XXIV. Areas and products of field crops, 1891-1901	85-88
XXV. Comparative statistics of principal grain crops in eastern provinces with Manitoba and the Territories, 1891-1901	89
XXVI. Fruit production, 1871-1901	90-91

AGRICULTURE—con.

PAGE.

XXVII.	Number of fruit trees and grape vines and area of orchards, gardens, vineyards and nurseries, 1901.....	92-93
XXVIII.	Live stock, 1871-1901.....	94-95
XXIX.	Animal products, 1871-1901.....	96-97
XXX.	Values of farm property and products, 1901.....	98-99
XXXI.	Summary of farm values, 1901.....	100
XXXII.	Rent and hired labour, 1901.....	101
XXXIII.	Butter and cheese making, 1901.....	102-103
XXXIV.	Butter and cheese making, 1871-1901.....	104
XXXV.	Average number of live stock per farm, 1901.....	105
XXXVI.	Average of animal products per farm, 1901.....	105
XXXVII.	Average production of principal field crops per farm, 1901.....	105

THE FOREST

XXXVIII.	Production of timber, logs, wood, etc., 1871-1901.....	106-109
XXXIX.	Values of timber, logs, wood, etc., 1901.....	110-112
XL.	Values of forest products exported from Canada in the five fiscal years 1903-1907.....	113
XLI.	Value of furs, 1881-1901.....	113

THE MINES

XLII.	Mineral products by quantities, 1871-81-1901.....	114-115
XLIII.	Mineral products by quantity and value, 1901.....	116-121
XLIV.	Averages and ratios for mines and works, 1901.....	122
XLV.	Metals and metal products (including pig iron), 1891 and 1901.....	122
XLVI.	Mineral products of the Dominion, 1901.....	123

MANUFACTURES

XLVII.	Statistics of industries, 1871.....	124-127
XLVIII.	Statistics of industries, 1881.....	128-131
XLIX.	Statistics of industries, 1891.....	132-136
L.	Statistics of industries, 1901.....	137-142
LI.	Values of real estate, plant and working capital, 1901.....	143
LII.	Persons employed on salaries, 1901.....	143
LIII.	Persons employed on wages, 1901.....	143
LIV.	Working time of wage-earners, 1901.....	144
LV.	Total employees, salaries and wages, 1901.....	144
LVI.	Averages of salaries and wages, 1901.....	144
LVII.	Working time of establishments, 1901.....	145
LVIII.	Miscellaneous expenses, 1901.....	145
LIX.	Cost of materials and value of products, 1901.....	145
LX.	Principal statistics of manufactures, 1901.....	146
LXI.	Power employed in manufacturing establishments, 1901.....	146
LXII.	Horse power aggregates and averages, 1901.....	147
LXIII.	Classes of power, 1901.....	147
LXIV.	Principal manufacturing establishments of 1901 by groups of products.....	147-148
LXV.	Statistics of industries, 1906.....	149-153

MANUFACTURES—con.	PAGE.
LXVI. Principal manufacturing establishments of 1906 by groups of products.....	154-155
LXVII. Comparative statement of values of production, 1881-1906.....	156
LXVIII. Averages of production per wage-earner, 1881-1906.....	156
WAGE-EARNERS	
LXIX. Number of occupations of wage-earners by classes, 1901.....	157-158
LXX. Earnings at regular work by classes of occupations, 1901.....	159
LXXI. Extra earnings by classes of occupations, 1901.....	159
LXXII. Employees and salaries by principal occupations in the professional class, 1901.....	159
LXXIII. Number and average salaries of teachers by sex in provinces, 1901.....	160
LXXIV. Total occupations and percentage of occupations by sex in provinces, 1901.....	160
LXXV. Percentage of total time and earnings by sex in provinces, 1901.....	160
LXXVI. Percentage of total time and earnings by classes of occupation, 1901.....	160
NORTHWEST PROVINCES	
LXXVII. Population by districts, 1906 and 1901.....	161
LXXVIII. Sex, conjugal state, birthplace and ages of the people in 1906.....	162-163
LXXIX. Number and population of cities, towns, villages, townships, etc., in 1901 and 1906.....	164
LXXX. Immigration by provinces, 1st January 1901 to 24th June 1906.....	164
LXXXI. Population of cities, towns and incorporated villages in 1906 and 1901 as classed in 1906.....	165-166
LXXXII. Farms in the provinces in 1906 and 1901.....	167
LXXXIII. Horses, horned cattle, sheep and swine in the provinces in 1906 and 1901.....	168

THE CANADA YEAR BOOK 1907

The third volume of the Second Series of the Year Book is for 1907, in which the fiscal year ends March 31. The principal addition to this volume, besides the year's statistics, consists of a series of summary tables of field crops and live stock for 1907 compiled from a Post Office Census of the provinces of Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island. The principal table relating to railways has been recast to conform with the new classification of statistics in the last annual report of the Department of Railways and Canals. The notes of Events of the Year have been prepared by Mr. E. H. Godfrey and the tables by Messrs. James Skead and Joseph Wilkins.

ARCHIBALD BLUE,

Chief Officer.

Census and Statistics Office,

Ottawa, March, 1908.

EVENTS OF THE YEAR

The third session of the tenth Parliament of the Dominion of Canada, which was opened on November 22, 1906, and closed by prorogation on April 27, 1907, resulted in the enactment of 142 separate measures, including 54 public general acts and 88 local and private acts. Of the former the large majority were in amendment of existing statutes. Other legislation was original in character, and the measures of chief public interest were those relating to the prevention and settlement of strikes and lockouts, the inspection of meats and canned foods, the provision of public warehouses for cold storage, the inspection and exportation of electricity, the granting of bounties for the manufacture of iron and steel in Canada, the creation of a Department of Mines and the sanctioning of a commercial treaty between Canada and Japan. Parliament reassembled for its fourth session on November 28, 1907.

Allegations and disclosures which were made two years ago as to methods employed in the Chicago meat packing warehouses caused considerable apprehension amongst consumers of canned foods throughout the world and led to an immediate diminution in the demand for their supply. Although there was no reason to believe that serious malpractices existed on the part of Canadian food packers and exporters, Parliament deemed it advisable to bring the slaughtering and canning establishments in Canada under strict government inspection, with a view to provide absolute safeguards for the sound and wholesome condition of meats and canned articles of food which are exported largely to European countries.

The Meat and Canned Foods Act, ch. 27, passed under these circumstances, provides for the official inspection of all animals intended for slaughter, and of all carcasses and portions or products thereof packed in cans or similar receptacles and intended for export. This inspection applies during the whole course of preparation and packing, and carcasses or products are subject to re-inspection in order to ascertain whether subsequently to the first inspection they have undergone decomposition or deterioration, or have been tampered with or adulterated by the use of preservatives or otherwise.

The act lays down as an absolute principle that all animals, carcasses, fish, fruit and vegetables, prepared for export, shall be sound, wholesome and fit for food. All articles prepared for food and packed in cans or similar receptacles must be marked on the packages with (a) the name and address of the packer and (b) a true and correct description of the contents of the package; but the Governor in Council may exempt

articles from this provision in cases where he is satisfied that such marking would hinder the sale of the article in British or foreign markets. Provision is also made against the exportation of canned goods under deceptive names, or with labels, brands or marks falsely representing quantity, weight, date or contents of packages.

Regulations under the act.

The administration of the act, including the appointment of inspectors and other officers, is entrusted to the Minister of Agriculture. The Governor in Council is empowered to make regulations for carrying out the provisions of the act, and a series of 31 such regulations was made on August 21 and published in the Canada Gazette of August 26. They provide that inspected carcasses or portions thereof, which have been duly passed as fit for food, must bear an official distinctive mark consisting of the words 'Canada approved', the crown and the number of the establishment. The diseases or diseased appearances that render animals or carcasses unfit for food are scheduled, and rules are laid down to ensure sanitary conditions and the observance of strict cleanliness. Carcasses or portions thereof which, after inspection, are not approved as fit for food are either 'condemned' for absolute destruction or are 'rejected' for rendering into lard or tallow after removal of any diseased parts.

Imprisonment or fines for infringements.

Infringement of the act by the sale of unwholesome meat for export is punishable as an indictable offence and incurs liability to a year's imprisonment, or to two years' imprisonment in the event of repeated conviction. Establishments that fail to comply with the act or with the regulations made thereunder may be closed by order of the Minister of Agriculture. A penalty of \$100 is imposed for tampering with marks; and other violations of the act, such as the obstruction or bribery of inspectors, unlawful removal, etc., are punishable by fines not exceeding \$500.

The Cold Storage Act.

Chapter 6, the Cold Storage Act, is described as an act to encourage the establishment of cold storage warehouses for the preservation of perishable food products. It empowers the Governor in Council to enter into contracts with any persons for the construction, equipment with mechanical refrigeration, and maintenance of public cold storage warehouses in Canada and to grant out of moneys appropriated by Parliament for the purpose a subsidy towards the construction and equipment of any such warehouse not exceeding 30 per cent of the total cost.

Conditions under which subsidies may be granted.

The construction, equipment and operation of the subsidized warehouses are subject to the approval of the Minister of Agriculture, who is authorized to arrange for their inspection and supervision and for the regulation and control of the temperatures therein. For this purpose he may appoint inspectors with access to all parts of the warehouses at all times. The rates and tolls chargeable for storage are subject to the approval of the Governor in Council who may make regulations under the act,

including the imposition of penalties not exceeding \$50 on any person offending against them. Chapter 7 of the statutes of 1897, intituled an 'Act respecting Cold Storage on Steamships from Canada to the United Kingdom and in certain cities in Canada' is repealed.

A series of regulations under the act, approved by the Governor in Council on May 3rd, 1907, provides *inter alia* for the temperatures that must be maintained in subsidized cold storage warehouses for the preservation therein of different kinds of produce. Regulations under the act.

Recent development of the mining industries of Canada has rendered desirable a better organization of the department of the Government which is concerned with the geological and mineral resources of the Dominion. By the Geology and Mines Act, chapter 29, the Geological Survey, which was established in 1890 by act of parliament (53 Vict., ch. 11) as a department under the control of the Minister of the Interior, is replaced by a separate Department of Mines to which is entrusted the administration of all laws of the Parliament of Canada relating to mines and mining. The new department consists of two branches, the Mines Branch and the Geological Survey. Department of Mines.

The functions of the Mines Branch will include the collection and publication of statistics of mineral production and of the mining and metallurgical industries of Canada and of such data regarding the economic minerals of Canada as relate to processes and activities connected with their utilization. The branch will also undertake the collection and preservation of all available records of mines and mining works in Canada, and will make detailed investigations of mining camps and areas containing economic minerals or deposits of other economic substances for the purpose of determining the mode of occurrence and the extent and character of the ore-bodies and deposits of the economic minerals or other economic substances. The Mines Branch.

The Geological Survey will continue the scientific work upon which it has heretofore been engaged as a separate department, and, in addition, the branch will be required to map the forest areas of Canada and to make and report upon investigations useful to the preservation of the forest resources of Canada. Geological Survey.

The Electricity Inspection Act, ch. 14, whilst repealing the Electric Light Inspection Act of 1894, re-enacts its main provisions with amendments found necessary by experience and progress. Instead of being limited to electric lighting as in the act of 1894, the new act applies to electricity in all its uses whether for light, power or any other purpose. The act provides also for the appointment of a chief electrical engineer and for a special qualifying examination in electricity to be passed by candidates for appointment as inspectors or assistant inspectors under the act. Inspection of electricity.

Chapter 16 is an act to regulate the exportation of electric power and of certain liquids and gases. By it the exportation Exportation of electric

Power and of liquid or gaseous fluids. from Canada of power or fluid without a license is forbidden, 'power' being defined as electric power or energy produced in Canada and 'fluid' as petroleum, natural gas, water or other fluid, whether liquid or gaseous, capable of being exported by means of pipe lines or other like contrivances and produced in Canada. The Governor in Council is empowered to grant licenses upon such conditions as he thinks proper, and such licenses may provide that the quantity of power or fluid exported shall be limited to the surplus after the licensee has supplied for distribution to customers for use in Canada power or fluid to the extent defined by the license at prices and in accordance with regulations prescribed. The Governor in Council may make regulations under the act and by them may impose fees to be paid by applicants for licenses and others. He may also by proclamation impose export duties not exceeding \$10 per annum per 'h.p.' upon power exported from Canada, or not exceeding 10 cents per 1,000 cubic feet on fluid exported from Canada, and may by similar proclamation exempt from the payment of such duties those complying with directions as to the initial supply of power or fluid to Canadian customers.

Penalties for unlawful exportation of power or fluid. Unlawful exportation of power or fluid renders the offender liable for each day on which any such exportation takes place to a penalty not exceeding \$5,000 and not less than \$1,000 and for unlawfully placing wires, laying pipes, etc., to a penalty not exceeding \$5,000 and not less than \$1,000, besides forfeiture and destruction of the material.

Intercolonial and P. E. I. Railways Employees' provident fund. Chapter 22 is important as establishing the principle of statutory co-operation in the granting of pensions to employees between the State as the owner of railways and the railway servants employed thereon. It provides that every employee of the Intercolonial and Prince Edward Island Railways shall contribute monthly to a provident fund an amount equal to 1½ per cent of his regular monthly salary and wages, and that the Government shall contribute annually to the fund out of the gross earnings of the railways, an amount at least equal to the total monthly contributions of the employees, the fund to be vested in the Crown and to be augmented by the addition thereto of interest at 3 per cent per annum. Upon his superannuation or retirement under conditions laid down each employee will be entitled to receive for the remainder of his life a monthly allowance of 1½ per cent of the average monthly pay which he received for the eight years immediately preceding his retirement for each year of his service; but no such monthly allowance to any person may be less than \$20 per month or more than two-thirds of his average monthly pay. In the event of the death of an employee whilst in service provision is made for the payment to his widow or other next of kin of a sum equal to ninety per cent of the total amount of the late employee's contributions to the fund. In addition to various stipulations the act provides for the administration of the fund by a board

of five persons, consisting of the general manager of the government railways as chairman, two persons appointed by the Minister of Railways and Canals from amongst the chief officers of the government railways, and two persons elected annually by the employees contributing to the fund.

