pipes (1887)..... 35 p. ct.
99. Clocks, and parts thereof, except springs..... 35 p. ct.
100. Clock springs..... 10 p. ct.
101. Clothes wringers (1887)..... \$1 each and 30 p. ct.
102. Clothing of any material, including horse clothing shaped, not otherwise provided for..... 30 p. ct.
103. Coal, bituminous..... 60c. p. ton. of 2,000 lbs.
104. Coal dust..... 20 p. ct.
105. Coal tar and coal pitch..... 10 p. ct.
106. Cocoa matting (1887)..... 30 p. ct.
107. Cocoa nuts..... \$1 p. 100.

108. Cocoa nuts, when imported from the place of growth by vessel direct to a Canadian port..... 50c. p. 100.
109. Cocoa nut, desiccated, sweetened or not..... 8c. p. lb.
110. Cocoa paste and chocolate, not sweetened..... 20 p. ct.
111. Cocoa paste and other preparations of cocoa containing sugar 1c. p. lb. and 25 p. ct.
112. Coffee, green, from the United States 10 p. ct.
113. Coffee, roasted or ground, from the United States..... 3c. p. lb. and 10 p. ct.
114. Coffee, roasted or ground, and all imitations of and substitutes for, not elsewhere specified..... 3c. p. lb.
115. Coke, per ton of 2,000 pounds. 50c. per ton.
116. Collars of cotton or linen (1887). 24c. p. doz. and 30 p. ct.
117. Coloured fabrics, woven or dyed or coloured cotton yarn, or part jute and part cotton yarn, or other material except silk, not elsewhere specified (1887) 25 p. ct.
118. Colours, dry, viz. : blue-black, Chinese blue, Prussian blue and raw umber. In pulp, viz. : carmine, cologne, and rose lakes, scarlet and maroon, satin and fine-washed white..... 20 p. ct.
119. Combs, for dress and toilet, of all kinds (1887)..... 30 p. ct.
120. Copper, old and scrap, in pigs, bars, rods, bolts, ingots and sheathing not planished or coated, and copper seamless drawn tubing..... 10 p. ct.
121. Copper rivets and burrs, and all manufactures of copper, not elsewhere specified..... 30 p. ct.
122. Cordage of all kinds..... 1½c. p. lb. and 10 p. ct.
123. Corks, and other manufactures of cork wood or cork bark 20 p. ct.

COTTON, MANUFACTURES OF, VIZ. :—

124. Bed comforters or cotton bed quilts, not including woven quilts or counterpanes (1887) 35 p. ct.
125. Grey or unbleached and bleached cotton, sheetings, drills, ducks, cotton or canton flannels, not stained, painted or printed..... 1c. p. sq. yd. and 15 p. ct.
126. All cotton denims, drillings, bedtickings, ginghams, plaids, cotton or canton flannels, ducks and drills, dyed or coloured, checked and striped shirtings, cottonades, Kentucky jeans, pantaloons stuffs, and goods of like description 2c. p. sq. yd. and 15½p. ct.
127. Cotton wadding, batting, batts and warps, carpet warps, knitting yarn, hosiery yarn and other cotton yarns, under number forty, not bleached, dyed or coloured, ... 2c. p. lb. and 15 p. ct.
128. And if bleached, dyed or coloured..... 3c. p. lb. and 15 p. ct.
129. Cotton warp, No. 60 and finer..... 15½p. ct.

130. Cotton warp, on beams	1c. p. yd. and 15 p. ct.
131. Cotton seamless bags.....	2c. p. lb. and 15 p. ct.
132. Cotton sewing thread, on spools (1887)	25 p. ct.
133. Cotton sewing thread, in hanks, black and bleached, three and six cord.....	12½ p. ct.
134. Clothing made of cotton or other material, not otherwise provided for, including corsets, and similar articles made up by the seamstress or tailor, also tarpaulin, plain or coated with oil, paint, tar or other composition, and cotton bags made up by the use of the needle, not otherwise provided for (1887).....	35 p. ct.
135. Lampwicks.....	30 p. ct.
136. Jeans and coutilles, when imported by corset makers, for use in their factories (1887).....	25 p. ct.
137. Printed or dyed cotton fabrics, not elsewhere specified (1887)	32½ p. ct.
138. All manufactures of cotton not elsewhere specified.....	20 p. ct.
139. Crapes of all kinds	20 p. ct.
140. Cuffs of cotton or linen(1887)	4c. per pr. and 30 p. ct.
141. Damask of cotton, of linen, or of cotton and linen, bleached, unbleached or coloured.....	25 p. ct.
142. Drain-tiles, not glazed.....	20 p. ct.
143. Drain pipes and sewer pipes, glazed (1887).....	35 p. ct.
144. Earthenware and stoneware, viz :—demijohns or jugs, churns and crocks (1887)	3c. p. gal.
145. Earthenware and stoneware, brown or coloured, and Rock- ingham ware, white granite or iron-stone ware, "C.C." or cream-coloured ware, decorated, printed or spunged, and all earthenware not elsewhere speci- fied (1887)	35 p. ct.
146. Emery wheels.....	25 p. ct.
147. Essences, viz : of apple, pear, pine-apple, raspberry, strawberry and other fruits, and vanilla.....	\$1.90 p. l. g. and 20 p. ct.
148. Essential oils for manufacturing purposes.....	20 p. ct.
149. Excelsior for upholsterers' use.....	20 p. ct.
150. Extract of beef or fluid beef, not medicated.	25 p. ct.
151. Feathers, ostrich and vulture, undressed.....	20 p. ct.
Feathers, ostrich and vulture, dressed	30 p. ct.
152. Fireworks	25 p. ct.
153. Fishing rods	30 p. ct.
154. Fire-proof paint, dry.....	¼c. p. lb.
155. Flax fibre, scutched.....	1c. p. lb.
Flax hackled.....	2c. p. lb.
156. Flax, tow of, scutched or green.....	½c. p. lb.
157. Flax seed.....	10c. p. bsh.

158. Flag stones, sawn or otherwise dressed (1887)..... \$2.00 p. ton.

FRUIT (DRIED), VIZ. :—

159. Apples..... 2c. p. lb.
 160. Raisins..... 1c. p. lb. and
 10 p. ct.
 161. Currants, dates, figs, prunes, and all other dried fruits not
 elsewhere specified 1c. p. lb.