It was enacted by the Saskatchewan and Alberta Acts of 1905 that upon completion of the quinquennial census of 1906 the parliamentary representation in the House of Commons of these two provinces should forthwith be so readjusted by the Parliament of Canada that there should be assigned to each province such a number of members as would bear the same proportion to the number of its population as the number 65 bears to the population of Quebec, as ascertained at the last decennial census. At the quinquennial census of 1906 the population of Saskatchewan was returned as 257,763 and that of Alberta as 185,412, the population of the province of Quebec having been returned at the decennial census of 1901 as 1,648,898. Accordingly, after dissolution of the present Parliament, instead of ten members for the two provinces together, Saskatchewan will become entitled to ten members and Alberta to seven members. Chapter 41 of the statutes of 1907 provides for the readjustment of the parliamentary representation of Saskatchewan and Alberta in accordance with the above-mentioned enactments. Also it repeals the provision constituting the ten electoral districts of the two provinces as scheduled in the Representation Act, R. S. 1906, ch. 5, and substitutes therefor ten electoral districts in Saskatchewan consisting of Battleford, Humboldt, Mackenzie, Moosejaw, Assiniboia, Prince Albert, Regina, Saltcoats, Saskatoon and Qu'Appelle, and seven electoral districts in Alberta consisting of Calgary, Edmonton, Macleod, Medicine Hat, Red Deer, Strathcona and Victoria. The boundaries of these electoral districts are specifically defined in the act.

By chapter 25 provision is made for the appointment of an other puisné judge of the court of king's bench, Manitoba, thus making three puisné judges of this court, each with a salary of \$6,000 per annum, instead of two as enacted by the Judges Act, R. S. 1906, ch. 138. This act is also amended by providing for the appointment of an additional county court judge for Manitoba, making altogether seven county court judges for the province, each with a salary of \$2,500 per annum and of \$3,000 per annum after three years of service.

In British Columbia provision is made for the appointment of eleven judges and junior judges of county courts, each with a salary of \$3,000 per annum, instead of ten county court judges in the province as heretofore.

Chapter 45 amends the statute law in its application to the provinces of Saskatchewan and Alberta, and enacts also that instead of seven puisné judges of the supreme court of the

Northwest Territories, as provided for by R. S. 1906, ch. 138, there shall be four puisné judges for the supreme court of each province, each with a salary of \$6,000 per annum; also that there shall be eight district court judges for Saskatchewan and five for Alberta, each with a salary of \$2,500 per annum and \$3,000 per annum after three years of service.

Chapter 19 amends the Immigration Act, 1906. By the amending act the words 'committed a crime involving moral turpitude' are expunged from section 33, which provides for the deportation of criminal or indigent immigrants; and in future any immigrant will be liable to deportation who within two years of his landing in Canada has 'become a public charge or an inmate of a penitentiary, jail, prison or hospital or other charitable institution'.

The section is also amended by the addition of provisions for the surrender of immigrant prisoners by governors or wardens of prisons for the purpose of deportation, and for the re-committal to jail of convicts who re-enter Canada after deportation.

A new section deals with the treatment of stowaways found on board vessels entering Canadian ports.

Nearly all the remaining public acts of 1907 are more or less in amendment of existing statutes and effect changes involving no fresh legislative principles. Chapter 4 amends the Adulteration Act in respect of the appointment of public analysts and the sampling and sealing of foods for analysis. Chapter 5 amends the act granting bounties on the manufacture in Canada of binder twine. Chapters 7, 8 and 9 are in amendment of the Criminal Code, chapter 9 dealing with those provisions of the Code that prohibit or regulate the distribution of intoxicating liquors in the vicinity of public works. Chapters 10 and 11 relate to the customs regulations and the new tariff of 1907, described later. Chapter 21 amends the sections in the Inspection and Sale Act which regulate the dimensions of fruit baskets and authorize the seizure and confiscation of binder twine not properly labelled. Chapter 24 specifies the bounties to be paid for the years 1907 to 1912 on iron and steel made in Canada. Chapter 28 amends the Militia Pension Act. Chapter 30 provides for further advances to the Harbour Commissioners of Montreal. Chapter 31 amends the Naturalization Act by providing for the naturalization in Canada of persons who have already been naturalized in any other part of the British Empire. Chapter 36 increases the borrowing powers of the Quebec Harbour Commissioners to an amount not exceeding in the whole \$800,000. Chapter 51 provides that the interests of creditors, claimants or shareholders in proceedings under the Winding-up Act may be classified, and that each class may be represented by a solicitor and counsel acting for all the persons in a class. Chapters 37 to 40 and chapter 52 relate to railways, including amendments of the Railway Act (chapters 37 and 38), the ratification of the

The Colonial Conference, to which reference was made in the Year Book of 1906, commenced in London on April 15 and ended on May 14, 1907, the proceedings occupying altogether fifteen days. The Dominion of Canada was represented at the Conference by the Right Hon. Sir Wilfrid Laurier, G.C.M.G., Prime Minister, the Hon. Sir F. W. Borden, K.C.M.G., Minister of Militia and Defence, and the Hon. L. P. Brodeur, Minister of Marine and Fisheries.

Colonial Conference, London, 1907.

The Earl of Elgin, Imperial Secretary of State for the Colonies, presided over the deliberations, and the Conference opened with an address of welcome from the late Right Hon. Sir Henry Campbell-Bannerman, G.C.B., Prime Minister of the United Kingdom, to which replies were made by the Prime Ministers of the Colonies represented, including Sir Wilfrid Laurier, Canada, the Hon. Alfred Deakin, Australia, the Hon. Sir Joseph G. Ward, K.C.M.G., New Zealand, the Hon. L. S. Jameson, C.B., Cape Colony, the Hon. R. F. Moor, Natal, the Right Hon. Sir R. Bond, K.C.M.G., Newfoundland, and General the Hon. Louis Botha, Transvaal.

Governments represented.

On the opening days the discussions were largely directed towards the best means of placing the Conference on a permanent basis, with due provision for administrative machinery. Whilst the members were unanimous in approval of the policy of attempting to secure this object, there was considerable divergence of opinion as to the means of giving effect to it. The proposal to change the name of the Conference to 'Imperial Council', to which objection was taken in 1906 by the Government of Canada on the ground that the establishment of such a Council might lead to interference with the legislative and administrative autonomy enjoyed by each self-governing colony, came first under discussion, and it was apparent that all the Ministers repudiated quite as strongly as Canada any idea of such interference, and not least so the Ministers of Australia, New Zealand and Cape Colony, who had endorsed the proposed change of title. The term 'Imperial Conference' was adopted unanimously as a result of the discussion.

Permanent constitution of the Conference.

A further proposal by Australia was that a permanent secretariat should be established in London for the purposes of providing a link between Conference and Conference, of organizing the meetings, of dealing with the resolutions passed, and of furnishing the Ministers of the self-governing colonies with a convenient medium for the informal exchange of views on questions not ripe for immediate solution or official correspondence.

Permanent secretariat for the Imperial Conference.

The Secretary of State for the Colonies announced his willingness to reorganize the Colonial Office so that it should in future include a special department for dealing with the affairs of the self-governing colonies and of the Imperial Conference. This settlement of the matter was eventually accepted.

Subsidiary conferences.

An agreement was also arrived at with regard to subsidiary conferences on subjects which cannot be postponed, which require detailed consideration, or which involve consultation between two or more governments.

Constitution of the Imperial Conference.

These various decisions of the Conference were embodied in the form of a general resolution which was adopted unanimously as follows :

That it will be to the advantage of the Empire if a Conference, to be called the Imperial Conference, is held every four years, at which questions of common interest may be discussed and considered as between His Majesty's Government and His Governments of the self-governing Dominions beyond the seas. The Prime Minister of the United Kingdom will be ex-officio President, and the Prime Ministers of the self-governing Dominions ex-officio members of the Conference. The Secretary of State for the Colonies will be an ex-officio member of the Conference and will take the chair in the absence of the President. He will arrange for such Imperial Conferences after communication with the Prime Ministers of the respective Dominions.

Such other Ministers as the respective Governments may appoint will also be members of the Conference—it being understood that, except by special permission of the Conference, each discussion will be conducted by not more than two representatives from each Government, and that each Government will have only one vote.

That it is desirable to establish a system by which the several Governments represented shall be kept informed during the periods between the Conferences in regard to matters which have been or may be subjects for discussion, by means of a permanent secretarial staff, charged, under the direction of the Secretary of State for the Colonies, with the duty of obtaining information for the use of the Conference, of attending to its resolutions, and of conducting correspondence on matters relating to its affairs.

That upon matters of importance requiring consultation between two or more Governments which cannot conveniently be postponed until the next Conference, or involving subjects of a minor character or such as call for detailed consideration, subsidiary conferences should be held between representatives of the Governments concerned specially chosen for the purpose.

Imperial defence.

The naval and military defence of the Empire was another important subject of discussion, and the Right Hon. R. B. Haldane, British Secretary of State for War, gave an exposition of the general principles underlying the present organization for the defence of the Empire. Resolutions were passed in favour of colonial representation on the Committee of Imperial Defence and affirming the need of developing a General Staff which, selected from the forces of the Empire as a whole, should study military science in all its branches, should undertake the preparation of schemes of defence upon a common principle, and should, at the request of the respective governments, advise as to the training, education and war organization of the military forces of the Crown in every part of the Empire.

Preferential trade.

The question of preferential trade occupied a considerable portion of the time of the Conference, and the proceedings were notable for the emphatic declarations made by the members of the Home Government against the granting by the United

Kingdom of any preferential treatment to the products and manufactures of the colonies, on the ground that such a policy would be contrary to the principle of free trade which it was stated had been re-affirmed by the people of the United Kingdom at the General Election of 1906. The resolutions which were passed by the Colonial Conference of 1902 in favour of the adoption by the colonies of the policy of giving substantial preferential treatment to the products and manufactures of the United Kingdom and urging on His Majesty's Government the expediency of granting in the United Kingdom preferential treatment to the products and manufactures of the colonies, either by exemption from or reduction of duties now or hereafter imposed, were re-affirmed by the members of the Conference, with the exception of His Majesty's Government, who placed on record its inability to give its assent, so far as the United Kingdom was concerned, to a re-affirmation of the resolutions in so far as they imply that it is necessary or expedient to alter the fiscal system of the United Kingdom.

A resolution was proposed in favour of the granting by the self-governing colonies of the preferential treatment they accord to the products and manufactures of the United Kingdom to the products and manufactures of other self-governing colonies ; but its terms did not meet with unanimous acceptance. The following resolution, which covers practically the same ground, was adopted :

Reciprocal trade between colonies.

That without prejudice to the resolutions already accepted or the reservation of His Majesty's Government, this Conference, recognizing the importance of promoting greater freedom and fuller development of commercial intercourse within the Empire, believes that these objects may be best secured by leaving to each part of the Empire liberty of action in selecting the most suitable means for attaining them, having regard to its own special conditions and requirements, and that every effort should be made to bring about co-operation in matters of mutual interest.

Sir Wilfred Laurier proposed a resolution in favour of the establishment of a new all-British mail service to Australia and New Zealand via Canada which was supported in general terms by the Ministers of Australia and New Zealand. The following resolution was finally adopted by the Conference :

Proposed new all-British mail service via Canada.

That in the opinion of this Conference the interests of the Empire demand that in so far as practicable its different portions should be connected by the best possible means of mail communication, travel and transportation.

That to this end it is advisable that Great Britain should be connected with Canada, and through Canada with Australia and New Zealand, by the best service available within reasonable cost.

That for the purpose of carrying the above project into effect such financial support as may be necessary should be contributed by Great Britain, Canada, Australia and New Zealand in equitable proportions.

Other resolutions were passed relating to emigration ; judicial appeals ; commercial relations and British shipping ; navigation laws and coastwise trade ; treaty obligations ; uniformity in trade marks, patents, trade statistics and company law ; reciprocity in the admission of land surveyors to practice ; inter-

Resolutions on miscellaneous subjects.

national penny postage; Imperial cable communication; and naturalization.¹

Re-organiza-
tion of the
British Colo-
nial office.

Agreeably with the undertaking which he gave to the Conference, the Secretary of State for the Colonies has effected a re-organization of the Colonial Office, including the constitution of a separate branch for dealing with the business of the self-governing colonies, and he has connected with this branch a permanent secretary who, with the necessary assistance, will be charged with the duties retrospective and prospective imposed or contemplated by the periodical Imperial Conferences. An outline of the new re-organization is given in a despatch from Lord Elgin to Lord Grey, dated September 21, and published in the Canada Gazette of November 16.

Customs
Tariff of 1907.

The Customs Tariff of Canada which, with modifications introduced by subsequent legislation, has been in force since 1897, is by chapter 11 of the Statutes of 1907 replaced by a new tariff generally operative as from November 30, 1906. Although not altering to a very material degree the scale of duties hitherto imposed, the new act effects some important changes.

Classification
of imports.

Consequent upon the expansion of Canadian trade since 1897, a more convenient classification of free and dutiable imports has been adopted whereby the imports in Schedule A of the act are arranged in 11 groups according to their nature instead of in 21 divisions as in the act of 1897. The list of free imports is printed in Schedule A in classified order instead of in a separate schedule as before.

Reciprocal
tariff, 1897-
1898.

By Section 17 of the Customs Tariff, 1897 (60-61 Vict. ch. 16), provision was made for a reciprocal tariff applicable to countries the customs tariffs of which admitted Canadian products on terms which on the whole were as favourable to Canada as the terms of the reciprocal tariff were to them. This reciprocal tariff, printed in Schedule D to the act of 1897, provided for a reduction of $\frac{1}{3}$ on the duties payable under Schedule A (with certain exceptions) from April 23, 1897 to June 30, 1898, and for a reduction of $\frac{1}{4}$ on such duties on and after July 1, 1898.

British
preferential
tariff.

By an act passed on June 13, 1898 (61 Vict. ch. 37), the reciprocal tariff was repealed and in lieu thereof was adopted the principle of a preferential tariff for imports into Canada from the United Kingdom (with certain exceptions), the amount of the preference being then fixed at $\frac{1}{4}$ of the ordinary tariff which preference was raised to $\frac{1}{3}$ of the ordinary tariff by an act of July 7, 1900 (63-64 Vict., ch. 15). The new act of 1907 alters this arrangement by placing a specific or an ad valorem duty under the British preferential tariff opposite to each article upon which duties are levied.

¹ A complete record of the proceedings of the Conference will be found in the English Parliamentary Papers, entitled: (1) Minutes of Proceedings of the Colonial Conference, 1907 [Cd. 3,523] and (2) Papers laid before the Colonial Conference, 1907 [Cd. 3,524]. See also Sessional Paper No. 58 of the Parliament of Canada, Session 1907-8.