FRUIT (GREEN), VIZ. :—

162. }
 163. } Fruit, green, transferred to Free List, Tariff No. 888,
 164. } from 4th April, per O.C. of 13th April, 1888.
 165. }
 166. }
 167. Grapes..... 2c. p. lb.
 168. Oranges and lemons, in boxes of capacity not exceeding
 two and one-half cubic feet..... 25c p. box.
 In one-half boxes, capacity not exceeding one and one-
 fourth cubic feet..... 13c. p. $\frac{1}{2}$ box.
 In cases and all other packages, per cubic foot holding
 capacity..... 10c. p. c. ft.
 In bulk, per one thousand oranges or lemons..... \$1.60 p. 1000.
 In barrels not exceeding in capacity that of the one
 hundred and ninety-six pounds flour barrel (1887)... 55c. p. brl.
 169. Fruits in air tight cans or other packages, including the
 cans or other packages, weighing not over one pound,
 three cents per can or package, and three cents addi-
 tional per can or package for each pound or fraction
 of a pound over one pound in weight—the rate to in-
 clude the duty on the cans or other packages, and the
 weight on which duty shall be payable to include the 3c. p. 1 lb.,
 weight of the cans or other packages can or pkg.
 170. Fruits, preserved in brandy or other spirits..... \$1.90 p. I. g.

FURS, VIZ. :—

171. Fur skins, wholly or partially dressed..... 15 p. ct.
 172. Caps, hats, muffs, tippets, capes, coats, cloaks and other
 manufactures of fur..... 25 p. ct
 173. Furniture of wood, iron or any other material, house,
 cabinet or office, finished or in parts, including hair
 and spring and other mattresses, bolsters and pillows,
 caskets and coffins of any material..... 35 p. ct.
 174. Bedsteads and other iron furniture..... 35 p. ct.
 175. Show cases \$2 each and
 35 p. ct.
 176. Gas, coal oil or kerosene fixtures, or parts thereof..... 30 p. ct.
 177. Gas meters (1887)..... 30 p. ct.
 178. German and nickel silver, manufactures of, not plated..... 25 p. ct.

GLASS AND MANUFACTURES OF, VIZ. :—

179. Flasks and phials of eight ounces capacity and over, telegraph and lightning rod insulators, jars and glass balls, and cut, pressed or moulded tableware.... (1887) and 30 p. ct.	5c. p. dozen
180. Glass carboys and demijohns, bottles and decanters, flasks and phials of less capacity than eight ounces (1887). ...	30 p. ct.
181. Lamp and gas-light shades, lamps and lamp chimneys, side lights and head lights, globes for lanterns, lamps and gas-lights.....	30 p. ct.
182. Ornamental, figured and enamelled stained glass, stained, tinted, painted and vitrified glass, and stained glass windows, figured, enamelled and obscured white glass.	30 p. ct.
183. Silvered plate.....	30 p. ct.
184. Common and colourless window glass.....	30 p. ct.
185. Plate glass, not coloured, in panes not over thirty square feet.....	6c. p. sq. ft.
186. Plate glass in panes over thirty and not over seventy square feet.....	8c. p. sq. ft.
187. Plate glass in panes over seventy square feet.....	9c. p. sq. ft.
188. Imitation porcelain shades, and coloured glass not figured, painted, enamelled or engraved.....	20 p. ct.
183. All other glass and manufactures of glass not herein otherwise provided for.....	20 p. ct.
190. Gloves and mitts, of all kinds.....	30 p. ct.
191. Glue, sheet, broken sheet and ground (1887).....	3c. per lb.
192. Gold and silver leaf (1887).....	30 p. ct.

GUNPOWDER AND OTHER EXPLOSIVES, VIZ. :—

193. Gun, rifle and pistol cartridges, and cartridge cases of all kinds and materials.....	30 p. ct.
194. Gun, rifle and sporting powder in kegs, half-kegs or quarter kegs and other similar packages.....	5c. p. lb.
195. Cannon and musket powder in kegs and barrels.....	4c. p. lb.
196. Canister powder, in pound and half-pound tins.....	15c. p. lb.
197. Blasting and mining powder.....	5c. p. lb.
198. Giant powder, dualin, dynamite, and other explosives in which nitro-glycerine is a constituent part.....	3c. p. lb. and 20 p. ct.
199. Nitro-glycerine.....	10c. p. lb. and 20 p. ct.
200. Gutta-percha, manufactures of.....	25 p. ct.
201. Hair-cloth, of all kinds.....	30 p. ct.
202. Hair, curled.....	20 p. ct.
203. Handkerchiefs, cotton or linen, plain or printed in the piece or otherwise.....	25 p. ct.
204. Harness and leather dressing (1887).....	25 p. ct.
205. Harness and saddlery of every description (1887).....	35 p. ct.
206. Hats, caps, and bonnets, not elsewhere specified.....	25 p. ct.
207. Honey, bees', in the comb or otherwise.....	3c. p. lb.

208. Hops.....	6c. p. lb.
209. Imitation precious stones, not set.....	10 p. ct.
210. India-rubber, viz. : boots and shoes, and other manufactures of, not otherwise provided for.....	25 p. ct.
211. India-rubber clothing, or clothing made water-proof with India-rubber	35 p. ct.
212. India-rubber vulcanized handles, for knives and forks.....	10 p. ct.
213. Ink for writing.....	25 p. ct.