The duties payable are arranged therefore in Schedule A in three separate columns, viz.: (1) the British preferential tariff; (2) an intermediate tariff (explained below); (3) the general tariff.

Duties to be levied under three tariffs.

As adopted in 1898 the British preferential tariff applied to the United Kingdom and to certain of the colonies, including Bermuda, the British West Indies, British Guiana and to any other British colony or possession whose tariff was as favourable to Canada as was the preferential tariff to such colony or possession. The act of 1907 continues the benefit of the British preferential tariff to those countries and extends it also to British India, Ceylon, the Straits Settlements, New Zealand, the Cape of Good Hope, Natal, Orange River Colony, Transvaal and Southern Rhodesia. Its future application to any other British colony or possession is provided for by vesting powers in the Governor in Council, who may, subject to the provisions of the act, extend the tariff to any such colony or possession, or withdraw it therefrom, by means of an Order in Council.

Application of British preferential tariff.

An important novel feature of the act of 1907 is the introduction of an intermediate tariff, which in amount is as a rule lower than the general tariff but higher than the British preferential tariff. The intermediate tariff is not applied by the act to any particular country; but provision is made for its extension, either in whole or in part, by Order in Council and in consideration of benefits satisfactory to the Governor in Council, to any British or foreign country the produce or manufactures of which have previously been subject to the general tariff. Power is also given for the withdrawal of the intermediate tariff by the same method of procedure.

Intermediate tariff.

As stated by the Minister of Finance when proposing the Customs resolutions in the House of Commons, the intermediate tariff is intended as an instrument of negotiation which may be used from time to time in treating for an agreement with other countries that may be willing to grant favourable conditions to Canada and afford new and larger markets for Canadian products. Its application is governed to a certain extent by the existence of treaties between the United Kingdom and other Powers containing most favoured nation clauses. These must be taken into consideration in connection with any new fiscal arrangements of which the Canadian intermediate tariff may form part.

An instrument of negotiation.

For the avoidance of inconvenient fractions the duties are stated in multiples of a unit of $2\frac{1}{2}$ per cent. In some cases where the duties have been adjusted in accordance with this unit, the British preferential tariff is either slightly higher or slightly lower; but on the whole the effect is to leave the British preference more rather than less favourable to British exporters than it was before.

Duties adjusted in units of $2\frac{1}{2}$ per cent.

Certain articles which formerly were admitted free if used for a particular purpose, but which lend themselves to evasion of

Drawbacks on proof of com-

pliance with conditions.

duty by being capable of devotion to some other use, are in the new tariff subjected to duty; but it is provided that a refund in the shape of a drawback varying from 50 to 99 per cent shall be paid upon proof that the articles imported have been used for the purpose specified in Schedule B relating to drawbacks for home consumption.

Special duties for dumped goods.

The dumping clause in the Customs Tariff Act of 1904 (4 Edw. VII ch. 11, s. 19), by which extra duties are levied upon articles exported to Canada at a price less than their actual selling price in the home market, is in principle retained, but is in the new act extended to free as well as to dutiable goods. It is further enacted that the special or dumping duty, which previously might not exceed 50 per cent of the ordinary duty, must not in future exceed 15 per cent ad valorem in any case.

Allowance of cash discounts in appraisements for duty.

The Customs Amendment Act, 1907, chapter 10, makes a change in the method of appraisement for duty by sections 3 and 4, which provide that the appraiser or collector in estimating the value of goods for duty may allow a bonâ fide discount for cash not exceeding $2\frac{1}{2}$ per cent when such discount has been allowed and deducted by the exporter on his invoice.

New commercial treaty with France.

On September 19 was signed at Paris a new convention respecting the commercial relations between Canada and France, the signatories thereto on behalf of Canada being Sir Francis Bertie, H. M. Ambassador to France, the Hon. W. S. Fielding, Canadian Minister of Finance, and the Hon. L. P. Brodeur, Canadian Minister of Marine and Fisheries.

Commercial treaty of 1893.

The previous commercial treaty with France, dated February 6, 1893, contained inequalities in the treatment of Canadian products which operated unfairly to the restriction of Canadian trade with France, and, through the most favoured nation clause, to the hampering of Canadian trade with other continental states.

Inequalities against Canada.

Under the old treaty France obtained the benefit of the most favoured nation clause whilst Canada did not, except to a limited extent. Therefore, whereas Canada was under obligation to admit French exports at the minimum tariff levied for such exports by any other country, France was entitled to continue in force the treaty tariff although similar goods from other countries might be entering France at lower rates of duty. To obtain the benefit of the minimum tariff under the treaty it was necessary that Canadian goods should be shipped direct to a port in France; but no reciprocal condition was applicable to French shipments to Canada. Whilst France was at liberty to raise her tariffs at will on goods which under the treaty were given the benefit of her minimum tariff, Canada was bound by the treaty not to raise her tariffs beyond the rates therein specified.

New treaty of 1907.

Recent expansion of our manufacturing industries and of our powers of natural production rendered these inequalities intolerable, and on July 11 Mr. Fielding and Mr. Brodeur arrived in Paris for the purpose of entering into negotiations with the

French Government for the settlement of a new treaty. The negotiations were successfully concluded, and the convention, when finally ratified, should place the commercial relations between the two countries upon a fairly satisfactory basis.

Under the new treaty all Canadian natural and manufactured products receive the benefit of the French minimum tariff for imports into France and her possessions; and the most favoured nation clause operates equally in favour of Canada as of France. Canada extends the benefit of her intermediate tariff of 1907—this being the first occasion for its application—to the French products that are entered in Schedule B, whilst a special tariff is granted for certain French products included in Schedule C and consisting of canned vegetables, sardines, etc., wines, books, medicinal and pharmaceutical preparations and lace and silk fabrics. Some of the special duties in Schedule C are of the same amount as those of the British preferential tariff. In three instances the rates are reduced below it to a substantial extent; but it is proposed that in future these reduced rates shall apply to like imports from all British countries. The products in Schedule C do not compete with British products to any extent; consequently the British preference is not materially affected. The conditions and stipulations of the treaty are reciprocal throughout. The convention, which terminates entirely the agreement of February 6, 1893, comes into force so soon as its provisions have been approved by the Parliament of Canada and the French Chambers and after the exchange of formal ratifications at Paris.¹ It will remain in force for ten years and thereafter, unless terminated after twelve months' notice from either party during or after that period.

The procedure adopted for the negotiation of the treaty illustrates the control which is now exercised over their own affairs by the self-governing dominions of the British Empire. The negotiations with the representatives of the Government of France were conducted, in co-operation with His Majesty's Ambassador in Paris, solely by Canadian Cabinet Ministers who were constituted as plenipotentiaries for the purposes of the treaty by Royal Commission dated August 8. Two other factors in its successful negotiation deserve mention: one the cordial understanding between Great Britain and France, so happily effected by the wise diplomacy of the rulers of both countries, and the other the racial bond which unites France with French Canadians.

During the summer the question of oriental immigration into British Columbia, which has for some time occupied public attention in the province, became acute through the continuous arrival of large numbers of oriental labourers, mostly Japanese, whose advent had an immediate effect upon the conditions of the labour

¹An Act of the Parliament of Canada approving this treaty was passed on April 3, 1908.

market and aroused considerable feeling amongst the white population.

Riots at
Vancouver.

The excitement culminated in riotous disturbances at Vancouver on September 7 and following days in the course of which two Japanese persons were injured and considerable damage was done to Japanese property. An outbreak against Hindu labourers had taken place some days previously at Bellingham in the neighbouring state of Washington, U.S.A., and this is believed to have had some influence in precipitating the regrettable disturbances at Vancouver.

Settlement by
the Govern-
ment of Can-
ada of claims
for damage.

Communications having been exchanged with the Japanese Government, it was agreed that in view of the friendly alliance which subsists between His Majesty the King and His Majesty the Emperor of Japan the question of the compensation payable to Japanese subjects at Vancouver for the losses and damages sustained by them during the outbreak should be settled independently of the British Government and without going through the usual diplomatic channels. Accordingly, on October 14, the Deputy Minister of Labour, Mr. W. L. Mackenzie King, C.M.G., opened an inquiry at Vancouver which resulted in the settlement of the claims of the Japanese residents by payment to them of sums amounting to \$9,036, in addition to \$139 costs.

Methods by
which orient-
als were
induced to
emigrate to
Canada.

Under a new commission the Deputy Minister of Labour opened on November 11 a further inquiry into the methods by which oriental labourers had been induced to emigrate to Canada. This investigation revealed conclusively that the immigration of Japanese labourers in such large numbers had been promoted by enterprising Canadian and Japanese emigration companies who, taking advantage of the customary stipulation in article 1 of the treaty with Japan, by which the subjects of both countries have liberty to enter, travel or reside in any part of each other's dominions, organized an extensive scheme of emigration which was not contemplated by the spirit of the treaty and which was contrary to the assurances given by the Japanese Government before the treaty received the adherence of Canada on January 30, 1907.

Number of
Japanese im-
migrants to
Canada.

The extent of the increase in the immigration of Japanese labourers is shown by the fact, stated in Mr. King's report, that for the ten months ended October 31, 1907, the Japanese immigrant arrivals numbered 8,125, of whom 77 were rejected, 3,619 were admitted into the United States and 4,429 remained in Canada. For the twelve calendar months ended December 31, 1906, the number of Japanese immigrants admitted into Canada was 2,930, and in 1905 it was only 785.

Suggestions
and recom-
mendations.

In his report the commissioner suggested that the scope of duties of the immigration staff on the Pacific coast should be widened. He recommended the prohibition of Japanese immigration from countries beyond the jurisdiction of Japan and the restriction of the number of immigrants arriving direct from that country.

In order that means might be devised for preventing the recurrence of the troubles caused by the immigration into Canada of labourers from Japan, and the consequent disturbance of the present friendly relations between the two countries, the Hon. Rodolphe Lemieux, Postmaster General and Minister of Labour, accompanied by Mr. Joseph Pope, C.M.G., Under-Secretary of State, arrived in Japan on November 29 for the purpose of discussing the situation with His Majesty's Ambassador at Tokio and with the Japanese authorities.

Mr. Lemieux's mission to Japan.

As the result of negotiations an amicable arrangement was arrived at by which Japan, while maintaining her legal rights under the treaty of 1894 as applied to Canada in 1906, agreed to restrict in future the emigration of Japanese subjects to Canada. The terms of the undertaking given by Japan are contained in a letter addressed by Count Hayashi, Japanese Minister of Foreign Affairs, to Mr. Lemieux on December 23, 1907. In this letter the Japanese Minister intimated that it was not the intention of his Government to insist upon the complete enjoyment of the rights and privileges guaranteed by the treaty when that would involve disregard of special conditions which might prevail in Canada from time to time, and that having particular regard to circumstances of recent occurrence in British Columbia the Government of Japan had decided to take efficient means to restrict emigration to Canada.

Result of negotiations.

In pursuance of the policy thus enunciated the Japanese Government adopted a series of stringent regulations, accompanied by instructions to the local governors and Japanese consuls in Canada. Amongst other provisions these regulations prohibit the emigration to Canada of contract labourers, including artisans, unless they come at the request of the Canadian Government. The emigration companies in Japan have been reduced in number, and the operations of those that remain are limited to the promotion of the emigration of Japanese subjects to Manchuria and Korea.

Japanese regulations for restriction of emigration to Canada.

The immigration of oriental labourers into Canada from countries other than Japan has been stopped by an Order in Council, which prohibits the landing of immigrants in Canada unless they come from the country of their birth or citizenship by a continuous journey on through tickets purchased before leaving the country of their birth or citizenship¹. This Order applies both to the Atlantic and the Pacific ports and indiscriminately to all countries. It will therefore operate to the exclusion from Canada of Japanese labourers from Hawaii and of Hindus from Hong Kong and Shanghai.

Prohibition of indirect immigration.

Industrial disputes during the year, including five which began in 1906, numbered 149, as compared with 138 in 1906, 87 in 1905, and 103 in 1904. The number of workpeople directly or indirectly involved was approximately 34,694 in 1907, compared with 26,014 in 1906. Working days lost through trade disputes

Industrial disputes of the year.

¹ The Order in Council was passed on January 8, 1908.

numbered approximately 613,986 in 1907, compared with 490,400 in 1906. Although the number of disputes, the number of work-people involved and the number of working days lost were greater than in 1906, none of the disputes were so serious in their results as were certain of those which occurred during 1906. No rioting or loss of life was reported, and no privations were felt by the general public in any way comparable with those undergone in the provinces of Alberta and Saskatchewan owing to the coal shortage in 1906.

Coal strikes
in 1907.

A stoppage of works in the coal mines of Alberta and Eastern British Columbia from April 15 to May 6 involved 3,450 men and caused embarrassment to transportation and metalliferous mining interests through scarcity of fuel. At Springhill, Nova Scotia, a strike of about 1,250 coal miners continued from August 1 to October 31 causing a shortage of coal throughout the province.

Strike of
plumbers in
Toronto.

In Toronto building operations were impeded for many months by a general strike of plumbers, which began on May 15, involving about 104 firms and 500 employees. No definite settlement of this dispute was arrived at, but by the end of September it was reported that all but six important shops had come to terms with the men.

Industries
affected and
causes of
disputes.

As in 1906, the greatest number of disputes occurred in the building trades, viz., 45, as compared with 29 in 1906. Eighteen disputes occurred in the metal trades, 17 in the clothing trades and 14 in each of the transport and mining industries. April, May and June were the months of greatest industrial disturbance through trade disputes. Of the 144 disputes which began in 1907, 65 were occasioned solely by demands for higher wages, while the question of wages entered into 88 disputes either as a sole or contributory cause. In 11 disputes the only cause was a demand for shorter hours. Eighteen disputes were caused by the employment of non-unionists and seven by the discharge of employees.

Industrial
Disputes
Investigation
Act.