IRON AND STEEL, MANUFACTURES OF, VIZ. :—

214. Axles and springs of iron or steel, parts thereof, axle bars, axle blanks or forgings for carriages other than railway and tramway vehicles, without reference to the stage of manufacture (1887)	1c. p. lb. and 30 p. ct.
215. Bar iron, rolled or hammered, comprising flats, rounds and squares, and bars and shapes of rolled iron, not elsewhere specified (1887).....	\$13 per ton.
216. Barbed wire fencing of iron or steel.....	1½c. p. lb.
217. Boiler or other plate iron, sheared or unsheared, skelp iron, sheared or rolled in grooves, and sheet iron, common or black, not thinner than number twenty gauge, not elsewhere specified, including nail plate of iron or steel, sixteen gauge and thicker (1887)	\$13 per ton.
218. Buckthorn, and strip fencing of iron or steel.....	1¼c. p. lb.
219. Cast iron forks, not handled, nor ground or otherwise further manufactured.....	10 p. ct.
220. Cast iron pipe of every description.....	\$12 per ton but not less than 35 p. ct.
221. Cast iron vessels, plates, stove plates and irons, sad irons, hatters' irons, tailors' irons and castings of iron not elsewhere specified.....	\$16 per ton but not less than 30 p. ct.
222. Chains (iron or steel) over nine-sixteenths of an inch in diameter	5 p. ct.
223. Composition nails and spikes and sheathing nails.....	20 p. ct.
224. Cut nails and spikes of iron or steel (1887)	1c. p. lb.
225. Cut tacks, brads or sprigs, not exceeding sixteen ounces to the thousand (1887)	2c. p. 1000.
226. Exceeding sixteen ounces to the thousand (1887).....	2c. p. lb.
227. Cutlery, not otherwise provided for.....	25 p. ct.
228. Ferro-manganese, ferro-silicon, spiegel, steel bloom ends, and crop ends of steel rails, for the manufacture of steel (1887).....	\$2 per ton.
229. Fire engines (1887)	35 p. ct.
230. Forgings of iron and steel, or forged iron of whatever shape or in whatever stage of manufacture, not elsewhere specified (1887).....	1½c. p. lb. but not less than 35 p. ct.

231. Hardware, viz. :—builders', cabinet makers' and carriage hardware and locks, tinsmiths' tools and harness makers' and saddlers' hardware, including curry combs (1887)	35 p. ct.
232. House furnishing hardware, not otherwise provided for ...	30 p. ct.
233. Hoop or band or scroll or other iron, eight inches or less in width, and not thinner than number twenty gauge...	\$13 per ton.
234. Hoop or band or scroll or other iron, eight inches or less in width and thinner than number twenty gauge (1887)	12½ p. ct.
235. Iron bridges and structural iron work (1887)	1¼c. p. lb. but not less than 35 p. ct.
236. Iron or steel car axles, parts thereof, axle bars, axle blanks or forgings for axles, and car springs of all kinds, and all other springs not elsewhere specified, without reference to the stage of manufacture (1887)	\$30 p. ton but not less than 35 p. ct.
237. Iron or steel railway bars and rails for railways and tramways, of any form, punched or not punched, not elsewhere specified (1887)	\$6 p. ton.
238. Iron or steel rivets, bolts with or without threads, or nut or bolt blanks, less than three-eighths of an inch in diameter (1887)	1¼c. p. lb. and 30 p. ct.
239. Iron in pigs, iron kentledge and cast scrap iron (1887)	\$4 per ton.
240. Iron in slabs, blooms, loops, puddled bars, or other forms less finished than iron in bars, and more advanced than pig iron, except castings (1887)	\$9 per ton.
241. Iron and steel wire, galvanized or not, fifteen gauge and coarser, not elsewhere specified (1887)	25 p. ct.
242. Knife blades or knife blanks, in the rough, unhandled, for use by electroplaters.....	10 p. ct.
243. Locomotives and other steam engines, boilers and machinery composed wholly or in part of iron or steel, not elsewhere specified.....	30 p. ct.
Provided that any locomotive which with its tender weighs thirty tons or over, shall pay a duty of not less than (1887)	\$3,000 each. \$25 per ton.
244. Malleable iron castings, and steel castings not elsewhere specified (1887).....	but not less than 30 p. ct.
245. Muskets, rifles and other firearms, and surgical instruments (1887)	20 p. ct.
246. Nails and spikes, wrought and pressed, galvanized or not, horse shoe nails, hob nails and wire nails, and all other wrought iron or steel nails not elsewhere specified, and horse, mule and ox shoes (1887).....	1¼c. per lb. ; but not less than 35 p. ct.
247. Plate of iron and steel combined, and steel not specially enumerated or provided for (1887).....	30 p. ct.

248. Portable machines, portable steam engines, threshers and separators, horse powers, portable saw mills and planing mills, and parts thereof in any stage of manufacture (1887) 35 p. ct.
249. Pumps, iron, pitcher-spout, cistern, well and force pumps.. 35 p. ct.
250. Railway fish plates (1887) \$12 per ton.
251. Rolled iron or steel angles, channels, structural shapes and special sections, weighing less than twenty five pounds $\frac{1}{2}$ c. a lb. and per lineal yard, not elsewhere specified (1887) 10 p. ct.
252. Rolled iron or steel beams, girders, joists, angles, channels, structural shapes, and special sections, weighing not less than twenty-five pounds per lineal yard (1887)..... 12 $\frac{1}{2}$ p. ct.
253. Rolled iron or steel beams, girders, joists, angles, channels, eyebar blanks made by the Kloman process, together with all other structural shapes of rolled iron or steel, including rolled iron or steel bridge plate not less than three-eighths of an inch thick, nor less than fifteen inches wide, when imported by manufacturers of bridges for use exclusively in the manufacture of iron and steel bridges (1887) 12 $\frac{1}{2}$ p. ct.
254. Safes, doors for safes and vaults, scales, balances and weighing beams of iron or steel (1887)..... 35 p. ct.
255. Screws, commonly called "wood screws," two inches or over in length (1887)..... 6c. p. lb.
One inch and less than two inches (1887) 8c. p. lb.
Less than one inch (1887) 11c. p. lb.
256. Sheet iron, common or black, smoothed or polished, and coated or galvanized, thinner than No. 20 gauge, Canada plates, and plate of iron or steel, not less than thirty inches wide and not less than one-fourth of an inch in thickness (1887) 12 $\frac{1}{2}$ p. ct.
257. Skates (1887)..... 20c. p. pair,
and 30 p. ct.
258. Steel ingots, cogged ingots, blooms and slabs, by whatever process made, billets and bars, bands, hoops, strips and sheets of all gauges and widths, all of above 30 p. ct. but classes of steel not elsewhere provided for, valued not less than at four cents or less per pound (1887)..... \$12 per ton.
Except ingots, cogged ingots, blooms and slabs upon which the specific duty shall be not less than (1887) \$8 per ton.
259. When of greater value than four cents per pound (1887)..... 12 $\frac{1}{2}$ p. ct.
260. Provided that on all iron or steel bars, rods, strips, or steel sheets, of whatever shape, and on all iron or steel bars of irregular shape or section, cold rolled, cold hammered or polished in any way in addition to the ordinary process of hot rolling or hammering, there shall be paid $\frac{1}{2}$ c. per lb. (1887) additional.