The Industrial Disputes Investigation Act, the main provisions of which were summarized in the Year Book of 1906, was passed on March 22, 1907, coming immediately into operation. It has already had considerable influence in effecting reconciliations in disputes between employers and employees, which might otherwise have occasioned grave public inconvenience through strikes. From the date of its enactment until the end of the year, 31 applications were made for the appointment of Boards of Conciliation and Investigation under the act, some of these being under the special provision which authorizes the appointment of a Board in disputes other than those affecting public utilities. Boards were actually established in 22 cases. Of these the proceedings of four were unfinished at the end of the year. In 16 cases agreements were arrived at, and in the remaining two cases, which related to differences between the same disputants, a strike occurred and lasted for three months, but eventually

ended in a resumption of work on lines recommended by the Board. In three other cases no Board was established, but settlements directly attributable to the influence of the act were reported: so that altogether 19 disputes were adjusted by virtue of its provisions.

The first industrial dispute for which the act was put into complete operation by the appointment of a Board of Conciliation was between the Grand Trunk Railway Company and their machinists, the dispute being of a very complex character and involving questions as to wages, hours, classification of men, apprentices, re-instatement of men on strike or lockout and the general recognition of the union. The Board consisted of the Hon. Wallace Nesbitt, K. C., of Toronto, representing the Company, Mr. J. G. O'Donoghue, of Toronto, representing the machinists and Professor Adam Shortt of Queen's University, Kingston, appointed as chairman by the Minister of Labour. After full discussion a settlement of the dispute, satisfactory to both parties, was effected and made binding for one year, the proceedings of the Board from first to last occupying exactly one month. Professor Shortt, in a letter addressed to the Minister of Labour on May 21, reviewed the procedure of the Board and concluded as follows:—

First dispute settled under the act.

An important and complex labour dispute, involving feuds of more than two years' standing and not improving with age, had been settled to the satisfaction of both parties, without the loss of a day's work to the men or a dollar to the Company, and above all without disturbance to the public service.

Two other railway disputes, both involving questions of wages to telegraph operators, were settled by Boards of Conciliation composed of the same three members. The first of these, a dispute between the Canadian Pacific Railway Company and their telegraphers, proved very difficult to terminate; but eventually by the efforts of the Board an agreement, which included an increase of wages, was arrived at. The other, a dispute between the Grand Trunk Railway Company and their telegraphers, was settled upon rather different lines, for the wages agreed to were lower than those granted in the case of the telegraphers of the Canadian Pacific Railway. The Board considered that the offer of increase made by the officials of the Grand Trunk Railway had gone as far as could be justified, though not necessarily to the limit which the telegraphers ought to receive under other circumstances.

Disputes affecting the wages of railway telegraphers.

In explaining the reasons that differentiate these two decisions, the Board, in their report, made some rather pungent observations upon the relations between capital and labour in the working of railways and other commercial enterprises and the relations of both to the constantly increasing demands of the public for better facilities and decreased charges. While they admit that the labourer should in all cases receive a fair day's wage for a fair day's work, the increase of his remuneration beyond this point must necessarily depend upon the earn-

Economic relations between capital and labour in railway enterprises.

ing capacity of the railway. If, owing to the demands of the public on the one hand and the demands of labour on the other, the profits of the line are diminished below the margin necessary to pay sufficient interest on the capital invested, that capital may be withdrawn for investment in more remunerative undertakings, and, in any case, the power of corporations to borrow for the purposes of further expansion becomes restricted to the disadvantage of all concerned: capitalists who depend upon interest, labourers who depend upon labour, and the general public who depend upon the combined efforts of both. Any discouragement of the investment of capital in railway undertakings would therefore, they state, certainly not be a benefit to the community at large. If the property of lenders is to be practically confiscated between the demand of the public on the one side and the demand of the employees on the other, it must lead to a general reduction in wages or to a shrinkage in the number of employees, with a much greater ultimate loss to labour. The same results would follow if the State should own the railway and provide the capital by taxation of the country's resources. Even in this event, no matter how disguised, the wages, other than the living wage before referred to, must depend upon the earning capacity of the railway after payment of interest on capital.

Dispute between the Bell Telephone Co. and operators at Toronto.

In January, before the Industrial Disputes Investigation Act was passed, a dispute arose at Toronto between the Bell Telephone Company and their female employees upon questions of hours of labour and wages. A strike of about 400 operators commenced, but was terminated after two days by the appointment of a Royal Commission, and on February 18 a settlement was effected. On September 12 the Commissioners issued a detailed report, dated August 27, in which they made a series of recommendations affecting the conditions of employment applicable to telephone operators and proposed the establishment of a permanent Board of Conciliation. They also recommended that a commission of medical experts should examine into the effect of the occupation of telephone-operating upon the constitution of those engaged therein. Parliamentary legislation may be necessary to give full effect to these recommendations.

Increase of financial subsidies to the Provincial Governments.

For some years public attention has been directed to the question of revising the arrangement by which under section 118 of the British North America Act, 1867, 30 and 31 Vict., ch. 3, of the Imperial Parliament, subsidies of fixed proportions have been paid by the Dominion of Canada to the provinces for the support of their local Governments and Legislatures. In December, 1902, a conference of provincial representatives held at Quebec passed resolutions in favour of the payment of increased subsidies which were shortly afterwards ratified by the Legislatures of the provinces represented, British Columbia excepted, and referred to the Government of the Dominion.

No action in the direction of increasing the subsidies was however taken at that time; but on September 10, 1906, the Prime Minister of Canada, Sir Wilfrid Laurier, at the request of the Provincial Governments, convened an interprovincial conference at Ottawa, which was accordingly held there from October 8 to 13, 1906, all the nine provinces of the Dominion being represented by their respective Ministers. On October 10 this conference resolved that the subject matter of the resolutions adopted by the Quebec conference of 1902 be pressed upon the Government of the Dominion for immediate and favourable action.

On the same date the Hon. Richard McBride, premier of British Columbia, presented a memorandum as to the claims of that province for special consideration in connection with the subsidies payable, which included a request by his Government for the appointment of a commission to inquire into the financial relations between the Dominion and the province.

On October 12 Sir Wilfrid Laurier announced that the Government of Canada could not at that stage accede to the request of the Government of British Columbia for the appointment of a commission; but he suggested that the question should be discussed by the members of the interprovincial conference and that if possible an agreement should be arrived at by them before anything further was done with regard to it by the Government of Canada. This suggestion was acted upon, when the proposal made by the Prime Minister of British Columbia for the appointment of a commission failed to receive support from the representatives of the other provinces, and a resolution was passed that in the opinion of the conference it was inadvisable that the claim in the way of subsidies of any province be referred to arbitration.

Next day, October 13, the interprovincial conference agreed upon a basis for a final and unalterable settlement of the amounts to be yearly paid by the Dominion to the several provinces, and they passed a resolution to the effect that in view of the large area, geographical position and very exceptional physical features of the province of British Columbia it was their opinion that the province should receive an additional allowance of \$100,000 annually for ten years.¹

These proposals were accepted by the Government of Canada, and on April 26, 1907, were embodied in an Address from the Parliament of Canada to H. M. the King. On August 9 the Imperial Parliament passed the British North America Act, 1907 (7 Edw. VII, ch. 11), which took effect as from July 1, 1907, and gave legal sanction to the changes asked for by Canada. The new annual subsidies, which replace those

¹ The Hon. Richard McBride, premier of British Columbia, declined to assent to the terms of this resolution.

granted under section 118 of the British North America Act, 1867, are as follows :¹

(a) A fixed grant according to population :

Where population is—	\$
Under 150,000.....	100,000
150,000, but does not exceed 200,000.....	150,000
200,000 " " 400,000.....	180,000
400,000 " " 800,000.....	190,000
800,000 " " 1,500,000 ..	220,000
over 1,500,000.....	240,000

(b) A grant at the rate of 80 cents per head of the population of the province up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number.

(c) An additional grant of \$100,000 yearly to the province of British Columbia for a period of ten years.

Method of
ascertaining
population.

The act provides also that in the case of the three Northwest provinces the population shall be as ascertained by the last quinquennial census or statutory estimate of population as provided by acts of the Parliament of Canada, and in the case of any other province as by the last decennial census. Further it enacts that in the case of the provinces of British Columbia and Prince Edward Island the amount payable shall not at any time be less than the amount of the corresponding grant payable at the commencement of the act, any decrease of population notwithstanding.

Visit of
Prince
Fushimi of
Japan.

On June 7 Prince Fushimi of Japan landed at Quebec on the occasion of his homeward journey through Canada after completing an official mission to the United Kingdom. His Imperial Highness visited several of the cities of the Dominion, including the federal capital, Ottawa, and as the representative of a friendly and allied nation he received a cordial welcome from the Government and people of Canada.

Earthquake
at Kingston,
Jamaica.

On January 14 the British Island of Jamaica was visited by a severe earthquake and fire which caused great loss of life, besides injuries to many persons and a considerable destruction of property. A sum of \$50,000 was appropriated by the Parliament of Canada in aid of the sufferers from this disaster. Amongst the unfortunate victims who lost their lives was the Right Hon. James Fergusson, formerly Postmaster General of Great Britain.

Collapse of
the Quebec
Bridge.

On August 29 the steel superstructure of the southern cantilever and anchor arms of the bridge in course of erection across the St. Lawrence River, about eight miles above the city of Quebec, collapsed suddenly and fell into the river, involving a lamentable loss of over sixty lives and the serious injury of eleven other persons, nearly all being workmen employed on the bridge. The loss of material was at first estimated to be about

¹ The British North America Act of 1907 does not affect the obligation of the Government of Canada to pay to any province any grant which is payable to that province, other than the existing grant for which the grant under this act is substituted.

\$1,500,000 ; but later calculations indicate a reduction in this amount. In any event however the magnitude of the loss both in human lives and property, as well as the importance of the undertaking to the industrial development of the country, have given to the disaster the aspect of a national calamity. It was expected that the bridge would be open to traffic in about two years' time, but it is now estimated that in consequence of this event four years will be required to complete the work, which will be proceeded with.

The bridge has been in process of construction since 1900, in October of which year the corner stone of the masonry substructure was laid. The need of a bridge to cross the St. Lawrence in the vicinity of Quebec has been felt for many years past, and in 1897 a company was re-organized under the name of 'The Quebec Bridge Company' to undertake the work, substantial aid to the enterprise being granted by the Dominion and provincial Governments. The masonry having been completed at a cost of about \$1,400,000, work on the steel superstructure was begun in 1904. The total cost of the bridge when finished has been estimated at between \$7,500,000 and \$8,000,000. Up to March 31, 1907, the total expenditures amounted to \$4,415,598.

When completed the bridge will be in many respects the most remarkable structure of its kind ever erected. The cantilever span will be the longest in the world, viz., 1,800 feet, while the total length of the bridge will be 3,300 feet. The main span will be at a height of 150 feet above the water, while the tops of the cantilever will be over 400 feet high. The bridge is designed to carry two lines of railway, two trolley lines, two highways and two sidewalks for foot passengers¹.

On August 30 a Royal Commission of engineering experts (see page lv) was appointed to inquire into the causes of the disaster. The commissioners commenced taking evidence at Quebec on September 9, and they held subsequent sittings at Ottawa, New York, Phoenixville and Philadelphia. In their report, issued on March 9, 1908, they discussed exhaustively the circumstances connected with the designing and construction of the bridge, and their conclusions are expressed in a series of fifteen findings. The essence of these findings is that the collapse was due to errors of design on the part of the two chief engineers engaged in the building of the bridge, errors however which cannot be attributed to lack of common professional knowledge, neglect of duty or a desire to economize. They state that the ability of the two engineers was tried in one of the most difficult professional problems of the day and proved to be insufficient for the task. The commissioners also find that the work of construction was carried on with inefficient engineering supervision at the bridge itself, and that the loss of life on August 29 might have been prevented by the exercise of better judgment on the

Quebec Bridge Company.

Description of the bridge as completed.

Report of Royal Commission.

Cause of the collapse.

part of those in responsible charge of the work for the Quebec Bridge Company and for the Phoenix Bridge Company.

Proposed
National
Memorial at
Quebec.

In 1908 will be celebrated at Quebec the 300th anniversary of the first exploration of Canada under Samuel de Champlain. Looking forward to this event His Excellency the Governor General started in December a movement towards raising a fund for the conversion of the Plains of Abraham and the St. Foye battlefields into a National Park. Not only will the original exploration of Canada 300 years ago be thus commemorated, but also the heroism and military valour 150 years afterwards of the British and French forces under their respective leaders, equal in renown and fate, Wolfe and Montcalm. Lord Grey's scheme proposes the removal of the jail and other buildings from the battlefields, the acquisition of certain lands, the erection of a museum, and the construction of a driveway round the heights. It has received the approval of the King, and His Majesty has subscribed \$525 to the fund. H. R. H. the Prince of Wales, H. R. H. the Princess Louise, former Governors General of Canada and many others in Great Britain have also promised subscriptions. In Canada itself the project has been taken up with much enthusiasm.

Progress of
railway con-
struction.

Progress in railway construction is represented by 1,099 miles of new track which came into operation during the twelve months ended June 30, 1907, thus raising to 22,452 the mileage of Canadian railways in operation on that date. The miles of double track were increased in the same period from 743 to 1,067, a net gain of 324 miles. The number of miles under construction during the year mentioned is estimated at 3,000, exclusive of lines projected but not under contract.

Divided by provinces the steam railway mileage of Canada Railway miles is as follows :

Province	Miles in operation
Ontario.....	7,638
Quebec	3,516
Manitoba.....	3,074
Saskatchewan.....	2,025
British Columbia.....	1,685
New Brunswick.....	1,503
Nova Scotia	1,329
Alberta.....	1,323
Prince Edward Island.....	268
Yukon.....	91
Total.....	22,452

Canadian railways have been and are being built largely by the aid of cash subsidies from the Dominion Government and from provincial and municipal governments. Large grants of land have also been made to them by the Dominion Government and by provincial governments. In the year ended June 30, 1907, the total amount of cash subsidies received by the railways from the three sources named was \$181,297,413, divided as follows :

	\$
Dominion	128,827,649
Provinces	35,123,131
Municipalities.....	17,346,633
Total.....	181,297,413

To June 30, 1907, the land grants earned by the railways from the Dominion Government represented a total of 31,762,954 acres, of which the Canadian Pacific Railway received 19,816,010 acres. The next largest grantee is the Canadian Northern Railway Company with 3,321,408 acres. The remaining acreage of 8,625,536 is apportioned amongst eight other railways. In addition to these Dominion land grants, generous grants of land in aid of railway construction have been made by certain of the provincial governments to the total of 20,420,109 acres as follows :

Province	Acres
Quebec.....	13,324,950 ¹
British Columbia.....	5,287,387
New Brunswick.....	1,647,772
Nova Scotia.....	160,000
Total	20,420,109

Altogether therefore the area of the land subsidies granted to the railway companies by the Dominion and provincial governments is 52,183,063 acres.