261. Provided further, that all metal produced from iron or its ores, which is cast and malleable, of whatever description or form, without regard to the percentage of carbon contained therein, whether produced by cementation, or converted, cast or made from iron or its ores by the crucible, Bessemer, pneumatic, Thomas-Gilchrist-basis, Siemens-Martin or open hearth process, or by the equivalent of either, or by the combination of two or more of the processes or their equivalents, or by any fusion or other process which produces from iron or its ores a metal either granulous or fibrous in structure, which is cast and malleable, except what is known as malleable iron castings, shall be classed and denominated as steel (1887).
262. Provided further that all articles rated as iron or manufacture of iron, shall be chargeable with the same rate of duty if made of steel, or of steel and iron combined, unless otherwise specially provided for (1887).
263. Steel needles, viz :—Cylinder needles, hand frame needles and latch needles..... 30 p. ct.
264. Swedish rolled iron nail rods, under a half inch in diameter, for manufacture of horse shoe nails (1887)..... 20 p. ct.
- TUBING, VIZ. :—
265. Boiler tubes of wrought iron or steel (1887)..... 15 p. ct.
266. Lap-welded iron tubing, threaded and coupled or not, one and one-quarter inch in diameter and over, but not over two inches, for use exclusively in artesian wells, petroleum pipe lines and for petroleum refineries (1887)..... 20 p. ct.
267. Tubes not welded, nor more than one and one-half inch in diameter, of rolled steel (1887) 15 p. ct.
268. Wrought iron tubing, threaded and coupled or not, over two inches in diameter (1887)..... 15 p. ct.
269. Other wrought iron tubes or pipes (1887)..... $\frac{1}{8}$ c. p. lb. and 30 p. ct.
270. Wire rope of iron or steel, not otherwise provided for (1887) 25 p. ct.
271. Wire of spring steel, coppered or tinned, number nine gauge or smaller, not elsewhere specified (1887)..... 20 p. ct.
272. Wrought iron or steel nuts and washers, iron or steel rivets, bolts with or without threads or nuts and bolt blanks, and finished hinges or hinge blanks, not elsewhere specified (1887)..... 1c. p. lb. and 25 p. ct.
273. Wrought scrap iron and scrap steel, being waste or refuse wrought iron or steel that has been in actual use and is fit only to be re-manufactured (1887) \$2 per ton.
274. Manufactures, articles or wares not specially enumerated or provided for, composed wholly or in part of iron or steel, and whether partly or wholly manufactured (1887) 30 p. ct.

275. Iron sand or globules, and dry putty for polishing granite.	20 p. ct.
276. Jellies and jams.....	5c. p. lb.
277. Jewellery and manufactures of gold and silver.....	20 p. ct.
278. Jute carpeting or matting and mats.....	25 p. ct.
279. Jute, manufactures of, not elsewhere specified.....	20 p. ct.
280. Laces, braids, fringes, embroideries, cords, tassels and bracelets; also braids, chains or cords of hair.....	30 p. ct.
281. Lamp black and ivory black.....	10 p. ct.
282. Lard, tried or rendered.....	2c. p. lb.
283. Lard, untried.....	1½c. p. lb.
284. Lead, old, scrap and pig.....	40c. p. 100 lbs.
285. Lead, bars, blocks and sheets.....	60c. p. 100 lbs.
286. Lead, nitrate and acetate of.....	5 p. ct.
287. Lead pipe and lead shot.....	1½c. p. lb.
288. Lead, and all manufactures of lead not otherwise specified.	30 p. ct.
289. Leather board.....	3c. p. lb.
290. Boot and shoe counters made from leather board.....	½c. p. pr.
291. Leather, sole, tanned, but rough or undressed.....	10 p. ct.
292. Morocco skins, tanned, but rough or undressed.....	10 p. ct.
293. Leather, belting leather, and all upper leather, including kid, lamb, sheep and calf, tanned or dressed, but not waxed or glazed (1887).....	15 p. ct.
294. Leather sole (1887).....	½c. p. lb. and 15 p. ct.
295. Glove leathers, viz: - buck, deer and antelope (also water- hog, O.C. 22nd Nov., 1887) tanned or dressed, coloured or not coloured.....	10 p. ct.
296. Leather as above, dressed and waxed or glazed.....	20 p. ct.
297. Japanned patent or enamelled leather (1887).....	25 p. ct.
298. Cordova leather, tanned from horse hide, and manufactures of.....	25 p. ct.
299. All other leather and skins, tanned, not otherwise specified.	20 p. ct.
300. Boots and shoes and other manufactures of leather, not elsewhere specified, and leather belting.....	25 p. ct.
301. Liquorice root, paste extract of (1887).....	2c. p. lb.
302. Stick extract or confection.....	1c. p. lb. and 20 p. ct.
303. Lithographic stones, not engraved.....	20 p. ct.
304. Malt, upon entry for warehouse, subject to excise regula- tions.....	15c. p. bsh.
305. Malt, extract of, for medicinal purposes.....	25 p. ct.
306. Machine card clothing.....	25 p. ct.
307. Magic lanterns and optical instruments, including micro- scopes and telescopes.....	25 p. ct.
308. Manila hoods.....	20 p. ct.
309. Marble in blocks from the quarry, in the rough or sawn on two sides only, and not specially shapen, containing 15 cubic feet or over (1887).....	10 p. ct.