On the main and branch lines of the Canadian Pacific Railway the total mileage in operation at the close of the calendar year was 9,794, including double tracking, an increase of 467 over the preceding year when the mileage was 9,327. During 1907 new branches were opened for traffic with a total mileage of 454, including double tracking of 141 miles. The mileage of new track laid in 1907 was 485, including 144 miles of double tracking. On the Grand Trunk railway system the total mileage for the year ended December 31, 1907, was 4,645, of which 3,573·16

¹ Converted into cash on the basis of 52½ cents per acre.

miles are in Canada and 1,071·84 miles are in the United States. The double track mileage of the system has been increased from 1,002·75 miles on January 1, 1907, to 1,034·28 miles on December 31, 1907. Construction on the new transcontinental line from Moncton, N.B., to Prince Rupert, B.C., on the Pacific Coast, is being proceeded with vigorously. The total length of that portion of the line, viz., from Moncton to Winnipeg, which is being built by the Dominion Government, is approximately 1,807·41 miles. Contracts for construction awarded by the Commissioners of the Transcontinental Railway during 1907 covered a total mileage of 464, and the total number of miles under contract from the Commissioners on December 31, 1907, was 859. The length of the western portion of the line, viz., from Winnipeg to Prince Rupert, which is projected by the Grand Trunk Pacific Railway Company, will be approximately 1,740 miles, in addition to the Lake Superior branch of 200 miles in length, extending from Fort William on Lake Superior to Lake Superior Junction on the main line of the eastern section (or Transcontinental Railway). Of this total of 1,940 miles 1,000 miles are at present under actual construction, including the entire Lake Superior branch and the main line between Winnipeg and Edmonton. About 880 miles of grading have been completed and 470 miles of rail have been laid, of which 200 miles are ballasted. During the year 1907 over 22,000 men and 6,000 animals were employed in connection with construction work, and the expenditure on labour and material was about \$12,000,000.

Trans-Atlantic wire-
less telegraph-
phy.

The transmission of messages across the Atlantic by wireless telegraphy, as demonstrated practically by Signor Marconi, constitutes a noteworthy scientific achievement of the year. On October 17 trans-Atlantic communication between Canada and the United Kingdom by the Marconi system was put into commercial operation for the transmission of press messages for newspapers on both sides of the Atlantic, and the service has since been extended¹ to the transmission of ordinary public messages between Montreal and Great Britain and between London and Canada. It is expected that arrangements will shortly be made for the collection of messages in other towns as well. The rate for press and government messages between points in Eastern Canada and Great Britain is 7½ cents per word, and the rate for ordinary public messages between the same points is 15 cents per word. Communications of mutual congratulation on the establishment of this fresh link between Canada and the Motherland were exchanged on the occasion of the opening of the service between His Excellency the Governor General and His Majesty the King.

Reduction of
postage on
British news-
papers and
periodicals.

On May 1st a convention between the Post Offices of the United Kingdom and Canada came into operation under which the postage rates on British newspapers, magazines, and trade

¹ From February 1, 1908.

journals posted in the United Kingdom for any place in Canada and forwarded by direct Canadian mail steamers was reduced from $\frac{1}{2}$ d. per 2 oz. to a special 'Canadian magazine rate' of 1d. per lb., or fraction of a lb. Certain conditions apply to the postage of such packets, which must not weigh over 5 lb. nor exceed 2 feet in length nor 1 foot in width or depth. A newspaper or periodical not exceeding 2 oz. in weight may still be posted for $\frac{1}{2}$ d.

This change has naturally had a marked effect in increasing the number of British periodicals posted to Canada. For the six months ended October 31, 1907, the number of newspaper sacks received in Canada from the United Kingdom was 36,493, as compared with 23,604 for the corresponding period of 1906, the increase being in large measure due to the reduction in rate under the Canadian magazine post arrangement.

On May 8 a new postal arrangement between Canada and the United States came into force involving the withdrawal from newsdealers of the privilege of posting newspapers and periodicals published in the United States at the rate of 1 cent per lb. Such newspapers and periodicals became therefore liable to postage at the rate of 1 cent per $\frac{1}{4}$ oz., or fraction of 4 oz., to each separate address.¹

In the Speech from the Throne at the opening of Parliament on November 28, His Excellency the Governor General referred to the remarkable expansion of the trade of Canada with other countries, and to the fact that the total trade of the past year far exceeded that of any of its predecessors. His Excellency continued: 'A gratifying result of this expansion was that the revenue of the last fiscal period of nine months was more than sufficient to meet expenses on Consolidated Fund, National Transcontinental Railway, Capital and Special outlays, all expenses of the Dominion of every kind, and leaves a balance of over three million dollars to be applied in reduction of the Public Debt'. The total foreign trade of Canada for the calendar year 1907 amounted to \$632,282,309, exclusive of coin and bullion, as compared with \$568,918,116 in 1906, an increase of \$63,364,193. It should however be noted that in 1907 the imports, \$378,245,555, were largely in excess of the exports, \$254,036,754. This is doubtless due to activity in the development of Canada's material resources, necessitating purchases greatly beyond immediate requirements.

Trade with the United Kingdom during the calendar year 1907 reached a total of \$224,381,186, as compared with \$212,974,228 in 1906. Whilst imports of \$98,033,265 in 1907 exceeded those of the previous year, \$77,907,988, there was some falling off in the total of the exports to Great Britain, the figures being \$126,347,921 in 1907 as against \$135,066,240 in 1906.

¹ By an agreement of February 7, 1908, this arrangement was modified to the extent of allowing an interchange between the two countries of daily newspapers only at the postage rate of 1 cent per lb.

Conditions and prospects of British trade in Canada.

In 1906 the advisory committee on commercial intelligence of the English Board of Trade instructed their special commissioner, Mr. Richard Grigg, to investigate and report upon the conditions and prospects of British trade in Canada. Mr. Grigg arrived in this country in September 1906 and completed his mission in May 1907. His report¹ is exhaustive in character and is worthy of study by all on both sides of the Atlantic who are interested in the trading and commercial relations between Canada and the Mother Country.

By the adoption of British preference and by the efforts made towards securing quicker means of communication, Canada has consistently sought the development and expansion of inter-Imperial trade. Independently of natural bonds of affinity, Great Britain constitutes the best market for the products of Canada, and it is of obvious economic advantage that the vessels carrying those products should not return empty.

Opportunities for British enterprise and capital in Canada.

Mr. Grigg's mission and report is a gratifying evidence that authorities in Great Britain are rising to a sense of the magnificent opportunities which exist in Canada for British capital and manufacturing enterprise. In his letter of transmission to the President of the Board of Trade, Mr. Grigg observes :

Desire in Canada to buy British goods.

Among all classes in Canada there undoubtedly exists a strong desire to buy goods from British sources whenever possible, and this desire is reflected in the tariff preference on British goods, amounting approximately to a reduction of 33½ per cent on the tariff enforced upon competing foreign goods. The fact that His Majesty's Board of Trade had instituted an inquiry, and had decided to appoint correspondents to furnish regular information to its Commercial Intelligence Branch, was received with marked approval, as indicating a desire on the part of the Home Government to promote closer commercial relations with Canada . . . The feeling in Canada may fairly be described as one of surprise, and even impatience, that, notwithstanding the advantage of preference in tariff and preference in goodwill, British goods are not sold in larger quantities to Canada than import figures show. The belief prevails that British manufacturers and merchants are what has over and over again been described to me in the words 'too conservative', a phrase which I fear was meant to convey reproach in words which should not seem discourteous to British ears.

Summary of Mr. Grigg's conclusions.

The following is a brief summary made by Mr. Grigg of the conclusions arrived at as the result of his investigation :

(1) The geographical position of Canada, and its contiguity to the United States, give American trade very great advantages, and impose correspondingly severe handicaps upon British trade.

(2) The preference enjoyed by the United Kingdom, both in goodwill and in tariff treatment, is helpful in neutralising to some extent the geographical advantages which the United States enjoy, but is insufficient by itself to do more than check the decline in the United Kingdom's share of Canadian trade. The preference gives substantial aid to the United Kingdom in competition with European countries, but may be diminished at any time through the adoption of the newly established Intermediate Tariff.

(3) Both British and American trade in Canada have to encounter the growing rivalry of Canadian industries, which however offer great opportunities (hitherto comparatively little used) for the investment of British capital.

¹ Report upon the Conditions and Prospects of British Trade in Canada. British Parliamentary Paper [Cd. 3,868].

- (4) Much could be done to promote British trade with the Dominion by—
- (a) The promotion of rapid and cheap transit and communication between the United Kingdom and Canada ;
- (b) more careful study of Canadian conditions by British traders ;
- (c) improvements in the representation of British merchants and manufacturers in Canada ;
- (d) greater adaptability and exactness in meeting the wishes of Canadian buyers ;
- (e) the adoption of Canadian standards, weights and measures and currency, for specifications and price quotations ;
- (f) better advertising and catalogues and cheaper postage rates ;
- (g) more elasticity in terms of credit (rendered possible by fuller knowledge of local circumstances).
- (5) It is highly desirable to promote mutual knowledge of commercial and industrial conditions by a system of British commercial correspondents in Canada, and the wider distribution of commercial and trade reports, both official and other.

Suggestions
for promotion
of British
trade with
Canada.

In monetary circles the year 1907 will be long remembered as a period of grave embarrassment and anxiety caused by extraordinary financial stringency prevalent throughout the world. The crisis was most acute in the United States, where the conditions on the stock exchanges of New York and Chicago were for a time those of extreme panic, resulting in wholesale depression of the values of securities, in the withdrawal from the banks of the savings of the public, and in a general want of confidence and reluctance to invest.

Financial
stringency.

The situation was greatly relieved by the action of the United States Government, which arranged for large shipments of gold from Europe, and, in conjunction with leading financiers, placed funds temporarily at the disposal of the banks.

Action of the
U. S. Govern-
ment.

Such conditions had naturally a reflex action upon the financial position in Canada ; but whilst values were greatly depressed the shrinkage was at no time accompanied by panic, and the Canadian banking system proved once more the stability of the principles upon which it is conducted. A concrete instance of this is to be found in the re-organization during the year of the Sovereign Bank of Canada and the subsequent absorption of its business by other banks without loss to depositors or creditors. An issue of \$24,336,000 of new Canadian Pacific Railway Stock during 1908 was announced.

Financial
position in
Canada.

The growth in banking business during the year was much smaller than in 1906, which however was a year of extraordinary progress. At the end of the calendar year 1907 the paid-up capital of the chartered banks was \$95,953,732, as compared with \$91,035,604 in 1906, an increase of \$4,918,128, being considerably less than the corresponding increase of 1906 over 1905, \$8,379,776. Bank discounts, which in 1907 amounted to \$709,975,274, showed an increase in 1907 over 1906 of \$54,105,395, as compared with \$96,054,961, the increase of 1906 over 1905. Deposits increased from \$605,968,513 in 1906 to \$654,839,711 in 1907, an increase of \$48,871,198, as compared with \$74,725,037, the increase of 1906 over 1905.

Chartered
banks.

Department of Secretary of State. The number of charters of incorporation issued during the calendar year 1907, including supplementary charters, was 378, as compared with 374 in 1906 and 293 in 1905. The total capitalization of the new companies in 1907 was \$132,686,300, and the capital of existing companies was increased during the year by \$19,091,900, making the total of the capital authorized in 1907 to amount to \$151,778,200, as compared with \$212,576,075 in 1906 and \$109,595,000 in 1905. The revenue of the Department, derived mainly from fees upon charters, was \$101,937 for the calendar year 1907, as compared with \$108,913 for 1906 and \$76,513 for 1905.

Naturalizations. The naturalizations effected under the Naturalization Act, 1902, for the twelve months ended June 30, 1907, numbered 11,822. Of these, 4,765 were formerly citizens of the United States.

Immigration returns. It is apparent from the immigration returns that new settlers are still pouring into Canada in annually increasing numbers. For several years each year has in this respect exceeded the record. In the calendar year 1907 the total number of immigrant arrivals in Canada was 277,376, as compared with 215,912 in 1906, an increase of 61,464. Of the total arrivals in 1907, 132,060 were from the United Kingdom, 56,690 from the United States and 88,626 from other countries.

Immigration propagandist work. In the report of the Deputy Minister of the Department of the Interior, dated July 15, 1907, this satisfactory annual increase in the number of immigrants is attributed directly to the policy, first applied to the United States in 1897, of thoroughly advertising the resources of the Dominion in agricultural districts by newspapers and by the personal visits of Canadian delegates. In 1896 there was no immigration into the western provinces from the United States; but in the fiscal year 1897-8 there were over 9,000 immigrants from that country, and the number of new arrivals has increased annually ever since. Similar methods were applied to England in 1901 and were followed by similar results. Previously the number of immigrants from the United Kingdom had been for some years about 11,000 annually. In 1901-2 the number of British arrivals had increased to over 17,000, and succeeding years showed a progressive increase until reaching the present figure of 132,060 in 1907.

Immigrant arrivals, 1904-1907. The following statement shows the number of immigrant arrivals for each of the four calendar years 1904 to 1907 from the United Kingdom, the United States and other countries, with the respective proportions per cent of the total :

Year	Number of immigrant arrivals from			Total
	United Kingdom	United States	Other countries	
1904.....	55,913	43,444	35,392	134,749
p.c.....	41	32	27	
1905.....	64,863	41,427	35,331	144,621
p.c.....	45	31	24	
1906.....	97,747	63,782	54,373	215,912
p.c.....	45	30	25	
1907.....	132,060	56,690	88,626	277,376
p.c.....	48	20	32	

Side by side with the progressive increase in the number of immigrants from each of the three sources indicated, an increasing proportion has arrived from the United Kingdom, until in 1907 they constituted all but half of the total. For the three years 1904-6, the United States arrivals maintained approximately the same proportion of about 32 down to 30 per cent, but in 1907 it dropped to 20 per cent. On the other hand the proportion from other countries, which was from 27 to 25 per cent in those years, rose to 32 per cent in 1907.

The number of homestead entries for the calendar year 1907 was 29,414, as compared with 42,012 in 1906. This decrease of 12,598 is due probably to various contributory causes, amongst which however cannot be reckoned any falling off in the settlement upon land. With the exception of 197 in British Columbia, all the entries were made in the three provinces of Manitoba, Saskatchewan and Alberta.