310. Marble in blocks from the quarry, in the rough or sawn on two sides only, and not specially shapen, containing less than fifteen cubic feet (1887).....	15 p. ct.
311. Marble slabs, sawn on not more than two sides (1887).....	15 p. ct.
312. Marble blocks and slabs, sawn on more than two sides (1887)	25 p. ct.
313. Marble finished, and all manufactures of marble, not elsewhere specified (1887).....	35 p. ct.
314. Meats, fresh or salted, on actual weight as received in Canada, except should-ers, sides, bacon, and hams	1c. p. lb.
315. Shoulders, sides, bacon and hams, fresh, salted, dried or smoked.....	2c. p. lb.
316. Poultry and game of all kinds	20 p. ct.
317. All other dried or smoked meats, or meats preserved in any other way than salted or pickled, not otherwise specified,—(if imported in cans, the rate to include the duty on the cans, and the weight on which duty shall be payable to include the weight of cans).....	2c. p. lb.
318. Milk food, manufactured by Henri Nestlé, Dr. Gibaut, and others, and all similar preparations.....	30 p. ct.
319. Mucilage (1887).....	10 p. ct.
320. Musical instrument: of all kinds, not otherwise provided for.....	25 p. ct.
321. Mustard cake.....	20 p. ct.
322. Mustard seed, (transferred to free list, Tariff No. 890, from 4th April, per O.C. dated 13th April, 1885)	
323. Mustard, ground.....	25 p. ct.
324. Nickel anodes.....	10 p. ct.
325. Nuts of all kinds, not elsewhere specified.....	3c. p. lb.
326. Ochres, dry, ground or unground, washed or unwashed, not calcined.....	10 p. ct.
327. Oils, coal and kerosene, distilled, purified or refined; naphtha, benzole and petroleum; products of petroleum, coal, shale and lignite, not elsewhere specified...	7½c. p. I. g.
328. Carbolic or heavy oil, for any use.....	10 p. ct.
329. Cod liver oil, medicated.....	20 p. ct.
330. Lard oil.....	20 p. ct.
331. Linseed or flaxseed oil, raw or boiled (1887).....	30 p. ct.
332. Lubricating oils, composed wholly or in part of petroleum, and costing thirty cents per Imperial gallon or over.....	25 p. ct.
333. The same costing less than thirty cents per Imperial gallon.....	7½c. p. I. g.
334. All other lubricating oils.....	25 p. ct.
335. Neatsfoot oil.....	20 p. ct.
336. Olive or salad oil.....	20 p. ct.
337. Sesame seed oil.....	20 p. ct.
338. Oil cloth, floor (1887).....	5c. per sq. yd and 20 p. ct.

Articles imported by and for the use of the Dominion Government or any of the departments thereof, or by and for the Senate or House of Commons, including the following articles when imported by the said Government or through any of the Departments thereof for the use of the Canadian Militia:—Arms, military clothing, musical instruments for bands, military stores and munitions of war (1887);
572. The following articles when imported by and for the use of the Army and Navy:—Arms, military or naval clothing, musical instruments for bands, military stores and munitions of war (1887);
573. Bamboo reeds, not further manufactured than cut into suitable lengths for walking sticks or canes, or for sticks for umbrellas, parasols or sunshades;
574. Bamboos, unmanufactured;
575. Barrels of Canadian manufacture exported, filled with domestic petroleum and returned empty, under such regulations as the Minister of Customs prescribes;
576. Barilla;
577. Barytes, unmanufactured;
578. Beans, vanilla, and nux vomica;
579. Bees;
580. Belladonna leaves;
581. Bells for churches;
582. Berries for dyeing or used for composing dyes;
583. Bichromate of soda;
584. Bismuth, metallic;
585. Bolting cloths, not made up;
586. Bones, crude, not manufactured, burned, calcined, ground or steamed;
587. Bone-dust and bone-ash for manufacture of phosphates and fertilizers;
588. Books printed by any government, or by any scientific association or other society now existing, for the promotion of learning and letters, and issued in the course of their proceedings, and not for the purpose of sale or trade;
589. Books, educational, imported exclusively by and for the use of schools for the deaf and dumb and blind (1887);
590. Boracic acid;
591. Borax;
592. Botany, specimens of;
593. Brass, old scrap and in sheets;
594. Brick, fire, for use exclusively in processes of manufactures (1887);
595. Bristles;
596. Britannia metal in pigs and bars;
597. Brimstone, crude, or in roll or flour;
598. Brim moulds for gold beaters;
599. Bromine;
600. Broom corn;
601. Buchu leaves;
602. Buckram for the manufacture of hat and bonnet shapes;

603. Bullion, gold and silver ;
604. Burgundy pitch ;
605. Burr stones, in block, rough or unmanufactured, and not bound up into mill stones ;
606. Carriages of travellers and carriages laden with merchandise, and not to include circus troops nor hawkers, under regulations prescribed by the Minister of Customs ;
607. Cabinets of coins, medals and other collections of antiquities ;
608. Casts, as models, for the use of schools of design ;
609. Cornelian, unmanufactured ;
610. Canvas for manufacture of floor oil cloth, not less than forty-five inches wide, and not pressed or calendered ;
611. Canvas, jute canvas, not less than fifty-eight inches wide, when imported by manufacturers of floor oil cloth for use in their factories ;
612. Caoutchouc, unmanufactured ;
613. Cat-gut strings or gut cord for musical instruments ;
614. Cat-gut or whip-gut, unmanufactured ;
615. Celluloid or xyolite, in sheets, lumps or blocks ;
616. Chalk and cliff stone, unmanufactured ;
617. Chamomile flowers ;
618. Cherry heat welding compound ;
619. China clay, natural or ground ;
620. Chloralum or chloride of aluminium ;
621. Chloride of lime ;
622. Chronometers, and compasses for ships ;
623. Cinchona bark ;
624. Cinnabar ;
625. Citrons, and rinds of, in brine, for candying ;
626. Clays ;
627. Clothing, donations of, for charitable purposes ;
628. Coal, anthracite (1887) ;
629. Cobalt, ore of ;
630. Cochineal ;
631. Cocoa, bean, shell and nibs ;
632. Coffee, green, except as hereinbefore provided ;
633. Coins, gold and silver, except United States silver coin ;
634. Communion plate, and plated ware for use in churches ;
635. Coir and coir yarn ;
636. Conium cicuta, or hemlock seed and leaf ;
637. Copper in sheets ;
638. Cotton waste and cotton wool ;
639. Cotton yarns, finer than No. 40, unbleached, bleached or dyed, for use in the manufacture of Italian cloths, cotton, worsted or silk fabrics (1887) ;
640. Cork wood, or cork bark, unmanufactured ;
641. Colors, metallic, viz. :—Cobalt, zinc and tin ;
642. Cream of tartar, in crystals ;

643. Diamond drills, for prospecting for minerals ;
644. Diamonds, unset, including black diamonds for borers ;
645. Diamond dust or bort ;
646. Dragon's blood ;
647. Duck for belting and hose when imported by manufacturers of rubber goods for use in their factories ;
648. Dye, jet black ;
649. Dyeing or tanning articles, in a crude state, used in dyeing or tanning, not elsewhere specified ;
650. Eggs ;
651. Embossed books for the blind ;
652. Emery ;
653. Entomology, specimens of :
654. Ergot ;
655. Esparto, or Spanish grass, and other grasses, and pulp of, for the manufacture of paper ;
656. Extract of logwood ;
657. Fancy grasses dried but not coloured or otherwise manufactured ;
658. Felt, adhesive, for sheathing vessels ;
659. Fire clay ;
660. Fibre, Mexican ;
661. Fibre, vegetable, for manufacturing purposes ;
662. Fibrilla ;
663. Fillets of cotton and rubber, not exceeding seven inches wide, when imported by, and for the use of, manufacturers of card clothing ;
664. Fish hooks, nets and seines, and lines and twines, for the use of fisheries, but not to include sporting fishing-tackle or hooks with flies or trawling spoons ;
665. Fur skins of all kinds not dressed in any manner ;
666. Flint, flints and ground flint stones ;
667. Folie digitalis ;
668. Foot grease, the refuse of the cotton seed after the oil is pressed out ;
669. Fossils ;
670. Fowls, pure bred, including pheasants and quails, for improvement of stock ;
671. Fuller's earth ;
672. Gannister (1887) ;
673. Gas coke, when used in Canadian manufactures only ;
674. Gentian root ,
675. Ginseng root ;
676. Gold-beaters' moulds and gold-beaters' skins ;
677. Gravels ;
678. Grease, the refuse of animal fat, for the use of soap stock, not otherwise provided for ;
679. Guano and other animal and vegetable manures ;
680. Gums, amber, Arabic, Australian, copal, damar, mastic, sandarac, shellac and tragacanth (1887) ;

681. Gut, and worm gut, manufactured or unmanufactured, for whip and other cord ;
682. Gutta percha, crude ;
683. Gypsum, crude (sulphate of lime) ;
684. Hair, angola, buffalo and bison, camel, goat, hog, horse and human, cleaned or uncleaned, but not curled or otherwise manufactured ;
685. Hatters' furs, not on the skin ;
686. Hatters' plush of silk or cotton ;
687. Hemlock bark ;
688. Hemp, undressed ;
689. Hides, raw, whether dry, salted or pickled ;
690. Hoop iron, not exceeding three-eighths of an inch in width, and being No. 25 gauge or thinner, used for the manufacture of tubular rivets ;
691. Horn strips, when to be used in making corsets ;
692. Horses, cattle, sheep and swine, for the improvement of stock, under regulations made by the Treasury Board and approved by the Governor in Council ;
693. Hoofs, horns and horn tips ;
694. Hyoscyamus, or henbane leaf ;
695. Ice ;
696. India rubber, unmanufactured ;
697. India hemp (crude drug) ;
698. Indigo ;
699. Indigo auxiliary ;
700. Indigo, paste and extract of ;
701. Iodine, crude ;
702. Iris, orris root ;
703. Iron or steel rolled round wire rods under half an inch in diameter, when imported by wire manufacturers for use in their factories (1887) ;
704. Iron or steel beams, sheets, plates, angles and knees for iron or composite ships or vessels ;
705. Iron liquor, solution of acetate of iron for dyeing and calico printing ;
706. Istle or tampico fibre ;
707. Ivory and ivory nuts, unmanufactured ;
708. Iron masts for ships, or parts of ;
709. Jalap, root ;
710. Junk, old ;
711. Jute, butts ;
712. Jute ;
713. Jute cloth, as taken from the loom, neither pressed, mangled, calendered, nor in any way finished, and not less than forty inches wide, when imported by manufacturers of jute bags for use in their own factories ;
714. Jute yarn, plain, dyed or coloured, when imported by manufacturers of carpets, rugs and mats, for use in their own factories ;
715. Kainite, or German potash salts for fertilizers ;
716. Kelp ;
717. Kryolite ;

718. Lac-dye, crude, seed, button, stick and shell ;
719. Lava, unmanufactured ;
720. Leeches ;
721. Liquorice root ;
722. Litharge ;
723. Litmus and all lichens, prepared and not prepared ;
724. Lemons, and rinds of, in brine for candying ;
725. Logs, and round unmanufactured timber, not elsewhere provided for ;
726. Lumber and timber, plank and boards, sawn, of boxwood, cherry, walnut, chesnut, gumwood, mahogany, pitch pine, rosewood, sandalwood, Spanish cedar, oak, hickory and whitewood, not shaped, planed, or otherwise manufactured, and sawdust of the same, and hickory lumber, sawn to shape for spokes of wheels but not further manufactured ;
727. Locomotives and railway passenger, baggage and freight cars, being the property of railway companies in the United States, running upon any line of road crossing the frontier, so long as Canadian locomotives and cars are admitted free under similar circumstances in the United States, under regulations prescribed by the Minister of Customs ;
728. Locomotive tires of steel in the rough (1887) ;
729. Locust beans, for the manufacture of horse and cattle food ;
730. Madder and munjeet, or Indian madder, ground or prepared, and all extracts of ;
731. Manganese, oxide of ;
732. Manilla grass ;
733. Manuscripts ;
734. Meerschaum, crude or raw ;
735. Mineral waters, natural, not in bottle—under regulations made by the Minister of Customs ;
736. Mineralogy, specimens of ;
737. Models of inventions and other improvements in the arts ; but no article or articles shall be deemed a model of improvement which can be fitted for use ;
738. Moss, Iceland, and other mosses, crude ;
739. Moss, seaweed, and all other vegetable substances used for beds and mattresses, in their natural state, or only cleaned ;
740. Menageries—horses, cattle, carriages, and harness of, under regulations prescribed by the Minister of Customs ;
741. Musk, in pods or in grains ;
742. Nitrate of soda, or cubic nitre ;
743. Nut galls ;
744. Newspapers, and quarterly, monthly and semi-monthly magazines, and weekly literary papers, unbound ;
745. Nickel ;
746. Oak bark ;
747. Oakum ;
748. Oil cake, cotton seed cake and meal, palm nut cake and meal ;