For the greater part of the year 1907 the mining industry was characterized by marked activity, but towards its close a reaction set in, which, however, came too late to have serious effects upon the statistics of total production. The total value of the mineral products during the year is estimated at \$86,183,477, a net increase of nine per cent as compared with \$79,057,308, the value in 1906, and representing the largest mineral production during one year to which the Canadian mining industry has yet attained.

The following statement shows the quantity and value of some of the principal minerals produced during the year, together with the increase or decrease per cent in quantity and value as compared with 1906 :

Quantity and value of principal minerals, 1907.

PRODUCTION OF PRINCIPAL MINERALS, 1907.

	barrels			
Petroleum..	788,872	1,057,088	38·48	38·77

Placed in their relative order of value of production, coal comes first with a value equal to 28·50 per cent of the entire production of minerals. The percentage of total value of the other minerals named in the table is copper 13·32, nickel 11·06, silver 9·66, gold 9·59, lead 2·94, pig iron from Canadian ore 2·30, and petroleum 1·22. In the case of silver, nickel and copper, the quantities represent the actual weights of the metals contained in the matte, and the values are those of the metals as refined; but, as a matter of fact, no nickel is refined in Canada.

Four years ago gold was relatively the most valuable mineral product in Canada, but in 1907 it had fallen to fifth place. A continual shrinkage has taken place in the output of the Yukon from \$22,275,000 in 1900 to about \$3,150,000 in 1907. The effect of this shrinkage was to some extent lessened by the continued increase for British Columbia, but in 1907 this province also shows a falling off both in placer and lode output, the decrease being over 13 per cent. Less than half as much gold was obtained from the Yukon in 1907 as in 1906. About 12,750,044 oz. of silver were contained in ore shipments in 1907, as compared with 8,473,379 oz. in 1906, an increase of over 50 per cent. Over 99 per cent of the production in 1907 was derived from the provinces of Ontario and British Columbia and about 77 per cent from the Cobalt district of Ontario alone. The rapid development of the Cobalt district has brought the province of Ontario to the front as a silver producer. Returns from 24 shipping

¹ From Canadian ore.

Relative order
in respect of
value of pro-
duction.

mines show the ore shipped from that district as approximately 14,557 tons, containing 9,914,056 oz. of silver. At the average price of refined silver for the year, this would be worth \$6,476,555, and it represents an average return of 681 oz. of silver, or \$444.87, per ton of ore shipped.

The foregoing particulars are abstracted from the preliminary report on the mineral production of Canada in 1907 issued by the Mines Branch of the Department of Mines, Ottawa. The following statement having special reference to the Cobalt mines has been furnished by Mr. Thomas W. Gibson, Deputy Minister of Mines for the Province of Ontario :

The Cobalt
Mining Camp,
Ontario.

The silver mines of the Cobalt camp, in which the first discoveries were made in 1903, gave the Province of Ontario in 1907 a high place among the silver-producing communities of the world. From twenty-eight operating mines 14,810 tons of ore were shipped containing 10,005,000 ounces of silver, the average contents per ton of ore shipped being 677 ounces. So far the shipments have been largely confined to the richer ores, some of which average as high as 5,000 or 6,000 ounces per ton in car-lots, but the low-grade ores of the camp, assaying 150 ounces or less per ton, are beginning to accumulate in large quantity, and will usefully employ the concentrating plants already at work or being constructed. The principal mines are: Nipissing, O'Brien, Con'agas, La Rose, Kerr Lake, Buffalo, McKinley-Darragh-Savage, Trethewey, Temiskamingue, Right-of-Way, Drummond, Cobalt Silver Queen, Temiskaming and Hudson Bay, Foster and Nova Scotia. Besides silver, the Cobalt ores contain cobalt, nickel and arsenic. For the most part the ore is purchased by smelting establishments in the United States, but there are two refineries now in operation in Ontario, one at Copper Cliff, owned by the Orford Copper Company, and the other at Deloro operated by the Deloro Mining and Reduction Company. A few lots of silver-free cobalt ore have been shipped to cobalt oxide manufacturers in Wales. Recently, ores similar to those of Cobalt have been found on the Montreal River about 40 miles northwest of Cobalt, and on the shores of Lake Temiskaming about 20 miles southeast of Cobalt. Up to December 31, 1907, the dividends paid by Cobalt mining companies amounted to \$3,847,344.19, exclusive of the profits of several close corporations, which would bring the total to about five millions of dollars. The number of producing mines is increasing. Ontario is now producing about one-eighteenth of the total silver production of the world.

The Ottawa Branch of the Royal Mint was established in pursuance of The Ottawa Mint Act, 1901 (1 Edw. VII, c. 4), under which an annual sum not exceeding \$75,000 is payable to the Imperial Treasury for the purpose of defraying the salaries of officials and other expenses of the Mint, the fees and all sums received being retained by Canada. Organized upon the same lines as the Branch Mints which have for many years existed in the Australian Colonies, the new Branch Mint in Canada supplies a long felt need and is expected to have beneficial effects upon the trading interests of the country. It has been somewhat of an anomaly that Canada as an important metal-producing country should be dependent upon other countries for the refining of its precious metals and for the coinage required in metallic currency. The Mint will issue gold, silver and copper coins for circulation in Canada, and sovereigns and half-sovereigns coined will be legal tender in every country under the British flag. Considerable profits are made in the coinage of silver, of which a great deal is required in Canada, and these

Ottawa
Branch of the
Royal Mint.

profits will in future accrue to the Canadian Treasury, whilst the coinage of silver can be effected as required without the delay necessarily arising from dependence upon a distant Mint. With its own facilities the Dominion will now be in a position to maintain the statutory banking reserves in Canadian instead of British or foreign gold, and it may also be possible to replace the large amount of United States silver coinage circulating in Canada by silver coins of Canadian mintage.

Opening of the Mint for coinage.

The building of the Mint, and its equipment and official organization were completed by the end of the year; and the opening of the Mint for coinage took place on January 2, 1908. James Bonar, LL.D., Deputy Master of the Mint, and his official staff, appointed by the British authorities under the Dominion Act of 1901, entered upon their duties during the year 1907.

Plant used in coinage processes.

Included in the installation at the Mint are, (1) an electrical plant for power and light; (2) the plant for oil-fuel used in melting, annealing, etc.; (3) a die-making plant; (4) boiler house, tool-making and repairing shops; and (5) the assay department for the analysis of precious metals and for experimental research

Minting processes.

work. Of the numerous minting processes those connected with the actual coining are probably of greatest general interest. They consist of melting, rolling, adjusting, cutting, marking, annealing, blanching and cleaning, coining and testing. In melting silver the ingots of a purity of 999 or over per 1,000 parts are placed in crucibles with the necessary alloy and are melted by oil-fuel flames. Special devices prevent the loss of precious metal in the form of gas, and their importance may be estimated from the fact that in the United States Mint the value of metal recovered from the condensing chambers attached to thirteen furnaces after six months' working was not less than \$12,000. The molten metal is poured into cast iron moulds, about 2 feet long, $\frac{1}{2}$ inch thick, and varying in width from $1\frac{1}{4}$ to $2\frac{1}{4}$ inches, according to the coins required.

Rolling and annealing.

Rolling and annealing are the next processes. After cooling and rejection of those that are above or below the legal standard of fineness, the bars are first passed ten or twelve times through the breaking down mill, in which the weight of the top roll with its brasses and adjusting gear is about two tons. Next they are annealed in the fillet annealing furnace and then passed eight or ten times through the thinning mill and five or six times through the finishing mill, when they should be of correct thickness for coining.

Adjustment of gold bars.

For silver and bronze coins the rolling is sufficiently accurate; and the bars pass at once to the cutting machines, but for gold further adjustment is necessary. Gold is a very dense metal, having a specific gravity of about 19 as against 10 for silver and about nine for bronze. The legal variation from a standard weight is also in the case of gold very slight. The standard weight of a British sovereign is 123.274 grains, but the remedy

allowance is only 0.2 grain. If the coin exceed the limit by even so little as the one-hundredth part¹ of a grain it must be remelted. The gold fillets are therefore drawn between steel cylinders which regulate the small inequalities in their thickness and reduce to a minimum any variations from standard. The cylinders, $4\frac{1}{2}$ inches long and $\frac{3}{4}$ inch in diameter, are highly polished and extremely hard, and the distance between them can be adjusted to the ten-thousandth part of an inch.

The cutting machines to which the fillets are next sent cut out blanks for all sizes of coin and work at the rate of 300 blanks per minute. A marking machine, working at 600 blanks per minute, raises the edges, thus protecting the impressions made later and preventing the coin from wearing away rapidly. Cutting and marking.

After further annealing, blanching and cleaning, the blanks are ready for the coining presses. Of these there are three, each capable of delivering 100 coins per minute. The blanks are placed in the feeding tubes by the operator in piles of about 30 and are passed to the dies automatically by steel feeding fingers. An ingenious device prevents "clashing" of the dies, that is, their coming together when accidentally no blank is between them. Clashing renders the dies useless and so causes expense in renewal. Each pair of dies is capable of striking about 80,000 coins before being unfit for further use. Coining.

Testing of the finished coins is now necessary. In the case of gold coins and of 50 and 25 cent pieces, each is weighed separately upon automatic weighing machines, which are so delicately adjusted for accurate weighing that the beam when fully loaded will turn with the one-hundredth part of a grain. Each machine weighs 20 coins per minute. The coins are 'fed' into a hopper by the attendant. One coin is then pushed automatically on to a flat pan attached to one end of the beam, where it remains for three seconds, after which it is pushed off by the succeeding coin. During the time it is resting on the pan its weight determines which one of three chutes it shall drop into when it is pushed off. These chutes lead to three boxes, one for those coins that are too light, a second for those that are too heavy and a third for those that are of the correct weight. The 10 cent and 5 cent pieces are weighed in groups in a hand scale against a standard dollar weight, while the 1 cent pieces are weighed in a hand scale against an avoirdupois pound which should contain exactly 80 of them. After further examination the perfect gold coins and the 50 and 25 cent silver pieces of correct weight and colour are rung singly on an iron block to find if they have the correct ring and are not "dumb". All dumb or otherwise imperfect coins are defaced and remelted. Testing and weighing.

¹ Gold of suitable quality requires to be refined by the electrolytic process, and it is probable that a plant for this purpose will be erected in the Mint. The supply of silver bullion comes from the smelting and refining works at Trail, B.C., and is very satisfactory.

Automatic counting. Perfect coins are counted by a telling machine which automatically counts and delivers into a bag any number of coins as required from 100 to 2,000, and any size of coin from 50 cent to 5 cent pieces.

Storage of bullion. Bullion is stored at the Mint in three strong rooms, fire and burglar proof, and fitted with doors each of which has four combination locks controlled by triple time clocks and arranged so that no door may be opened without the presence of at least two officials.¹

Agricultural census of Eastern Canada, 1907. An agricultural census of Ontario, Quebec and the Maritime Provinces was taken through the medium of the post office during the year 1907 by the Census and Statistics Office of the Department of Agriculture. The Bureau of Industries for the province of Ontario co-operated by undertaking the compilation of the statistics received for that province. The results are tabulated in this volume of the Year Book. In comparison with the general census of 1901, for the five provinces, the amount of cleared farm land shows an increase of 2,877,992 acres. The acreage of all field crops has increased by 1,535,679 acres, including 451,270 acres in oats, 333,798 acres in mixed grains and 1,128,256 acres in hay. Wheat shows a net decrease of 699,814 acres and of 10,533,604 bushels, which is no doubt a result of the larger and cheaper production of this cereal in the Northwest provinces. All descriptions of live stock show numerical expansion, the most noteworthy increases being 310,912 in the number of milch cows, 488,691 in the number of other horned cattle, and 947,677 in the number of pigs.

Progress of the experimental farms. The central and branch experimental farms, which were established under an act of the Dominion Parliament passed in 1886, have during 20 years exercised a constantly increasing influence upon the progress of agriculture in Canada. By the original scheme five experimental farms were created consisting of the central farm, near Ottawa, for the provinces of Ontario and Quebec and four branch farms at (1) Nappan, N. S., for the Maritime Provinces, (2) Brandon, for the province of Manitoba, (3) Indian Head, for the Northwest Territories and (4) Agassiz, for British Columbia, all five farms being under the control of the Director of Experimental Farms at Ottawa.

The work of the farms. Ranging over the whole of the wide fields covered by agriculture, arboriculture and horticulture, the work of the farms has included experiments relating to the breeding and feeding of farm live stock, the production of butter and cheese, field crops, natural and artificial fertilizers, cereals, grasses, forage plants, fruits, vegetables, plants, trees, plant diseases, and injurious insects. An annual distribution to farmers of carefully selected seed has had a widespread influence in improving the quality

¹ These particulars are abstracted from a paper on the Mechanical Equipment of the Ottawa Mint by A. H. W. Cleave, superintendent of the works, which was read before the Mechanical Section of the Canadian Society of Civil Engineers on February 27, 1908.

and yield of the grain and other crops throughout the Dominion. The farms are also intended to be bureaus of information to which agriculturists may resort for the solution of difficulties in farm work. That they have not failed to derive increasing benefit from the advantages thus provided is shown by the records of letters sent and received and of bulletins and reports issued. In 1889, the year after the farms had become fairly organized, the number of letters received at the central and branch farms was about 8,000. Ten years later, in 1899, the letters received numbered 69,669 and the replies sent 36,590, the remainder being answered by printed circulars. In that year also 215,000 copies of reports and bulletins were distributed. For the twelve months ended March 31, 1907, the number of letters received was 98,393, the number of letters sent out was 54,576, and the reports, bulletins and circulars (including those relating to samples of seed grain) numbered 310,217 copies.

The following statement shows the distribution of the correspondence amongst the various departments for the year ended March 31, 1907 :

Correspondence with farmers.