749. Oil cake meal ;
750. Oils, cocconut and palm, in their natural state ;
751. Oranges and rinds of, in brine, for candying ;
752. Ores of metals of all kinds ;
753. Ottaf of roses ;
754. Osiers ;
755. Oxalic acid ;
756. Paintings, in oil or water colours, by artists of well-known merit, or copies of the old masters by such artists ;
757. Paintings in oil or water colours, the production of Canadian artists, under regulations to be made by the Minister of Customs ;
758. Palm leaf, unmanufactured ;
759. Pearl, mother of, not manufactured ;
760. Persis, or extract of archill and cudbear ;
761. Philosophical instruments and apparatus,—that is to say, such as are not manufactured in the Dominion, when imported by and for use in universities, colleges, schools and scientific societies ;
762. Pictorial illustrations of insects, &c., when imported by and for the use of colleges and schools, scientific and literary societies ;
763. Phosphorus ;
764. Pelts ;
765. Pipe clay ;
766. Pitch (pine), in packages of not less than fifteen gallons each ;
767. Platinum wire ;
768. Plaits, straw, Tuscan and grass ;
769. Potash, German mineral ;
770. Potash, muriate and bichromate of, crude ;
771. Precipitate of copper, crude ;
772. Pumice and pumice stone, ground or unground ;
773. Quercitron, or extract of oak bark, for tanning ;
774. Quicksilver ;
775. Quills in their natural state or unplumed (1887) ;
776. Quinine, sulphate of, in powder ;
777. Rags, of cotton, linen, jute and hemp, paper waste or clippings and waste of any kind, fit only for manufacture of paper ;
778. Rattans and reeds, unmanufactured ;
779. Recovered rubber and rubber substitute ;
780. Red liquor, a crude acetate of aluminium prepared from pyroligneous acid, for dyeing and calico printing ;
781. Redwood planks and boards, sawn, but not further manufactured (1887) ;
782. Rennet, raw or prepared ;
783. Resin, in packages of not less than fifteen gallons each ;
784. Rhubarb root ;
785. Rolled rods of steel under half an inch in diameter or under half an inch square, when imported by knob or lock manufacturers or cutlers for use exclusively in such manufactures in their own factories (1887) ;
786. Roots, medicinal, viz. :—aconite, calumba, ipecacuanha, sarsaparilla, squills, taraxacum, valerian ;

787. Rubber, hard, crude, in sheets, plain or moulded ;
788. Salt cake, being a sulphate of soda, when imported by manufacturers of glass and soap for their own use in their works ;
789. Salt, imported from the United Kingdom or any British possession or imported for the use of the sea or gulf fisheries, not otherwise provided for ;
790. Saffron and safflower; and extract of ;
791. Saffron cake ;
792. Sal ammoniac ;
793. Sal soda ;
794. Sand ;
795. Sausage skins or casings, not cleaned ;
796. Scrap iron and scrap steel, old and fit only to be re-manufactured, being part of or recovered from any vessel wrecked in waters subject to the jurisdiction of Canada (1887) ;
797. Sea-weed, not elsewhere specified ;
798. Sea-grass ;
799. Seeds, anise, coriander, cardamon, fennel and fennegreek ;
800. Senna, in leaves ;
801. Silix, or crystalized quartz ;
802. Silk, raw, or as reeled from the cocoon, not being doubled, twisted or advanced in manufacture in any way, silk cocoons and silk waste ;
803. Silver and German silver, in sheets, for manufacturing purposes ;
804. Skins, undressed, dried, salted or pickled ;
805. Soda ash ;
806. Soda caustic ;
807. Soda, silicate of ;
808. Sodium, sulphide of ;
809. Settlers' effects, viz. :—Wearing apparel, household furniture, professional books, implements and tools of trade, occupation or employment, which the settler has had in actual use for at least six months before removal to Canada, musical instruments, domestic sewing machines, live stock, carts and other vehicles and agricultural implements in use by the settler for at least one year before his removal to Canada, not to include machinery, or articles imported for use in any manufacturing establishment, or for sale ; provided that any dutiable articles entered as settler's effects may not be so entered unless brought with the settler on his first arrival, and shall not be sold or otherwise disposed of without payment of duty, until after two years' actual use in Canada ; provided also, that under regulations made by the Minister of Customs, live stock, when imported into Manitoba or the North-West Territories by intending settlers, shall be free, until otherwise ordered by the Governor in Council ;
810. Steel, in sheets of not less than eleven nor over eighteen wire gauge, and costing not less than seventy-five dollars per ton of two thousand two hundred and forty pounds, when imported by manufacturers of shovels and spades for use exclusively in such manufacture in their own factories ;

811. Steel of number twenty gauge and thinner, but not thinner than number thirty gauge, to be used in the manufacture of corset steels, clock springs and shoe shanks, when imported by the manufacturers of such articles for use in their factories ;
812. Steel rails, weighing not less than twenty-five pounds per lineal yard, for use in railway tracks (1887) ;
813. Steel valued at two and one-half cents per pound and upwards for use in the manufacture of skates (1887) ;
814. Steel bowls for cream separators (1887) ;
815. Steel for the manufacture of files, when imported by file manufacturers for use in their factories (1887) ;
816. Steel for saws and straw cutters, cut to shape, but not further manufactured ;
817. Spelter, in blocks and pigs ;
818. Spurs and stilts, used in the manufacture of earthenware ;
819. Sulphate of iron (copperas) ;
820. Sulphur, in roll or flour ;
821. Tails, undressed ;
822. Tagging metal, plain, japanned or coated, in coils not over one and a-half inches in width, when imported by manufacturers of shoe and corset laces for use in their factories ;
823. Tampico, white and black ;
824. Tanners' bark ;
825. Tar (pine), in packages of not less than fifteen gallons each ;
826. Tea, except as hereinbefore provided ;
827. Terra Japonica ;
828. Teasels ;
829. Tin, in blocks, pigs, bars and sheets, and plates and tin foil ;
830. Tobacco, unmanufactured, for excise purposes, under conditions of "*The Act respecting the Inland Revenue* ;"
831. Tortoise and other shells, unmanufactured ;
832. Travellers' baggage, under regulations prescribed by the Minister of Customs ;
833. Trees, forest, when imported into the Province of Manitoba or the North-West Territories for planting ;
834. Tree-nails ;
835. Turmeric ;
836. Turpentine, raw or crude ;
837. Turtles ;
838. Ultra marine blue, in pulp ;
839. Vaccine and ivory vaccine points ;
840. Varnish, black and bright, for ships use ;
841. Vitriol, blue ;
842. Veneers of ivory, sawn only (1887) ;
843. Verdigris, or sub acetate of copper, dry ;
844. Vegetable fibres, natural, not produced by any mechanical process ;
845. White shellac, for manufacturing purposes ;