Two new branch experimental farms have now been established, one in 1906 at Lethbridge, southern Alberta, and the other in 1907 at Lacombe, northern Alberta. The one at Lethbridge is situated about $2\frac{1}{2}$ miles from the town, on the Lethbridge and Crows Nest section of the Canadian Pacific Railway. It consists of 400 acres of land, 100 acres of which can be

irrigated. The other 300 acres lie too high to admit of this and will be devoted to experiments in dry farming. On the irrigated portion the effect of water in the raising of crops under different conditions as to quantity, number of applications, etc., will be studied, and on the higher land experiments will be conducted upon the lines of general dry farming to ascertain what crops can be grown and what treatment of the land is best where the rainfall is scanty. The farm for northern Alberta is a quarter section of land adjoining the town of Lacombe, about a mile from the railway station. Lacombe is a busy town about 70 miles south of Edmonton, and the centre of a good agricultural district on the Canadian Pacific Railway from Calgary to Edmonton. It has also a branch line running east to Stettler, 51 miles distant, a line which will probably soon be extended to Moosejaw. The farm site has a good soil representative of the district and lies in a commanding position overlooking the railway and the surrounding country.

Acquisition of the Pablo herd of buffalo. An event of interest to lovers of natural history was the acquisition by the Dominion Government of the famous Pablo herd of buffalo and the transportation of the animals from their home in Montana, U.S.A., to Alberta, where reservations are being specially prepared for them.

History of the herd. The herd was purchased from Mr. Michel Pablo, of Missoula, Montana. It had been collected with much pains and at great expense by Mr. Pablo's partner, the late Mr. Charles Allard. From a small beginning Mr. Allard, by breeding and purchase, developed it to upwards of 100 head in 1893, when he purchased the Buffalo Jones herd from Kansas and brought the animals, full bloods and half-breeds, to his Montana reservation. The cross-breeding of cattle and buffalo was soon abandoned as impracticable, as the cross produced seemed to possess all the poor qualities and few of the good qualities of the parents. Cross-breeds were accordingly separated from the buffaloes, whose purity has been maintained. The animals now number about 500, and it is stated that they constitute the largest herd of buffalo in existence upon the American continent.

Glanders or farcy and the exportation of horses to Great Britain. An Order of the Board of Agriculture and Fisheries in Great Britain, made on August 23, prohibits as from January 1, 1908, the landing in Great Britain of any horse, ass or mule from any other country except Ireland, the Channel Islands and the Isle of Man, unless accompanied by a certificate of a veterinary surgeon to the effect that he examined the animal immediately before it was embarked, or whilst it was on board the vessel, as the case may be, and that he found that the animal did not show symptoms of glanders or farcy.

Newfoundland Fisheries dispute with the U. S. Canada being interested in the controversy which has arisen between Newfoundland and the United States as to the true meaning of article 1 of the convention respecting fisheries which

was concluded in the year 1818 between the United Kingdom and the United States, the Government of Canada has joined with the Government of Newfoundland in an agreement to refer all matters of difference arising under that article to the Hague Tribunal.

By an Order of the Governor General in Council dated September 12, and in virtue of the provisions of the Fisheries Act, R.S. 1906, ch. 45, the Fishery Regulations of 1889 were rescinded and new Fishery Regulations in lieu thereof were promulgated. These were published in a supplement to the Canada Gazette of September 21; and they comprise General Fishery Regulations, Special Fishery Regulations for the provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and Ontario, and Fishery Regulations for the provinces of Manitoba, Saskatchewan, Alberta and the Northwest Territories, including the Yukon district.

The Dominion Archives Office, organized in 1872 for the collection and safekeeping of public records, was not housed in a separate and suitable building until 1907. It now occupies a fireproof stone building of three stories with a basement, 50 feet by 100 feet in extent, and is fitted throughout according to a well conceived plan for the care and classification of papers and records, and for the examination of them by students of our history and other persons who for business or other objects are concerned in the use of them. The basement of the building is occupied with a bindery and newspaper rooms; the ground floor with a library of printed books, the office of the translator and the administration rooms; the second floor with the manuscript room and the index room; and the third floor with the map room and the sorting room. In the library there are about 8,000 volumes and 15,000 pamphlets relating to Canada; and in the manuscript division there are on the shelves about 10,000 volumes, to which will shortly be added 5,000 volumes in process of classification. A card index of individual documents is being prepared, and during the last three years about 1,250,000 cards have been made. There are also in the Archives building 4,000 manuscript maps made by the Royal Engineers from 1764 to 1860.

An Historical Manuscript Commission has been appointed by the Government to act in an advisory capacity, composed of Prof. Adam Shortt, of Queen's University, Prof. G. M. Wrong, of Toronto University, Prof. C. W. Colby, of McGill University, and Prof. Joseph Roy and the Abbé Gosselin, of Laval University, with the Minister of Agriculture as chairman. Since 1904, when the late Douglas Brymner was succeeded by Arthur T. Doughty as Dominion Archivist, three annual volumes have been published, together with a volume of selected documents relating to the constitutional history of Canada, edited with notes by the Archivist and Prof. Adam Shortt. Other special volumes of

New Fishery
Regulations.

papers relating to the national development of the country are likely to follow at an early period. A new departure of the Archives Office is the collection of a large number of prints illustrating events in the life of the country and of portraits of the men who have taken leading parts in its affairs. The annual appropriation is \$50,000.

General thanksgiving. Thursday, October 31, was appointed by proclamation of the Governor General as a day of general thanksgiving to Almighty God for the bountiful harvest and other blessings with which Canada has been favoured during the year.

Armorial ensigns for the province of Alberta. By royal warrant of May 30, directed to the Duke of Norfolk, K.G., G.V.O., earl marshal and hereditary marshal of England, there was granted to the province of Alberta, to be borne on seals, shields, banners, flags or otherwise according to the Laws of Arms, the armorial ensigns following: 'Azure in front of a Range of Snow Mountains proper a Range of Hills Vert, in base a Wheat-field surmounted by a Prairie both also proper, on a Chief Argent, a St. George's Cross. All the nine provinces of the Dominion of Canada have now their appropriate heraldic emblems.

The Senate. Three vacancies in the Senate occurred by the resignation of the Hon. Sir J. R. Gowan, K.C.M.G., and the deaths of the Hon. Sir William Hingston and the Hon. C. F. Casgrain. New Senators appointed and sworn in during the year were the Hon. John Costigan, of Edmundston, N. B., the Hon. G. W. Ross, of Toronto, the Hon. Robert Beith, of Bowmanville, Ontario, the Hon. Daniel Gilmour, of St. George, N. B., the Hon. A. H. Commeau, of Meteghan River, N. S., the Hon. G. C. Dessaulles, of St. Hyacinthe, Quebec, the Hon. N. A. Belcourt, K.C., of Ottawa, the Hon. Archibald Campbell, of Toronto Junction, and the Hon. Daniel Derbyshire, of Brockville, Ontario.

House of Commons. Twelve vacancies occurred in the House of Commons during the year, and the following members were elected to fill them, viz.: the Hon. Jacques Bureau, for three Rivers and St. Maurice, Quebec, Pius Michaud, for Victoria, N. B., R. C. E. Laurier, for L'Assomption, Quebec, Adélar Lanctot, for Richlieu, Quebec, the Hon. G. P. Graham, for Brockville, Ontario, the Hon. Wm. Pugsley, for St. John City and County, N. B., Thomas Beattie, for London, Ontario, C. L. Owen, for Northumberland East, Ontario, A. M. Martin, for Wellington North, Ontario, C. B. Major, for Labelle, Quebec, J. B. T. Caron, for Ottawa, and John Stanfield, for Colchester, N.S.

Obituary notes. The following deaths occurred during the year. Dec. 28, 1906. Charlemagne Laurier, M.P. for L'Assomption, Quebec. Jan. 1, 1907. The Hon. Sir William P. Howland, K.C.M.G., C.B., aged 96. Jan. 10. The Hon. C. C. Colby, President of the Council, 1889-1891. Jan. 25. The Hon. Andrew G. Blair,

Minister of Railways and Canals, 1896-1903. Jan. 27. The Hon. John Dobson. Feb. 3. The Lady Victoria Grenfell, eldest daughter of T. E. the Governor General and the Countess Grey. Feb. 19. The Hon. Sir William Hingston, aged 78. Feb. 24. His Honour J. B. Snowball, Lieut.-Governor of New Brunswick, aged 70. Mar. 8. The Hon. C. E. Casgrain and E. Cochrane, M. P. for Northumberland East, Ontario. March 12. Thomas Martin, M.P. for Wellington North, Ontario. Mar. 15. A. A. Stockton, M. P. for St. John City and County, N. B. Dec. 18. The Hon. Joseph Israel Tarte, Minister of Public Works, 1896-1902.

Mar. 2. The Hon. Lemuel John Tweedie, K.C., of Chatham, New Brunswick, to be Lieut.-Governor of New Brunswick in the room and stead of His Honour J. B. Snowball, deceased. Lieut.-Governor of New Brunswick.

June 17. Alexander Henderson, of Vancouver, B.C., to be Commissioner of the Yukon Territory in the room and stead of W. W. B. McInnes, resigned. Commissioner of the Yukon Territory.

During the year the necessary steps were accomplished for replacing the jurisdiction of the supreme court of the Northwest Territories in Alberta and Saskatchewan by that of the provincial supreme courts contemplated by the Alberta and Saskatchewan Acts of 1905 and constituted by the local judicature acts. Supreme courts of Alberta and Saskatchewan.

In consequence of this re-organization judges of the supreme court of the Northwest Territories were transferred to the supreme courts of the two provinces, these judicial appointments being as follows: The Hon. Arthur Lewis Sifton to be the chief justice of the supreme court of Alberta, with the style and title of 'The Chief Justice of Alberta,' and the Honourables David Lynch Scott, Horace Harvey and Charles Allan Stuart to be puisné judges of the supreme court of Alberta. The Hon. Edward Ludlow Wetmore to be the chief justice of the supreme court of Saskatchewan, with the style and title of 'The Chief Justice of Saskatchewan,' and the Honourables James Emile Pierre Prendergast, Henry William Newlands, and Thomas Cook Johnstone to be judges of the supreme court of Saskatchewan, each with the style and title of a 'Justice of the Supreme Court of Saskatchewan'. Judicial appointments in Alberta and Saskatchewan.

Jan. 14. Edmund Guerin, of Montreal, to be a puisné judge of the superior court of the province of Quebec in the room and stead of the Hon. C. J. Doherty, resigned. Other judicial appointments

Jan. 29. The Hon. Henri Thomas Taschereau, a puisné judge of the superior court of the province of Quebec, to be chief justice of the court of king's bench for Quebec in the room and stead of the Hon. Sir A. Lacoste, resigned.

Arthur Aimé Bruneau, of Sorel, Quebec, to be a puisné judge of the superior court of the province of Quebec in the room and stead of the Hon. N. Charbonneau, transferred to the judicial district of Montreal.

Paul Gédéon Martineau, of Montreal, to be a puisné judge of the superior court of the province of Quebec in the room and stead of the Hon. J. A. C. Madore, who died on November 3, 1906.

Mar. 11. Alexander George Cross, of Montreal, to be a puisné judge of the court of king's bench of the province of Quebec in the room and stead of the Hon. R. N. Hall, resigned.

Mar. 13. The Hon. Arthur Drysdale, K.C., of Halifax, N.S., to be a puisné judge of the supreme court of Nova Scotia in the room and stead of the Hon. D. C. Fraser, appointed Lieut.-Governor of Nova Scotia.

Sept. 23. The Hon. John Henderson Lamont, of Prince Albert, to be a judge of the supreme court of Saskatchewan.

Nicholas Du Bois Dominic Beck, K.C., of Edmonton, to be a puisné judge of the supreme court of Alberta.

Oct. 11. The Hon. Auguste Tessier, of Quebec, to be a puisné judge of the superior court of the province of Quebec in the room and stead of Mr. Justice Larue, retired.

Nov. 2. The Hon. Charles James Townshend, of Halifax, N.S., to be chief justice of the supreme court of Nova Scotia in the room and stead of the Hon. R. L. Weatherbe, resigned.

Frederick Andrew Laurence, K.C., of Truro, N.S., to be a puisné judge of the supreme court of Nova Scotia in the room and stead of the Hon. C. J. Townshend, appointed chief justice of Nova Scotia.

Ministerial
changes.

Feb. 14. Jacques Bureau, of Three Rivers, Quebec, to be Solicitor General of Canada in the room and stead of the Hon. Rodolphe Lemieux, appointed Postmaster General.

Aug. 30. William Pugsley, K.C., of St. John, N.B., to be a member of the Privy Council and to be Minister of Public Works in the room and stead of the Hon. Chas Hyman, resigned.

George Perry Graham, of Brockville, Ontario, to be a member of the Privy Council and to be Minister of Railways and Canals in the room and stead of the Hon. H. R. Emmerson, resigned.

Commissioners.

Feb. 2. William Lyon Mackenzie King, C.M.G., of Ottawa, and His Honour John Winchester, judge of the county court of York, Ontario, to be commissioners to investigate and report in the matter of a dispute between the employees of the Bell Telephone Company of Canada at Toronto and the said Company.

April 6. Thomas Alexander Borthwick, of Mistawasis, Saskatchewan, to be a commissioner to take adhesions to Treaty No. 10 of such Indians as were not met with by the commissioner who negotiated that treaty last year and to investigate and report upon certain claims for half-breed scrip, etc., etc.

May 8. John Mortimer Courtney, C.M.G., I.S.O., of Ottawa, Thomas Fyshe, of Montreal, and Philippe J. Bazin, of Quebec, to be commissioners to inquire into and report upon the operations of the existing Civil Service Act and kindred legislation, with a view to the proposing of such changes as may be deemed

advisable in the best interests of efficiency in the public service ; John Mortimer Courtney to be chairman and Thomas S. Howe, of Ottawa, to be secretary of the commission.

Aug. 30. Henry Holgate, C.E., of Montreal, John G. G. Kerry, C.E., of Campbellford, Ontario, and John Galbraith, Dean of the Faculty of Applied Science and Engineering and Professor of Engineering in the University of Toronto, to be commissioners under the Inquiries Act, ch. 104, R. S. 1906, to investigate and report upon the cause of the collapse of the Quebec Bridge and all matters incidental thereto.

Oct. 12. William Lyon Mackenzie King, C.M.G., of Ottawa, Deputy Minister of Labour, to be a commissioner under ch. 104 R. S. 1906, to inquire into and report upon the losses and damages sustained by the Japanese population in the city of Vancouver, B.C., on the occasion of the recent riots in that city ; also (Nov. 5) to be a commissioner to inquire into and report upon the methods by which oriental labourers have been induced to emigrate to Canada during the present year.

June 25. To be Knight Commander of the Order of St. Michael and St. George : The Hon. Charles Fitzpatrick, Chief Justice of Canada and administrator of the Government in the absence of the Governor General. Imperial honours and decorations.

To be Knight Commander of the Royal Victorian Order : Sir Thomas George Shaughnessy, President of the Canadian Pacific Railway Company.

Aug. 28. The dignity of a knighthood of the United Kingdom was conferred upon His Honour William Mortimer Clark, K.C., Lieut-Governor of the province of Ontario and upon François Charles Stanislas Langelier, LL.D., assistant chief justice of the superior court of the province of Quebec.

June 25. To be Companions of the Order of St. Michael and St. George : Alfred Duclos DeCelles, LL.D., General Librarian of Parliament and Martin Joseph Griffin, LL.D., Parliamentary Librarian.

To be Commander of the Royal Victorian Order : Sir Hugh Montagu Allan, Director of the Allan Steamship Company.

To receive the Imperial Service Medal : Jan. 8. George Bonner, lightkeeper, Point Aconi, N.S., George Currie, lightkeeper, Isle of Coves, Ontario, Narcisse Cusson, letter carrier, Montreal, Joseph Roy, messenger, Attorney General's Department, Quebec, William Stephen Short, letter carrier, London, Ontario, Dorilas Tremblay, lightkeeper, Portneuf, Quebec. April 2. George Walker, messenger for the offices in Charlottetown of the Government of the Dominion of Canada. June 25. Thomas Amos and Pierre Blais, trackmen, I.R., André Bouchard, messenger, Legislative Assembly, Province of Quebec, John Baptiste Couture, trackman, Joseph Dumas, track foreman, William Gillen, porter and Alexander Henderson, track carpenter, I.R., George Bricot Lamarche, store-keeper, St. Vincent de Paul Penitentiary, John Lindsay, track-foreman, John McFadzen,

conductor, Walter Neville, trackman and John Stewart, engineer, I.R., Alfred Stewart, gaoler, Provincial Gaol, Saskatchewan, Crawford Virtue, lock labourer, Rideau Canal, Edward White, cleaner, I.R. Oct. 2. Joseph Blouin, messenger, Department of Public Instruction, Quebec, James Bradley, lockmaster, Welland Canal, Napoleon Charbonneau, steward, St. Vincent de Paul Penitentiary, David Hunter, lightkeeper, Port Dalhousie, Ontario, Matthew Henry Johnstone, lockmaster, Rideau Canal, William McGregor Lambert, lightkeeper, Chantry Island, Ontario, Jules Gabriel Martin, lightkeeper, Little Métis, Quebec, John Jarvis Newman and William Newman, lockmasters, Rideau Canal, Odilon St. Denis, sergeant Royal North West Mounted Police, Cyrille Samson, lightkeeper, Ouetique Island, N.S.

Institution of
the Edward
Medal.

By royal warrant, dated October 17, H. M. the King has instituted a medal, to be called the Edward Medal, for courage in saving or attempting to save life in mines or quarries within His Majesty's dominions, protectorates, etc. The medal may be bestowed on persons of either sex and of any nationality and will be of two classes, designated 'The Edward Medal of the First Class', to be struck in silver and 'The Edward Medal of the Second Class', to be struck in bronze. Awards of the medal will be made on the recommendation of the Home Secretary in Great Britain¹.

Official
appointments.

February 13. Rodolphe Boudreau, of Ottawa, Assistant Clerk of the Privy Council, to be, from May 6, Clerk of the Privy Council in the room and stead of John Joseph McGee, superannuated.

Francis K. Bennetts, of Ottawa, to be, from May 6, Assistant Clerk of the Privy Council in the room and stead of Rodolphe Boudreau, appointed Clerk of the Privy Council.

May 28. A. P. Low, B. Ap. Sc., of Ottawa, Deputy Head and Director of the Department of Geological Survey, to be Deputy Minister of Mines.

Eugène Haanel, Ph. D. (BrsL.) F. R. S. C., of Ottawa, Superintendent of Mines, to be Director of the Mines Branch, Department of Mines.

John Marshall, of Ottawa, to be Chief Clerk and Accountant, Department of Mines.

¹ In February, 1908, the Edward Medal of the First Class was sent to Miss M. J. Lamb, of Newcastle-on-Tyne, England, in recognition of the gallant action of her brother, the late George H. Lamb, who lost his life in endeavouring to save the lives of five men at a fire which occurred on June 9, 1907, in the mine of the Strathcona Coal Company, at Strathcona, Alta.

NOTE. New Brunswick, Nova Scotia, Ontario and Quebec, the original provinces of the Dominion, were given representation in Parliament as provided in the B. N. A. Act, 1867, s. 37. British Columbia and Prince Edward Island were admitted 20 July, 1871, by an Imperial Order in Council of 16 May in the same year. Chapter 3 of 33 V. provided that on, from and after a day the Queen should by Order in Council admit Rupert's Land and Northwest Territory into the Dominion, there should be formed out of the same a province to be called the province of Manitoba. The admission of Rupert's Land and Northwest Territory was made under an Imperial Order in Council of 23 June 1870, to date 15 July of the same year. Manitoba was admitted under authority of chapter 3 of 33 V., 1870; but a doubt having arisen, the Imperial Parliament in 1871 passed an Act to make the Canadian Act valid and effectual. The Northwest Territories Representation Act, chapter 24 of 49 V. (assented to June 1886), gave two members to Assiniboia, one member to Alberta and one to Saskatchewan.

¹ Since the Representation Act was passed the districts in the Territories, exclusive of Yukon, have been erected into the provinces of Alberta and Saskatchewan, and in the acts constituting the provinces provision was made for the continuance of their representation until the census of 1906 had been taken. Some of the districts at present are partly in one province and partly in another. But see census tables of Northwest provinces, 1906, p. 161.

² The unorganized territories are without representation in Parliament.

¹ Not taken in 1871.

NOTE. The number of tenants for the census years 1871, 1881 and 1891 includes employees who had the charge of farms. Persons occupying farm lands, part of which was owned and part rented, were recorded in 1901 as owners and tenants. The number of occupiers of land in 1901 is exclusive of all persons holding less than five acres, and land occupied is farm land only.

Oats	" 9,998,556	16,654,322	31·4	20·0

NOTE. The average production of wheat per acre in Manitoba for the thirteen years 1890-1902, according to the local government returns, was 19·22 bushels per acre, of barley 30·77 bushels, and of oats 35·65 bushels. In the Territories according to similar returns for the five years 1898-1902 the average of wheat was 19·53 bushels, of barley 25·6 bushels, and of oats 35·30 bushels. The low average yield in the Census year 1901 was due to the relative dryness of the growing season—the rainfall being but little more than one-half an average.

TABLE XLIII. Mineral products by quantity and value, 1901—concluded.

Classes.	Quantity.	Value.
Quebec.		\$ 2,960,704
Metallic ores and products—		293,936
Copper ore raised	ton. 20,040	-
Copper ore marketed	" 20,040	101,260
Gold from placer mining	oz. 46	828
Iron ore marketed	ton. 3,150	6,457
Lead in matte	lb. 315,840	11,446
Pig iron	ton. 6,677	170,280
Silver in matte or concentrates	oz. 3,196	1,725
Silver-lead ore raised	ton. 2,440	-
Silver-lead ore marketed	" 92	2,000
Pigments—		17,050
Barytes	" 490	3,220
Ochres	" 1,182	13,830
Structural materials of stone and clay—		1,863,895
Common brick	NO. 89,955,528	492,921
Vitrified brick	" 543,000	11,310
Press'd brick	" 3,437,000	20,622
Terra cotta	" -	30,000
Drain tile	" 300,000	6,900
Sewer pipe	" -	163,000
Pottery and earthenware	" -	69,200
Granite	cu.yd. 51,873	560,236
Limestone (dimension)	" 97,710	223,580
Slate	sq. 5,000	21,000
Rubble and other stone	ton. 35,850	15,000
Lime	bush. 555,996	96,268
Sand and gravel	ton. 23,500	7,000
Portland cement	brl. 72,000	146,858
Miscellaneous products—		785,823
Asbestos and asbestic	ton. 22,922	416,832
Chromic iron ore	" 1,338	20,300
Felspar	" 213	820
Graphite, manufactures of	" 100	7,000
Plaster and other manufactures of gypsum	" -	6,000
Limestone for flux	" 3,880	1,382
Mica, crude	" 3,071	156,272
Mica, cut or ground	" -	95,226
Mineral water (natural, not in bottle)	imp. gal. 96,668	44,584
Phosphate of lime (apatite)	ton. 480	3,702
Pipe and boiler covering	" -	27,205
Silica (quartz)	" 5,000	6,500
The Territories (including Yukon).		9,973,558
Metallic ores and products—		9,163,443
Gold from placer mining	oz. 582,157	9,163,443
Fuel and light materials—		737,195
Anthracite coal	ton. 17,549	52,647
Bituminous coal raised	" 263,682	-
Bituminous coal marketed	" 263,682	612,948
Lignite coal	" 50,869	71,600
Structural materials of stone and clay—		72,920
Common brick	NO. 7,605,000	62,420
Sandstone	cu. yd. 1,250	7,000
Lime	bush. 17,500	3,500

THE MINES.

TABLE XLIV. Averages and ratios for mines and works, 1901.

Minerals.	Number of mines or works in operation.	Average value of real estate and plant per mine or works.	Average time of employees per mine or works.	Average salaries and wages per mine or work.	Average value of product per mine or works.	Ratio of salaries and wages to value of product.	Ratio of product to value of real estate and plant.
Asbestos	6	321,917	28,770	37,275	69,472	53.65	21.58
Cement, natural rock	3	21,167	7,000	11,300	35,333	31.74	168.19
Cement, Portland	7	94,437	16,964	31,645	109,411	28.92	115.85
Chromic iron ore	4	28,550	2,788	3,761	5,075	74.10	17.77
Coal, bituminous	41	925,106	88,402	181,472	290,220	62.52	31.37
Coal, lignite	14	23,066	1,635	3,750	5,114	73.32	99.06
Clay products	573	7,343	1,790	2,317	5,759	40.23	78.38
Copper ore	20	227,405	18,031	52,698	166,983	31.55	73.43

Slate	160,000	40	18,568	21,000
Miscellaneous products—	4,518,381	2,669	803,718	2,049,142
Asbestos	1,931,500	823	223,648	416,832
Chromic iron ore	114,200	75	15,044	20,300
Gypsum and manufactures of gypsum	461,270	485	151,327	282,834
Limestone for flux	13,000	104	55,850	68,351
Manganese ore	71,650	31	13,406	61,080
Mica (with phosphates and pyrites)	675,075	440	112,933	275,928
Mineral water	213,100	69	22,391	97,638
Moulding sand	-	5	1,077	2,138
Salt	573,776	298	86,444	345,148
Pipe and boiler covering	18,100	46	26,485	68,945
Mica, cut or ground	140,610	264	55,494	337,628
Other products	306,100	119	39,619	72,320

NOTE. In this table the value of copper ore and products comprises \$1,095,753 copper, \$250,175 gold and \$294,188 silver; the value of gold ore and products comprises \$4,496,681 gold, \$23,637 silver, \$39,811 lead and \$22,725 arsenic; and the value of placer gold comprises \$400 platinum. The total production of gold in the census year is 862,000 ounces, worth \$14,493,417. The statistics of values of real estate and plant, number of officers and workmen and cost of salaries and wages for placer gold mines are exclusive of Yukon territory.

MANUFACTURES.

NOTE. A census of population and agriculture of the Northwest provinces was taken under date of June 24, 1906, as provided by chapters 5 and 6 of 4 and 5 Edward VII. The electoral districts are as constituted by chapter 60 of 3 Edward VII, except that by an Order in Council of May 15, 1906, part of the electoral district of Selkirk, in the province of Manitoba, was added to the district of Winnipeg so as to conform with the boundaries of the city of Winnipeg as constituted by an Act of the Manitoba Legislature, assented to February 9, 1906; and except that the census districts of Assiniboia West, Mackenzie, Saskatchewan and Saskatchewan North, in the province of Saskatchewan, and of Alberta, Calgary, Edmonton, Strathcona and Alberta North, in the province of Alberta, are as constituted by the Order in Council aforesaid.

NOTE. The articles in this and the following table are usually grouped as natural products, as has been done in table xcvi under the heads of agricultural, animal, fishery, forest and mineral products, as well as in tables ci-civ. But by some authorities they are grouped with manufactured products, and they have been abstracted here to show the

Totals	5,975,391	7,937,208	9,331,178	14,236,416	12,850,458
Aggregates by countries—					
To Britain	52,743,993	51,055,123	47,940,952	55,044,306	43,158,189
To United States	21,145,693	21,032,213	23,039,201	33,472,583	27,829,111
To other countries	6,850,177	7,296,641	9,138,766	8,209,838	6,907,772
Totals	80,739,863	79,383,977	80,118,919	96,726,727	77,895,072

kinds and values of articles to be added to manufactures in those several tables, if so classified. If added to the exports of manufactures as given in table xcvi, p. 182, or in table civ, p. 245, the total values would be \$101,364,830 for 1903, \$99,248,026 for 1904, \$101,310,252 for 1905 and \$121,287,839 for 1906. Added to the exports of manufactures to Britain in table xcvi the total value for 1906 would be \$62,277,538, to the United States \$43,124,911, and to other countries \$15,885,390; and the total increase in the three years from 1903 to 1906 would be 20 per cent. But of course the chief component value of these exports is that of raw material.

¹ British and Canadian sea-going vessels in Canadian waters and Canadian vessels in other waters. ² 545 persons were lost by the wreck of the White Star ss. *Atlantic* in Turns Bay, Nova Scotia. ³ The returns to the Department of Marine and Fisheries give the number of lives lost as 602, which include 562 persons who were drowned in the wreck of the steamship *La Bourgoyne*, 60 miles to the south of Sable Island and therefore on the high seas. The vessel was running between New York and Havre.

NOTE. The statistics for the years 1895 to 1907 are for the 12 months ended June 30.

NOTE. The Eastern inspection division consists of all that portion of Ontario lying east of Port Arthur, and the provinces of Quebec, New Brunswick, Nova Scotia and Prince Edward Island; and the Manitoba division consists of Manitoba, Saskatchewan, Alberta, British Columbia and that portion of the province of Ontario lying west of and including the district of Port Arthur. The statistics of 1905, 1906 and 1907 in the table are based on the qualities of grain determined by sections 88-90 of the Grain Inspection Act of 1904.