846. Whiting or whitening ;
 847. Whalebone, unmanufactured ;
 848. Willow for basket makers ;
 849. Wire of brass or copper, round or flat ;
 850. Wire of iron or steel, galvanized or tinned, number sixteen gauge or smaller (1887) ;
 851. Wire rigging for ships and vessels ;
 852. Wood for fuel, when imported into Manitoba and the North-West Territories ;
 853. Woods, not further manufactured than sawn or split, viz. :—African teak, black heart ebony, lignum vitæ, red cedar and satin wood ;
 854. Wool, unmanufactured, hair of the alpaca, goat and other like animals, not elsewhere specified ;
 855. Yellow metal, in bolts, bars, and for sheathing ;
 856. Zinc, in blocks, pigs and sheets. 42 V., c. 15, Schedules B and C ;—43 V., c. 18, s. 2 ;—44 V., c. 10, s. 3 ;—45 V., c. 6, s. 5 ;—46 V., c. 13, s. 1 ;—47 V., c. 30, s. 1 ;—48-49 V., c. 61, s. 1 ; 49 V., c. 37, s. 2

The following articles are prohibited to be imported under a penalty of two hundred dollars, together with the forfeiture of the parcel or package of goods in which the same are found, viz. :—

857. Books, printed paper, drawings, paintings, prints, photographs or representations of any kind of a treasonable or seditious, or of an immoral or indecent character ;
 858. Reprints of Canadian copyright works, and reprints of British copyright works which have been also copyrighted in Canada ;
 859. Coin, base or counterfeit. 42 V., c. 15, Schedule D ;—44 V., c. 10, s. 4 ;—49 V., c. 37, s. 5, part.

EXPORT DUTIES :—

860. Shingle bolts of pine or cedar, and cedar logs capable of \$1.50 per 128 being made into shingle bolts (1887)..... cubic feet.
 861. Spruce logs..... \$1 p. M., B.M.
 862. Pine logs \$2 p. M., B.M.
 863. Provided that the powers vested in the Governor in Council by section nine of 49 Vic., cap. 33, shall extend and apply in all respects to the above-named articles, and that the Governor in Council may increase the export duty on pine logs to..... \$3 p. M., B.M.
 49 V., c. 37, s. 4.

ARTICLES ADDED TO THE FREE LIST UNDER AUTHORITY OF
ORDERS IN COUNCIL.

864. Woollen rags;
865. Glass, bent, for manufacture of show cases, provided it is not made in Canada;
866. Any goods or packages being the growth, produce or manufacture of Canada, and having been exported therefrom and intended to be returned, may be admitted free of duty on being re-imported to Canada, provided such goods or packages were entered for exportation and branded or marked by a Collector or proper officer of Customs, when fully identified by the Collector or proper officer at the port or place where they are so re-imported; and further, provided that the property in such goods or packages has continued in the same person or persons by whom they were exported, and that such re-importation takes place within one year of the exportation thereof;
867. Lastings, mohair cloth, or other manufactures of cloth, imported by manufacturers of buttons for use in their own factories, and woven or made in patterns of such size, shape or form, or cut in such manner as to be fit for covering buttons exclusively;
868. Crucible sheet steel, 11 to 16 gauge, $2\frac{1}{2}$ to 18 inches wide, imported by manufacturers of mower and reaper knives for manufacture of such knives in their own factories;
869. Seed and breeding oysters, imported for the purpose of being planted in Canadian waters;
870. Fish skins and fish offal, imported by manufacturers of glue for use in their own factories;
871. Books printed in any of the languages or dialects of any of the Indian Tribes of the Dominion of Canada;
872. Hatters' bands, bindings, tips and sides, and linings both tips and sides, when imported by hat manufacturers only, for use in their factories in the manufacture of hats;
873. Hickory billets, not further manufactured than sawn to shape, to be used in the manufacture of axe, hatchet, hammer and other tool handles, when imported for such use;
874. Steel strip, specially imported by manufacturers of buckthorns and plain strip fencing for use in their factories;
875. Brass and copper wire, twisted, imported by manufacturers of boots and shoes, for use in their factories;
876. Wood of the persimmon and dogwood trees imported in blocks for the manufacture of shuttles;
877. Ultramarine blue;
878. Brass cups, being rough blanks, for the manufacture of brass and paper shells or cartridges, when imported by manufacturers of brass or paper shells or cartridges for use in their own factories;
879. Yarn, spun from the hair of the alpaca or angora goat, when imported by manufacturers of braid for use exclusively in their factories in the manufacture of such braids only;

880. Sweat leathers, imported by hat manufacturers only, for use in their factories in the manufacture of hats ;
881. Square reeds and raw hide centres, textile leather or rubber heads, thumbs and tips, and steel, iron or nickel caps for whip ends, imported by whip manufacturers for use in the manufacture of whips in their own factories ;
882. Noils, being the short wool which falls from the combs in worsted factories ;
883. Homo spring steel wire, coppered or tinned, smaller than No. 9 and not smaller than No. 15 wire gauge, when imported by manufacturers of mattresses for use in their own factories.
884. Green fruits and edible berries, in their natural condition, viz. : Apples, apricots, bananas, cherries, mangoes, olives, peaches and pineapples, plantains, plums, pomegranates, quinces and shaddocks ;
885. Blackberries, cranberries, gooseberries, raspberries and strawberries ;
886. Seeds, viz. : Clover, grass and flower, canary, chia, cotton, jute, mustard (brown and white), sesame, sugar beet, sugar cane seed, and seeds of fruit and forest trees not edible ;
887. Seeds, aromatic, which are not edible and are in a crude state, and not advanced in value or condition by refining or grinding or by any other process of manufacture (in addition to those already on the free list), viz. :—Anise-star, caraway, cummin seed and Tonquin beans ;
888. Trees, shrubs and plants, viz. :—Apple, cherry, peach, pear, plum, quince and all other fruit trees and the seedling stock of the same. Blackberry, currant, gooseberry, raspberry and rose bushes, grape and strawberry vines ;
889. Shade, lawn and ornamental trees, shrubs and plants ;
890. Vegetables, viz. :—Citrous, melons and yams.
-

DECISIONS BY BOARD OF CUSTOMS.

The following is a list of decisions which have been made by the Board of Customs from time to time between the date of the last change of tariff and the 31st May, 1888. It must be remembered that these decisions, while binding for the time, have not been made part of the tariff by Act of Parliament, and are liable to be overruled by Order in Council.

ARTICLES.	Tariff item under which classed.	Rate of Duty Payable.
Albany compound (grease)	333	25 p. ct.
